## NOTES OF THE WEEK.

### *The Prince Regent of Yugoslavia.*

A widespread feeling of relief will be experienced at the escape of the Prince Regent Alexander from assassination on the occasion of the ceremony of taking the oath to the new Constitution of the Kingdom of the Serbs, Croats, and Slovenes. The folly, no less than the criminality, of the outrage is so apparent that most people will be ready to believe in the extraneous source of the plot. Serbia, unfortunately, has a sad record in regard to attempts on the lives of her rulers. Political passions are indulged in so vehemently that it would seem as if some tool were always to hand to carry out foreign designs. No true Southern Slav could wish the Prince ill, as it is clear that the new State would suffer irreparable loss at this stage if anything happened to him. Popular expectation vested with special interest the journey abroad which His Royal Highness was undertaking when he was so suddenly recalled to Yugoslavia owing to King Peter's illness. Freedom from anxiety on this latter point will, it is hoped, enable Prince Alexander to resume his tour.

### *Bulgarian "Intrigues."*

References in the daily Press to alleged Bulgarian intrigues with the Turkish Nationalists indicate that the Allies are at last realising that the Treaty of Neuilly is as unjust in certain particulars as the Treaty of Sèvres. It would be asking the Bulgarians to be more than human if they remained content with their official policy of acquiescence in the terms imposed upon them by the Allies when they see the success attending Turkish intransigence. But there are no Anatolian highlands in Bulgaria, and it is difficult to believe that any Government in Sofia will be responsible for an attempt to set Bulgaria single-handed in conflict with the Allies. On the other hand, the Macedonian element in the Balkans is less hampered by considerations of the likelihood or unlikelihood of successful opposition, and it is for this reason that the Treaty of Neuilly offers no prospect of a lasting settlement. As for the alleged intrigues with Nationalist Turkey, we should imagine that, if the Bulgarian Government is contemplating the possibility of any modification of the Neuilly terms, it will be in accord with one or more of her former enemies rather than with Turkey. There were vehement protests at one time on behalf of the inviolability of the Treaty of Sèvres, but no responsible person urges the point to-day. Sooner or later the Allies will take up the same position with reference to the Neuilly terms as they do now in regard to Treaty of Sèvres. It will be better if they take advantage of the present revision of their Near Eastern policy, in order to bring about a more just settlement in Macedonia and Thrace.

### *The War in Asia Minor.*

The evacuation of Ismid may be sound strategy on the part of the Greek Higher Command, but it lends no immediate support to the military arguments which accompanied the Greek refusal of the Allied offer of mediation. That offer, however, as we pointed out last week, had perforce to be rejected. If the Greeks wish to strengthen their Smyrna front, it was a shrewd move that prompted them to withdraw from a sector which leaves the route towards Constantinople unguarded. The Kemalists, we are inclined to believe, have a sounder appreciation of military matters than those who are crying out at the defenceless position of Constantinople. Between them and the Allied garrisons is the Bosphorus, which presents certain difficulties to an attacking force from the Asiatic side. Artillery could, no doubt, make things uncomfortable for the capital, but we have yet to learn that the guns of the British Fleet, aided by aeroplane observation, would not be more than a match for any artillery that Angora can concentrate on the shores of the Bosphorus. All this alleged anxiety over Constantinople would seem to be prompted by a desire to support preconceived ideas regarding either the indispensability of the Greek army to the Allies or the impossibility of making the Angora authorities listen to reason.

### *The Allies and Greece.*

Mustapha Kemal Pasha, it must be admitted, is making it very difficult for those who want to see Turkey given a fair chance, and it is only possible to meet the arguments brought against a revision of the Treaty of Sèvres by a robust belief in the capacity of a people ultimately to rise superior to the follies and crimes of its rulers. The theory that there is hope even for the Turk under good government is not a popular one, and the majority of the "revisionists" seem to stop short at the plea of expediency. If they would stipulate that hand in hand with revision should go a reasonable attempt to provide Turkey with an efficient administration, the wind would be taken out of the sails of those opposed to revision. It is the past history of Turkey and the refusal to believe that the world can be made any better than it was or is that prompts the suggestion to hand Constantinople over to the proved incapacity and viciousness of an international régime; yet an unregenerate Turkey banished to the highlands of Anatolia must always be a graver danger to the world's

(RECAP) 481726

Digitized by Google

peace than Turkey with the measure of control provided by the presence of the Government in Constantinople. Mr. W. Pember Reeves couches a lance on behalf of the Greeks on the ground that they have proved a cheap ally. But there is no need to defend the Greeks; they have acted in a perfectly natural and straightforward way. The mistakes committed have been on the part of the Allies, who first sent them to Smyrna and then produced an impossible arrangement that offered no settlement of the Near Eastern question. If the Allies now disappoint Greece, it is for no fault of hers—however much they may seek to put the blame on King Constantine—but because their errors of judgment have been revealed, and the only possible course open to them is to reverse their decisions. Unfortunately, Greece suffers, or feels that she suffers; but, as has been often contended in these pages, when the first disappointment has passed it will probably be recognised that the Greeks, no less than the Allies, will be the gainers in the long run.

### *The Egyptian Delegation.*

Fears were entertained both in Alexandria and in Cairo that the departure of the Egyptian Official Delegation for England might give rise to disturbances, and in view of a demonstration which took place at the docks when Yussuf Pasha Soliman left, a week earlier, there was some excuse for uneasiness. Happily, however, Adly Yeghen Pasha and his party can have brought away with them only pleasant memories of their departure. For once in a way the Zaghloulites were dumb, and the Prime Minister and his companions had a most enthusiastic reception at Alexandria, followed by a magnificent send-off, in which delegates from all parts of Egypt, important notables, a representative of H.H. the Sultan, and some formerly prominent supporters of Zaghloul Pasha took part. The Delegation is expected to arrive in this country at the beginning of next week, and it may feel sure of a welcome here no less sincere, if less demonstrative, than the farewell accorded to it in Alexandria. It has a difficult task before it, and one which the manœuvres of the Zaghloulites have made much more difficult than it would otherwise have been. The extremists have put forward impossible claims and have led the ignorant mob to believe that they may be granted; and when that is shown to be impossible it will be the Delegation who will incur the mob's displeasure. But Adly Pasha and his companions are more likely to secure substantial gains for Egypt by persuasion and moderation than ever Zaghloul and his backers could have done by their insolent bluffing.

### *The South Persia Rifles.*

The announcement that the South Persia Rifles will shortly be disbanded is decidedly bad news. A report issued quite recently by the Secretary of State for India gave some account of the good work of this force, which has been rapidly restoring order in a region where disorder had come to be regarded as chronic; and it is to be feared that the disbandment will be followed by an early return to the brigandage and lawlessness which will cripple trade in a region where trade is largely in British hands. Unhappily, there is no prospect of the decision being reconsidered. The Persian Government is unwilling—presumably owing to its financial difficulties—to take the force over; the British Indian Government is unwilling to continue to finance it; and, naturally enough under present conditions, our own Government would not consider the matter. As a force, the S.P.R. seems to be doomed, and we can only regret that the hopes which we expressed a month ago regarding it have been so rudely dispelled.

### *The Persian Outlook.*

The outlook for Persia does not seem very bright just now. It is true that a treaty with Afghanistan has been signed, as a result of which Teheran and Kabul will exchange diplomatic and consular representatives, and a commercial agreement is expected to follow. But the financial situation shows no sign of improvement, and the Bolshevist menace still hangs over the North. Officially the Soviet troops have completed the evacuation of Enzeli, but a considerable number of them have remained behind and have joined themselves to the Persian insurgents in Ghilan and Mazanderan, where they are reported to have inflicted a defeat on the Persian Cossacks. This looks as if the *moral* of the latter force had deteriorated; and if that be so, Persia will soon be without any trustworthy defence force at all, North or South. Meanwhile, although Bolshevism is not having things all its own way across the border, the Soviet representative in Teheran has been entertaining in a style which is said to surpass in brilliance any of the parties given in the days of the Tsar. "The whole British colony," we are informed, "attended . . . and appeared to enjoy a delightful evening."

### *India's Industrial Needs.*

Enthusiasts in the cause of Indian industrial development, who have been seeking eagerly for a sign from the new Viceroy, appear to have derived much comfort from the proceedings at the State Birthday Dinner in Simla, when Lord Reading took occasion to propose the health of the provincial Ministers of Industries. As a matter of fact the Viceroy's speech was strictly confined to generalities appropriate to the toast, but Indian critics have made up their minds that he says less than he means, and that they are entitled in consequence to discover their own ideas beneath his graceful phrases; and having made that discovery, they are naturally pleased at the result. We do not, however, suggest that Lord Reading is in any way backward on industrial questions. We believe he is thoroughly sound, but in any case their prominence in his Council is guaranteed by the presence of Sir Thomas Holland, who is reported to have said recently that he regarded the development of industries as the most important product of the new Constitution. That statement is perhaps a little too strong, for man comes before machinery, but it is true at any rate that industrial development is the most immediate need, because an increase in the country's income is a condition precedent of all social or political advance; and it is satisfactory to know that, though we hear little on the subject, the large schemes propounded by the Industries Commission are steadily being hammered into shape.

### *Sentiment in Industry—*

Sir Thomas Holland's real task is, however, something more difficult than the creation of efficient administrative organs, for he has to take the lead in directing national sentiment into the channels where it can do the most useful work. The failure of the *swadeshi* movement showed sufficiently that sentiment unassisted cannot make the wheels go round, and just now some unbalanced sentimentalists are busily attempting to bring the wheels to a stop; at this juncture the remedy for India's poverty depends most of all on leadership, and this quality must be looked for mainly among the members of the provincial legislatures. Each province has now a Minister in charge of industrial development, and the most encouraging feature of their recent conference in Simla was the way in which Sir Thomas adapted himself to their idiosyncrasies, because it is only by working in harmony with them that enlightened views can be presented with authority before the legislatures which have to sanction and finance the various concrete schemes. The driving-power of the movement must be provided by Ministers possessing the confidence of the legislatures, but in determining its direction they will be well advised to rely very largely on Sir Thomas and on the body of expert opinion of which he is the head.

### *— And in Defence.*

The publication of the scheme for laying the foundations of a Territorial Army in India reminds us that the Commander-in-Chief is dealing with a position essentially similar to that which confronts the Member for Industries. National sentiment insists on being provided with opportunities for sharing in the task of national defence, but sentiment unassisted will not keep predatory neighbours at bay, and the problem is to provide an organisation in which the art can be learned without giving offence to the sentiment out of which the demand arises. On paper the scheme now published appears to be promising: the Territorial battalions are

Digitized by Google

to be separate entities from the start, though they are linked to regular regiments; British officers are to be lent until the battalions are able to officer themselves; and Indian as well as British instructors are to be provided, except in the case of the University corps, which have expressed a preference for British instructors only. It will, of course, be some time before we can know whether the scheme is a success, but we do not think anyone can deny that it is a straightforward attempt to give what is demanded, and we share the hope expressed by Lord Rawlinson that Indians will set to work to give it the best possible chance.

# THE WEEK AT HOME.

LONDON, Monday Evening.

**The Coal Settlement.**

The coal stoppage is over, and the mines are in full swing again. The cotton dispute has also been adjusted, and the engineering crisis is settled. There is, therefore, some prospect that industry may settle down again to business, and that with cheaper production the whole position will improve. Whether the improvement is to be permanent depends on various factors which are as yet hardly calculable.

The details of the mining settlement are easily summarised. There is a reduction of wages, increasing month by month for three months, which the temporary subsidy from the Government will alleviate. The miners abandon the claim for a national pool; on the other hand, the owners concede a system of profit-sharing. There does not seem in this anything that could not have been achieved with a little goodwill three months ago; it was the demand for a national pool, supported by a subsidy, that blocked the way on the one side, and the equally "stand-pat" attitude of the owners that rendered progress impossible on the other. But since the campaign was run openly on the national pool, the miners must accept the conclusion that they have been beaten; it is just possible, however, that they will find in the long run they have gained by the introduction of profit-sharing more than they have lost by giving up the pool.

**Profit-Sharing.**

But it will be a long time before we can come to any definite conclusion on that matter. The introduction of the idea obviously implies the assumption on both sides that there will be profits in the coal trade to share—for even the most cynical Socialist hardly suggests that the owners only promise a share of profits when profits have for ever disappeared. If it leads to a restoration of the old rate of production of coal, it will not send prices up, but rather tend to bring them down, and it should go some way to ensure that the miners do not slack, and that the owners reopen the best seams. On both matters there has been grave reason for mutual complaint and recrimination in the past.

But the permanent success of profit-sharing depends on co-operation and mutual trust—factors which have been far to seek in this industry. I notice that Mr. Harold Cox, an orthodox economist, has no belief in the thing, on the ground that profit-sharing is a form of charity, a kind of bonus which the workman expects in bad times as well as good. His reasoning does not altogether convince me; but it is impossible not to be impressed by the figures he quotes as to the failure of schemes of profit-sharing already tried in various industries. It is a melancholy record of high hopes extinguished gradually by accumulating difficulties.

**A Labour Revision.**

The coal dispute and its conclusion have left their mark on Labour theories. The orthodox doctrine as to strikes is that they should never be called on a falling market; the newer theory was that the state of the market made little difference because it was possible to inflict so much loss and suffering on the community that the masters would be compelled by public opinion to give way. It must be admitted that the orthodox doctrine emerges from the coal trouble with increased authority. The community has unexpected reserves of strength and resisting power; public opinion has, on the whole, been with the miners so far as they resisted excessive reductions of wages, but it has shown little sympathy for the national pool—although Mr. Hodges argued his case well enough, albeit apparently without full conviction—and the public has been dead against the subsidy and the attempts (which happily failed) to call a general strike.

For that reason Labour is less enamoured of the strike weapon than it was; the more orthodox Trade Union leaders believe that more can be done by negotiation than by strikes, and their opinion seems to be justified, although the strike weapon must be retained as a last resource. "Direct" or industrial action having failed, there is now a tendency for Labour to revert to political action; for the time being the Constitutionalists, who are in an enormous majority in the party, have triumphed.

But they will have to fight to hold their own. Their difficulty is that although they are right in their main idea, political or constitutional action being the only real path to success, they are unable to translate their ideas into action. The reason for that is very largely their inadequate political personnel.

**The Government Revives.**

The Coalition stock is up again. Not only is the Labour Party in the dumps; the attempted reunion of Independent and Coalition Liberals has been nipped in the bud by Mr. Asquith. He will have nothing to do with the seceders; they have made their bed and can lie in it, in his opinion; and he takes the heroic view of Macaulay's "Lays" that man cannot die better than facing fearful odds. The result is that unless Mr. Asquith is extinguished Liberalism will be extinguished; the Coalition Liberals are safe and snug in the Government blanket, and the "Wee Frees" stir no response whatever in the country.

Talk has again revived of a General Election in the autumn, on an anti-separatist and anti-Socialist platform for the Government. But everything depends on the Irish negotiations, and public interest in the political rumours of an election is not very great.

**Ireland.**

The unconditional invitation which Mr. Lloyd George extended to Mr. De Valera was followed by a release of prisoners to enable the Irish "President" to discuss the position with his lieutenants. But so far from straightening things out, the invitation has up to the present only resulted in a further tangle. Mr. De Valera has replied to Downing Street, acknowledging the communication but not directly accepting it.

Before doing so, he wants a conference with Sir James Craig, the Ulster Premier, in Dublin. This Sir

James has refused, apparently on the ground that Ulster has her own properly defined Parliament and status, and that the rest of Ireland must look after herself. It is possible that Mr. De Valera may use this refusal as a ground for refusing Mr. Lloyd George's invitation; should that be the case, it would be ill-advised on his part. But the Southern Unionists have agreed to meet him in Dublin to discuss the position. It is pretty well understood that his real difficulty is that in any bargain between Southern Ireland and England both sides would have to make concessions, and the Sinn Fein extremists are in revolt against any idea of accommodation. Nothing less than independence and a recognition of the "Republic" will satisfy them.

It is well known that De Valera does not take this view, and is personally ready to make concessions so long as he is met by concessions on our side, but his position is an extremely difficult one, and if the negotiations were entered into and broke down it might become impossible. For that reason it is suggested that he may use Sir James Craig's refusal to come to Dublin as a ground for his own refusal to come to London. In that event the tragedy of Ireland would continue.

**The New Expedition.**

Enormous interest and enthusiasm have been aroused by Sir Ernest Shackleton's new expedition, which is at once romantic and scientific. His little vessel, the Quest, of only 200 tons, is to circumnavigate the globe, after the manner of the old explorers, but it is to carry with it biologists, geologists, and an oceanographer to survey the depths of the seas. The programme is a magnificent one.

From the Salvages, near Madeira, the vessel goes to St. Paul's Rocks, thence to South Trinidad, to explore a petrified forest, and afterwards to Tristan da Cunha and Gough Island, which has probably not been visited more than once or twice since Captain Gough claimed it for England in 1731. Here soundings are to be taken to see if the biological hypothesis of an old Afro-American continent can be proved. From Cape Town the Quest will visit Endeby Land and South Georgia, of which nothing is known save Captain Cook's description in 1775: "The wild rocks raised their lofty summits till they were lost in the clouds, and the valleys lay covered with everlasting snow. Not a tree was to be seen, nor a shrub big enough to make a toothpick." Later she will search for the lost Pacific Island of Tunaki and the alleged Dougherty Island.

This is exploration on the heroic scale. Popular interest will be maintained in the adventurous side of the enterprise, for some of the seas are uncharted and a large part of the Antarctic Continent is unknown; but the voyage may well prove as important to biology and geology as those, nearly a century ago, which were made by the famous trio, Darwin, Huxley, and Hooker, which with Lyell's geology revolutionised our conception of the universe.

**Odium Theologicum.**

The religious controversy, to which I alluded recently, between the Broad Churchmen and other varieties of opinion, seems likely to become acute. Not only are the Low Churchmen and the Nonconformists opposed to the Broad Church teaching, but the High Church have now entered the field. At the recent meeting of the English Church Union, the representative society of the High Churchmen, a sustained attack was made on the "Modernists," and the *Church Times*, the organ of the High schools, while sneering at the Broad Churchmen as mere intellectuals, definitely lays it down that they are the enemy. It may be taken for granted that the progressives will answer the orthodox at their next Congress; they are not so well organised for a press campaign as their opponents, only being equipped with a monthly review, whereas the *Church Times* is a flourishing weekly. But in a battle of wits I fancy the Broad will give a good account of themselves.

But there is also the Broad High School to be reckoned with. As its name implies, it does not go quite so far as the broadest of the Broad, while it retains a good deal of the highness of the High; probably this two-dimensional variety of clericalism will exercise a moderating influence. It does not contemptuously ignore modern thought, like the extreme High variety, which never ceases to regret the Middle Ages; but it does not accept the extreme Broad Church position, which to many seems untenable by men in holy orders.

**The Excess of Sport.**

In one or two quarters lately I have noticed signs of a reaction against sport, or rather against the excessive attention which the newspapers and public are devoting to it. Hardly a day passes without an international championship in golf, tennis, cricket, or polo, which attracts its thousands and gets its two or three columns in the papers. I doubt whether things have reached such a pitch before. The objectors are not men of the kill-joy type—in fact, they are mostly good sportsmen themselves. But they suggest that the thing is being overdone, and that these contests are taken too seriously; and some are of opinion that the inevitable result is an increase of professionalism in every sport, which must in the long run sap the spirit of the game. Certainly some of the second-class matches at cricket, which only attract a small handful of spectators, are more interesting to watch than the bigger games, where there are more reporters than players. And, after all, the fate of civilisation does not depend on one's golf handicap.

**The Litigation Market.**

The civil judicial statistics just published make curious reading. In 1919 there were 513,448 cases, an increase of some 24,000 over those of the previous year; the total is, however, still less than half the pre-war figures; so that, if war has not ended war, as Mr. H. G. Wells prophesied, it has at any rate lessened our quarrelsomeness at home. The falling-off is mainly in the county courts, which only do one-third of their old business. There is, however, an increase in divorce—from 2,689 to 5,763 cases, in 1918 and 1919 respectively; the increase over 1913 is far greater—355 per cent. But of these poor persons' suits numbered 2,341: and a legal luminary assures me that many of these suits would have been brought years ago had the rules permitted.

In 40 per cent. of the divorce suits there were no children; in 24 per cent. the marriage was less than five years old. 34 per cent. of the marriages had lasted five to ten years, and 42 per cent. more than ten years. 21 per cent. of the parties were under age at the date of marriage.

It has been said that childless marriages are most likely to lead to divorce, and that the eighth year of married life is the most critical. It can hardly be argued that these figures lend much support to those theories; indeed, I doubt whether they prove anything. A flippant bachelor of my acquaintance, however, says they prove that most people have not the courage of their convictions; he argues that for every person who seeks divorce, ten must wish for it. It is to be hoped things are not as bad as that; I am more inclined to believe the lady who remarked that the really serious menace to home life is not the unfaithful husband but the incompetent domestic of the day.

**Sherlock Holmes Redivivus.**

It is announced that a new series of Sherlock Holmes stories is to be published. The celebrated detective has already been killed by the author—twice, I fancy—and his last authentic exploit after his previous resurrection was to desert bee-keeping—perhaps when the Isle of Wight disease broke out—in order to chase a German spy in the approved fashion in 1914. I was afraid that he had finally disappeared in the war, but we shall probably find him unravelling Bolshevist plots in Baker Street, to the envy of Sir Basil Thompson and the purblind detectives of Scotland Yard when he appears on the stage again. Or has Sir A. Conan Doyle received spirit messages from Sherlock and Moriarty, which will reconcile some of the contradictions between his own revelations and those of Mr. Vale Owen? Personally, I am glad that the author has returned to the scene of his first successes; it will be far more satisfactory to read than his psychical research.

OCELLUS.

# THE NEAR AND MIDDLE EAST

*(From Our Own Correspondents.)*

## EGYPT.

CAIRO, June 19.

This week the seat of Government was transferred to Alexandria, whither the Sultan proceeded in State on the 16th instant. Contrary to previous custom, however, the various Administrations will not send their usual staffs to Alexandria, and the transfer will apply only to the immediate personnel of each Minister. It has been definitely arranged that the Official Delegation will proceed to Europe on July 1.

**The Alexandria Inquiry.**

The Military Court of Inquiry is busily taking evidence in Alexandria; but it will probably be some little while before it is able to present its report, and whether that report will be made public or not cannot be said at present. In this connection, it would, I think, be well to accept with every reserve statements which are made as to the manner in which the outbreak started. The various foreign correspondents telegraphed at the time to their papers divers versions which were obtained from sources that might ordinarily be regarded as trustworthy. But the atmosphere has been so charged with electricity, and it has been so obviously in the interests of certain elements to fasten responsibility on a particular section of the community, that it is quite impossible for the ordinary man to obtain corroboration of any particular statement in this respect. While it is perfectly clear that the demonstrations which preceded created an atmosphere of excitement conducing to the subsequent trouble, you would be well advised to abstain from giving publicity to any statements connecting any particular section of the community with the first hostile acts on Sunday, May 22, and Monday, the 23rd, and to await the report of the Court of Inquiry, which alone will be in a position to give an authoritative opinion in this respect.

**Mr. Churchill's Speech.**

Mr. Churchill's speech at the meeting of the Empire Cotton Association, wherein he said that Britain's work in Egypt was not yet completed, and the time had not yet come for the removal of British troops, has considerably disturbed the Egyptian community, which has loudly protested against these statements. At the same time his speech has brought home to thinking Egyptians the serious effects which the Alexandria events are bound to have on the future of their country, while it has been warmly welcomed by the foreign communities, who make no attempt to conceal their views as to the necessity of European control in matters of public security. It is, of course, not known whether he was expressing the view of the Cabinet or whether once again he was giving his own personal opinion, and for this reason the foreign communities do not intend to desist from their action in bringing pressure to bear through their Governments in this respect.

**The Bedouin "Invasion."**

Much quiet amusement has been caused out here by a reference in the English Press to the dangers of an invasion by Bedouin. This seems to have arisen through a message to a press agency stating that the Bedouin were marching on Ramleh.

As a matter of fact, this "invasion by Bedouin" is a hardy annual, and never fails to make its appearance in the news items whenever there is serious trouble in Egypt. Hitherto the "invasion" has always been referred to as coming from the West, whereas in this instance the news stated that the Bedouin were marching on Ramleh, which is to the East of Alexandria. The only Bedouin, of course, who could fill the bill of marching on Egypt are the Bedouin of the Western desert; and it would have been interesting if the message had explained how they intended to reach Ramleh, and why they refrained from marching on the prosperous towns which lie on their direct route. Joking apart, however, there is absolutely no foundation for this rumour; nor is there, indeed, any fear of any such occurrence. It is true, that during the events of 1919 there was a good deal of talk about the damage done and the ravages wrought by Bedouin. These were, however, not the desert Bedouin properly speaking, but the sedentary Arabs who have given up desert life and with it all the better characteristics of the Bedawi, and have settled down in and around the towns, and have there acquired vices which have given them the worst reputation of any element in the country. "Ask a Bedawi to lunch and he will steal your clothes" is a familiar Egyptian saying which epitomises the character of the sedentary Bedawi, on whom the local authorities, even in the piping times of peace, have to keep a very watchful eye.

As for the desert Bedouin, there is little to fear from them. They may cast covetous eyes on the prosperous cities inland, but they know full well the retribution that will follow any hostile act in this direction. I am of opinion that an invasion *qua* invasion does not come within their realm of practical politics, and in any case we may be certain that they will not make a move in this respect until they find that Egypt has been sufficiently weakened internally to be unable to resist such an attack. This is what has invariably taken place in the past, and we may be certain that so long as orderly Government continues in Egypt the much dreaded Bedouin invasion will exist merely in the imagination of newspaper correspondents.

**Railway Strike Averted.**

What threatened to be a serious strike on the railways has happily been averted, thanks to the tact and firmness shown by the general manager, Brigadier-General Blakeney. Some two months ago trouble arose in the workshops, and the men struck for four days; the dispute was settled and the men returned, but demanded payment for the four days in question. The administration declined at first, but eventually offered to pay them if they worked overtime or increased their output. This was apparently agreed to by the men, but on the following morning they returned to the charge, and declared that nothing short of the four days' pay without conditions would satisfy them.

It was evident that the same political influences had been at work as had been responsible during the past two years for all the so-called "industrial" trouble which had taken place in the Railways; and as every possible concession had been made to the men, and the conditions of service are really most favourable, the administration decided that things must be brought to a head, and they accordingly locked out the workshop workers. In taking this decision it was fully realised that there was a risk of a sympathetic strike taking place in the other branches of the service, but the administration, very rightly bearing in mind that the safety of the travelling public depended on the maintenance of discipline among those employed on the railways, made up its mind that this constantly recurring industrial trouble which was really due to political causes must be brought to a finish.

Its line of action has been fully justified by results. No strike took place in the other branches, where the men remained absolutely loyal, and within a few days the arsenal workers sent a deputation asking permission to return to work. The Railways stated their terms, which were not unduly onerous, but were sufficiently severe to act as a lesson, and the men having signified their acceptance of these terms, all but the ringleaders have been allowed to resume work. This is a signal victory, and General Blakeney deserves warm congratulations for his firm attitude, which, there is reason to believe, will not only prevent similar trouble in the future, but will go a long way towards breaking the influence which the political element had acquired over the industrial classes.

# SUDAN.

KHARTOUM, June 9.

**Blue Nile Irrigation.**

The Governor-General of the Sudan left Egypt last week accompanied by the Financial Secretary, in order to lay the situation in respect to the irrigating and development of the Blue Nile schemes before H.M. Government in London. The cost of the new works has been very adversely affected by the universal rise in the price of skilled and unskilled labour. The extra funds required for the completion of the project are estimated at some £8,000,000, and the departure of His Excellency somewhat earlier than usual is connected with the endeavour to raise the necessary sinews of war.

The Governor-General has approved of the appointment of the following permanent Labour Committee:—Chairman, Mr. H. P. Hewins, O.B.E.; and members, the Director of Intelligence, secretary, *ex-officio*, the Director of Agriculture, Mr. A. J. C. Huddleston, O.B.E., Governor of Khartoum Province, and Captain P. C. Lord, O.B.E., representing Railways.

The occurrence of sundry minor accidents with motor-cars has resulted in strong feeling that a stricter control should be exercised over native drivers; and it is rumoured that steps will shortly be taken to make them pass a severe examination in driving before being granted licences.

**From the Provinces.**

The following items of news are from the various provinces named:—

Halfa Province.—Ismail Bey Ramzi, the Governor of Assuan, visited Halfa on April 8, and, after the customary exchange of official visits, left for the North on the following day.

Blue Nile Province.—A presentation of medals for the Darfur campaign was made at Hag Abdulla on April 12 by the Governor, Mr. Iles, C.B.E., to the rank and file of No. 5 Company, Camel Corps.

Kassala Province.—As a result of the efforts of the Survey Department, some 45,000 feddans of land have been demarcated for registration to date. Good progress has been made in the new irrigation works. Excessive temperatures have been experienced; a maximum of 114.6 Fahr. was registered at Kassala on April 9, with a minimum of 62.6 Fahr. on April 12.

Upper Nile Province.—The Nile reached its lowest level for the year at Malakal on April 22, the gauge being 9.69 metres.

Reports from Talodi predict the closing of the Tonga-Talodi road to wheeled traffic by mid-June, on account of excessive rains.

Fung Province.—An annual event much looked forward to as a relief to the monotony of province life is the location of the various game-poaching parties who periodically raid the country in the neighbourhood of the Rahad and the Dinder. A band was recently reported at Khor Limona, and was eventually surrounded, seven of its members being captured, with their rifles and ammunition.

Bahr-el-Ghazal Province.—The well-known scientist Dr. Christy left Wau for Raga on April 3.

Outbreaks of cerebro-spinal-meningitis are reported from Gnopp, Lau, and Rumbek, the mortality being estimated at some sixty to 100 persons. This plague is now decreasing, but smallpox has made its appearance at Lau, and in spite of the very large number of vaccinations there have been several deaths among the native population.

Bimbashi Fergusson has recently made a tour of the unadministered and comparatively unknown Nuer country north of the Shambé-Rumbek road. He was well received by the populace, and it is hoped to bring this territory under administration next year.

Owing to the breakdown of the dredger Agrab, there has been considerable difficulty in transporting passengers beyond Lake Ambadi to the Meshra district.

Special efforts have been made by the Inspector at Yambio to form the nucleus of a native town, by collecting wandering craftsmen and giving them certain privileges in return for their undertaking to reside in the place for a definite period.

Inhabitants of the Mangayiat Hills have been harassed by a man-eating lion which has recently made its appearance in the neighbourhood, and is reported to have carried off several people. A fatigue party of native troops engaged in cutting grass in the vicinity was attacked by a she-leopard with cubs, two men being injured before the marauder was despatched.

There has been a heavy rainfall throughout the province, and a slight rise in the river at Wau in April last.

Nuba Mountain Province.—The establishment of a military post at Delami has borne fruit in the diminution of murders resulting from tribal blood feuds. The Koalib Nubas in the vicinity have shown marked friendliness to the Government, and have come forward freely to work on the new buildings.

Cattle plague is reported at Eliri, but later news indicates that the outbreak is slight. The province has been comparatively free from this pest this year.

The Sûk at Talodi is now completed, all the new shops being roofed with bricks and zibla, the absence of the thatched grass roofs being somewhat noticeable. Large quantities of dhurra are being brought into the Sûk, being sold at PT 55. per ardeb. Animal transport on the Talodi-Tonga road has been extremely difficult, owing to lack of water at Khor-Ragaba and the scarcity of wells.

Kordofan Province.—A serious railway accident took place on May 19 between the down El Obeid mail train and a troop special from El Obeid to Sennar at Kilometre No. 314, between Sagadi Junction and Jebel Dud Station. Fortunately there were no casualties among the troops; but several of the Mounted Infantry mules were killed and injured. The El Obeid mail train was less fortunate, nine persons being killed and twenty-four injured. There was very considerable damage to the rolling stock, and it has been necessary to divert the line round the scene of the disaster. The accident took place at about 1 a.m., and a European passenger who escaped with a severe shaking states that on getting out of his carriage and walking up the entire length of the two trains it was some time before any of the native passengers made any sound or proceeded to detrain. The Mounted Infantry proceeded to finish their journey to Sennar on foot.

Gambeila.—Reports to hand state that the bridging of the Birbir has been successfully completed in timber—span 64 ft. The new direct road to the River Sako is being rapidly cleared, and the Sako itself will be bridged about 2½ miles north of its confluence with the Baro.

---

KHARTOUM, June 16.

**Red Sea Province.**

Province headquarters were moved to Erkoweit on May 5. Several heavy thunderstorms are reported both from Erkoweit and Sinkat, and an exceptionally heavy hailstorm at Erkoweit on May 25. The road to Erkoweit has been very much damaged, and completely washed out in parts. It is, however, still practicable for motor traffic with minimum loads and extreme caution.

---

KHARTOUM, June 19.

**The Political Situation.**

The recent disgraceful scenes in Alexandria have caused the most intense indignation amongst all communities here, and the greatest astonishment has been evinced at the extraordinary communiqué from the Foreign Office, the evident efforts that have been made to minimise the several episodes, and the statement in the Press that the trouble was started by Greeks firing on a crowd of peaceful demonstrators. Nearly every member of the Hellenic community has either relations or friends in Alexandria, and it is interesting to note that the various accounts of what happened during the rioting show very slight discrepancies. Practically all the Egyptian battalions have been withdrawn from the Sudan and sent to Egypt, all their British officers having been removed in nearly every case. Local opinion is very emphatic on the absolute untrustworthiness of Egyptian troops and the hopeless inefficiency of Egyptian officers. It is universally thought that a couple of battalions of Sudanese, one in Cairo and one in Alexandria, would deal very successfully with the would-be rioters. The black troops, however, have so great an antipathy to the Egyptians that once they were loosed against the mobs it would be practically impossible to hold them in check until they were sated with slaughter. Many years ago a black battalion was stationed in Cairo for garrison duties. They were transferred back to the Sudan after a very short period, having frightened the gentle and law-abiding Egyptian out of his wits. The chief daily amusement of the battalion appears to have been derived from driving all over Cairo in hackney carriages and beating the drivers when they had the audacity to demand their fares. It is not unreasonable to suppose that the presence of black troops, entirely untrammelled

Digitized by Google

by political opinions, would have the most salutary moral effect on the Cairene and Alexandrian mobs.

**Province News.**

Latest reports from the White Nile Province indicate very great activity and progress in the construction and extension of District Offices at Kosti, Tendelti, Gebelein, and Dueim. In spite of the comparative stagnation of trade the amount of produce railed from southern stations during May totalled 576 tons, consisting principally of sesame seed and gum.

## YUGOSLAVIA.

BELGRADE, June 28 (Vidov Dan, 18, Old Style).

**The Constitution.**

On Vidov Dan, Tuesday, June 18, 1389, at Kossovo, the Serbian Empire of the Nemanitch dynasty fell, to be avenged at Kumanovo in 1912. On Vidov Dan, 1914, two revolver bullets at Serajevo killed the Archduke Franz Ferdinand, brought on the Great War, and shattered the dreams of Konopisht. On Tuesday, Vidov Dan, 1921, M. Pashitch manœuvred his Constitution through the House, in face of difficulties and opposition that would have daunted a less resolute man, and at noon a hundred and one guns from the old Roman fortress boomed forth the news that the Kingdom of the Serbs, Croats, and Slovenes at last has its Constitution, complete and legally passed by a majority of eleven, in the Constituent Assembly.

The veteran politician had sworn that he would proclaim the Constitution with guns on Vidov Dan, and he has kept his word. The past week has been one of feverish comings and goings, of rumours and denials, of meetings and consultations and compromises, and of an intensity of political feeling that an Englishman can scarcely realise. Interests of all kinds crossed and clashed and cleaved in a bewildering fashion. The Mohammedans of Bosnia supported the Government, though their leader, Dr. Spaho, resigned his position and portfolio on the eve of the voting. The Mohammedans of Macedonia, after putting forward extreme demands, also supported the Government. Of the Peasants' Party, some voted for and some against; for that organisation is not yet bound by ties of stern party discipline. The evening before the voting, one member attacked another when sitting in a café, and threatened to kill him if he voted for the Constitution: the other replied with equanimity that a bad Constitution was better than none, that unity of the State was the one vital essential, that the Austrians had tried to kill him in 1908 and again in 1914, and that threatened men lived long, and he voted "for." It is noteworthy that Dr. Trumbitch appears to have voted against.

Probably few are pleased with the Constitution as a whole; for it is a series of compromises, and Serbs and Yugoslavs in general do not like compromise. Probably many modifications will be introduced during the next few years. It is yet premature to analyse the voting, or to criticise the Constitution. The hard-pressed politicians will now have a breathing space, which they have certainly earned. It is said that M. Pashitch, who seems as vigorous as a man of half his age, is proceeding to Paris and London, and then for a holiday to Marienbad.

In its short independent existence, Serbia has had an unrivalled experience of constitutions. It is interesting to enumerate them. The first was issued on August 8, 1807, over the signature of Kara George; this was short-lived, for it waited in vain the confirmation of the Tsar Alexander of Russia, and was superseded on December 14 of the following year by Kara George's second constitution, which in turn gave way to his third attempt on January 8-11, 1811. Next were two Turkish Hatti-Cherifs of 1830 and 1833, followed by the Constitution of Davidovitch in 1835, which in turn was again replaced by a Turkish one in 1838. In 1858, the Skupshtina of St. Andrew brought in a Constitutional Law which was superseded by Prince Michaël's Law of 1861. This was again replaced by a Regency Constitution of 1869, which held good till King Milan's Constitution of 1888. In 1894 the 1869 one was revived by decree, and in 1901 King Alexander issued a new one, which was suppressed by that king's *coup d'état* when he suspended the Constitution and all organic laws in 1903. On his death a few months later, the Skupshtina restored the Constitution of King Milan with certain modifications, which has held good till to-day.

It was voted at ten o'clock this morning, and at noon the Regent signed it and took the oath. The next step will be for M. Pashitch to reconstruct his Cabinet and replace Dr. Yankovitch, who has retired from the Ministry of Communications, and Dr. Mehmed Spaho at the Ministry of Commerce.

**The King's Rumoured Death.**

Rumours of the King's death have been prevalent in Belgrade, not, perhaps, without cause, when the veteran monarch's age is taken into consideration, and all his sufferings during the war, which would have shaken the constitution of a young and vigorous man. Besides, he was undoubtedly extremely ill, and all the Royal family were summoned hastily to the bedside. Grave fears were entertained of heart failure, but the skill of the doctors in attendance, two Serbs and one Russian, tided over that danger, and the august patient recovered, to the delight of everybody, for "Chichi Pera," or "Uncle Peter," as his subjects affectionately call him, is naturally as beloved as respected by his people. It would, too, have been pathetic if he had just failed to live to see the passing of the Constitution, which is the crowning piece of the national work to which he has devoted his life. Those who knew him by his published portraits usually failed to recognise the old gentleman with a long white beard who was seen at Salonika, but on returning to his fatherland he shaved off his beard again, which he had grown as a sign of mourning, and once more is the smart and soldierly figure of past years, though, naturally, considerably aged.

**Serbia and Thrace.**

Among foreign matters that are engaging the attention of Serbian public opinion are Greco-Turkish relations. While their interest in Asia Minor is purely academic, it is pointed out that Thrace is in the Balkans, and its fate directly concerns Serbia. On the assumption that the Turks can never return and that Thrace is a Slavonic land, the Serbs would gladly enough see it go to Bulgaria, which requires an opening on the "White Sea," or Ægean, in return for which the Bulgars must renounce any claims upon Macedonia. The situation of the Greeks both external and internal is looked upon as desperate, and the Greater Greece of Venizelos doomed to ruin. In that case, Yugoslavia would get Salonika, which is the natural port of the interior of the Balkans. The *Beogradski Dnevnik*, after reproaching the Greeks for allowing their great enemy, King Constantine, to return, remarks that Mariana would bless the Serbian occupation of Salonika, so it only remains to win the approval of John Bull, who is very well disposed to the Greeks.

**An Interesting Ceremony.**

Undaunted by cold, rain and mud, a large and distinguished party assembled recently to witness the Regent lay the foundation-stone of the new University Library which the Carnegie Trust has presented to Belgrade. In the presence of the Regent, of the Minister of Education, President of the Skupshtina, of the American Minister, the Rector of the University, the Mayor, and a distinguished company [illegible]

Digitized by Google

performed the service of dedication, and then, after hymns, read a record of the incident which was inscribed upon a parchment, stating how, during the reign of King Peter and the Regency of Prince Alexander, when M. Pashitch was Prime Minister, M. Sv. Pribitchevitch, Minister of Education; Dr. Ribar, President of the Skupshtina; and Dimitrije Patriarch, the stone was laid. This document was then placed in a sealed bottle, let into a special recess in the stone, and then the Prince spread mortar over it and the stone was declared laid. The speeches which followed were interesting, eloquent, and appropriate. The incident has drawn still closer the bonds of friendship between Serbia and America.

**Serbia's Unknown Warrior.**

Serbia now has its Unknown Warrior. On the summit of Avala, the isolated hill that commands a view of almost the whole of the northern half of the country, crowned with the old fort built by George Brankovitch, the last independent prince of Serbia in the fifteenth century, there lies a grave where the Germans buried a dead hero, with the inscription, "Ein unbekannte serbischer Soldat." On the initiative of an association of students, a suitable memorial is to be erected over the grave, and the association will accept the duty of preserving the tomb and the ruins of the old fort.

## ROUMANIA.

BUCHAREST, June 15.

**M. Jonescu's Return.**

M. Také Jonescu, the Minister for Foreign Affairs, has returned from Belgrade, where he was accorded a very warm and cordial reception. The signing of the defensive treaty with Yugoslavia completes the "Little Entente" between the four States, Roumania, Yugoslavia, Czecho-Slovakia, and Poland, which is intended to consolidate and secure the benefits of the Trianon Treaty for the concerned Allied States. Many ascribe to M. Také Jonescu the merit for having promoted and carried out this diplomatic scheme.

**Heroes of the War.**

The commemoration of the dead heroes of the war was solemnised on the (Orthodox) Ascension Day. An impressive Te Deum was held in the open air, the Primate, assisted by many high prelates, officiating. There was a very large attendance, and after the religious service patriotic speeches were made glorifying the dead heroes, who sacrificed their lives for the realisation of the national ideal. A military parade followed, then the schoolchildren formed a huge procession, and marched through the principal streets on their way to the different cemeteries to place flowers on the graves of the dead heroes. In the afternoon there were commemorative festivals at the National Theatre and the Athenæum; military bands played in the public gardens, and a torchlight procession ended the day. Similar celebrations took place in all the towns throughout the country.

On this occasion the body of the young heroine, Ecaterine Teodoroiu, was transferred from the former battlefields in Moldavia to her native village, where, with military honours, it was solemnly placed in a specially built tomb. At the outbreak of the war, this peasant girl of 18 years enlisted, disguised in men's clothes. She endured all the hardships of trench life, distinguishing herself by deeds of courage and bravery, and her sex was only discovered when she was taken to the hospital after being severely wounded on the battlefield. She was raised to the rank of lieutenant and received a medal for valour. On recovery she returned to the battlefield, where she met with an heroic death. Her body has been reposing until now amidst those of her hero comrades. She rightly deserves the denomination of "the Roumanian Joan of Arc."

BUCHAREST, June 21.

**In Parliament.**

As M. Titulesco, the Minister of Finance, was unable to be present this week, owing to slight indisposition, the debate on Fiscal Reform was not proceeded with in the Lower Chamber. In consequence of this more time was available for the discussion of the agrarian reform proposals; and in order to clear the ground the Premier persuaded some of his followers to abandon their intention of speaking. M. Duca declared that the Liberals would vote for the Bill because it was the embodiment of their own decree-law of 1918, with merely a modification in the matter of amount of compensation. On the latter point the Liberals still maintained the opinion that twenty years' purchase was the real value of the land in 1918, and though the landowners were entitled to some compensation for the present depreciation of money, the doubling of the amount was excessive. Seventy years ago, the speaker pointed out, the peasants owned not a single acre; the first allotment took place in 1864, and others had followed up to recent times. After the allotment now proposed has been carried out the peasantry will own 92 per cent. of all the arable land in Old Roumania. He considered that the Bill would solve the Agrarian problem once and for all, and put an end to the strife between peasant and landowner. Roumania could then pride herself on being indeed "a land of peasants."

The Prime Minister admitted frankly that it was impossible for the Bill to satisfy all parties; and he believed the Agrarian problem would last as long as the world, but for the moment it had been met in accordance with the present needs. Since last autumn 600,000 hectares of land have been distributed; the remainder up to 2,000,000 hectares will be dealt with in due course. In about thirty years' time, however, when the population will undoubtedly have doubled, the problem will have to be faced again. The true solution of it lies in the direction of intensive cultivation and control of the production by Government. This, he declared, was bound to form the principal work of Governments to come. In spite of noisy protests by the extremists, the discussion was closed, and the Bill passed its first reading.

The Senate discussed and passed the Bill for regulating the exploitation of forests. This provides that no companies, excepting the Peasants' Co-operative Societies, are allowed to acquire a larger area than 5,000 hectares for exploitation. However, when the forest for sale is a part of a larger tract, and provided that it is exploited by one company only, the area may, with the special authorisation of the Ministry of Domains, be extended to 8,000 hectares.

A by-election for the Senate at Lipova, Banat, resulted in the return of the Government candidate by 1,383 votes to 297.

**New Roumania.**

The Royal Geographical Society held a sitting recently at which the King presided, in honour of Monsieur E. de Martonne, Professor of Geography at the Sorbonne, who gave a lecture on "New Roumania in New Europe." The lecturer examined in detail the economic situation of the country, analysing its vast riches, comparing them with those of other countries, even with those of France, and showing that the wealth of Roumania is enormous and is bound to assign her a prominent place in Europe. The mineral riches of the Old Kingdom, which consisted mainly of petroleum, are now immensely increased by the coal, iron, gold, etc., of the new provinces. He dwelt also on the vast agricultural, forestal, and wine production. When the present critical situation has passed, and circumstances become normal, Roumania cannot fail to be one of the most flourishing States in Europe.

**A Ministerial Excursion.**

Taking advantage of the Whitsuntide holidays, the Prime Minister, General Averesco, arranged a three days' excursion on the Danube, to which were invited the Diplomatic Corps and the Cabinet Ministers, with their wives. The party were conveyed by special train to Turnu-Severin, where they embarked on the Principele Mircea, a very fine Roumanian river boat, and proceeded straight to the renowned Kazan Pass. On their return they will visit the ancient and famous Roman Hercules Bath, and afterwards Orsova, and the historical island Ada-Kaleh, picturesquely situated close by the famed Iron Gates.

Your readers may remember that Ada-Kaleh was once a strong fortress, built by the Turks during the Ottoman

domination, as a defence against the Austrians, in the reign of Maria Theresa. Some of its massive walls are still standing; its population has ever since remained exclusively Turkish. It numbers now about 500 families. Before the war they were under Austria, but since the war under Roumanian rule, by their own desire.

## BULGARIA.

SOFIA, June 26.

**Political Changes.**

This week the Agrarian Party have been busily considering the question of the Ministerial changes, and two days ago it was announced that M. Athanassoff had resigned, and that M. Thomoff, Vice-President of the Sobranje, was to be appointed Minister of the Interior. The appointments of M. Dimitroff to the War Ministry and of M. Boteff to the Ministry of Railways have been confirmed. M. Anthanassoff's resignation must be unwelcome to M. Dimitroff, as the two are close friends; and it is thought that the latter will not remain very long at the War Ministry. There is no doubt that serious disaffection exists in the rank and file of the Agrarian Party, and the events of the next few weeks are fraught with great interest.

It is understood that of late the Government and the Reparations Commission have not seen exactly eye to eye on certain financial questions, and the latter body are assumed to be not quite satisfied with the Government's attitude. Although it is improbable that M. Stambolisky will fall, it is as well to have it made clear that, if he were to fall, there is a Parliamentary group able to take up the reins of office. This group have their plans all prepared for such a contingency. Until the present time M. Stambolisky has been absolutely necessary to the interests of Bulgaria, but it would be an error to imagine that he is irreplaceable. However, there has recently arisen in the Agrarian Party a small band which, under the leadership of MM. Tourlakoff, Dashkaloff, and Radouloff, may easily prove to be the deciding factor in the situation, and as long as the Prime Minister is in accord with this group, it is improbable that there will be any change of Government.

**Delivery of Animals to Greece.**

On Tuesday, the 28th, the delivery of the sheep to Greece will take place. According to the Peace Treaty 6,000 are due to be handed over, and it is satisfactory to be able to record that the Greek Government have acceded to the Bulgarians' request, which was that the handing over may take place on Bulgarian territory. The area selected is that of Nevrekop, and yesterday some members of the Inter-Allied Commission of Reparations left for this area in order to supervise the delivery. The other animals to be handed over, consisting of horses, oxen, cows, and mules, will be delivered at a later date. It is hoped that the fulfilment of Article 127 of the Peace Treaty will help to convince the Greeks that the Bulgarians intend loyally to respect their signature of the Treaty.

**Present-day Sofia.**

Recent orders issued by the Sofia Prefecture of Police deserve some comment. The wearing of silk stockings is altogether banned, and *décolleté* dresses are looked on with great disfavour. It is not quite clear how *décolleté* a dress may be, but strict orders have been issued regarding the length of ladies' skirts, no skirt being allowed to be more than 30 cms. from the ground. The carrying of canes and the wearing of gloves during the summer months are alike forbidden, the last prohibition being made in the interests of economy. People are now asking which will be the next article of everyday dress that they will be forbidden to wear.

In spite of all these restrictions, Sofiotes do not present a downcast experience, and are indulging more and more in sport. Last Sunday a race meeting, in which all the jockeys were amateurs, a big football match and bicycle races were all being held simultaneously; and it is of interest to note that the officers have started a tennis club, which is the third of its kind in Sofia. Further, the love of open-air exercise is being greatly encouraged by the Compulsory Labour Law. While walking through the Boris Gardens a short time ago I was astonished to see a squad of men, directed by one of the leading local dentists, engaged in the construction of a new path. The men were all of respectable age, and in their numbers were included the chief of one of the sections of the Foreign Office, a well-known politician, and some other equally prominent public men. All of them appeared to be enjoying their task, but it seemed a little farcical that highly-trained professional men, whose work was meanwhile lying idle, should be compelled to perform manual labour; for this labour could easily have been done by the numerous Russian refugees whom one sees aimlessly walking about the town.

**General News.**

During the last week we have had a return to winter weather, and the daily temperature has been as low as 40° Fahrenheit. Snow has fallen in many districts, and the oldest inhabitants of Sofia declare that they never have had such weather before in the month of June.

The Prime Minister, M. Stambolisky, has visited the English, Italian, and Serbian Ministers, and it is understood that his object was to represent to each of them that the Bulgarian Government was intent upon loyally carrying out the terms of the Peace Treaty, and particularly that in spite of various rumours to the contrary it had no intention of making any arrangements whatsoever with either the Angora or the Moscow Government.

## TURKEY.

CONSTANTINOPLE, June 22.

**Diplomatists at Work.**

Despite the constant beating of the war-drum in the Hellenic camp, rumour has been exceedingly busy lately with the doings of various diplomatists who are said to be working overtime in order to prevent "further bloodshed" in Anatolia. No one will inquire into the sincerity of the motive, provided some success attends their efforts; but it would seem that so far as the Kemalists are concerned, at all events, the principal object is to detach the Allies, more especially Great Britain, once and for all from the Hellenes. This was foreshadowed in last week's letter, and it may be taken for granted that if the Kemalist representatives put forward fresh proposals and profess to be willing to conclude peace with *all* the Allies, the Greeks will not be included in the discussions. Nothing less than the complete evacuation of Smyrna and Thrace at least will induce the Kemalists even to discuss terms with the Hellenes, and the latter will most certainly refuse to agree to this of their own accord. How are the diplomatists going to solve the problem? The case is quite simple, and was defined in THE NEAR EAST many weeks ago. Can the Allies conclude a separate peace, which would mean scrapping the Sèvres Treaty from beginning to end, although it has been solemnly signed by all parties? The Kemalist diplomatists are obviously making a great "peace drive," and the true object of the proceeding is to deprive the Allies of the most effective means of exerting pressure.

If there were any signs of a real change of spirit in Angora, or if there were good reasons for believing that the Kemalist leaders are actuated by the high motives which they profess, and which have hitherto been attributed to them, there would be no reason to fear the removal of the means of exerting pressure. Indeed, there would be every reason to welcome that removal as soon as possible. Unfortunately, however, during the last three months, the Kemalist leaders have completely betrayed themselves, and although the former arguments against the forcible submission to Hellenic rule of large Moslem populations still hold good, it is no longer possible to believe in the sincerity of the Kemalists. The tone of the Anatolian Press has not changed in the least, despite the not ungentle attitude of the British Government, and the decidedly favourable attitude of the British Press. In the most recently received numbers of the *Yeni Gun* and the official *Hakimet-i-Millié* there are columns of the most frenzied vituperation against the British, and the foulest of insults against both the Government and the nation. The editor of the *Yeni Gun* is, of course, notorious even amongst his own compatriots for his vulgarity and ignorance; but something better might be expected from the *Hakimet-i-Millié*, which is the organ of

Mustapha Kemal's own party. Yonus Nadi was, until recently, one of the most ardent admirers of the Bolshevists, although he tried to tincture his ardour with a profession of a special brand of Communism patented by himself, and which nobody troubled to try to understand. If the Bolshevists thought he earned his money, no one need quarrel with them, and if they like to employ him still, that is also their affair. But if the Kemalists really wish to persuade the British and their Allies that peace is a higher consideration with them than the loaves and fishes obtainable under war conditions, they should really muzzle their noisy little Yonus Nadis. There are other and less conspicuous ways of inflaming the mind of the ignorant and unfortunate Turkish peasants, and Mustapha Kemal should study the methods of the Committee of Union and Progress in this connection.

**The Malta Prisoners.**

So far as is known none of the internees released from Malta has yet been permitted to enter Anatolia. That, however, does not prevent the Anatolian Press from publishing warm expressions of sympathy for them in connection with the awful sufferings they have endured at the hands of the tyrannical, sanguinary (et cetera *ad lib.*), British, and demanding that the British Camp Commandant and his brother officers shall be forced to indemnify the poor fellows for the frightful tortures inflicted upon them.

In this connection, the articles published by certain leading British newspapers attempting to justify the bitter hatred of the British expressed by the Anatolian Press and by certain Turkish politicians cannot be too strongly condemned. Those articles would have the world believe that the Turkish nation is on the same footing as the British, the French, the Americans, or any other Western nation, whereas the Turks have given the world overwhelming evidence to the contrary. In the first place, the mass of the Turkish nation has no opinions of its own, and is too ignorant to be able to judge whether the leaders of the nation are fools, rogues, or honest men. The Turks who are loudest in their expressions of hatred of the British to-day are the very men who approved the frightful slaughter of hundreds of thousands of helpless people in cold blood. They are the very men who applauded the barbarous treatment accorded to British prisoners of war, and who urged that all manner of cruelties should be inflicted upon British in the hands of the Turks in return for imaginary hardships suffered by Turkish prisoners of war on the "desert island of Man," as the Turkish Press solemnly described it. They are the very men who have always professed the same bitter hatred of everything pertaining to the British nation at no matter what time and in no matter what circumstances. If concessions are made to Turkey to-day, they should be made in the name of mercy rather than justice, and of expediency rather than of International Law.

In this connection, the melting of the snows in the Alexandropol district has brought to light evidence of still further massacres of thousands of women and children belonging to the unfortunate Armenian race, for which there seems to exist no hope. There, in a valley within a stone's-throw of the main road leading to Alexandropol, over two thousand bodies of women and babies, and one old man, have lately been discovered owing to the melting of the snows; and photographs afford ghastly confirmation of the contention that the principal object of the leaders of the Turkish nation, Kemalist or Unionist, was and is to exterminate the human obstacle in the path of the "Drang nach Osten."

It may surprise some people to learn that a very considerable section of the Turkish nation, that is to say, of the educated and influential class, is by no means anti-British, and is simply trembling at the prospect of the triumph of the open and avowed enemies of Great Britain. If those men are not in power to-day, and if their influence has waned to vanishing point, the fault is entirely our own for failing to profit by the unexampled opportunity before us in 1918.

# CYPRUS.

NICOSIA, June 6.

**The Legislative Council.**

After passing several useful measures, the Council was adjourned to June 6, when other Bills will be considered. One of immediate interest is a law "to regulate public processions in public streets and roads." It provides that no person shall organise, equip, or take part in any procession except by permission in writing of the District Commissioner, who will have power to cancel or withdraw a permit. The penalty for transgression is imprisonment for three months or a fine of £50, or both. Had a measure of this kind been passed many years ago, much trouble and loss of Government dignity would have been avoided; while district officials would have been saved a great deal of needless anxiety and annoyance. The tolerance shown towards demonstrations, meetings, and processions—accompanied by displays of the Hellenic flag by those in no way entitled to use it—has contributed much to the growth of pseudo-manifestations of so-called popular feeling.

A Turkish member, Irfan Bey, has presented a petition, signed by the Ottoman members of Council, asking for the establishment of a Government Agricultural Bank.

The movement against the puerile policy of the Greek members of Council in continuing to absent themselves from the Legislative Council has rapidly gained ground. A portion, at least, of the Press has given expression to it, even if it has not openly supported it. The said members are now well aware of this opposition, and are reconsidering the matter at private meetings. The reply of the Secretary of State to the Greek members has been conveyed to them by the acting Chief Secretary, Mr. C. H. Hart Davis, by letter, dated June 1. It states that H.M. Government cannot hold out any hope that the island will be united to Greece, and that the proposal that a vote of the people should be taken in order to ascertain their wishes cannot be favourably entertained.

**The Holy Synod Criticised.**

Severe rebukes are being administered to this body in the Press. The *Phone tés Kyprou*, in particular, observes that during its session just ended the Synod has shown utter indifference towards the principal questions which should occupy its attention. Of a long list of agenda it has dealt only, and that in an unsatisfactory and nerveless manner, with matters of secondary importance; relegating what are really pressing questions, "as usual, to the Greek Kalends." The latter include that of reorganising the school for the training of clergy, on which much money has been spent without results. So far it has failed in its aims, since it turns out only schoolmasters, for whom there is another special establishment. Consequently the standard of the village clergy remains *in statu quo*, and nothing is done to raise their deplorably low standard, or the scanty pittance which they now receive in fees. Again, nothing has been done towards the founding of a mixed council, which, according to the best traditions of the Church, should exist, and which is now much needed in order to deal in a competent manner with various local ecclesiastical questions. The matter of the salaries of the Bishops is also pending.

It can hardly be wondered, however, that Church matters should fall into arrear, considering that for the last two

years the Archbishop has spent most of his time on political missions to London, and that the Church has been more concerned with agitation for "union" than with matters nearer home. Add to this that there have been differences within the Council itself, which have not tended towards local union.

**The Results of the Census.**

The total population of Cyprus is given as 310,709; being composed of 249,287 non-Mohammedans and 61,422 Moslems. At the end of 1920 the total population exceeded the present by 4,510. This is due to departures of foreigners and refugees, and to emigration of many Cypriots. In the non-Moslem community Greeks of the Orthodox Church, of course, largely predominate.

**Visit of the Mediterranean Squadron.**

On Sunday, May 29, vessels of the squadron under Admiral de Robeck, on board the Iron Duke, anchored in the Famagusta Harbour. Other ships proceeded to Larnaca and Limassol. On board one vessel at Limassol was H.R.H. Prince George, and on one at Larnaca was a member of the Greek Kondouriotes family. These visits, now far less frequent than they used to be, are very welcome in Cyprus.

**The King's Birthday.**

This was celebrated loyally on June 3. Services were held in the Greek and Roman Catholic Churches. The High Commissioner held a review of 300 marines from the squadron, 100 British soldiers, and 100 zaptiehs at Nicosia. The name festival of the King of Greece fell on the same day, and combined services were consequently held in the Greek churches. Telegrams were sent to His Majesty and the King of Greece by the Archbishop.

## ASIA MINOR.

SMYRNA, June 25.

**King Constantine's Visit.**

King Constantine, since his arrival in Smyrna, remains quietly in his villa at Cordelio, where he is visited continuously by the military and political chiefs. Most of the interviews take place on the verandah, much to the satisfaction of the admiring crowds. Occasionally a little humour is supplied by a "Polly Perkins," who insists on attracting the attention of the King and getting a salute.

Prince Andrew and his nephews are often seen in Smyrna and the suburbs. Mr. Herbert Whittall entertained them in his palatial residence in Bournabat, when many prominent members of the European colony were also invited. M. Stratos was also present with a party of friends, and anxiously discussed the political situation with a prominent member of the Smyrna British Chamber of Commerce, who very diplomatically exposed the appalling attitude of M. Sterghiades (Governor of the Smyrna Province) as regards stifling the export trade in the Smyrna Province. It was only too obvious to the distinguished visitors that the Greek cause is bound to be unpopular in Europe if this persistent stifling of trade is allowed to continue.

The Princes and their suite and M. Stratos and his friends were afterwards invited by Mr. Geary, of the British Consulate, to his rooms, where another informal chat amidst much conviviality was apparently thoroughly appreciated by the royal visitors.

The Princes left to-day for Ephesus by special train.

## SYRIA.

BEYROUT, June 13.

The month of May will stand out in the social annals of Beyrout as a red-letter month. Never, perhaps, in all its history has Beyrout witnessed before such a bewildering succession of fêtes and receptions given in honour of distinguished personages. They started with the series of entertainments held in honour of Senator and Madame Fernand David and Deputy and Madame Soulié, both on shore and on board the French warships the Lorraine and the Ernest Renan; and ended with the banquets, tea parties, and receptions given in honour of H.R.H. Prince George, Admiral de Robeck, and the High Commissioner for Palestine and his suite. Owing to a slight indisposition, Prince George was able to attend only a tea-party given in his honour by General Gouraud at his Residence des Pins; and he missed the trip to Damascus, to which he is said to have been looking forward. His Majesty's Consul-General and Mrs. Satow held their first public reception on this occasion, and invited the members of the British colony to meet the distinguished visitors. Finally, an official dinner was given on board the Iron Duke in honour of General Gouraud.

The cordial speeches and toasts exchanged between the two High Commissioners have been commented upon by the local Press, and regarded as a token of still closer co-operation and co-ordination of effort on the part of the two Allied and Mandatory Powers. Sir Herbert Samuel availed himself of his visit to Beyrout to pay a call to the American University, where he received a cordial welcome.

One of the outstanding features of this eventful month of May was the farewell fête organised by the many Syrian friends of Admiral Mornet, and held on the eve of his departure. The programme was a varied one, consisting of vocal and instrumental music, a delightful up-to-date French dialogue play, and, last but not least, an Oriental scene in which the Syrian dance called "Dabke" was most gracefully performed by a quartet of ladies. At the close of the programme the guest of the evening made a short speech that moved his audience strongly. Admiral Mornet incarnates the best qualities of the Frenchman, and he has won for himself universal affection, which translated itself into this public manifestation.

## THE RONALD BURROWS MEMORIAL.

A memorial tablet was dedicated at King's College Chapel last week to Dr. Burrows, the late Principal. The service was conducted by the Dean, the Rev. W. R. Matthews. In addition to Mrs. Burrows and other relatives of the late Principal, there was a large congregation, representing his varied academic, diplomatic, and social work. The inscription reads:—"To the memory of Ronald Montagu Burrows, Principal from 1913 to 1920, who died in the College on May 14, 1920; this tablet is erected by the Governing Body, the staff, students and friends as a memorial of an inspiring teacher, a wise leader and a noble character. After a distinguished career as a student at Oxford, and a teacher of Greek language, letters and history in Glasgow, Cardiff, and Manchester, he turned to a life of administration, and showed such energy and devotion in the office of Principal that he was able to guide the College safely through the years of the Great War and to leave it enhanced in vigour and reputation. 'Whatsoever thy hand finds to do, do it with thy might.'"

In the course of a striking tribute the Dean said that the greatest gift which Dr. Burrows gave to King's College was his strenuous, vivid, and optimistic personality. His powers and personality were precisely those that were required by the College at the period of its history in which he held office. The College, he concluded, was his best memorial.

Subscriptions to the Ronald Burrows Scholarship, which the College authorities propose to establish, may be sent to Professor H. G. Atkins at the College.

# CORRESPONDENCE.

## THE ANGLICAN AND EASTERN CHURCHES ASSOCIATION.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—We desire to appeal through the medium of your columns on behalf of the Anglican and Eastern Churches Association, the aims and activities of which will be known to many of your readers. The Association dates from 1906, being amalgamated in 1914 with the older Eastern Church Association, founded in 1863, and is a voluntary organisation not to be confused with the Eastern Churches Committee, appointed in 1919 by the Archbishop of Canterbury as the medium for official relations with the Churches of the East. The Association, however, is in the closest possible touch with the Committee, which contains among its personnel a good number of Association members, including some dozen officers. A report is to be issued in about a month, showing the numerous and varied works in which the Association was engaged during and after the war, showing also the opportunities open to us at the present time of further advance. The Association is engaged in preparing the way for ultimate re-union with the Churches of Eastern Christendom, by spreading information through lectures and literature, by creating in this country an atmosphere of interest and sympathy with the ancient and venerable Churches of the East, and by incorporating friends and supporters in a membership roll with the two-fold link of prayer and study.

We appeal to all to support us in this valuable work by sending for literature on the subject, by interesting others in our aims, by giving us generous donations, or, better still, by joining the Association; we appeal to parish clergy and those responsible for parochial organisations to help us by arranging a meeting in their parishes, at which we may lay before their people the ideals for which we are working; and we appeal to those who have influence in diocesan and ruri-decanal circles to get the subject of re-union with the Eastern Church on to the agenda of Conferences and Chapters, at which a resolution on this subject may be adopted. Full information may be obtained from the General Secretary, the Rev. C. Norman Smith, 24a, St. Charles' Square, N. Kensington, W.10.

The following have authorised their names to be printed in support of this appeal:—

The Right Rev. the Lord Bishop of London.
The Right Rev. the Lord Bishop of Winchester.
The Right Rev. the Lord Bishop of Gloucester.
The Right Rev. the Lord Bishop of Gibraltar.
The Right Hon. the Viscount Halifax.
The Very Rev. the Dean of Winchester.
The Very Rev. the Dean of Durham.
The Very Rev. the Dean of Chester.
The Very Rev. the Dean of Christ Church, Oxford.
Sir Samuel Hoare, Bt., M.P.
Sir Robert Newman, Bt., M.P.
His Excellency J. Gennadius.
Athelstan Riley, Seigneur de la Trinité.
The Hon. Beresford Potter, Archdeacon in Cyprus.
The Rev. Canon Masterman, Rector of St. Mary-le-Bow.
The Rev. Dr. A. C. Headlam.
The Rev. Dr. W. H. Frere.
The Rev. J. A. Douglas.
The Rev. H. J. Fynes-Clinton.
The Rev. W. Dudley Dixon, Vicar of Glossop.

## A RHODIAN RESOLUTION.

TO THE EDITOR OF "THE NEAR EAST."

Sir,—The Rhodians, as your readers will see from the undermentioned resolution, insist on being united with Greece, in spite of the Magna Charta promised by Signor Maissa, the Italian Governor, since last October. The latest news I had from the Dodecanesian Delegation at Athens was very bad indeed. Rhodes has never ceased to be a Kemalist "pied-à-terre," and it seems that the Italian authorities, in their desire not to excite the overworked nerves of their distinguished guests, provoked a scandal at Kallithea on May 13 by not allowing the village band to play the British Anthem in honour of Mr. A. T. Taylor, H.B.M.'s Consul in Rhodes, who happened to be at Kallithea with other members of the Consular Association.

Your members will confess with me that the invocation by the Rhodians of "the rights of nationalities and the principle of self-determination" sounds rather awkward. The Wilsonian doctrines are no more respected, and Rhodians, as well as the other Dodecanesians also, must realise once and for all that "Themselves Alone" is the right motto for 1921.—I am, etc.,

THEODORE D. MOSCONA.

Dodecanesian Delegation at the Peace Conference.
32, Oxford Street, Manchester, June 24.

"The Pan-Rhodian Assembly, composed of the representatives of the capital and the forty-four villages of the Island of Rhodes, legally elected as voicing the will of the Rhodian people, having considered the efforts of those whom the Rhodian people acknowledged as the trustees of the national cause, i.e., the Metropolitan of Rhodes, Kyrius Apostolos and the Provincial and Communal Societies of the Holy Metropolitan Diocese, and wishing to express the steadfast and invariable wish of the people, has passed the following resolutions:—

"(1) Approves and ratifies every step taken by aforesaid trustees towards the realisation of the union of Rhodes with the motherland of Greece.

"(2) Proclaims that the only and secular and unchangeable wish of the Rhodian people is the union with the motherland of Greece.

"(3) Entreats the protectress Italy and the liberty-loving Italian people, *in the name of the rights of nationalities and the principle of self-determination*, to acknowledge the right of the R.P. to be united with the motherland of Greece, and

"(4) Directs the representatives of the people to forward this resolution to the Government of the protectress Italy, and to contribute in whatsoever manner they think fit to attain the happy issue of the union of Rhodes with the motherland of Greece."

(Rhodes, April 22 (o.s.), 1921.
The President: (signed) + APOSTOLOS OF RHODES.
The Secretary: (signed) D. E. DIMITRAKIS.

## "TRUTH ABOUT THE BALKANS".

TO THE EDITOR OF "THE NEAR EAST."

Sir,—An article, by H. C. Woods, in the *Quarterly Review*, professes to tell "The Truth about the Balkans." The author, I have no doubt, is most competent to tell the whole truth on the question. He has, however, failed to do so, because he has limited himself in this article to a very small part—to a phase, and an ugly one—of the question. He has merely portrayed the present *appearance* of it. The title of the article is misleading.

Formerly the question was The Eastern Question; later it was The Near East Question; now it is talked of as The Balkan Question. The "question" is one; it concerns the final political settlement in the Balkan countries. It arose with the weakening of the Ottoman power, and the opportunities it afforded for the liberation of the Christian populations under Turkish rule. Until very recently this liberation of the Christians was based not upon the pretensions of this or that neighbour State, but upon what these populations naturally claimed. This principle was flagrantly abandoned in Bucharest in 1913 and by the recent Paris Treaties.

The Balkan Question interests directly all the States in the Balkans, as well as those in contact with them; nevertheless, the question is one only. You cannot tell "the truth about the Balkans" by treating the last present *phase* of it only—a phase which gives no satisfaction to the peoples most concerned or to the political world at large. Mr. Woods, in treating the question, commences by declining to speak of Macedonia, the heart of the Balkan question, and the Dobruja, and refuses to say a word on the Bucharest Treaty; in other words, he has avoided treating the genesis, the substance itself of the question. By thus hampering himself Mr. Woods has attempted the impossible. He has given us a picture of the present appearance in these countries of what he saw when he last visited them. He certainly discovered most unsatisfactory relations ruling between the Balkan countries, a nervous condition of things fraught with imminent danger, notwithstanding he is severely silent on the responsibility for such a situation. He says nothing upon the radical change of the principle upon which the solution of the Eastern question has been sought for generations past—the national claim of the peoples themselves—for the arbitrary one, as at present.

Too many interests clash in this question of the Balkans, and the treatment of it is not easy. Mr. Woods has attempted it honestly, but far too carefully. The Balkan question is an old, festering sore, and requires drastic treatment; delicate handling cannot solve it

Touching Thrace, Mr. Woods speaks well of the conduct of the Greek military authorities there. They certainly failed to inform him of the great number of Turks imprisoned and deported and fled into Bulgaria; of the non-existence of Bulgarian churches and schools; of the baptism of Exarchists into Patriarchists by flogging in the police-stations and elsewhere; of armed bands crossing the frontier under the eyes of the Greek frontier guard to drive off cattle and commit robberies with murder; of the impossibility of a Bulgarian travelling into Thrace, even upon most urgent business. Mr. Woods actually pleads in a way for the extension of Greece's territory in Europe, should she be obliged to relinquish her preposterous pretensions to hold part of Asia Minor, although her pretensions to Thrace are not more securely grounded than those in Asia Minor.

It is impossible to tell the truth on a question when determined, as in this case, out of delicacy for those concerned, to be silent on nine-tenths of the substance of it. In the negotiations with Turkey and Greece for modifications to be reintroduced into the Sèvres Treaty peculiar pains were taken to avoid even an allusion to the Treaty of Neuilly, although it contained even greater defects than the Sèvres Treaty, besides the fact of the close connection between the two.

There is no comparison as to which of the two countries, Turkey and Bulgaria, should be best considered. Turkey had been condemned for generations as unfit to rule even its own people, while Bulgaria, until the results of the Second Balkan War became apparent, was considered as a model country of progress and development. Why is the responsibility of the blunder committed by Bulgaria in joining the Central Powers in the late war put entirely upon her shoulders? Surely it should be evident by this time that this responsibility should lie far more upon those of the Entente negotiators with Bulgaria. Had these negotiators assured proper compensation to Bulgaria, no Germano- or Austrophilism could ever have persuaded her to fight against Russia, allied with Great Britain and France. The Balkan Question should be boldly faced; otherwise no permanent solution will be reached.—I am, etc.,

Sofia, May 19, 1921. P. M. MATTHEEFF.

# NEAR EAST BOOKSHELF.

I.—"A PAINTER IN PALESTINE: The Story of an Impromptu Pilgrimage through the Holy Land with Bible and Sketch-Book." By Donald Maxwell. (London: The Bodley Head. 6s. 6d. net.)

II.—"SERBO-CROATIAN SELF-TAUGHT BY THE NATURAL METHOD." By J. J. R. O'Beirne. (London: E. Marlborough and Co. 3s. 6d.)

## I.—A PAINTER IN PALESTINE.

We have great praise for this charming little book, which has been written round the pictures that are its chief attraction. It is the record of an artist's passage through the Holy Land, and what the artist's eye has been quick to see the artist's hand has striven to record for others. We welcome a book by one who seeks neither to explain nor to analyse Jerusalem, but is content to describe her to the best of his ability, to worship, and to admire. The artist has taken his Bible with him, and is not backward to own its literal accuracy of detail, as well as its spiritual and mystical reality; he has found, like many another pilgrim, that you simply cannot get away from the Bible in Palestine. The argument for the authenticity of ancient sites which have been hallowed by tradition (pp. 38-9) is clearly thought out and expressed; though we own to being somewhat mystified by the plaint on page 51, "The traces of the old walls and the wall of Ophel are disappointing, because they are invisible." Together with his Bible, the artist quotes Milton, whose sonorous lines are fully adequate to the subject. (We have often wondered why no one quotes from Tasso's "Jerusalem," which has beautiful, as well as remarkably accurate, descriptions of Palestine and Jerusalem.) We must confess to finding the arguments between Pictor and Lector very tiresome, and hope that in a later edition their substance may be included in a more literary (shall we say, a more artistic) form. The book is so good that it can stand a more severe criticism than this; it has so few blemishes that those few assume an unfortunate prominence. For instance, out of a total of 164 pages the artist devotes nine and a-half, and three diagrams, to the Star of the Nativity; and even then we are uncertain whether he is trying to explain it or to explain it away. The Star, so explicitly described by the Wise Men as "*His* Star," was an appearance to which not only their pious souls, but Herod's uneasy conscience, gave instant and complete recognition and belief. Perhaps Mr. Maxwell has not heard the old Palestine tradition that the Wise Men lost sight of the Star only when they turned aside to enquire of Herod—in other words, instead of following God's guidance to the end, their faith was momentarily dimmed by the hardships of their journey, and they sought man's leading rather than God's. But when they were stooping to draw water from the well by the roadside which still bears their name, they caught sight of the Star in its quiet depths, and immediately started to follow it as it "went before them" to their journey's end. It seems a pity that so many pages should be taken up by a rambling soliloquy, which might with advantage have been given to one or two more of Mr. Maxwell's delightful pictures.

The descriptions of Bethlehem itself (pp. 86-7), of the Valley of the Dead Sea (pp. 112-113), and the closing pages of the book are very good work; the language is simple, dignified, and easy. The ever-vexed question of the site of Golgotha and the Holy Sepulchre is treated of with reverence, but without much depth of study or research. In reading the Gospels we cannot fail to be struck by the fact that not one great site which is closely connected with the earthly life of our Lord has been preserved or located beyond all dispute; and possibly the angelic saying, "He is not here, He is risen," has a deeper meaning, a more searching test of faith for us of to-day than even for those to whom the words were actually addressed. We hold no brief for either of the Holy Sepulchre sites, and would merely point out that the weight of tradition, and of later scientific archæology, inclines to the old site rather than to the new. Were not the eyesockets of the skull-hill formed by stone-blasting of fairly recent date; and is not the garden-tomb itself said to be of Christian rather than of Jewish origin? These are points fruitful of argument and, unfortunately, of debate.

The artist's frequent comparisons between features of Palestinian scenery and the quiet country of the Medway are exceedingly interesting, and the picture of "Some Kilns in the Medway Country" (called by him the "Very Near East") on page 77 shows them to be strikingly Eastern in appearance. The full-page illustrations, and many of the smaller sketches, claim our unstinted praise, while we would single out for special admiration "The Ladder Set Up on the Earth," which forms the frontispiece, "The Valley of the Bones," "The Road to Bethlehem," and "Marsaba." Many of the scenes are shown by night, and all express a real appreciation of the Holy Land and of her infinite beauty and variety.

We are glad to see that the publishers have placed the very moderate price of 6s. 6d. on the book. This should bring it within the reach of many, and many, we are certain, will wish to possess it.

E. M. E. B.

## II.—SERBO-CROATIAN.

This latest addition to the well-known Self-Taught series will certainly be of great use to the ever-increasing number of Englishmen who go to Belgrade and Zagreb on business, and make more or less prolonged stays.

Although the preface is dated 1921, it seems strange reading of "the imminent rise of a Greater Serbia or Jugo-Slav State," and it is news that the Government has abolished the teaching of the Cyrillic alphabet in the schools and substituted the Roman. It is always easy to criticise, and one should not be carping towards a manual of very great use and convenience, but there is internal evidence that the author has an academic rather than a practical knowledge of the language. It is strange that, like the authors of all other grammars of the language, no distinction is made between the letter C with an accent (ć) and C with an inverted circumflex (č). The former is *not* pronounced like tch in "kitchen," but like t in picture, bitumen, tube, etc; nor is there really any resemblance between di and dzh (dž). The vocabulary given is sometimes Serb, sometimes Croat, but without consistency. It would have been useful to indicate which is which, for there are plenty of words given which are incomprehensible to most Croats and vice versa. The selection of words does not seem always to be really practical. It is waste of space to give, for instance, "carbuncle" among Minerals and Metals, especially when the Serbo-Croat equivalent (čir = chir) is a carbuncle in the patho-, and not in the minera-logical sense. The conversations will probably be of more use than the vocabularies to a beginner, and the outline grammar at the end is very clear, although one cannot agree with all the statements. All the same, the book fills a genuine need, and should be in the possession of all visitors to the country. There is a fair number of misprints.

## BOOKS RECEIVED.

"Under Desert Stars." By Kathlyn Rhodes. (London: Hutchinson and Co. 8s. 6d. net.)

## A SERB ON AMERICA.

We have received from America a copy of a small pamphlet by Bishop Nicholai, called "A Serbian's Vision of America." At the beginning of this year Bishop Nicholai spent three months in the United States, and this article, which is printed for private distribution, is the result of his thoughts upon the potential future of America. He begins by opposing to the idea of the League of Nations Communism (or Bolshevism), and pleads that, as neither of these two schemes is satisfactory, a substitute be found immediately. This remedy, he thinks, may be found in America, which, being more than a nation, is sufficiently pan-human to typify the whole world. The old systems of world policy, the Roman and the quasi-Christian, have failed, and the third "International," which should be based on Charity and Constructiveness, ought to be the American. Why not found a World Construction Committee, of which the first three members might be America, England, and Japan, which should ensure that a certain part of the war budgets of each nation be devoted to work of construction? America potentially is, and may in fact become, "a pan-human society of men intoxicated with the constructive and charitable spirit."

The above is a brief summary of Bishop Velimirovitch's case, which is argued with the imaginative insight, the broadmindedness, and the rich historical learning that characterise all his writings.

## PALESTINE EXPLORATION FUND.

Viscount Bryce, speaking at the annual general meeting of the Palestine Exploration Fund at Burlington House last week, said that Palestine was the contact point of the ancient civilisations, that came together by the great highway of coast trade and of armies on the line of communication between Egypt and Assyria. The country had been of great strategical importance, and was full of historical and theological interest. Now was the opportunity to take advantage of recent events to press forward the exploration of the Palestine and trans-Jordan regions. It was a great thing to have got rid of the former oppressors who had devastated the country, and the Society had the advantage of occupying neutral ground. Mr. W. Ormsby-Gore, M.P., remarking on the unsettlement of Palestine and our troubles in the Middle East, said they were all due to our not having made peace with Turkey. Dr. D. G. Hogarth described the work that has been commenced at Askalon with a view to obtaining light on the origin and civilisation of the Philistines.

# MUSICAL NOTES.

### "Le Sacre du Printemps."

No event in the musical world has been so much discussed as the performances, both in concert form and as ballet, of Stravinsky's "Le Sacre du Printemps," for it has thrown peoples into all sorts of attitudes, here passionately defensive, there passionately offensive, and in a few places indeterminately puzzled. But one thing was certain, that if you could not make up your mind about it after Eugene Goossens' conducting of it at the Queen's Hall, you were no better off after seeing it as a ballet, with Massine's choregraphy, at the Prince's Theatre. For the choregraphy did not purport (as so many sham choregraphies do pretend) to be an "interpretation" of the music; it merely claimed to be a free adaptation of the music, abstract movement suited to, and therefore imposed upon, the music. As such it was a dull failure. Massine's effort had various elements in it, some incongruous, some silly, and some striking. Roerich's background very rightly set the whole thing in a cold, remote atmosphere, and in the main Massine's angular conception of the music was accurate; but the fact remains that the finest and most memorable part of the production was M. Ansermet's playing of the prelude before the curtain went up, in which the personality and genius of Stravinsky come out more strongly than anywhere else in the work. Everyone has paid tribute to the extraordinary technical skill with which Mlle. Sokolova, as the Chosen Virgin, executed her solo dance at the end, but this wild effort was rather like the last trick of the music hall artist, who reserves his best or most attractive trick until the end. Her dance seemed to be inspired not so much by the music as by the knowledge that it was time something worth looking at was done; it certainly was worth looking at.

Out of all the lusty battling that "Le Sacre" has caused in London one comes, therefore, to the following conclusions—that the work, which is written by a man who at times has an enormously compelling personality, contains more passages of dulness than of genius; that Massine has not helped Stravinsky; and that the essential connection between music and choregraphy is much remoter than many fashionable people imagine.

### Miss Mary Copner.

It is a dangerous but necessitated game in these crowded days of recitals to judge a singer by a single group of songs, but the most noticeable things in the French group at Miss Mary Copner's recital at the Wigmore Hall on June 21 were, on the one hand, a very refreshing ability to sing in tune, and, on the other, an inability to sing in the French language. She has so many attractive qualities, among which a neatness in the rounding of a phrase and a frank recognition of the limits of her powers rank highest, that so simple an error as the English pronunciation of French words should be easily rectified. She was assisted by Mr. Harry Field, a Canadian pianist, who played Liszt with unaffected facility and indulged a whimsical taste in strange pieces by Bocquet and Sapellinkoff.

### The London Classical Quintet.

From what I heard of this quintet at the Æolian Hall on June 23, I do not think it will go very far. In Verdi's quartet in E minor and in Beethoven's Op. 59, No. 2, they displayed no distinctively good qualities, and not a few bad ones. Their intonation, for example, at times roamed far beyond what is permitted, even on a hot day; their rhythm was loose, and their tone poor. The one genuine chamber player of the string quartet, Mr. Raymond Jeremy, the viola, stood out in distressing eminence above his colleagues. Miss Adela Verne took her sister's place at the pianoforte with authority and address.

ANDANTE.

---

The French annual pilgrimage, interrupted in 1914 by the war, is now to be resumed, and this year's party will leave Marseilles on August 18, returning through Egypt after an extensive tour of the Holy Land.

Mr. Gandhi and his supporters have been making strenuous efforts to raise a crore of rupees (£833,333) for the Tilak Swaraj Fund before the end of June, and also to obtain 10,000,000 adherents to the non-co-operation movement.

The Jerusalem correspondent of *The Times* reports that Palestine Mounted Police have shot the noted brigand and murderer Nimr Jubran, who, after escaping from Acre gaol while under sentence of death, had been operating with a gang of outlaws in the hills of Phoenicia, near the Syrian frontier. Others of the brigands were wounded and the gang was broken up.

General delay in telegrams between this country and South Africa has again to be apprehended owing to the interruption of the Eastern Telegraph Company's cable between Aden and Zanzibar at a position where at this time of the year the south west monsoon blows with great strength. It is feared that the restoration cannot be expected for some considerable time.

# PERSONAL AND GENERAL.

**TO-DAY.**

July 7 (New Style).
June 24 (Old Style).
Julkada 1, 1339 A.H. of the Moslem Calendar.
Tamuz 1, 5681 of the Jewish Calendar.

---

The Maharaja Holkar of Indore has arrived in London from Paris.

---

Princess Kamala Devi Gaekwar of Baroda has left London for Watford.

---

M. Jordania, President of the Georgian Republic, and M. Tcheukeli, the Georgian Minister, both left London last week for Paris.

---

The Admiralty announce that Admiral Sir Ernest C. T. Troubridge, K.C.M.G., C.B., M.V.O., is placed on the retired list, to date July 1, 1921.

---

Sir Alban Young has arrived at 4, Carlos Place, Grosvenor Square, from the British Legation in Belgrade. Lady Young will remain for the present in Serbia.

---

The Aga Khan, Mr. Chotani, and Sheikh Kidwai of Gadia, members of the Indian Moslem Delegation, have arrived in Paris, where they will meet Bekir Sami Bey.

---

The Emir Faisal arrived at Baghdad on the evening of June 29, and was received by the High Commissioner for Mesopotamia and the General Officer Commander-in-Chief.

---

Mr. Humphrey Bowman, C.B.E., Director of Education for Palestine, has just left Jerusalem for England, on four months' leave, and does not expect to be back in Palestine before the end of October.

---

The engagement is announced between Mr. Eric Ames, of Kahagalla Estate, Ceylon, son of Mr. and Mrs. Ames, of Champery, Switzerland, late of Ceylon, and Ursula, daughter of the Rev. Walter Hobhouse.

---

The engagement is announced between Christopher John Boger, of Ceylon, elder son of John R. Boger, A.M.I.C.E., and Mrs. Boger, of Lostwithiel, Cornwall, and Frances Helen, younger daughter of Mr. and Mrs. Francis Perry, of Brooklands, Millbrook, Southampton.

---

The engagement is announced between Clarence Welham Grange, M.C. (late Royal Artillery), recently of Colombo, Ceylon, only son of Mr. Alexander Grange, of Farnham, Surrey, and Mary Sumner, daughter of Mr. and Mrs. Francis S. Phraner, of Summit, New Jersey, U.S.A.

---

The engagement is announced between Basil John Gould, Indian Civil Service, youngest son of the late Charles Gould, K.C., and Mrs. Gould, of Lonsdale, Farnham, Surrey, and Lorraine, eldest daughter of Mr. and Mrs. Cecil Kebbell, of Te Hoe, New Zealand, and 5, Fortfield Terrace, Sidmouth.

---

A marriage is arranged, and will take place in February, between Mr. Alexander W. Keown-Boyd, C.B.E., Oriental Secretary to H.E. the High Commissioner for Egypt, eldest son of Mr. and Mrs. Keown-Boyd, and Joan Mary, youngest daughter of the late Mr. J. C. Partridge and Mrs. Partridge, 38, First Avenue, Hove.

---

The Cromer Prize, of the value of £40, for an essay on a Greek subject, founded in the British Academy by the late Earl of Cromer, has this year been awarded to Mr. H. W. Dobson, B.A., St. John's College, Durham, for an essay on "Persian Character and Civilisation, and Their Influence on Greece up to the Age of Alexander."

---

His Royal Highness the Prince of Wales, who is leaving for India towards the end of October, will travel with his suite in H.M.S. Renown and will probably touch at Gibraltar, Malta, Port Said, and Aden en route. The tour will extend over the whole cold weather and practically every part of India will be visited by His Royal Highness.

---

Field-Marshal Sir Henry Wilson has addressed a telegram to General Gouraud, commanding the French Army in Syria and Cilicia, offering, in the name of the British Army, sincere congratulations on the failure of the recent dastardly attempt on his life, and stating that the outrage has roused the utmost indignation among his old friends and comrades.

Digitized by Google

The engagement is announced between Graham Ross Higginson, Indian Police, elder surviving son of the late F. W. Higginson, F.R.C.S.I., and Mrs. Higginson, and Dorothy Eileen Wansbrough Hockaday, third daughter of F. S. Hockaday, J.P., F.R.Hist.S., and Mrs. Hockaday, of Highbury, Lydney, Gloucestershire. The marriage will take place at Lydney in September.

A marriage has been arranged, and will take place at Marylebone Church at midday on Monday, the 25th inst., between Major C. R. L. FitzGerald, D.S.O., Indian Army, elder son of the late Gerald Beresford FitzGerald and Mrs. Beresford FitzGerald, of 14, Kensington Court Mansions, and Elizabeth, daughter of Mr. and Mrs. William Mudie, of Newton, Auchterhouse, Forfarshire.

An interesting picture exhibition by Mrs. Alec-Tweedie, the well-known authoress and traveller, was opened on Saturday at the Alpine Gallery, Conduit Street, W., and is closing to-day (July 7). Mrs. Alec-Tweedie has but recently returned from a two-year tour in the Near and Middle East, and her sketches, which cover Egypt, the Sudan, Syria, Palestine, and India, include some pictures of the Western Front, where she spent some time before her Eastern tour.

## APPOINTMENTS, ETC.

Raif Bey has been appointed Chargé d'Affaires at the Turkish Legation in Madrid.

## OBITUARY.

The death has occurred of Colonel Henry Wemyss Feilden, C.B., in his 83rd year. Colonel Feilden served with the 42nd Regiment in the Indian Mutiny, taking part in a number of actions and in the siege and fall of Lucknow. In 1860 he was in China with the 8th Punjab Regiment, and was present at the action of Sinho, the taking of Tungku, and the capture of the Taku forts.

The death is announced of Lord Eustace Cecil, at the age of eighty-seven. The third son of the second Marquess of Salisbury obtained his commission as ensign in the 43rd Regiment of the line in 1851. After serving in Southern India he was transferred to the Coldstreams, with whom he served in the Crimean War. His later life was devoted mainly to politics and finance.

The death has occurred in his 92nd year, of General Sir William Henry Seymour, K.C.B., Colonel of the Queen's Bays, of which regiment he was in command during the Indian Mutiny campaign. His father, Sir William Seymour, Judge of the Supreme Court at Bombay, died in 1829. Entering the Army in 1847, General Seymour fought as a captain in the Crimean War with the 68th Light Infantry, winning four clasps to his medal. In the Indian Mutiny campaign, in which he served from 1857 to 1859, he won first a brevet-majority and later promotion to lieutenant-colonel in command of the Queen's Bays.

### MR. R. J. MOSS OF ALEXANDRIA.

Mr. Robert Johnson Moss, who died at Alexandria on June 17 at the advanced age of eighty-three, beloved and respected by two generations of Anglo-Egyptians, was the third son of William Miles Moss, of Liverpool, and was born on June 30, 1838. Educated privately in England and Switzerland, he entered upon a five years' apprenticeship in 1854 with the Liverpool firm of Duckworth and Rathbone, cotton brokers, subsequently entering his father's office and going out with him to Egypt in the Moss steamer "Atlantic" in November, 1860. In 1861, with his younger brother, William, as a partner, he established the Alexandria firm of R. J. Moss and Co., cotton shippers, which he carried on alone after his brother's death in 1863. In the following year the firm introduced the first cotton steam-presses, turning out bales of 30 to 32 cubic feet to displace the old hand-pumping method. Foundry and engineering works were also established, and import agencies were acquired for agricultural and general machinery and for coal, and the firm became agents for the pioneer of British direct steamship lines to Egypt and the Levant—the Moss Steamship Company, Ltd. From 1866 to 1871 Mr. Moss served as Judge Assessor in the Mixed Commercial Tribunals, from 1894 to 1918 as President of the Alexandria Coal Association, and from 1899 to 1918 as President of the Khedivial Club of Alexandria, of which, as the present Sultan Hussein Club, he was Honorary President at the time of his death. Mr. Moss married in 1867 the eldest daughter of the then Vicar of Harefield, Middlesex, Miss Margaret Anne Collins, who died last year, shortly after the celebration of their golden wedding. Of his five sons the only survivor is Mr. R. M. C. Moss, who continues with the firm, and he leaves three daughters—Mrs. Percy Carver, Mrs. K. P. Birley, and Mrs. G. H. Sawyer.

By Mr. Moss's death a conspicuous British link is lost with the Egypt of the Viceroys—the so-called halcyon days of Said and Ismail—that curious Egypt which gazed open-mouthed at the first locomotive and knew not the blessings of the Suez Canal or of the British occupation. The Anglo-Egyptian merchants, whose sterling reputation he typically adorned, still "carry on" their ancient and honourable trade, and although their country's honours and decorations have gone lavishly to British administrators, diplomats and soldiers since the sixties, a better England and a better Egypt will always keep alive the graceful memory, modesty, and activities of Anglo-Egyptians like Robert Moss.

## NEWS IN BRIEF.

Prince Aziz Hassan, a cousin of the former Khedive, has been officially requested to leave Egypt.

M. Mavrocordato, Roumanian Minister to the Imperial Court of Japan, has arrived in Tokyo, and was received by the Empress last week.

A treaty providing for the exchange of diplomatic and consular representatives has been signed in Teheran between Persia and Afghanistan.

The Porto Rosa Conference of the Succession States of the Austrian Empire, which was postponed from June 15, has now been fixed for July 9.

An Order in Council has applied the provisions of the Maintenance Orders (Facilities for Enforcement) Act, 1920, to Malta and the Straits Settlements.

The twelfth Zionist Congress, being the first congress of the Federations of the World's Zionist Organisation since 1913, will open at Carlsbad on September 1.

Sirdar Sardul Singh, the secretary of the Sikh League, has been sentenced at Lahore to five years' transportation on a charge of writing seditious articles.

Bekir Sami Bey, the diplomatic representative of the Nationalist Turkish Government at Angora, was received by M. Briand, the French Prime Minister, on June 30.

An inquiry into the recent attempt on the life of the Serbian Prince Regent has established the existence of a Communist plot, in which three Deputies are suspected of complicity.

A cordial interchange of telegraphic greetings has taken place between M. Skirmund, the new Polish Minister of Foreign Affairs, and M. Pashitch, writes our Belgrade correspondent.

At the beginning of August the last remaining Serbian children who have been encamped for over three years at Faversham will return to their Fatherland.

## SUDAN PROVINCE GOVERNORS.

In response to a request, our Khartoum Correspondent forwards the following list of Province Governors:—

| PROVINCE. | NAME. | ADDRESS. |
|---|---|---|
| BAHR-EL-GHAZAL | Major M. J. Wheatley, O.B.E. | Wau |
| BERBER..... | C. P. Browne, Esq., O.B.E. | El Damer |
| BLUE NILE ..... | G. E. Iles, Esq., O.B.E. ... | Wad Medani |
| DARFUR ..... | Lieut.-Colonel R. V. Savile, C.B.E. | El Fasher |
| DONGOLA..... | Major-General Sir H. W. Jackson, K.B.E., C.B. | Merowe |
| FUNG..... | El Lewa A. Cameron Pasha | Singa |
| HALFA ..... | S. A. Tippetts, Esq..... | Halfa |
| KASSALA ..... | C. E. Lyell, Esq., O.B.E. ... | Kassala |
| KHARTOUM ..... | A. J. C. Huddleston, Esq., O.B.E. | Khartoum |
| KORDOFAN ..... | J. W. Sagar, Esq..... | El Obeid |
| MONGALLA ..... | V. R. Woodland, Esq..... | Mongalla |
| NUBA MOUNTAINS | El Miralai C. S. Northcote Bey | Talodi |
| RED SEA ..... | El Lewa C. E. Wilson Pasha, C.M.G., C.B.E., D.S.O. | Port Sudan |
| UPPER NILE ..... | K. C. P. Struvé, Esq., O.B.E. | Malakal |
| WHITE NILE ..... | E. N. Corbyn, Esq..... | Dueim |

**SUMMER PALACE HOTEL,**
(C. CORTELLETO, Mng. Proprietor),
GLYMENOPOULO, RAMLEH.
This Hotel is situated near the Beach. Open all the Year.

## YUGOSLAV UNITY.

Not without an uneasy passage through the Constituent Assembly, and at the last by a majority of only twenty-seven, if we regard the deputies who left the Chamber before the voting took place as opposed to the measure, in a house of 419 deputies, the Constitution of the Kingdom of the Serbs, Croats, and Slovenes has been ratified and Yugoslav unity has been formally confirmed. It would have been of more hopeful augury for the new State if the majority had been larger. In the seven weeks that have elapsed since May 12, when the Constitution Bill was passed "in principle" by 227 votes to 93, M. Pashitch has been unable to add to his coalition following of Radicals, Democrats, and Bosnian Mohammedans more than four votes. Arrayed against the Government were Communists, Raditch's Party, Peasant Republicans, Catholics, Social Democrats, and some twenty-six Serbian Agrarians who wished to register their disapproval of M. Pashitch's action in compensating the Mohammedan landowners of Bosnia for the expropriation of their estates. The difference in the attitude of some of these groups towards the new Constitution is marked: the Social Democrats and the Agrarians, for instance, are in favour of the unity of the Yugoslav State, but do not hold with the Monarchical principle; M. Raditch, on the other hand, stands for a federation rather than a unified State. He is prepared to allow Serbia to have a monarchy, but he wishes Croatia to be a republic; he holds that the Serbs and Croats are a racial unit, but are not one people. They may, in his view, ultimately become one people, but at present they are not, and for this reason he does not believe in an amalgamation of the two countries. If the division of public opinion corresponds at all closely with the voting in the Assembly, Yugoslavia can hardly hope to escape a long period of political instability. It remains to be seen, however, whether present conditions represent a plant throwing its roots deeply into favourable soil or merely a short-lived growth on shallow ground. Unfortunately for the Triune Kingdom, any tendency to domestic unrest receives considerable support from the external circumstances which mark the early days of its existence. The certainty of peace and security along its frontiers might conduce to a smooth and tranquil life at home; but Serbia has been for so long a stranger to international peace, that she is almost incapable of appreciating its benefits when they are offered her. True, she has been sorely tried over Fiume; but her agitation in regard to Bulgaria was entirely the product of her own imagination, as the present Government has at last come to recognise, and it is not quite clear whether in the direction of Albania she has been at pains to avoid trouble with an admittedly difficult neighbour.

In the absence of the full text of the Constitution as passed by the Assembly it is only possible to gauge its character from various summaries that have appeared. From these it would seem that the old Constitution of Serbia has been modified in certain ways to meet tendencies which did not call for consideration when the Kingdom was restricted to a single homogeneous State. The single Chamber system is retained; but a separate economic and financial body, consisting of experts from various organisations of professions and interests, is to be formed to act in a consultative capacity for the benefit of the Chamber. Deputies to the Skupshtina are elected for four years by direct universal suffrage, in the proportion of one deputy to every fifty thousand inhabitants. The representation of national minorities is guaranteed, as well as freedom of conscience and creed; and it is provided that political rights and appointments in the State services shall in no way depend upon religious belief. Nobody may be compelled to practise any form of religious rites. Religious bodies are autonomous within the limits of the law. There is full right of assembly and association. A thornier subject is dealt with under education, which is allowed only under the State, and is free. Religious instruction is given only at the desire of parents. Pupils belonging to racial minorities are allowed to receive elementary education in their mother tongue. Labour is placed under State regulation; special provision is made for the protection of women, mothers and children, and for the safety of workers. A Constitution, however, may be admirably worded and yet be capable of interpretation in an illiberal spirit. It is possible, for instance, for the right of education in the mother tongue for elementary standards to be so hedged around with unnecessary restrictions that the concession may become valueless. The tradition of the Balkans in this respect is not a liberal one. No State has appreciated the fact that modern requirements and the instinct of self-preservation prompt a racial minority, unless it happen to be a compact and self-contained community, to become bilingual. Only when its own language is the object of persecution are other instincts brought into play and hostility to the State and its language raised to the dignity of a creed. In regard to education as well as to all other matters connected with minorities, it is to be hoped that Yugoslavia, with the bitter experiences of her own people behind her, will set an example to the Balkans of high-minded liberality.

For a country that has been able only by a narrow majority to secure the approval of Parliament for its Constitution, owing to the strength of republicans and separatist tendencies, there can be but one royal road to safety, and that is by means of efficient administration to create contentment at home. It was inevitable after the ordeal through which not only Serbia, but also in a different degree the former Austro-Hungarian provinces now incorporated in the new Kingdom, have been through, that dissatisfaction with the existing order of things should find expression in communism and republicanism. The earlier period following the Armistice found Yugoslavia still too preoccupied with foreign politics to be able to give adequate attention to home affairs, and it is only within recent months that the people seem to have taken matters into their own hands, and to have concerned themselves more with questions of reconstruction and material progress than with the academic problems that often loom so large in the Legislature. Possibly a realisation of this point has inspired the Government to seek for a respite from anxiety over foreign relations. The treaties with Czecho-Slovakia and Roumania are a guarantee of freedom from uneasiness in regard to Hungary; officially, both Italy and Yugoslavia set store on a peaceful settlement of all points at issue between them; it has suddenly been discovered that a good understanding with Bulgaria can be had for the asking; the Albanian question at its worst is relatively insignificant. Thus the ground is prepared for grappling with those problems which must needs be uppermost in the minds of the bulk of the people handicapped at every turn by adverse economic conditions and the backwardness of reconstruction. We can well believe that the passing of the Constitution has been hailed with a profound sense of satisfaction throughout the country, in which some of those who actually voted against it will have shared. The dastardly attempt on the life of the Prince Regent, which happily failed, will have served as an indication of the length to which the disruptive forces in the State are prepared to go, and should help to rally the saner elements to the support of any Government that subordinates party considerations to the interests of the State.

## MEN AND METHODS.

### By "Kalantar."

V. (*continued*).

The next march, a distance of eighteen miles, was covered between 3 and 8 p.m. Everyone brightened up during this march, for the country was dotted with villages, and the gaunt peaks of the Siah Kuh range, which runs parallel to the track, formed a welcome relief to the eye after the unbroken horizon of the "dasht." They were cheered, too, by the prospect of a full night's rest in the new and spacious caravanserai which is the pride of Zaitun.

As the centre of a prosperous district which produces large quantities of fine opium, fruit, and pistachio nuts, the village boasts a Deputy-Governor, a Postmaster, and a Revenue Agent. From consultation with these officials and the more intelligent merchants, the C.O. gleaned the following meagre details regarding the situation at Hashimabad.

Ahmad Quli and his brother Qalandar had been killed by the Bakhtiari, and the latter were now besieged in the Hashimabadi fort. For ten days past no one had entered or left the village. Regarding the strength of the Arabs each had his own estimate. The Deputy-Governor, a feeble

**IN THE NUSHKI DISTRICT.**

**A Group of Village Headmen, Brahuis.**

*The Brahuis are a tribe whose influence in Baluchistan nearly equals that of the Baluchis. They are widely scattered. Important sections of the tribe are found in the vicinity of Nushki, Mastung, on the Quetta-Nushki line, and in the Chagai district, which lies to the north of the Nushki-Seistan trade route, and between that route and the Afghan border.*

and nervous individual, thought they numbered at least 500. The Postmaster, regarded, by reason of his office, as a trustworthy source of information, put their numbers at 200, all armed with the deadly "panj tir." While the Revenue man, sleek and placid, as became the tax gatherer of so prosperous a district, declared, with a knowing smile, that there might be 2,000 or 200. Who could tell?—a philosophic remark which conveyed extraordinarily little military information. Eventually, the C.O., well acquainted with the Persian gift of exaggeration, made his estimate by the employment of a very simple formula. He divided the lowest of his informants' totals by four! The correctness of this figure was proved shortly afterwards.

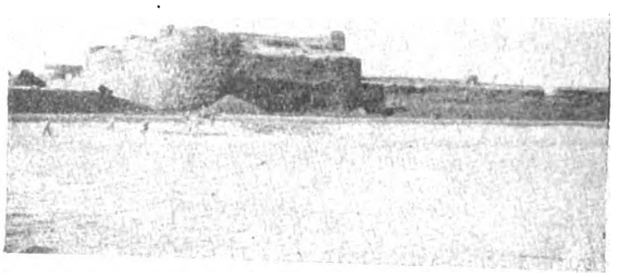
By midnight a council of war, consisting of the O.C. column, the cavalry officer, and two senior Persian officers, had concluded its deliberations. The cavalry would march at daybreak, the infantry was to remain at Zaitun.

This decision was taken mainly on the strength of information gleaned by Persian officers. Two days earlier the use of only two troops in a march to Hashimabad would have been decidedly unsound, for it appeared that nomad Arabs, allied to the section at Hashimabad, had halted in the course of their summer migration and pitched their tents in the vicinity of Ahmad Quli's fort.

For a week this chief had made desperate efforts to secure their aid against the Bakhtiari. He offered stretches of rich land, sheep, grain, and a share of their accumulation of plunder as an inducement to them to join in the fray. The nomads were on the point of throwing their weight in the struggle when Rumour whispered that the South Persia Rifles, the all-powerful "idareh-i-janub," was about to take a hand in the game. By next morning the nomads had vanished, and the Hashimabad Arabs, faced with the now hopeless task of defeating the Bakhtiari single-handed, once again vented their wrath on the villagers.

To put an end to these excesses, and to ensure the full moral effect of the movement of his diminutive force, the O.C. column decided to move at once, and to cover the sixty-one miles which lay between Zaitun and Hashimabad in one march. One mule, loaded with picketing ropes, formed their transport. For the rest, the men carried on their saddles two days' cooked rations and one blanket apiece.

Before dawn the archway of the main gate resounded to the ring of hoofs and the clatter of scabbards; at midday the horses were drinking at the weed-grown pool of Rustam, a half-ruined village twenty-five miles from Zaitun. Watering over and horses safely picketed, the men snatched a few mouthfuls of food and stretched themselves in the shade of the few intact roofs in the place. Under a solitary gaz tree, well clear of the verminous ruins, two dust-coated figures reclined, smoking, while orderlies pulled off their field boots. Long before this task was completed heads had sunk on to the hard earth, and the cavalry officer was snoring.



**HORMUZ FORT, BANDAR ABBAS.**

*A relic of Portuguese and of pre-Portuguese days. The Sultans of Hormuz, or Ormuz, were independent and very wealthy, and their wealth attracted the Portuguese, who held the island until driven out of it by the British. Formerly thickly populated, it is now practically deserted.*

When they mounted again the fierce glare of the midday hours was already mellowed by the golden tints of approaching sunset. Behind them the poplars of Zaitun appeared like a black smudge, no larger than a man's thumb. To the north and thirty miles away, slanting rays turned the jagged peaks of the Siah Kuh into so many obelisks of burnished bronze. Ahead, to the west, towards Hashimabad, a strip of salt kavir, sharply defined against the yellow brown of the plain, shone with a ghostly whiteness.

A Persian officer examined it through his glasses. "Ahmad Quli's winding-sheet!" he murmured, smiling. An N.C.O. riding behind him heard the remark and chuckled.

VI.

Sounds of laughter, badinage, and snatches of song floated on a fitful breeze to the head of the column, for the going was easy, and, as the village was not to be entered until daylight, the troops would not be called on to take their horses out of a walk. At midnight girths were loosened, and the men lay down for a quarter of an hour. Then on again, steadily though wearily, until dawn showed them, over the crest of a low rounded ridge, the dark tree-tops and squat towers of Hashimabad.

Here were no signs of war. No watcher looked out from roof or tower. The column moved on, still at a walk, and a halt was called beside a clear stream—the first clean water they had come upon since leaving Zaitun. A drink for

man and horse, a last glance at girths, ammunition, and accoutrements, then the command "Walk march!" and they were within rifle range of the "beleaguered city." Evidently they had been seen. A group of blue-clothed villagers gathered on a roof, another at the end of a lane, a white kullah showed over a parapet. The Bakhtiari, at any rate, were awake, but in the more distant towers and encampments of the Arabs there was still no sign of activity. Then a couple of Bakhtiari horsemen emerged from the village at full gallop and made for the column, displaying their horsemanship by dropping their reins and "drawing beads" on imaginary foes.

At twenty yards from the C.O. they pulled up with a jerk that drew blood from their ponies' mouths, and, dismounting, approached with outstretched hands and murmurs of "Salaam alaikum!" Courage now fully restored, they told, in excited tones, of their battles and trials, and expounded schemes for the extermination of the Arabs. They suggested an immediate inspection of the bodies of their victims, and showed surprise and indignation at the C.O.'s angry refusal of this offer. These bodies, before nightfall, were handed to the Arabs for decent burial, and borne to the encampment amid a throng of weeping women.

Meanwhile, the entire population of the village had gathered outside the fort to greet their rescuers, and the aged kadkhuda, wrapped for the occasion in his best abba, came forward with tears in his eyes and shook hands with all officers and most of the men.

In a neat, alcoved room, carpeted with precious rugs, the Bakhtiari then told their tale: how the Arabs had been hostile from the first; how they had turned on the unarmed Hashimabadis, indulging in indiscriminate shooting, carrying off of cattle and wanton destruction of crops.

Until Nauruz all requests for an interview had been angrily refused. On this day, in accordance with the universal Persian custom, the parties called a truce, and Ahmad Quli and his brother Qalandar consented to visit the Bakhtiari. According to the latter, they arrived armed and attended by numerous followers, who were not allowed to enter the village. The meeting took place in an upper chamber in the fort. The Bakhtiari, after the somewhat lengthy greetings attendant on a Nauruz visit, opened the subject of Arab behaviour. At once Ahmad Quli's attitude became threatening. He abused his hosts and the Government, and finally raised his rifle. It was a moment for instant action. In self-defence the Bakhtiari drew their Mauser pistols. Two reports rang out, and the Arabs fell forward on the floor.

Who can say what happened in that room on the afternoon of Nauruz? Certainly the Arabs, summoned to a meeting after the departure of the Bakhtiari, told a very different story and cried for vengeance, swearing solemn oaths that their chiefs had been murdered in cold blood. The story of arms and threats was, they declared, a preposterous lie. "Do men bound on a Nauruz visit carry arms?" "Is it possible for an Arab to abuse a Bakhtiari Governor?" "Surely the Rais would see justice done?" "The Bakhtiaris should be handed over."

Long they pleaded until the C.O., worn out with a succession of forced marches and sleepless nights, dismissed them with an assurance that the case would be reported at once to the Persian authorities, who alone could settle a dispute of this nature.

Next, the Bakhtiari leaders requested an interview, and explained that Hashimabad was a region of Hell. They would depart at once. Having no authority to detain them, the C.O. wished them *bon voyage*, and, as soon as it was dark, the party slipped away into the desert, praising the Inglisi and their "idareh" and congratulating themselves on getting away with whole skins.

The cavalry returned to Zaitun. The Arabs waxed eloquent over the flight of their enemies, and dispatched voluminous petitions to their own Ilkhani and all neighbouring Governors.

The Bakhtiaris escaped punishment, of course, but—they no longer look towards Hashimabad.

# THE NEAR EAST IN PARLIAMENT

## HOUSE OF COMMONS.

*June 27.*—Mr. Harmsworth informed Mr. Ormsby Gore that a letter had been received from the President of the League of Nations in which the suggestion is made that in view of the intimation from the United States Government that they could not accept any decision reached on the question of the "A" and "B" Mandates without their approval, the Powers concerned, viz., Great Britain and France, should make every effort to arrive at a solution on the points under discussion between them and the United States so as to enable the Council to settle the whole question of mandates before the next meeting of the Assembly of the League. His Majesty's Government were considering the best means of giving effect to this suggestion.

*June 28.*—Sir L. Worthington Evans informed Commander Kenworthy that under the existing agreement the cost of transporting horses from Busreh to India is 87½ rupees per head. The estimated cost of transporting them from Busreh to the United Kingdom would be about £60 per head exclusive of the cost of attendance and forage. Offers are now being considered for the sale of the surplus animals at Busreh.

Mr. Kelleway informed Mr. Hurd that the wireless stations at Leafield (near Oxford) and Abu-Zabal (near Cairo), which are to form the first link of the Imperial wireless chain, will be ready for use before the end of the year. Pending the construction of stations further east, arrangements are being made for the further transmission to and from places beyond Egypt of telegrams forwarded by wireless between the Leafield and the Abu-Zabal stations. In addition, there is a considerable amount of terminal traffic to and from Egypt by the new route.

*June 29.*—Mr. Harmsworth informed Commander Kenworthy that the decision as to whether the Egyptian Assembly should be summoned or a general election held in Egypt rests with the Egyptian Government, as the present Ministry on taking office expressed their intention of doing both after the conclusion of negotiations with the British Government. Inasmuch as the Egyptian delegation which is to discuss the terms of settlement with His Majesty's Government had not yet left Egypt, it would obviously be premature to say how long their labours will last.

Mr. Harmsworth informed Colonel Archer Shee that the situation in the Ismid Peninsula was obscure, but according to information received, the town of Ismid was evacuated by the Greek forces on the evening of June 27. It was further reported that the town was in flames and that great panic prevailed in the district. Numbers of Armenians and neutral Turks were fleeing towards Constantinople. Having regard to the general confusion there appeared to be considerable danger of further massacres, and Mr. Rattigan, in concurrence with the Allied High Commissioners, was taking all possible steps to prevent such outrages by one side or the other.

*June 30.*—The Prime Minister informed Lord Robert Cecil that it is proposed to lay on the Table of the House the Report of the Inter-Allied Commission upon alleged Greek atrocities at Yalova. The conclusions are summarised thus in the first paragraph of the Report:—"Creditable evidence has been produced as to crimes committed during the last twelve months both by Greeks and Turks. There is no doubt that there have been a large number of atrocities on both sides in the Ismid Peninsula, and it appears that those on the part of the Turks have been more considerable and ferocious than those on the part of the Greeks."

Mr. Harmsworth informed Colonel Archer Shee that the town of Ismid was occupied by Turkish forces on the morning of June 28. Information had been received from Constantinople that M. Chitcherin, the Russian Soviet Commissar, was believed to be at Angora. His Majesty's Government had received from several sources indications which point to a desire on the part of the Angora Government to establish close relations with certain elements in Bulgaria.

The further debate on the Colonial Office Vote, including questions connected with Palestine and Mesopotamia, which was originally fixed for June 30, was adjourned till July 14 in consequence of the bereavement of Mr. Winston Churchill.

## ARAB HORSE'S SKELETON.

The Natural History Museum has received from Lord Rothschild a gift of 141 mammals, collected by Captain Angus Buchanan at Air, between the Sahara and Nigeria, a locality very inaccessible and one of remarkable interest. The whole cost of the expedition was defrayed by Lord Rothschild. The collection comprises 36 species, of which 18 are new to science. It is not proposed to exhibit the specimens, their interest being severely scientific. Another acquisition is the skeleton of the Arab stallion Dwarka, bred in the Arabian desert by the great Anazeh tribe. It was imported into India by General Broome, Director of Remounts, in the early '90's of the last century, as a four-year-old, for racing purposes. Dwarka was a bay, 14 hands high, and was described by General Broome and other judges as in his younger days the most perfect Arab they ever saw. Notwithstanding his great age, nearly 30, he retained his fire and spirit until a few weeks before his death. A good many polo ponies were bred from the stallion. Later he belonged to Mrs. Atkinson, of Okehampton, and in 1916 passed into the possession of the Prince of Wales. Dwarka at last became very feeble and ill and was destroyed. His skeleton was presented by the Prince of Wales to the Museum with the consent of Mrs. Atkinson, who at the same time gave an oil painting of the animal in his prime.

# PRESS ON THE NEAR EAST.

## Palestine.

In an article entitled "The Palestine Blunder" the *Spectator* of June 25 gets at once into what it considers the heart of the matter. It begins:—

There used to be one very good feature in the way in which the British Empire was run. There were very few direct blunders. Our policy was slow, cumbrous, timid, and often without much foresight or insight, but at any rate we did not plunge. We took a long while to decide upon any sort of change or development. This, no doubt, might involve sins of omission, but sins of commission were very rare indeed. We have changed all that. We now plunge light-heartedly into all sorts of action fraught with tremendous consequences and trust to luck to get us out. If we did this only in one section of the world the evils might be limited; but, unfortunately, it is part of our recklessness to gamble in every part of the civilised, or perhaps we ought to say uncivilised, world. We are blundering in India; we are blundering in the Far East; we are blundering in Persia and Mesopotamia; we are blundering in Egypt; we are blundering in Russia and Turkey, and we are blundering in Palestine. This last is the worst of all our blunders; it is so purely unnecessary, so entirely voluntary, so gratuitously designed to involve us in troubles with our friends without producing the slightest conciliation among our enemies.

Our Palestine policy might, indeed, have been invented by someone who wanted to produce the maximum proof of our disinterestedness. There are a dozen ways in which our Palestinian adventure may bring us shame, trouble, and loss—not one which can be useful or satisfactory. We are earning the hatred of the Arabs and the Christians of Palestine, without gaining the gratitude or sympathy of the Jews, either in Palestine or out of it. Instead we are becoming the nation most hated by the Jews. We are making ill blood with the French, and we are not easing, but irritating the people of Egypt. Lastly, we are incurring an annual expenditure of some eight or nine millions which we can ill afford—an expression wholly inadequate to represent what this waste means to us at the present time. Further, we are very likely preparing for ourselves an expenditure not of tens but of hundreds of millions in the near future. Such a bill is not impossible if an outbreak of civil war takes place between the Jews and the Arabs. Possibly, by keeping large numbers of troops in Palestine and by increasing our annual expenditure, we may stave off this danger, but it can only be at a great cost, and with results which cannot but be burdensome, and may be ruinous.

And, as justification of the gloomy views here expressed, it refers to Sir Herbert Samuel's recent speech. It proceeds to contrast the English Jew with others:—

If words were things and speeches acts, and if, what is equally important, the moderate Zionist was the predominant Zionist, we might draw no small hope from these pronouncements. We greatly fear, however, that the moderate Zionist only exists in any strength in this country. The Zionists who have been pouring into Palestine of late at the rate of about a thousand a month, unless we are greatly mistaken, are anything but moderate. They are Semitic crusaders, filled with zeal and with the belief that the Arabs are intruders in Jewry's national home, and ought to be expelled forthwith. Anyone who protests against or prevents that expulsion is the deadly enemy of Zionism. Thousands of Shylocks, though inspired not by Shylock's selfishness, but by a genuine and therefore in itself honourable fanaticism, have been pouring into Palestine demanding their pound of flesh, their whole pound, and nothing but their pound. Up till now, too, the Palestinian Government, in the chief departments, as at the top, has been not merely under Jewish influences, but actually in Jewish hands. It has not had the power, and very likely not the heart, to damp down the zeal of the Lord's House, which is eating up so many thousands of Jews in every part of the world. When we remember that the religious frenzy of the Jews is met and countered by panic joined with pride of race and creed among the Mohammedan Arabs, and by similar feelings among the Syrian and Arabic Christians, can we wonder that Palestine is a pot not only seething, but ready to boil over, and, if it does boil over, likely to produce incalculable evils?

# HELLENIC RESEARCH.

At the annual meeting of the Hellenic Society, held last week, Sir Frederic Kenyon took for the subject of his presidential address the prospect of research in the Nearer East and the new laws respecting antiquities that would be necessary. He indicated as possible fields for excavation Colophon, in Asia Minor, and Constantinople. By a friendly arrangement with the French authorities new Colophon might be excavated by the French and old Colophon, if men and money were forthcoming, by the British. In Constantinople a vast field of fresh interests was opened, and in some ways—for example, the devastation of much of modern Constantinople by fire—the opportunity for systematic excavation was favourable. The two lions in the path were diplomacy and finance.

# TRAGEDY IN JERUSALEM.

A correspondent writes us regarding a sad occurrence which has, he says, caused quite a sensation in Jerusalem. As most people who have any knowledge of that city are aware, what is generally known as "The Garden Tomb" is situated only a few hundred yards outside the Damascus Gate, and quite close to the main Government Administration offices. The Garden, which is owned by a Committee in England, is in the care of a custodian who lives in a house on the spot. For the last few years the custodian has been a Miss Lomax, whose interest and enthusiasm are well known to all visitors. She lived there mostly by herself, and the only other person who stayed in the enclosure was the native gardener.

It was noticed by neighbours that there was nothing stirring in the garden for a day or two, and a search was therefore made, but no trace of Miss Lomax, or of the gardener, or of a horse which was usually pastured in the outlying portion of the enclosure, was found. The aid of the Boy Scouts was invoked, and the adjacent country thoroughly searched, but with no result. Eventually the body of Miss Lomax was discovered at the bottom of one of the wells in the Garden precincts. It is said that no marks of violence were found on the body, but the disappearance of the gardener and the horse would seem to point to foul play, and it was known that Miss Lomax and the gardener were not on the best of terms. To date there is no news of the horse or the gardener.

---

A delayed Simla telegram, dated June 29, says:—The recent congestion of officers in Deolali Camp awaiting homeward passages has at last been relieved. One hundred and fifteen sailed during the week ending June 18, and no further delay is anticipated.

Reuter's Athens correspondent writes (July 1):—A message received here from Syra (Cyclades Group, Ægean Sea), says: "The bodies of British soldiers who died in the Cyclades while on active service were transferred here to be buried in the new British cemetery. The funeral service, with military honours, was attended by all the local authorities."

The Egypt Parliamentary Committee entertained its members and their friends at tea at the Grand Hotel on July 1, to meet Dr. Hamed Mahmud, the confidential secretary to Saad Pasha Zaghloul, who made a speech stating the case for the supporters of Zaghloul Pasha as against the Egyptian Cabinet.

News has reached Peshawar of considerable friction between the Bolshevists and the Bokharan Republicans. Sher Mohammed of Farghana is still carrying on guerilla warfare against the Bolshevists, and it is reported that he has occupied the hill country around Hissar, where the ex-Emir of Bokhara held out for a long time.

## NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

***Trade Prospects.***

With the settlement of the coal strike and the avoidance of further industrial trouble in the engineering trades, a feeling of undeniable optimism obtains in commercial circles, since it really seems as if at long last British trade enterprise is to have its opportunity. Unhappily the immediate prospects are far from being what they were after the maroons went on November 11, 1918, as a result of Labour's persistent refusal to face the facts; and the constant industrial strife, and in particular the long-drawn-out coal strike, has given our competitors an opening of which they have not been slow to avail themselves. But the markets that have been lost can, and will, be won back provided Capital and Labour can find common ground in the development of trade to their mutual advantage. The question at issue simply is whether we can produce cheaply enough for the foreign consumer to give us the preference. If we can the problem is solved.

***Anglo-Egyptian Setback.***

As will be seen from the report, which will be found in another column, the results obtained by the Anglo-Egyptian Oilfields in 1920 were substantially below those recorded for the previous year. The total production of crude oil fell from 231,180 tons to 155,975, while the net profits were £212,097 as against £411,481. Four factors, it is explained, are responsible for the reduction in the company's profits, namely, the transition of the Hurghada field from "flush" to "settled" production, increased expenditure, high freights, and the low prices ruling in Egypt for Egyptian products. Of these the first is obviously the all-important cause, and in view of the value attached to oil as a source of fuel in Egypt it is unfortunate, to say the least of it, that the yield should have fallen to its present level when for 1918 it was 277,310 tons.

***The Outlook.***

It is not possible to make the usual comparison of dividends in view of the re-arrangement of the capital as from January 1, 1920. The balance available is £332,058, as compared with £488,032 for 1919 and £660,815 for 1918, and it is proposed to utilise this to pay 10 per cent. on the "B" shares and 15¼ per cent. on the "C" shares, which are held by the Egyptian Government, and to carry forward £146,003 as against £119,961. The "B" shares, it may be pointed out, received 20 per cent. for 1919 and the "C" shares 33 per cent. As regards the prospects, it is mentioned in the report that the production during the current year has shown an increase of about 20 per cent. as a result of the extended drilling programme. Efforts are being made to prove new territory, and three exploratory wells are now being drilled, while various prospecting licences have been taken out.

***Bulgarian Finance.***

A very strong case was made out by M. Bouvoff in the Sobranje against the proposed tax on capital in Bulgaria, and it will be interesting to see the answer of the Finance Minister to the objections he brought forward. On the face of it, a capital levy has little to commend it in any circumstances, and, as M. Bouvoff suggests, it would appear to be a particularly dangerous expedient in a country where capital is mainly productive. Another strong point he made was that foreign capital would be largely untouched, and that the effect of the measure would be to induce Bulgarian firms to have their head offices abroad, in order to minimise the taxation. The difficulty is that, as a result of the war and of the wave of extravagance that swept over all nations immediately after the Armistice, the majority of countries are now so unfortunately situated that they cannot afford to leave unexplored any possible avenues of revenue, and it may well be that, objectionable as it is, Bulgaria may have no option but to resort to the levy.

***Picturesque but—***

One passage in M. Bouvoff's speech is likely to cause a good deal of amusement to English readers, to say nothing of weakening, in some eyes, what he says with regard to his own country—that is, his reference to unproductive capital in Great Britain. He thinks, apparently, that while a capital levy is out of the question for Bulgaria, it might possibly be applied with safety here, with our "luxurious buildings" and "great estates kept solely for sport," etc., representing so much unproductive capital. Evidently M. Bouvoff has a very limited acquaintance with the post-Armistice England, or he would be aware that these things can now be maintained only with the greatest difficulty. If he had to maintain a place here, he would not have spoken half so light-heartedly on the subject.

***Storms in Yugoslavia.***

At a time when it is above all things essential that the Near Eastern countries should be able to realise to the full the products of the soil on which for the most part they depend, it is exceedingly unfortunate that in some regions fate in the shape of adverse climatic conditions should be jeopardising the prospects of a satisfactory harvest. Our Belgrade correspondent gives a rather depressing picture of conditions in Yugoslavia. As in Great Britain, a prolonged drought has been experienced in Yugoslavia, but accompanied by cold weather unlike what has happened here. This has been ended by one of those severe storms which from time to time sweep over the peninsula carrying ruin to crops and cattle in their train. Our correspondent states that great damage has been done to the crop in many districts, and that a large number of cattle have been drowned. It is to be hoped that the consequences of the storm will prove less serious than would at first appear, as otherwise it must impose yet a further check on the progress of reconstruction after the war.

***The Roumanian Exchange.***

One of the most remarkable features in the foreign exchanges is the persistence of the Roumanian lei at its present level. The reports from the oilfields in recent months have shown a position that is constantly improving; the outlook for the crops is promising, the weather having so far been kinder than in Yugoslavia; transport facilities are getting better, and altogether the conditions would seem to warrant a marked improvement in the exchange. What is the explanation of its not taking place? The reason most commonly suggested is that there has been extensive speculation in the exchange, and that buyers unable to wait for the rise have had to unload, and very probably that has had something to do with it. Whatever the cause, it is quite certain that the present rate of the lei for sterling totally misrepresents the actual position, and before very long there is bound to be a marked change in the quotation, for potentially Roumania is in the strongest position of any of the Balkan countries, and her exchange ought to be the first to reach its post-war parity, whatever that may be.

(REPORTS FROM OUR OWN CORRESPONDENTS.)

## EGYPT.

CAIRO, June 20.

### Adverse Trade Balance Growing.

The Egyptian Customs returns for April reveal a further decrease in the foreign trade of the country, particularly under exports, and consequently a further swing over in the adverse trade balance already recorded. Imports during the four months amounted to £E23,209,856 and exports to £E8,050,567, as compared with £E28,991,541 and £E55,755,593 a year ago. Imports have therefore fallen off by £E5,781,685 and exports by £E47,705,017, while the trade balance, taking into account re-exports from a credit one of over £E27,000,000 at this date last year, has become an adverse one of £E12,000,000.

The chief items under imports have been preserved meat and fish, £E268,000; wheat and maize flour, £E4,454,000; fresh and dried fruits, £E404,000; coffee, £E163,000; petroleum, £E471,000; oil-fuel, £E325,000; stationery, £E379,000; construction wood, £E757,000; coal, £E2,213,000; cotton textiles, £E2,172,000; woollen textiles, £E275,000; manufactured iron and steel, £E1,010,000; and tobacco, £E740,675. The main decreases have been sugar, £E1,185,000; coffee, £E499,000; vegetable oils, £E234,000; petroleum, £E268,000; cotton textiles, £E5,556,000; woollen textiles, £E786,000; while the principal increases have been in wheat and wheat flour, £E5,220,000 (146,000 tons); and coal £E1,370,000 (6,000 tons).

Under exports the main item was raw cotton (£E5,619,000), of which half the 1920 quantity was exported with a value but 10 per cent. of that exported during the corresponding months of the preceding year. Other important items were eggs, £E171,000; cotton seed, £E689,000; cotton-cake, £E225,000; onions, £E243,000; and cigarettes, £E183,000; all of which were considerably less than last year.

The United Kingdom again showed a considerable decrease in the proportion of imports, her share dropping to half what it was at the end of April, 1920, although the diminution in the total was but a little over 15 per cent. Italy and Japan were similarly affected, but the United States showed a considerable increase, and in fact headed the list of foreign countries. The chief American imports were: maize, £E173,114 (40 per cent.); wheat, £E891,941 (70); wheat flour, £E1,969,920 (50 per cent.); maize flour, £E947,487 (all); petroleum, £E165,118 (one-third); coal, £E1,180,444 (one-half); and railway locomotives, £E308,964 (all).

## THE SUDAN.

KHARTOUM, June 9.

### General News.

Berber Province.—The discovery of mica deposits in the vicinity of Shereik has resulted in several applications for mining licences.

The project of illuminating Atbara by electricity has been mooted, and I understand that an offer to undertake the work is now being considered by the authorities.

It is to be regretted that pernicious methods in vogue in Egypt appear to have been adopted by certain of the local traders. The prompt action of the authorities in sentencing two would-be fraudulent bankrupts to terms of imprisonment has had a very salutary moral effect.

KHARTOUM, June 19.

### Dam Construction.

The recent statements of the Egyptian Council of Ministers have occasioned considerable interest in the country. The Gebel Aulia construction has been shut down for an indefinite period, maintenance parties being left in charge of the completed houses and stores. Makwar works are also at a standstill pending the result of the proposed additional loan of £8,000,000, and it is reported that large numbers of Saidi labourers are being repatriated every week. There is a strong divergence of opinion as to the advisability of continuing the works. The cultivators and the majority of the non-official inhabitants are against the projects, on the grounds that the country is insufficiently developed to warrant the burden of a loan of 14 millions, and also that the concentration of all available labour on the Dam construction militates very largely against the progress and even maintenance of existing cultivation in other provinces. The Dam enthusiasts, on the other hand, point to a future prospect of hundreds of thousands of feddans of reclaimed desert under cotton, and the consequent prosperity of the country. The problem has been discussed and re-discussed by the foremost experts in the irrigation world, and it would be presumption on the part of a lay member of the public to proffer any suggestions. Suffice it to say that in the event of the additional eight millions being forthcoming, the Government will have to face the duty of providing a minimum of one million sterling per annum to meet interest and sinking fund; and in view of the fact that existing taxes and royalties could not be materially increased without penalising the export and import trade to an unbearable degree, it is difficult to see the possibility of meeting so heavy an obligation.

## ROUMANIA.

BUCHAREST, June 21.

### Economic Treaty with Poland.

The Roumanian Commission for the conclusion of an economic treaty with Poland has returned to Bucharest. The negotiations will be continued here, the Polish delegation, headed by M. Strassburger, Polish Vice-Minister for Commerce and Industry, is expected to arrive shortly. Most of the important work has already been done at Warsaw, and, after completion, the Convention will be signed here. The Roumanian delegation, which visited Danzig and the Fair at Poznen, has been accorded a cordial reception everywhere.

### Tractor Exhibition.

With the object of increasing the use of agricultural machinery, the Roumanian Government are holding an exhibition and demonstration of motor-ploughs on the agricultural school grounds at Herestrau, at Baneasa, near Bucharest, on September 11, 12, and 13. The object is to give agriculturists an opportunity of seeing the different types of tractors in use and their mode of working. All varieties of motor-ploughs will be admitted. The demonstrative work will consist of ploughing to a depth of 0.20 ctm., for three days. Applications, which must be received by August 10, must be sent by registered letter to the "Ministère de l'Agriculture et des Domaines, Direction des Machines Agricoles."

All machines will have to be in readiness three days before the opening on the grounds reserved for the exhibition and demonstration. Benzine, lubricating oils, and greases will be supplied free by the Ministry. The cost of transport of the machinery and personnel is to be borne by the competing firms. The transport cost on the Roumanian Railway of the re-exportation of this machinery within three months may be reimbursed. The same applies to the Customs and Commission taxes, and for this purpose the declaration for the Customs should state that the machinery is "destined for the demonstration and exhibition organised by the Ministry of Agriculture."

### General News.

In consequence of representations by the British Government, Roumania has consented to allow Great Britain to import fancy goods (silks, perfumery, cosmetics, powder, etc.) to the same extent as Austria, France, and Italy.

The Belgian Government has authorised the Société Générale Foncière Urbaine to send eighteen million Belgian francs to Roumania, for the purpose of constructing in Bucharest cheap houses for Government officials. Repayment will be made, by instalments, within fifteen years.

## YUGOSLAVIA.

BELGRADE, June 28.

### Building in Belgrade.

Great progress has been made with building in Belgrade in spite of the high cost of labour and materials. Most of the buildings which have been hidden under scaffolding for the past two years are now completed, while more scaffolding has been erected. Many public offices, such as the Monopol, the War Office, the Mining Directorate, and others, have had one or more extra storeys added. The corner building near the junction of Prince Michael Street, and the Terazije has blossomed into a bank with wonderful golden gates, and many new private houses are now occupied. The streets have invented a new and original form of humour. The wooden paving of Prince Michael and King Milan Streets has always been a source of discomfort to horses and motorists alike, with its numerous pit-holes, which are probably due to bad foundations and soft wood. The new feature is a number of rounded, elevated blisters, about a yard and a-half in diameter and a couple of feet high, which are the delight of the children, till men come and prick the blisters and level them again. They are quite numerous, and are probably due to the wood being put down dry and swelling under the recent rains.

### A Danube Confederation.

The Yugoslav Press is attentively watching the conversations between Czechoslovakia and Hungary. It is considered quite possible that an economic alliance may be formed between these two States which would approach to some extent the Danubian confederation which French politicians are aiming at, with the exception that each State would retain its full sovereign rights. Of course, the final exclusion of the Hapsburgs must be a *sine quâ non*, for the Czechoslovaks would regard a return of that dynasty to Hungary as a *casus belli*. If these negotiations are successful, it is possible that similar conversations will be opened with Yugoslavia, which would lead to an allied block in Central Europe.

## BULGARIA.

SOFIA, June 26.

### Case Against the Clearing House.

The good impression created by the leading article in THE NEAR EAST on May 12 on the clearing house for Bulgarian debts in England has been further strengthened by the letter from Sir Edward Boyle on the same subject in *The Times* of June 18. The abolition of the clearing house can be urged on every possible ground, and it would give a much-needed impetus to the trade between the two countries. With everyone complaining about the adverse rate of exchange, it is as well to see what effect this matter has had on trade between Bulgaria and other Allied countries. The American dollar is high enough—one receives 95 levas for a dollar to-day—and yet there is a certain amount of trade going on between the two countries, and it is a noteworthy fact that the United States have now both a Consul and Vice-Consul at Sofia. Before the war they were hardly represented in Bulgaria, and there was little trade going on. Other Allied countries have also increased their trade organisation and representation, but all we have done is to withdraw our Commercial Secretary.

With Italy the difference of exchange has never been very great, but what energy and enterprise can achieve is shown by the flourishing business that the Fiat Motor Car Co. have built up. Before the war very few Fiats were to be seen in Bulgaria, but to-day, excluding Government cars, fully 75 per cent. of the cars and lorries in the country are of this make. It is not that they are exceptionally cheap, but pains have been taken to bring the cars here and keep their name before the public.

It is often said that when the leva goes up we shall do trade, but when this happy event occurs it is open to question whether foreign traders will not be already firmly entrenched and the market virtually closed.

Trade emissaries from the Central Powers, such as Germany, Austria, and Czechoslovakia, are arriving here every day, and their attitude always seems to be summed up by: "Tell us your requirements, and we will supply them." The British attitude, on the other hand, is: "Here are our goods; they may be a little dearer than those of other countries, but they are better" and the matter is left at that.

In these days of universal trade depression no market, however small, is to be despised, and it would seem that if the British trader is content to wait for his profits, there are big possibilities in store for him in the Bulgarian market. The few English that are here are not unduly despondent, and, after all, as one said to me recently: "If one manages, either here or at home, to pay one's office expenses to-day, one is lucky." This is the present position, whether we like it or not, and it is only spadework that can be done. But in order that success may come, it is absolutely essential that the authorities at home should decide to do away with the clearing house, and it is to be hoped that every business man, whether directly or indirectly interested, will, in the future trade interests of the two countries, urge that this be done.

SOFIA, June 28.

### Tax on Capital.

A notable speech was made by M. Bouvoff in the Sobranje on June 15 on the Finance Minister's proposals. He said: "The question before us is whether the Finance Minister, by means of his new law—namely, the tax on property and capital—will achieve his aim. He hopes that by the revenue secured by this measure the circulation of bank notes will be lessened and the value of the leva will improve. Taking first the bank notes, the theory that the value of the bank note is wholly dependent upon its circulation is wholly without foundation, as is also the theory that the quantity of bank notes in circulation has no bearing on the quality thereof. There are, however, more important factors which influence exchange—viz., the general, political, and economical situation of the country, the credit of the country, the condition of its trade balance, its production, and the guarantee behind the bank notes.

"To show what influence a partial decrease of the bank note circulation will have on the value thereof, we must ask ourselves, 'When the bank note circulation exceeds three milliard levas, why is there a lack of money in trade and industry?' It is said that there are many bank notes held abroad, but I do not think that the amount is greater than 300-400 million levas. What is left is enormous. It is true that three milliard levas, when one takes into consideration the prices that prevail to-day, might be more or less a normal quantity if it were allied with normal production and normal trade. But do not forget that to-day we do not have normal production and trade.

"If before, with 200 million gold leva bank notes, we were manipulating a trade of which the export value was 200 million levas, it meant that the relation was, so to speak, lev for lev. To-day, with a circulation of three milliards, we should have an export trade value of three milliards, but in reality the figure is under two milliards; and if we look for true proportion a bank note circulation of 1¾ milliards should be enough.

"The explanation is elsewhere: a part of the bank notes, instead of being in a position where they could have been turned to good account as factors in production, have gone into savings banks or are hoarded in peasants' cottages. Thus a great part of the bank note circulation is a dead load which only affects the rate of exchange without fulfilling its economic and trade function. The reasons for this are to be found in our financial policy. The emission of bank notes in Bulgaria has not come under the influence of our trade and economic needs, but was made to satisfy the needs of the Government. In fact, under the name of a bank note circulation the country has been making an internal loan, and these bank notes are to-day playing the rôle of 'obligations without interest.' As long as we retain a financial system by which the National Bank is made to fill the part of the Government Treasury and to give to the Government 20, 30, or 40 million leva bank notes every month, which are used to cover the difference between income and expenditure, we shall have an insufficiency of bank notes in circulation. Even if we succeed in decreasing it we shall not arrive at any practical means of improving the situation. Grant for a moment that this law for the taxation of property is passed. Grant it all possible advantages, including a fiscal administration which is absolutely sound, and yet at the most it can only realise one and one-fifth milliards of levas.

"This sum is to be realised in money, over a period of five years. Owing to the present lack of bank notes, it is the taxpayers who will have to shoulder the greatest burden, as it is the National Bank, directly or indirectly, which will have to pay this money in under the form of a loan through new bank rates. The only difference will be that the debt of the State to the National Bank will be decreased and the debt of individuals to the bank will be increased. If the Government continues its present financial policy, the decrease in its debt to the bank will only be temporary; because, so as to cover its new deficits, it will turn once again to the bank notes of the National Bank. The improvement of our exchange cannot be arrived at by these means; it can only be done by increasing our export trade, by a wise fiscal policy, by reduced expenditure on the part of the Government, and, above all, by a well-balanced budget.

### Capital and the New Taxation.

"When one talks of taxing capital, and one sees what happens in other countries, one must not forget Bulgaria's economic position—an industry which is only beginning to develop, and a very limited amount of capital. Taxation on capital in a country thus situated is much more dangerous, and has quite other effects than in countries where there is a sound economic position, helped by large capital resources and developed production. Take Great Britain, for instance; you will find there luxurious houses, great estates kept solely for sport, huge sums spent unproductively. Taxation on such capital need not have serious results on economic life.

"Where is our Bulgarian capital, and what is it? If we look for wealth in our country, we find it in the land, from which is derived our greatest production; in cattle and other animals; in banks, joint stock companies, and small industrial undertakings.

"There is no capital expended in luxury. If the Minister of Finance himself undertakes to value the amount of taxable wealth, he will state that of to-day's national wealth of 70 milliard levas, 60 milliards belong to the peasants by reason of the land, cattle and buildings which they hold, and the other ten are in bank notes and industrial concerns. From this it follows that we are only taxing productive capital, and we must not imagine that all this can come to pass without serious disturbances which will shake the roots of our industrial system. Take the case of an agricultural estate of 300 decares which has on it four oxen and fifty sheep, with five decares of vineyards and 100 decares of wood. Such an estate will be valued at 500,000

Digitized by Google

levas. According to the law, an estate worth 500,000 levas will pay 22,000 levas; in other words, every year for five years the owner must pay 4,400 levas independent of all other taxation. Take the case of an industrial undertaking with a nominal capital of two million levas, according to the ordinary relation between the working and the invested capital; three-quarters of that capital will consist of buildings and fittings, and the other quarter will be working capital. One and a-half millions invested before the war in buildings and fittings are now equal to 15 million levas. If the valuer is generous, he may assess the property at 10 millions. Ten millions plus half a million working capital plus reserves of, say, half a million, will pay a tax of 4½ millions. This is 900,000 levas annually for five years This is what a company with a working capital of 500,000 levas will pay.

"Without going into further details, I state that unproductive capital will escape and productive capital will be destroyed. Even if the law were to be extended so as to cover bank notes, these would largely escape taxation unless the Minister of Finance puts into force a special law to compel the changing and stamping of bank notes, and also arranges to have them taxed on the same date on which the law for the taxation on other property comes into force.

### Foreign Capital.

"It is true that taxation on foreign capital is provided for in the law, but it must be remembered that foreigners have certain rights and privileges, and they will find lawful means of escaping from being taxed. One of the most ordinary methods that is employed will serve as an example. A trading company is organised abroad, probably in a country where taxation is low, let us say in Turkey or in Egypt. The head office of the company is established abroad, and only a branch is created in Bulgaria. This branch only shows a capital of some 100,000 levas, and is thus not able to realise any large profits. The matter is so arranged that goods are sold to the head office at low prices, and it is there that the profits are made. When the Bulgarian fiscal authorities examine the books of the company—which is doing a trade of some 100 million levas in Bulgaria—they find everything in order, backed by formal statements, but there is no capital to tax. This is a gross injustice to Bulgarian companies, who have their head office in Bulgaria, for they have to pay a tax extending up to 40 per cent. on their active capital. The foreigner escapes, and great harm is done to Bulgarian trade, production, and economic independence. Later on Bulgarians will undoubtedly move the head offices of their companies to a foreign country, and will only maintain branches at Sofia. It is a fact that many millions of levas are being gained in Bulgaria by foreigners in matters appertaining to land, and not a single centime is being realised in taxes. There is no means of taxing the foreigners who do these deals. I only see stated in the law that foreign capitalists are taxed according to the capital with which they work in Bulgaria. Empty words. These companies will not tell you that they really have ten millions capital; they will indicate to you 100,000 levas and all other sums will be shown as the credit accounts of XYZ. Capital will be driven out of the country, and the leva will fall instead of rising.

### Confiscation?

"Although a tax may in the future be unavoidable, it seems that the proposed tax is more an effort at confiscation, like other taxes recently introduced. Should this law succeed in improving the value of our leva, the second year's tax as paid by the taxpayer will not be paid in the leva under which the valuation of his land was made, but in a leva of greater value. If in the third year the leva has increased to twice its present value, the value of the property as measured in levas will have fallen so that a tax assessment on a property valued in depreciated levas will have to be paid in levas worth twice the value. A tax of 50 per cent. may thus easily become one of 100 per cent. If, on the contrary, the leva remains at its present rate, which is equal to six Swiss centimes, is it worth while to create this great disturbance in our economic laws?

"Do not imagine that this law will only affect industries and industrial people. Take the case of a peasant who owns 300 decares. I stated before that he will pay a tax of 4,400 levas a year. This is not a great sum as long as he is able to sell his maize at 1.60 to 1.70 levas a kilo, but, if the leva rises, the price of maize may be only .80 of a leva. His tax would thus be doubled. If the leva were to become equal to 30 centimes gold, he will have to give five times the original amount of maize in order to pay his tax.

"Another question is whether our fiscal administration can work this new and complicated taxation. The 1919 taxes are not yet all collected; the 1920 taxes not begun to be collected, the taxes on war profits are only now being collected, and it would seem that there is a very fair chance of the whole system collapsing."

## TENDERS INVITED.

*[Particulars of tenders marked (D.O.T.) are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.1.]*

**Tenders are invited for the following contracts, and must be made by the dates mentioned:—**

### Egypt.

Clothing, etc.—The Ministry of the Interior, Egypt (Lunacy Division) invites tenders for the supply of clothing and household requisites to the Abbasiya and Khanka Asylums. Tenders, on the proper form and accompanied by a provisional deposit of 2 per cent., are to be submitted to the Lunacy Division, Abbasiya. July 11 (D.O.T.).

Boots and Gymnastic Shoes.—The Egyptian War Department invites tenders for the supply of boots (infantry and cavalry) and canvas gymnastic shoes. Tenders and specifications may be obtained from the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, Westminster, S.W.1, and samples may be seen at the same address. July 15.

Calcium Carbide.—The Egyptian Postal Administration at Alexandria invites tenders for the supply of 15,000 kilogrammes of calcium carbide for acetylene gas light plants. Quotations should comprise free storage at the sole risk of the contractor and free delivery (by periodical partial supplies during the year) at 62 railways or river stations specified. July 15 (D.O.T.).

Beans, etc.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of 150 kilos beans, 150 kilos barley, and 4,000 kilos tibn, required for four months commencing August, 1921. July 16.

### Yugoslavia.

Oil, etc.—The Ministry of War and Marine, Belgrade, invites tenders for the supply of:—400,000 kgs. of benzine, 40,000 kgs. of thick oil for motors, 4,000 kgs. of thick oil, and 5,000 kgs. of petrol. Tenders must be submitted to the "Direction de l'Artillerie," bearing a 10 din. stamp, accompanied by a sample, the chemical analysis of which is to be effected in a State laboratory, and the result is to be attached to the tender. The envelope must bear the inscription "Offres de Benzine." July 20.

Paper.—The Direction des Chemins de Fer de l'Etat, Subotica, invites tenders for the supply of ordinary paper for rough use as follows:—10,000 kgs. 42 by 68 cms.; 10,000 kgs. 50 by 90 cms.; 10,000 kgs. 47 by 60 cms.; 2,000 kgs. 63 by 95 cms.; 3,000 kgs. 60 by 90 cms.; 5,000 kgs. 63 by 35 cms. Tenders must be addressed to the "Direction des Chemins de Fer de l'Etat" at Subotica, together with samples and prices. They should be sealed, and the envelope should be marked "Offre pour l'adjudication de papier, KN 11228/21." July 20.

Turntables.—The Direction des Chemins de Fer de l'Etat, Subotica, invites tenders for the supply of turntables for locomotives, ordinary gauge. They should bear a 10 din. stamp, and be marked "Offres de disques tournants, K.D. 12550/21." All Serbian subjects should make a deposit of 10 per cent. of the value offered, and foreigners 20 per cent. of the value. July 21.

### India.

Springs, etc.—The India Office invites tenders for the supply of laminated springs, steel screw spikes, steel fishbolts, and dog spikes. (Spec., Director-General of Stores, Whitehall.) July 12.

Steel Bearing Plates, etc.—Tenders are invited by the Bombay, Baroda, and Central India Railway Co. for the supply of: (1) steel bearing plates; (2) spring steel; (3) wood screws, nails, split pins, etc. Specification £1 for 1 and 2, and 10s. each for No. 3. Secretary, The White Mansion, 91, Petty France, S.W.1. July 15.

Steel Underframes, etc.—H.E.H. the Nizam's Guaranteed State Railways Co., Ltd., invites tenders for the supply of: (1) 11 steel underframes for bogie carriages (metre gauge); (2) 44 pairs of wheels and axles for the above. (Specifications 10s. each.) Secretary, Winchester House, 50, Old Broad Street, E.C.4. July 15.

### Bulgaria.

Telegraph and Telephone Material.—The Bulgarian Department of Posts, Telegraphs, and Telephones invites tenders for the supply and delivery of various tools, instruments, and materials for the current financial year. It is desirable that United Kingdom firms competing for Bulgarian State contracts should do so through agents resident in the country. July 11 (D.O.T.).

Cotton Waste and Machine Oil.—The Bulgarian State Railways, Sofia, invites tenders for the supply and delivery of: 100,000 kgs. coloured cotton waste, 2,000 kgs. white cotton waste, 100,000 kgs. cotton pieces, 600 tons machine oil, 300 tons wagon oil, 300 tons cylinder oil (ordinary), 20 tons cylinder oil (special), 200 tons impure petrol. July 15 (D.O.T.).

Railway Wagons.—The Bulgarian State Railways are inviting tenders for the construction and supply of 200 covered goods wagons and 200 coal wagons (to be ready for delivery by January 15, 1922); 400 covered goods wagons and 200 mineral wagons (to be ready for delivery by March 31, 1922). Tenders should be addressed to the Department of Finance, Sofia. August 1 (D.O.T.).

# BRITISH CONSULAR REPORTS.

## II.—GREECE.

Below will be found some extracts from the report of Mr. E. C. D. Rawlins, Commercial Secretary to H.M. Legation, Athens, on the industrial and economic situation in Greece in 1920:—

It must be frankly stated that commercial conditions in general in Greece during the year 1920 have been far from satisfactory, and the situation is at present both unstable and unsettled. The reasons for this are not far to seek and can be summed up as follows:—(1) The peculiar economic situation arising from recent political events, and (2) the depreciation of Greek exchange, which, again, has been still more adversely affected by (3) the temporary withdrawal of Allied economic support.

Merchants are ordering as little as possible from abroad and only buying from hand to mouth. Their point of view is intelligible, as the extreme depreciation of the drachma is, rightly or wrongly, regarded by Greek merchants in general as being exaggerated, and an improvement is hoped for when the political situation is finally cleared up. Should this take place in the near future, there is no doubt that the exchange will immediately improve, when merchants ordering goods at the present time would find themselves at a disadvantage, whereas their competitors, ordering later, would benefit by the exchange. In the meantime, the market is gradually becoming depleted of stocks, and when the exchange again becomes more or less stable there should be a renewed demand for British goods.

### State of Trade.

At the present moment it is possible to purchase many lines of goods, notably textiles, on the Piræus and Athens markets at prices lower, taking the exchange into consideration, than those actually ruling in the United Kingdom. Another factor affecting the situation is the over-supply of goods in the Greek markets resulting from the recklessness with which the Greek importers ordered goods in 1919, when the exchange was at or below par. These goods were ordered shortly after the Armistice, largely with a view to their re-exportation to Turkey, Southern Russia, Roumania, etc. But events have proved that their disposal in this manner has not been possible, and they have consequently remained on the Greek market. Taking the textile or "soft goods" trade as an example, it is calculated that there are at present sufficient stocks on hand, in several lines, to serve the requirements of the market for at least another six months, so that merchants will only be in a position to pass new orders about July of this year (1921).

During the latter part of 1920 and throughout the succeeding months British firms have been meeting with considerable difficulties through the failure of their Greek customers to take up the documents for goods ordered by them. This is, as has been pointed out above, chiefly brought about by the exchange situation. Amongst the goods thus left on the shippers' hands in the Customs here are cotton textiles, woollens, yarns, chemicals, drugs, gas engines, coal tar products, and numerous other commodities. On the other hand it must be admitted that there have been several instances of the non-fulfilment of their contracts as regards time of delivery by British manufacturers, and goods have been delivered three to nine months after the date specified. There are very large stocks of leather held on this market, and it is calculated that the stocks of upper and sole leather are sufficient to meet the needs of the next five or six months.

The Customs depots at Piræus continue to be very congested. This is due partly to the depreciation in the Greek exchange, and the consequent failure of consignees to take up the documents for goods delivered, as explained above, whereby these goods are allowed to accumulate in the Customs warehouses. The warehouse accommodation is still very scanty, in spite of various new depots having been built around Piræus quays. Further, the state of repair of the roofs and flooring of most of the warehouses is not good, and consequently goods which are left unclaimed in these stores for any length of time, if of a perishable nature, suffer considerable damage. Very large quantities of merchandise are stored in the Piræus in open compounds around the quays, where they are exposed to the weather. These are, as far as possible, goods of a non-perishable nature, but such commodities as news-printing paper, metal goods, machinery, etc., will naturally deteriorate if left for long under such conditions. The value of the goods lying in the Piræus Customs, of which the consignees are delaying the delivery, hoping for an improvement in the exchange, is variously estimated at from one to one and a half million sterling.

An improvement in this state of affairs, unfortunately, cannot be looked for until the economic conditions of the country improve; and the Greek Government, pending the realisation of their projects for the improvement of Piræus harbour, do not appear disposed to entertain the heavy expense which would be entailed by adequately repairing the Customs stores at the Piræus. Owing to the lack of hoisting or manipulating apparatus in these stores, only the ground space practically is used in the various depots, and thus very inadequate use is made of the capacity of the buildings, there being no facilities for stacking and storing the merchandise.

### Foreign Competition.

The circumstances above referred to, while reacting unfavourably on British trade, have to a large extent given German and Austrian goods the needed opportunity of recovering their former influence in the Greek market. Very considerable quantities of German goods are now in Greece, and continue to arrive by every steamer. In view of the low quotation of the German mark, German manufacturers are in a position to supply their products to Greece at prices ranging from 40 per cent. to 60 per cent. cheaper than British manufacturers. The principal products arriving are chemicals and drugs, which are re-establishing their former position in the market: Engines (Diesel, semi-Diesel, gas and oil), motor cars, the Mercedes and Benz cars being daily met in the streets, small machines, ice-making machines, pumps, tools, hardware, paper, pianos, leather goods, etc. Austria is sending a good deal of furniture and fancy goods.

### Public Works.

Piræus.—Nothing has, as yet, been definitely decided as to the contract for the Piræus Harbour Works. The three British firms tendering have long since submitted their plans to the Greek Government, which have been examined and reported on by the Technical Committee; these papers are now before the Council of Ministers for decision and the definite appointment of a contractor, but, owing to recent political events, the matter is still held up.

Patras.—No public works have been undertaken in Patras and district during the year 1920. Before the war Patras was lighted by gas, and a tramway service, with electric power linked up the town. Both these concerns belong to the Société Thomson-Houston of Athens. They were discontinued during the war and have not since been resumed, and negotiations between the company and the municipal council for a resumption have failed up to the present. Electric lighting for the town is supplied by a private concern. The light is poor and costly and the installation crude.

A company was formed in 1919 to utilise the water power of the River Glaucus, which falls into the plain of Patras at a distance of some five miles from the town. Surveys held have estimated that sufficient power could be derived for the whole of the electric supply of the town, i.e., lighting, power to the various works, and for the running of the tramways. The proposals of the company are being considered by Government.

A British concern, "The Neuchatel Asphalt Company, Limited," of London, has obtained a contract for road-making in the provinces of Arcadia and Acarnania-Ætolia. Work has commenced during the year under British engineers. A scheme for the improvement of the Patras Harbour is awaiting Government sanction. This scheme includes the continuation of the breakwaters, the possible transference of the lighthouse from the pier-end on to the outer breakwater, and the question of the building of quays and sheds is also considered.

The N.E. harbour breakwater not being long enough, the silting up of the harbour on that side is continual. A bucket dredger has been employed for five months during last summer in deepening the harbour to a uniform depth of twenty-four feet. Small repairs to pier sides have been effected. The harbour commission is said to dispose of funds, but is unable to incur any expenditure without the sanction of the Government. In the event of harbour improvements, including up-to-date wharfage and cranage, being undertaken, it is anticipated that the Sea Labourers' Unions will offer serious opposition to such a scheme, which would permit of cargoes and passengers being landed or loaded without the use of lighters and boats.

Canea.—A plan for similar port works for Canea exists, but the execution can hardly be expected for some time. The obvious solution for Canea of the harbour question would be the construction of cheap works in Suda Bay with a steam tram to connect them with Canea, but hitherto many and varied causes have prevented the changing of the commercial centre of the town.

Canea Water Supply.—There has been some experimental boring in the neighbourhood. Experts from the Ministry of Agriculture are also experimenting, and the scheme is to be studied in conjunction with that for electric lighting.

## THE WORLD'S COTTON CONFERENCE.

Now that the second World's Cotton Conference has come and gone it is possible to sum up the results and to estimate the value of such a gathering. The first, at New Orleans two years ago, was to a certain extent an experiment. Coming so soon after the war, it achieved a surprising success in the very large number of foreign delegates who found it possible, amid all the troubles of the post-war period, to make the long journey to New Orleans; and it served a useful purpose in bringing so many spinners and manufacturers into direct contact with the largest assembly of American cotton growers that has perhaps ever been seen. In that respect, the second Congress, recently held at Liverpool and Manchester, was notably different; for the attendance of cotton growers from America was unfortunately a great deal smaller than had been hoped for. It was not surprising that under the present conditions in the cotton belt many of them should find it impossible to make the trip; but it was particularly regrettable that Mr. J. S. Wannamaker, the president of the American Cotton Association, who is pre-eminently the protagonist of the growers' interests, should have been unable to come, as he had intended. The result was that the growers' interest was not so fully represented as it should have been, and one could hardly help feeling that this was in some sense typical of the conference. There was really not much interest shown in the question of cotton growing, the general feeling apparently being that, whatever happened to this year's crops, there was plenty of cotton in sight to meet any requirements likely to arise under present conditions. It has always been difficult to get the cotton market to look further ahead than the immediate season's supply, and under present conditions it is not surprising that this tendency should be intensified. With the coming cotton crops likely to be reduced to something not much more than half the pre-war normal, which in itself was regarded as insufficient for the growing needs of the trade, it seems inevitable that there must be a shortage again some day, but the present state of demand, which seemed to touch its very lowest during the period of the conference, certainly does not encourage one to risk a prophecy as to when these conditions will change.

The conference itself, however, made considerable contributions towards the discussion of the problem of future demand, especially the papers which dealt with questions of finance and credit. These papers were excellent, and if some of them aroused comparatively little discussion, it was more because the audience felt themselves beyond their depth in the technical details of the problem than from any lack of interest in the question. The tone of the writers of the papers was, on the whole, more hopeful than might have been expected, and the result of the discussions was fairly reassuring.

Among the other subjects dealt with were many which have been discussed at every conference of the kind since the first meeting of the International Cotton Federation in Atlanta in 1907. The "old old story" of the unsatisfactory baling of the American crop was again told to an audience that could not deny the impeachment, nor, unfortunately, could it offer any hope that the much-needed reforms were substantially nearer than they had been when they were first mooted. It is poor encouragement to those who have made this subject their own for so many years; but there is nothing for it but to keep on pegging at it, in season and out of season, until something is done. The organisation of the American cotton growing industry is too huge and too much complicated by custom and vested interests to be easily changed; and if it was impossible even with cotton at the high prices of last season, to convince them of the folly of wasting so much cotton, it is not likely to be more successful to-day with cotton gone back to something like its old levels. The root of the trouble is the lack of a thorough interest in the trade, as the result of which the man who would have to make the outlay and take the trouble of making a change, would not be likely to reap the benefit. So long as that state of affairs continues, reform will be almost impossible. Another subject which at these conferences is invariably listened to with sympathy and received with approval, is that of the development of cotton growing within the British Empire. In an audience partly composed of the existing cotton growers of the world it was rather pathetic that we should have to reassure them, even now when the movement is at last to receive adequate support from the Government and the trade, that they need not fear the competition of Empire-grown cotton for many years to come.

Some useful suggestions, the adoption of which seems to present no great difficulty, were made in a paper on "Yarn and Cloth Contracts." A number of other excellent papers were unfortunately missed owing to the absence of the writers, but on the whole the conference covered a great deal of ground in a very useful way. If a word of criticism of the arrangements may be allowed it is that there was so much to do and the meetings were so efficiently handled that there was very little time for discussion. The number of papers got through *with discussion* in an average of half-an-hour each, was really staggering.

With regard to the future of the conference, nothing definite was settled, it being left to the officials and a small committee to make such arrangements for the future as may seem desirable. The question of the relations of the conference to the International Cotton Federation will inevitably have to be settled. Two international organisations dealing with one trade are unthinkable.

To assess the value of such conferences is very difficult, and in doing so, one has to remember not only the public work of the conference, but also what is to many the most valuable part of its work in the gathering together for a fortnight of representatives of twenty nations and of every section of a great world's industry. The social arrangements cannot be too highly praised. Liverpool and Manchester vied with each other in showing the greatest possible kindness to their guests, who were without exception most appreciative of the hospitality they received. It would be safe to say that what pleased many of the foreign delegates most was the extreme kindness and intimacy of the hospitality dispensed, not merely officially, but personally and privately by the Lancashire people in their own homes. The friendly understanding which comes from mutual knowledge acquired under these conditions is of more value than many congresses.

## BRITISH-ARMENIAN CHAMBER OF COMMERCE.

The annual meeting of the British-Armenian Chamber of Commerce was held at the offices of the London Chamber of Commerce on June 29. Previously a luncheon was held at the Cannon Street Hotel, presided over by the chairman, Mr. E. A. Brayley Hodgetts, the company including Sir J. Roper Parkington, General Bakratuni, Mr. E. R. Bartley Denniss, M.P., Mr. J. A. Malcolm, and Professor G. Thoumaian.

# NEAR EAST MARKETS.

## LONDON PRODUCE REPORT.

Dried Fruit.—Business has improved during the week. Currants have been in rather better request, and in some cases rates have been advanced. Prices of sultanas have again risen, and there seems every likelihood that a very high level will be reached.

Sugar.—Home refined has been in steady request at unchanged rates. West Indian crystallised is 2s. down at 44s. to 49s. 6d., and American granulated at 55s. has shed 1s. Czecho-Slovakian at 27s. is 1s. down. Quotations are: July, 16s.; August, 16s.; September, 16s.; October, 15s. 3d.; November, 15s.; December, 15s.

Coffee.—Futures market has been steady, with July quoted at 40s.; September, 40s. 6d.; December, 41s.; March, 42s.; and May, 43s.

Oilseeds.—Prices generally are firmer. Indian linseed has risen 6d. to 20s. 6d., and La Plata a like amount at 19s. 3d. Rapeseed is unaltered in each case, Toria remaining at 21s. 5d.; bold Ferozepore, 20s. 3d.; and brown Cawnpore, 19s. 9d. Cottonseed has risen, with Egyptian black 9d. up at 11s. 9d., while Bombay is quoted at 10s. 6d.

Oils.—Prices have been variable. Linseed oil has risen 13d. to 35s. 6d. Crude rape oil at 52s. is unchanged, while refined at 60s. has lost 2s. Cotton oil is higher, with refined at 46s., Egyptian crude at 38s. 6d. and deodorised at 53s., increases of 2s., 1s. 3d., and 3s. respectively. Turpentine is 1s. down at 80s.

## CROPS DAMAGED BY STORMS.

(From Our Own Correspondent.)

Belgrade, June 28.

After a prolonged and unprecedented drought, which has dried up wells and in many places has wilted the crops, the recent storms have done tremendous damage. Snow has fallen on many of the higher mountains, such as Velebit near Fiume, Kopaonik in the south and in parts of Bosnia. In other districts floods have done many millions worth of damage, and whole villages in northern Bosnia have been practically destroyed. A credit of 56 million dinars has been voted for the sufferers. In the neighbourhood of Belgrade the crops are so dried up that the rain has come too late to do much good, though satisfactory reports come from the interior of Serbia. In the rich and fertile plains of the Banat the drought has done great damage, and things are not much better in Srem. More reassuring accounts come from the Baranya and from Croatia.

The traffic receipts of the Smyrna-Aidin Railway for the week ended June 25 amounted to £19,516.

The Banque Française des Pays d'Orient, Paris, has opened an agency at Stamboul.

Under Article 127 of the Treaty of Neuilly, the delivery of sheep by Bulgaria to Greece was completed on June 28 near Nevrokop.

## SUDAN NOTES.

(From Our Own Correspondent.)

Khartoum, June 9.

**General News.**

Blue Nile Province.—The price of dhurra has fallen to 221 milliemes per ardeb at Wad Medani, 5,452 ardebs being marketed at Wad Medani and 17,900 at Hassaheissa during the month of April. Very high temperatures have been experienced throughout the province.

Berber Province.—Reports to hand state that what is probably the largest wheat crop on record for this province has been successfully harvested. The yields per feddan have been phenomenal, averaging nearly three large ardebs (of 420 rottles) for wheat and seven ardebs for maize. The Supplies Department of the Egyptian Army are in the market as buyers of wheat, but the crop is sufficiently large to warrant the public at large being admitted as purchasers. As a result of the bountiful crops, prices of grain and live stock have fallen steadily.

Kordofan Province.—During May there was very little activity in the local grain and cattle markets. The monthly returns for the El Obeid market show a very small movement, the largest demand being for groundnuts, of which a total of 683 ardebs of 210 rottles were disposed of. Average prices were as follows:—Sesame seed, 783 milliemes per ardeb of 330 rottles; dukn, 570 milliemes per ardeb of 420 rottles; dhurra, 542 milliemes per ardeb of 420 rottles; groundnuts, 760 milliemes per ardeb of 210 rottles.

Cattle and sheep exported by rail from El Obeid during the period January 1 to May 31 show a great decrease in numbers as compared with the similar period in 1920 and 1919.

The total sales of gum in the El Obeid market amounted to 15,095 kantars during May, 1921, as compared with 11,589 kantars during the same month last year. The average price was 647 milliemes per kantar.

Rainfalls are reported of 20 mm. at Um Dam, 11 mm. at Um Ruaba, and 9 mm. at El Obeid. Cultivation has not yet started.

Berber Province.—The Government pumping plants are reported to have closed down for the season. It is anticipated that comparatively little seifi will be cultivated this year, when they re-open.

As a result of various experiments at the Government farm at Kitiab, the best type of wheat has been found to be "Bunyih," yielding over four ardebs per feddan in a period of 100 days.

The price of grain declined steadily during May, wheat falling from £T300 to £T255 per ardeb of 420 rottles, and sakia and red dhurra falling from £T150 to £T142.5 per ardeb of 380 rottles. Barley, however, remains firm at £T90 per 315 rottles and maize and dhurra feterita fairly steady at £T120 per 380 rottles.

There has been some activity in the camel market. Eighty Rashaida camels have been exported to Egypt, whilst the Egyptian Government are reported to be purchasing a further 200 for coastguard services. The cattle market has been dull, only 765 sheep and goats and 109 head of cattle having been sold at El Damer during May. Prices averaged £T120 and £T720 per head for sheep and cattle respectively.

Halfa Province.—Trade in general throughout the province has been continuously bad, merchants everywhere being very despondent. There has been a shortage of coin, and the old system of barter is in full swing for necessities of life in certain districts. Most of the date crop has been realised at prices varying from £T380 to £T405 per sack of 140 kilos. Unsold stocks are estimated at 1,400 sacks.

Cultivation is dull. Some 1,900 feddans have been put under wheat and 725 feddans under barley. The cattle trade is in a most depressed state, 19 goats and 661 sheep having been exported this year, as against 2,405 head of cattle, 9,336 sheep, and 24 goats in May, 1920.

The highest and lowest temperatures experienced during the month were recorded on May 31, the maximum being 116.2 Fahr. and the minimum 57.6 Fahr.

Red Sea Province.—The cattle trade is at a standstill, only six head of cattle and forty sheep being exported from the province during May.

## SUDAN COTTON.

The Tokar-Trinkitat Light Railway finally reached Tokar Cotton Market on May 2, two fully loaded trains pulling out for Trinkitat on the following day. The total crop this season is estimated at 200,000 kantars, but it is very doubtful whether it will be possible to pick this amount if the haboubs (sandstorms) are as prevalent this year as they were in 1920. During May the cotton marketed reached a total of 90,085 kantars, made up of 59,739 kantars 1st class, 29,314 kantars 2nd class, and 1,032 kantars of No. 3. Prices ranged from PT97½ to PT85 for No. 1, PT71 to PT70 for No. 2, and PT50 to PT50½ for No. 3.

*General Produce.*—Bacon, 110s. cwt.; butter, 168s. cwt.; cheese, 120s. cwt.; chillies, 130s. cwt.; eggs, 20s. per 120; cloves (Zanzibar), 9d. lb.; cocoa (Ceylon, good to fine), 77s. 6d. cwt.; coffee (Costa Rica), 122s. cwt.; coffee (East India, bold), 118s. cwt.; coffee (Mocha, longberry), 95s. 6d. cwt.; coffee (Santos, superior), 56s. 3d. cwt.; coffee (Nairobi), 100s. cwt.; lard, 77s. 6d. cwt.; hams, 165s. cwt.; ginger (washed Cochin), 37s. 6d. cwt.; nutmegs (110's to 80's), 10d. lb.; pepper (Singapore, black), 4d. lb.; pepper (Muntok, white), 9d. lb.; raisins (Valencia), 95s. cwt.; raisins (Sultana, Smyrna), 146s. cwt.; currants, 71s. cwt.; sugar (granulated), 56s. 7½d. cwt.; sugar (No. 1 cubes), 62s. 9d. cwt.; sugar (white Mauritius), 52s. 6d. cwt.; sugar (West Indian crystallized), 46s. 9d. cwt.; tapioca (fair Singapore), 2d. lb.; sago (small pearl), 25s. 6d. cwt.; sago flour, 15s. 9d. cwt.; rice (Rangoon, No. 2), 17s. cwt.; rice (bran, Rangoon), £6 15s. ton; cinnamon (firsts), 1s. 3d. lb.; mace (fair Singapore), 1s. 1½d. lb.; tea (Indian, common to good common), 6½d. lb.; tea (Ceylon, common to good common), 8½d. lb.; tea (Java, common to good common), 3½d. lb.; wheat (Australian), 81s. 6d. qr.; wheat (English, white), 97s. 6d. qr.; wheat (La Plata), 85s. 6d. qr.; barley (malting), 67s. 6d. qr.; oats (English), 49s. qr.; oats (La Plata), 30s. qr.; maize (La Plata), 46s. qr.; flour, 71s. sack.

*Metals.*—Aluminium, £150 ton; antimony (English regulus), £39 10s. ton; bismuth, 7s. 6d. lb.; copper (standard), £71 ton; copper (electro), £76 10s. ton; gold bars, 110s. oz.; iron (No. 3 Cleveland), 132s. 6d ton; hematite (mixed number), 160s. ton; galvanized sheets (24 G), £23 15s. ton; lead (soft foreign), £22 2s. 6d. ton; manganese Poti, 1s. 2¾d. unit; molybdenite, 48s. 9d. unit; nickel, £178 10s. ton; platinum, 365s. oz.; plumbago, £18 10s ton; quicksilver, £10 17s. 6d. ton; silver bars, 35d. oz.; spelter (G.O.B.), £26 12s. ton; tin (standard), £164 17s. 6d. ton; wolfram, 12s. 4½d. unit; zinc sheets, £35 10s. ton; tin plates (20 by 14), 25s. 6d. box.

*Chemicals.*—Acids: Boric, 71s. cwt.; oxalic, 9¾d. lb.; citric, 2s. 5½d.; tartaric, 1s. 7½d. lb.; ammonia (sulphate), £17 5s. ton; arsenic (white powdered), £45 10s. ton; benzole (standard), 2s. 5½d. gallon; bleaching powder (35 per cent.), £19 ton; borax crystals, 34s. 6d. cwt.; cream of tartar, 139s. Potassium: Bi-chromate, 9¾d. lb.; chlorate, 5d. lb.; caustic, £37 10s. ton; nitrate, £53 10s. ton; permanganate, 1s. 7½d. lb.; prussiate yellow, 1s. 3d. lb.; sulphate (90 per cent), £21 ton; Sodium: Crystals, 145s. ton; bi-carbonate, £105s. ton; bi-chromate, 6d. lb.; alkali (58 per cent.), £8 15s. ton; chlorate, 4½d. lb.; caustic (70 per cent.), £22 ton; hyposulphite, £20 10s. ton; prussiate, 7½d. lb.; nitrate, £18 10s. ton; glycerine (industrial 1260 per cent.), £127 10s. ton; sulphate of copper, £31 ton; sulphate of iron, 150s. ton; lemon oil, 3s. 1½d. lb.; quinine, 4s. 0½d. oz.; red lead, £37 10s. ton; white dry lead, £42 5s. ton; white ground lead, £50 10s. ton.

*Hides and Skins.*—Ox and heifer (first), 90 lb. and up 8d. lb.; 80 to 89 lb., 8¾d. lb.; 70 to 79 lb., 9d. lb.; 60 to 69 lb., 8d. lb.; 59 lb. and under, 6½d. lb.; (second), 90 lb. and up, 7½d. lb.; 80 to 89 lb., 7½d. lb.; 70 to 79 lb., 7½d. lb.; 60 to 69 lb., 7d. lb.; 59 lb. and under, 5½d. lb.; Cows (first), 60 lb. and under, 6½d. lb., 59 lb. and under, 6⅜d. lb.; (second), 60 lb. and up, 4½d. lb.; 59 lb. and under, 4⅜d. lb.; Bulls (first), 4½d. lb.; (second), 3d. lb.; Kips (first), 5d. lb.; (second), 4d. lb.; (third), 3d. lb.

Calcutta market. Prices in rupees per 20 lb.:—Arsenic hides (cows): Agras, 9 to 13.8; Durbhangas, 10 to 12.8; Patnas, 7.8 to 9. Salted cows, 3.8 to 7.8. Arsenic hides (buffalo), 3.8 to 8. Skins: Calf, 8 to 10 per 20 lb.; goat, 230 to 260 per 100 pieces.

*Miscellaneous.*—Cotton (American), 7.69d. lb.; cotton (Egyptian), £11 7s. 6d. ton; linseed (La Plata), £18 15s. ton; rape (Toria), £21 2s. 6d. ton; soya beans, £13 7s. 6d. ton; palm kernels, £19 3s. 9d. ton.; Oils: Linseed, £34 12s. 6d. ton; olive (Levant), £82 10s. ton; palm, £33 7s. 6d. ton; rape (crude), £53 10s. ton; soya, £36 10s. ton; petroleum, 1s. 10d. gallon; ground nut, £40 ton; cotton (crude), £36 15s. ton; coconut (Ceylon), £47 ton; Shellac (TN second orange), 360s. cwt.; shellac (AC garnet), 295s. cwt.; rosin (American), 20s. cwt.; turpentine, 80s. 6d. cwt.; Rubber: Plantation (No. 1 crêpe), 8d. lb.; smoked sheet, 7d. lb.; fine hard Para, 11d. lb.

---

The Banca Commerciale Italiana and Bulgara, of Sofia, have opened a branch at Varna.

Bank of British West Africa.—Final dividend to March 31 4 per cent., making 8 per cent. for the year, less income-tax.

Banque Yugoslav.—The capital of this bank is being increased from 25 to 50 million dinars.

New Egyptian Company.—Dividend of 20 per cent., free of tax, for year; £66,904 for service of debentures, amounts written off properties, and sundry reserves; £101,328 forward.

It is announced that a Franco-Belgian syndicate has offered a loan of 100,000,000f. (£2,000,000) to Bulgaria, subject to the approval of the Inter-Allied Commission, for the construction of new railway lines.

Oriental Carpet Manufacturers.—At the annual meeting of the Oriental Carpet Manufacturers to be held in Smyrna on July 27 a resolution will be submitted to authorise the directors to capitalise £200,000 of the undivided profit and to distribute 40,000 fully-paid shares with coupon No. 11 attached, in the proportion of one fully-paid share in respect of every five issued ordinary held.

# COTTON AND COTTON GOODS.

## MANCHESTER REPORT.

(From Our Own Correspondent.)

Manchester, Monday.

### An Improving Tone.

The tone of the market during the past week has been more healthy than for some time back, and it is possible to state that the amount of actual business done has been more than has been the case during the past six or nine months. Traders in practically every section of the market have regained confidence, and many buyers have been operating in the belief that prices in the near future will harden. Of course, we must not expect a speedy revival, but it is certainly evident that the market during the next few months will show signs of a steady increase in business. With regard to cloth, a fair number of transactions have taken place for Egypt, and here and there a sprinkling of orders have been received for the Levant and Constantinople, but, generally speaking, buyers have not been over active. At the same time, however, there is every indication of a period of activity being registered in the near future. Quotations for Egyptian yarns have been well held in price, and tend to stiffen, but spinners are not finding very much relief. Cloth demand for India has reached quite an extensive scale, and in one day of the week the amount done was more than has been the case during the past six or nine months. The principal buyer has been Calcutta. Shippers to China have not been altogether idle, and demand shows signs of improving. It is anticipated that buyers for that outlet will commence active operations before the autumn. Recent advices from that outlet show that stocks are gradually being liquidated. No steady buying has presented itself in connection with South America, and only isolated transactions have taken place.

### Changes in Raw Cotton Prices.

A review of the spot prices in Liverpool during the half-year ended June 30, 1921, for fully middling American and fully good fair Sakellaridis Egyptian cotton, which are the recognised standards, reveals some interesting facts. On January 3 the quotations were 9.99d. per lb., and 21.00d. per lb. for American and Egyptian respectively, and the period closed with the prices at 7.85d. and 15.50d. The highest rates were: American, 11.78d. on January 11, and Egyptian, 23.50d. on January 17, the lowest levels touched being 7.13d. for American on February 28 and 13.00d. for Egyptian from February 28 to March 4. For the 125 days on which the market was open the average is 8.60d. in the case of American and 17.33d. for Egyptian. The average prices for the previous six months ended December 31, 1920, were 20.31d. for American and 50.83d. for Egyptian, whilst similar figures for the first half of last year work out at an average of 28.97d. and 80.09d. respectively. In the first six months of the year 1914, just prior to the outbreak of the European war, the comparative averages were 7.47d. for American and 10.96d. for Egyptian.

## LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended June 30:—The settlement of the coal and cotton disputes have made the past week a memorable one indeed, and although we have not as yet seen any marked broadening in the inquiry, it is perhaps too much to expect in the first few days. The trade, in the face of adversity, has grown so accustomed to tightening its belt that it will doubtless take a little time before it can readjust itself to better conditions. Suffice it that there has been a slight improvement in the spot demand here, and we see no reason now why this improvement should not steadily continue. We have never anticipated any sudden uprush of prices—there is too much cottton available, and too many ready sellers for that. Manchester, all this week, has reported good business doing in cloth, and during the last day or two yarns have also been coming in for an encouraging amount of attention. This is all to the good, and provided it continues, it is only a question of time before the immediate results are reflected in our market here. C.i.f. business has shown some improvement, but the actual inquiry on the spot has continued to be on a very limited scale only. There is a disposition on the part of holders to meet the few buyers who make their appearance, and there is some very cheap cotton on offer at the moment. Total sales, 400 bales. Quotations are unchanged. Fully good fair sakel 15.50d.

---

Anglo-Egyptian Oil.—Production for week ended June 24:—Gemsah, 34 tons (previous week, 34 tons); Hurghada, 3,366 tons (against 3,140 tons).

The traffic receipts of the Suez Canal from June 25 to July 1 amounted to 2,050,000f., against 2,900,000f. for the corresponding period of last year.

# OIL NOTES AND NEWS.

## Burmah Oil Report.

The report of the Burmah Oil Company, Ltd., for 1920 states that the profit for the year, after charging income-tax, contributions to employees' provident fund, and writing off £1,153,752 for depreciation, is £3,737,723, to which is added £207,042 brought in, making £3,944,765. There has been transferred to insurance reserve £20,000, and to general reserve £195,000, leaving £3,729,765. Interim dividends absorbed £537,881, and the directors recommend a final dividend on ordinary shares, payable July 26, of 4s. per share, free of tax, 7 1-5d. on each 6 per cent. first preference share, equal to 6 per cent. per annum from June 30 to December 31, less tax, and 6s. per share, equal to 6 per cent. in cash, on second preference shares, less tax, leaving £2,142,183 to be carried forward, subject to E.P.D. and corporation tax estimated at £1,935,000.

The final dividend of 4s. per share now recommended makes, with the interim dividend, a total distribution on ordinary shares of 30 per cent., as compared with 50 per cent., for 1919, or equivalent to 54 per cent. on the capital on which the latter dividend was paid. Depreciation has been fully provided for, and the following amounts have been written off: Refineries account, £70,499; oil wells, etc., account, £972,924; pipelines account, £30,000; tankers and tank installations account, £80,328. As in 1919 the high average value of the rupee contributed considerably to the year's profits. The large increase in fields expenditure is due to extended drilling, testing, and exploratory work, to the largely increased staff necessary to carry out these extended operations, to enormously increased cost of pipe and all drilling materials, and an all-round general rise in wages and working costs.

## Hopeful Future.

The production and potentialities of the developed Burma fields continue to be such as to justify looking forward with confidence for many years to adequate supplies of crude petroleum. At Badarpur, in Assam, developments are progressing towards steady production. No strikes of oil have been made during the year in any of the outside areas in Burma or India at present under test, but operations continue both on these areas and on others of geological promise. One of the areas has shown evidence of important natural gas production, which is now being further tested in the direction of its utilisation as fuel in Yenangyoung field, in place of crude oil. The acquisition during the year of a controlling interest in the Assam Oil Company has still further strengthened the company's position in India, both as regards crude petroleum resources and market for petroleum products. The crude oil throughout at the refineries was maintained at practically the same level as last year. India continued to increase its consumption of petrol, and a large proportion of the company's production was marketed, their supplies being exported to Europe. The production of kerosene was absorbed by the Indian market under the arrangement referred to in last year's report, and there also lubricating and jute batching oils found a ready market.

There has been a material fall in world petroleum values during the past six months, but with the exception of paraffin wax and petrol the company never benefited to the full extent by the very high prices ruling during the past three to four years, and consequently is not so adversely affected by their decline. Against any reduction in profits due to increased fields expenditure, the fall in prices of products, and the now lower value of the rupee can now be set relief from taxation consequent on the abolition of excess profits duty as at the close of 1920. At extraordinary meetings held on June 1 and 16 resolutions were passed making certain alterations in the articles of association and increasing the capital to £10,000,000. The directors regret that resolutions consolidating the two classes of preference shares did not receive the requisite support. Three million 8 per cent. cumulative preference shares of £1 each have just been issued and were largely over-subscribed.

## Anglo-Egyptian Oilfields.

The report of the Anglo-Egyptian Oilfields for the year ended December 31 shows a considerable reduction in the quantity of crude oil produced and a decrease of £199,383 in the net profits. The reduced profits are to be attributed mainly to four factors —first, the fact that the year 1919-1920 marked the transition of the Hurghada field from "flush" to "settled" production; secondly, the increase in the cost of materials and working expenses generally; thirdly, the high market rates of freight; and fourthly, the low prices ruling in Egypt for Egyptian products compared with world market prices, owing to the strict control which the Egyptian Government felt it necessary to exercise over prices in view of the difficult economic and political situation in Egypt. The total production of crude oil amounted to 155,975 tons, as compared with 231,180 tons in 1919. The net profit, after making the usual provision for depreciation on property, including investments, amounts to £212,097, which, with £119,961 brought forward, makes a credit of £332,058. The directors recommend that £186,055 be applied to dividends, leaving £146,002 to be carried forward, out of which the payment of excess profits duty has to be provided. The proportion of the profits allotted to the "B" shares allows of a dividend equal to 10 per cent., less tax. To meet the transition of the Hurghada field to "settled" production the drilling programme was increased and the footage drilled was greater than in any preceding year. These efforts are now bearing fruit in a substantial increase of production, the average weekly production during the current year having been about 20 per cent. more than the average weekly production during 1920. The company has secured tonnage for 1921 at rates much below those ruling last year. The question of price control has been discussed with the Egyptian Government, whose attitude in the matter is not unfavourable. Besides work on the main Hurghada field, every effort is being made to prove new territory. Three exploratory wells are now in course of drilling on the outlying parts of the company's original territories. These tests, which were necessarily delayed by the war, are now in full operation. In addition, the company has taken out prospecting licences over a number of new territories under the standard regulations, and active work is proceeding on them. The meeting will be held at Winchester House, E.C., on July 15, at 3 p.m.

# MOTOR CARS IN THE BALKANS.

The market for motor-cars in the Near East is the subject of several recent American consular reports. We give some extracts below :—

Of all the Balkan countries, Roumania is the most developed in so far as the use of automobiles is concerned, but there is a fair market throughout the peninsula, which is expected to increase as exchange conditions become more normal. Throughout the Balkans the price probably decides the purchase of a motor vehicle, especially because of the difference in exchange. The average buyer desires a large car—the seven-passenger type. In Roumania, there has been a good demand for high-priced cars. The abnormal transportation system of the peninsula should aid in creating a good market for the motor-truck. However, the demand will likely be very small for a year or a year and a-half because of the sale of surplus Army trucks, the high price of gasoline, and bad roads. The best roads are found in Bulgaria and Greece. The sale of light delivery cars has not been exploited in any part of the peninsula. Three-ton trucks and even larger are the sizes that will probably find the readiest sale.

There is no automobile industry in Bulgaria, and comparatively few automobiles or trucks have been imported. The total number of automobiles in use in Bulgaria does not exceed 250, and there are only about fifty motor-trucks, or about one motor vehicle for every 14,000 inhabitants. It is believed that under present economic conditions not more than 200 cars per year could be sold in this market.

Price chiefly decides the sale of motor vehicles in Bulgaria, a condition that has become intensified by the present low exchange value of Bulgarian currency. While Bulgarians have no decided preference for the cars of any one country, the present low exchange rate of the Italian lira has given the Italians an advantage which they have been quick to seize. Accordingly, a large percentage of the cars recently imported have been of Italian make, principally those of the small five-passenger type. The five-passenger touring car would probably prove the best seller.

# COMPANY MEETINGS.

## EGYPTIAN HOTELS.

### Satisfactory Financial Position.

The twenty-fourth annual general meeting of the Egyptian Hotels, Ltd., was held on June 30 at the registered offices of the company, 11, Ironmonger Lane, E.C., the Right Hon. Lord Claud Hamilton, P.C. (the chairman), presiding. The notice convening the meeting and the report of the auditors having been read,

The Chairman said: I conclude that you will take the directors' report and balance-sheet as read. The profit on the year's operations is of a satisfactory character, being only slightly less than the profit for the preceding year, which was a record year. The balance-sheet does not present any features substantially different from that of last year, except that our financial position has greatly improved. We have invested in Egyptian Government securities close on £30,000, and we have cash at bankers and in hand approaching £100,000. We have also built up the reserve, which, with the transfer now proposed, will reach £30,000, which amount our board in Egypt consider sufficient.

Perhaps I should refer to our investment in the Semiramis Hotel. This hotel was re-opened to visitors in December last, having been used during the war for various Government purposes. The operating results for the few months which have elapsed since its re-opening encourage our board in Egypt to hope for fair results in the future. The profits appearing in our accounts contain no credit in respect of the operations at the hotel in question. You will observe that it is stated in the balance-sheet that our interest in the Semiramis Hotel is not realisable at present, and that its ultimate value cannot be ascertained. The directors in Egypt do not contemplate parting with this investment, as the hotel is patronised by the élite of travellers to Egypt, who prefer a quiet hotel far from the traffic and noise of the town. It may well be that the profits of the Semiramis Hotel will be sufficient compensation for our investment, but, whether that be so or not, our directors in Egypt consider that it is an asset of our general undertaking which should remain under the control of the company.

The liabilities of the company are practically nil, and all our debentures are paid off. The contingent liability referred to in the balance-sheet is in connection with the Semiramis Hotel. You will no doubt consider that the balance-sheet is a very satisfactory one—the opinion which our directors in Egypt hold, and which we on this side share.

The shareholders are greatly indebted to Mr. Baehler for his able management and to the directors in Egypt for the results attained. It is, however, necessary that reference should be made to a factor which has influenced the year under review, and which is not yet entirely removed, and that is the political situation in Egypt. I do not dwell upon it, as I feel sure that the authorities in Egypt will adequately deal with the unfortunate circumstances which have from time to time occurred, and which are no doubt, to a considerable extent, attributable to war conditions and the aftermath of war. The country has also, like many other countries, passed through, or is passing through, a financial crisis, which our board in Egypt considers a temporary feature, and probably less acute than in some other countries.

The past season is the first since the outbreak of war in which we have had a "tourist season," an element very welcome as indicating a return to normal conditions. The cost of the upkeep of the property has exceeded the expenditure in recent years, consequent on the company overtaking repairs and renewals much needed, and which were compelled to remain in abeyance during the war. The board in Egypt, acting upon the recommendation of the managing director, have decided upon some expenditure for building alterations, including a card room, new bathrooms and lavatory accommodation, and an extension of the grill room, all of which is estimated by the board in Egypt to run to an expenditure of £6,000 to £7,000.

I think I may conclude my remarks by stating that the result of the operations for the year affords grounds for great satisfaction, and our directors in Egypt anticipate that, with the facilities for travelling, which are constantly improving, we may look for a good season this next winter. I now beg to move:—"That the directors' report and accounts for the year ended April 30, 1921, as submitted to the shareholders, be received and adopted."

Mr. Charles Baehler seconded the resolution, which was carried unanimously.

The Chairman next moved:—"That a dividend of 5 per cent. on the preference shares for the year ended April 30, 1921, be and the same is hereby declared payable on and after July 15, 1921." Mr. H. M. Snow, M.V.O., seconded the motion, which was unanimously agreed to.

The Chairman then proposed:—"That a dividend of 25 per cent. on the ordinary shares for the year ended April 30, 1921, be and the same is hereby declared payable on and after July 15, 1921." This was also seconded by Mr. Snow, and was carried unanimously.

The retiring director, Sir William B. Peat, C.V.O., was re-elected, and Messrs. Turquand Young and Co. were reappointed auditors.

A vote of thanks to the Chairman for the great assistance he had rendered to the company since its formation brought the meeting to a conclusion.

## MORTGAGE COMPANY OF EGYPT.

### Cotton Fluctuations.

The thirteenth ordinary general meeting of The Mortgage Company of Egypt, Limited, was held on June 30 at the Cannon Street Hotel, E.C., Sir Henry Babington Smith, G.B.E., chairman of the company, presiding.

The Chairman, in moving the adoption of the report and accounts, said:—The period to which the accounts refer was one of violent economic disturbance throughout the world, and not the least in Egypt. Cotton, the product on which Egypt's prosperity primarily depends, had reached in February, 1920, the enormous price of 95d. per lb., more than ten times its pre-war price. The sudden end of the general boom in trade which followed the termination of the war led to a complete cessation of demand, and the price of cotton fell even more rapidly than it had risen. As was to be expected, these violent fluctuations caused great embarrassment to all interested in cotton, and many failures occurred. Nor was it cotton alone that caused difficulty. The other staple products followed a similar course, though their fluctuations were not so extreme as those of cotton. It must not be supposed, however, that the losses of 1921 have swallowed up all Egypt's profits of the preceding years. I cited in my remarks last year certain figures, showing the vast wealth which had poured into Egypt during recent years. Notwithstanding many adverse factors the country still possesses a large part of this new wealth, which is represented by foreign investments, by bank deposits, and bank notes, by repayment of mortgage loans, by imports purchased, and so forth.

Land prices, as was to be expected, have shown the effect of the wave of prosperity and of its reflux. The best lands, which were forced up to a fancy price of £500 per feddan or more last year, have fallen by 60 or 70 per cent., while second or third lands, which rose in a more moderate proportion, have fallen from 30 to 50 per cent. Purchases at these exaggerated prices were not, I believe, financed to any great extent by borrowed money, and, consequently, the fall in prices has not had so disastrous a result as might have been anticipated.

Turning to our own business, the first point to which I would call your attention is the table in the board's report, giving the amount invested in first mortgages at the end of each year since 1910. For the first time for sixty years the total shows an increase. It reached its maximum in 1915, when it amounted to £3,481,000. It then steadily declined, mainly owing to the prosperity which the war brought to Egypt, until, in 1920, it had fallen to £2,589,000. At March 31 last it stood at £2,877,000, an increase of £288,000 on the previous year. The instalments in arrear have increased from £111,158 to £240,238. This is still much smaller than the high figure of £410,938 reached in 1916. As very little new business has been entered into in the last six years, it follows that a substantial number of instalments have already been paid on the loans which have now fallen into arrear, and the margin of security is therefore satisfactorily high. The board are of opinion that the arrears need not give you any cause for anxiety, and that any losses which may arise are fully provided for in the reserve for bad debts, which now stands at £32,733. The item for property acquired by foreclosure is still negligible in amount.

In addition to the reserve for bad debts, the general reserve now stands at £200,000, to which we propose to add a further £10,000. The profit on sales, amounting to £91,139, is held in suspense, because it is receivable from the purchasers in instalments, and cannot, we consider, be definitely treated as profit until it is actually received. Having regard to these reserves, and also to the fact that we have purchased £731.100 of our debentures, ultimately repayable at par, at a cost of £589,824, I think you will agree that the position of the company is exceptionally strong.

The balance of profit and loss account amounts to £80,310, as against £117,488 last year and £83,777 the year before. This diminution is in great part due to the heavy burden of income-tax and of the corporation profits tax. We feel justified in recommending you to maintain the dividend on the ordinary shares at the rate of 12 per cent., and to add £10,000 to the general reserve, with the net result that a balance of £43,249 will be left to be carried forward to the next account.

The report and accounts were unanimously adopted.

---

Mr. P. Cornfield, of the Department of Commerce and Industry, Jerusalem District, is at present on a visit to London.

The Mediterranean Company for General Trade have removed their head offices from 15, Bishopsgate to 14, Trinity Square, E.C.3.

One hundred and sixty-eight new companies, with a total capital of 1,640,000,000 lei were established in Roumania during January to October, 1920.

## SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank:—

MERSINA, June 8.

The report for May states:—The commercial crisis which we have recorded in our previous reports continues, and it is impossible to foresee the end of this situation, which is very prejudicial to the interests of the country on the one hand and to those of the manufacturers and exporters of Europe on the other.

Cotton. — Although the news from Europe is that the tendency is to fall—which is unfavourable to the sale of the stocks existing in this country at favourable rates—the prices of last month are maintained for good quality.

Wheat.—Ps. 9-10 per oke, as compared with Ps. 10-11 in April.

Barley.—Ps. 7-7.50 per oke, as compared with Ps. 8-8.50.

## GREEK SALT-MARSHES.

It was decided in July, 1917, that the exploitation of the Greek salt-marshes would render Greece independent of foreign salt, says the *Oikonomologos Athenon*. As a result of investigations nine principal and many secondary salt-marshes were sold by auction. The cost of preparing these marshes for the use of the industry was estimated at 3,300,000 drachmæ. The exploiters undertook to produce an increasing annual output during the first eight years, until it should reach an average of 80,000 tons. The results were most satisfactory, the first annual outputs being 53,000 tons for 1919, 58,000 tons for 1920, and by 1920 the industry was paying its own way. At the estimated rate of increase the next year's output should be 63,000 or 64,000 tons. If the improvements begun in 1918 had been steadily followed up, Greece would now be wholly emancipated from foreign salt. But the new Government has neglected the industry; large stocks of salt are unable to be transported from Kitros owing to damage sustained by the works, and the Government, instead of aiding the damaged home industry, has preferred to resort to the importing of salt from abroad.

## ON 'CHANGE.

### Business Still Restricted.

(From Our Own Correspondent.)

London, Monday night.

During the past week there has been a distinct improvement in the tone of the markets, but the tendency on the part of investors is still to hold aloof, and to-day orders have been so few in number that something akin to dullness has prevailed.

Gilt-edged stocks, after improving somewhat, are closing round the levels of the previous week. A factor tending to weakness in this group has been the result of the New Zealand Six per Cent. Loan, 58 per cent. of which went to the underwriters. War Loan Fives are 88⅜, the same as last week, while Victory Bonds at 77⅛ are ⅛ down. Fundings at 77½ have also shed ⅛, but Consols, which have been in marked demand, are closing 1⅛ up at 48, which, it may be added, is somewhat below the best. India 7 per Cents. have been a firm spot, and are closing ⅝ up at 103⅞, but Ceylon 6 per Cents. have shed ⅛, and are now only ½ premium.

Industrials have readily responded to the improved outlook, and while there has been no great development of buying, a very steady tone has been in evidence, and in many directions small advances are to be recorded. Iron and Steel and Textiles have provided the most prominent features of the market. Shipping shares have been rather featureless, with P. and O. Deferred at 325. Oils have been weak on disquieting reports from Mexico. There has been little change in Rubbers.

A firm tone has prevailed in Near Eastern securities. Egyptian Guaranteed 3 per Cent. at 69, Greek Guaranteed 2½ per Cent. 1898 at 66, and Turkish Guaranteed 4 per Cent. 1855 at 70 are all the same.

In Greek shares the 5 per cent. 1881 Loan at 43½ xd. is ½ down, while the 5 per cent. 1884 is also 43½ xd. The 5 per cent. 1890 is 41, while Fundings have gained a point at 41. The 4 per cent. 1910 Loan is unchanged at 30, but the 4 per cent. 1902 Loan at 33 xd. is 3 down. The 5 per cent. 1914 Loan is unchanged at 39.

In Land shares, Beheras have risen ¼ to 7¾, but the preference shares are unchanged at 3. Anglo-Egyptian Land Allotments have shed ¼ at 3, while Egyptian Consolidated Lands are 2d. lower at 10d. Egyptian Delta Lands are unchanged at 6s. 6d., but Gharbieh Lands are ⅜ down at 1⅛. New Egyptians are 6d. up at 22s. 3d., while Union Foncières have gained ¼ at 1⅞ xd. Sudan Plantations are ⅛ up at 3 1-16.

In Oils, Anglo-Egyptian are 3-16 down at 1½, while Phœnix are unchanged at 11s. 9d. Roumanian Consolidated are 6d. down at 12s. 6d., but Steaua Romana are 1s. up at 15s. 6d. Burmahs are 6 19-32.

In Banks, Agricultural 3½ per cent. Bonds are 51¾, and Agricultural 3½ per cent. Guaranteed Bonds are 53¾. Imperial Ottoman Banks are unchanged at 8½, while the National Bank of Egypts are 17 7-16.

## EGYPTIAN CENTRAL OILFIELDS.

The Egyptian Central Oilfields, Ltd., has been registered, with a nominal capital of £75,000 in £1 shares, to adopt an agreement with W. M. Cranston and the New African Co., Ltd., and to produce and refine oil. The first directors are: L. R. Davies, 264-273, Salisbury House; T. F. Dalglish, 264-273, Salisbury House; E. Rowley, 10, Kennedy Street, Manchester. Remuneration, £200 each per annum (Chairman £300), free of income-tax, and 10 per cent. of the surplus profits divided between them. Registered office: 264-273, Salisbury House, E.C.

## ALEXANDRIA EXCHANGE.

*Supplied by G. L. Mortera, Alexandria and Cairo.*

Prices on June 17 were as follows:—Agricultural Bank of Egypt, £4, Alexandria Water Co., Ltd., £6 3-64 ex.; Anglo-American Nile Steam, £2 5-16; Associated Cotton Ginners, 21-32; Banque d'Orient, Fr 56; Behera Ord., £E7 3-16; Behera Priv., £3 3-32; Bonded Stores, £9⅝; Brasseries d'Egypte, Fr. 70; Building Lands of Egypt, ⅝; Cassi di Sconto Priv., Fr. 102 ex; Ciments d'Egypte Priv., Fr. 35; Ciments d'Egypte Div., Fr. 23; Comptoir Fin. et Com. d'Egypte, ¾; Consolidated Land, Pt. 5; Credit Foncier Fondateur, Fr. 80 ex.; Credit Foncier Egyptien, Fr. 595½; Credit Foncier 1885 Oblig., Fr. 314; Credit Foncier 1903 Oblig., Fr. 221½; Credit Foncier 1911 Oblig., Fr. 226; Crown Brewery Priv., Fr. 162; Crown Brewery Div., Fr. 130; Eaux du Caire Capital, Fr. 77; Eaux du Caire Jouissance, Fr. 101; Egypt and Levant, S.S. Ord., 27s. 3d.; Egyptian Delta Light Railways, £4¾; Filature Nationale d'Egypte, £9⅜; Gabbari Lands, 5-16; Immeubles d'Egypte Soc. an des., £4 15-16; Khedivial Mail S.S. Co. Ord., 110s.; Khedivial Mail S.S. Co., Pref., £2⅝; Kom Ombo Ste. Ane. de Wadi, £4⅛; Kom Ombo Ste. Fondateur, £33 9-16; Land Bank of Egypt, Parts de Fond, £35; Lots Turc, Fr. 39½; Menzaleh Canal Navigation, Pt. 270 ex; Nungovich Hotels, £6 5-16; Ramleh Railway, £1⅝; Salt and Soda, 27s.; Tram. d'Alexandrie Priv., Fr. 41; Tram. d'Alexandrie Div., Fr. 41; Union Fonciere d'Egypte, £1 15-16 ex; Egypt Hotels, £1 61-64; Urbaines et Rurales, £2 27-32.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated June 27:—During the week ending June 18 rainfall nearly general except in the Punjab and United Provinces of Agra and Oudh, where falls light to moderate. Since that date monsoon stronger than usual in Central and Northern India. General crop prospects unchanged. Bombay cotton market weak. Fine M.G. Oomra July Rs. 301, September Rs. 317½. Calcutta jute market unchanged. Imports and prices practically same as in previous week, and with steady demand from balers, stocks have decreased by about 30,000 maunds. Slightly better inquiry from mills for rejections at Rs.5 to Rs.5½ per maund landed; Hessians quiet but steady; marked inquiries for heavy C's and cornsacks and rates have hardened. Rangoon paddy arrivals continue on fair scale. Rates are Rs. 220 to Rs. 225 for both rail and boat paddy. In white rice, market is very firm at Rs. 580 for small mills quality, June-July, and Rs. 575 for large mills quality. Government of India have issued a memorandum based on the Coalfields Committee's recommendations in which they invite opinion on the following questions. Firstly, of obtaining statutory powers to secure coal conservation; secondly, of increasing staff of mines department with a view to control working and prevent waste. Finally, they realise that an attempt to remedy deficient wagon supply must accompany steps to prevent wasteful working. No change in bank rates.

A further cable, dated June 30, states:—Bombay cotton arrivals from September 1, 1920, to June 24, 1921, were 2,480,000 bales, as compared with 3,118,000 during the corresponding period of the last year. Bombay imported piece-goods market shows some improvement with better inquiry for staple goods. Local goods moving steadily. Rangoon paddy arrivals continue on fair scale. s.s. Mathura sailing to-day from Rangoon with 13,700 tons of rice for Germany. Calcutta jute market shows steady demand from balers. Imports affected by stoppage of steamer services owing to strikes and stocks are reduced by about 1,000 tons. Mills continue to show very little interest. Weather favourable, and jute plants benefited by spells of bright sunshine. Cutting in some districts proceeding, and imports into Calcutta expected in limited quantities during next week.

# SHIPPING INTELLIGENCE.

## DANUBE NAVIGATION.

Traffic on the Danube is now internationalised, and, if brought into close conjunction with the railways, should prove to be a means of solving the problem of communication between Hungary, the Riparian States, and the west and east of Europe during nine months of the year, states the Report on the Commercial and Industrial Situation of Hungary, by the British Commercial Commissioner there. The International Commission of the Danube has done excellent work in attaining this end, and is doing its best to see to the proper working of the river under the changed conditions. From a commercial point of view one of its principal objects will, no doubt, be to order that vessels in transit are neither held nor delayed unnecessarily for Customs examination, etc. The interests of the river and traders demand that where examination has to take place on the frontiers of two countries through which a vessel passes, this examination should be done at the same time under joint supervision, and that they should not be first cleared by one authority and then on the opposite side of the river have to be searched again by another authority. This is of especial importance to British trade, for now that British interests have either partly or mainly acquired the principal river lines, such unnecessary delay will prove a severe handicap when competition sets in.

At certain times of the year the depth above Budapest does not exceed 1.5 metres at low water, and in the higher reaches above Vienna scarcely more than 1 metre. At Budapest itself a minimum depth of two metres is always obtainable. For this reason the latter city is considered likely to become the point of junction between west and east, bisecting the navigation line Sulina-Budapest and that of Budapest-Ratisbon. Having this in mind, the Hungarian Government decided some years ago to build a large commercial harbour on the island of Csepel, south of Budapest. The plans were prepared, and certain preliminary works commenced prior to the war. The entire scheme embraces:—(*a*) Local harbour; (*b*) transit harbour for transhipment; and (*c*) an industrial harbour. It was originally intended that these works should be taken in hand by the Hungarian Government itself, but altered conditions have rendered it necessary to seek the aid of foreign capital.

In connection with the above scheme it has been proposed to take advantage of the 4½-metre fall in the river during its 60-kilometre run, and by building a lock at the northern end and one at the southern end of the so-called Soroksur arm of the river, to develop some 7,000 horse-power. Foreign capital is also needed for this scheme, but although both British and French firms have examined the proposition, no definite offer has yet been made. A preliminary concession has been obtained by a firm of Swiss engineers to harness a branch of the river near Pressburg (Bratislava) and Györ. This, if undertaken, would yield between 20,000 and 45,000 h.p., according to the state of the river, and would be of great value to the industrial town of Györ. A third river power scheme is proposed in the neighbourhood of Vaez. Much interest has also been taken in the proposed Danube-Tisza Canal, but very little progress has been made in the three plans for want of capital, and even their feasibility has been questioned, on account of the porous nature of the soil.

Tractor trials are to be held on September 5, and subsequent days, near the Zeitoum Bournou Munition Factory, Constantinople.

## TURKISH IMPORTERS CANCELLING ORDERS.

A cable received by the London Office of the Guaranty Trust Company of New York from its Constantinople Office reports that important Turkish import houses have arranged to cancel orders placed last year in Manchester for this year's delivery, paying the penalty provided by the contracts. The cable states: "Important commercial houses here have arranged for the cancellation of 1920 Manchester orders for 1921 delivery against penalties. Petroleum importers who were previously interested in the Batoum market are now purchasing in Roumania, which is sending substantial consignments here. The Anatolian Press reports that the Government, after investigation of the economic situation, has decided to abolish export duties."

The Yugoslavian law establishing a monopoly of saccharine and other artificial sweetening products now applies to the whole kingdom.

H.M. Consul at Zagreb has forwarded to the Department of Overseas Trade particulars of certain concessions for coal fields in the Zagreb district, in respect of which the concessionnaire hopes to attract British capital.

## NOTES OF THE WEEK.

### *France and the Sevres Treaty.*

It is now known, on the authority of M. Briand, that the French Government has informed the Allies that France will never consent to ratify without amendment the Treaty of Sèvres, which is held to be in direct opposition to French interests. France, her Prime Minister declares, desires to see a lasting and durable peace made with Turkey, which should be given the means of becoming once more an independent self-supporting Power. The statement helps to clear the ground, although it leaves open the question of the extent to which the Treaty of Sèvres is to be amended. There is, however, no room for the slogan which has found favour in some quarters, "The Treaty, the whole Treaty, and nothing but the Treaty," and an additional argument is provided for those who are urging that the moment is opportune for a complete redrafting of the settlement, or non-settlement, devised by the Supreme Council. The suggestion is prompted solely by the desire to see peace restored to the Near East. It is obvious to the most superficial observer that the Treaties of Sèvres and Neuilly, as they stand, have not introduced stable conditions in the Balkans. In this connection attention may be called to the guarded warnings of our Sofia Correspondent. The situation existing in South-Eastern Europe at the time of the Armistice has been profoundly modified by a variety of circumstances. Why should not the Allies recognise the fact in the interests of European peace?

### *A Weak Case.*

M. Briand's statement supplies the *reductio ad absurdum* to the contention still urged so eloquently by M. Venizelos on behalf of Greece that the latter is fighting because "Turkey is trying to tear up the Treaty which ended the old war." The Treaty has fallen to pieces owing to the faulty material of which it was composed, and Turkey and Greece are at war because hostilities were resumed after the London Conference. It is of no use to try to make the Allies' hair stand on end by emphasising the danger to which Constantinople is being exposed. French opposition to the Treaty of Sèvres, together with the logical conclusions of that attitude, must be met, and this can only be done by calling off the Greek Army, which was landed on the coast of Asia Minor on the Allies' instructions, and by a personal meeting with Mustapha Kemal Pasha. When the Allies are not divided by trying to bolster up a weak cause, but are conscious of having a strong case, it will be time to discuss military measures for dealing with Turkish intransigence.

### *Welcome to the Egyptian Delegates.*

With the arrival in England of the Egyptian Delegation events enter upon a new stage, and one which is bound to be critical. As we observed last week, Adly Yeghen Pasha and his colleagues may feel sure that the people of this country wish them well, and hope that the negotiations now opened will be fruitful in good results. It is not in this country that we should look for those who would like to see all the earlier negotiations rendered nugatory and the Delegation forced to admit failure and return to Egypt empty-handed. It may suit Zaghloul Pasha in his present jealous mood to denounce the British as the true enemies of Egypt; but to less prejudiced judges the state of the country to-day compared with what it was before the British Occupation affords instantaneous and complete proof to the contrary. Great Britain has been a good friend to Egypt, and she wishes to be a good friend still. She will do what is right, but she will do it in her own way; and while she wishes to consult Egyptian opinion, she will not be bullied or hustled by the Egyptian mob, prompted by self-seeking agitators. The fact that Adly Yeghen Pasha and his colleagues do represent responsible Egyptian opinion makes it possible to hope for satisfactory results from their visit to London.

### *Dissentient Voices.*

In Egypt the opposition to the Official Delegation is still active; though what it hopes to achieve, beyond the glorification of Zaghloul Pasha, it is rather difficult to understand. We have this week received a telegram signed by certain inhabitants of Tahta *markaz*, Girga Province, which states that the inhabitants referred to—

> beg to protest most vehemently against departure of Official Mission. The sole representatives of the Egyptian people are Zaghloul Pasha and his friends, and any negotiations without their consent and co-operation can neither bind nor satisfy us. Nothing can shake the nation's will to complete independence."

The message is signed by three notables, four advocates, as many merchants, a student, and a teacher. A cynic would probably find amusement in noting the proportions of the different classes represented. For our part, we admire greatly the command shown of the English language; and hope that THE NEAR EAST will rapidly make fresh friends for itself in this go-ahead *markaz*. But we cannot help wondering whether the telegram is

Digitized by Google

one of those said to be "fabricated" wholesale in Cairo. Moreover, we fear that the sentiments expressed bear a strong resemblance to those which were widespread in the early days of the Arabi rising. The "student" who signs the telegram may never have heard of those distant days, and some of his seniors may have forgotten them; but cannot the "teacher" instruct them?

### *Flight in the Near East.*

Surveying as an art is popularly held to have had its beginnings in Egypt, where the annual inundations made it imperative to devise some means by which the owners of land might either restore their landmarks washed away by the flood, or, at least, secure an area of land equal to that which they owned before the submergence. The Nile Valley between the Delta Barrage and Aswan has just been surveyed in quite the latest way—by aeroplane. The work was carried out by the Middle East Air Force, on behalf of the Egyptian Government, and it is reported that it has already proved of great use to the Irrigation Department. The value of the aeroplane in the Near East, especially in overcoming difficulties of desert crossings, is becoming more apparent almost daily. Only last month it was announced that the R.A.F. had opened up a practicable route from Jerusalem across the Syrian and Arabian deserts to Baghdad—the achievement being all the more remarkable because a chain of ground stations has been established, with refuelling and revictualling stations. Although we must certainly expect trouble along this route, its surveying and laying out constitute a fine feat in themselves, and the flights already recorded—one of twelve hours from Cairo to Baghdad by Sir G. Salmond, and three of about fifteen hours each in the other direction—show the value of the route. Another development in Near Eastern travel is promised in the form of a London-Constantinople service to be inaugurated shortly by a Continental firm. We should like to see such a service run by a British firm; for there might then be a chance of British mails and British goods competing on equal terms with those of our Allies and rivals.

### *Bolshevism v. Islam.*

Owing to a variety of causes, it is hard to ascertain what progress Bolshevism is making, or has made, among the peoples of the Near East. Among those who have nothing to lose, and think they may have something to gain by upsetting the existing order of things, it will probably gain adherents in Georgia as in Glasgow or Whitechapel. It is certain, however, as we have pointed out before, that no good Moslem can become a Bolshevist, and though, for political purposes, certain Turkish leaders and their friends may show civility to Moscow, they must in their hearts despise it and its doctrines. It is unlikely, therefore, that a speech of the new Soviet envoy to Angora had quite the effect he aimed at. Emphasising the "friendship" of the Bolshevists for the Kemalists, he declared that Russia no longer wished to see the Cross restored on Sta. Sophia, the Russians having repudiated all Tsarist ideals. His generous assurance seems to have fallen on deaf ears; and Mustapha Kemal, replying to his oration, made pointed reference to Turkish traditions and to the suitability of the Angora Administration to the needs of the Turkish people. It is a pity that the Turks do not show as good sense on other occasions.

### *The Agitation in India—*

Lord Lytton's statement on the position in the Indian country districts is calculated to reassure those sections of the public who have been impressed by recent assertions of imminent danger to European residents in Bihar and elsewhere. The official view is that these assertions are greatly exaggerated, and that the situation has substantially improved of late, but the agitation which has been conducted among the ignorant and excitable masses has undoubtedly left its mark, and Lord Sinha, the Governor of Bihar, has at the moment a difficult task. Readers who are inclined to distrust official pronouncements may be referred to Mr. William Irwin's letter published in the *Statesman* at the end of May, which also condemned current statements as exaggerated, and put forward the view that extreme repressive measures were not called for. According to Mr. Irwin, who is in a position to know the facts, the agitators have demoralised the labourers and misled the tenants in Northern Bihar; but the labour difficulty is being met by the importation of tractors and other machinery, while a small change in legal procedure would suffice to convince the tenants of their mistake, and only a clear lead from the authorities is required to stamp out the unrest created by the agitators.

### *—And Its Results.*

The latest news from India goes to show that the results of this pernicious agitation are in effect anti-social rather than anti-European, though it may have been directed primarily against Europeans in districts like Bihar, where they form an important part of the social structure. We have heard of disturbances at Aligarh in the north, and Madras in the south. At Aligarh, an unprogressive town, with an idle and potentially dangerous proletariat, the trouble arose out of the trial of an agitator, and the activities of the mob appear to have been directed primarily against the police. In Madras the disturbances resulted from the attempts of mill-hands on strike to coerce a section of their body which had returned to work, arson and the use of fire-arms being the accepted methods of a persuasion which is certainly not peaceful. It is clear enough that in these two cases, as in various other incidents of the last few months, the respect for law and order, a very modern sentiment in India, has been undermined by agitation, and the position does not call for spectacular measures, but rather for the methodical enforcement of the ordinary law.

### *Indian Journalism.*

A somewhat similar conclusion appears to be crystallising out of the deliberations of the Committee on the restrictions imposed on the Indian Press, and, though no decision has yet been announced, we expect to see these restrictions repealed in the course of the next session. The discussion has, however, taken a new turn through the prominence given to a suggestion that the Press should take measures to reform itself, and that Indian journalists should organise themselves as journalists in other countries have already done. We trust that this suggestion will lead to business, for the time has now come when it can give results of real value. The standard of Indian journalism has been rising rapidly, many of the foremost organs are now well worth reading, particularly by those who differ from their political views; and a definite step forward would be taken if the new standard could be imposed on the bulk of the profession, which still suffers to some extent from the lack of any corporate ideals. What is wanted now is that the young Indian journalist should be imbued with a sense of the dignity and responsibility of the career which he has chosen; it is not, as it once was, a refuge for the failures of the colleges, and the work to be done is essential to the building up of the new India.

### *The Sikh Shrines.*

The further announcement made by the Punjab Government shows that, as we anticipated, the idea of special legislation for the control of the Sikh shrines has been definitely dropped owing to the impossibility of securing agreement regarding the constitution of the Commission which it was proposed to set up; the reformers are now referred to the ordinary courts, which, as a matter of fact, have considerable powers of interference, and, if they want more, they are promised facilities for any private Bill they may bring before the legislature. The result is not such a fiasco as it appears. Public opinion was quite suddenly raised to fever-heat by the events at Nankana, events which are still before the criminal courts, and the offer of special legislation was probably necessary. The discussion of its details was accompanied by a marked fall in the temperature, and brought home to the reformers the magnitude of the practical difficulties which they had at first tried to ignore; it gave time, in fact, just when time was wanted, and the Government may fairly claim that their action tided over a dangerous emergency.

# THE WEEK AT HOME.

LONDON, Monday Evening.

**Peace.**

The prospect in politics as well as industry appears to be definitely brighter, and the conclusion of a truce with Ireland and the more hopeful news with regard to Japan and America will take a weight off the public mind. A month ago the Irish situation looked utterly hopeless; it is not yet solved, or even near a solution, but at least a step has been taken out of the Slough of Despond, and when that is possible, it is evident that greater things are not impossible. The invitation of Mr. Harding to discuss the Pacific problem, and the general question of a limitation of armaments, is understood to be the sequel to a long series of more or less informal conversations between Britain and America.

**The Irish Truce.**

There were moving scenes in Ireland last week while the terms of a truce were being discussed; women stood in the public streets with heads bowed in prayer while the politicians conferred, and there could be no doubt whatever that the public desired peace. But for some time it appeared doubtful whether even a temporary truce could be arranged. Here, as on so many previous occasions, General Smuts played the part of a tactful negotiator. He was unable to assuage the old feud between Dublin and Belfast. But the Southern Unionists, with Lord Midleton at their head, played their parts well. They are, it is true, numerically insignificant, but their quality and weight atone for their lack of quantity; they have great interests in the South, and many of them are respected by Sinn Fein; they are by no means enamoured of partition, and they have always sought peace since the beginning of the present troubles.

From the Sinn Fein point of view it was almost impossible to refuse the Government's offer of an unconditional conference; the whole world would have been convinced that Sinn Fein was merely out for destruction and wreckage. At the same time it must in fairness be admitted that it was not easy to agree to meet Mr. Lloyd George, for if the negotiations break down—a possibility by no means to be excluded—the position of Mr. de Valera will be compromised. The mere admission on his part that a conference is possible weakens him with the extremists; the failure of the conference would weaken him with the moderates, who include the bulk of the old Nationalist Party, now nominally Sinn Fein.

The terms which de Valera would accept are pretty well known in London: they have been sketched in print two or three times, and they do not insist on a republic or separation. But apparently they do insist on the inclusion of Ulster. That is one danger-point; the other is that the gunmen of Sinn Fein may not accept the truce, and may repudiate their own leader. Indeed, outrages have been committed in Ireland since the truce was proclaimed. But it would be as foolish to anticipate a breakdown as to expect that the negotiations will march forward easily to settlement.

**The Pacific Question.**

In the discussions over the Pacific problem the questions and interests involved are large and difficult; in many respects they are highly controversial. But there will be frank speaking without offence, because all parties really desire peace. The difficulties have arisen, in fact, from natural conditions, and not, as in the case of Germany ten years ago, from the ambition of politicians. This fact alone makes an enormous difference; when men want to agree, they generally contrive to do so.

The matter of the general limitation of armaments raises wider, indeed world-wide, problems. On that question the most that can be said with any confidence at the moment is that England and America are united in desiring the reduction; it is by no means certain that they will receive enthusiastic support elsewhere. After all, man was a fighting animal before he was an economic unit.

**Labour Recriminations.**

Some time ago, moved by the desire to make a prophecy which would be both safe and capable of a pretty quick fulfilment, I predicted that a good deal of dirty linen would be washed in the Labour camp as soon as the coal trouble was over. It is always pleasant to be right, but I will admit that I did not expect the unmentionables to be hung out to dry within a week of the miners returning to work. Such, however, is the case.

A Mr. Noah Ablett, a minor Labour light, of South Wales, has attacked Mr. Frank Hodges for going to Chequers to see the Prime Minister. Mr. Hodges retorts that he would go to Blenheim or Buckingham Palace or anywhere else to get a proper settlement. But Mr. Ablett also hints that Mr. Hodges took too much upon himself, and did not do what he was told by the miners. To whom Mr. Hodges replies that he could have got a better settlement if he had been allowed his own way; that he wanted to talk about wages, whereas the Abletts of the day insisted on the pool, the whole pool, and nothing but the pool; and in effect, that he had to run a campaign on lines that he did not believe in, and was thwarted and overruled at every stage by his followers. In other words, Mr. Hodges holds that if Labour cannot trust its own leaders, it can, will, must, and shall go to the devil.

Mr. Thomas, in the meanwhile, who is just back from the United States, has been fighting for his life on the National Union of Railwaymen. It appears that he had a good deal to do with the breakdown of the Triple Alliance on "Black Friday," and he has been accused of treachery. He defended himself vigorously, and told his audience quite frankly that nationalisation was impossible until the country approved of it, and that it did not do so at present.

These recriminations add to the variety of life, and make quite good reading. But they suggest that the dictatorship of the proletariat is a good way off at present. As a matter of fact, there are probably more disputes and personal jealousies in the political Labour camp than there were among Liberals in the famous days of "cross-currents," which is saying a good deal, and I doubt whether we are at the end of the revelations. But hard words break no bones.

**Official Housing Dropped.**

The great Government housing scheme has gone by the board, and the Ministry of Health, its parent and only begetter, is in mourning. Partisans are attacking the scheme for extravagance, and defending it for relieving the house shortage; both are right. It built houses when they were most badly needed, but it necessarily built at the highest price of wages and materials. Both have now come down since last year—a house that cost £900 in 1920 can be put up in 1921 for £650—and private enterprise, which in practice means the jerry-builder, will again come into its own. It is the fashion to revile Dr. Addison for his housing scheme, but we may yet live to bless him.

**Railway Excursions and Finance.**

Now that coal is again available, it is evident that the railway companies intend to make a good fight with the motor-charabancs, which have cut them out very badly this last year, owing to high fares and lack of trains. The popular week-end ticket has not yet returned, but practically every railway company is advertising weekly and fortnightly tickets at single and a-third fares for the double journey. This is certain to bring in a considerable revenue, for the motor-charabanc cannot beat that even if it tries; and it may be taken

Digitized by Google

as the first sign of the slackening of official control. The limited excursion trains of last year, which were like a tea-cup in the ocean of popular desire, represented the best that officialism was capable of.

But even cheap tickets are not the crux of the railway problem. Freight rates will have to be lowered somehow, if the trade of the country is to recover and railway finance is to be placed on a proper footing; and both coal and wages will have to come down before that is accomplished. Wages are falling automatically as the cost of living drops, but coal is still far too high. It is unlikely to drop for the time being, as everybody wants it—household coal is actually to go up—but there is hope that by the autumn it will be considerably cheaper. If not, then the railway question will be insoluble.

**The Ashes Lost.**

The stars in their courses have fought against English cricket. At the third and decisive Test Match at Leeds, Hobbs, our best batsman, was taken suddenly ill and at once operated on for appendicitis; Mrs. Douglas, the wife of the English acting captain, fell ill the next day with the same complaint, and was also operated on. Colonel Douglas did extraordinarily well in circumstances of peculiar anxiety, but there was no question of saving the game. Fate is against us this glorious summer, and we must recognise the fact, and submit to fortune.

There is some compensation in the weather, which simply cannot go wrong. The sun has shone almost continuously since April, and the farmers are beginning the harvest in the South this week—probably the earliest on record. Some of the smaller rivers have practically dried up with the drought, and the Thames is lower than living memory recalls. There is talk of rationing the water supply of London if these conditions continue another fortnight.

**A Bombshell from "Barabbas."**

The publishers have come to a serious decision; nothing less than to give up publishing for the present. The fact is that the costs of printing, binding, and other things are so high that even if they sell large numbers of copies of a book they often make a loss; if they raise the price they cannot sell it at all. So the only thing to do is to wait until costs—particularly printing costs, for that is the main trouble—come down.

Meanwhile the publishers will live on their fat, or what is left of it. Most of them have a list of standard works in print and in constant demand, and these will probably keep the wolf from the door. They will still consider new manuscripts, I understand, and young authors of the rank of Shakespeare, Milton, or Homer will be welcomed if they put in an appearance. But no talent of the merely "promising" variety has much chance for the next few months; only immortals or best-sellers—particularly best-sellers—need apply. The ordinary "masterpiece" of the reviewers will remain under the counter until the author calls for it.

**The Real Book Difficulty.**

I doubt whether literature will lose much in the long run by the abdication of publishers for a year. The economic troubles of publishers—who are often honest and even educated men, in spite of their bad name—affect scientific and "serious" work much more than the ordinary run of novels and popular books. In spite of the publishers' resolution, I do not think that a new Dickens would have to wait very long for acceptance. But a modern Bacon, with a twentieth-century "Advancement of Learning," would be a very different proposition, unless he could pay for publication himself, or the publisher had private means.

Young authors are very pessimistic about the prospects of fame, and I sympathise with them. At the moment they are shut out of the gates of the literary paradise, and have to look to journalism instead of pure letters for a living, and to talk to editors instead of publishers; but editors, as everybody in Fleet Street knows, are to publishers what blackbirds are to eagles, as pussycats to tigers. They sing more prettily, and purr quite nicely when you stroke them; but for the really big game of letters you must hunt with the greater beasts.

# THE NEAR AND MIDDLE EAST.

*(From Our Own Correspondents.)*

## EGYPT.

CAIRO, June 26.

On Wednesday the Residency followed the example of the Palace, and the High Commissioner and Lady Allenby, accompanied by the Residency Staff, proceeded to Alexandria, where they will remain until the autumn at the Zervudachi Villa, which has been the summer headquarters of the Residency for several years now. It has been stated that the Sultan will go for a cruise in the Mediterranean on his yacht the Mahrusa, which has recently been completely overhauled, and that the High Commissioner may snatch a brief holiday in the early autumn. Nothing definite has been decided, however, in either case, and the programme at the Palace and the Residency will entirely depend on how the local political situation develops.

**The Official Delegation.**

All the arrangements have now been made for the departure of the official delegation, who are due to sail by the Italian steamer on July 1, and the announcement of the nomination of the experts who are to accompany the delegation is momentarily expected. H.E. Abdel Khalek Pasha Sarwat, Minister of the Interior, will act as Prime Minister; H.E. Ibrahim Pasha Fathi, Minister of War, as Minister of Finance; and H.E. Ahmed Ziwar Pasha, Minister of Communications, as Minister of Public Works. As the time approaches for the departure of the delegation, more and more support for the Cabinet is forthcoming, and it can safely be said that it has by now obtained the approval of the whole of the responsible element, though, for reasons on which there is no need to dwell, some of the latter are still afraid publicly to express the views which they do not trouble to conceal in private conversations.

As regards Zaghloul Pasha, the approach of the departure of the delegation appears to be driving him to despair, and to be impelling him to adopt an attitude which is alienating more and more the thinking classes. His latest venture has been a speech, in which he openly incited the people to attack the English, who, he said, are their real adversaries and responsible for all that the Cabinet is doing. This is undoubtedly the most dangerous phase that we have as yet reached in Zaghloul Pasha's campaign, and it only goes to confirm those who have throughout characterised him as a demagogue and agitator, who would stop at nothing in order to attain the satisfaction of his own desires.

**The "Kufra" Expedition.**

Great interest is being taken in the addresses and lectures which are being given in London by Mrs. Rosita Forbes on the subject of her recent wonderful journey to Kufra. At the same time considerable surprise has been expressed at the apparent omission of any reference to Ahmed Bey Hassanein, the young Egyptian who accompanied her, and without whose valuable assistance Mrs. Forbes could certainly not have achieved her wonderful success. Hassanein Bey, for his part, in the one lecture he gave here, accorded all the credit to Mrs. Forbes and never even mentioned that during the last few but hazardous days he had had to travel with a broken collar-bone; but Mrs. Forbes, in private conversations, on more than one occasion declared how much she was indebted to Hassanein Bey not only for the information which she was able to obtain but also for the safety of the expedition, and it is a matter of sincere regret to Englishmen as well as Egyptians that hardly any reference, if any, has been made to the part he played. The hope has been freely expressed that this intrepid lady traveller will in the near future repair what is obviously an unintentional omission on her part.

**The Egyptian General Post Office.**

The annual report of the Egyptian Postal Administration issued by Borton Pasha reveals the steady development of that public service. There was an increase of over 24 per cent. in the articles of correspondence dealt with, as compared with the previous year, and every branch of the service has undergone considerable expansion. The fact that out of over six million registered letters only nine disappeared, and that other branches of the service showed similar satisfactory results, redounds to the credit of all concerned in the running of what is in this country a most difficult but at the same time most efficient public administration.

**The Cadre Commission Report.**

In Government circles the main topic of conversation next to the political situation is the report of the Cadre Commission. This Commission was set up two years ago for the purpose of regrading the whole service, and Sir Paul Harvey handed in his recommendations before he left for England, about a month ago. The document is a confidential one, and cannot be made public until it has been approved by the Council of Ministers, but, as invariably happens in this country, most of the details have leaked out, and there is a considerable amount of movement among the officials who, in many cases, consider that they have not been sufficiently well treated. It is understood that in the aggregate the recommendations will in the long run involve an addition to the salary bill, though a relatively moderate amount will be necessary in the early years. One of the reasons for the hesitation on the part of the Council of Ministers to approve of what is understood to be a very able classification is, of course, the present financial situation; but as the Service, especially the junior grades, have been promised improvement as soon as the Cadre Commission reported, and various reductions in bonuses have recently been made on this understanding, it is difficult to see how the Government will be able to evade acceptance of the proposals without seriously discontenting a very large proportion of the official class.

## SUDAN.

KHARTOUM, June 22.

**The Political Situation.**

In view of the continual efforts of the Egyptian Nationalist party to spread their propaganda throughout the Sudan, the recent spontaneous expression of loyalty to British rule on the part of the Hadendoa chieftains addressed to the Governor of Kassala is an interesting tribute to the Administration of the Sudan. The address, which was, of course, in Arabic, may be translated as follows:—

We, the Nazir, Wakil Nazir, Omdahs, and Sheikhs of the Hadendoa, wish that our voice may be heard by our just Government, through your intervention, in order that our feelings of gratitude may be made known to all.

We have been told of circulars having been introduced into the country warning us to be on the alert lest we should be deprived of our properties, lands, and not only these, but our faith. Apart from our unutterable amazement at these statements, we are not exaggerating if we avow openly that, although the authors are unknown to us, we have felt the disgrace and shame of their actions. Should we not make known our opinions in this connection, we should be behaving in a cowardly manner and be guilty of ingratitude, and we are neither cowards nor ingrates.

With joy we wish it to be known all the world over that until the advent of our present Government we never understood the meaning of justice.

To Great Britain and her just sons are all thanks due for enabling us to enjoy peace and plenty. You have given us life after we tasted the bitter dregs of misery and distress.

You and you alone have been responsible for the reign of justice throughout the Sudan. Our clearest proof is the recent great war when the whole world suffered death and pain, but the Sudan enjoyed peace and plenty after our country had been the theatre of bloodshed. Through your justice we have been blessed with health and wealth, we have multiplied in numbers, and have seen justice done, since you prepared our sons to hold responsible positions of trust in the Government, such as Mamours, Sharia Kadis, Engineers, Clerks, etc. You have rebuilt our decayed mosques, and you have proved yourselves to be the faithful guardians of the widowed and orphaned. Your justice and forbearance have won the admiration not only of all classes, but also of the ignorant and wild.

We envy no nation in the whole universe so long as we live in peace under the British Flag. Where the British Flag flies

Digitized by Google

there justice predominates. We ask God that this blessing should continue to be our lot.

"GOD SAVE THE KING."

Your faithful subjects

(Signed and sealed),

The Hadendoa (Kipling's Fuzzy-wuzzy) are a large and powerful tribe inhabiting the Eastern Sudan and the Red Sea Provinces. Their Nazir, Sheikh Ibrahim Musa, M.B.E., M.V.O., was a member of the Sudan Delegation to London in 1919. He was presented for the first time to the King at Port Sudan in 1912.

**Tram and Ferry Service.**

The gross revenue for the municipal tram and ferry service for the month of April last amounted to £E3972.175 m/m., giving a net profit of £E1458.608 m/ms., constituting a record in each case, much surpassing the figures for any previous month's working since the service was instituted.

**Kindness to Animals.**

On Monday, May 31, a special police inspection was made of all animals, carriages, carts, etc., plying for hire in Khartoum. Prizes were given for the best-kept animals and vehicles, from a fund collected by Mrs. Fleming, to whom the main credit is due for the inception of the scheme and its successful inauguration. It is now proposed to hold a similar inspection on the last Monday of every month, and it is hoped that an animal show may be held in January or February.

## YUGOSLAVIA.

BELGRADE, July 3.

**The Attempt on the Regent.**

The daily press will have informed you of the attempt on the Regent's life as he was returning from taking the oath to the new Constitution. On leaving the Parliament, accompanied by M. Pashitch, the Prince drove up the avenue of Milosh Veliki, past the Ministry of Public Works, where there are scaffoldings and builders at work. Just before the carriage reached the building a bomb was thrown from an upper window. Fortunately it burst on a telephone standard, wounding about ten people, but involving no loss of life. It appears that the Prince was not aware of the attempt until it was reported to him on reaching the Palace; for the sound of cannon was expected, saluting the auspicious event, and it is a common thing in these regions to fire into the air from sheer lightness of heart, especially on glad occasions.

The miscreant, terrified by his own act, bolted immediately, although in the possession of three more bombs and an automatic pistol; but he was quickly stopped by a café waiter and a couple of workmen, who tripped, or threw him into a slime pit. It was not without difficulty that the police succeeded in preventing the enraged crowd from lynching him; which would have deprived the authorities of the information that they have since been able to extract from him.

Although the hostile press tries to make out that this was an act of revenge on the part of some so-called "oppressed minorities," it is already practically proved that it was a move in a definite terrorist plot, inspired by a Communist committee in Vienna, under orders from Moscow. The perpetrator is named Spasoje Stejitch, and it appears that his father is a German from Bachka, who assumed a Serbian name many years ago, and his mother a Magyar. He calls himself a plasterer, but seems to be a ne'er-do-well who has tried several trades with equal failure. He was a Hungarian prisoner in Russia; joined the Volunteer Division in the Dobruja, but went over to the Red Army, where he served for a considerable time; then returned to his own country, and so gained the confidence of the Bolshevists that he acted as their courier.

His evidence is interesting: he states that the plot was ordered by the Communist committee in Vienna, under instructions from Moscow. The details were left to the Executive Committee in Belgrade, who were accused of lukewarmness in the cause, and were anxious to clear themselves. This committee consisted of three members of the Communist Party in the Skupshtina, by name Filipovitch, Chopitch, and Kovachevitch. His revelations have startled the authorities, and led to a whole series of arrests at Novi Sad, which has been the headquarters of the organisers. Meanwhile, the Privilege Committee of the Skupshtina has handed over the three implicated Communist members to the authorities. Filipovitch, who is a man of good family and education, claims to be a purely theoretical Communist, and disavows any connection with the terrorists. There has also been arrested a Magyar in Belgrade, who was a former officer of Bela Kun, and two servants of the Communist Club, a chauffeur and two active accomplices, who were to have completed the work if Stejitch failed. They seem to be but poor villains, for their courage failed them at the critical moment, well armed though they were. Further particulars are awaited with interest, but the whole thing is illuminating, in that it shows the ramifications of an international and dangerous plot, as to the existence of which many people were inclined to be sceptical.

**The Constituent Assembly.**

The Constituent Assembly has resolved itself into an ordinary Skupshtina and adjourned until October 20, during which period two committees will prepare the ground for its future work, and from now Yugoslav politics enter into a new phase. The first sign of splitting in the parties has appeared. The Bosnian Mohammedans are not very satisfied with their bargain, and have divided into two halves under Dr. Spaho, Minister of Commerce, and Dr. Karamehmedovitch, Minister of Public Health, respectively, and some members have definitely left the party. There are also indications of splitting in some of the bigger composite parties, which may resolve themselves into their component parts in the face of the new situation. Yugoslavia now has its own Irish Question, in Croatia; for a great number of Croats are very dissatisfied with the Constitution and especially regret the disappearance of the ancient office of Ban. The attitude of the Narodny Club still remains enigmatical; but it seems more likely that they will join up with one wing of the Democratic Party rather than with Raditch, who is to be accused of high treason.

The Croatian Question is the principal one now before the country, but there is little doubt that it will be settled satisfactorily in the course of time. All Croats know that they cannot stand alone, and Serbia knows that it cannot afford to allow Croatia to be a stepping-off place for her enemies. Sensible men on both sides recognise that the differences are not fundamental, but superficial, that their main interests are really identical.

**The Voting on the Constitution.**

Particulars are now available about the voting for the Constitution, and they are interesting. The Yugoslovenski Club or Slovene Clericals of Dr. Koroshets, the Narodny Club, Communists, and Raditch's Peasant Party all abstained, making a total of 161 members absent. Of those present, 35 voted against and 223 for, which is twelve more than the minimum necessary to make it a legal resolution.

The last few days before the voting had been a time of feverish bargaining, the several small parties selling their votes for concessions. At the eleventh hour it seemed that there would be a hitch, for the Macedonian Moslems sent M. Pashitch an ultimatum that they would not vote "for" unless he gave them an explicit undertaking in writing that he would grant them all their demands, and these were pretty heavy. But the veteran was equal to them, and at once sent for the Peasants, good Serbs, but not always wisely led, put the case before them, and asked them to save the situation. They agreed that if the worst came to the worst they would indeed vote "for," in which case they hoped that the Government would in loyal gratitude grant their demands. So M. Pashitch received the Turks with equanimity, with the result that they voted for, and the Peasants against.

**The Little Entente.**

The Little Entente is now a very real factor in European politics. According to the *Balkan*, it has advised the Hungarian Government not to admit the ex-Emperor Karl to their territory, and threatened a blockade of the country in the event of his attempting

Digitized by Google

another adventure, in which case they would hand the matter over to the military authorities to deal with, and Karl would find his Elba on some lone Dalmatian island. The agreement with Roumania is a source of great satisfaction, and relations with Czechoslovakia are every day becoming more intimate. Czech business men are more and more numerous in Belgrade, and many Serbian officers are sending their children to Czechoslovakia to school.

## BULGARIA.

SOFIA, July 4.

**Relations with Yugoslavia.**

Signs are not wanting that Yugoslavia and Bulgaria may soon be on friendly terms once again. Much depends on the war now in progress in Asia Minor, as both this country and Yugoslavia stand to gain much and lose nothing if the Greeks are not successful against the Kemalists. It is recognised that Bulgaria is not satisfied with the situation in Thrace, and that she must inevitably look forward to the day when her countrymen will be free from foreign administration. Nor would she be human if she did not hope one day to regain an outlet on the Ægean Sea. When the conflict in Asia Minor is over, affairs in both Eastern and Western Thrace will become interesting.

Yugoslavia has always had her eye on Salonika. This port she regards as essential to her economic and industrial prosperity, and when occasion presents itself she will almost certainly make a bid for it, although the methods employed are not likely to be warlike ones.

Thus the two Slav nations of the Balkans, nations that, in spite of mutual distrust and dislike have a real admiration for each other, will find themselves more or less united in their aims and ideas. Bulgaria's past must necessarily be a subservient one, owing to her inferiority in population and strength in comparison with the Yugoslav State, but the Bulgarians are always able to rely on the fact that, although a small State, they are compact and are not divided among themselves.

Of late Serbian public opinion has veered round towards the Bulgarians, and the strong check that the Sofia Government has kept on the Macedonians and their activities has not passed unnoticed at Belgrade. It is pleasing that the few remaining Bulgarian prisoners of war in the hands of the Serbians are on the point of being liberated; and other little incidents, although trifling in themselves, go to show that relations are beginning to enter into a more cordial phase. Regarding the desire of the present Bulgarian Government for a speedy and close *rapprochement* there is no doubt; but it must not be forgotten that hates die hard in the Balkans, and the Serbians cannot all at once forgive the former invaders of their country. Nevertheless, Thrace and its neighbours may serve as an avenue of friendship, and there would be no entente more calculated to create a stable situation in the Balkans than one between Yugoslavia and Bulgaria.

**Damaging Rumours.**

A statement that appeared in the *Daily Telegraph* of June 28 has attracted a good deal of attention here. The writer stated, *inter alia*, that the Bolshevists and Kemalists are in close touch with the Bulgarian Communist Party and that a secret treaty has even been made with them. The article immediately afterwards refers to a possible attempt being made by ex-King Ferdinand to regain his throne. These two theories—one can scarcely call them anything else—are rather far apart, as surely a king will not be brought back and a Bolshevist régime adopted at one and the same time. There are ample grounds for stating that there is very little sympathy felt for ex-King Ferdinand in Bulgaria to-day; and the peasants are far too devoted to young King Boris to dream of trying to restore his father. M. Stambolisky also is not likely to move an inch in support of a step that would at once undo all the good results he has so hardly attained.

The article further states that ex-King Ferdinand has been invited by several Bulgarian notables; it would be interesting to know who these notables are. Undoubtedly some of his old favourites and friends, while in Germany, have called on their ancient Sovereign, but it is not to be believed that anyone holding an official position of importance has seen the ex-King. Enemies of Bulgaria are, however, always on the look-out for means by which they can discredit their country in the eyes of the Western Powers; and it is to be feared that this article is yet another case in point.

## ROUMANIA.

BUCHAREST, June 28.

**In Parliament.**

M. Titulescu, the Minister of Finance, having recovered from his indisposition, the debate upon his Bill was resumed this week in the Lower House. One extreme Socialist deemed it politic to propose that the King's personal property should not be exempted from taxation; but M. Yorga pointed out the irrelevancy of this demand, remarking that the Civil List is the only emolument paid by the State which has not been increased in consideration of the currency depreciation, and that the greater portion reverts to the people in the form of donations made by Royalty to public and charitable institutions. M. Vaida suggested an increase of the Civil List. The Minister, whilst welcoming the expression of the real loyal feelings of the whole nation for the Crown, regretted that the increase could not be made now, as it would involve a change in the Constitution. The Opposition complained of the rapidity with which the Bill was being discussed and voted; the Socialists denounced it as oppressive for the poorer classes; the Minister repudiated this assertion, and disproved it by figures. Finally, the Bill was put to the vote and passed by 157 votes to 70.

**Agrarian Reform.**

An exciting scene marked the proceedings this week in connection with this bill. The Decree Law of 1918 provided that the expropriation of each estate should be made in proportion to its area at that time. Since then many landlord have sold a portion of their land, others have divided it among different members of their families, and, again, many properties have been split up through inheritance. The text of the Bill now under discussion takes the present area of each property to be expropriated, thus sanctioning all above-mentioned curtailments; but the Opposition contends that by this means the peasants will be deprived of about 60,000 hectares to the corresponding benefit of the landowners. A member of the Governmental Left Wing, without previously notifying the Minister, moved an amendment that the provision of the text of 1918 should be respected. This motion was eagerly seized upon by the entire Opposition, and put to the vote was carried with the help of the Left Wing, to the great exultation of the Opposition and the consternation of the Cabinet. The disconcerted Minister of Agriculture left the House, and the sitting was suspended for the day. The general belief was that the Minister would resign, but the Prime Minister smoothed matters out. At the following sitting the same article was again put to the vote—a flaw having been discovered in the previous voting, and was passed by the disciplined majority, the Opposition violently protesting and announcing that they would propose the same amendment again.

**"Votes for Women."**

The sittings of the Senate are usually models of calmness and moderation. One sitting this week, however, was extraordinarily turbulent. The exciting cause was a discussion on Woman Suffrage. Vehement speeches were made pro and con, and feeling rose to such a pitch that the sitting had to be suspended four times. Finally, a proposal for "obligatory voting of women at the Communal elections" was passed by a small majority, the result being enthusiastically acclaimed by the winning side and by the fair sex, which was well represented in the public gallery. The Parliamentary session has been prolonged to July 20.

**Personalia.**

The papers report that, after the closing of Parliament, the King intends leaving for a French spa to take the waters for a month. The announcement of an official visit to France is contradicted; but it is possible that the King will also visit Paris.

The school for nurses organised by the Committee of the General Hospitals, with the co-operation of the nurses of the Canadian Mission, was inaugurated at the Coltzea Hospital in the presence of the Queen. The first diploma of this school has been awarded to Her Majesty as a mark of admiration.

The visit of the Japanese Crown Prince to Roumania has been officially announced for the month of August.

Mr. Peter Jay, the American Minister Plenipotentiary to Roumania, arrived on Saturday. The following day he was received with the usual ceremonial by the King, to whom he presented his credentials.

Sir Herbert and Lady Dering have left for England on two months' leave. The affairs of the Legation will be carried on by the First Secretary the Hon. Eugene Millington-Drake.

## GREECE.

ATHENS, June 25.

### The Allied Note.

Up to the time of writing the Government has not replied to the Allied Note presented to it on Tuesday by the British and French Ministers. The Greek reply was drawn up on Thursday at a Council of Ministers held under the presidency of M. Gounaris, who had returned hurriedly to the capital from Smyrna, and was immediately telegraphed to the King for approval. No news from his Majesty had been received up to this morning, and consequently the Allies are still ignorant —at least officially—whether Greece will accept or reject their offer of mediation. I write "officially" because practically everyone knows that the Government has decided to decline the offer with thanks. In acting thus the Greek Government would be voicing the wish of the whole nation. It could be safely said that there is not a single Greek who would like to see the Smyrna question settled in any other way than by that of arms. The Greek is very grateful to the Allies, and to Great Britain in particular, for the interest shown, and for their efforts to settle the matter amicably; but he is absolutely convinced that nothing but the complete crushing of the Turk would ensure a lasting peace.

It was persistently rumoured in Athens last night that the offensive had already commenced. The rumour was still afloat this morning, but so far official confirmation is lacking. It is generally believed, however, that the attack will be launched simultaneously with or immediately after the handing by the Government of the reply to the Allied Note. The long preparations on the Greek front are now quite complete, and the fourteen divisions of well-trained and admirably equipped troops are impatiently waiting for the order to advance. The presence of King Constantine in Smyrna has had a tremendous effect on the *moral* of the Army. His Majesty expressed the desire to be among his men when the fighting begins, and is expected to leave for the front to-morrow or on Sunday. Prince Andrew has been given command of the XIV. Division, and is also up the line.

Everything points to a bitter struggle for supremacy, and everybody here realises that if the Army fails in this last and greatest effort Smyrna is lost to Greece for ever.

### A Murderous Motor-car.

Motor car accidents are very regular occurrences in Athens and are mostly due to the reckless driving of the Greek chauffeurs, but the feats of a motor car narrated below have beaten all records of automobile frightfulness, and it is to be hoped that the perpetrator, when arrested, will be very severely dealt with by justice.

At 10 o'clock one evening last week a motor car going along Alexandra Boulevard at a tremendous speed ran over a barrel-organ player outside the Mourouzi Café. The unhappy musician was killed on the spot, but the driver, unheedful, continued his mad run. Two policemen who witnessed the accident immediately jumped into a motor car waiting near by and followed the first car, which was swiftly disappearing in the darkness of the night. The pursuit continued up to the end of Alexandra Boulevard with the second motor car rapidly gaining on its rival, while the two policemen were firing their revolvers to force it to stop. Just before reaching Patissia Street, a police sergeant attracted by the revolver shots, and noticing the two cars racing like maniacs, stepped into the roadway and ordered the first one to stop. But the driver, without the slightest hesitation, knocked down the sergeant, and, running over his body, the murderous car vanished in Patissia Street, the two policemen being obliged to abandon the chase in order to offer their assistance to the second victim.

It was ascertained on the following day that the car belonged to a well-known lawyer, but the driver, after driving same to its garage, disappeared, and has not so far been arrested.

## TURKEY.

CONSTANTINOPLE, July 1.

### A Dangerous Situation.

With the evacuation of Ismid by the Hellenes the road to Constantinople became open for the Kemalist forces. It is true that hitherto the neutral zone, as defined by the Allies, has been respected by the Kemalists, but a frontier that is not defended by an adequate force stands a poor chance of remaining intact when reasons of "military necessity" may be invoked by the commander of the stronger army. The Kemalists are said to have promised to respect the neutral line, but that promise has not been made to the Allies, nor has it been officially announced; and experience has shown that even the signed bond of the official representatives of the Angora Administration has very little value. Except for the British Navy, there is not the slightest obstacle to the advance of Kemalist forces to the Bosphorus at the present moment, and a more serious guarantee than an alleged promise on the part of the Angora Administration is required if the integrity of the neutral zone is to be respected.

What makes matters worse is the nature of the Kemalist propaganda campaign that has been carried out during the last six weeks or so under the very noses of the Allied authorities. Thousands of pamphlets have been circulated containing illustrations of Turks mutilated in the most barbarous manner, as alleged in the text, by Hellenic soldiers, and incitations to the Moslems of Stamboul to emulate the example of "the Arabs of Alexandria" in attacking the Greeks. The ostensible purpose of the propaganda in question is to

Digitized by Google

bring about a general boycott of Greek shops and merchants by Moslems, but the language employed to justify such proceeding is of a nature as to encourage more violent action. It is common knowledge that a Nationalist Committee exists in the capital, and that it has established centres in every quarter of Stamboul and the suburbs. There is little doubt here that each centre possesses a secret depot of arms and munitions, and that "fedai" have been recruited in sufficient numbers to keep the total forces of the Allies more than merely busy when the right moment comes. Now that there is an opportunity for bands to raid the suburbs on the Asiatic, and perhaps the European, side of the Bosphorus, "the right moment" seems to be drawing dangerously near. On the last occasion when Beykos was raided, security was only restored with the assistance of a strong Hellenic detachment. This time there will be no Hellenes to help. The belief that the Bosphorus will prove a sufficient obstacle to the activities of Kemalist bands on the European shore does not, perhaps, take into consideration the presence of numerous bands operating for some time past in the Belgrade Forest, and in the Chatalja area. Within a stone's-throw of the capital there are centres which form the bases for the lawless activities of Laze bands. These bands have hitherto been occupied with the transport of contraband war material from Constantinople to Angora, and the traffic has been pursued without the slightest interruption, despite the inter-Allied Control, but now that Ismid is taken, the Lazes may be utilised for more spectacular work. Quite recently a band leader named Rushdi was rounded up by a combined force of French and Turkish gendarmerie, but not before a fight; and there are others fully prepared to take Rushdi's place. The Central Government is now entirely subservient to the Angora Administration, and the faint show of independence made by certain Ministers and officials who have recently been replaced has been followed by an almost feverish eagerness to obey the slightest desires of the Kemalists. Thus practically the entire police and gendarmerie services are, so far as the Turks are concerned, now at the disposal of the Kemalists, and the Allied forces have been reduced to a mere skeleton.

**The Arrest of Russian Undesirables.**

It was perhaps some realisation of the circumstances described above that decided the British Military Authorities to effect a slight clearance among the more prominent undesirables of the numerous Bolshevist elements that have gradually installed themselves in the capital. Long before the arrival of the Kudesh mission a Bolshevist organisation existed in Constantinople; but after the arrival of the famous "Trade Delegation" that did anything but trade, the activities of the Bolshevists received a tremendous impetus. The fate of the tens of thousands of refugees from the Crimea has been such that the majority of those who are still in Constantinople would be unable to resist the temptation to join in the looting of fat Byzantine merchants if an opportunity were to occur; and there is every reason to believe that the Bolshevists were making it their business to create that opportunity. How far the Kemalists are a party to the scheme it is not easy to say, but in view of the fact that the Turko-Bolshevist Convention includes a clause concerning Constantinople and the Straits, it may reasonably be conjectured that the Kemalists were to play a certain not unimportant part.

The first effect of the operations was to arouse a certain amount of nervousness among the partisans of the Kemalists in the capital, but when it was realised that only Bolshevists were the object of the operations, feelings of relief mixed with irritation became general, except amongst the anti-Kemalists and Greeks. The total number arrested is not believed to exceed fifty, and of these some appear to have been arrested by mistake, and were subsequently released.

**Nationalist Policy.**

Much is being made in the European Press of a supposed division among the Nationalists into "Moderates" and "Extremists," and it is widely believed that Mustapha Kemal himself is prepared to come to a reasonable understanding with the Allies. If this is so, Mustapha Kemal has adopted strange methods of signifying his espousal of a "Moderate" policy. The official organ of his own special party, the *Hakimet-i-Millie*, has continued to publish the most violent diatribes against the British, even after the publication of the Allied offer of mediation. The same paper quite recently reproduced the same lying reports spread by the Germans during the war to the effect that British doctors in Egypt had deliberately blinded Turkish prisoners of war—a slander all the more foul by reason of its antiquity.

Neither are there the faintest grounds for the belief that the Nationalists have in any point, however insignificant, altered the political programme which has been published on innumerable occasions almost without even verbal variations. That programme includes not only the restitution of Thrace and Smyrna to Ottoman sovereignty, but also the abolition of the Capitulations and complete freedom from control in matters financial and military, to say nothing of the abandonment of Constantinople and the Straits by the Allies before the application of the peace terms, whatever they may be. It cannot be too strongly emphasised that these terms have been set forth in detail on numerous occasions by Mustapha Kemal Pasha himself, amidst the unanimous and enthusiastic approval of the Great National Assembly, and that there is not as yet the slightest ground for the belief that Mustapha Kemal has retreated from this position. It is said that the Nationalist leader is hostile to the Bolshevists, and that the latter are desirous of installing Enver in his place as being a more servile instrument—after the pattern of Narimanoff, of the Azerbaijan "Republic." That is, however, a personal rather than a political matter, and it may be safely affirmed that even if Mustapha Kemal desired to modify certain parts of the Nationalist programme, he dare not even make the attempt. He himself has raised the Frankenstein of Turkish fanaticism; he himself resuscitated the Unionist organisation in Anatolia; and to-day if he showed the slightest sign of wavering he would be hurled from his position as decisively as was Abdul Hamid for his weakness in connection with the Muersteg scheme for Macedonia. Because Mustapha Kemal loves power above all things, and because also he, unlike Abdul Hamid, is fully aware of the strength of the forces around him, he will not weaken.

There is only one way to settle the question of the possibility of an *entente* between the British and the Kemalists, and that is to leave the Smyrna and Thrace problems aside for the moment. The essential interests of the Allies are centred about the Straits, the control of Turkish finance, and the limitation of Turkish armaments. Let the Allies ascertain forthwith the minimum desiderata of the Kemalists in these vitally important matters first, and if an agreement is possible it will then be time enough to discuss the Smyrna and Thrace problem

## ALBANIA.

TIRANA, July 2.

**Albania and the League of Nations.**

The attention of all Albania has been focussed upon the League of Nations' sitting at Geneva. The Albanians had placed their faith on the League and had given the fortunes of their country into its hands: they had requested it to make their frontiers and the integrity of their land respected.

It was on June 25 that the Council of the Society, at a public sitting, heard the Albanian representative, then the Greek, and finally the Yugoslav. The Albanian delegate, Mgr. Fan Noli, after demonstrating that the Albanian frontiers were definitely fixed in 1913 by the Conference of Ambassadors in London, and by the Convention of Florence of the same year, went on to show how critical was the situation brought about by the Serbian occupation of almost a sixth part of the Albania of 1913. During last August and September, he said, the Serbians had destroyed 140 villages, forcing 40,000 people to leave their homes. Albania's difficulties had been increased by the presence of Greeks in a region east of the town of Kortcha (Koritza) and by the constant menace that they would

Digitized by Google

invade more Albanian territory. The Albanian representative concluded his remarks with an appeal to the League of Nations to make representations to the Governments of Belgrade and Athens to induce them to evacuate Albanian territory.

M. Frangoulis proved himself a skilful advocate, maintaining that the questions of Albanian independence and the Albanian frontiers had not yet been definitely settled, since the secret Treaty of London of 1915 envisaged the splitting-up of Albania, and the Peace Conference had several times considered proposals of the same character. He concluded by declaring that it was not the League of Nations, but the Conference of Ambassadors in Paris that was competent to decide regarding Albania—doubtless in order that the projects for the dismemberment of the country should be carried into effect! The Yugoslav delegate, M. Yovanovitch, wished to refute the Albanian complaints and to support his Greek colleague, but he added that in 1913 Yugoslavia was for Albania.

At the afternoon sitting, Mr. Fisher, the British representative, read the decision of the Council. According to this, the League of Nations did not deem itself incompetent to deal with the questions raised, but held that it could not consider them at the same time that they were under discussion by the Conference of Ambassadors in Paris. The Albanian delegate replied that he did not at all recognise the competence of the Conference of Ambassadors to make any change in the Albanian frontiers; it could only concern itself with the relations between the vanquished States and the victors. The Albanian delegate afterwards presented to the secretariat of the League a request that the Albanian demands should be brought before the Assembly General next September, and that the question should be reopened for discussion. The uneasiness of the Albanian delegation arises from the fear that the Ambassadors' Conference in studying the Albanian question would be guided by political considerations, while the League of Nations would deal with it objectively. In a word, it is feared that the Conference may go so far as to sacrifice Albanian territory to Albania's neighbours.

**Italo-Albanian Agreement.**

To prove that the integrity of Albania has been recognised by Italy, the Albanian delegation referred to Article 2 of the Tirana Protocol, signed on August 2, 1920, by the Italian Minister Plenipotentiary and Suleiman Bey Delvina, Albanian Prime Minister. This article runs: "The Italian Government, in order to give proof of its respect for the sovereignty of Albania over Valona and for the territorial integrity of Albania, will withdraw the troops now at Valona, on the coast and in the interior of Albania."

This Protocol of Tirana is a proof of the recognition of Albania's sovereign rights by Italy. Unfortunately it has not yet been published or notified to the League of Nations in virtue of Article 18 of the agreement, and the reason lies in the final article of the Protocol, which forbids the publication of the text without the permission of each contracting party.

**Feeling in Albania.**

The decision of the League has caused lively surprise in Albania. As to its frontiers, the country is not at all disposed to make the slightest change, and is, in fact, determined to oppose any change of the kind with all its forces.

## CYPRUS.

NICOSIA, June 14.

**Reply of the Colonial Secretary.**

The Acting Chief Secretary, by letter dated June 15, has conveyed the reply of the Secretary of State to the long memorial which, it may be remembered, was sent by the Greek Archbishop and leaders, endeavouring to throw the blame of the events of March 25 on the local government, and asking that a commission of inquiry might be sent to the island. The reply states that the Colonial Secretary is fully persuaded that the disturbances arose from the attempt to organise processions in defiance of Government orders, and that he is not disposed to appoint any such commission. It may be hoped that this letter will close, for a time at least, the chapter of events which the ill-advised action of the memorialists brought about.

**A Cyprus "Bible."**

It only remains to add that the leaders referred to, wishing to make the most of the late movement, have compiled a large volume which contains the "resolutions" passed in about 500 villages in favour of "union." It would be superfluous to say more on the subject and origin of these resolutions. The volume is to be sent to the Secretary of State and the Greek Government.

**General News.**

The Government Offices will move to Mount Tröodos towards the end of June.

A Turk named Izzet Mehmet, who for a year and a half has been undergoing a sentence of seven years for attempted murder, has murdered a fellow prisoner named Mustapha Hassan, who had passed ten years of a sentence of fifteen years. Crime is deplorably frequent. A young Turkish girl of about fifteen has been found dead near a village, after suffering a criminal assault.

Cases of conversion are rare. The Archbishop was recently informed that a Greek girl in the Famagusta district had eloped with a young Moslem and had adopted Islam. An inquiry is being made by the police.

Dr. T. Petsas, who was about to proceed to Paris for instruments, etc., as the mail steamer was leaving Larnaca for Limassol in the evening, fell into the sea, and in spite of all efforts to save him was drowned. He was a young man about to practise in the island.

## ASIA MINOR.

SMYRNA, June 26.

Major-General Marden, the G.O.C. Constantinople, has left Smyrna in H.M.S. Sepoy (Captain Abbay), for Constantinople, after visiting the Eskishehir front. He was accompanied by Major Johnston, *liaison* officer of the Greek forces. It is understood that General Marden and staff will afterwards proceed to the Broussa front. Both Greeks and Turks interpret this activity on the part of the British General as being the preliminary to intervention, in their respective favours, by Allied forces.

H.M.S. Tuscan (Captain Simson) is still in Smyrna.

The Smyrna British Consular Court has been reopened with Consul A. B. Geary as judge.

Mr. R de Candole has been appointed general manager of the Ottoman (Aidin) Railway Company, and is expected to arrive in Smyrna early next month. He has had considerable experience in railway organisation, having been general manager of the Buenos Aires Great Southern Railway Company.

## ANCIENT EGYPT'S LUXURIES.

The style and arrangement of houses containing kitchens, bake-ovens, open fireplaces, and bathrooms that were standing in Egypt about 1375 B.C. were described in an illustrated lecture on July 7 by Professor T. Eric Peet, of Liverpool University, at the Royal Society's Rooms, Burlington House. General Sir John Maxwell, who presided, laid stress on the importance of systematic excavation of such important sites as Tel-el-Amarna, where the work begun by the Germans before the war is being continued.

## A NEW PYRAMID THEORY.

Mr. D. Davidson, who collaborated with the late Dr. Aldersmith in his mathematical researches in Egyptology, told the British Israel Congress on July 8 of his intention of shortly publishing a book dealing with mathematical problems of the Great Pyramid, in which his deductions will be in direct conflict with eminent mathematical authorities and those connected with the British Museum. The unsolved problems of the Great Pyramid, declared Dr. Davidson, absolutely uphold and substantiated the chronology of the Old Testament, and gave a revelation of the Bible in terms of modern science and thought. Sceptics, who for generations had been seeking a sign, ought now to be satisfied.

SCHOOL OF ORIENTAL STUDIES.

# NEAR EAST BOOKSHELF.

I.—"A HISTORY OF PERSIA." By Brigadier-General Sir Percy Sykes, K.C.I.E., C.B., C.M.G.; with 14 maps and 193 illustrations. (London: Macmillan and Co., Ltd., 1921. £3 10s. net.)

II.—"MY TERM OFF." By Norman G. Brett James. (London: George Allen and Unwin, Ltd. 10s. 6d. net.)

## I.—PERSIA: PAST AND PRESENT.

The first attempt to trace the chequered annals of Persia was made in 1815 by Sir John Malcolm, whose work lacked scientific value owing to an entire absence of dates. Exactly a century later Sir Percy Sykes issued a history of Persia which enabled Western readers to view the sequence of events in the Middle East in due perspective, and realise the sweeping changes wrought by internecine war and foreign conquest during six millenniums. A second edition was called for the happenings of the last six years; and Sir Percy Sykes has supplied a public want by bringing his monumental history up to date. Persia occupies the western and largest portion of a tract which stretches between the valleys of the Tigris and the Indus. It is defined on three sides by a mountain barrier, and southwards by the Indian Ocean. The average elevation of this plateau is 4,000 feet above sea level; but it is broken by vast depressions which are uncultivable owing to the absence of water. Aridity is the outstanding feature in Persia's physical aspect. The annual rainfall recorded in four great cities is only 8.6 ins., comparing unfavourably with 39.5 over the British Isles and 27.6 in the district of Delhi. The Karun is its only navigable river, the others basing themselves in swamps or discharging into landlocked water. Buckle's unfinished "History of Civilisation" emphasised the influence of environment on history, and Sir Percy Sykes takes the same views with regard to Persia.

But for the high ranges, the whole plateau would be a desert; and conversely the size of the cities and the destiny of the population depend on the height and breadth of the range from which their water-supply is drawn (p. 9).

Persia has a variety of climates which it would be difficult to match elsewhere; and yet, taken as a whole, its atmosphere is delightfully invigorating. Given an adequate supply of water, every product of the temperate zone comes to perfection. Its mineral wealth passes calculation, and a petroliferous zone traverses the plateau from the Caspian to the Persian Gulf. But exploitation on a commercial scale has scarcely begun. Transit is hampered by vast deserts and mountain ranges; such traffic as exists is still carried on by pack-animals, and railways are in the womb of the future.

Organised society was born in riverine tracts whose soil is perpetually renewed by alluvial action. The Persian plateau, being virtually waterless, could not support a dense population; but it marches westwards with Mesopotamia, which is fertilised by the rivers Tigris, Euphrates and Karun. In prehistoric ages their delta was occupied by two warring races, the first known as Sumerian, the second of Semitic descent. In their habitat arose the Kingdoms of Sumer, Akkad, and Elam, which attained a high degree of civilisation. Sir Percy writes:—

All nations that have passed away must be tested at the bar of history by their deeds, and Sumer can face the ordeal without fear. The most important achievements of this great race which have come down the ages as a legacy to mankind are the invention of cuneiform writing—one of the greatest triumphs of the ancient world—and the code of laws on which that of Hammurabi (2123-2081 B.C.) was based. Nor is our indebtedness confined to these two great boons. We owe the beginnings of art and science to this hoary civilisation. The more the mists that hang over the past are lifted, the more clearly shall we discern how astronomy, medicine, and art were learnt by the Greeks from this ancient land. . . . Indeed, it is profoundly impressive to follow the archæologist deeper and deeper into the past of Sumer, and to find in the fourth millennium B.C. organised communities enjoying a civilisation which was even then clearly old (p. 71).

By dint of Semitic conquest, Sumer and Akkad were incorporated in the Babylonian Empire, which was conquered in its turn by Assyria in 732 B.C.; while Elam retained its independence until 645.

The destinies of our race are profoundly affected by changes in the physical environment and the tendency of population to outstrip the supply of food. The globe's surface is known to rise and fall almost rhythmically. Continents subside into the ocean, and, conversely, fertile tracts are rendered uninhabitable by desiccation. During the second millennium B.C., Central Asia was inhabited by a race of shepherds and cattle-breeders, who styled themselves "Aryans"—"Illustrious." Driven from their lush pastures by a gradual uprising of the soil, which dried up the rivers and severed the Caspian from the Polar Sea, they poured over Europe, the Middle East, and India in successive swarms. The newcomers were highly mobile, well organised for battle, and possessed a latent genius for the arts of peace. The branch which settled in Persia gave its name to the whole plateau, and to this day the inhabitants speak of their country as "Iran"—*the* Aryan land. The earlier immigrants worshipped nature-powers, and their belief was strongly tinged with animism. In the 7th century B.C., a creed took shape in Persia which ranks as a civilising power with Christianity and Mohammedanism. Its prophet was Zoroaster, whom Sir Percy Sykes believes to have been a historical personage. He spiritualised Aryan Mytus, and evolved a deity whose sublimity approaches that of Isaiah's God. "It was Zoroaster," he writes:—

who preached the Aryan belief in the immortality of the soul, and whose message of hope has surely come from the remote past along the whispering-gallery of time, and has influenced this twentieth century in which we live, both directly and indirectly. According to his teaching man, in the eternal combat between Good and Evil, is free to take his choice; is supported by the good spirits and assailed by the evil; but knows that, in the end, Good will triumph over Evil, just as the rain-cloud dispels drought. In my opinion it is difficult to improve on the tenets of this religion.

Man cannot live by bread alone: his higher nature craves for the stimulus of a militant religion. The history of the ancient world was thenceforth a struggle between the Aryans of the North and the Semites of the South, which ended in a victory for the Aryans, because they found inspiration in a pure and ennobling creed. A Medo-Persian Empire rose on the ruins of Assyria and Babylon. It came into collision with Hellas, which owed its brilliant rise to an infusion of Aryan blood. But Medo-Persian expansion westwards was checked by a temporary coalition of Greece's warring city states. Then the pendullum of conquest swung eastwards, and Persia was absorbed in "Alexander's far-flung empire." After his death it was conquered by the Parthians, a Scythian tribe which assimilated Aryan culture. Like the Ottoman Turks of a later age, they were valiant fighters, but destitute of administrative skill. So Parthia succumbed to the organised might of Rome. On its decline Persia regained independence, and flourished during three centuries under a native dynasty whose achievements are written large in history and legend. The Sassanian Kings rolled back the tide of Mongolian invasion, and withstood the decadent Roman Empire established at Constantinople. But hither-Asian soil was not fit for the good seed sown by Zoroaster. The realm which arose from his teachings went down before the fierce onslaught of Islam; and Iran became a province of the Khalifate. Such, in its barest outlines, is the story unfolded with masterly skill by Sir Percy Sykes. It is pregnant with lessons for an Empire far greater than those of Alexander and Noshirwan. On closing his first volume, one calls to mind the weighty words of a mid-Victorian writer:—

By exposing to our view the magnificent phantasma of great communities entombed and great conceptions buried with them, it weakens the too-prevalent temptation to overvalue ourselves and our age.

*(The second volume will be reviewed in an early number of* THE NEAR EAST.—ED.)

## II.—A SCHOOLMASTER'S TOUR.

Captain Brett James begins his book by telling us that after nine years of teaching and a year or two before the war he spent three months in travelling in the countries round the Mediterranean, and he proceeds to give a plain, straightforward account of his visits to many of the Italian towns, to Athens and Constantinople, to the Holy Land, and to Cairo. The book is written in the form of letters, and he sets down in detail his impressions of all that he sees. There is nothing very original in his comments. The historical facts that he mentions in connection with the places which he explores are such as any other tourist of an inquiring

TURKISH SELF-TAUGHT

mind and armed with a guide book would discover—his criticisms on art and architecture are not far reaching and are obviously not meant to be.

All through we feel the keen enjoyment of the traveller and the clear, quick understanding with which each new sight is grasped, and these facts, aided by his delightfully simple, well-balanced style of writing, make this unpretentious book of travel extremely pleasant to read. For those who have seen all that he described it will awaken pleasant memories without any desire to dispute and disagree, and those who have not seen will enjoy a tour with a companion who is always eagerly interested, often amusing and never dictatorial.

## PRESS ON THE NEAR EAST.

### The Egyptian Situation.

The *Manchester Guardian* of July 7 contains an article, written by an Egyptian Correspondent, on "Zaghloul Pasha and his Influence." It begins by relating how and whence Zaghloul Pasha has gained his power. But there are difficulties in his way—

A review of the situation, however, leads one to believe that Zaghloul may not possess all the trumps. The rabble are for any party which incites them to excesses, and their problem is mainly a police problem. A very strong section of the upper and thinking classes have enough political acumen to know that Egypt cannot wisely jump in one year, as Zaghloul would drive it to do, where the maturer races have arrived after three or more centuries of progressive experience. And they would like to see clearly whither they are going. The students, who have been allowed too much licence, will certainly prove a serious embarrasament to any future native Government, and there is a tendency all round, except among the leading Zaghloulites, to favour their repression. The recent Alexandria riots will probably prove to be not unconnected with Kemalist agents inciting the mob against the Greeks. The fellaheen, whose political knowledge is nil, but who suffered under the riots of 1919, and are, above all things, anxious about their future economic relations with their landlords—many of them extremely avaricious in the past—are not desirous of sudden change. And the principal Powers, whose peoples in Egypt constitute the bulk of the trading, technical, and professional classes, and who have important protective rights under the Capitulations which it is sought to abolish, will probably need much persuasion and adequate provision before they relinquish these rights. In the meantime, several of Zaghloul's principal adherents have been driven by his unreflecting extremism to support the farther-seeing policy of Adly Yeghen Pasha.

The writer continues with some comments upon the position of the Egyptian people:—

Well organised propaganda through committees and newspapers, with frequent demonstrations and the narrowing of the issue at each turn to one point easily understanded of the people, are the secrets of his public success. The Egyptian people in the meantime are generally as ignorant of the British and foreign point of view as can be. Many have only a very hazy and inadequate idea why the British are there at all They have no conception that the real problem for Egyptians does not exist now, but will arise after the projected change. They have little grasp of the ultimate problems of the country, of the questions of feeding a much-increased population, of the irrigation difficulty involved, of the larger army—even now unpopular—which must be maintained to protect the country against probable invaders, and the taxation which these and other necessary projects must bring. They do not understand that if the British were to quit the country their own peculiar dependence on foreign Powers for the financial and progressive elements of civilisation, and most of all their unique geographical position, would certainly involve them sooner or later in diplomatic trouble and its consequences to a small unwarlike race. The recent policy of training enough Egyptians to undertake the technical services of the State is yet in its infancy, and its results cannot be foreseen. The recent attempt to found a purely native bank has ended, as on previous occasions, in almost complete failure.

In the meantime modern Egypt, principally through foreign experts, enjoys the material benefit of European civilisation, and so thinks herself as good as the rest, without having yet shown any genius in adding to the common stock of knowledge or improvement of the common resources. Nor can she do so until she achieves such a measure of independence as is compatible with the limited political instincts, the pecular social development, and the geographical position of her people. Naturally, with the present lack of prevision, extravagant results are sometimes anticipated from so-called "complete independence." It is much as it was when the people of Turkey, after centuries of political ignorance and ineptitude, imagined that the Committee of Union and Progress would create a new heaven and a new earth by some new political magic; only to find in the sequel that the new trick was an old trick under a new name, which left them the sadder and the poorer. It is precisely the repetition of this calamity which those who love Egypt and know the delightful side of the Egyptian temperament—its humour, its courtesy, and its friendliness—must seek to avert. The establishment of a reasonable political settlement with England depends to a great extent on combating the insidious propaganda of the extreme Nationalists by finding some adequate means—which is not impossible—of putting the true facts of the case before the Egyptian people.

### Constantinople.

*The Times* of July 8 is very firm in its conviction that, in the present circumstances, Great Britain must not interfere between Greece and Turkey.

The position now is that if, after having refused the good offices of the Allies, the Greeks and the Turks will persist in fighting, their war is not our war. This must be said frankly in order that there should be no possibility of misunderstanding. And if the Greeks should lay to our charge an inconsistency between our present attitude and the encouragement the Allies at one time gave to their enterprise in Asia Minor, we can only remind them that we cannot have the same confidence in a Greece led by King Constantine as in a Greece led by our staunch and tried ally, M Venizelos. As far, then, as the conflict in Asia Minor is concerned, this country is and must remain neutral. Should the area of war extend to Constantinople or the Straits, where Great Britain has definite interests and obligations, the situation would be changed. So long as the Treaty of Sèvres remains unratified, or until it is replaced by some other agreement with regard to the status of Turkey, the responsibility for the protection of the Straits and of Constantinople, with its large and motley population, rests upon the Allies.

It then discusses the rather pusillanimous cry that Constantinople is in danger:—

The news now made public that, on the invitation of Mustapha Kemal, General Sir Charles Harington, the Commander-in-Chief of the Allied Forces at Constantinople, accompanied by Mr. Rattigan, the Acting British High Commissioner, is to meet the Nationalist leader at a Black Sea port to hear from him whatever proposals he may have to make, certainly shows that the Nationalists are not in the mood for an immediate advance on the Turkish capital. But, whatever the results of these conversations may be, we are convinced that there is little cause for alarm in regard to the safety of Constantinople. The forces at the disposal of the Allies should, in any case, be adequate for the defence of the city. At the same time, there can be no question of any offensive action on our part against the Kemalists. The only attitude of wisdom is one of resolute aloofness from the conflict in Asia Minor, combined with a readiness to exert our influence to bring about a satisfactory termination of a war that promises satisfaction to nobody concerned.

The social intercourse in the Y.M.C.A. at Alexandria, in Egypt, has done much to mitigate unrest. In a hut near the Square, where in May last machine-guns had to stop a riot, the *effendis* are fraternising with British troops, and over a hundred pay for the privileges which are free to the troops. A quite new spirit has been evoked by such social contact.

## MUSICAL NOTES.

### A Bulgarian Singer.

Madame Todorova, who gave a vocal recital at the Æolian Hall on July 11, is, as far as I know, the first artist Bulgaria has sent to us since the war, but I hope that others will soon follow. Generally speaking, a foreign artist is sure of a welcome in this country, but there is one thing that we do like them to bring with them, and that is some music of their own land. Now Mme. Todorova's programme was made up wholly of Russian, Italian, and French *arie*, and of Russian and Italian songs—things that were well-known by the average concert-goer in London. I personally wish she had sung some Bulgarian folk-songs, and she would have won rather than lost attention had she introduced some Bulgarian composers. She has a voice of unusual power and of wide range, in which, however, there are certain inequalities; and, what was perhaps her chief failing, there was a rather consistent inclination to sing out of tune. I should imagine that this faulty intonation is due to her habit of forcing, a habit in which there was no need to indulge, seeing the natural volume of her voice. Her group of Russian songs, of which Moussorgsky's "Hopak" was the best, was her most capable achievement, though she certainly infused a well-poised fervency into Meyerbeer's "Ah, Mon Fils." In Pergolesi's "Se tu M'Ami" there was not nearly enough lightness; I doubt, indeed, whether her voice (which, by the way, is more mezzo-soprano than contralto) is suited to such dainty, elastic stuff as this. If one may end on a word of honest advice to this singer, who has great charm of manner and many potentialities, it is this: That in London the inclusion in one's programme of songs such as Godard's "Viens avec nous petite Vivandière," or of any of Tosti's, goes against the singer. These things can be done, I believe, in places like the Albert Hall, but not in those halls that are primarily devoted to art.

It should be noted that Mr. Ivor Newton, who in the accompaniment of Russian songs is superb, was excellent at the pianoforte.

### Mlle. Marie-Antoinette Aussenac.

In the playing of this Spanish pianist there is great charm, intimate, superficial, and deep. There was enough of different styles at her recital at the Steinway Hall on July 8 severely to test her—Franck's "Prelude, Chorale and Fugue," Chopin's B minor sonata, and some slighter things by Fauré and Granados—and it was, taking all in all, a very fine evening's playing. Her perception of the Franck work was both delicate and reverent, though I think her indulgence of *rubato* in the Prelude and Chorale robbed the music a little of its stateliness. With her Chopin there was nothing wrong at all—her tone in the Largo was magnifient, and the Scherzo was as exquisitely done as ever I have heard it. Why she chose to play the tiresome "Eight Variations on a Popular Russian Air," I cannot guess, for not even in her hands could they sustain much interest; but they were more than compensated for by some perfect playing in Corlot's arrangement of Fauré's "Fileuse." That waywardness in the use of *rubato* which was noticeable in the Franck was indulged with a freedom that I myself did not care for in the Spanish dance in G major of Granados, but one dare not say of so fine an artist as Mlle. Aussenac that she is wrong, one can merely and very modestly disagree with her.

### The Chamber Music Players.

I know of no similar organisation in the world to equal the Chamber Music Players (Albert Sammons, violin, Lionel Tertis, viola, Felix Salmond, 'cello, and William Murdoch, pianoforte). All of them are universally admired as individual artists, and in a quartet they are as near perfection as may be. At the Wigmore Hall on July 4 I heard them only in the last movements of Chausson's Quartet in A major, and in Holbrook's Quartet in G minor, and though neither of these is consistently a great work, the playing of them was a rarely moving experience. The tone, the finish, the spirit—all were excellent; so beautiful was their *ensemble* indeed, that one was under the spell of the loveliness of their performance.

### A Youthful Pianist.

Miss Edna Iles, who gave a pianoforte recital at the Wigmore Hall on July 6, is a young artist of considerable technical achievements. Naturally her immaturity was less evident in a thing like Bax's "In a Vodka Shop" than in Liszt's Sonata in B minor, but even in the greater work there were an amount of boldness and an absence of affectation that won admiration. It is true that at present her pedalling is poor, and that she does not sufficiently realise the value of the inner parts, but her technique generally is quite facile enough for her to achieve much in time.

### An Italian Pianist.

I admire Busoni's pianoforte playing more than anyone else's in the world, but it was evident at the recital at the Wigmore Hall on July 8 of M. Franceso Ticciati, who is a pupil of Busoni, that the master's methods need perfection in their execution. Busoni can impose upon you a cold, clear outline of Chopin or of Schumann: M. Ticciati just fails to do this. For this recitalist's technique, though quite wonderful, is not infallible; his pedalling, though extremely efficient, does not play happily with huge masses of sound; and his cold, staccato manner does not always spring from the music. Liszt's Sonata was done admirably, but not overwhelmingly, so that its terrible purple patches were not obscured; Schumann's "Etudes Symphoniques" were gratefully cold in conception, but not architectural enough in design (the Finale, moreover, was badly played); while Chopin's Valse in A flat was a travesty, its nature being almost disregarded. But in spite of all these things there is much in M. Ticciati's intellectual playing that I immensely admire; he has a straightforward unaffectedness that was particularly engaging in Busoni's "Sonatina ad usum infantis," and in his "Turandots Frauengemach." Here what he felt himself was at one with what he had learned, and the result was a perfect interpretation.

ANDANTE.

## THE "NEAR EAST," LIMITED.

**In order that "The Near East" may be better able to enhance its usefulness in the wide sphere covered by it, and to keep pace with British interests in the Near and Middle East, it has been decided to increase the capital of the Company. The Near East, Limited, has, accordingly, gone into voluntary liquidation, and a new company has been formed under the same title to carry on the paper.**

## PERSONAL AND GENERAL.

**TO-DAY.**

July 14 (New Style).
July 1 (Old Style).
Julkada 8, 1339, A.H. of the Moslem Calendar.
Tamuz 8, 5681 of the Jewish Calendar.

The Serbian Prince Regent has arrived in Paris.

The Maharaja of Patiala left on July 8 for Paris.

M. C. Constantinesco, Secretary at the Roumanian Legation, left London last week for Italy. He will be absent several weeks.

Mr. B. W. Fagan, the son of Mr. P. J. Fagan, C.S.I., Financial Commissioner of the Punjab, has been taken into partnership by Mr. Edward Arnold, the well-known publisher.

The engagement is announced between Captain A. Russell Sienesi, M.C., 4th Gurkha Rifles, and Audrey Elisabeth, daughter of Mr. and Mrs. Edmund Candler, 8, Kensington Court Place, London.

The marriage arranged between Major D. O. W. Lamb, 10th Lancers, and Theana, only daughter of Mr. and Mrs. A. B. Stewart, Alipore Park, Calcutta, will take place on November 21, in Calcutta.

Sir George A. Touche, who resigned recently his position as a City Alderman, has presented to the Corporation for their art gallery at Guildhall Sir Edward Poynter's once-famous picture "Israel in Egypt."

A marriage has been arranged, and will shortly take place, between Lieut.-Colonel C. G. Woodhouse, Indian Army, and Mary, youngest daughter of Mrs. Murdoch and Robert Murdoch, deceased, of Broughty Ferry.

Field-Marshal Sir Henry Wilson has received from Gen. Gouraud, commanding the French Army in Syria and Cilicia, a message thanking him for his telegram of congratulation on the failure of the recent attempt on Gen. Gouraud's life.

A marriage has been arranged, and will take place at Bombay in October, between Captain C. H. H. V. Orr, I.A., attached 1/1 Brahmans, elder son of Mr. and Mrs. J. C. Orr, of Londonderry, Ireland, and Constance (Peggy), youngest daughter of Mr. and Mrs. J. C. Dick, of Seacombe, Parkstone.

Tuesday was the anniversary of the birth of King Peter Karageorgevitch. A reception was held at the Yugoslav Legation by the Minister, M. Gavrilovitch. Among those present was Major-General Sir John Hanbury-Williams, who conveyed the congratulations of King George V. A religious service was subsequently held at the Russian Church, Welbeck Street.

The King has ordered that General Lord Byng, the new Governor-General of Canada, shall be a Knight Grand Cross of the Order of St. Michael and St. George.

General Lyautey, who has arrived at Marrakesh, will proceed to Agadir, Tarudant, and the Sus region. The Sherifian military medal for Merit has been conferred on Glawi Basha, the Governor of Marrakesh.

General Blakeney, Director-General of State Railways and Telegraphs, and El Lewa Herbert Pasha, Director-General of the Egyptian Military School, have arrived at Marseilles from Alexandria on board the Sphinx, on their way to England.

The engagement is announced between Lieut. Philip George Brée, 66th Punjabis, and Olivia Mercy, younger daughter of the late Major-General Wauchope, of Flowerhill, Crieff, Perthshire, and of Mrs. Wauchope, Hill House, Saltwood, Kent.

A marriage has been arranged between Captain Cecil George Graves, M.C., the Royal Scots, son of Mr. and Mrs. Charles L. Graves, and Irene Helen, youngest daughter of the late H. W. J. Bagnell, I.C.S., and of Mrs. Bagnell, Oulton Lodge, Aylsham, Norfolk.

A marriage has been arranged, and will shortly take place, between Major Arthur Kenneth Norris, Indian Army, Royal Military College, Camberley, second son of the late A. J. Norris, of Banstead, and Elsie, youngest daughter of the late Colonel Robert Johnston, and widow of Captain E. Carlton Baker, Royal Engineers.

On July 11 the Egyptian Official Mission arrived in London. Its chief members are the Egyptian Prime Minister, H.E. Sir Adly Pasha Yeghen, K.C.M.G. (president), H.E. Sir Hussein Pasha Rushdi, G.C.M.G., H.E. Ismail Pasha Sidky, H.E. Mohammed Pasha Shafik, and H.E. Youssef Pasha Soliman. Experts on different matters and secretaries are accompanying the mission.

The engagement is announced of Major Cyril Alexander Murray, D.S.O., the King's Own Scottish Borderers, only son of Lieut.-Colonel Cyril Murray, C.B., M.V.O. (late Indian Army), and Mrs. Murray, 3, Artillery Mansions, S.W., and Marjorie Lilias, younger daughter of the late Dr. Jennings Milles, F.R.C.S., of Shanghai, and Mrs. Jennings Milles, 8, Nevern Road, S.W.

Last week, at a meeting of the City of London Corporation, it was unanimously resolved to confer the Freedom of the City on his Highness the Maharao of Cutch and the Hon. Srinivasa Sastri, India's representatives at the Imperial Conference. A similar compliment was paid to the Maharaja of Bikanir and Lord (then Sir Satyendra) Sinha when they attended the Conference in 1917.

A marriage has been arranged, and will take place early in August, between John Ford Sale, Indian Civil Service, only son of the late Colonel M. T. Sale, C.M.G., R.E., and of the late Mrs. Sale, of Staffa Lodge, Guildford, and Zara, youngest daughter of the late Herbert Clogstoun, C.S.I., Indian Civil Service, Madras, and of Mrs. Clogstoun, of 34, Trebovir Road, Earl's Court, S.W.

## APPOINTMENTS, ETC.

The Secretary of State for India in Council has appointed Mr. Pran Krishna Parija, B.Sc. (Calcutta), B.A. (Cantab.), to the Indian Educational Service, to be Professor of Botany at the Ravenshaw College, Cuttack.

It has been announced in the *London Gazette* that the dignity of a Knight Grand Cross of the Order of the Bath had been conferred on Admiral the Hon. Sir Stanley Cecil James Colville, G.C.M.G., G.C.V.O. It will be remembered that Admiral Colville, as a lieutenant and commander, saw much service in Egypt and the Sudan. In the latter rank he commanded the flotilla on the Nile during the advance of the Egyptian Army, under the late Earl Kitchener, on Dongola, being severely wounded. For this service he was promoted to captain and received the C.B. As a captain he served as Chief of Staff, Mediterranean.

## MRS. ALEC. TWEEDIE'S IMPRESSION SKETCHES.

The exhibition of impression sketches which Mrs. Alec. Tweedie held last week at the Alpine Club Gallery, Conduit Street, should have been of peculiar interest to readers of THE NEAR EAST, for the majority of the subjects were taken from Egypt, the Sudan, Syria, India, and Palestine. It was not really so much an exhibition of pictures as the publication of what the author called "impression sketches," made, she tells us in a curiously individual preface to her catalogue, with four brushes only. In this catalogue, after relating the difficulties under which her sketches were done, Mrs. Alec-Tweedie turns her intelligent and elliptical pen to politics, giving breezy vent to views which may or may not affect favourably the reception of her art. Having written seven pages which, for all their vivacity, cannot be called modest, she concludes: "After two years in Eastern lands I feel that Britishers made India and Egypt, so let us keep them; but let us leave all the other places to keep themselves."

Mrs. Alec. Tweedie's talent has enabled her always to retain the vividness of the scenes she has depicted, and her general management of colour is happily managed; what we do not always feel is the reality behind the impression. Curiously enough it is not in the Near Eastern subjects, which assuredly she knows as well as may be, that one feels her power most strongly; it is rather in a poetic visualisation like "Pallanza at Night" or in the realistic beauty of the "Hernani Wine Shop" that talent is merged in genius, that the impression of things seen becomes an interpretation of things experienced. Her work, as we have indicated, is unequal; consider, for instance, her somewhat unconvincing architecture with her boldly successful treatment of the sea. But in all her sketches there is undeniable interest, and this exhibition has once more proved the astonishing, perhaps unparalleled, versatility of Mrs. Alec. Tweedie.

## NEWS IN BRIEF.

A message received by the Foreign Office states that the Albanian Government has resigned.

Zaghloul Pasha's organ, *Al Nizam*, has been suspended for six months for having defamed the Sultan of Egypt.

A telegram from Bucharest states that the Roumanian Chamber passed the new Agrarian Reform Bill on July 9.

Writing from Sofia on July 7 a correspondent says:—"Another horribly cold spell is on us, and my office has the heating on this morning."

The British Danube flotilla will pay an official visit to Belgrade on July 19. Preparations are under way for a great Anglo-Serb celebration.

The preliminary report of the census of Malta and its dependencies shows, according to Reuter, that the population on April 24 last was 24,680.

Prince Aziz Hassan left Egypt on July 8 at the request of the military authorities, and other notables have been warned to moderate their political activities.

According to a Reuter telegram from Lisbon, a commission has been appointed to settle various questions outstanding between Portuguese India and British India.

The Smyrna correspondent of *The Times* reports the arrival there of the Queen of the Hellenes on July 7. Her Majesty intends to work in the military hospitals.

The Bulgarian Government has addressed a request to the Reparation Commission asking to be allowed to postpone payment of all sums on account of reparations for a period of three years.

According to information received in official quarters in London Serbian troops have occupied all the Gashi and Krasnitch country in Northern Albania, as far as the River Drin, and it is feared that they may even cross over into the Puka.

## HOT WEATHER DIPLOMACY.

The Turkish problem appeared to have taken a distinct turn for the better when it was announced that a meeting between General Harington, the British Commander-in-Chief in Constantinople, and Mustapha Kemal Pasha had been arranged. An inquiry, it was stated, had been received from the latter as to whether General Harington could meet him, and a reply was at once sent suggesting that the meeting should take place on board a British man-of-war at a Black Sea port. General Harington was to be accompanied by Mr. Rattigan, British Acting High Commissioner, and together they were prepared to listen to Mustapha Kemal Pasha's views, without actually entering into definite negotiations. A meeting of this nature would have proved a natural and excellent preliminary to an understanding between Great Britain and Nationalist Turkey. On receiving the British reply, Mustapha Kemal seems to have considered it necessary to make his position clear in writing, and sent a communication which has been variously described as unsatisfactory, as arrogant, and as misrepresenting facts. The Nationalist leader, taking up, no doubt, a phrase in the British Note, pointed out that the first suggestion had come from the British side, and went on to indicate the lines on which he would be prepared to make an agreement with Great Britain or the Allies. For reasons which are not apparent, the British Government is understood to have taken exception to the attempt to fasten upon it the responsibility for suggesting an exchange of views, and it has declared its inability to accept the terms set forth by Mustapha Kemal as a basis of the exchange of views. Accordingly the proposed meeting stands abandoned. It is difficult not to feel something akin to dismay over this mishandling of a favourable situation. The important thing was to get into personal touch with Mustapha Kemal, and it would have been entirely to the British Government's credit if it had made the first move. What actually happened was that a former officer in the British Army, still designated by his rank—Major Henry, D.S.O. —was visiting Anatolia on his own account, and was instructed by the British authorities in Constantinople to discuss with the Angora Government the subject of the British prisoners of war still held by them. Major Henry, and through him the British Government, gained the impression that the Angora authorities were anxious to effect a settlement and wished to lay their views before a British representative. The Angora Government, on its side, came to the conclusion that the British authorities were anxious to arrange a meeting with Mustapha Kemal. Whatever margin of error there was on either side or on both sides was a perfectly natural one, and was of no importance one way or the other. It is certainly unworthy of British diplomacy to "call off" the meeting on this paltry question. As for Mustapha Kemal's "conditions," it requires little imagination and even less knowledge of human nature to enable one to realise that the Nationalist leader's position is difficult. That a British Government with generations of experience of the Orient behind it should have allowed itself to be deterred from holding the meeting which both sides desire by a device that has been practised on the occasion of probably every single conference that has ever taken place must necessarily cause keen disappointment to those who are anxious for a speedy settlement of the Near Eastern question.

A strange obtuseness besets most of the discussions of the Turkish question. At the time of the Armistice the Allies had Turkey completely beaten and prepared to accept any terms. But not only did they refrain from imposing conditions of peace upon her; they also made it abundantly clear that they were at variance among themselves as to the terms that were to be imposed. Their vacillation paved the way for the Nationalist movement, and the treaty of peace was not finally drafted until Angora had become an important factor in the Near and Middle East. No better way of adding to its strength and consolidating its influence could have been found than that adopted by the Allies—the employment of Greece as the Allied mandatory in an attempt to bring the Nationalists to reason. The attempt failed; the completeness of the failure was recognised by the Allies, and as a result a Conference to be attended by Greeks and Turks was summoned to meet in London. Certain terms were presented for the acceptance of Greece and Turkey, tacitly admitting the justice of the Nationalist contention, but before either country could give them formal consideration, the war between the two was renewed. As is usual in such cases, each side blames the other. The Turks, it is alleged by the Greeks, were withdrawing troops from Cilicia, and in self-defence the Greek army had to resume the offensive; this version is, of course, repudiated by the Turks, who affect to regard the Greek resumption of hostilities as unprovoked. Whatever may be the rights of the matter, according to the Turkish point of view, the Greeks are the mandatories of the Allies, having occupied Smyrna in that capacity, and are at war with them. In these circumstances is it surprising that Nationalist Turkey should act *à la guerre comme à la guerre?* Its enemy is admittedly an implacable foe, and, with the Turks, belongs to a part of the world where war is not waged with kid gloves or according to drawing-room standards of seemly procedure. The Allies' protests of neutrality or academic aloofness, in view of the fact that Greece started the campaign on their behalf, are received with scepticism, and as the struggle continues—no doubt to the increasing embarrassment of the Turks—the latter are constrained to leave nothing undone, according to recognised war practice, that may prejudice the enemy. The anomalous position of Constantinople and the neutral zone protecting the Greek flank are bound to come under the notice of the Angora General Staff; but loud denunciations are heard of the wickedness of the Turk in not keeping one hand tied behind his back when he is being belaboured by the Allies' official executioner.

There is no need to labour the point; still less is it desirable to appear to justify Turkish intransigence. But we do urge a commonsense point of view, which will take into account the mistakes and anomalous acts of the Allies. The latter cannot have it both ways. Either they were right in regard to the Treaty of Sèvres, or they were wrong. If they were right, they spoiled their case by the London Conference; if they were wrong, they will not put themselves right until they remove the source of all the trouble, the pitting of the Greek Army against the Turks. Angora showed itself ready to send a delegation to London. It subsequently repudiated him, it is true; but it is only fair that this action should be viewed in the light of the renewed Greek offensive. An opportunity of negotiating direct with Mustapha Kemal Pasha has now presented itself. Is it to be rejected over a petty dispute as to who did not take the right step first? Our French and Italian Allies, it will be noted, took umbrage at the prospect of an official meeting between a British representative and Mustapha Kemal Pasha, and were careful to emphasise the fact that General Harington would represent Great Britain only and not the Allied Powers. Who will say that this superfluous *caveat* may not also have influenced Mustapha Kemal in the tenour of his reply to the British Note? In any case, we are confident that the British public looks for a speedy settlement of the Turkish *impasse*, and will view with displeasure a mere diplomatic indulgence in riding off at a tangent from the main issue, which is an agreement with Nationalist Turkey. Nor is the same public likely to take as seriously as our authorities Mustapha Kemal Pasha's attempts "to keep his tail up" as long as possible.

# SIR MURDOCH MACDONALD.

## AN UNCONVENTIONAL PORTRAIT.

(From a Correspondent in Cairo.)

It would be incorrect to say that Cairo will miss MacDonald; he was more often in his office than in Society; but he will be missed by Egypt, or rather something will be missed that represented MacDonald. People will find the official world a little less easy to get on with; and he will be particularly missed by a number of Egyptians. I suppose that works, whenever they start again, will get on pretty well, but they are not so likely to get on by leaps and bounds, which was MacDonald's incorrigible way. And, if one only knew, the State archives will sparkle a good deal less for want of his notes and letters, which were often little masterpieces of common sense.

He was one of the rare business men in the Government; he could always be trusted to make a good bargain, though official red tape gave him less freedom to use this talent than he would have had in private business. His touch is firm but very light. I was present at an interview once, during the war, between a group of officials, who had got into their heads that they were being "had" by the contractor for a certain work, and the contractor, who felt that he was being treated with a suspicion he did not deserve. Relations were strained, and MacDonald, who was running out the roads and light railway lines east of the Canal towards the Turks, was called in to see what he could do. He heard what the officials had to say, and then turned to the contractor. "These gentlemen," he said, "want more information about your prices. They are afraid you may not be allowing yourself a sufficient profit." The rest was easy. I heard him say to an acquaintance of his in business: "Well, I suppose you've made your fortune out of this war." "I might have done," was the answer, "if I hadn't met you."

He is very fond of a balance-sheet. Those annual statements of accounts from clubs, churches and charities which many of us throw into the waste-paper basket with their wrappers untorn, always attract his eye, and are given a rapid but critical perusal. One of the dependencies of the Ministry of Public Works is the Cairo Opera House, built by the Khedive Ismail to celebrate the opening of the Suez Canal. Soon after he became Adviser, MacDonald was taken round to see the theatre, which has a very interesting musical library and an enormous wardrobe. Among other curiosities they pointed out sundry old accounts for frocks and frills for long-since-disappeared dancers. To the astonishment of the custodian, who no doubt supposed his visitor to be viewing the documents with suitable feelings regarding the fleeting nature of human beauty, he pulled a pencil out of his pocket and corrected a figure in one of the additions.

Before returning to London he has left behind him the striking outline of a new north-east quarter for Cairo, and the land is already being levelled and the streets laid out. The chief thoroughfare joins the El Hakim and Barkuk Mosques, and is specially planned to give full views of these fine monuments. Other roads are designed with vistas of the Citadel and one with a dropping view of the Pyramids. Is it too much to hope that no orderly official will arise to spoil the splendid irregularity of MacDonald's plan? I believe he has left it in excellent hands at present.

The building of the Menufia Main Regulator in seven months in 1910 was, for its kind and size, the quickest piece of work ever seen in Egypt, and its completion before the flood prevented a disaster. Esna Barrage was built under his control, and he was on the Aswan Dam from the beginning. His chief personal contribution to the Dam was its apron, or protective work. Sir Benjamin Baker was particularly pleased with this, and I am told the masonry has remarkably justified his opinion.

MacDonald is the author of the inscription on the Aswan Dam:—

"This Dam was designed and built
by British Engineers.
Egyptians, assisted by Greeks,
excavated to the rock foundation
and built the rubble masonry.
Skilled Italian workmen
dressed and built the granite ashlar."

This is as plain and durable as the dam itself.

# CONCERNING KURDISH ETIQUETTE.

(From a Correspondent.)

The following notes have been compiled in the hope that they may assist the prospective traveller, whether he be bent on business or pleasure, over the thorny path of etiquette in a country where the "politeness of princes" is the very essence of its language and customs. The average educated Englishman is, I think, a naturally shy man, in that he has an inherent dread of committing a "bêtise" by word or by action; and to this is due the fact that he is, generally speaking, slower at picking up a foreign language than other people. He hates to be thought an ignoramus or impolite, and this often leads to a certain brusqueness of manner which is as often misinterpreted as rudeness. The writer has unpleasant memories of occasions when, through ignorance, he broke one or other of the rules of etiquette, and it is in the hope that others may be spared similar memories that these notes are penned.

On arriving at a Kurdish village, or encampment, you can usually take it for granted that you are a welcome guest, and without further ado enter the tent, or house, of the headman. An Englishman may safely give the usual Mohammedan salutation of "Salaam aleikum," to which the host replies with the customary "Aleikum es salaam." In Kurdistan, Christians and Jews, instead of "Salaam aleikum," say "Good morning" or "Good afternoon"—in Kurdish "Subaita bekhair" and "Aiwareta bekhair"—to which the host replies, "Qowi bekhair salamat." The host then invites the guests to be seated, using the formula "Karam beka."

In most Oriental rooms the seating accommodation consists of cushions or divans laid on the floor around the sides of the room; and in sitting down you must do so tailor-wise, and not with your feet towards your hosts. If, however, the tightness of your riding boots or any physical disability makes this a form of torture, you must apologise by some such expression as "Please excuse my Farangi habits."

When seated, look towards the various people in order of precedence, raise the right hand level with the face, and say "Marhabba"; the reply to which is, "Marhabba mizhta minata" ("I am much obliged to you").

Cigarettes will now be produced and coffee, which it is impolite to refuse. No invitation will be extended to "stay and take pot luck," because it is taken for granted that you, as guest, are invited and that the best the house can provide will be prepared for your delectation. The interval of waiting while the feast is prepared is frequently long and trying, but cigarettes and more coffee fill in the period. Before the meal is served, and again afterwards, a basin, serviette, and possibly soap, will be brought to you as you sit cross-legged, and a second servant will pour water over your hands from a lordly ewer. When all have washed their hands, the meal will be served. In all probability a large brass tray will be set in the midst containing the first course of a steaming pile of rice, and a dish of eggs fried in butter. Opposite each guest will be placed an enormous "Chuppattie," folded like a serviette. As guest, it will be your "honour" to start the round by breaking a piece off your chuppattie and dipping it in the dish of eggs; but, above all, don't eat with your left hand. Course will follow course with appalling frequency, but each must be sampled, despite a probable feeling of intense repletion after about the third.

When you wish to take your leave, say to your host: "Be khatir āwā," or for an important personage. "Be kimm mat āwā." The host replies, using one of the following three formulas:—(1) "Be khair hātī" (Persian "Kosh madid"). (2) "Sar sara hati." (3) "Sārā chaw hātī."

A more elaborate and ceremonious dialogue, on parting, is as follows:—

Guest: "Izn ā min beda az bechim" ("With your permission, I will be off").

Host: "Av rū suba nacha" ("Don't go to-day, or even to-morrow").

Guest: "Ishā min gelleka az gellek mamnān zhé 't'ā' busy").

Host: "Ishtaghfar ul illah min ché kirrīa tū zhe min minaté dagirri" ("God forbid, what have I done that you should be obliged to me?").

Guest: "Be khatir awa" ("Good-bye").

Host: "Be khair hātī" ("Your coming was auspicious").

If your host has entertained you to a considerable extent, and you wish to express your thanks warmly, use the following formula: "Az zhé wa gellek mamnūn būm. Hawa gellek ajiat haisha" ("I am very much indebted to you. I am afraid I have put you to great inconvenience").

Digitized by Google

Having once left the tent or house of the headman, it is not etiquette to return to it without an invitation. A request should be prefaced with "Karam beka" ("Have the goodness to"). For "thank you," use "Tashakar dakum." In most cases, however, it is sufficient to raise the head in token of recognition. The response to "Tashakur dakum" is "Be khair hati." Educated Kurds, however, often say "Ishtaghfar ul illah."

When you are paid a return visit, welcome your guest with "Be khair hati." "Sar sara hati" and "Sara chaw hāti" are used for very big personages, or by inferiors to superiors. The guest replies: "Khudé zhé ta rāzi bit az gellek zhe ta mamnūnam" ("May God bless you; I am much obliged to you").

It should always be remembered that the senior by precedence takes the initiative in all matters of ceremonial and greeting.

# THE NEAR EAST IN PARLIAMENT

## HOUSE OF COMMONS.

*July* 4.—Mr. Chamberlain informed Mr. Ormsby-Gore that General Franks proceeded to Ismid with representatives of France, Italy, the United States, and the Turkish Red Crescent on June 28. He reported that the situation there is quiet, and the discipline of the Kemalist troops who entered the town on the morning of the 28th good.

Mr. Chamberlain informed Mr. Aubrey Herbert that, contrary to rumours, the Greeks had not closed the Dardanelles to shipping.

*July* 5.—Mr. Wise asked the Chancellor of the Exchequer whether gold had been transferred from Vienna to London on account of the Ottoman Debt; if so, what debt this gold goes against. Sir Robert Horne replied that under Article 210 of the Treaty of St. Germain the Austrian Government has to deliver for safe custody to such authority as the principal Allied and Associated Powers may designate, the sum in gold deposited in the Austro-Hungarian Bank in the name of the Council of the Administration of the Ottoman Public Debt as security for the first issue of Turkish Government currency notes. The gold in question is being transferred to London. It will not be credited to the Reparation Commission.

Mr. Fisher informed Lord Robert Cecil that at the recent meeting of the Council of the League of Nations at Geneva, which sat from June 17 to June 28, the Council was invited by Albania to send out a Commission of Enquiry for the purpose of examining certain alleged grievances against the Greeks and the Yugoslavs, arising in point of fact out of the unsettled state of the Albanian frontiers. The Council decided to inform the Albanian delegate that, as the Council of Ambassadors was already deliberating at Paris on the question of the frontiers of Albania, it was hardly possible for the Council of the League to embark upon an identical enquiry at this moment. At the same time the Albanians were informed that the Council would carefully watch the development of the question, and all three parties were strongly urged to abstain from any hostile or provocative acts pending a decision by the Council of Ambassadors. The Albanian Delegate declared his intention of laying the case of Albania before the Assembly of the League at its meeting next September.

*July* 6.—Mr. Harmsworth informed Colonel Wedgwood that on June 29 the Commander-in-Chief in Constantinople arrested fifty-two undesirable persons, of whom eighteen belonged to the Russian Trade Delegation. Of these eighteen persons, nine were released on the same day and nine deported. He understands that the offices of the Trade Delegation were searched, but has received no particulars as to how the contents of those offices were disposed of. General Sir C. Harington's action was necessitated by the discovery of a plot to produce a revolution in Constantinople, which was to begin with his own assassination. The Commander-in-Chief is responsible for the maintenance of order and the administration of martial law in Constantinople, and the measures taken by him in this case seem to be entirely justifiable. A note was received yesterday from M. Krassin in which he asks for an explanation of the case, and the reply is under consideration.

Mr. Harmsworth informed Sir Charles Yate that the disbandment of the South Persia Rifles had now been decided upon owing to the refusal of the Persian Government to take the force over, and British trade and interests would have no further guarantees in Southern Persia than they now have in the North. H.M. Government are at present considering the question of what is to become of the guns, stores, animals, etc., supplied by the Indian Government, and the arrangements for securing the safety of the British officers and men attached to the force.

Mr. Montagu informed Major Glyn that the sanctioned estimate for the new Imperial capital at Delhi stands at present at 9 crores 28 lakhs, but that a revised estimate is under preparation, which is expected to amount to 12 crores 92 lakhs. The actual expenditure up to March 31, 1921, was 4 crores 33 lakhs. None of the Government offices had, so far as he was aware, been completed yet. The earliest date at which it is expected that the work on the new city, including the Viceregal residence and the secretariat buildings, will be completed is 1926.

Mr. Chamberlain informed Mr. Aubrey Herbert that so far from wishing to exclude Bulgaria from an economic access to the Ægean, the principal Allied Powers elaborated a special Treaty guaranteeing this outlet to Bulgaria. He added, however, that the Black Sea ports of Bulgaria were more suitable, and have always been more extensively used than others for the export of Bulgarian produce.

*July* 7.—Commander Kenworthy asked the Prime Minister whether the full text of the Greek reply to recent Allied representations had been received, and what steps were being taken to end the hostilities between Greece and Turkey or to limit their scope and area. The Prime Minister replied that the Greek reply just received was of a simply negative character, and did not in itself call for immediate further action on the part of H.M. Government. While for the moment no further steps seemed open to H.M. Government to end or circumscribe hostilities, no opportunity of doing so would be overlooked.

Questioned by Mr. Shaw, Mr. Chamberlain stated that the British Mediterranean Fleet was about to visit Constantinople in the ordinary course. No fresh instructions had been issued by the Admiralty, and he had no reason to anticipate hostilities.

## SOFIA AND ANGORA.

The Bulgarian Legation in London has sent us the following official denial which it received on July 7 from the Bulgarian Foreign Office:—

Insinuations and rumours are still being circulated regarding the Bulgarian Mission supposed to have been deputed to Mustapha Kemal, the relations between Bulgaria and the Soviet Government of Russia and Kemal Pasha, the arrival at Varna of a Bolshevist Mission, the alleged visit of certain Bulgarian statesmen to the ex-King Ferdinand, and the sale in the streets of Sofia of photographs of Mustapha Kemal.

We are authorised to deny in the most formal and categorical manner all those entirely false statements, spread in order to discredit the Bulgarian Government before European public opinion and the Governments of the Allied Powers. We do not exclude the possibility that certain Bulgarians travelling as private individuals may have crossed to Asia Minor from Constantinople.

The Bulgarian Government, firmly resolved to maintain the most strict neutrality in the conflict between Greece and Turkey, has never entrusted to any delegate whatsoever a mission to Angora, such as the one alluded to above. In view of the critical position of the Bulgarian nationals living in Russia under Soviet rule, the Bulgarian Government had the intention of sending a delegate there for the purpose of obtaining some alleviations of their distress. But owing to all the above insinuations, the Bulgarian Government did not put this into execution.

## NOTES AND NEWS.

Devonshire Square,
London, E.C.2.

***Bulgarian Reparations.***

A report is current to the effect that the Bulgarian Government has applied to the Allies to be allowed to postpone the payment of reparations of any kind for a period of three years. In view of the fact that the leva has still further depreciated until the pound sterling was worth towards the end of last week 460 levas, it would not be surprising if the report were true, as at this rate of exchange foreign payments must become almost out of the question. It is evident, however, that the Allies will not feel justified in acceding to the Bulgarian request without further inquiry into the collapse of the leva. There is a strong feeling in Bulgaria itself that recent legislation is at the root of the trouble, because people with money have been seized with a feverish anxiety to get as much as they can out of the country before it is entirely confiscated. M. Stambolisky, it is to be feared, is experiencing the disadvantage of having the brains of the country in political opposition to him. The retention of a Coalition Government would have helped towards the bulk of the parties pulling together in the interests of the State, and Bulgaria might have been spared the amateur mistakes or worse of such a body as the Consortium.

***Britain and Oil.***

The British position with regard to oil is ably expounded in the memorandum sent by the Secretary of State for Foreign Affairs to Washington and issued last week in the form of a White Paper. The salient portions of the memorandum are reproduced elsewhere, and it is therefore unnecessary for me to deal with them in detail here. The memorandum owes its being to the fact that the attitude of Great Britain in respect of oil supplies has been the subject of grave misunderstanding in America in connection with the mandate for Mesopotamia. We need not enquire too closely into the fundamental causes of the misconception. The fact remains, however, that the idea gained wide prevalence that this country aimed at an oil monopoly. The absurdity of such a notion on the part of a country whose production of oil amounts to something like 80 per cent. of the world's supplies scarcely needs emphasis, but when individuals or a nation have an *idée fixe* it is difficult to persuade them to be logical, and the view that an island country, whose supremacy had been built up on coal, might very naturally be expected to show more than a little concern about its supplies of the world's future fuel, does not appear to have entered into America's consideration. The memorandum will, it may be hoped, have had the effect of showing the position from another angle. The oil areas within the Empire are the subject of detailed comment, and it is shown that our oil production is limited, and that further there is no ground for the belief that there is any general policy of the exclusion of foreigners, which disposes of one of the principal American grievances. We have set up no definite barriers in the British Empire in regard to the exploitation of oilfields, and it is only natural that we should expect to be allowed to play our part in developments elsewhere. As the memorandum aptly states in conclusion, "It is becoming increasingly obvious . . . that there is ample scope for the activity and enterprise of all nations in searching for and bringing into use the world's stores of petroleum as yet undiscovered."

***Burmah Oil Prospects.***

The annual meeting of the Burmah Oil Company, which will be found elsewhere in this issue, was once again rendered notable by an exhaustive review of the oil industry by the chairman, Sir J. T. Cargill. The most important part of his speech was that in which he dealt with the future of the company. As usual he was exceedingly cautious, while admitting that he was no pessimist as far as the company was concerned. He pointed out that there was one extremely favourable feature in the current year, the termination of the excess profits duty, but he expressed astonishment to find how many people had jumped to the conclusion that supposing the company's net profits for 1921 were the same as for 1920 the whole sum would be saved to the company, and he pointed out that it would be subject to the deduction of 6s. income-tax and 1s. corporation tax, equal to £630,000, so that the net saving would be £1,170,000. Against this he explained there would have to be placed the reduction in profits through the fall in the prices of petrol, paraffin wax, and candles, the fall in the Indian exchange, and higher working costs. "How far the one will go against the other," he added, "it is impossible for me to attempt to forecast at present, but I feel that we can with every confidence look forward both to satisfactory trading results for the current year and to the future of the company for many years to come."

***Phœnix Oil Progress.***

Mr. Edward Manville, M.P., chairman of the Phœnix Oil and Transport Company, has recently visited the company's properties in Roumania, and his report, which will be found in another column in this issue, is calculated to give the shareholders justifiable satisfaction, for from what he says it is evident that the company is making excellent progress with the work of development. Mr. Manville, who pays a notable tribute to the company's staff, expresses himself as greatly impressed with the prospects. The progress made may be judged from the fact that of the twenty-three wells that were plugged during the war, fourteen have been freed, and the production from them has already been practically doubled. The work of restoring the others is proceeding, and ten new wells are to be finished this year, while the refinery at Ploesti has been rebuilt and other developments are taking place.

***Bank of British West Afr ca.***

Despite the trade depression, which has been particularly severe in the area covered by the Bank of British West Africa, the report of the bank records a further advance during the past year. The net profit amounted to £139,803, as compared with £125,147 for 1920 and £83,767 for 1919, and the available balance is £170,180, as against £147,827. Of this amount the interim dividend of 4 per cent. absorbed £32,000, and it is proposed to utilise a further £48,000 in a final distribution of 4 per cent., making 8 per cent. for the year. This compares with 10 per cent. for the previous year, but the present dividend will be paid on a capital increased by £400,000 by the issue of shares to the London County, Westminster and Parr's Bank, the National Provincial and Union Bank, and the Standard Bank of South Africa. £20,000 has been utilised for the payment of the stamp duty on the new capital, £20,000 is allocated to the premises account and the bank's insurance fund, and the carry-forward is £50,180, as against £30,377. In the circumstances the report should give the shareholders every cause for satisfaction, suggesting as it does the promise of great achievements in favourable conditions.

***Banking at Constantinople.***

An interesting development at Constantinople has been the establishment of a Bankers' Clearing House, which was opened for business early this month. The lack of facilities afforded by such an institution has always been a serious handicap to the banks in the Turkish capital, and developments resulting from the war have naturally increased the disadvantage of having to convey large sums, mainly in the form of small notes, through the streets. The Imperial Ottoman Bank has, I understand, taken a leading part in the scheme, and as a temporary arrangement has provided office accommodation for the Clearing House.

(REPORTS FROM OUR OWN CORRESPONDENTS.)

## GREECE.

ATHENS, June 25.

**Shortage of Machinery and Motors.**

The requirements of the Greek market for machinery and agricultural implements are very great to-day, and will increase considerably with the conclusion of the war in Asia Minor, which has deprived the country of so much labour required for cultivation of the lands.

New Greece, and particularly Thrace, is in great need of agricultural implements such as ploughs, reapers, threshing machines, etc. Up to the present the farmers in these regions have been using instruments of a very old type, and it goes without saying that many thousand implements of a modern type will be required when the war is over and the waste lands in Macedonia and Thrace are about to be cultivated. Greece is also in need of incubators. A small number of these were imported into this country six months ago and distributed to various farmers in the provinces, but a good many more are now required.

The Greek market also offers a great opening for large motor-cars or omnibuses. In view of the lack of means of communication in some of the provinces, the demand for these cars and for motor lorries is very great. The lack of motor lorries is particularly felt in the island of Crete, which, although a very important centre of production, nevertheless lacks railways to transport its produce.

The importation of machinery, implements, etc., into Greece has diminished considerably lately, owing to the unfavourable exchange. There is no doubt, however, that there will soon be some good openings in this country for British firms, and manufacturers should therefore lose no time and spare no efforts to secure orders before the Germans renew their pre-war activities and capture the greater part of the business.

**General News.**

A decree has also been published recognising the establishment of a Greek Chamber of Commerce in Paris.

A royal decree has been published ratifying the commercial and navigation treaty concluded between Greece and the United States of America in October, 1920.

According to a telegram received from the Greek Chamber of Commerce in Alexandria, the unsold stocks of Greek tobacco in that town amount to 57,000 bales.

At the adjudication for 34,000 tons of wheat which took place recently at the Ministry of Supplies, the lowest bidders were the firm of L. Dreyfus, of Paris, and the "Union Bulgare." The former will supply the Greek Government with 19,000 tons American wheat, Manitoba No. 2, at the price of 7 dollars 41 cents c.i.f. any Greek port, or 7 dollars 51 cents c.i.f. any two Greek ports. The "Union Bulgare" has secured an order for 15,000 tons of Bulgarian wheat at the price of 82 French francs per 100 kilos c.i.f. any Greek port, or 82.75 francs c.i.f. any two Greek ports.

The Inter-Allied Commission in Paris has authorised Greece to take delivery of various pharmaceutical products which have been allotted to her by Germany against her share of the indemnity. These products are of a value of over five million drachmæ. The first instalment, representing 42 tons, of a value of 1,200,000 drachmæ, will be taken over by Greece immediately.

## ROUMANIA.

BUCHAREST, June 28.

**Miscellaneous.**

The privileges of the law for the protection of national industries have been extended to some of the industries in Transylvania.

The export tax for cattle from Transylvania has been reduced from 250 lei to 100 lei per head, plus a commission of 20 lei.

Ten locomotives and 40 tank cars of the 150 locomotives and a large number of oil-tank cars ordered in Germany by Roumania were despatched from the Rheinische Metalwaren Works, Dusseldorf, on the 14th inst.

The contract between the Roumanian Government and the Brutinel Group for the supply of locomotives has been cancelled on the proposal of M. Titulescu, the Minister of Finance.

The Cabinet has made arrangements for the recovery of all material taken by the Germans during the occupation. A special commission will start for Germany shortly for the identification and retransportation of same.

## CYPRUS.

NICOSIA, June 14.

**Torrential Rains.**

The first week in June was marked by a rainfall during several days which exceeded in quantity and violence anything that "the oldest inhabitant" can remember in a summer month. It has done very serious damage in the Nicosia and Morphou plains and throughout the island. The torrents swept away several bridges and parts of the railway, damaged roads, and interrupted traffic. Many sheep were killed, and a few persons lost their lives, while the water invaded village houses, carrying much property down the swollen streams. Many riverside gardens, with their summer produce, were destroyed, and much grain on the threshing-floors and in sheaves was lost. The total destruction will be very considerable.

In spite of heavy losses from late rains, the cereal harvest should be a good one. As regards carobs (locust beans) the prospect is exceptionally good, and should no abnormal heat prevail before mid-August the crop should be a very heavy one. Meanwhile, the general trade depression continues, with great want of money. The Government is considering the removal of restrictions on export of animals and various articles which cause much complaint.

**Irrigation Projects.**

In reply to a question by Irfan Bey in the Legislative Council as to whether fresh works for water storage were in contemplation, the Chief Secretary stated that arrangements were being made for a visit by Major W. M. Ellis—formerly Engineer-in-Chief in Madras—who will examine local conditions and report. He is expected to arrive at the end of August, and to remain six months, or more if necessary. He will examine the existing reservoirs, constructed by Mr. Medlicott (also from India), as provided for by Mr. J. Chamberlain when Colonial Secretary. The matter is, of course, one of the very greatest importance for Cyprus. The reservoirs referred to have not been a success, and when Professor Wyndham Dunstan reported on the question of cotton cultivation in Cyprus some years ago, he strongly advised that no future works should be carried out except under the very highest expert advice that could be obtained. There can be no doubt as to the wisdom of this advice, and the Government and Colonial Office will no doubt proceed with the greatest caution in the matter.

It must be confessed that the advice given by experts who have been invited to report on matters affecting island agriculture has not, as a rule, been wisely followed, chiefly, no doubt, owing to a policy of economy. But then the island was not, as it now is, a British possession.

---

It is estimated that the output of Naxos emery for 1921 will be 11,268 tons.

Burmah Oil.—The letters of allotment in respect of the Burmah Oil Company 8 per cent. preference issue have been posted.

The traffic receipts of the Egyptian Delta Light Railways for the week ended June 10 amounted to £E7,322; total for year, £E63,041. For the corresponding period of last year, receipts amounted to £E10,340 and £E80,239.

# BRITISH CONSULAR REPORTS.

## III.—TURKEY.

We give the following extracts from the report of Captain C H. Courthope-Munroe, Commercial Secretary to the British High Commission, Constantinople on the trade and economic conditions of Turkey in 1920 :—

Throughout the year 1919 trade in Turkey was in general booming, and very large fortunes were realised both by retailers and wholesalers. During the opening months of the year under review the repercussion on the world's markets for high prices ruling for commodities since the Armistice had not commenced, and trade for the first three months was brisk. Importers, encouraged by the previous year, increased their orders in proportion to their resources, and to the full limit of the normal capacity of absorption of this market, with the result that when the moment arrived to take delivery of their merchandise the traders, large and small, found difficulty in paying for their goods. In addition, early in the spring of 1920 General Denikin's defeat in Southern Russia had an adverse effect on commerce of all kinds. The meteoric victories of his successor, General Wrangel, did little to relieve the situation, and his eventual collapse removed all hope of a revival of trade in the near future. A great quantity of goods despatched to Turkey, although in the first place consigned to the Customs House in Constantinople, were in reality intended for transit to South Russia, and were only suitable for that market. The débâcle in this part of the world caused a very considerable congestion of goods in Constantinople, many of the wholesale houses became overstocked, and some of the banks who had advanced money on very small margin were also seriously inconvenienced. Apart from the legitimate trade of the regular importer, there were also very large speculative imports on the easiest of all markets, a steadily rising home market, by certain individuals of no special knowledge of the lines they were handling, and it was not an uncommon thing for a metal merchant to be offering silk textiles, or a textile firm to be offering paints or oils, and a gunsmith linoleum.

### Effect of Nationalist Rebellion.

The commercial situation became considerably worse during the month of May on the development of the Nationalist rebellion in Anatolia against the established Government. This party in March occupied practically the whole of the chief railway line of importance, *i.e.*, the Anatolian Railway, which runs from Haidar Pasha through the main towns in Anatolia into Syria, thus causing an almost complete breakdown of commerce with the interior. Shortly after this date the towns on the littoral of the Sea of Marmora and the Black Sea were occupied, either by brigand bands or regular forces of the rebels, and the export trade thence to Constantinople also ceased. In view of the high and rising prices of the commodities which prevailed in Europe during the earlier part of the year, the local effect of these conditions were not at first seriously felt. Although the local markets were closed, the commercial community hoped and believed that these conditions were only temporary. It was generally considered that peace could not be long delayed, and the reopening of the interior markets would immediately bring relief. On the other hand, in view of the continued rise in prices in Europe, stocks which had been purchased earlier showed a profit on the prices ruling in the places of origin.

During the summer months, owing to the stagnation of import trade, goods, more especially textiles, lying in Constantinople were in many cases re-exported to the United Kingdom. At the same time numerous orders from Manchester and elsewhere intended for the Constantinople market were cancelled. Egyptian firms during the summer months were sending agents to this market to purchase Manchester goods, which, although originally imported from the United Kingdom, were cheaper here than they could be bought in England at that time.

Peace became more and more uncertain as the year advanced, added to which prices at home, which attained their maximum in April, fell with increasing rapidity until by the autumn the present economic crisis in the world's markets was reached. In the early autumn there were still large quantities of goods of every kind stored in the Customs House and numerous other depots in Constantinople.

As a result of the political situation, during the greater part of the year, all commerce came to an end with Anatolia, with the exception of such districts as Ineboli, Adalia, and the Eastern frontier, where a certain restricted trade still goes on. Most of the larger firms in Constantinople, however, have ceased commercial transactions with the interior owing to the difficulties they have had to contend with. The Greek and Armenian shopkeeper to whom they were accustomed to consign their goods might possibly before their arrival be penniless or murdered. In addition, the villagers in the mountains, through fear of brigands, who infest the countryside, dare not come to the market towns to make their purchases.

During the month of August some of the ports on both sides of the Sea of Marmora, having been freed by the Greek Army from the Nationalists' régime, commenced trading with Constantinople. Very few exports, however, succeeded in reaching the capital either from Thrace or from the region of Anatolia occupied by the Greek troops, owing to the restriction placed on export by the Greek military authorities, on the grounds that all foodstuffs were needed for the provisioning of the Greek army.

A limited trade was taking place between the Crimea and Constantinople before the final defeat of General Wrangel's army, though it was always attended by serious risks. Merchants, however, as early as September were very chary in their dealings in this direction, and in November the complete defeat and the evacuation of the volunteer army took place. Numerous firms were seriously involved by this collapse, as they had large stocks awaiting sale, both in Sevastopol and other towns in the neighbourhood, which they were unable to evacuate, and which ultimately fell into the hands of the Bolshevists. They also possessed in many cases still larger stocks lying in the depots in Constantinople awaiting shipment for the Crimea. Many of these merchants suffered severe losses, which they have very little hope of ever recouping. The consequent result of both of the defeat of the volunteer army and the impossible position caused by the Nationalist army under Mustapha Kemal has been an almost complete cessation of trade in this part of the world.

The resisting power of the local merchant is very great, however. He is unwilling to admit defeat, or even to cut a loss. He simply puts off his creditors until such time as conditions return to normal. In this he is greatly assisted by local banking financial customs. Although the present crisis is very serious, it has not as yet been accompanied by many failures. The situation has been assisted to a considerable extent by the large profits made in the previous year, and it is generally claimed that though the commercial community find considerable difficulty in meeting their immediate engagements, the actual losses of the more serious firms at least would not in the event of immediate realisation exceed the profits made in 1919.

All exports from Turkey, practically speaking, have come to an end. Owing to the Nationalist's Government restrictions and the difficulties of transport, very small quantities of raw material ever reach Constantinople at all. The natural consequence is that in Anatolia large stocks of Turkish produce have gradually collected, and prices are very considerably lower in the interior than in the capital. Towards the end of the year certain small consignments filtered down to Smyrna and Constantinople, after paying taxes and enormous transport duties, but the results, from the economic point of view, are almost negligible. Imports have also considerably decreased, and, in fact, at the close of the period under review, beyond a certain irregular arrival of luxury goods, they are almost entirely confined to the necessary foodstuffs for Constantinople itself.

### The Fall in Prices.

The congestion which existed in the depots of the Customs House and also in the private warehouses which were opened in the late spring in order to compete with the heavy influx of imports then taking place, was by August considerably relieved. This was due partially, as mentioned above, to the fact that a certain trade during the summer did take place between Constantinople and the Crimea, and in part also to a certain amount of commerce which went on with Roumania and Bulgaria in spite of the unfavourable rate of exchange. At the same time home firms began to realise the commercial position in Turkey, and imports considerably diminished. Nevertheless, there are still remaining large stocks of non-luxury goods which were originally intended for the Anatolian market, and can find no sale here, except at "knock-out" prices. These consist more especially of Manchester goods of the cheaper class, and hardware, tea, cheap clothing, boots, certain chemicals, etc. It was announced that all goods that had remained in the Customs House unclaimed for more than one year and a day would be sold at public auction. The value of these was computed to exceed £T150,000.

At the close of the year, owing to the abnormal fall of prices at home, these stocks in many cases could be replaced in the United Kingdom very considerably cheaper. Consequently the owners find themselves in a fair way to suffer heavy losses. They are endeavouring, both by auctioning and selling in small retail lots, to unload their stocks at considerably below invoice prices in order to regain at least some of their capital. These stocks in Constantinople in December were estimated at a minimum of £5,000,000, although other and reliable authorities placed the figure as high as £12,000,000

Not only did the actual buyers suffer from this position, but in addition, many of the banks, more especially the Italian. Those banks who went in largely for speculative business made large loans earlier in the year, only allowing a very small margin in the event of the merchants not taking up their bills of lading. Owing to the change in the position, the merchants finally either could not or would not take delivery of many of their consignments. Consequently bales and bales of goods were left on the banks' hands, which, whether already auctioned or held for such disposal in the future, represent a considerably lower

sum than that which was originally advanced upon them, and the banks are the losers.

In this connection attention may be drawn to the many difficulties British merchants had to contend with. Owing to the unstable conditions of commerce many native firms have refused to take delivery of goods on their arrival. No civil court exists from which redress can be obtained, consequently in many cases the consignor has had to make the best of a bad job and either sell his goods at a loss or re-ship them elsewhere.

The financial situation in respect to commerce has throughout the year been most unsteady, and the extraordinary fluctuations in the exchange have had a most deteriorating effect on all commercial enterprises, since the merchants when placing an order, could never be sure that on the date of the arrival of their goods, the variations in the exchange would not only do away with any profit, but might even entail a serious loss. At the close of the year the whole outlook of commerce in Turkey is most discouraging. The position is one of serious crisis and large losses are occurring daily. The whole situation can only be ameliorated by the opening up of the interior and by the opening up of trade with South Russia.

**Competition.**

The United Kingdom has during the current year not only held her own, but has had a preponderating influence on trade with Turkey. At the same time serious competition is being felt. The heads of important enterprises in Turkey state frankly that they know very little of the industries of the United Kingdom and it is of the greatest importance to let them see for themselves.

One of the chief competitors that Great Britain has to contend with at the present day in Turkey is undoubtedly America. This competition in pre-war days was of little importance. The articles in which it is most felt are the following :—Cabots, boots, motor cars, soda ash, tinned fruit, coal, fats and greases, etc., etc. American commercial activity practically commenced in Turkey during the year 1911, when the American Chamber of Commerce for the Levant was organised, which has done a good deal for American trade; this Chamber has established branches in Greece, Bulgaria, Roumania, Smyrna, Mersina, and has representatives in all the principal towns of Turkey and the Levant. Since the Armistice, and especially during the last year, many well-known American corporations have established branches in Constantinople with a view to extending their trade in the Levant.

The next important competitor that Great Britain has to meet in the Orient is Italy. Italy has an enormous advantage in geographical position and, in addition, an efficient merchant fleet. The articles in which competition is most felt are the following :—Different kinds of cotton goods and flannelettes, motor cars, and to a certain extent yarns, also electric fittings and cinematograph films. Three large Italian banks are interested in Turkish trade and are established in Constantinople.

Owing to the definite ruling laid down in the clauses of the Armistice with Turkey, German trade was forced to come to a complete standstill until the resumption of peace, consequently competition as such has not existed during the last year. At the same time numerous consignments of goods of German origin have been received viâ neutral nations. This more particularly applies to electrical goods.

**Methods of Business.**

During the current year, owing to the abnormal situation, practically all credits have been suspended, and in the month of December, owing to the rapid depreciation of the Turkish pound, the banks, in order to try and stop speculation, called in all loans possible and forbade all forward exchange operations.

Credit to-day is practically unknown in Constantinople, and there are really only two systems of payment obtaining : (*a*) cash against documents, but since a number of firms have refused to take up documents, many exporters are requiring cash with order, or, (*b*) bankers' confirmed credits, *i.e.*, a credit opened by a banker in which a foreign merchant may draw bills upon the banker against shipments, the banker agreeing to accept the bills if they are drawn in accordance with the stipulation in the credit. The credit is usually for a period not exceeding six months. With regard to the more important English houses, they of course have their own private arrangements with their merchants abroad, but for any new business undertaken, even with well-known firms here, it is customary to open a bankers' confirmed credit. With the smaller firms business is only undertaken for cash against documents

**Turkish Commercial Activity.**

While the business enterprises of the Ottoman Empire are for the most part non-Turkish, being generally in the hands of Armenian, Greek, or Jewish subjects, if not altogether foreign, considerable efforts are being made in purely Turkish circles to awaken that element to the necessity of commercial and industrial activity. The movement is not altogether new, but it has been stimulated by the defeat of Turkey and the consequent clearer perception of the necessity of seeking for the future some form of livelihood other than military or political office-holding. Quite a number of ex-officers of the Turkish Army have already gone into business, and the tendency is capable of considerable and interesting developments. While Turks of this type are handicapped by inexperience they have a considerable asset in the solidarity and goodwill of their compatriots and the reputation which they possess, at least, locally, of being more straightforward and honest than certain of their competitors. It is worthy of note in this connection, as a point of some importance in studying certain phases of the markets of this country, that the better class Turk of to-day is much less Oriental in habits and dress than is sometimes realised abroad. In items of dress, furniture, and toilet articles, for instance, the Turks, both men and women, are purchasers, and discriminating purchasers, of identically the same sort of goods as are in demand among similar social elements in Britain and France, and it may be remarked that their tendency is to spend rather lavishly on dress and toilet accessories. Trade in the latter line, and especially in soaps and perfumes, is extraordinarily large, and British productions are distinctly popular though less conspicuous than could be desired considering the importance of the market and the enterprising competition of the French and other firms. Prior to the war the Germans were very active in this line, but their goods were never regarded as the best and they do not enjoy any really solid popularity among the class to whom quality is the chief consideration.

**The Outlook.**

With regard to the troubles in Anatolia and the prospect of an early pacification and opening up of that region, it is impossible to state, with any degree of assurance, more than that the desire for a settlement appears very general among all the elements concerned. Counting this guerilla fighting, Turkey has now endured fourteen years of nearly continuous war, the burdens of which have fallen more heavily upon Anatolia than any other portion of the Empire. It would seem that sheer economic necessity must, at no very distant date, enforce a truce upon political differences however bitter. In counting upon a collapse of Kemalism from sheer exhaustion of the country one must not forget that the Anatolian peasant is inured to poverty, brigandage, extortionate taxes and requisitions, all these evils having been more or less normally part of the life to which he and his forefathers were accustomed. Given internal peace, however, Turkey possesses resources that could enable her to make a fairly rapid recovery. Despite all the adverse circumstances of the moment, stagnation of business, overcrowding of the capital city, rebellion in Asia Minor, depreciation of the currency, and many uncertainties of a political character, the prospects of the ultimate future are good; the general situation, as compared with last year, is more encouraging.

---

Foreign traders, having realised that it is impossible to carry on trade in Georgia under the present Soviet administration, are reported to be leaving Batum, where the exchange is over 160,000 paper roubles to £1.

The Hon. Kenneth Mackay has been re-elected to a seat on the boards of the P. and O. and British India companies. He was a member of these boards before the war, but retired on joining the army.

Export without licence (except to Bulgaria and Albania) is now authorised from Greece for all European and local products, except combustibles of all kinds, including lignite, metals, and certain foodstuffs, etc. Goods in transit originally intended for other countries may be exported without special licence.

## COMPANY NOTICE.

### THE NEW EGYPTIAN COMPANY, LIMITED.

NOTICE TO HOLDERS of Share Warrants to Bearer.—Dividend of 3s. per Share, less Income-tax at 2s. in the £.

NOTICE IS HEREBY GIVEN that COUPON No. 10 will be PAID on and after the 8th day of July, 1921, at the rate of 3s. per share, less Income-tax at 2s. in the £.

The above Dividend is at the rate of 20 per cent. per annum for the year ended the 31st December, 1920. The proportion of such Dividend payable in respect of the period up to and including the 31st August, 1920, is free of Income-tax, and the deduction of Income-tax at the rate of 2s. in the £ covers Income-tax at the full rate on the proportion of such Dividend payable in respect of the remaining four months of the year. Coupons should be left at the Anglo-Egyptian Bank, 27, Clement's Lane, Lombard Street, E.C., to permit of three clear days for examination.

By Order of the Board

THOMAS DAY,

Pinners Hall, Austin Friars, E.C.2, Secretary in London.

6th July, 1921.

Forms for depositing coupons may be obtained at the offices of the Anglo-Egyptian Bank, Ltd.

# ENGINEERING TOPICS.

*By our Engineering Representative.*

## A 10-Seater Biplane.

One of the finest passenger-carrying machines yet designed and constructed is undoubtedly the new Bristol ten seater, full details of which have just been sent me by my friend Sir H. White Smith, managing director of the Bristol Aeroplane Company, whose work in connection with the development of aviation is hardly yet recognised at its true value. Few concerns have done so much towards perfecting the heavier-than-air machine, and the success attained has been largely due to the extraordinary ability of its presiding genius.

The new machine is a single-engined tractor biplane, having an enclosed cabin for eight passengers and an open cockpit for pilot and mechanic. I would take this opportunity of mentioning that the engine fitted is one of the famous Napier Lions, an engine which has consistently justified the high opinions held by its designer and manufacturers.

This highly efficient engine is mounted on a readily detachable mounting, which also carries the nose radiator and oil tank. Complete access to the engine can be obtained by releasing six self-locking fasteners, it being unnecessary to remove any part of the cowl from the machine. Electric starting is fitted, and the engine can also be started by hand-turning gear when on the ground.

The saloon is entered through a door aft of the lower plane, and seats six of the passengers facing forward in separate chairs, the other two facing the stern of the machine. The seats are of the collapsible type, and when folded project only five inches from the saloon sides, leaving the maximum amount of floor space should it be desired to use the plane for cargo-carrying.

Windows, which can be opened, are fitted the full length of both sides of the cabin, and heating is provided by means of hot air muffs round the exhaust pipes. Due provision has been made for any passenger who—although this is extremely unlikely, owing to the perfect balance of the machine—may be attacked by air sickness.

When it is desired to use the machine solely for the transport of cargo, the space available is 10 ft. 6 ins. in length, the height at the centre being 5 ft. 9 ins. and the width 4 ft.

It is satisfactory to note that ample room is provided for the pilot and mechanic, the cockpit, which is situated between the steel fire bulkhead and the front spar of the top plane, being of large size and permitting a clear and uninterrupted view. Below the pilot's cockpit is a compartment measuring 4 ft. 6 ins. in length by 4 ft. in width and 2 ft. 6 ins. in depth, which is accessible through a trap-door in the underside of the fuselage. This is primarily intended as a receptacle for passengers' luggage, but when the plane is used for commercial purposes it would be used as an extra cargo compartment.

The plane should have a sufficiently wide radius for any ordinary purpose, as the two main petrol tanks are of 50 gallons capacity each. These are slung under the bottom planes at the inner interplane struts. Petrol is drawn from either of these by means of two Vickers' centrifugal pumps coupled in series and delivered through a Vickers' hand pump to the carburettors, any surplus passing to a 10-gallon gravity tank and overflowing back to the particular main tank in use. I understand that Smith's capacity gauges for both main tanks are fitted on the instrument board.

The chassis is of the four-wheeled oleo-elastic type, with wheels in tandem, brakes being fitted to the rear wheels and operated by a car-type brake lever in the pilot's cockpit. A gate is provided for the brake lever, so that the brakes may be operated together or singly, as may be required to meet the landing conditions.

Elastic rings are used for suspension, and the elastic carriers have been designed in order to permit of the ready renewal of these rings as and when this becomes necessary. The oleo plungers are fitted with a special type of tapered needle valve to control the passage of the oil through the plunger to give constant oil pressure throughout the stroke of 8 ins.

## The "Electra" Engine.

One of the most noticeable features in connection with the development of the internal combustion engine has been the steady reduction of size and weight per horse-power given out. At one time gas or oil engines were bulky and cumbersome masses of machinery, running at comparatively slow speeds; to-day speeds have been increased almost beyond belief, with a consequent reduction in the bore and stroke necessary for a given power development. Even the Diesel engine of to-day, which runs at a slow speed compared with that attained by a motor-cycle engine, is much faster and far more compactly designed than its pre-war forerunners.

An opportunity recently afforded for examining one of the "Electra" engines, and for going through the specifications kindly sent by Messrs. Fredk. Sage and Co., Ltd., of 58, Gray's Inn Road, London, who are the sole export distributing agents. The firm make the bold statement that there is more sterling worth in one of these engines, and more satisfaction to be derived from its use, than in any engine manufactured in this or any other country. This is a very sweeping statement, but the firm appear convinced as to its truth, and add that in their opinion no engine, whether paraffin, petrol, or gas driven, can compete with the "Electra" in efficiency of working, economy of running, and freedom from breakdowns. They add that they have conclusive evidence from almost every quarter of the globe that these engines are giving daily the utmost satisfaction under all kinds of conditions and for all classes of work.

The materials used are certainly of the highest quality, and every part appears to have been machined and fitted within limits of great accuracy. The finish of the engine is also good, and, so far as I can judge, every part has an ample margin of strength, and the engine should give no trouble in use even when run by an unskilled attendant.

The engine is made in two sizes, the smaller of which is a four horse-power single-cylinder model, and the larger an eight horse-power twin. Both models are water-cooled, and the cylinders are of a uniform bore and stroke of 95 by 110 millimetres respectively. Taking the four horse-power model first, the speed is 1,000 revolutions per minute, and I should be inclined to say that at that speed rather more than the rated power would be given out. The Treasury rating, for example, would be 5.59 h.p. for an engine of that size. The approximate shipping weights are 260 lbs. unboxed and 350 boxed, the approximate shipping dimensions being 2 ft. 3 ins. by 2 ft. 3 ins. by 1 ft. 9 ins. The eight-h.p. model is similar, but of course rather larger, and runs at 900 r.p.m., the shipping weights, boxed, being 450 lbs., and unboxed 370 lbs. The approximate shipping dimensions in this case are 2 ft. 9 ins. by 2 ft. 9 ins. by 1 ft. 9 ins.

Coming to a more technical description of the engine, I may say that the cylinders are of close-grained cast iron with large-sized water jackets, and nickel-steel valves are fitted. The crankshaft is a one-piece drop stamping from high-grade steel, machined and balanced, and the connecting rods are of alloy steel of great strength and toughness. The crank case is of close-grained cast iron with ample space for oil, and the lubrication is by a positive drive pump delivering oil under pressure to all bearings. The camshaft is also of alloy steel and the timing wheels of cast iron with machine-cut teeth, and the engines are fitted with governors of the centrifugal type, completely enclosed, working direct on the carburettor throttle. The fuel consumption per horse-power hour is very low, and I may add that the engines can be supplied for running on either petroleum, paraffin, or coal or other gas.

## Air Progress.

In the three months from March 19, when their London-Paris service started under the Government subsidy, to date, the Handley Page Transport, Ltd., has completed one hundred flights. These flights have been made without any accident to passengers or pilots or damage to the machines or freight. Altogether about 23,000 miles have been flown and 812 passengers carried. The passage has been flown under all sorts of weather conditions—in rain storms, through cloudy weather, fogs and blizzards, and against gales of head winds. The freight and luggage carried have been of the most mixed variety, goods including furniture, machinery, on several occasions motor spares (which were urgently required), special food delicacies, and live stock.

Messrs. Handley Page report that the London-Paris trip is becoming more and more popular, that the demand for berths has increased, and that bookings are frequently in excess of the berths available. On some days an extra machine has had to be flown to accommodate the heavy bookings. It appears to be certain that the usefulness and convenience of the air crossing has become recognised by business and pleasure passengers, and is firmly established as a means of cross-Channel transport.

# OIL NOTES AND NEWS.

## Britain's Oil Policy.

A White Paper was issued last week containing a despatch dated April 21 from the Secretary of State for Foreign Affairs to the British Ambassador at Washington, enclosing a memorandum prepared by the Petroleum Department dealing with the general petroleum situation. We give the following extracts from the memorandum:—

"Statements have frequently appeared in the foreign Press during the past year to the effect that His Majesty's Government are co-operating with British commercial interests to secure an undue share of the petroleum resources of the world, and, while they are entirely without foundation, they may through constant repetition have obtained some credence.

"Great Britain is, next to the United States and (in normal times) Russia, the largest consumer of oil in the world. Over 90 per cent. of her navy is oil-fired (as compared with 45 per cent. before the war), as is a rapidly increasing proportion of her merchant marine. Her present home resources consist of one well giving a daily production of one ton, and Scottish shale fields which yield about 165,000 tons of oil products annually. In 1920 Great Britain imported about 3,368,600 tons of oil (motor spirit, kerosene, fuel oil, lubricants, etc.) of a total value of £67,000,000. Of this, 61 per cent. in quantity and 68 per cent. in value came from the United States, 37 per cent. in quantity and 30 per cent. in value from other foreign countries, and 2 per cent. in quantity and 2 per cent. in value from British possessions. During the war the annual imports of petroleum rose as high as 5,160,000 tons.

"The figures which have been quoted indicate that, although the consumption of Great Britain per head is only about one-sixth of that in the United States, her requirements are, nevertheless, very large, and are at present met almost wholly from foreign countries at an extremely high cost. Much has been written as to the so-called 'closed door' policy in the British Empire, but even if such a policy was in force it would surely not be difficult to find arguments in its favour in view of the very serious position of the British Empire as regards petroleum supplies. It is proposed, however, to deal with each part of the Empire in turn, stating also the position of Egypt, and to show what the charge as regards the 'closed door' really amounts to. At the same time, a brief note will be given of the production and prospects of each territory.

"*India.*—Prospecting or mining leases have been, in practice, granted only to British subjects or to companies controlled by British subjects. The production of petroleum in India is about 1,200,000 tons per annum, which is insufficient to meet the country's needs. Large quantities are imported from the United States, the Dutch East Indies, and, to an increasing extent, Persia.

"*Egypt.*—No nationality restrictions. Annual output 155,000 tons, produced by a single company, which discovered a valuable deposit in 1914. Several other firms have recently started prospecting operations.

"*Somaliland.*—No production. Prospecting is being carried out on behalf of Government. No nationality restrictions."

The memorandum goes on to state that the particulars given show the extremely small oil production of the British Empire, and the absence of any general policy of exclusion of foreigners.

"It will be seen," the memorandum continues, "that in the vast areas of territory where there are no restrictions no foreign country has taken the opportunity of exploring for oil except in the case of British North Borneo, whereas in Canada and Trinidad, where restrictions are in force, foreign capital has for many years past been actively at work both on its own account and by way of participation in British companies. It can therefore hardly be contended that the restrictions have imposed any serious disability on foreign enterprise. It has to be remembered that when such regulations were first introduced in India and elsewhere the oil situation was very different from that prevailing to-day. The problem was then not so much to find new sources of oil as to secure profitable markets for that already produced, and there was a real danger that oil-lands might be taken up by large oil companies and kept unworked so as to maintain prices.

"Apart from this consideration, however, it is evident that in regard to a 'closed door' policy no real parallel can fairly be drawn between the British Empire, with its small and scattered production, and a country like the United States, which at present produces two-thirds of the world's output within her home territory. With no nationality restrictions it would have been feasible for an isolated oilfield, such as Trinidad, to be taken up by German companies and worked with German personnel, with the result that on the outbreak of war the wells and plant might have been rendered useless and the supplies of oil from this source cut off for months. In the United States, on the other hand, the foreign holdings are bound to represent only a small proportion of the whole, and can be no source of danger. As a matter of fact, the foreign companies to which America has thrown her fields open are mostly registered in America, are staffed with Americans, and dispose of their production in America.

"Regulations were introduced last year in the Philippines restricting the exploitation of certain lands to citizens of the United States and of the Philippines. In this action, in almost her only detached territory, the United States appears to be adopting the very policy, and probably for the same reason, for which Great Britain has been so loudly condemned.

"In Mexico, United States companies control at least 80 per cent. of the production, while British commercial interests have a share in the remaining 20 per cent., which is largely Dutch controlled. As the growing production of Mexico, which increased from 3,750,000 tons in 1913 to 23,000,000 tons in 1920, is perhaps the predominating factor in the oil situation to-day, the strength of the United States' position will be apparent. Most of the Mexican production of crude oil is at present shipped to United States refineries.

"In Central and South America oil production is, except in Peru and the Argentine, still in the initial stages, the only other countries where commercial supplies have been found being Venezuela and Colombia. No evidence can be adduced from any of these countries of any attempt at British domination. If British-Dutch interests have considerable holdings in Venezuela, American companies are at least equally prominent in Colombia, while in Peru, where the oil industry was established by British enterprise and was at one time almost entirely in British hands, the control of all producing companies but one has passed to the Standard Oil Company.

"Among the criticisms levelled against this country is that of having secured a monopoly in Persia. It should hardly be necessary to say that the rights of the Anglo-Persian Oil Company in Persia have no connection whatever with the British Government holding in the company, but are mainly derived from a concession which was obtained through the personal enterprise of Mr. W. K. D'Arcy in 1901, and for which it was equally open to any other individual, British or foreign, to apply. It was only after heavy expenditure and much discouragement that success was achieved, to the great advantage of Persia, and the suggestion that British Government influence was used to force a monopoly on an unwilling country can only be made through complete ignorance of the facts. The British Government did not acquire its present holding in the Anglo-Persian Company for thirteen years after the concession was obtained by Mr. D'Arcy, and it does not interfere with the company's commercial policy in any way.

"Little need be said of the other fields in which British interests are represented. In Galicia, where they were never very important, they have been reduced since the Armistice, while British firms have been temporarily driven from South Russia. In Roumania a one-eighth share in an ex-enemy company has been acquired by a British group, but the British share in the oil industry of that country is not more important than the American, French, or Dutch. The whole question of Mesopotamia, which has been fully dealt with in correspondence with the United States Government, need not be referred to here beyond saying that while there is no intention of discriminating against non-British interests, account must be taken of legitimate rights acquired before the war, and this applies equally to Palestine, where American claims are understood to exist.

"In conclusion, it can only be repeated that, although it is hoped that British interests will take an increasing share in the development of the world's oil resources, any suggestion that British domination is intended or possible is entirely unfounded. It has been frequently alleged that Great Britain has secured control of half the petroleum deposits of the world, but statements of this kind are based on entirely inadequate data and are mere conjectures. The United States has, through her unique natural resources, been able to develop a vast industry with great organisations, whose experience, wealth, and energy make it certain that her present overwhelming lead in oil production will be retained for many generations to come. Apart from her home deposits (of which fresh discoveries continue to throw doubt on pessimistic forecasts of early exhaustion), the United States is already taking the chief share in the development of the Mexican oilfields, and is certain to play a leading part in opening up those of Central and South America, as well as of other countries. It is becoming increasingly obvious, however, that there is ample scope for the activity and enterprise of all nations in searching for and bringing into use the world's stores of petroleum as yet undiscovered."

## Phœnix Oil.

Mr. Edward Manville, M.P., chairman of the Phœnix Oil and Transport Company, has recently returned from a visit to Roumania, and has made a report on the company's operations. He states that he is entirely satisfied with the whole administrative and executive organisation in Roumania, and Captain T. S. Masterson, director and general manager, is to be heartily congratulated on his choice of employees, all of whom seem to be working unselfishly and with keen interest in the company's welfare. The report continues:—

"There is much to be done in the early stages of a company such as ours, especially after the disorganisation caused by the German occupation: destroyed records have to be re-established; leases (of which there are over 2,000) have to be reviewed and, where necessary, renewed; stores and materials have to be traced and inventoried; all this, in addition to the new work commenced since our company took over the management, and Captain Masterson's own untiring efforts are reflected in the keenness displayed by the whole staff; also the extensive office organisation is equally efficient under the guidance of our commercial manager, Mr. W. H. W. Lacey.

"All the new materials ordered by this company (including about 100,000 ft. of oil-well casing) and four complete rotary drilling outfits have some time since arrived on the property, and, in addition, the allied companies possess a great quantity of plant and materials, including rigs, pumps, storage tanks, pipe-lines, and gas engines—the latter rendering the company at many of its wells independent of the inadequate electrical supply, which has recently handicapped so many of the companies operating in Roumania. The plant and materials in hand should supply the company's requirements for the next eighteen months if the present programme is adhered to.

**Exceptional Progress Made.**

"I think it may justly be said that the company, in the short period of its existence, has made exceptional progress with its field operations. Captain Masterson's great experience of the Roumanian oilfields has enabled him confidently to set out a very extensive drilling programme. It will be remembered that he took a very active part, in conjunction with our colleague, Lieut.-Colonel Sir John Norton Griffiths, M.P., in destroying the wells prior to the German occupation in 1916, and doubtless the knowledge thus acquired is now serving him to good purpose, for no fewer than fourteen of the twenty-three plugged wells have already been freed, and the remaining nine are now in process of unplugging. The production from these old wells, mentioned in the prospectus, has already been practically doubled, and it will regularly and materially increase as the remainder are unplugged.

"The company's programme for this year, as agreed between Captain Masterson and the company's consulting engineers, Messrs. A. Beeby Thompson and Partners, includes the completing of ten new wells, and excellent progress in this direction is being made. Among these the No. 1 well at Moreni is drilled to a depth of over 2,500 ft. and should reach the oil sands very shortly. Well No. 5 in the same district is down over 1,000 ft. No. 1 well at Runcu is down 1,500 ft., and has only a further 350 ft. to go to reach the oil sands. No. 5 well at Baicoi is down 1,200 ft., and operations will be restarted there almost immediately, while No. 2 at Chiciura is down 1,300 ft., and has only 600 ft. to go to reach the oil sands.

"The company's refinery at Ploesti has been completely rebuilt, with considerable additional storage and other improvements, and is now about ready for operations; arrangements are also being made to provide our own siding in a convenient position on the railway." Mr. Manville states, in conclusion, that he is perfectly satisfied with the whole organisation and progress of the company, which is all that, under the circumstances, could be expected.

---

The annual general meeting of the Bank of Roumania will be held on July 27 at Winchester House, Old Broad Street, E.C.2.

The half-yearly general meeting of the Smyrna-Aidin Railway will be held on September 30 at Winchester House, Old Broad Street, E.C.2.

The gross receipts of the Egyptian Delta Light Railways for the year ended March 31 were £496,084, against £406,696, and working expenses £355,241, as compared with £257,683. The balance carried to net revenue account is £140,842, which, with interest and dividends earned, £21,002, and £93,273 brought forward, makes £255,118. The board recommends a dividend of 5½ per cent. on the preference shares for the year, carrying forward £95,283. Meeting, Winchester House, E.C., July 28, 12.30 p.m.

## SUDAN NOTES

(From Our Own Correspondent.)

Khartoum, June 22.

Upper Nile Province.—The first steamer of the season, the S.G.S. Hafir, reached Nasser on May 24, the main river having risen at Malakal from M.9.82 to M.10.34. The total rainfall at Malakal for last May was 50.7 millimetres, as compared with 198 millimetres in the same month last year, resulting in very considerable progress being made in regard to new buildings.

Telegraphic reports from Gambeila under date June 17 state that the road has now been cut through to the Sako River, which still has to be bridged.

Kassala Province.—Very satisfactory progress is reported as regards the irrigation projects, the culverts on the Khatmia road having been completed. Bridges are in course of construction on the Suakin road and also at Wad Sherifai.

Kordofan Province.—Reports to hand state that the rainfall during the first half of June has been good, and that cultivation has now commenced throughout the province.

## BANK OF BRITISH WEST AFRICA.

The report of the Bank of British West Africa for the year ended March 31 shows, after providing for current charges (including contribution to staff profit-sharing fund), rebate on bills, and bad and doubtful debts, a net profit of £139,803, plus £30,377 brought forward. The directors recommend a final dividend of 4 per cent., making 8 per cent., less tax; £20,000 has been applied to payment of stamp duty upon new capital, £15,000 to writing down premises and furniture, and £5,000 added to bank's insurance fund; £50,180 carried forward. During the year the authorised capital has been increased to £4,000,000 by the creation of 200,000 new shares, of which have been issued: 33,333 to the London County Westminster and Parr's Bank, 33,333 to the National Provincial and Union Bank of England, and 33,334 to the Standard Bank of South Africa. The premium upon the issue price of these shares has been added to the reserve fund. Mr. R. E. Dickinson, Sir Frederick Eley, Mr. F. A. Johnston, and Mr. R. Hugh Tennant have joined the board. Meeting, Cannon Street Hotel, E.C., July 14, noon.

# COMPANY MEETINGS.

## BURMAH OIL COMPANY.

### Record of Unbroken Prosperity.

### Colossal Nature of Operations.

The annual general meeting of the Burmah Oil Company, Limited, was held on July 7, in Glasgow.

Sir John T. Cargill, Bart. (the chairman) presided.

The Chairman said: In these difficult and trying times when after a period of exceptional but undoubtedly in many ways artificial prosperity the swing of the pendulum has come with a vengeance, and in a very large number of cases shareholders are faced with much reduced dividends, and in many cases none at all, I feel it is a great privilege to be in the happy position of submitting to you a statement of accounts which marks another record—both as regards the total profits and the dividend proposed—in the company's long history of unbroken prosperity.

**Increased Gross Profit.**

The total gross profit shows an increase of £236,682 9s. 7d. on the 1919 record one of £4,654,793 19s. 10d., and, though the rate of dividend is only 30 per cent., as against 50 per cent. for 1919, the reduction on the rate is, of course, due to the capitalisation of reserves carried through last year, and the amount of the Ordinary dividend proposed to be paid is actually £1,543,050, as against £1,428,750 for 1919. Personally I look on this as, under all the circumstances, a most gratifying result of the year's operations, and I feel sure that the great majority of the shareholders will agree with me in this view. Looking to the exceptionally large amount—£1,291,000—placed to general reserve in 1919, and subsequently capitalised, I am just afraid that in some quarters there has been a certain amount of disappointment that more profit was not available for dividend purposes in 1920, but those of you who were present at the last annual meeting, or who read my speech afterwards, will no doubt remember the warnings I then gave as to the very heavy way in which our profits were bound to be hit by increasing taxation and increased working costs—especially in connection with our largely extended and much more expensive fields operations—and I suggested you should adopt my own attitude of what I called reasoned and reasonable optimism and not pitch your expectations on too high a basis and so run the risk of disappointment. As against the £1,291,000 placed to general reserve in 1919 we have placed £195,000 for the year 1920 in the accounts now before you, a difference of £1,096,000, and a comparison of the accounts for these two years will show you that the total taxation for 1920 appearing in these accounts, allowing £1,800,000 for Excess Profits duty and £135,000 for Corporation Profits tax, shows an increase of no less than £581,760 15s. 8d., as compared with 1919, while the amount written off the fields account in 1920 is £598,066 8s. up, as compared with 1919, so that the increases under these two heads almost account for the difference on the amount placed to general reserve and the increase of £236,682 9s. 7d. on the gross profit.

**Increased Taxation and Working Costs.**

As regards taxation, I told you last year that we roughly estimated the increase at £750,000, figuring on the same profit as for 1919, and taking into account the amount we pay for taxation in India, which does not appear in the accounts before you, and the refund of income tax we are receiving under the Boustead decision, our estimate has proved to be very near the mark. As regards the fields account, it was quite impossible for me at that time to even hazard an estimate of what the increase was likely to amount to, but no less than three times in my speech I emphasised, as I had done on several occasions before, the great increase working costs were going to show for several years to come owing to the enormously enhanced cost of drilling and all material; the very much deeper wells we are having to sink, especially in the Yenangyoung field; our largely extended drilling and testing operations necessitating the employment of a greatly increased staff and the general all-round increase on salaries and wages. It was really only in 1920 that all those factors began to take material effect, for as I told you at several past annual meetings we were fortunate in having bought ahead at pre-war prices very large quantities of pipe and drilling materials, and these cheap purchases pretty well covered our requirements until the end of 1919. Now the pipe and materials we are working on cost anything from three to six times what our pre-war supplies did. And in addition, as I told you in July, 1918, we have been using large quantities of secondhand pipe drawn from abandoned wells, and this, of course, kept our drilling costs much lower than they otherwise would have been. These supplies are now practically at an end, and this has also tended to unduly emphasise the rise in fields expenditure.

**700 Producing Wells.**

No one who has not seen—as I did during the course of my tour in Burma last winter—the extent and nature of the operations covered by what we call our fields account, can really have the slightest idea of what I think I can truthfully describe as the colossal nature of these operations, but the following comparatively few details will, I think, help you to grasp the position and realise why the expenditure involved under to-day's conditions is so great. Our American staff, responsible only for actual drilling and production work, numbers now fully 100, and we have about 100 strings of tools constantly working—many of them day and night—drilling wells. We have something like 700 wells actually completed and producing oil, all of which require more or less constant attention, and many of our wells have now to be drilled to well over 3,000 ft. Out of a total number directly employed in the company's service in Burma and India of some 35,000 we have, roughly speaking, between 13,000 and 14,000 Europeans, Americans, Indians, and Burmans on our oil fields operations alone, including a highly trained geological staff of 10, which is constantly engaged in searching for and examining likely oil-bearing land and advising on operations in the proved fields. Between Burma, Assam, and the Punjab we are either actually engaged on, or on the point of starting up, some nine tests in outside areas, mainly in outlying districts requiring heavy expenditure in road making, laying of water lines, and provision of accommodation for drillers and employees generally. We have always devoted a fair proportion of our profits to this exploratory and testing work because your directors have recognised that it is in the interest of the company and of the oil industry of Burma and India that we should do so. After all, crude oil is the life blood and very existence of the company, and I am sure you will all agree that no stone must be left unturned in order to try and discover fresh sources of supply, particularly in Burma and India, where the company both holds such a commanding position in the market and possesses all the transport, refining, and marketing organisation required to deal with a large production of crude oil.

**Assam Interests.**

It is because of this position and in this direction that, after careful geological examination of the properties of the Assam Oil Company, Limited, your directors, towards the end of 1920, decided to make their offer to the shareholders of that company to acquire their shares at £2 each for cash or in exchange for shares in your company, in the proportions of nine Assam Oil Company for two Burmah Oil Company shares. As you are aware, this offer was made conditional on at least 75 per cent. of the Assam Oil Company shares being thus offered to us, and this proportion and more being forthcoming the transaction was duly completed. Since then we have acquired further shares of the company for cash on a much lower basis than our original offer, and we now hold over 90 per cent. of the Assam Oil Company's capital. Although these properties may not be capable of very greatly increased production or yield wells of great calibre, our geologists advise us that the possibly productive area is greater than had been previously imagined, and that satisfactory, steady, and lengthened production can safely be looked for even only from the already proved areas.

At Badarpur, in Lower Assam, our developments have been fairly satisfactory during the past year, and give promise, if not of a big field, at any rate of paying production.

As mentioned in the report, in my speech at the recent extraordinary meeting of the company, and in the prospectus of the recent issue of Preference shares, our production from our proved Burma fields and their production potentialities for the future continue satisfactory.

We have not been fortunate to strike oil in any of our outside tests either in Burma or in India during the year, but as already mentioned, this policy of exploitation for oil is being energetically continued in every area of reasonable geological promise, and no effort is being spared within justifiably speculative limits to prove or disprove by the drill—the only real if expensive solution—whether these carefully selected geologically promising areas actually contain oil in commercial quantities. I say commercial advisedly because, as I have previously had reason to point out, not every oil show, or even oil well, means a commercially exploitable oil field, and this less so than ever, at least at the moment, when there has been such a heavy fall in the value of crude oils and a temporary overplus in the world's production.

**The Accounts.**

I will now run through the accounts, and refer briefly to the items calling for special comment. I have already referred fully to the large amount written off the fields account. You will observe that £112,413 1s. 9d. is added to the £100,000 at which this account stood in the last balance-sheet. This represents purely capital expenditure on buildings and machinery—as separate from the drilling and other expenses incurred in the production of crude oil, which we will continue to write off annually in the future as we have done in the past—and ample provision will be made from time to time for depreciation on this capital portion of the fields account and any further additions which may be made to it.

**Chairman's Visit to the East.**

I had the great pleasure and satisfaction of last winter taking the trip to India and Burma, which I told you last year I intended doing. I first of all visited the company's principal agencies in India and then spent two months in Burma, and this gave me ample time to inspect the company's properties and operations and to consult with the managers and agents on the many very important points in connection with those operations, and generally on the management of the company's affairs in the East, on which personal consultation with those on the spot is so helpful and so desirable. I am not going to detain you with any detailed account of my trip, and will only say that, taken all over, what I saw thoroughly satisfied me once more as to the immense value of the company's oil lands and the high state of efficiency in which all its properties—refineries, plant, and buildings generally, and fleet—are maintained, and I was more than ever impressed with the immensity and completeness of the arrangements for the production of the crude oil and its conveyance from the fields to the refineries; its refining and the transportation of the finished products to the main

Digitized by Google

installations in India; and finally the sale and distribution of these products throughout the whole of India and Burma.

Owing to the war I had not been able to go East since 1913, and many changes had taken place during those eight years, but the one direction in which I saw no change was in the loyalty to the company's interests and the keenness in their work displayed by the managers, agents, and the staff throughout the entire business, and I welcome this opportunity of publicly testifying to the great value of these services to which in such a large measure the success of the company's operations is due. And again it was impressed on my mind how highly desirable it is in a corporation such as ours that, as far as possible, those at the head of affairs on this side should keep in personal touch with not only those in charge of the management on the other side but also those responsible for the conduct of every branch of the company's business and operations there, so as to promote and encourage in every possible way that good feeling between employer and employed which goes so far to ensure the successful running of any business, and so long as I am fortunate enough to remain chairman of this great company and am given the health and opportunities to do so it is my intention to continue to regularly pay these visits to the seat of our operations in the East.

The £70,499 8s. 7d., £30,000, and £80,328 15s. 9d. provided for depreciation on refineries, pipelines, and tankers and tank installation accounts respectively are on the usual ample scale.

The customary £20,000 has been added to insurance reserve, bringing this account up to the substantial figure of £360,000, and the fire and marine insurance account has been raised from £279,335 1s. 6d. to £366,988 13s. 8d.

After providing for the above appropriations and the £195,000 placed to general reserve, and paying income tax, directors' fees, and all charges there is a balance of £3,729,765 2s. 11d. From this fall to be deducted the interim dividends paid in November amounting to £537,881 5s., leaving a balance of £3,191,883 17s. 11d., and this your directors recommend should be applied in payment of the final Preference dividends amounting to £21,000, and of a final dividend of 4s. per share, free of income tax, on the Ordinary shares, £1,028,700, amounting together to £1,049,700, and leaving £2.142.183 17s. 11d. to be carried forward, subject to the payment of excess profits duty and corporation tax, which together we estimate at something in the neighbourhood of £1.935.000

## Over 7¾ Millions in Taxes.

While on the subject of taxation it will no doubt interest you to know that in the years 1915 to 1920 the total taxation paid by the company in the shape of income tax, excess profits duty, and corporation tax amounted to no less than £7,870,776, while in the same period the total Ordinary and Preference dividends paid to the shareholders have only amounted to £5,816,331, so that the National Exchequer has actually received fully £2,000,000 more from the company than the shareholders have.

In connection with the payment of the Preference dividends the directors have decided to bring the three classes of Preference shares into line and pay dividends on all three at the same time —namely, April 30 and October 31. The first full half-year's dividend on the new 8 per cent. Preference shares will be paid on April 30 next.

Under the provisions of the provident and pension fund, by which the members of the fund share in the prosperity of the company on the basis of the rate of dividend paid on the Ordinary shares, you will see that the substantial sum of £141,847 18s. 9d. has been credited to that fund. I was aware how greatly appreciated this fund is by the staff on this side, and during the course of my tour in India and Burma, when I came into personal contact with so many of our Eastern staff, it was very deeply impressed on me how far the creation of this fund has gone to still further strengthen the very friendly and harmonious relations which have always existed between employer and employed in our company.

The increase on interest account from £285,154 8s. 9d. to £319,816 16s. 1d. is almost entirely due to the larger dividend—10 per cent., free of tax, as against 8 per cent., free of tax, for 1919—received on our holding of Anglo-Persian Ordinary shares for 1920, and similarly the increase on investment account from £3,204,390 16s. 9d. to £4,266,963 3s. 3d. is practically accounted for by our increased holding in that company.

## The Staff and the Native Workers.

Last year I ventured to say we were a very large but, on the whole, a very happy family, and the warmth and kindliness of the welcome extended to me personally on every side, and all I saw of the excellent relations existing between the managers and the staff and the great majority of the workers in every branch of the business, made me feel how justified I had been in making that statement. As the outcome of the war, and in common with nearly all large employers of labour in India and Burma, we have been experiencing a certain amount of "liveliness" amongst our native workers, and have had several strikes to contend with. With practically only one exception these strikes have been engineered and fostered by outside and political agitators—Gandhi, non co-operators, and otherwise—whose main idea seems to be to stir up strife between employers and employees and clog the wheels of industry. As I have told you on more than one occasion we do everything in our power to make our native workers comfortable and contented, and our wages for both skilled and unskilled labour have for a long time past been at least equal to the highest, and in most cases higher than those paid by other employers of similar labour. We believe that the great majority of our workers are—and have been—quite satisfied with their pay and the conditions under which they live, but when a strike was declared many of them, though anxious and willing to work, were forced to join the strikers by intimidation of the most flagrant character. We have always been prepared—and still are prepared—to receive and give every consideration to any reasonable requests or complaints put forward in proper form by any of our workers.

## The Refineries.

Operations at our refineries during the past year were steady and results satisfactory in a further reduction in fuel consumption and increase in the volume of our more valuable products. Our refineries in Burma at present occupy three separate sites—at Dunneedaw, near Rangoon, and on that side of the river; at Syriam, some six miles down and on the other side of the river; and at Bogyok, some two miles or so from Syriam. In the direction of concentration of management and control we are now considering a scheme to bring our refining operations all together at Syriam, and, in the process, to apply the most modern and up-to-date methods of distillation and refining there. From these proposals very considerable economies in labour, management, and fuel consumption besides improvements generally in products are anticipated.

The substantial addition, £185,470 2s. 4d., to refineries account is principally due to the provision of a large amount of new gas-tight tankage for the storage of benzine, and also to considerable additions to the new type of refining plant to which I referred fully last year. These gas-tight tanks are expensive to erect, but amply repay the expenditure through the reduction of loss by evaporation.

## Additional Pumping Stations.

The £87,273 18s. 4d. added to the pipe-lines account is the cost of the two additional pumping stations which I told you in 1919 we were installing with a view to materially increasing the throughput of the line and lengthening its life by operating it at a reduced pressure. These two stations came into operation in December last, and have been working quite satisfactorily. In due course, when we have our oilfields electrification power house completed, it is intended to apply electrification to our main pipe-line pumps. The £35,016 6s. 11d. charged to the depreciation account is the cost of relaying about thirty-five miles of the main pipe-line which had become seriously corroded owing to the soil in that small section of the line being very heavily impregnated with alkali.

## The Company's Fleet.

The company's fleet has run steadily and without any serious mishap during the year. The construction of our new 10,000-ton tanker is now making fairly satisfactory progress in view of all the circumstances of to-day's labour conditions here, and delivery is anticipated early in 1922. The bulk of the £170,801 11s. 1d. added to tankers, etc., account is represented by the cost of a number of the launches and river steamers which I told you last year had been put in hand, principally to replace those purchased from us by the Government for Mesopotamia. Material additions have also been made to our installations and distributing facilities in India. While I was East I had the opportunity of inspecting nearly the whole of our fleet of tankers and launches, and the very high state of efficiency in which I found them all reflects the greatest credit on our marine superintendent, Captain Currie, and all the officers and engineers of the fleet.

Progress with the electrification of the Yenangyoung Oil Field has been satisfactory in all the circumstances of delays in receipt of plant, etc., consequent on labour troubles in this country, and two of our neighbours in that field have contracted to take their requirements of current from us.

## Interests in Trinidad.

As regards our interests in Trinidad, I regret that our friends the United British Oil Fields of Trinidad, Limited, have not yet succeeded in developing production either of a steady character or of important volume, but everything possible continues to be done to achieve these two essentials to success, and in this direction their board has recently made arrangements to place fields operations under the direct management on the spot of the technical experts associated with the producing companies of the Anglo-Saxon Petroleum Company, Limited, which company, as you know, is also interested in the United British Oil Fields of Trinidad, Limited.

As regards the market for our products in 1920, the report and the accounts before you speak fully for themselves. The recent very heavy fall in petroleum values does not affect your company as regards kerosene—by far the largest marketed product of our crude oil. And in the case also of our lubricating, etc., oils, which are similarly almost entirely marketed in India, these had not advanced to anything like the levels reached in other markets and consequently have not, at least meantime, shared in the decline in values elsewhere.

## Declining Prices.

The decline in the market value of petrols, paraffin wax, and candles affects us as it does others. In the former case the full disposal of our production is, however, assured, and in the latter, although demand is far from strong we see no reason to anticipate that our production will not continue to go reasonably satisfactorily into consumption. But in the case of these three products we shall require to be content with much lower values than have recently ruled—at any rate until world trade conditions become more settled and the markets at present more or less closed to consumption again become free buyers and consumers.

Our petrols continue to go largely into consumption in India, and in due course—at least on the basis of our present production—we should market our entire output there, and so cease to be exporters of this product. In any case what we do require to export will in less than a year from now be

Digitized by Google

exported by us and sold on our own account instead of as at present on a profit-sharing arrangement with buyers under contract, and those new conditions should be to the advantage of the company.

At the recent extraordinary general meetings I fully explained the reasons necessitating the raising of further capital, and, as you are all aware, the recent issue of £3,000,000 8 per cent. cumulative preference shares was a great success and very largely over-applied for As you are also aware, the holders of the 250,000 preference shares of £1 and the 75,000 shares of £10 each were given the opportunity of consolidating these two classes of shares and having the rate of interest on them raised from 6 to 6½ per cent., but apparently owing to apathy the proxies returned fell very largely short of the majority required to carry the necessary resolutions, and the directors had perforce to drop the scheme.

## The Outlook.

In regard to the outlook for the future in general, and the prospects for the current year in particular, I am sure that in these abnormally trying and uncertain times you will not expect me to deal with this undoubtedly difficult question in any other vein than the cautious one I have invariably adopted in the past. As I said last year, I am no pessimist as regards the future of the Burmah Oil Company—the very reverse—but when it comes to looking ahead I always endeavour to see both sides of the picture—the unfavourable as well as the favourable—and every year it is more strongly impressed on me how impossible it is to foresee the course of events for any length of time ahead, and how foolish it is to attempt to enter into the dangerous realms of prophecy.

Dealing with the current year, the one extremely favourable feature is the termination at December 31 last, as far as we are concerned, of the excess profits duty, our liability for which for 1920, as shown in the accounts, is estimated at the huge sum of £1,800,000. I have, however, been astonished to find how many people—including even men of large business experience—have jumped to the conclusion that, supposing our net profits for 1921 were the same as for 1920, this whole sum would be saved to the company As a matter of fact, it would be subject to deduction of 6s income-tax and 1s. corporation profits tax, equal to £630,000, so that the net saving would be £1,170,000. Against the very large saving there will be under this heading will have to be placed the reduction in profits through the fall in the prices of petrol, paraffin, wax, and candles, to which I have just referred, the severe drop in the Indian exchange, and higher working costs, due principally to increased wages granted to our Indian labour. How far the one will go against the other it is impossible for me to attempt to forecast at present, but I feel that we can with every confidence look forward both to satisfactory trading results for the current year and to the future of the company for many years to come. And, fortunately, prices of materials and stores are distinctly on the downward grade, and, as I have said, we anticipate in due course considerable economies in working costs from the electrification of the oilfields and the concentration and further improvements of our refineries.

## Tribute to Late Colleagues.

I opened my address last year with an intimation of an apology for absence on account of illness from Mr. W. J. Chrystal, and I closed it with a reference to Mr. James Hamilton's retiral, for health reasons, from the post of manager of the company, which he had held for fifteen years. In less than a month afterwards Mr. Hamilton passed quietly away, and in April of this year Mr. Chrystal was also taken after a long drawn-out and painful illness borne with wonderful patience and fortitude. I need not repeat here the tribute I last year paid to Mr. Hamilton, and will content myself by again saying that after twenty-seven years' daily association with him in connection with the affairs and management of the company no one can speak with greater knowledge than I can of the immense value of the services rendered by him Mr. Chrystal joined our board in 1911, and proved himself an ideal director, regular in attendance at all board meetings and keenly interested in all the affairs of the company. His career—commercial, public, and private—is too well known in Glasgow to require any panegyric from me, and, speaking for myself and my co-directors, I will only say that through his death we have lost not only a valued and trusted colleague, but one whom we always felt it was a privilege to call our friend.

## New Members of the Board.

Acting on the powers conferred on them under Article 89, the directors appointed Mr. Gilbert C. Whigham to fill the vacancy caused by Mr. Hamilton's death, and you will be asked in due course to confirm this appointment. After serving the company for 14½ years in Rangoon, Mr. Whigham came to the London office at the end of 1919, and has there taken an important share in the management of the company's affairs, and the board ask you with every confidence to confirm their action in appointing him to a position which he has so worthily earned.

From the report you will have seen that to fill the vacancy caused by Mr. Chrystal's death the directors recommend the election of Mr. David McCowan. Mr. McCowan is so well known in the commercial and public life of Glasgow that I feel there is no necessity for me to enlarge in any way on his fitness for the position, and I am sure you will heartily and unanimously endorse your directors' choice.

I now beg to propose "That the report of the directors and audited statement of accounts, including the balance-sheet and the profit and loss account, as at December 31, 1920, presented to the meeting be received, approved, and adopted." I call on Mr. Ashton to second the motion, and after it has been seconded an opportunity will be given to the shareholders to ask questions or make any comment.

Mr. H. S. Ashton.—Mr. Chairman, ladies and gentlemen, I beg to second the motion.

The Chairman.—Gentlemen, are there any questions anyone would like to put, or any remarks anyone would care to make? There being none, I now beg to put formally to the meeting the resolution which I have proposed and which Mr. Ashton has seconded.

The motion was carried unanimously.

## The Dividends.

The Chairman.—I have now pleasure in moving that the following dividends, recommended by the directors—namely, "First, on the six per cent. First Preference shares of £1 each, of 7 1-5d. per share, equivalent to 6 per cent. per annum, from June 30 to December 31, 1920, less tax; second, on the six per cent. Second Preference shares of £10 each, 6s. per share, equivalent to 6 per cent. per annum, from June 30 to December 31, 1920, less tax; third, on the Ordinary shares of £1 each, 4s. per share, free of tax, making, with the interim dividend, 30 per cent. for the year—be adopted and that the same be hereby authorised to be paid on July 26, and that the balance of £2,142,183 17s. 11d., subject to excess profits duty and corporation tax estimated at £1,935,000, be carried forward.". I shall ask Mr. Honeyman to second the motion.

Mr. O. H. Honeyman.—I beg, sir, to second the motion. The motion was adopted.

## Election of Directors.

The Chairman.—I now beg to move that Mr. Gilbert C. Whigham be re-elected a director of the company.

Mr. William Robb.—I beg to second.

The motion was adopted.

The Chairman.—I now beg to move that Mr. Robert I. Watson be re-elected a director.

Mr. T. H. Gollan.—I beg to second the re-election of Mr. R. I. Watson.

The motion was adopted.

The Chairman.—I also beg to move that Mr. H. S. Ashton be re-elected a director of the company.

Mr. William Auld seconded the resolution which was adopted.

The Chairman.—I beg to move that Mr. David McCowan be elected a director of the company

Mr. Robert Clark seconded the motion, which was adopted.

Colonel D. S. Morton.—I beg to propose the appointment of Mr. J. Herbert Wilson, C.A., as auditor of the company, at the remuneration of 500 guineas. This is an increase on last year. I understand that the last increase took place in 1916. As every business man knows, like ourselves, the auditor has to pay largely increased salaries to the staff; not only so, but the work connected with the auditing of a company like this has increased, and is increasing, year by year, and I think, under the circumstances, you will agree with me that the augmentation of the remuneration is amply justified.

Mr. J. B. Couper.—I have much pleasure in seconding the proposal of the appointment of Mr. J. Herbert Wilson, C.A., as auditor of the company. The motion was adopted.

The Chairman.—That, gentlemen, is all the business, and I have to thank you very much for your attendance here to-day.

## Vote of Thanks to the Chairman.

Mr. R. C. Greig.—I should like, just in a very few words, to ask you to accord to Sir John Cargill, our esteemed chairman, a hearty vote of thanks. By his speeches in the past he has set himself a high standard, and I venture to say the speech we have listened to to-day is more than worthy of its predecessors. We have received an interesting account as to the present position of the company, and also with regard to the future. In proposing this vote of thanks I should like also to make special reference to the visit paid to Burma by Sir John during the past year in our interest. As many of you know, travelling is still uncomfortable and subject to the post-war conditions. When he started out the reports from India of unrest were not reassuring. It is only in keeping with Sir John's *esprit de corps* and devotion to the interests of this company that he should have cast aside these considerations and hastened to personally oversee the important developments which have taken place. He has given us a most satisfactory account of the state of the staff, and I am sure that they, on their part, will feel that his visit has inspired them. I ask you to accord Sir John Cargill a most hearty vote of thanks. This was seconded, and carried unanimously.

The Chairman.—Mr. Greig, ladies and gentlemen, I have once again to thank you most heartily for the very kind reception you have given to me to-day, and Mr. Greig specially for the very kind and encouraging words he has used in proposing this vote of thanks. I referred to the very kindly reception I got on all hands when I was in the East, and I again ventured to liken my 35,000 odd employees there to a happy family. I feel now that I can add to that already not inconsiderable family the very large body of shareholders, some 20,000 odd now, on this side, so that together I am at the head of what I think I might call a very large family. But I think I can say this family is so extremely well behaved that it does not cause me any real anxiety, as is evidenced by the fact that when my barber was cutting my hair two days ago he told me he had been looking for a grey hair, and he could not find one. I think that is a very excellent testimony to the behaviour of my large family. I can only say what a great pleasure it was to me to take my trip to the East, and I purpose, so long as I am given health and strength, to do so again so that I can come before you, ladies and gentlemen, with a thorough knowledge of every branch of my business and give you first-hand information of what is going on on the other side, where, after all, the real work of the business of the company has to be carried on. I thank you very much indeed.

The proceedings then terminated.

# NEAR EAST MARKETS.

## SUDAN PRODUCE.

(From Our Own Correspondent.)

Khartoum, June 22.

Blue Nile Province.—It is reported that the Government have completed the purchase and taking over of 5,000 tons of dhurrah as a province reserve. It is stored in underground pits called *matmura*, with an average capacity of 400 ardebs, and, according to the natives, can be kept for at least four years in this manner. According to James Bruce, who visited Sennar in 1772, the practice of storing grain in *matmuras* owes its introduction to the Fung Empire to Sheikh Shadli, whose tomb is still standing to this day.

## DRIED FRUIT.

Messrs. J. C. Houghton and Co., in their report for the fortnight ended July 5, state:—

Currants.—The feature of our market during the months of labour unrest has been its remarkable steadiness, but unfortunately the coal strike has hampered progress to a far greater extent than was fully realised in the early days of the stoppage. We finished the month with a general desire on the part of sellers to unload some of their holdings even at some concessions in price. We have no wish to prophesy any immediate improvement in trade, but it is anticipated that, the coal strike being terminated, buyers will have to replenish their stocks, as they have been working for a long time on a hand-to-mouth policy, and are carrying no reserves. Another important point to bear in mind is new crop prospects, and the latest reports are of damage to the vines by peronosporos. S.s. Bosnian arrived with 1,200 tons, and the best grades of Panariti and Zante should meet a good reception when trade revives, as the Vostizza growth is exhausted. The little business passing has been Gulf at 63s. to 66s., Panariti 75s., Patras and Zante 62s. to 78s. (the latter price for speciality smalls). Total arrivals from commencement of the season, 24,100 tons. Quotations are:—Pyrgos and Amalias, 48s. to 60s.; Patras, 60s. to 65s.; Zante, 62s. to 78s.; Gulf and Panariti, 63s. to 75s.; Vostizza, 82s. to 95s

Valencia Raisins.—Market is now bare of stock.

Sultanas.—The market has been replenished by some small arrivals of Smyrnas from America and a few further supplies from India. Values have continued on their upward course, improving daily, and recent sales record a considerable advance over closing figures of last month. Yellow Afghans have been sold at 137s. 6d. and Reds at 105s. Greeks have also risen in price to 140s., and Smyrnas sold at 135s. to 170s.

Figs.—Stocks are exhausted.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated July 4:—During the week ending June 25 weather conditions and crop prospects unchanged. Since that date monsoon strengthened on west coast of peninsula and in Burma. Bombay cotton market steady. Fine M.G. Oomra, July Rs.311, September Rs.327. Piece-goods market quiet but steady. Local goods moving steadily. Good inquiry for fancies. Calcutta jute market firm, and sellers inclined to raise limits. Business reported in first substitutes at Rs.57.8.0. Hessians and heavy goods quiet but steady. Rice control reimposed in Ceylon, as export surplus in Rangoon is strictly limited. Ceylon has in hand three months' supply of rice on strictly rationed basis, or two months' normal supply. Rationing system again resorted to and maximum prices fixed. At tea sale on June 28 Dooars, Terais, and a few first flush Assams very good. Few new season's Cachars and Sylhets good and sold at 3 to 6 pies above same qualities old stock; common grades and dusts firm to slightly dearer. 17,685 packages sold to date at average price of 8 annas 6 pies per lb. Kurla Bombay Railway survey (five miles) by Great Indian Peninsula Railway Co. and Hebo-Inle Valley, preliminary survey of seven miles by Burma Railways Co. sanctioned. The former is with a view to expansion of Bombay residential accommodation, and the latter is just a railway extension in the Southern Shan States. No change in bank rates.

A further cable dated July 7 states:—Weather continues favourable, and jute plants growing well. Bombay cotton arrivals from September 1, 1920, to July 1, 1921, were 2,542,000 bales, as compared with 3,182,000 during the corresponding period of the last year. Bombay imported piece-goods market quiet. Calcutta jute market dull. Imports have increased, but with balers continuing to buy steadily, stocks are reduced by 1,360 tons. Prices firm. Rice Commissioner in Rangoon has cancelled licences for export of rice to foreign countries, including Ceylon. Prices of Specials rose to Rs. 590 per 100 baskets of 75 lb. each on July 2, and opened at Rs. 580 on July 4, but declined to Rs. 550 by end of that day. On July 6 prices fluctuated between Rs. 552 and Rs. 500, closing at top. Forward contracts reported for February, March and April, 1922, at Rs. 415 and Rs. 420.

# COTTON AND COTTON GOODS.

## MANCHESTER REPORT.

(From Our Own Correspondent.)

Manchester, Monday.

Business in the market during the past week has been on quite an extensive scale, and it is possible to state that on Tuesday more trade was done than has been the case for many months back. Raw cotton rates have continued to harden, which is a favourable sign. Business on all sides tends to broaden, and there is every possibility of more business being done in the near future. Although the cloth demand for Egypt has not been very substantial, some useful lines in fancies have been put through, but it is reported that the financial position out there is not all that could be desired. Recent reports, however, show that stocks of goods are gradually being liquidated, and it is generally believed that there is a shortage of Lancashire goods in the up-country districts. Buyers for Constantinople and the Levant have not been altogether idle. Quotations for Egyptian spinnings have continued firm, but users appear to have enough stocks on hand to meet with their requirements, with the result that sales have not been satisfactory. With regard to India, the demand for piece goods has been on quite an extensive scale, and some big lines in dhooties, mulls and jaconets have been booked, with Calcutta as the principal buyer. Varied reports have been received with reference to the monsoon, but late advices state that the rains are proving more or less a success. Shippers to China have bought rather more freely, but there is a lot of leeway to be made up. Greys and whites have received increased attention. The position with regard to South America does not improve. Taking the market as a whole, it is fairly safe to say that we have definitely turned the corner towards better times, and buyers are operating more freely on account of the possibility of prices going against them in the near future.

### British Cotton Exports.

An idea of the vastness of the Lancashire cotton industry, of which more than three-quarters of the total production is sent abroad, is obtained by a study of the recently published official statistics relating to the shipments for the six months ended June 30 last of manufactured articles from the United Kingdom. The total of the twenty headings under which the exports are classified is £319,229,784, of which cotton yarns and manufactures account for no less a sum than £94,415,882, equal to 30 per cent. This is more than twice the amount absorbed by the next largest item—machinery—which is responsible for £41,120,395, or 13 per cent. Iron and steel, £38,150,482, representing 12 per cent., and woollen and worsted, £32,156,468, about 10½ per cent., occupy the third and fourth places on the list. The figure of £94,415,882 given for cotton yarns and manufactures, consists of piece goods, £75,104,452, and yarns, £10,301,588, the remaining £9,009,842 being made up of miscellaneous goods such as thread, net, and flags, shawls, and handkerchiefs not in the piece.

## LIVERPOOL REPORT.

Messrs Reynolds and Gibson report as follows for the week ended July 7:—During the past week a distinct improvement has taken place in the inquiry for Egyptian cotton, and if this inquiry has not yet grown to any very large proportions it must be borne in mind that the mills are still only working short time, and that some little while must necessarily elapse before the dislocated machinery of trade can be put in order, and a return to something like normal conditions can be attained. On every hand now there are signs of a general settling down of industry, and one has to be a very confirmed pessimist not to admit that prospects for the future are brighter now than they have been for many weary months past. It was refreshing, for example, to find certain firms buying Egyptian cotton this week (even though only a few bales) who had not previously touched it for the past six months, or longer. A total of 500 bales for yesterday's sales also administered a fillip to the market. Sakellaridis still claims most of the attention—generally speaking types 30-39. Upper and brown are still neglected, although prices rule firm, particularly for the former. Prices are very irregular, and already a tendency has appeared to force them up, but this policy seems unwarranted at the moment, as there are plenty of easy sellers about. There is, undoubtedly, more doing in c.i.f. business, and a feature of the week in this department has been a demand for new crop. The good trade in cloths and yarns, which has been reported from Manchester for some time now, seems to be continuing, but little purchasing of actual cotton would appear to be taking place in that quarter so far, and it is useless to shut our eyes to the fact that a considerable quantity of the trade reported consists in manufacturers and spinners throwing overboard old stocks, very often at an actual loss. A certain amount on the spot here has been done for the Continent, and the inquiry from that source also shows signs of improvement. Quotations of Sakellaridis are raised ¼d. per lb. Fully good fair Sakellaridis 16.00d. Total sales, 1,000 bales.

## HARVEST PROSPECTS IN YUGOSLAVIA.

The Commercial Secretary to H.M. Legation at Belgrade reports to the Department of Overseas Trade that, according to statements in the Press, the 1921 harvest, especially as regards the earlier cereal crops (among which maize is not included), is likely to be very poor, owing to adverse weather conditions. Very heavy rain storms have been experienced, causing great floods in Bosnia, where it is said villages have been destroyed, many head of cattle lost, bridges washed away, and railway communications interrupted. Even in those areas not actually flooded great damage has been occasioned to the crops, the heavy rain and hail having beaten down wheat, barley, and the like, which were almost ready for reaping. A very heavy storm in the Department of Timok has beaten down the corn to such an extent that it is said that in many of the communes there will be no harvest.

## CZECHOSLOVAK SUGAR.

One of Czechoslovakia's most important industries is the production of sugar. The republic, which is the only European State able to export this commodity, is the second largest beet-sugar producer in the world, having some 500,000 acres of beet under cultivation. In 1920-1921 some 715,000 tons of sugar were produced, 189 factories and refineries being engaged in the industry. According to a report just issued by the Foreign Trade Department, the republic, after satisfying home demands, had some 300,000 tons available for export, of which 216,000 tons have been sold, the proceeds amounting to 2,126 million crowns. Inclusive of the sugar sold to France and Austria in the way of "compensation"—that is, in exchange for other commodities—and assuming that the stock which still remains in hand will be sold at the market price prevailing to-day (which is very considerably lower than the prices hitherto obtained), the total amount accruing from the export of sugar for 1920-1921 is about 4,000 million crowns. After deducting the home cost of the sugar and the expenses of transport, etc., the net profit from export is 2,000 million crowns. This sum was devoted to the purchase of flour from England, America and other countries.

## PRESENTATION TO MR. C. E. TOWN.

On July 6 the permanent staff of the London Chamber of Commerce presented Mr. C. E. Town (Assistant-Secretary of the Chamber), on the occasion of his retirement, with a handsome antique mahogany bookcase, with silver plate attached and engraved.

The gift was accompanied by an illuminated, framed address, bearing the names of seventy-eight members of the staff, and was executed by Mr. C. W. Norris, 12, King Street, Cheapside, E.C. Mr. B. Norris, the oldest member of the Chamber's staff of representatives, made a personal gift of a work on "The Life of Frederick the Great."

Mr. Charles E. Musgrave (Secretary of the Chamber), in making the presentation, paid a glowing tribute to the recipient's services during the past twenty-five years, and Mr. Town modestly acknowledged both the gifts and the encomiums

## ON 'CHANGE.

### Tone Quiet but Firm.

(From Our Own Correspondent.)

London, Monday night.

Markets have for the most part been inactive during the past week, investors continuing to maintain a reserved attitude. The tone has, however, been fairly firm, and it is evident that the development of buying will bring about a marked improvement in rates.

Following the announcement of a new Government Loan, gilt-edged stocks have been somewhat easier. War Loan Fives are 3-16 down on the week, while Victory Bonds have shed ¼, and Consols have reacted ¼ to 47¾. The Indian Seven per Cent. Loan is ⅛ lower.

A quiet tone has prevailed in the Industrial group owing to the absence of interest on the part of the public. Oils have been weak, while there is little change to report as regards Rubbers.

As regards Near Eastern securities, Egyptian Guaranteed 3 per cent. have shed a point at 68, but Greek Guaranteed 2½ per cent. 1898 and Turkish Guaranteed 4 per cent. 1855 are unchanged at 66 and 70 respectively.

In Greek shares the 5 per cent. 1881 Loan is 1½ down at 42xd., and the 5 per cent. 1884 has shed a like amount at 42xd. The 5 per cent. 1890 at 40 has lost a point, while Fundings are also lower at 40. The 4 per cent. 1910 Loan is 29, while the 4 per cent. 1902 Loan is 32xd. The 5 per cent. 1914 Loan is 38.

In Land shares Beheras have risen sharply ⅝ to 8⅜, but the preference shares are unchanged at 3. Anglo-Egyptian Land Allotments remain at 3, while Egyptian Consolidated Lands have regained their previous week's loss at 1s. Egyptian Delta Lands are 3d. up at 6s. 9d., at which there are buyers, while Gharbieh Lands are 1-16 up at 1 3-16. New Egyptians are 2s. down at 20s. 3d. xd, but Union Foncieres have gained 3-16 at 2⅛ xd. Sudan Plantations are ⅛ down at 2 15-16.

In Banks, Agricultural 3½ per Cent. Bonds are ⅛ up at 51⅞, while Agricultural 3½ per Cent. Guaranteed Bonds have gained a like amount at 53⅞. Imperial Ottoman Banks are ¾ down at 7¾, while National Bank of Egypts are 1-16 up at 17½.

## ALEXANDRIA EXCHANGE.

*Supplied by G. L. Mortera, Alexandria and Cairo.*

Prices on June 24 were as follows:—Agricultural Bank of Egypt, £3 31-32; Alexandria Water Co., Ltd., £6⅛ ex.; Anglo-American Nile Steam, £2⅛; Associated Cotton Ginners, 11-15; Banque d'Orient, Fr. 56; Behera Ord., £E7; Behera Priv., £3 3-32; Bonded Stores, £7¾; Brasseries d'Egypte, Fr. 70; Building Lands of Egypt, £⅝; Cassi di Sconto Priv. Fr. 102 ex.; Ciments d'Egypte Priv., Fr. 35; Ciments d'Egypte Div., Fr. 23; Comptoir Fin. et Com. d'Egypte, £¾; Consolidated Land, Pt. 5; Credit Foncier Fondateur, Fr. 780 ex.; Credit Foncier Egyptien, Fr. 588; Credit Foncier 1885 Oblig., Fr. 307; Credit Foncier 1903 Oblig., Fr. 219; Credit Foncier 1911 Oblig., Fr. 220; Crown Brewery Priv., Fr. 162; Crown Brewery Div., Fr. 130; Eaux du Caire Capital, Fr. 77; Eaux du Caire, Jouissance, Fr. 101; Egypt and Levant, S.S. Ord., 26s. 9d.; Egyptian Delta Light Railways, £4 11-16; Filature Nationale d'Egypte, £9⅜; Gabbari Lands, £¼; Immeubles d'Egypte Soc. an des., £5 1-64; Khedivial Mail S.S. Co. Ord., 110s.; Khedivial Mail S.S. Co., Pref., £2½; Kom Ombo Ste. Ane de Wadi, £3¾; Kom Ombo Ste. Fondateur, £33 9-16; Land Bank of Egypt, Parts de Fond, £35; Lots Turc, Fr. 39; Menzaleh Canal Navigation, Pt. 270 ex.; Nungovich Hotels, £6; Ramleh Railway, £2 3-32; Salt and Soda, 26s. 10½d.; Tram. d'Alexandrie Priv., Fr. 42; Tram. d'Alexandrie Div., Fr. 60; Union Fonciere d'Egypte, £1 11-16 ex; Egypt Hotels, £1 15-16; Urbaines et Rurales, £2 27-32.

## TENDERS INVITED.

[*Particulars of tenders marked (D.O.T.) are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.1.*]

**Tenders are invited for the following contracts, and must be made by the dates mentioned:—**

### Yugoslavia.

Oil, etc.—The Ministry of War and Marine, Belgrade, invites tenders for the supply of:—400,000 kgs. of benzine, 40,000 kgs. of thick oil for motors, 4,000 kgs. of thick oil, and 5,000 kgs. of petrol. Tenders must be submitted to the "Direction de l'Artillerie," bearing a 10 din. stamp, accompanied by a sample, the chemical analysis of which is to be effected in a State laboratory, and the result is to be attached to the tender. The envelope must bear the inscription "Offres de Benzine." July 20.

Paper.—The Direction des Chemins de Fer de l'Etat, Subotica, invites tenders for the supply of ordinary paper for rough use as follows:—10,000 kgs. 42 by 68 cms.; 10,000 kgs. 50 by 90 cms.; 10,000 kgs. 47 by 60 cms.; 2,000 kgs. 63 by 95 cms.; 3,000 kgs. 60 by 90 cms.; 5,000 kgs. 63 by 35 cms. Tenders must be addressed to the "Direction des Chemins de Fer de l'Etat" at Subotica, together with samples and prices. They should be sealed, and the envelope should be marked "Offre pour l'adjudication de papier, KN 11228/21." July 20.

Turntables.—The Direction des Chemins de Fer de l'Etat, Subotica, invites tenders for the supply of turntables for locomotives, ordinary gauge. They should bear a 10 din. stamp, and be marked "Offres de disques tournants, K.D. 12560/21." All Serbian subjects should make a deposit of 10 per cent. of the value offered, and foreigners 20 per cent. of the value. July 21.

### Bulgaria.

Railway Wagons.—The Bulgarian State Railways are inviting tenders for the construction and supply of 200 covered goods wagons and 200 coal wagons (to be ready for delivery by January 15, 1922); 400 covered goods wagons and 200 mineral wagons (to be ready for delivery by March 31, 1922). Tenders should be addressed to the Department of Finance, Sofia. August 1 (D.O.T.).

Coke.—Tenders are invited by the Ministry of Railways for the supply of coke as follows: 500 tons of metallurgical coke, at an estimated price per ton of 3,000 leva, 1,500,000 leva. The coke must be metallurgical, compact, and obtained from cleaned, solid (hard) coal, and consist of large, sound pieces, which must not pass through a sieve with 104 mm. (square) holes. It must have a good silver lustre and a ringing sound on striking one piece against another. The separate pieces must be of uniform size, and without any very large pores. It must be free from stone or other foreign matter, and not contain more than 12 per cent. ash. Small pieces are allowed up to 5 per cent., and moisture up to 5 per cent.; but if moisture is shown to be in excess of this percentage, it will be deducted from the weight of the coke. Delivery time, three months for 200 tons, balance in five months c.i.f. Bulgarian port. Payment, one-half against documents; the supplier to give a bank guarantee for this sum; balance after arrival and acceptance. Offers should be addressed to La Direction Générale, des Chemins de Fer Bulgares, Sofia, Bulgaria. August 3. (D.O.T.)

Machine Tools.—The Bulgarian States Railways invite tenders for the supply of machine tools, including lathes, planes, thread cutters, milling machines, etc. August 6. (D.O.T.)

### Egypt.

Glue.—The Government Press, Bûlaq, Cairo, invites tenders for the supply of 700 kilos of glue, light, for bookbinding. August 4.

Safes.—The Central Stores, Ministry of Finance, Cairo, invites tenders for the supply of 100 money safes. August 22.

Timber.—The General Manager, Egyptian State Railways, Telegraphs, and Telephones, Cairo, invites tenders for the supply of timber. August 23.

Envelopes.—The Central Stores, Ministry of Finance, Cairo, invites tenders for the supply of envelopes. August 25.

# BRITISH TRADE CORPORATION

# SHIPPING INTELLIGENCE.

## TRADE OF VOLO INCREASING.

H.M. Vice-Consul at Volo (Mr. W. L. C. Knight) states that, according to the Statistical Report of the Greek Ministry of National Economy, the value of the goods imported into Volo in the first nine months of 1920 amounted to 51,318,750 drachmæ, as compared with 26,275,395 drachmæ during the corresponding period of 1919, an increase of almost 100 per cent., that in the case of Piræus being about 60 per cent., Patras 60 per cent., Salonika 55 per cent., and Syra 12 per cent.

The Vice-Consul states further that Volo's great increase is to be attributed to the fact that during the greater part of the period in question the port had recovered something like its normal activity, its import trade, such as it was, during and for some time after the war, having been largely done through Salonika and Piræus. 1920 witnessed the resumption of direct and more or less regular communications by sea with the United Kingdom, Holland, Italy, Belgium, and, at the end of the year, Germany. Moreover, the comparatively rapid and generally advantageous unloading arrangements at a port where there exists no congestion problem such as at Piræus and Salonika, has resulted in a very successful transhipment service at Volo. Thanks to this, considerable and increasing quantities of foreign merchandise are unloaded at Volo for transhipment not merely to neighbouring ports such as Chalkis and Kavalla, but also to distant Crete, Rhodes, Preveza, etc. If ever the much-talked-of and urgently needed dredging of the harbour and other improvements are carried into effect, apart from the question, which has been mooted, of greatly enlarging the port by the construction of a new breakwater, this transhipment trade might be developed almost indefinitely with all the island and lesser mainland ports.

The exports from Volo for January-September, 1920, were valued at 65,102,683 drachmæ, as compared with 55,706,123 drachmæ for the same months of 1919, an increase of about 20 per cent. This total is only exceeded for the period in question by Salonika (78 millions), and is greater than the totals for Patras (62 millions) and Piræus (61 millions). Were the figures those for the whole year, however, Volo would certainly have to yield second place to Patras, owing to the latter's exportation of currants during the remaining months. On the other hand, the Salonika and Piræus export figures include all the imports re-exported after payment of duty, there being no such re-exports from Volo, so that, if local produce only be taken into account, the first and second exporting ports of Greece are presumably Patras and Volo respectively

## FORTHCOMING SAILINGS.

*Anchor-Brocklebank Line.*—S.s. Maimyo, for Port Said, Colombo, Madras, and Calcutta (London, July 16); s.s. Maidan, for Calcutta (Birkenhead, July 27); s.s. Makalla, for Port Said, Colombo, Madras, and Calcutta (London, August 6); s.s. Maihar, for Calcutta (Birkenhead, August 17).

*Bibby Line.*—S.s. Lancashire, for Marseilles, Port Said, Colombo, and Rangoon (Birkenhead, July 20); s.s. Yorkshire, for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, August 3).

*Clan Line.*—S.s. Clan Macbeth, for Colombo, Madras, and Calcutta (Birkenhead, July 21); s.s. Clan Kenneth, for Bombay and Persian Gulf (Birkenhead, July 21); s.s. Clan Mackenzie, for Bombay and Persian Gulf (Birkenhead, August 6).

*Ellerman Line.*—S.s. Gerano, for Gibraltar, Malta, Patras, Piræus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, July 30).

*Ellerman's "City" Line.*—S.s. City of Poona, for Calcutta (Birkenhead, July 16); s.s. City of Marseilles, for Bombay and Karachi (Birkenhead, July 27); s.s. City of Benares, for Calcutta (Birkenhead, July 29).

*Ellerman's "Westcott and Laurance" Line.*—Steamers sail fortnightly for Mediterranean, Egypt, and Levant ports.

*Glen Line.*—S.s. Glenapp, for Port Said, Port Swettenham, Singapore, etc. (London, Juy 28); s.s. Carnarvonshire, for Port Said, Port Swettenham, Singapore, etc. (London, August 11).

*Harrison Line.*—S.s. Astronomer, for Calcutta (Liverpool, August 2).

*Henderson Line.*—S.s. Mandalay, for Port Said and Rangoon (Birkenhead, July 27).

*Holt Line.*—S.s. Elpenor, for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, July 15); s.s. Pyrrhus, for Port Said, Port Swettenham, Singapore, etc. (Swansea, July 29).

*Johnston Line.*—S.s. Dromore, for Piræus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Tulcea, Galatz, and Braila (Liverpool, July 20).

*Maindy Line.*—S.s. Maindy Tower, for Antwerp and Moroccan ports (London, end of July).

*Moss Line.*—S.s. Karnak, for Gibraltar, Algiers, Malta, Patras, Syra, Smyrna, Salonika, Constantinople, Bourgas, Varna, Constantza, and Sulina (Liverpool, August 6).

*Papayanni Line.*—S.s. Egyptian, for Malta and Alexandria [taking cargo for Beyrout, Alexandretta, Haifa, Mersyne, Jaffa, Port Said, Cyprus, etc.] (Liverpool, July 20); s.s. Cressado, for Algiers, Malta, Piræus, Smyrna, Syra, Volo, Salonika, and Constantinople (Liverpool, August 13).

*P. and O. Line.*—S.s. Sicilia, for Colombo, Madras, and Calcutta [taking cargo for Malta, Port Said, and Aden] (London, July 15); s.s. Devanha, for Bombay [taking cargo for Gibraltar, Port Said, and Aden (with transhipment at Bombay), for Indian coast and Persian Gulf ports] (London, July 15); s.s. Nagoya, for Colombo, Madras, and Calcutta [taking cargo for Malta, Port Said, and Aden] (London, July 29); s.s. Dongola, for Bombay (London, July 29).

*P. and O. British India Line.*—S.s. *Chanda, for Bombay and Karachi (London, July 29); s.s. †Trevorian, for Colombo, Madras, and Calcutta (London, July 30); s.s. *Hatarana, for Bombay and Karachi (London, August 27); s.s. ‡Nirvana, for Colombo, Madras, and Calcutta (London, August 30). *Taking cargo for Persian Gulf and Malabar coast ports; †taking cargo for Port Sudan, Port Said, Suez, and Aden; ‡taking cargo for Port Said, Suez, and Aden.

The traffic receipts of the Smyrna-Aidin Railway for the week ended July 2 amounted to £9,556.

The Czechoslovak Bureau of Information write to point out that in a statement issued by the Bureau relating to Czechoslovak imports and exports, which appeared in our issue of June 23, the word "milliard" was incorrectly used for "million" in each case.

## NOTES OF THE WEEK.

### *The Greek Offensive.*

The Greek advance has been duly launched, and the Greeks, having previously withdrawn, *pour mieux sauter*, have begun by carrying all before them. With the capture of Afiunkarahissar they have placed themselves astride the Baghdad-Railway; their next objective is Kutahia, which they are now approaching, some sixty-two miles to the north, or two-thirds of the distance from Afiunkarahissar to Eskishehir. These points, however, have been reached on a previous occasion, and it would be early to infer that the initial momentum will be maintained. Ammunition and finance still remain the sinews of war, and the relative positions of the two combatants in regard to these essentials is not known. The indications are that neither can be altogether free from anxiety on this score. If both should be equally handicapped, the home defence, as the struggle continues, will be favoured at the expense of the side which has to carry on the attack with lengthening lines of communication.

### *Allied Aloofness.*

In the meantime the Allied Powers show no disposition to intervene in the useless war. Italy, finding that her attempts at a separate understanding with the Turkish Nationalists have not been successful, is trying to discover whether she stands to gain more by offering support to what may ultimately prove to be British policy. Her contributions towards moulding the latter at this stage could hardly fail to be for the benefit of Albania, which sees its integrity threatened in spite of the emphatic pledges on this point contained in the Covenant of the League of Nations. The British Government would naturally prefer to have its Allies with it rather than against it in the Near East, but it has been too much occupied with home politics to give to Greco-Turkish affairs the expert consideration that they require. The British Cabinet's divided state of mind on this subject may be inferred from the emphatic words that the Secretary of State for the Colonies felt called upon to use last week in the House of Commons. "There is no greater interest," he said, "in the whole of the Middle East than that interest of Britain, and, I believe, of France as well, to secure a cessation of this protracted, vicious, mischievous strife between these two forces. I could not possibly speak upon this subject of the Middle East without emphasising the need that there is for us to arrive at a satisfactory peace with Turkey, and to procure a cessation of the hostilities which, after all these years, are still distracting and ruining the whole of these unfortunate areas of the East." But still no practical step to end the war has been taken.

### *Bulgaria and the Reparations Committee.*

The sudden rise of Bulgarian exchange, which returned to the rate of 350 leva to the pound sterling with even more startling rapidity than it had dropped from that point to the neighbourhood of 600, is to be the starting point, we may hope, of a healthier condition for Bulgarian finance. It seems to be no secret in Bulgaria itself that the quick recovery of the exchange is due to the action of the Inter-Allied Mission in bringing about the abolition of the Consortium. This step, taken at the instance of the British section of the Mission, will be welcomed throughout Bulgaria, and cannot be resented by M. Stambolisky's Government, which is thus delivered from one of its most serious mistakes. In this salutary intervention Bulgarian public opinion will, we trust, recognise the practical utility of the Reparations Commission, and turn to it regularly for help and advice in the arduous task of setting the country's economic position on a sounder basis.

### *Albania's Misfortune and—*

Little news reaches us from Albania, and what does come through is not as good as we could wish. According to an unconfirmed report, the Catholic Mirdites have revolted against the central Government, apparently over a question of the loss of privileges which they enjoyed under the old régime; and another report has it that there has been a change of Cabinet at Tirana. If true, the latter report is to be regretted, for Albania urgently requires stable conditions within her borders

Digitized by Google

if she is successfully to defend herself against the dangers that threaten her from outside, and the same considerations would, of course, apply with added force in regard to any detached action by one or other of the elements that make up the population of Albania. Unfortunately for themselves, the Albanians are not well known in Europe, and compared with other Balkan peoples have comparatively few friends; and to be frank, it is to be feared that only a few of them realise the importance of making such friends. Thus it has come about that while they undoubtedly have a good case in the matter of their frontiers, it has not been presented so skilfully as it might have been; while their rivals' friends at court appear to have had considerable success in enlisting powerful support for their *proteges*.

### *Her Rival's Good Luck.*

Questions asked in Parliament lately by Mr. Aubrey Herbert—who is one of the few active and influential friends of Albania in this country—drew answers which served to show that the Shkypetar people owe very little to the statesmen of the Great Powers. In a letter to *The Times*, Mr. Herbert suggests that the refusal of the League of Nations to intervene in the matter of the Albanian frontiers was due chiefly to the hostility of "the Supreme Council and the Government of this country, in the person of Mr. Lloyd George . . . to the impartial tribunal of the League;" and that they "are doing what they can to prejudice it." The League however, Mr. Herbert rightly insists, exists for, amongst other things, the protection of small nations; and as Albania has lately been admitted a member of the League, it would seem to most people that the case in question was just one of the kind with which it would deal most successfully. To refer the question to the Ambassadors' Conference is a very unsatisfactory proceeding. Mr. Herbert concludes the letter referred to by remarking that if Albania is to lose her status. . . and her land is to be taken from her to pay the Greeks for the mistakes that Mr. Lloyd George and the Supreme Council have made in Asia Minor, the triumph of the enemies of the League will be complete." The most awkward thing about his suggestions is that they seem to be painfully near the truth.

### *The Egyptian Delegation.*

The Egyptian Delegation has begun its work in this country. On July 12 Adly Yeghen Pasha had an informal conversation with Lord Curzon at the Foreign Office, and the first official meeting took place the next day. By this time, preliminaries will have been settled, and both parties will have settled down to the discussion of vital questions. Happily, there is every prospect of the discussions being carried on with the minimum of friction; and we may rest assured that if it be possible to reach an agreement satisfactory to both parties, that agreement will be reached; but for the present no public announcement regarding the course of the negotiations is to be expected. Indeed, for obvious reasons, it would be well that no announcement of the kind should be made just yet, and it is to be hoped that the Press and public alike will refrain from demanding one. Meanwhile, in Egypt itself the Zaghloulists are comparatively quiet, but they evidently have no intention of suspending hostilities. They have been spreading reports that the Ministerialists in the provinces have been employing intimidation to ensure the election of Ministerial candidates. Coming from a party which for its own purposes has not hestitated to employ such methods on an unprecedented scale, the charge is not without an element of humour. Making every allowance for the manners and customs of the modern Egyptians, we still find it impossible to believe that intimidation has been countenanced by the present Government, or that its practice has been possible on any considerable scale under their administration. And our scepticism is strengthened by the receipt of several telegrams from Zaghloulists in various parts of Egypt, the terms of which do not indicate any terror on the part of the senders.

### *Mesopotamia.*

The House of Commons accorded another field day to Mesopotamia last Thursday. An attack on the Government policy, as outlined by Mr. Churchill, was led by Mr. Asquith, whose main thesis was that "neither on the grounds of obligation nor on grounds of interest have we any stake in Mesopotamia or in Palestine at all commensurate with the demands that are being made upon the sorely tried British taxpayer," and that the prospect held out of reducing expenditure on the Middle East "depends upon a number of the most shifting, shadowy, nebulous and unsubstantial hypotheses that have ever been presented to the House." It is true that Mr. Churchill had hedged around his picture of the future with a formidable number of "ifs." They represented the ordinary caution of the politician, and not one of them would be unattainable or even an improbable hypothesis, if common sense were allowed to determine our Middle Eastern policy. The country, without doubt, has had a "bad press," mainly because, until Mr. Churchill spoke on the subject, it connoted for the public merely irresolution, unregulated expenditure and departmental rivalries. A native rising and the costly liquidation of military rule afforded facile points of attack, and ignorance regarding a remote part of the world did the rest. One day it will be recognised that Mesopotamia is worth every penny that has been spent upon it, if only because it has been the means (when India and every other consideration had failed) of bringing back to lines of sanity and commonsense Great Britain's Near Eastern policy.

### *Anti-British Persia.*

The *Pioneer* reports that a number of deputies of the Persian Mejliss are demanding the arrest and imprisonment of the late Prime Minister, Seyyid Zia ed-Din, and that they have embodied this demand in the form of a proclamation, which is extremely anti-British in tone. Seyyid Zia ed-Din is accused of having been too friendly to Great Britain; and the proclamation urges that the development of Persia must take place without assistance from any European Power. If the forty and one deputies who sign this interesting statement really believe that Persia is capable of getting on her feet again without outside assistance, they are undoubtedly within their rights in endeavouring to inspire their fellow-countrymen with their own optimism; and they are not the first politicians to act upon the faith which is in them. How far that faith is justified the future alone can show; but we doubt whether many Persians will share it just now; and outside Persia it will certainly fail to arouse enthusiasm among the people who know the country. The desire to stand unaided is, of course, natural and commendable, but to attempt the feat too soon can lead only to disaster. Unfortunately, in spite of official assurances to the contrary, it looks as if a wave of strong anti-British feeling is sweeping over

Digitized by Google

Persia just now, carrying with it some of those who only a short time ago were most friendly towards this country; for according to the *Pioneer*, one of the signatories of the proclamation referred to above is the Prince Firouz who was one of the authors of the Anglo-Persian Agreement. If this report be correct, we shall prefer to think that the Prince has been forced by circumstances to take a step of which he cannot really approve. At the same time we must bear in mind that the vigorous measures taken by Seyyid Zia ed-Din and his Cabinet created a great deal of bitterness which, in Persia, was bound to bear fruit sooner or later.

### *Bolshevist Successes.*

An illustration of the difficulties with which the Persians will have to contend in the near future is afforded by the announcement that Bolshevist troops have reoccupied Resht. If Teheran is surprised by this news it must indeed be unsophisticated, and its surprise will be shared by very few people outside Persia. If any explanation of the move has been vouchsafed to the Shah's Ministers, they have not apparently thought it worth passing on—and in this matter their judgment is likely to be sound. The Bolshevists are in fact making headway rapidly in that part of the world. They are reported to have overrun Zangezur, the stronghold of the Armenian National Party, which has been eliminated; and they have been enabled to open up communication with Persia by way of Batoum. The Persians, therefore, may very well think that it is good policy to turn a blind eye on events at Resht; and since they have no force of any kind capable of offering effective opposition to the 'Reds' it would be unkind to condemn them. It is impossible, however, to forget that they owe their defencelessness chiefly to their own choice and to that very desire to dispense with foreign assistance which turned them against the Anglo-Persian Agreement, and which has just prompted the issuance of the manifesto against Seyyid Zia ed-Din. For the moment the influence of Moscow appears to be strong at Teheran, but in all probability we shall very soon see another change.

## THE WEEK AT HOME.

LONDON, Monday Evening.

### The Irish Negotiations.

Mr. de Valera has been in close conference with Mr. Lloyd George in Downing Street, but extreme reticence has been shown in the published official statements, which indeed have contained little more than the fact and the hour of meeting. Considerably less reticence has been displayed in some of the newspapers, more particularly in the *Morning Post*, which frankly wants to wreck the negotiations. One at least of its "accounts" of the proceedings has been denied as being wholly inaccurate.

It happens that, unlike some of the political correspondents of other newspapers, I was not under the Cabinet table or hidden behind the Cabinet clock during the conversations, and therefore I cannot pretend to give a full account of the proceedings. But it appears intrinsically probable that at present the ground has only been explored, and that no decision has been taken—indeed, even if they had been, they would lack the necessary element of decisiveness. It is known that Mr. de Valera's standpoint is practically Dominion Home Rule. To that, both in principle and in fact, Britain has no objection; it gives Ireland the status of a nation within the Empire. But the implications are important. Nationality implies internal unity, and Ireland is at present divided. Moreover, the political division is not artificial; it is a recognition by the legislature of the United Kingdom of a real division which is both racial and religious and political. De Valera, forced to recognise the existence of that division denies its permanent validity, and apparently wishes Ulster to possess autonomy only for a limited time, and moreover, to accept its constitution from Dublin and not Westminster. Since Ulster already has autonomy, and has obtained it direct from Westminster, I do not see that she stands to gain anything, while she may lose something, by conceding the point.

In any event, that is the crux of the negotiations, and the leading members of the Ulster Cabinet have been summoned to London to confer with Mr. Lloyd George. Their language up to the present in Ulster itself has been uncompromising on this point, and there is here a real conflict of policy. De Valera's attitude in practical boils down to very much the same thing as the old Nationalist policy; it is not separation, but it insists on Ireland being a unity with Ulster as an integral part it was on this rock that Mr. Asquith's Home Rule Bill was wrecked, and this is still the danger point of the present discussions.

For the time being, however, Ireland is engaging the unaccustomed benefits of peace; for except in Belfast where rioting has led to several deaths, the destruction of property, and the calling out of the military, the truce has been loyally observed.

### The Pacific and Disarmament.

The forthcoming conference of the Powers at Washington has been rather overshadowed by the Irish negotiations at home. Opinion here is all in favour of the American invitation, although some of the advocates of the League of Nations show a little jealousy lest Washington should supersede Geneva. But it is already clear that the course will not be all plainsailing. Those who had already dated the Millenium provisionally

for this autumn are perturbed at the qualified Japanese acceptance, and the prospect of a general international conference on disarmament, with representatives of European and South American Powers, has filled others with doubt as to the prospect of any possible agreement. The more inclusive the conference, the less is it probable, I fear, to arrive at any permanent conclusion, and it is more than possible that some unregenerate countries, while professing to bless peace, will regard any limitation of armaments as in effect a limitation of their sovereignty; in which event, the limitation would itself be so hedged about with limitations as to be practically worthless.

Public opinion here assumed from the first that Mr. Lloyd George would be the proper person to represent this country at Washington—it is known that he wants to see America as much as the Americans want to see him—and people were, therefore, indignant at a violent personal attack upon the Prime Minister, and on Lord Curzon—who as Foreign Secretary, would necessarily be present at Washington—in *The Times*. It was stated that the Prime Minister was universally distrusted, and that Lord Curzon and his Department were pompous and inefficient, with much else to the same effect. It was probably the last shot in the Northcliffe—Lloyd George vendetta, for Lord Northcliffe is just off for a tour of the world, to see for himself those incredible regions—*partibus infidelium*—on which the light of the *Daily Mail* never shines. But the reception of this attack was enough for *The Times*. It returned to the denunciation of Lord Curzon the next morning, but was significantly silent as regards the Prime Minister. In its own interests it would do well to drop this kind of thing; it does not in the least convince the public, but it does harm to the traditions of impartiality which Printing House Square in other respects, lives up to very fairly.

**Coal Again.**

The consumer pays. Although the miners have accepted a reduction of wages, and the mine-owners have forsworn their profits, the price of coal has risen by anything from one to three shillings a ton. The excuse is given that the extra money represents the cost of putting the mines in order again; as the public did not ask the miners to stop work or the owners to create a situation in which a strike was inevitable, there is a sort of poetic injustice about the rise which may appeal to the intelligent foreigner, but hardly appeals to the ordinary Englishman. It is said that the price of coal will "probably" fall as soon as stocks are "adequate." But we seem to have heard that assurance before, and the world is less credulous than it was.

**Dr. Addison's Resignation.**

Dr. Addison has resigned his post as Minister without portfolio as a protest against the Government's reversal of his housing policy. He has consulted his own dignity in doing so, for it is not pleasant to have one's schemes turned down when they have been partly carried out, even on the score of economy, and it is the fact that he has had rather hard measure. He built houses when they were very badly needed; they cost large sums, but at least they got built at a time when private enterprise in the building trade did not function. They were roomy and well-planned, and to that extent would raise the standard of cottage housing.

The weakness of Dr. Addison was that he had no idea of money—a deadly sin which only poets, who are proverbially mad, may commit with impunity; and he seems also to have believed that health can be secured by a bureaucracy, a matter in which the British public was, and is incurably agnostic I always wondered what Dr. Addison, an amiable man, was doing in politics; he merits that most deadly epitaph—he was popular even among his enemies.

**Mr. Fisher.**

Now that Dr. Addison has gone, the malcontents are likely to concentrate all their efforts in getting rid of Mr. Fisher, the Minister for Education. He also is an idealist, and the particular form of mental aberration which he affects is to believe in education. (This disease is incurable). Dean Inge has opened fire upon him, and Lord Rothermere drops pot-shots at the Minister in the *Sunday Pictorial* every week. But I doubt whether this campaign is so effectual as the other, and Mr. Fisher is made of sterner stuff than his fallen colleague. Moreover he has more real support from public opinion. The masses had no particular belief in Dr. Addison's schemes for making them healthy. But they have woken up to the need of education. The medical faculty, too, were against the Minister for Health—they always dislike and distrust the medical man turned politician. But the teachers, who are now a fairly strong and a very vocal body, are whole-hearted for Mr. Fisher, and the support of that army is an important factor for him personally. As a matter of fact the total amount spent on education in this country is insignificant when compared to other items in the national expenditure and the real wealth of the country.

**October in July.**

The prolonged drought and blazing sunshine are having a serious effect. Already the landscape has an autumnal aspect, and the yellowed leaves are falling from the trees in the more exposed woods. There have been bad heath fires everywhere, and in some parts of Essex the pasture has caught fire and burnt; while Hayes and Keston, and many other commons which are celebrated as beauty spots, have been destroyed. Almost every year, of course, we have gorse fires, but it is not often that trees are burnt; several plantations of larches have blazed away during the past few days, and on Keston Common the peat caught fire. It was a curious sensation to walk over the springy peat and heather a few days ago, and watch the little spirals of smoke pushing upwards from beneath; every now and then they burst into flame, and it was necessary to move rather quickly.

It will take several years before the beauty of these places is restored, and it gives an eerie sensation to walk over the blackened commons. At the very height of the summer they should be bursting with life, but the whole balance of nature has been upset. The hare, who should "sit snug in leaves of grass," has bolted, and with him butterflies and most of the birds, who are hard put to it to find food. Thrushes still seem to find snails, although the latter have begun to aestivate—a rare thing for *Helix*, in England; but it is said that rooks have become carnivorous. The worst sufferers perhaps are the moles, who find it impossible to burrow through the hard-bake, and are dying by the hundred. Altogether it is an abnormal season. OCELLUS.

# THE NEAR AND MIDDLE EAST.

*(From Our Own Correspondents).*

## EGYPT.

Cairo July 3.

**Departure of the Official Delegation.**

As the cables will have informed you, the Egyptian Official Delegation sailed on Friday last by the s.s. Vienna from Alexandria for Trieste, Paris and London, and by the time this reaches you Adly Pasha Yeghen and his colleagues will have established contact with Lord Curzon and those who on behalf of the British Government are to negotiate with the representatives of the Sultan the agreement which is to establish the future relations between Great Britain and Egypt.

The departure took place without incident and from the point of view of the Cabinet in a most successful manner. There had been a tremendous amount of talk of what the Zaghloulists would do to prevent the Delegation leaving, or at any rate to show that the Delegates did not have the confidence of their fellow-countrymen. However, the determination of the authorities to give short shrift to anyone attempting to demonstrate or to create disturbances in the Docks quarter on the one hand and the steady secession of supporters from the Zaghloulist camp on the other hand evidently damped the ardour of the more extreme adherents of the "Wafd.," and even their eleventh-hour attempts to get the shops to shut as a protest and to disorganise things by a strike of porters and cabmen proved absolutely abortive.

Had it not been for the few extra policemen one noticed at the corner of the each street or passage in the low quarters as one passed on one's way to the ship, and for the guard of honour which with bayonets fixed held us up at one point as it marched to the quay, we should really not have known that a political event of any importance was taking place, or that the district through which we were passing had but six weeks ago been the scene of serious disorders. No more significant indication of the change which had come over the city could indeed have been wished for than the fact that Adly Pasha was able to motor unmolested through this district on his way to his ship without any more protection than that afforded by two motor cyclists who rode ahead of him to clear the route.

Before the ship sailed a large reception was held on the quay, in a tent specially erected for the purpose. The assembly comprised prominent notables from every Mudiria except Aswan and Port Said—where owing to the distance, the inhabitants were asked by Adly Pasha not to trouble themselves—the leading Sheikhs of Al Azhar and the religious bodies, the dissentient members of the "Wafd," etc. As is usual on such occasions, addresses were delivered by leading Egyptians, and one and all were couched in terms which left no doubt as to the feelings towards the Delegation of the speakers and and those whom they represented. Particularly was this so in the case of Sheikh El Khodary, Inspector in the Ministry of Education, and an influential "Alem," whose words aroused his hearers to enthusiasm, and whose speech was regarded as a most important contribution to the vote of the confidence which the gathering represented, and to which it testified in a series of telegrams sent off to Mr. Lloyd George after the departure of the Vienna.

The centre of interest in the Egyptian political quest on has now been transferred to London and a lull may be expected in the local situation, lasting until the first report of the progress of the negotiations reaches here. It is not anticipated that much will be done until late in August, and it is considered highly probable that the Delegation will not be able to return until the end of the year; for it is recognised that, apart from discussions of questions of principle, the drafting of the agreement will require a considerable amount of time.

From what can be gathered from conversations with the delegates and their friends, Adly Pasha and his colleagues while recognising the difficulties of the task confronting them are confident that they will be able to come to an agreement which will satisfy the more reasonable of their supporters. Naturally the extremists and those who have a personal grudge against the Cabinet will disapprove of whatever they bring back with them. Likewise those who want no change will oppose the settlement obtained. But provided the Delegation are able to show that what they have obtained is the maximum that in the circumstances could reasonably be expected, and provided the members of the Cabinet left behind carry on firmly and wisely, it should be possible for them to get the country to accept the settlement.

**Bolshevist Activities in Egypt.**

For some time there has been much talk of activities of Bolshevist agents in Egypt, and considerable interest was taken some little time ago in the announcement which appeared in a Beyrout paper, and later in a Jerusalem weekly, to the effect that a prominent emissary of the Bolshevist Government was on his way to Egypt in order to come to an understanding with Zaghloul Pasha in regard to Bolshevist propaganda. The fact that it was known that the Pasha was a shareholder in and maintained close relations with the *Daily Herald* accentuated this interest, and the local press has been full of paragraphs on the subject.

For a time interest died down, but is has now been reawakened by the news of the arrest of the emissary mentioned above, and certain organs are displaying some anxiety as to the progress which has been made in the sowing of Bolshevist doctrines in the country. Enquiry in official quarters has elicited the information that the man in question is not the Bolshevist emissary he represents himself to be. It appears that he impersonated the latter for the purpose of collecting money and that the emissary in question has not yet arrived. The situation as regards Bolshevist activities is well in hand and every precaution is being taken. The danger of any successful propagation of Bolshevist ideas lies, of course, in the strained relations existing between tenants and their landlords, the latter of whom have for some time been extorting exorbitant rents, which under present conditions it is quite impossible for the tenants to pay. The recent creation of "Rent Courts" all over the country should go a long way to remove the danger through it must be admitted that the soil has been very fertile for the implanting of the social poison of Bolshevism.

## SUDAN.

Khartoum, July 3.

### The Political Situation.

The remarks of "A Passer by in Egypt" in a recent issue of *The Near East* anent Omar Pasha Tousson would appear to have been written with a certain amount of inside information, in view of the Prince's articles on the Sudan question, which appeared in the *Mokattam*, and *Afkar* of June 17, and the *Ahali* of June 16 last. It is interesting to note that Omar Pasha Tousson follows the same line of reasoning as Lutfi Bey el Sayed, in his solution of the Sudan Question, as submitted to the Egyptian Delegation on February last. Both writers persist in their statement that the boundaries of the Sudan reached lake Victoria Nyanza, and also in the absurd statement that Uganda became an Egyptian Protectorate towards the end of 1874. The perfidious British Government is accused of putting unfair pressure on the Egyptian Government, in forcing the evacuation of Uganda, which the Prince states was subsequently seized in 1890. The articles are not sufficiently interesting to be quoted *in extenso*, but one or two statements have occasioned some little amusement amongst the inhabitants of the Sudan. The most amazing confession is: "We would rather be governed by the Sudanese than be separated from them." This is especially interesting in view of the attitude of the Egyptian residents towards the Province police, who are recruited exclusively in the Sudan. Practically 60 per cent. of the minor police-court cases deal with Effendia and Egyptian soldiers refusing to take orders from black policemen, endeavouring to preserve law and order in the town. In the *Afkar* of June 17, there appeared a poem signed "Súdanese" in which the author attempts to explain to the Egyptian nation that the Sudanese love and admire their Egyptian co-religionists, but that they dare not openly profess their inclinations, owing to the sword of Damocles which is ever held over their heads. He tells the usual lies about the theft of land and property from natives in the Ghezireh by the Sudan Government, and even goes so far as to cite the recent "grading" of all officials in the country as a deep laid scheme wherewith to blast the advancement of any Sudani Government employee. The absurdity of the whole effusion is only too apparent to anyone who has ever visited the Sudan and attempted to obtain a concession, or purchase property in the shape of land or buildings from a native. In fact, the plaint of the non-Sudani trader is that everything is done to protect the native at the expense of the foreigner. Without going so far as to agree with this extreme view, it may be said in all fairness that the attitude of the Government is distinctly paternal towards the native; so much so that in certain districts the natives have become decidedly swollen with a sense of their own superiority to the foreign trader, who is liable to haled before the nearest British Inspector for any fancied insult or crooked dealing.

There is very little doubt that the powerful Hadendowa clan would fiercely resent Egyptian administration. They are intensely loyal to their British inspectors, and pride themselves on the fact that they take no orders from the Effendia class. To take another instance, the Aliab-Dinkas and Garjak-Nuers are reported to have excused their risings, on the plea that their revolt was intended to attract the attention of the Government to that fact that there were no white magistrates permanently resident in their territories, and consequently the success of any civil action amongst themselves depended on the amount of backsheesh paid by either party to the suit, to the Egyptian Effendi before whom the case would be tried, who in most cases would be a sub-Mamour, corresponding in rank to a Mulazim Tani, or second lieutenant, the lowest commissioned rank in the Egyptian army.

The Sudani has not forgotten that in 1919 a force of Egyptian infantry were sent form Khartoum to restore law and order in the Luxor and Assuan districts, and that two or three companies of Black troops accompanied them to see that they performed their allotted duties; nor the story of how some few score ill armed Nubas chased a whole battalion back to their block house, and calmly emptied and took away with them some hundreds of sand bags under the very noses of the demoralised conquerors of Ugands, etc.

The lower class Egyptian is utterly inferior to the Sudani in morals and everything with regard to personal and mental cleanliness; and the possibility of the inhabitants of this country submitting to the rule of a despised and decadent race is too remote for consideration. Omar Pasha Tousson and his supporters would do well to visit the country and disabuse their minds of the delusions from which they appear to suffer.

---

## YUGOSLAVIA.

### A Political Calm.

Zagreb, July 8

There is a calm in the political world after the passing of the Constitution. The Assembly has resolved itself into a regular legislative parliament, and adjourned for a holiday, well earned, leaving a couple of committees to prepare the rules of procedure, draft bills, and so on.

Behind the scenes the different parties are playing for position, and there is plenty going on. The Peasant Party is holding meetings all over the country, justifying its action in voting "against," and apparently doing plenty of recruiting. It is said that a number of Democrats are joining them, and that they are going to undertake a campaign in Croatia, to counteract the activities of Raditch and his merry men. It is interesting and satisfactory to note that Dr. Koroshets and his clericals are flirting with the Government.

M. Pashitch is confined to his room for a few days, which means a rest from politics; but there are clear signs of a split in the Cabinet. The Minister of War, General Hadjitch, disapproves of the clause in the Constitution by which the Court of Cessation has jurisdiction as a final court of appeal from courts martial, and will probably resign, but this has no political significance: his successor will probably be General Vasitch, who was well known among the English at Salonika. If the Bosnian Mohammedans split among themselves, the partial secession will endanger the Government's majority. On the 14th they are holding a general meeting of the party in Serajevo, which will have considerable influence on the destiny of the coalition. The resignation of Dr. Velizar Jankovitch is definite, so a new Minister of Communications will be required; and Dr. Kumanudi will not long remain Minister of Finance. Dr. Miletitch and M. Uzunovitch will probably also retire, as their Radical constituents in the Voivodina are not satisfied with their attitude in the matter of compensation to the Bosnian landowners. So it is a pretty complete recasting of of the Cabinet which awaits M. Pashitch. Parliament has been adjourned till October, so he has time enough

Digitized by Google

**The Crown Prince.**

The Crown Prince Regent left Belgrade on July 4, for Paris, accompanied only by his uncle, Prince Arsen, Prince Paul, and Princess Helen. On passing through Zagreb, he left the train and motored through the town where he was greeted with enthusiastic ovations. If the Croats are not too delighted with the Constitution, which abolishes their ancient office of Ban, there can be no question about their affection for their Prince. His Royal Highness has a very attractive personality, and on his visits to the villages, mixes freely with the peasants and talks to them. The simple souls are amazed to see a sovereign who can talk to them in their own tongue. They are not accustomed to democratic methods and the Karageorgevitches are a thoroughly democratic house. There is a story that when the Prince was talking to one worthy in a village not far from Zagreb, the peasant said to him: "So thou art the Regent?, Well, let the Serbs keep their King Peter, but do thou come and be our king." And of course the dastardly attempt on his life has provoked a general chorus of relief and thankfulness that he escaped, and admiration at his courage and coolness. After all, he is a soldier as well as a prince, and has been under fire before.

**Communists in Disgrace.**

The Communist Party is of course thoroughly discredited by the attempt on the Regent. Three more members have been arrested for connivance and all the others are struggling hard to clear themselves from implication in the plot. It looks as though about half the party will move along towards the right and join up with the Socialists, if they will have them, and in any case they propose to exclude from the party such elements as Italian or Magyar agents and Frankovists who were using the party for their own purposes. They are also excluding the three arrested terrorists. In fact, they are doing all they can to show that the Communist Party here is a nice, tame, inoffensive party which shudders at the thought of terror. They will not be of much use to Trotzky.

The miscreant who so nearly converted a triumph into a tragedy has been giving the authorities plenty of information about his accomplices. He has incriminated the three members of the Skupshtina and persists in accusing them of having given him his instructions. They deny it, and affirm that they have never seen him before; and maintain they are quite gentle, inoffensive, purely theoretical Communists, and shrink from the very thought of blood. Stejitch, the would-be murderer, does not like the well-fed appearance of his dandified leader, whose silk socks seem out of place in the felon's cell. The Communist Party is shocked to find that its theories may be too literally interpreted, and many of its members are hurriedly disavowing both their policy and their principles. Meanwhile, the police have discovered large depots of bombs. It is interesting that the technical advisers of the Minister of the Interior have shown that the bomb used was a German one, and that Stejitch delayed a second before hurling it, with the result that it burst prematurely, and so a great tragedy was spared. Had he thrown it a second earlier, or had it been a French bomb there would inevitably have been great loss of life. It is reported that an immense number of arrests have been made, some papers saying as many as 700, but probably many of these are merely preventative or for purposes of enquiry. But it is certain that the police have secured a large number of terrorists. They are nearly all foreigners, but include a few misguided Serbs who learnt their pestilential theories in Russia.

**The Bolshevist Plot.**

The evidence of the accused men is throwing a flood of light on the Bolshevist plot to destroy the State. There was to have been a whole series of murders of public men. A store of explosives has been dug up at Novi Sad. This was destined to destroy the bridge over the Save at Brod, so that when the revolution broke out in Bosnia and the Voivodina at the same time, the movement of troops would be interfered with. An important witness is a Hungarian plasterer who was a member of the executive committee of terrorists at Novi Sad. He states that there is a central communist council at Belgrade, which issued orders to the terrorist committee. A conference had been held in April, which was postponed to enable the members to meet the Bulgarian communist, with whom action was to be concerted. The main motive appears to be orders from Moscow that it was quite time that the Communist in Yugoslavia did something to justify their existence, and partly revenge for the energetic measures taken by the Government at New Year, when a big plot was nipped in the bud.

---

## ROUMANIA.

Bucharest, July 5.

**Parliament.**

Despite the systematic obstruction of a certain section of the Opposition, agrarian reform has made good progress this week in the Lower Chamber. Important modifications have been made in amendments proposed with the consent of the Government. It has been decided to expropriate the entire arable area of the estates belonging to foreign landowners, of absentee landowners, and with certain exceptions, of estates which have been let consecutively during the last ten years. The principle of expropriating the landowners and not the estates has been admitted; thus, in future, no person will be allowed to possess more than one estate. The areas, which any one landowner will be permitted to hold have been fixed at: 200 hectares in the mountainous and hilly region; 250 hectares in the plains with average population and 500 hectares where the population is scarce.

Foreign landowners are permitted to retain the forests, vineyards, factories, mills, houses, parks, etc, except such as are needed for educational and sanitary purposes. These properties much, however, be sold within three years, they will be sold by law. The Opposition severely criticized the Government for this concession, but M. Take Jonescu pointed out that it would be an untimely and exorbitant burden on the Exchequer to buy up these properties at the present inflated value. The debate continues.

The Minister of Finance introduced his Bill for progressive taxation on fortunes made since the war. The general discussion was short, and the debating and voting of the various items of the project proceeded rapidly; and the Bill passed in three sittings, with few alterations.

In order to pass all pending Bills during this sessions it has been decided that two, or even three sittings should be held daily, Sundays and holidays not excepted,

**Miscellaneous News.**

The Government has forbidden the entry into the country of all those Hungarian newspapers which are carrying on a defamatory propaganda against Roumania.

Energetic action is at last being taken against the profiteers in home products, whose demands have been truly extortionate. Maximum prices have been fixed, and offenders are made liable to severe penalties and fines. At first the profiteers showed fight, withdrawing such commodities as fruit and vegetables from the market; but finally they had to give in, and sell at the fixed prices— which are, however, still two high for the average public. Action along similar lines is expected against offenders in other trades, and it is to be hoped that a return to normal conditions will be brought about in due course.

## GREECE.

Athens, July 2.

**Greece's Reply.**

The reply to the Allied Note handed in to the Entente representatives last Saturday was exactly what everybody expected it to be. The approving articles of the entire Athens and provincial press do not leave the slightest doubt that for once the Government has acted in accordance with the wishes of the people.

To those living in Greece and who are in a position to understand the Greek point of view, the refusal of Allied mediation needs no explanation. The readiness with which the men, in spite of the more or less continuous fighting in which they have participated since 1912, responded to their country's call once again, the absolute confidence of the nation in the ultimate successful issue of the struggle and the compensations to be gained therefrom, and the implicit belief that only if Mustapha Kemal is completely crushed will the treaty of Sèvres remain intact, explain the decision of Greece to continue the war even though she be left entirely to her own resources.

In the meantime the two armies are still facing each other and with the exception of the Greek evacuation of Nicomedia (Ismid) of which Athenians did not know until forty-eight hours after the news was published in London, and which we are told was a very necessary thing, seeing that the Greek division operating in that sector was required elsewhere, nothing of any particular importance has happened on the long front. Last week's rumours of an immediate advance proved false. Meanwhile the Government is maintaining a fish-like silence, and the press censorship commonly known here as "Madame Anastasia," is playing havoc with the columns of the daily papers, preferably those with Venizelist tendencies. Many an article on the Near East situation published in leading London journals and telegraphed to Athenian papers by their correspondents has been mercilessly mutilated by the over-zealous Greek press censor. We quite expect to receive the first news of the advance from London, unless, of course "Madame Anastasia" puts her foot down and orders us to wait a day or two until the official *communiqué* has been prepared.

**The End of an Occupation.**

A telegram received by the Ministry of Marine announces the departure from the islands of Lemnos, Imbros and Tenedos of the British garrison detachments. The first two islands had been under British occupation since the early part of 1915, about a month or so before the famous landing at Gallipoli, by the 29th Division, took place. A very hearty send-off was given to the departing troops by the Greek islanders, who, after cheering for Great Britain, told the officer in command that they would never forget the kindness and the exemplary conduct of "Tommy" during the six years of occupation.

**Earthquake in Epirus.**

It is reported from Janina that an earthquake took place in the district of Philiata as a result of which nineteen houses as well as the church and the school of the village were completely demolished. With the exception of a young Mussulman girl who was buried under the debris, there were no other victims.

## TURKEY.

Constantinople, July 11.

**The National Pact.**

By the time this reaches England the result of the attempt to commence direct negotiations with the Nationalists will be known, and as the Missak-i-Millie, or National Pact, has been put forward as the very minimum conditions under which the Nationalists would agree to commence negotiations, a translation of the original text may be of interest. It runs as ollows :—

The Members of the Ottoman Parliament having approved and signed the National Pact, declare that the principles therein enunciated embody the maximum sacrifices to which the Ottoman Nation could possibly consent for the purpose of ensuring a just and durable peace.

1. The disposition of those territories of the Ottoman Empire inhabited exclusively by a population amongst which Arabs are in the majority, and which at the time of the Armistice of October 30, 1918, were under the occupation of enemy

armies, should be determined in accordance with the freely expressed will of the local population. Those parts of the Empire situated on either side of the Armistice line and containing an Ottoman Moslem majority of which the constituent elements, united by religious and cultural bonds, and imbued with the same ideals, are animated by a mutual respect for their national and social rights, form a whole which cannot under any pretence whatever be justly or practically divided.

2. With regard to the disposition of the three districts of Kars, Ardahan, and Batoum, the population of which affirmed immediately after its liberation its will by a solemn vote to be re-united to the mother country, the signatories of this Pact agree that if necessary a second plebiscite may be held.

3. The juridical status of Eastern Thrace, the settlement of which has been subordinated to the peace with Turkey, should be based upon the freely expressed will of its population

4. The security of Constantinople, which is the capital of the Empire, the seat of the Khalifate and of the Ottoman Government, as well as the security of the Marmora Sea should be unassailable. This principle once defined and recognised, the signatories are prepared to subscribe to any decision that may be taken by the common consent of the Imperial Government, on the one hand, and the Powers interested, on the other, for the purpose of ensuring the opening of the Straits to world commerce and international communications.

5. The rights of minorities will be confirmed by us on the same basis as those applied to minorities in other countries by existing conventions concluded by the Entente Powers, their adversaries, and certain of their associates. On the other hand, we are firmly convinced that Moslem minorities in neighbouring countries will enjoy the same guarantees in regard to their own rights.

6. For the purpose of ensuring our national and economic development, and of endowing the country with a regular and more modern administration, the signatories of this pact consider that the enjoyment of entire independence and full liberty of action are conditions *sine qua non* of national existence. We are therefore opposed to every kind of juridical and financial restrictions of such a nature as to hinder our national development. The conditions for the settlement of the obligations which will be imposed upon us should not be in contradiction with this principle.

The National Pact was signed in Constantinople on January 28, 1920, by the majority of the Chamber then in existence. The text is sadly reminiscent of the famous Constitution, for none can deny that on the surface it is in harmony with the cardinal axioms of democracy. But it will be remarked, without a minute analysis, that several points, notably the whole of paragraph 6, are open to various interpretations. In regard to paragraph 5, it is worthy of note that the Angora Assembly has recently voted against a Bill for the election of a certain number of non-Moslem deputies to the vacancies in the Chamber. This does not argue well for the rights of minorities.

From the British point of view, the most important point is contained in paragraph 4, and it is in regard to the precise interpretation of this paragraph that the Nationalists are most reticent. It is affirmed that the Treaty between the Soviet Government of Russia and the Angora Administration contains among other secret clauses certain arrangements regarding the Straits, and the Nationalist press has on more than one occasion afforded a clue to the nature of the arrangements in question by referring to the necessity for settling the Straits question with the joint consent of the States bordering on the Black Sea. The deduction is obvious.

### What is the Position Now?

This question is on everyone's lips at the present moment, but no one has been able to suggest a satisfactory answer. The Greeks have rejected the Allied offer of mediation, and the Kemalists have by their reply to the British attempt to commence negotiations practically rejected the hand outstretched to them. So far as the Greeks and Turks are concerned the position is precisely what it has been for months. There is no prospect whatever of a speedy solution to the stalemate position in Anatolia. Those who discounted the loudly trumpeted announcements of a lightning offensive on the part of the Greeks have been proved right; for despite the much advertised goings and comings of Constantine and his generals there are as yet no signs of a renewal of a large scale attack. The Kemalists also are still sitting quiet.

The way to Constantinople is now open, and it is becoming evident that Greek diplomatists are counting upon the Allies' becoming involved in complications with the Kemalists sooner or later, when there will be a better chance of the Greeks receiving that support which is absolutely necessary if they are to gain anything like a decisive victory in Anatolia. There is, however, very little to encourage this hope at the present moment.

The Kemalists, on the other hand, believe that if they can hold on long enough the Greek army will fall to pieces, and that they will then be able to drive them into the sea. This also is very much open to discussion.

The one circumstance that would speedily put an end to Kemalist intransigence would be the end of Bolshevism, and it looks as if the world will have to wait for that blessed moment before there will be peace in the East.

## CYPRUS.

Nicosia, June 28.

### Proposed Agency in London.

Under the heading "official representation of Cyprus in London," the "Voice of Cyprus" (*Phonetes Kyprou*) of June 25, in its leading article proposes that some person of influence should undertake the advocacy of the cause of "union with Greece." Whatever line of action may be adopted henceforth in the island, whether the Greek members of Council are to absent themselves on missions, or are to continue the struggle in the Council, it is desirable that the campaign should be carried on *pari passu* both in Cyprus and in London. There are, it says, among the Councillors men of ample means and of a patriotism which might consent to the sacrifices which are needed for such a duty. But if this suggestion should not be found practicable, there is in London a man who is eminently fitted to undertake such an obligation, viz., M. I. Gennadius, a distinguished diplomatist, an ex-Minister to St. James, and a *persona grata* in England. It is suggested that he should be approached with the object. But perhaps it is hardly realised in Cyprus that M. Gennadius is one who very thoroughly understands the situation in the Near East in all its bearings, which is more than can be said of some Cypriots, and that it is more than unlikely that he would in present, or indeed any, circumstances fall in with such a project.

### The Holy Synod.

The *Phone* publishes a long *apologia* from the Bishop of Kition, Nicodemus, in reply to the attack on that body. It published also a prompt and vigorous rejoinder, and appears to have decidedly the best of the argument. The principal criticism related to the failure in results of the school for training clergy founded by the late Bishop of Kition, Metaxarches, afterwards Metropolitan of Athens, and now in New York. After 10 years only 9 of its students have joined the ranks of the clergy. Then, as regards the failure to appoint a mixed Council of clergy and laity for the administration of Church properties, the paper speaks out plainly in favour of urgently needed reforms. The ecclesiastical revenues in Cyprus should amount to about £200,000. How is this large amount spent? "It is spent," says the *Phone*, "at present, we will not say aimlessly, but certainly without system or method"; whereas, if wisely administered, it would suffice for all ecclesiastical and educational needs, and leave a large sum which could be devoted towards increasing the emoluments of the poor clergy. It may be hoped that the time is not distant when the properties of the Monasteries and bishoprics—especially the former—will be controlled by a competent body for the real benefit of the island church. For years past a timid and halting opposition has protested against the present wasteful and out-of-date modes of administration, which are quite out of harmony with public feeling. Possibly there will be a real move forward now that the matter has been boldly and seriously brought into public discussion in the Press. The *Phone* certainly deserves much praise for having taken the initiative.

# PRESS ON THE NEAR EAST.

**Mesopotamia.**

In the *Daily Express* of July 12 is an article entitled "Looking for Trouble in 'Eden'" written by M. H. A. Morley. Mesopotamia, says the writer, was, when he was there, a land where work was anathema, and where "the race for wealth and power did not even seem worth while."

> But trouble will certainly come if an attempt is ever made to make the Arab an industrious man. They say they have all they require, and ask why they should work for more. They have lived their present life for centuries; they do not know what better conditions mean, and it would be only wasting time to attempt to explain. The Arab is becoming restive now. He hears of irrigation schemes, which have only one meaning for him; namely, forced labour. In such an event the present, army of 75,000 would require to be trebled, and the result even then might very well be chaos, Fortunately there is small probability of such a contingency arising, at least in the near future- The present unproductive expenditure in Mesopotamia is very high, and at a juncture when the country should not allow money to be expended on unproductive schemes, to add the couple of hundred million irrigation scheme, which may or may not become productive a couple of decades hence, would appear to be perilously near to lunacy. Arabdom in Mesopotamia gravely discusses its affairs over coffee in the bazaar; and what is said in the bazaar is repeated in the village. Discussions are invariably of local interest only. One scarce dare hope they will ever rise to the uncertain heights of the consideration of an Empire's finances.

**Great Britain and the East.**

A recent issue of the *Morning Post* has a very characteristic article upon "Realities and the Past." In remarking the presence of the Egyptian Delegation in London, it says:—

> No British statesman can seriously contemplate the granting of full independence to Egypt without asking himself frankly and honestly the question whether th Egyptians can govern themselves. To the answering of that question the recent riots in Alexandria ought to be of considerable help. For the plain fact emerges from the dust of these conflicts that the Egyptian Government had to call in British soldiers to restore order, and that if it had not been for their assistance the lives and property of Europeans would have been destroyed by a fanatical anti-European mob. The future of Egypt concerns other countries than Great Britain and Egypt, and certain influential Italian newspapers have not been the only quarters in which since the riots it has been thought advisable to change opinions about the presence of England in Egypt. If we withdraw from Egypt it does not follow that the Egyptians for long will be allowed to govern or misgovern their country. Other Powers, forced perhaps by events similar to those of Alexandria, may seek to occupy the positions evacuated by Great Britain, and thus obtain control of the strategic centre of the British Empire. If the Protectorate be unwelcome to the Egyptians by all means let it be changed, but why should the change be a loosening of the bonds between two countries which have mutually benefited from a close association?

And it proceeds in similar fashion to criticise Mr. Churchill's Eastern schemes:—

> Mr. Churchill has embarked upon an ambitious and daring scheme for giving to Mesopotamia a secure and national Government under the direction of the Emir Feisul. It is a solution of an acute problem which we have frequently advocated, but there can be no denying the fact that it is an adventure which may at any moment find itself on the brink of disaster. For, quite apart from the divisions and conflicting ambitions among the Arabs themselves, Mr. Churchill himself has admitted that the success of his enterprise depends upon a durable peace with Turkey. It is a pity that Mr. Lloyd George, then, did not think a little more of the Arabs and a little less of the Greeks when he fashioned the Treaty of Sevres. For by handing over Smyrna to the Greeks we have handed over Angora to the Bolsheviks, and a hostile Turkey and an intriguing Russia can make things very unpleasant in Irak. Again, an Arab is an Arab wherever he pitches his camp. He has the passions, the hopes, the love of his race whether he turns his eyes towards Jerusalem or Baghdad. A sense of racial injustice scoffs at natural boundaries; how much more, then, at the artificial frontiers created by man? Yet Mr. Churchill hopes to conciliate the Arabs of Mesopotamia, while he hands over their brethren of Palestine to the harsh yoke of the Zionists and their nominee, Sir Herbert Samuel. The Zionist rule is not only a tyranny, but a failure, and yet the Arab is to be asked to bow to the wisdom and submit to the decrees of the Power which fathered and imposed it. Britain owes everything to her prestige, but it is being frittered away in the East by such follies as the Balfour Declaration and the Treaty of Sevres. What the country demands is that all these problems should be considered as a whole, and that in contemplating measures for Alexandria we must think of their effects in Jerusalem, and that in settling the future of Smyrna we must not forget the possible repercussions in Baghdad.

**The Turkish Revolution.**

The *Manchester Guardian* is printing an important series of articles upon "Russian Policy in the East," written by Mr. Arthur Ransome, who, in writing them, reminds his readers that "he has had access almost exclusively to Russian and Turkish sources." In the issue of July 14th, he discusses the "Origin of the Turkish Nationalist Revolt: Its Motives and Methods," and he begins:—

> The first point that must strike any investigator into the Turkish Revolution is that whatever else the Turks whom we call Kemalists may be, they are not followers of Kemal Pasha or of any other individual leader. It was a grave mistake to assume that "the Kemalist movement" was a mere uprising of brigands and adventurers making use for their own purposes of the disordered state of Turkey consequent on an unsuccessful war. The movement is an actual revolution, with its own ideas, its own ideals, and, consequently, like the French or the Russian Revolutions, a thing of quite incalculable weaknesses and strengths, capable of unexpected collapses, of extraordinary resuscitations, and likely at any moment to produce one of those minor miracles which so terribly discomfit those prophets who leave out of count the unknown quantity of revolutionary vitality.

He proceeds to state that "there is plenty of evidence to show that the so-called Kemalist movement is part of the main course of Turkish history," and that its true nature is obscured to us because it is directed against ourselves. He then glances at the "rather disappointing history of Turkish liberalism," which has been characterised by the supremacy of the army. In an examination of Turkey's motives in the war, he finds that she entered it on the German side for two reasons:—(1) German diplomacy was a great deal cleverer in managing the young Turks then we were, and (2) a German victory offered greater hopes of recovering Mohammedan territory than an English one.

> Yet at the time of the signing of the Armistice, England, by simple revulsion of feeling, was probably the most popular foreign country in Turkey, although already the fact of the Russian Revolution made many look with new feelings towards Russia from another country where war had brought ruin, besides sharpening the edges of despotism and increasing the ower of the bureaucracy, who alone had grown rich on disaster and fat on other men's deaths. This last motive must not be omitted from any estimate of the revolt which followed, which was certainly in part a revolt against those who had stayed at home, a revolt of the fighting men against the profiteers. As for the Germans, they had long ago succeeded in making themselves thoroughly well hated in Turkey. Their intolerance of the time-honoured Turkish incompetence and laziness, their hectoring way with their allies, their slighting of their military pride, their steady pushing of Germans into responsible positions, had annoyed the men and alienated even those of the officers who had begun the war by being pro-German by calculation. On the other hand, the Turks really believed that the Allies meant what President Wilson said when he offered his Fourteen Points. They did not suspect for a moment that the peace they would be given would be anything like the peace of Sevres. They recognised their mistakes, and were prepared to give up a good deal, but they did expect a peace of reconciliation and not a peace of annihilation. They were undeceived with promptitude.

Consequent upon the very heavy conditions of the Armistice, almost all sections of the Turkish people were, in the first six months of 1919, united "in the common despair that makes revolution possible."

> The first signs of coming revolt from above were the activities of a secret society. This society (an unprinted account which I have seen in Moscow calls it "Karaul," but I am not sure whether that is a Russian translation of its name as "Sentinel" or a transliteration of Turkish, like the other proper names in the manuscript) had been formed towards the end of the war, when the moral disruption of the Young Turks and the complete failure of their policy became apparent. Those who sighed "to escape from the dirt of the decomposing corpse of the Young Turk party" decided to form an organisation which should unite the people to meet the impending catastrophe. This society admitted all shades of political opinion. Its motive was a resolve to save the Turkish people from "dismemberment and enslavement." It was characteristic of the movement that from the start admission to this society depended not on party but on political probity, and on having refrained from profiteering during the war, by which many of the Young Turks had badly compromised themselves. The younger officers played a great part in the organisation, a fact which, in Turkey, was of immense revolutionary significance.

# NEAR EAST IN PARLIAMENT.

## HOUSE OF COMMONS.

July 11.—Mr. Aubrey Herbert asked the Prime Minister whether seeing that the Greek landing at Smyrna was in direct opposition to his pledge of January 5, 1918, he will say whether this landing has given rise to the present situation and who was responsible for suggesting this landing? The Prime Minister replied that the landing at Smyrna was in no sense a departure from the pledge of January, 1918. That pledge applied only to the parts of Asia Minor and Thrace which were Turkish homelands Sir Robert Borden, the British Commissioner, who investigated the case of Smyrna, reported that the population was Greek in majority and not Turk. The landing was effected at the request of the British, French and American representatives at the Peace Conference.

Replying to a series of questions regarding Albania, put by Mr. Aubrey Herbert, the Prime Minister said that reference had only to be made to the Treaty of London of April 26, 1915, to find that a partition of Albania was contemplated by that pact. President Wilson never accepted that pact. The Albanian Government had approached the League of Nations with an appeal for intervention in certain local differences which had arisen with their neighbours. The Council of the League decided not to intervene pending the discussion by the Ambassadors' Conference in Paris of the question of the frontiers but expressed the hope that in the meantime all parties would abstain from provocative action, and that the Ambassadors' Conference would arrive at a decision without delay. The matter is, at this moment, being discussed in Paris, and at this stage it is not possible to make any forecast as to the course which the discussions are likely to follow or the decision which will be arrived at.

July 12.—Sir L. Worthington Evans informed General Surtees that two British Military officers are at present attached to the Greek army in Asia Minor for the purpose of keeping the Government informed of the situation.

July 13.—Mr. Harmsworth informed Mr. Swan that the total cost from June 5, 1920, to July 2, 1921, of the Don Cadet School for Russian refugees at Tel-el-Kebir was £23,680, the equivalent of 2s. 9d. per head per day. H.M. Government had assumed certain responsibilities for those Russian refugees now under British control. He hoped, however, to repatriate all the members of this school together with all other refugees as soon as possible, or else to establish them in Serbia.

Mr. Harmsworth informed Lord Henry Bentinck that there are still 25 British prisoners in the hands of the Kemalist Turks. There is no immediate prospect of their release owing to the refusal of the Angora Government to carry out the agreement concluded in London with their representative Bekir Sami Bey. There is no objection to attempts being made to send them clothing and supplies from private sources.

July 14.—Mr. Aubrey Herbert asked whether Yugoslav forces had invaded Albania. Mr. Harmsworth replied that the Serbian Government had assured us that there had been no movement whatsoever of troops.

The Colonial Vote was under consideration in Committee of Supply. The debate was opened by Mr. Asquith, who dealt almost exclusively with expenditure in Palestine and Mesopotamia. He concluded his speech by stating that it was his "considered judgment that the primary duty of His Majesty's Government at this moment in the Middle East was to put an end to the liabilities, as neither on the grounds of obligation, nor on the grounds of interest have we any stake in Mesopotamia —and the same is true of Palestine—at all commensurate with the demands that are now being made upon the sorely tried British tax-payer." He described Mr. Churchill's policy in Mesopotamia as "a staircase of fragile, precarious and crumbling hypotheses."

Sir William Joynson Hicks criticised the terms of the mandate for Mesopotamia and Palestine on the ground that they were likely to involve us in onerous obligations; he urged the Government to reconsider the terms of the Balfour Declaration in regard to Palestine and stated that, in his opinion, if that declaration were not reconsidered it will not be 5,000 British troops who will have to be kept in Palestine, but at least another couple of divisions. He pleaded that in regard both to Mesopotamia and to Palestine we should regard our debts in the same light as we have regarded our own debts of honour in regard to Housing and Agriculture here.

Mr. Tom Shaw, speaking on behalf of the Labour Party, considered that the real pivot on which the fate of Mesopotamia and the Middle East generally will turn is the establishment of a lasting peace with the Turkish Nationalists.

Sir Charles Yate expressed the view that the Emir Faisal would be unacceptable to the Shiah majority in Mesopotamia on the ground that he and his family belong to the Sunni sect. He would prefer to see the present rule under Sir Percy Cox maintained rather than trust everything to Arabs. He remembered how those Arabs first of all, when the Turks were in the ascendant, murdered the British wounded and robbed the British troops, and then, when the British were in the ascendant, they murdered and robbed the Turks. He remembered the report coming of how the Turkish Commander-in-Chief at Baghdad had sent a message to the British Commander-in-Chief saying he would like to join him in driving out all the cursed Arabs, and he thought if this had been done it would have saved us a lot of trouble and expense.

Sir Charles Oman supported Mr. Churchill's policy in Mesopotamia and added that it was a great blessing to have a policy of any sort put forward. As a student of military history he was doubtful whether it was wise to leave so small a force as 12 battalions of British troops in Mesopotamia. He regretted the tone adopted by some of the French papers regarding the Emir Faisal, and said he would be sorry if he thought that the French Government held the views expressed in some of the French newspapers.

Captain Rankin also supported the policy of the Government in Mesopotamia and put in a special plea for the Jelus who had been driven out from the region near Baghdad by Tamerlane and now, after much wandering, were returning to Mesopotamia. He hoped that Mr. Churchill would, in a country where tradition counts for much, think it worth while to establish a Jelu colony near Bakuba.

Replying on the debate, Mr. Churchill said that he had been mainly occupied since he took over his new office by the Middle East and problems connected with the Imperial Conferenci. When he saw the enormous sums we had been forced to spend in the Middle East, and the tiny sums which we were able to obtain for development in Africa and parts of Asia, he felt able to address himself to the task of further reducing expenditure in Mesopotamia with a renewed zest. In Africa one had the docile, practical population who only require to be well and wisely treated to develop great economic capacity and utility; whereas the regions of the Middle East are unduly stocked with peppery, pugnacious, proud politicians and theologians, who happen to be at the same time extremely well armed and extremely hard up. Since he had last spoken he had been dealing in addition to Mesopotamia and Palestine with the post-war problems on the Red Sea Coast and at the southern end of the Arabian Peninsula. A very large force had been maintained at Aden, involving a cost of more than half a million a year. He was glad to say that recently good reports had been brought about and two Arab forces had arrived at the outposts of Aden charged to make proposals for the settlement of all outstanding questions between us and the Imam. He hoped that in a very few days it would be possible to reach an agreement with the India Office whereby it would be possible to amalgamate the administration of Aden and Somaliland, the two territories which are really necessary to one another. If this amalgamation could be carried out in such a way as to effect the contemplated saving of between £200,000 and £300,000 a year it would well repay the trouble taken. The reduction of the number of troops in Mesopotamia is proceeding rapidly—the 45 battalions which were in Mesopotamia in the spring have now fallen to 22, or one less than the number he had mentioned in the House a month ago. So far from anything having happened in the interval since he last spoke, to make the authorities in Mesopotamia think they will not be able to reduce the force from next year to 12 battalions, they had now submitted a proposal to reduce it to 8 battalions in the course of the next twelve months. This is attributable to the improving condition of the country and the political situation in the country. The air route between Baghdad and Cairo is now in actual operation. On July 12, five aeroplanes traversed the entire distance in 11 hours as against the four weeks which it would have taken to get round by steamer. The Emir Faisal had been most warmly welcomed at Busreh, Baghdad, Kerbellah and at other important places. The Nakib of Baghdad, who has been President of the Council of State, and who might well have aspired to be regarded as a candidate for the Emirate, himself proposed that the Emir Faisal should be invited to assume the throne of Irak. The following motion has been passed by the Mesopotamian Council of State:— "The Ministers passed unanimously a resolution declaring the Emir Faisal King of Irak provided that his Highness's Government shall be constitutional, representative, and democratic Government limited by law." He adhered to everything he had previously said about the importance of a satisfactory settlement with Turkey as bearing upon the peace of Mesopotamia and Palestine. The war between the Greeks and Turks may end this way or it may end that way, but whoever wins, however long it is protracted, it produces continuous, uniform disadvantage to British interests. There is no greater interest in the whole of the Middle East than that of Great Britain to secure a cessation of this vicious strife between these two forces, which impoverishes and distracts the whole of the region and leads to every kind of dislocation of our affairs both in Palestine and Mesopotamia.

On the vote being taken the estimates were carried by 123 to 43.

# NEAR EAST BOOKSHELF.

## PERSIA PAST AND PRESENT.

" A History of Persia." By Brigadier-General Sir Percy Sykes, K.C.I.E., C.B., C.M.G., two vols., with 14 Maps and 193 Illustrations (London, Macmillan and Co., 1921. Price £3 10 0 net.

Another golden age dawned on Persia with the ascension of the Abbaside Khalifs, who claimed descent from an uncle of the Prophet. In this great dynasty the outstanding figure is Harun-al-Rashid, who governed western Asia from Baghdad (786-809 A.D.) A scholar and poet of renown, he lavished rich rewards on men of letters; but there was room for unbridled ferocity in his complex nature. The glories of his reign, and the tragedy which darkened its close, are immortalized in the " Arabian Nights." Harun made the fatal mistake of dividing his empire between two sons; Mamun becoming Khalif of the East, while Avatra fell to the share of Amin. Friction between them kept Persia in a state of chronic war, and many short-lived dynasties arose to batten on the decrepid Khalifat, only to collapse through internal disorder. The time was ripe for foreign aggression, and Persia succumbed to an invasion of the fierce Seljuk Turks. Her prosperity revived under the Seljuk Sultan Sanjar (1130-53),famed in her annals for his conquests and miserable end. Despite civil war and perennial revolts, the arts, sciences and literature of Persia attained their apogee under the Abbaside Khalifs. Her enlightenment stood in marked contrast with the gloom that overspread Europe after Charlemagne's death. But the earlier Crusades, which were provoked by Seljuk interference, brought the barbarous communities of the West into contact with a higher civilisation than their own. It cannot be doubted that the thirteenth century Renaissance which endowed Europe with its cathedrals, was in a measure due to Eastern influence.

While Christendom slowly emerged from mediaeval darkness, the light of Asia suffered a sudden and terrible eclipse. The plains south of Lake Baikal were the habitat of Mongolian nomads who, under the leadership of Chengiz Khan spread over Persia like a flight of locusts (1221-7). After describing their ravages, Sir Percy Sykes writes:—

> To sum up, the testimony of all contemporary historians is that, wherever the Mongols passed, the population was almost exterminated, and the land reverted to desert. In the Jahan Gusha we read: " If from now to the Day of Judgment nothing hinders the growth of population, it cannot reach one-tenth of the figure at which it stood before the Mongol conquest." These words, even with all allowance for exaggeration, express human misery at its deepest, and our finite minds, the product of a civilised age, can barely grasp their full meaning.

On Chengiz's death in 1227 the immense empire which he had brought to heel was shared by his sons, Hulagu becoming " Kakhan " of Persia. He founded a heathen dynasty; but a descendant named Ghazan announced his conversion to Mohammedanism; and during a brief reign (1293-1304) carried out reforms which restored the ebbing life of Persia. After his untimely death she relapsed into anarchy, from which she was rescued by the advent of Tamerlane (1335-1404). The son of a petty Mongolian chief, he won the throne of Samarkand after a series of thrilling adventures. Fired by the lust of conquest he subdued all Persia, penetrated to the heart of Russia and invaded India, returning to his capital laden with the spoils of Delhi. His last campaign was the most brilliant of all; it led to the defeat and capture of a mighty Sultan of Turkey. Then his eyes turned China-wards, but a carreer of unexampled conquest was cut short by death in 1404. Tamerlane, writes Sir Percy Sykes—

> was not only the bravest of the brave, but also profoundly sagacious, generous, experienced and persevering.....
>
> As is the case with all conquerers, ancient and modern, his career was attended by terrible bloodshed..... He was a patron of learned men, a founder of Mosques and colleges, a writer of some merit and fond of the game of chess. He was also careful to allow no favourites, but decided everything himself. In an absolute monarch this constitutes a virtue of no mean order.

His descendants, known as the Timurids ruled Persia for nearly a century and a half. Several of them were men of profound culture, who patronised the arts and crafts. During this era the mystical movement known as " Sufism " took firm hold on Persia, and it is perhaps destined to rejuvenate Islam throughout the Eastern world. A native dynasty famed as the Safavis arose on the ruins of the Timurid regime. Its founder, Shah Ismail (1499-1524), who traced his descent from the seventh Imam, secured the independence of Persia, and established Shia doctrine as her national religion.

The sixteenth century was an age of transition like our own. Its destinies were guided by a group of great rulers who have no successors at the present day. Charles the Fifth, Queen Elizabeth, Sulayman the Magnificent, Akbar—where shall we find their parallels? The modern world has no pilots able to ride the whirlwind and direct the storm. Shah Abbas the Great (1587-1629)was a bright particular star in a galaxy of illustrious sovereigns. He reorganised the Persian army and governed wisely for 42 eventful years. In his reign the infiltration of European diplomats and traders set in, and Shah Abbas showed especial favour to our countrymen. No Shah of Persia died more regretted by his subjects. His domestic policy was as mischevious as that of the Sultans of Turkey. The imperial family was kept in gilded seclusion, aloof from affairs of state. Owing to their unfitness to rule the Safair dynasty was dethroned in 1722 by an Afghan adventurer named Mahmud, who conquered Persia with very slender forces. Fourteen years later the usurper was ousted by Nadir Kuli Khan, a Persian shepherd whose genius for war raised him to the pinnacle of fame. He annexed Khiva and Bokhara, drove the Russians from his Caspian provinces. and brought back incalculable wealth from a raid into Mughal, India. In later life he degenerated into a bloody and avaricious despot, whose assasination in 1747 was hailed with joy throughout Persia. A " triangular contest for power " ensued, from which Karim Khan Zand emerged victorious. From 1759 to 1779 he was the undisputed ruler of Persia, gave his subjects two decades of sorely-needed peace, and died sincerely lamented in the fulness of years. In 1796 however, his successor was hurled from the throne by Aga Mohammad Shah, a chieftain of the powerful Kajar tribe, who founded the reigning dynasty. To great military and administrative skill he added a thirst for power, wealth and revenge. After misgoverning Persia for a year he deservedly met the fate of many predecessors in the purple.

During the long reign of his nephew Fath Ali Shah (1797-1834) Persia was brought within the ever-widening sphere of European politics by the measureless ambition of Napoleon. who cherished a fantastic dream of casting the British from India with the help of Russia. He despatched an embassy to Teheran which was countered by rival missions from England. On the great Corsican's fall, Sir Gore Ousely negotiated a defensive treaty with Persia, by which Great Britain was bound to aid her in frontier disputes and pay her a handsome yearly subsidy.

A far more dangerous foe than imperial France was drawing nigh. For more than a century Russia had sought to reach the ice-free ports which were denied to her enormous empire by advancing towards Constantinople and the Persian Gulf. These aspirations were defined by a will of Peter the Great, which gained publicity from a tainted source in 1755. The Tsar's successors were enjoined—

> To approach as near as possible Constantinople and India: excite continual wars, not only in Turkey but in Persia. And in the decadence of Persia, penetrate as far as the Persian Gulf and advance as far as India, which is the depot of the world.

The haunting dread of Russia inspired by this document was justified by the policy of Tsar Alexander I and his successors. whose armies conquered Georgia and over-ran the Caspian provinces. The Persian forces, organised on European lines had lost the mobility which made them more than a match for Turkish hordes in the past. They were worsted in two campaigns, and under the treaty of Turkmanchai, Persia ceded important territories in Armenia to her hated foe. During the quarter of a century that followed the Shahs strove to recoup their losses in the north-west by regaining ground in the opposite direction. In British eyes Russia had superseded imperial France as a power to be withstood, tooth and nail. It was deemed imperative to safeguard Central Asia from Russian and Persian aggression. Hence the Government of India plunged into a disastrous war with Afghanistan and undertook a half-hearted campaign against its old ally Persia. But the Russian advance proceeded without a serious check. By the end of last century it had added Khiva, Bokhara and Turkmania to the empire, which marched with that of Persia eastwards of the Caspian Sea.

Shah Nasir-u-din, who mounted the throne in 1848, was well known in England owing to repeated visits to the Court. At home his extravagance and misgovernment made him thoroughly unpopular. The tillers of the soil were fleeced without mercy by a clique of greedy nobles, the administration of justice was farcical; no one's life and property were safe. Dissatisfaction became rife among the large class which had come into contact with Western civilisation, and Nasir-u-din was assasinated in 1896. Under his successor Muzaffar-u-din (1896-1907) things went from bad to worse. In 1906 the universal discontent found expression in a constitutional movement which with active encouragement from the British Minister, compelled the puppet Shah to grant a Constitution. It included an elective assembly termed Anjuman, and the promise of paper-reforms in all directions. But Persia was by no means ripe for a parliamentary regime. In Sir Percy Sykes' words—

> Internal discord, personal advantage, pecuniary or other, and personal animosities influenced the assembly and prevented its co-operation with any Cabinet. Moreover many of the leaders were unpractical extremists or mere visionaries filled with anarchical ideas which they had not digested.

Mohammed Ali, who succeeded in 1907, was an Asiatic despot of the worst type, unprincipled, avaricious and untrustworthyl He pursued a reactionary policy which plunged Persia in civi. war, and was deservrdly deprived of the throne in 1907. Meanwhile the defeat of Russia by Japan had lessened the apprehension felt in Great Britain for the safety of the Indian Empire. An Anglo-Russian agreement was arrived at in 1907, which defined the rivals' spheres of influence in Persia. Russia embraced the rich northern provinces, while Great Britain was contented with a relatively small area—mostly desert—in the South. This treaty represented a genuine desire on our part to end eighty years of disastrous friction, and safe-guard Persiann-dependence. Unhappily for all parties the Russina agents intrigued against their British colleagues, and strove to absorb

Digitized by Google

the territory placed under their protection. The issue of the Russo-Japanese war brought a far more insidious foe into the field. German traders and spies poured into Persia, and with Turkish help a projected railway linking Berlin with Baghdad was pushed forward. Incredible to relate—

> At the actual outbreak of the Great War, the British Foreign Office was engaged in negotiations with Germany and Turkey which, as far as the former power was concerned would have resulted in her securing a strong, if not dominating position at Basra, the destined terminus of the Baghdad railway.

When that cyclone burst on the civilised world the Entente interests were protected in the Northern provinces by a Cossack brigade, and order was preserved elsewhere by a Gendarmerie under Swedish officers. These mostly went over to the foe, and Turco-German influence reigned supreme over three-quarters of Persia. At this crisis Sir Percy Sykes was despatched on a mission to the Shah, with the authority to raise a native force under British officers. Right well did he fulfill the arduous task of restoring British influence The South Persian Rifles under his command freed Kerman from German domination. Then, by a very daring advance eastwards, it ejected the enemy from Yezd, Shiraz and Isfahan; and re-opened the route to the Gulf *via* Ahwaz. The poet Abraham Cowley tells us that "It is a hard and nice subject for a man to write of himself, it grates his own heart to say anything of disparagement, and the reader's to hear anything of praise from him. Sir Percy does ample justice to the brother-officers who helped him to purge Persia of the enemy, and refers modestly to his own share in the exploit.

> It is difficult tor me to estimate the exact value of the services rendered by the officers and men of the force which I commanded. Nor must the good work of the Bushire force be overlooked. From one point of view my column guarded the way to India. Its action put an end to the German bands which were destroying the little civilisation that still existed in Southern Persia, and it was a contributory cause of the failure of the German mission to the Amir.

The Russian collapse left Great Britain free to deal directly with Persia. In the autumn of 1919 two agreements were concluded which promised British co-operation in the task of carrying out reforms and in organizing an army for the maintenance of internal order. But the present situation of the worlds oldest empire the reverse of satisfactory. A Cabinet hostile to Great Britain is dallying with Bolshevism; the administration in every branch is hopelessly corrupt, a selfish aristocracy thinks of nothing but wringing wealth from the down trodden peasants; and the Anglo-Persia agreements remain a dead letter. A recent cable message, indeed, announces the disbandment of the South Persia Rifles owing to lack of funds. Sir Percy Sykes who is anything but a pessimist, admits that the future of Persia fills him with apprehension. But a race which has shown such amazing vitality in the past may yet emerge from the chaos which threatens its country; and may even prove a barrier against the onrush of Bolshevism, which is a far more pressing danger to India than was Tsarist lust of conquest. One thing is certain. Persia cannot be allowed to drift into anarchy. A glance at the admirable maps which accompany this volume will show that her prosperity and friendship are essential to our interests in Asia.

It is a matter of deep regret that a soldier and administrator of Sir Percy Sykes's calibre should have been removed from the helm on the eve of the present crisis. But he has made excellent use of his leisure in producing a history of Persia which will not be superseded for a century to come. His task demanded immense industry and a very rare faculty of drawing sane deductions from a mass of complex data. The value of his letter press is enhanced by excellent maps, illustrations, a bibliography, and last but not least, an index which gives the student a clue to four thousand years of history and legend. F.H.S.

### The Ewe Dialect.

We have received from the Crown Agents for the Colonies an excellent "Grammatical Guide to the Ewe dialect," spoken by the natives of Togoland, a German colony on the West Coast of Africa which is now administered by Great Britain jointly with France. This little text-book has been translated from the German by Mr. C. D. Trotter, district Commissioner of the Gold Coast Colony, and may serve as a model for others of the same description which are still to seek in our Asiatic possessions.

## EVENING IN THE JUNGLE.

*By "MAJNUN."*

The sun was already sloping towards the trees as with many a heave and push and much whispered advice from below I scrambled into my *machan*. Though an explanation of the term is probably gratuitous, a *machan* is a frame of wood,—often a native bedstead— cunningly fixed in the lower branches of a tree, so as to form a platform, where screened by the leaves and out of harm's way, the nocturnal seeker after big game spends the excruciating hours of his vigil, waiting for something to turn up.

Ten yards away stood a small black goat tethered by one hind leg to a stake. He was advertising his presence by loud and plaintive bleats and doing his best to call down Nemesis upon his innocent head. Nemesis in the shape of Cheetrah, the panther. Beyond was a rocky nullah, dry with the exception of two muddy pools, and beyond these again rose the jungle, rank upon rank, wall upon wall of trees.

It was still early evening, and for an hour no serious business could be expected; but in the meantime there was an opportunity of watching the lesser jungle-folk—on this occasion the birds—as they came down to the water-hole for their evening drink; a pair of good glasses and the cover of sheltering foliage afforded a chance to see them without being seen, to watch and to wonder.

First, with much fluttering among the broad leaves, the doves and pigeons come,—ring doves, blue rock and little spotted doves. They are the least shy of all the birds and least obsessed with that suspicion of all about them which is a characteristic of all the jungle-dwellers, man and bird and beast. They drink in a leisurely fashion, look about and walk round to the other pool to sample the water there, and evidently have little to fear and do not mean to be hurried.

Next comes a plover, full of suspicion, always apprehensive, always startled. He flies up and down the nullah uttering his sharp, persistent little cry, "Did-he-do-it, did-did-did-he-do-it?" over and over again. Finally he seems satisfied and settles on a stone by the farther of the two pools, and from this, after some further inspection, he hops on to the sand and runs with quick short steps to the water. This is a typical example of the ever-present suspicion of the jungle. He takes a few quick paces along the edge of the pool, stops and looks back, then on again and another step; at the water he makes little hasty dabs, looking round between each. Then, suddenly, his nerve seem, to give way and he flaps into the air and is gone, and I hear his plaintive cry far down the nullah, "Did-he-do-it--did-did-did.."

There seems to be an established order in which birds come; the doves and pigeons have finished, and uow the smaller birds arrive, to drink and bathe and squabble, a thoroughly social business. A king bird has just settled in an over-hanging branch a big black truculent fellow with a handsome forked tail, whose sudden swoops as he hawks the flies above the water scatter his smaller companions. In between his excursions he sits like a jet image on his bough.

Now overhead there is a chorus of shrill screams and a pack of parrots, like emeralds against the turquoise sky, swoop and glide over the tree tops. Here, out in the jungle, that unmelodious scream is forgotten or forgiven; like the pea- fowl's call, which for the last half- hour has been sounding from the shadows, it seems an essential part of untamed nature, of open skies and untrodden paths; a declaration of the wilderness.

At last the sun has dropped into the trees and long shadows fall across the nullah; the unreal light of sunset is changing the colours—almost, it seems, the very shapes—of the trees beyond.

Presently there comes the sound of a stealthy footfall upon the leaves and out into the golden light paces the most beautiful of all birds—a peacock in full plumage. From his little crested head—a head of breeding if ever there was one—to the tip of his glorious six-foot tail, he is a burning mass of colour. There is something most royal in his carriage as he stands there looking around him, the azure column of his neck proudly erect, the gold and bronze and blue of his tail flaunted like some gorgeous brocade; truly he is clothed in King's apparel. He goes forward slowly with a processional step as though conscious of and glorying in his beauty; as he stoops to drink at the pool the reflected sunset makes a ripple of fire along his lovely throat. Then with the same inimitable grace he passes on and is hidden once more in the jungle. The world seems to grow suddenly darker at his going.

Now it is the short hour between evening and night when the jungle is very still. Only the night-jar is awake—the last of the birds—calling from the trees behind me, "chuck-a-chuck, chuck-chuck-a-chuck", then silently as a shadow he flits past within hand's reach. The last of the birds; no, for far up in the pale sky above me, a dark speck against the blue, a late vulture is still wheeling and turning; he has seen me, and will watch a while. He knows what Man does among the jungle folk. I understand. and feel (I hope) ashamed.

## MUSICAL NOTES.

"Sir Edward Elgar." By J. F. PORTE. (London: Kegan, Paul, 7s. 6d. net).

This book is badly made. It consists of three sections: the first, a "critical introduction," is too brief and is uninforming; the second, a biographical sketch of Elgar, contains for the most part stale stories, and is done in the guide-book style; and the third and most important section is made up of separate reviews of Elgar's works, arranged in chronological order. This last section may be useful to the Elgar student, but seven shillings and sixpence is a high price for such a book.

Mr. Porte's power of historical judgment may best be shown by a few quotations. He seeks, for example, to perpetuate the old and absurd distinction between music of the heart and music of the head, averring that "music of the heart will outlive music of the brain alone." Again, he says that "no composer ever had a more faithful propagandarist than Elgar did in Richter," a sentence of which the truth is as doubtful as the English. But when he comes to particular opinions he is still more amazing for he thinks that the effeminate and unworthy "Salut d'amour" is "really meritorious" and that "it has a particularly entrancing melody," that the ineffable "Land of Hope and Glory" is an "inspiring tune" (indeed he gravely, very gravely, rebukes Mr. Ernest Newman for "poking fun" at it), and that the drearily unoriginal "Polonia" is "one of the noblest and most brilliantly beautiful pieces that issued from Elgar's pen." In such an undiscriminating flow of *cliches* does the author betray his uncritical enthusiasm; it is with the less attention, therefore, that one reads his merited superlatives upon such works as the two symphonies the Enigma Variations, the string quartet, and the pianoforte quintet. I am afraid this book will do neither the author nor his subject any good.

**Technique and Temperament.**

The problem of musical technique is as engrossing as it is unceasing. Each generation imagines that it has found an infallible guide to technique, until a new composer comes along to make necessary a new technique or rather to extend the old one. A little book called "Creative Technique" that I have received from Messrs. Kegan Paul sets out the problem and some of the latter-day pedagogic fallacies with very commendable lucidity. Its author is George Woodhouse, whom readers of this journal will, perhaps, remember mainly through the fact that Miss Eurydice Draconi, the Greek pianist, is one of his pupils; and its price is two shillings and sixpence.

Upon the different methods of teaching technique there always has been and always will be controversy, for all alike and some wrongly claim the cultivation of temperament as their first aim and the achievement of mechanical accuracy as incidental. Now Mr. Woodhouse's book, which is designed "for artists in general and pianists in particular," is concerned to show that in some of the pedagogic methods obtaining at the present time there is a tendency to leave undeveloped the essential factor of the temperament, a tendency, that is, for technique to be uncreative. And there is little doubt that his charge is just. The Matthay method, for instance, which is very widely in vogue in this country, does incline, in its concentration upon the principle of the weight—touch, to minimise the importance of finger technique, and how often this system, admirable and necessary though it be in many ways, fails to allow the self-expression of its exponent, may be seen almost any month at the concerts of our junior recitalists. Wholly to disregard the technical methods of our fathers is as foolish in music as it is in cricket, and I am glad to see Mr. Woodhouse standing on so firm and so sure a compromise as he does in this matter.

## PERSONAL AND GENERAL.

**To-day.**
July 21 (New Style).
July 8 (Old Style).
Julkada 15, 1339 A.H. of the Moslem Calendar.
Tamuz 15, 5681 of the Jewish Calendar.

The King and Queen of Roumania left Bucharest on July 15 for Bagnolles-de-l'Orne.

A marriage has been arranged, and will shortly take place between Captain Ivan Guthrie, M.C., 17th Cavalry, Indian Army eldest surviving son of Captain and Mrs. Guthrie of Guthrie, Guthrie Castle, Forfarshire, and Kathleen Mona, younger daughter of the late Colonel the Hon. G. H. Gough, C.B., and the Hon. Mrs. Gough, of 13, Grosvenor-place.

In recognition of his services in India, the degree of Doctor of Laws has been conferred by Aberdeen University upon Sir George Carmichael, Chief Secretary to the Government of Bombay.

A marriage has been arranged, and will take place on August 30, between Major J.G. Cadell, D.S.O., 45th Rattray's Sikhs, elder son of the late Alan Cadell, C.S.I., I.C.S., and Margaret, youngest daughter of the late H. J. Hunt, of Yokohama, and of Mrs. Hunt of Crawley Wood House, Camberley.

H.M. Consul-General at Tangier states that the municipalities of Kenitra, Marrakesh, Fez, and Mazagan are contracting loans to the value of 21,000,000 francs for the purpose of carrying our works on drains, sewers, and roads in those towns.

The fund for the endowment of a Ceylon bed in the King George Sanatorium for Sailors at Bramshott is still short of £200. The organisers hope that this sum will be guaranteed by one or more residents of Ceylon or persons with interests there, who should communicate with Mr. Leefe, The Glebe, South Ascot.

Our Sofia Correspondent writes:—

The engagement is announced of Miss Kathleen Kemper, niece of the American Consul at Sofia, to Captain R. B. Peters. M.C., R.A., of the Inter-Allied Military Commission of Control in Bulgaria.

Our Khartoum Correspondent writes (July 3):—

It is reported that Monsieur Claessens, Director of Agriculture in the Belgian Congo, is visiting Egypt and the Sudan for the purpose of studying local conditions of cultivation.

Monsieur Krajewski, Consul General for France at Jeddah, is amongst the passengers leaving Port Sudan on July 8, by the s.s. "Garth Castle."

Our Cyprus Correspondent writes:—

Among visitors who have lately inspected the collection of antiquities in the Cyprus Museum are Professor J. Garstang, Director of Antiquities in Palestine, and Mr. Phythian-Adams, Curator of the Palestine Museum in Jerusalem.

The Emir of Katsina, who has been on a visit to this country, left London on July 15 for Jeddah. From there the Emir goes to Mecca for the Festival of August 15.

The following have been selected for the Sudan Political Service—Mr. G. R. F. Bredin, Mr. T. F. G. Darless, Mr. W. F. Crawford, Mr. L. W. Jardine, Mr. E. H. Macintosh, Mr. R. L. H. Nunn, Mr. G. C. Scott, and Mr. H. G. Wedderburn-Maxwell.

Major-General C. S. Maclean, C.B., C.I.E., Colonel 21st Cavalry and late his Majesty's Consul-General at Khorassan and Sistan, died last week at the age of eighty-four. He entered the army in 1853, and became Major-General after forty years' service. He served with distinction in the Indian Mutiny campaign, and received the medal and clasp. During the Afghan War, 78-80, he was several times mentioned in dispatches, and received the Brevet of Lieutenant-Colonel, the C.B., and the medal with clasps, and in 1881 took part in the Mahsood-Wuzeeree Expedition. He was made C.I.E. in 1888.

Major-General Charles Edward Dutton Budworth has died suddenly from heart failure, states a Reuter telegram from Simla.

The Indian Section of the Oriental Circle of the Lyceum Club held a reception on July 15, for distinguished Indians in London. The hostesses were the president, the Contessa Martinengo Cesaresco, Princess Mander, Mrs. Tata, Mme. Lo Cheng, and Mrs. Shrimpton Giles. Among the guests were:—The Maharao of Kutch, Princess Kambra Devi Gaekwar of Baroda, the Maharaja of Baroda, Princess Sophia Duleep Singh, the Rani Shaiba and Princess of Kalsia, Lady Ratan Tata, Mr. V. Srinivasa Sastri, Sir Cowasjee and Lady Jehangir, the Earl and Countess of Lytton Sahibzada Aftab A. Khan, Mr. and Mrs. Das Gupta, Mr. Bupendranath Basee, Sir Dinshaw Petit, Sir M. M. Bhownaggree, Sir B. and Lady Mullik, Sir W. Meyer, Lady De La Warr, Lady Lutyens, the Hon. Mrs. Montagu, Lady Clwyd, Lady Emmott, and Sir Burton and Lady Chadwick.

Digitized by Google

A marriage has been arranged, and will shortly take place in India, between Major Alick Cameron, O.B.E., I.M.S., and Jane, daughter of the late P. M. Westfeldt, of New Orleans and North Carolina, U.S.A., and of Mrs. P. M. Westfeldt, 22, Pakefield-road Lowestoft.

---

The engagement is announced between John Yarrow, second son of Dr. and Mrs. C. H. Eccles, 128, Broadhurst-gardens, Hampstead, N.W., 6, and Mysie Isobel, youngest daughter of Rev. H. A. Williams, M.A., retired Chaplain, his Majesty's Indian Government, and Mrs. Williams, 18, Woodchurch-road, Hampstead, N.W. 6, late of Skelton Manor, York.

---

Princess Beatrice visited on July 15, the Exhibition of Recent Discoveries of the British School of Archaeology at University College, Gower-street, and was conducted round by Professor Flinders Petrie. Mrs. Flinders Petrie and Mr. Guy Brunton were presented to the Princess.

---

The engagement is announced between Edward Daymonde Stevenson, M.C., lieutenant, the Seaforth Highlanders, second son of Mr. and Mrs. G. C. Stevenson, of Cairo, Egypt, and Ella Violet Ethel, only daughter of Major-General Sir William Peyton, K.C.B., K.C.V.O., D.S.O.

---

The engagement is announced between Captain John Victor Warrener, Indian Army, younger son of Major J. H. Warrener, O.B.E., and Mrs. Warrener, of Shallford, Surrey, and Kathleen, younger daughter of the late Mr. and Mrs. Arthur Dance, of Bramford, Suffolk.

---

The Bulgarian Minister and Mme. Stancioff gave a dinner party on July 4, at 51, Queen's gate, at which the guests included Lady Lloyd-Graeme, Sir Herbert and Lady Dering, the Czecho-Slovak Minister and Mme. Mastny, the Hon. Mr. and Mrs. Harold Nicholson, Prince Lobkowitz, and the personnel of the Bulgarian Legation,

---

The engagement is announced between Monsieur M. B. Gavrilovitch, Attaché to the Legation of the Kingdom of Serbs, Croats, and Slovenes in London, the third son of Dr. Bogdan Gavrilovitch, the Vice-Chancellor of the University in Belgrade, and Mademoiselle Suzanne Chartier-Doliwa, the second daughter of Marquise W. de la Grange. The wedding will take place in Paris in October.

---

Madame Gavrilovitch, the wife of the Minister of the Kingdom of Serbs, Croats, and Slovenes, left London last week, for Serbia. She will be away from London for several weeks.

---

The committees of the Northbrook Society and the National Indian Association gave a reception last week at 21, Cromwell-road to meet distinguished visitors from India. Among those accepting invitations were :—The Maharao of Kutch and Mr. Srinavasa Sastri the representatives af India. at the Imperial Conference (the Rani of Kalsia and Princess Rajindasa, Sir William Meyer, Sir Cowasjee and Lady Jehanghir, Sir George Roos-Keppel, Syed and Mrs. Ameer Ali, Sir Thomas Bennett, M.P., and Lady Bennett, Dewan Bahadur Ramchandra Rao, Sir John and Lady Stanley, Sir M. M. Bhownaggree, Sir Henry and Lady Proctor, Mrs. and Miss Rustomji Faridonji, Sir Herbert Holmwood, Imad-ul-Mulk Syed Hosian Bilgrami and Mrs. Bilgrami, Sir H. L. and Lady Stephen, Mr. N. C. Sen. Sir Donald Robertson, Sir Manackjee Dadabhoy, Sir Thomas and Lady Arnold, Mr. and Mrs. J. W. Bhore, Sir D. P. Saibidikary, Dr. L. D. Barnett, Mr. G. J. Bajpai, Mr. S. Digby, and Mrs. S. K. Datta, Professor and Mrs. G. M. Das Gupta, Mr. Austin Low, Mr. L. J. Robertson, Khan Bahadur and Mrs. Byramji, Miss Beck, and Dr. S. A. Kapadia.

---

The engagement is announced between Mr. Godfrey Pope, of Matale, Ceylon, seventh surviving son of Mr. Alfred Pope, J.P., F.S.A., of South Court, and Wrackleford House, Dorchester, and May Hollingworth Toolis, only daughter of Mr. Toolis, of Capponellan, Southbourne, Hants, and Lincoln's Inn, barrister-at-law, S.E. Circuit, and Mrs. Toolis.

---

We understand that it is by direction of the Foreign Office that Colonel J. E. Lawrence, Adviser on Arab matters to the Colonial Office, is proceeding to the Hejaz. The purpose of the mission is, we learn, to institute negotiations with the King of the Hejaz on matters which concern the two Governments, notably the protection of the Pilgrimages.

## NEWS IN BRIEF.

It is reported from Chicago, that the site of Armageddon (Megiddo, in Palestine) is to be excavated by the University of Chicago, Mr. John D. Rockfeller, junior, having given 60,000 dollars (nominally £12,000) for the purpose.

Full military equipment for 25,000 Azerbaijan soldiers has reached Baku from Moscow.

Another report of the death of the " Mad Mullah " of Somaliland has come from Adis Ababa. Men of the Hawiya tribe assert both in the Abyssinian capital and at Harrer that not only is the Mullah dead, but that his tomb ht Goanneh, in the Imi country, has been desecrated and his house looted.

Belgrade was gaily decorated on Thursday, July 14, in honour of King Peter's birthday.

The International Red Cross has sent a committee to Athens to settle the difficulties which have arisen over the detention of the medical staff on board the Japanese steamship Ainamaru by the Greek naval authorites.

Advices from Teheran state, that Russian troops have re-occupied Resht, and that communication between Teheran and Constantinople via Tabriz and Batoum has been restored.

Renters' Prague correspondent in a message dated July 15 tates that a delegation of the International Chamber of Commerce of America consisting of seven members are arriving in Prague on Monday from Berlin to study the financial and economic position of Cxecho-Slovakia.

It is reported from Bucharest that King Ferdinand's visit to France is postponed until the close of the Parliamentary Session.

Kemal Bey, a former Vali of Adana, has been appointed Prefect of Constantinople.

It is officially reported from India that conditions in Waziristan were quieter during the week ending on July 14.

The following cable from the European Association, Calcutta, has been received by the Indo-British Association, London, on July 15. " Repudiate Lord Lytton's reported statement in the House of Lords. This Association's reports from India are neither exaggerated nor wilfully misleading. India Office must either lack or suppress information."

According to information from Constantinople, Neriman Nerimanov is now President of the Republic of Azerbaijan.

An official denial has been issued in Belgrade of the report that Yugoslar troops have invaded Albanian territory.

Our Athens Correspondent writes (July 2) :—Princess Elizabeth left for Smyrna on June 29. Queen Sophie has returned to Athens from Salonika. The Prime Minister accompanied by the Minister for Foreign Affairs, M. Baltazzi, returned to Smyrna last Sunday, June 26.

The congress of the executive committee of international Zionist organisations has opened at Prague. In addition to its president, Dr. Weitzmann, who will arrive in a few days, this congress will be attended by M.M. Sokolov, Rupin, Lichsein, Cowen, Jabotinsky and a large number of other prominent personalities in the Zionist movement from France, England, Holland, America, Switzerland and Turkey. The conferences will last for a week, and will deal with the question of the establishment of a Jewish State in Palestine, as well as with economic problems.

The Fourth Palestinian Congress of Moslem and Christian Arabs has protested against Mr. Churchill's recent statement that Arab fears of Zionism are illusory, as the " Arabs see the reins of government in Zionist hands."

## RACIAL FEELING IN INDIA.

No student of Indian affairs can have failed to observe the rise in some not unimportant circles of a new feeling of racial exclusiveness, a feeling which, under the shelter of a claim to equality, in practice leads to a demand that Europeans shall not be employed in any responsible position in the country. The manifestations of this sentiment have of late been widespread. On one occasion we are told that the appointment of an Englishman as professor in an Indian University would be an outrage on national feeling, even though the Englishman may know more about the subject of study than any living Indian. On others we find Indian shareholders protesting noisily against the employment of European staffs, and by no means inclined to accept the statement of their Indian Directors, that, if profits are to be large, they must use the best available talent irrespective of any question of race. Englishmen in the mass can afford to ignore such manifestations, but Indians cannot; and it is in the interests of India that we propose to say something to-day on the development of this attitude, and on the task which its existence imposes on patriotic Indians. Viewed from the standpoint of history, the development is natural, indeed almost inevitable. The close of the seventeenth century saw the collapse of nearly every Indian institution, administrative, social and economic, for the time being, the country ceased to produce leaders in any spheres of activity other than those which were purely predatory; and the void was filled by the Europeans who were engaged primarily in commercial pursuits. The slow, progressive revival of the next two centuries was pioneered almost wholly by Englishmen, and while English administrators were reducing chaos to order, English merchants and manufacturers were reorganising economic life, English students were leading in the intellectual renascence, and English missionaries were stimulating a new growth of religious energy. At this period English predominance was a practical fact, and as such it was accepted without question by the mass of Indians; but from the nature of the case that position was temporary, for the inevitable result of English inspiration was the growth of national self-consciousness and of an aspiration for national self-respect. In essence that development has our entire sympathy, but some of its accidental features have been unfortunate, notably the one-sided views of history which have induced so many Indians to exaggerate national strength and ignore national weaknesses. No small proportion of the younger generation has been led to believe that their country, once powerful and prosperous, was ruined by the machinations of European intruders, and it is easy to understand that, where such mistaken views are accepted, the sight of an Englishman in any responible position may become in itself a cause of offence, aggravated out of all proportion by occasional ill-judged displays of imperiousness on the part of individual Englishmen.

In the actual environment, then, the growth of a certain amount of racial prejudice was an almost inevitable by-product of the new Indian national life, but the prejudice is sharpened and intensified by a legacy from the past. The Indian polity was based on the domination of small privileged classes over the great bulk of the population; the old idea has by no means yielded to the new doctrine of equality or national brotherhood, which is slowly and painfully gaining ground; and there is still a widespread anticipation among classes formerly dominant that they may regain their old ascendancy, and rule India as their forefathers once ruled. That anticipation cannot be realised while the British element in the Government remains; and to those who share it Englishmen are apt to appear as usurpers of the ascendancy which it is their final task to destroy. It follows necessarily that the strength of racial prejudice is greatest among those classes who at present support the non-cooperative movement, themselves dominated by class-prejudice, their antipathy is concentrated on the class which stands in their way, and their hopes rest in carrying with them a sufficient section of the population to wreck the new constitution, thereby vindicating the principle of ascendancy, and perhaps opening a path to the realisation of their ultimate desires. In this connection their recent tactics are of peculiar significance. At first they tried by the familiar method of the boycott to prevent the new legislatures from coming into existence. Having failed to do so, they have of late been attempting to discredit these institutions by putting forward as candidates men of humble position and menial occupation, believing that the class-prejudice of their fellow countrymen will revolt at the spectacle of legislators of this type. In this country such tactics would be condemned as hopeless; the House of Commons has for many years welcomed the presence of working miners and general labourers, and it might be thought that Indian legislators would in the same spirit regard the election of a worthy confectioner or leather-dresser as an honour to their House. Indian sentiment, however, is not yet prepared for such innovations; the old class-prejudice is weakening, but it still lies deep in the unconscious mentality of the people, and its significance for our present subject is to be found in the fact that its existence facilitates the spread, and intensifies the activity, of that racial feeling which, as we have said, is an almost inevitable feature of the recent development of Indian life. It is reasonably certain that some Indians would in any case be prejudiced against Englishmen as a race; this peculiar factor in their mentality makes it certain that the prejudice will be more widespread and more acute than would otherwise be the case.

The result may well be a definite set back to India as a whole. Great as has been the progress made in recent years, the country is not yet ready to stand alone; expert assistance is still required in nearly every branch of national activity; and should this racial feeling operate either to prevent the employment of experts, or to render their position intolerable to men of self-respect, necessary work will be left undone or be badly done, and India will

Digitized by Google

be the sufferer. The best way of avoiding this danger is for responsible Indians to look it in the face. Lord Reading's recent declaration that Englishmen in India do not indulge in notions of racial superiority or predominence appears to us to present the standpoint from which the subject should be approached by the men of both nations. The early experience of the new legislatures has demonstrated the advantages to be gained by equal co-operation in the field of politics and administration, but that demonstration only reinforces the conclusions already drawn by those who have practiced co-operation in other spheres of activity. No one can deny that the existing prejudice constitutes a serious menace, but its effects can be counteracted by that large mass of sound practical sense which undoubtedly exists in India, though its operation has in the past been so inconspicuous that observers at a distance may have been led to minimise its importance. The hopes of those who believe in the success of the new *regime* are based, more than anything else, on the more open and more vigorous assertion of this element of Indian life. Those hopes have been encouraged by the first sessions of the legislatures, which have been characterised by the subordination of passion to practical sagacity, and it is to the maintenance of the balance that we must look for continued progress. Lord Reading has made plain his intention that any English manifestation of racial feeling will be sternly dealt with: it is for the responsible leaders of Indian public opinion to make it equally plain that similar manifestations on the part of Indians must be discountenanced in the best interests of the country.

## FROM AN ADRIATIC DIARY.

*By William Ransted Berrry.*

At Sea, Feb. 15.

The Irishman said he had never played a fiddle, but had no doubt he could if he tried. I have never owned a steam yacht, but I know now exactly what it feels like. The S.S. Dalmatia, once Kaiserklich and Koeniglich in the service of the Austrian Lloyd, but now under the red, white and green of Italy, is entirely at my disposal from stem to stern, and from keel to crow's-nest, with the single —and to me, trifling—exception of her direction. In short, I am at present that very small pea in a very large pod, her only passenger.

She is outward bound from Trieste to many storied ports (we have just left Venice), but we shall bear each other company no farther than Constantinople, where I land to traffic with the turbanned and blasphemous Turk, while she leaves friendly cards along the coast of Syria, takes wine at Cyprus, or gorges cotton at the door of Egypt, where once the 'Pharos' built by Ptolemy was one of the seven wonders of the world.

For her size (3,500 tons), I have never set foot in a more comfortable boat; for her sins, the fumes of garlic and spaghetti now steal boldly forth from her galley, whence once smote on the listener's ear the pleasant sound of frying 'schnitzel'. Yet the food is very good. Four stalwart stewards and their chief serve it to me; incidentally to the captain too, the doctor and the chief engineer. Among these last conversation is incessant, and bewilderingly polyglot. The same appears to be the case among the members of the crew, including an especially vociferous powder-monkey, or whatever an infant apprentice sailor-man may be called, who spends his waking hours on some commanding object, like a water-butt or a hatch cover, in what is I suppose, the waist of the ship, whence he exhorts or flays with salty sarcasm such of his nautical peers as linger within hearing. As he is invariably armed with either a vessel-full of kitchen refuse or a species of boarding-cutlass with which he sometimes slices cabbages in the manner of a pirate quartering victims, few break a lance with him, and none his head. The general polyglotism is due, apparently, to the Istrian origin of the entire ship's company. Those who do not hail from Trieste cheer for Fiume, very much after the fashion of that immortal cricketer who, had he not been an all-Muggletonian, would have been a Dingly Deller. The result is a small babel of Austro-German and Italian liberally interlarded with such Greek, English or Slav phrases as may point an illustration or best reflect, in the case of the crew, upon an individual's probable ancestry.

We ride high on the water, for so stagnant is trade in the Adriatic that we carry practically no cargo. I can see that this is a source of great chagrin to the captain, a tall spare man with soft brown eyes and a face alive with tiny wrinkles when he smiles, who knows China and the Straits, New York and Timbuctoo, as well as he does the inside of his pocket. He is much given to recounting with melancholy enthusiasm, as one reviewing the deeds of dead heroes who played their part when the world was young, the gigantic cargoes masters found awaiting them hereabouts in the days before the war. So many thousand (or was it million?) barrels of olive oil at Bari; countless tons of almonds at Brindisi, other things in myriads, or shoals, or hecatombs, whatever you like, from Trieste, Fiume, Spalato, Durazzo, everywhere,—"but now,—finished—drown-ded" (an expressive word, used for any cataclysmic finale). He waves his hands and smiles ruefully, "I carry now six packages—only six small packages,—Sacred Madonna!"

Later on I was privileged to see some of these packages when we discharged them: one at Bari, one at Corfu and two at Patras. To my no small astonishment, for in my innocence I had conceived a "package" as being little more than a paper parcel, three of them proved to be packing cases large as houses. But the fourth, one of the two delivered at Patras—then must the captain's great heart have broken he had been present—actually proved to be a parcel no larger than I could have tucked quite conveniently under one arm; and it was a moving sight to observe it hoisted from the hold at the end of a wire cable as thick as my arm, where it looked like a sardine caught on shark tackle, and to see it deposited in the lighter alongside by the united efforts of a steam crane and four men. But such indeed is the habit of those who go down to the sea in ships, for their method of doing all things is single, and as changeless as the laws of the Medes and Persians.

The ship is as clean as the proverbial whistle, and as comfortable as a Viennese would like to have her—which, in pre-war days, was very comfortable indeed.

It was midnight when I joined her—she was due to sail at dawn next morning—where she lay at the quay in the Fusina Canal at Venice, outward bound from Trieste. Very glad I had been, too, to feel her planks beneath my feet; for my journey from the Grand Canal in a gondola had not been without a spice of adventure. Half way out, that is to say, in the darkest portion of the Giudecca Canal, where the fairy lights of the Piazzetta and the Riva Schiavoni are pin-points, behind one and all around is a waste of black waters with here and there the funeral bulk of vast silent hulks asleep upon their anchor chains, my gondoliers—for I had two, due to the distance, and to the fact that I had been as wax in the hands of a Venetian concierge—suddenly brought their craft alongside a blunt and sinister Po river boat, from the bowels of which issued a muffled sound of savage voices, while fitful gleams of light came and went among the cracks of her ill-fitting companion slide. At once there flashed through my mind all that I had ever read of shanghied landsmen, of thin stilettos in quick Latin sleeves, and bodies floating with the tides in grim canals—unrecognisable. Nor did it bring me comfort when my bow oarsman, with a word to me which had, I thought, a rude and threatening ring

Digitized by Google

crept aboard as stealthily as a shadow and like a kind of crouching goblin knocked three times upon the deck. Abruptly the voices ceased. The goblin hissed an "open sesame," whereupon the companion slide was thrust open and a villainous dark face under a red night-cap, like a stocking, appeared in a glow of ruddy light and rolled its eyes in mute interrogation. My gondolier whispered an answer. Followed mutterings below; then two more heads appeared, not capped, but villainous enough, and then, with what appeared to me a pre-determined rush, all four, my gondolier included, sprang at my gondola and, methought, at me.

I prayed then to St. Mark, or perhaps it was St. Theodore, the first patron of Venice. At any rate, he heard me, and in the nick of time. The four descended on the gondola—but me they spared, confining their attentions to a large and heavy sack in the stern behind my seat, which they dragged aboard the lugger and stowed away below. My fears had been but phantoms then! Or had I been the object of miraculous intervention? It mattered little, now that I had seen what I had seen, and I lit a cigarette with commendable steadiness of hand. But, though I was done with apprehension, I soon discovered I was not done with that sack, for my gondolier, returning, spake never a word nor looked he once at me, but resumed his oar with deep sigh as one delivered of a heavy load—yet first he wiped his hands upon his muffler! So then I knew!—Not my blood, by the grace of God, St. Mark and St. Theodore, but another's had stained those hands and weighed upon his conscience.—There was a body in that sack!

When, in the morning, I dragged a comfortable chair from the ship's smoke-room and sat me down on deck to contemplate the Adriatic, deep blue and sparkling under a sun as warm as summer, I had my doubts about that body. I thought of lesser crimes like smuggling, or drew a homely picture of a devoted son in Venice sending presents to an aged mother who had remained in the distant village of his birth.

But when, at evening, a blood-red sun sank out of sight behind huge sable clouds that brooded over Italy, my mind conceived the sack in monstrous shapes, and watched it sinking through deep water, stared at by fishes and spinning slowly in the wake of weights which dragged it down.

[*To be continued.*]

## CARAVANSERAI.

There have been a good many wails about the cost of living and I suppose we all feel a kind of melancholy satisfaction in knowing that there are others in the same boat as ourselves. As a matter of fact there are a good many lands where the unhappy housekeeper has more difficult problems to face than those presented by our own shops and markets. The Balkan Correspondents of *The Near East* have borne witness to that, and India, I take it, has learned one or two things in the matter of the Profiteer's little ways. A friend tells me that an old Indian townsman when bewailing the present high prices of food said that it was a pity we could not get back to the good old days of Queen Victoria, whose solicitude for her Indian subjects was such that every morning she called for the Prices Current, and with her own hand reduced any item which she considered to be too high. No wonder the poor old man sighed! For my own part, I admit, I have often felt that it would be a good thing to reduce a profiteer as it would have been done by the Queen of Hearts in "Alice."

An interesting episode occurred when the Italians evacuated Shebenik (Sebenico) the other day. When the Serbs marched in, a great bell in the monastery of St. Lavra pealed forth the glad tidings. This bell has an interesting history. It was cast at Venice in 1809, ordered for the main church in the then newly-liberated capital of Belgrade, but before it could be delivered, Serbia was once more overrun by the Turks. Not knowing what to do with it, the founder sent it to Shebenik for the monastery of St. Lavra, where it has hung till now. The local National Council has decided to buy the bell and send it to its original destination as a gift from liberated Shebenik to the city of Belgrade.

* * *

It always strikes me as a scandalous thing that a man, who has been wounded, or contracted an illness that cripples or incapacites him, in fighting for his country should ever have to look to private charity for assistance in time of need. I recognise, of course, that not every man who wore khaki deserved well of his country. A man who volunteered did, and does, in my opinion deserve whatever we can do for him; but of a man who had no choice in the matter, I, for one, take quite a different view. The conscript may or may not have "done his bit," and the foolish nonsense talked and written about "nothing being too good" for a man, merely because he was in khaki for a time makes me very impatient. But to the wounded man, whether he was a volunteer or a "compulsory," his country surely owes a debt of gratitude. Too often, however, that debt remains unpaid. And what is true of this country is equally true of others; for human nature is much the same in other lands as it is in this. A Belgrade correspondent sends me two storyettes illustrating this, as follows:—At a recent collection for poor children, a millionaire who was present remarked that, unfortunately, he had no change with him, and gave 3 dinars. A disabled soldier who was standing near, a mechanic, who had been very badly knocked about in Macedonia, and was condemned to a life on crutches, promptly gave a hundred dinars. . . . Another day a wounded veteran was sitting in a Zagreb café when a disabled man in tattered Austrian uniform came by, begging. The Yugoslav looked at him, and exclaimed: "How dare you beg of me! A little while ago we should have shot one another at sight; and it was men like you who ravaged our country and raped our women. It is sheer cheek on your part to beg from me!" Then, with a quick change of tone: "Yet after all, you poor devil, you only went like the rest of us, because you just had to." And a dinar changed hands.

## NOTES AND NEWS.

Devonshire Square,
London, E.C 2

**British Subjects in Turkey.**

That there should be growing dissatisfaction at the delay in the payment of the indemnities due from the Turkish Government to numerous members of the large British mercantile community at Constantinople is not in the least surprising. Eleswhere in these column will be found extracts from two memorandums on the subject, the one drawn up by British subjects at the British Chamber of Commerce at Constantinople, the other recently issued by a committee representative of interested British subjects. They give a very plain statement of the case, and one which on the face of it calls for an official statement without delay as to the steps that will be taken to meet legitimate claims for compensation. It is not as if the war ended yesterday. It is now going on for three years since the Armistice, ample time to carry out the necessary investigations, and to provide for redress.

**Their Case.**

As the documents from which we quote show British traders in Turkey suffered in every way during the war. Their stocks were taken, and their property occupied and pillaged. These firms who remained in the country were subjected to every kind of handicap. "Every possible endeavour" to quote the words of the second memorandum "was made to destroy the trade of British firms." The position after the Armistice can well be imagined. While British firms were handicapped for lack of organisation, and insufficient financial resources the traders of other countries were in a position to take advantage of the numerous openings for enterprise that existed. Developments in the Constantinople market since the first trade "boom" have, it is true, counteracted to some extent the advantage obtained by our competitors, and provided British firms are placed in a position to resume their pre-war activities it should be possible to some extent at any rate to regain the best ground.

**The Abyssinian Corporation.**

Extensive extracts from the reports of the Shareholders' Committee of Inquiry appointed at the annual meeting of the Abyssinian Corporation held on December 2, which was issued last week, are given on another page in the issue. The formation of the Corporation, it will be remembered, was carried out early in 1919, by Messrs. Erlanger, with the approval of the Foreign Office, and great hopes were entertained that it would prove a valuable spearhead for British trade endeavour. With the appearance of the first report covering the period ended June 30, 1920, in November it became evident that these expectations would have to be modified for a loss was shown of £140,000 after providing for further losses of stocks. The principal parties responsible for this unfortunate outcome were stated in the report to be the unprecented fluctuations in exchange and the abnormal conditions in the world's markets. The Committee, who have evidently made a most thorough and painstaking investigation into the position of the Corporation, while not disagreeing with this new point the lack of a definite trading policy and of adequate administration as among the factors responsible for the present situation. They further point out that the loss shown in the report no longer represents the total deficit, and that the financial position as at April 30 last indicates a loss of capital estimated at £459,292.

**The Future.**

The most important part of the report is that in which the future of the Corporation is dealt with. The Committee point out that the reare considerable possibilities for British trade in Abyssinia if conducted on sound lines, and that despite the unfortunate history of the Corporation "a good will of a very definite value has been created, and it would appear to be lamentable to sacrifice this asset." If, however, advantage is to be taken of this capital is essential. The Committee, therefore, puts forward a scheme of reconstruction which provides for the formation of a new company with a capital consisting of 10 per cent. Non Cumulative Participating Deferred Ordinary 10s. shares, and 1s. Deferred Ordinary shares. Existing shareholders will be alloted one deferred ordinary share for each share now held, and will have the right to apply for an allotment of three Preferred Ordinary shares, 5s. paid up, for every five shares now held. As the issued capital is £576,000 it follows that shareholders will be required to provide about £90,000 in cash to carry out the scheme.

Messrs. Erlanger, who have given the Corporation unceasing support since its foundation, are prepared to support the scheme, and provided the shareholders apply for 65 per cent. of the preferred ordinary shares will take up the balance besides subscribing for 40,000 shares at par. I have little doubt that the shareholders will give hearty support to the scheme, for it offers fair prospects of their regaining something of their lost capital for a comparatively small additional risk.

REPORTS FROM OUR OWN CORRESPONDENTS.

## BULGARIA.

Sofia, July 4.

### M. Daskaloff on the Outlook.

On June 30, M. Daskaloff, Minister of Commerce, made an important statement concerning the economic and financial situation of the country. He refused to be pessimistic regarding the future, and said that he pinned his hopes on an early recovery in the value of the leva during the following seasons. The budget which had been recently revised would stabilise the situation as the deficit would not in any case exceed 100 million levas and the extraordinary budget would be balanced by the 6 per cent internal loan. M. Daskaloff added that if this loan was not the success that was anticipated it would be necessary to put into force the tax on capital.

The Minister attributed the present decline in the value of the leva to the raising of the Moratorium, and hoped that a definite decision would soon be reached by the interested parties as to the means to be adopted for the settlement of pre-war debts. M. Daskaloff favoured the scheme outlined in "The Near East," of May 26, which provides for the deposit by debtors of an amount two, three, or four times the leva equivalent of their sterling debt at pre-war exchange rates. It is proposed that this should lie in the bank for three years, during which, or by the end of which, the debtor will cover himself by the purchase of sterling; the interest on the bank deposit to remain the property of the creditor.

Dealing with the question of export trade, the Minister said that the export duties were being greatly reduced and that it was highly probable that at the end of this year, they would be completely abandoned. He announced that the situation of the coal industry was very satisfactory; the mines were working well, and the production was good. If the railways were in a better state, he declared it would be possible to produce more coal, as it was only the means of transport that were lacking. A contract had been made with Roumania by which 80,000 tons of coal were to be sold to that country; this was the first time Bulgaria had ever exported coal.

M. Daskaloff also touched on the loan of 100 million francs which a Franco-Belgian bank syndicate are offering to lend. He remarked that although the conditions were heavy, the nominal interest being 7½ per cent, the loan would prove useful as it was made for productive purposes, viz. the construction of new railway routes, and not for the purchase of war material. The Minister defended the wheat consortium, and after having paid a tribute to the great benefit that was being realised by the law of compulsory labour, he declared that the foreign policy of the Government remained the same, and that the country could feel confident as to the present situation.

Other factors besides the Moratorium are causing the leva to fall and among them may be mentioned the payment of the indemnity, the comparatively small export of cereals, and a certain amount of political unrest. The external loan is not yet in operation as it is necessary for the Reparations Commission to give their consent, and it is understood that this has not yet been accorded for certain reasons. Business and financial circles do not share the opinion of the Minister of Commerce, although it is hoped that with the 1921 harvest practically ripe, a change for the better may take place, particularly if no delay is incurred in the selling of the cereals.

## TURKEY.

Constantinople, July 3.

### The Commercial Situation.

There is no amelioration of the crisis from which the Constantinople market has been suffering for the last twelve months or so. Most of the smaller business concerns have either closed down or have taken to gambling in the exchange as a less hazardous form of activity than legitimate commerce. Even firms possessing considerable resources are more than merely feeling the pinch. The easing of the strained political relations between the Sublime Porte and the Nationalists has permitted the despatch to Anatolia of a certain amount of merchandise, but the quantity has been negligible and practically confined to goods required for military purposes. The attempt to reopen commercial relations with Russia has proved absolutely abortive, for the simple reason that the Bolshevists have nothing to export but paper money which is only of value as waste paper.

There is not a single branch of business in Constantinople at the present moment that is not practically moribund. The general fall in prices is making matters worse, for the value of stocks which cannot be sold at present is depreciating daily, and even in foodstuffs, the only commodities in which there can be genuine commercial dealings, business is accompanied by losses. It is estimated for instance, that in respect of the importation of flour alone during the last six months there has been a dead loss of nearly £500,000.

One can only repeat what has been stated frequently on previous occasions: Constantinople is the head of Anatolia, and isolated from its body the head must perish. The authors of the Treaty of Sèvres apparently did not take the slightest trouble to consider the commercial consequences of that ridiculous document. As the capital cannot prosper until normal and unrestricted intercourse with the provinces is restored there is only the faintest prospect of any improvement in the near future.

The gravity of the situation will easily be realised when it is understood that although Turkey is essentially an agricultural country, the importation of flour even in normal times reached the not inconsiderable figure of nearly £500,000 monthly for Constantinople alone. As there is practically nothing in the way of manufactures in or near the capital, and no raw materials, the greater part of the everyday requirements of the immense population of the capital has to be paid for by credits.

So far as the export of cereals from Anatolia is con-

Digitized by Google

cerned, under present circumstances the cost of transport is such as to render it impossible to move the produce at a profit from the provinces to the capital. It is not surprising that the director of an important commercial house recently expressed the opinion that the safest business at the present moment is to deal in foreign exchange!

## YUGOSLAVIA.

Zagreb, July 12.

**Yield of Taxation.**

The Ministry of Finance has issued some statistics on the payment of direct taxation since the union, which are not without interest. The following figures (representing millions of dinars) are approximate :—

| | 1919 | 1920 | 1921 (to July 1) |
|---|---|---|---|
| Croatia and Slavonia .. | 19 | 36 | 38 |
| Bosnia and Herzegovina .. | 16 | 32 | 14 |
| Slovenia .. .. .. | 17 | 19 | 32 |
| Voivodina .. .. .. | 10 | 30 | 30 |
| Dalmatia .. .. .. | 1 | 2 | 1 |

For the period, from January 1, 1919, to May 31, 1920, Serbia and Montenegro gave 21 millions; from January 1 to July 1, 1921, Serbia and Mongenegro gave 89 millions.

From the liberation till June 1, 1921, Croatia and Slavonia therefore gave 94 millions, Bosnia and Herzegovina 63, Voivodina 70, Dalmatia 5, Serbia and Montenegro 110 millions, while the gross amount for the whole country over the period is 144 million dinars. The high figure for Serbia, in spite of her sufferings and losses, is remarkable. The collection for the richer provinces, especially the Voivodina, was very defective in the beginning, but has improved greatly, as it has also in Croatia, Slovonia, and Slovenia.

It is interesting to compare the figures of one of the first budgets of Serbia. The first was drawn up by Karageorge, and presented to the National Assembly in 1804. At that time, Belgrade was undergoing one of its numerous sieges, and both Semerevo and Pozharevatz were in the same state and the rulers could not collect the taxes, so Karageorge tried a loan, but with no success. He then turned to the merchants of Zumun for help. A moving appeal was addressed to them, signed George Petrovich (the real name of Karageorge), dated on May 15, 1804, at Topchider. He asked for 50,000 grosh, a grosh being the fifth part of a dinar, or 20 centimes, not an extravagant sum for a country at war, which Karageorge promised to pay back as and when the country could; it was signed by him "in the name of all Serbia." It was by such means as this that the country existed till 1811, when he reorganised the finances, and introduced the first regular budget, which amounted to a million and a half grosh. This held till the catastrophe of 1813. On the liberation again in 1815, Prince Milosh introduced a budget of 464,772 grosh, of which the civil list to the prince amounted to 25,000 grosh, that is to say 5,000 dinars for francs, which nobody could call extravagant.

**Miscellaneous.**

The first instalment of the furniture for the new palace has arrived. This fills thirty trucks: the remaining ten truckloads are on the way. The contract was secured by a Paris firm, and the value of it is two million seven hundred francs.

After an interruption of over a month, negotiations have been resumed with Italy for a commerical treaty. The chief problems to be settled are the questions of fishing rights in the Adriatic and of navigation, as well as of transport. It is hoped that the draft will be completed by the end of next week, for thorny questions such as the problem of the Gulf of Barosh and the evacuation of the third zone of Dalmatia are not touched.

Householders in Belgrade, who have been suffering patiently under the enormous prices prevailing for every day commodities, will be grateful to the Consumers Syndicate, which has obtained large supplies, and has thrown them on the market. During the first week in July, the peasants were selling tomatoes in the market at 12 dinars a kilo. Suddenly the syndicate appeared on the scene, and down came the prices with a run. By seven o'clock they had fallen to eight dinars, and by half past eleven they could be bought for four. The other prices are worth recording. For instance, the market price of potatoes was 2.50, but the syndicate sells at 1.9: beans, are sold at 80 paras, whereas the market price was two dinars only a few days previously cabbages have been knocked down from 4-5 dinars to 3-3.50: while onions have fallen from 3-4 dinars to 1-2.

## ROUMANIA.

Bucharest, July 5.

**General News.**

The National Bank is withdrawing from circulation all Banca Generala banknotes of one, two, five, 20 and 100 lei which after July 31 will have no legal value. On the other hand the National Bank has been authorized to increase its issue by 130 millions of two lei and 100 millions of five lei notes.

A fire broke out at one derrick of the Steaua Romana, at Campina, spreading rapidly to four others in the vicinity, all being totally destroyed by the flames. The fire was put out with great difficulty, and the damage is very heavy. There were unfortunately a few casualties.

## BRITISH CLAIMS AGAINST TURKEY.

### A Settlement Urged.

Growing resentment is felt by the members of the British commercial community at Constantinople at the fact that indemnities due from the Turkish Government are as yet unpaid. A meeting was held at the offices of the British Chamber of Commerce on May 11, when a resolution was passed heartily supporting the action of the Council of the Chamber in addressing a letter to the Controller, Reparation Claims Department Board of Trade. The views of the meeting were set forth in a memorandum which was forwarded to the British High Commissioner for transmission to the British Government.

The memorandum pointed out that both before and after the outbreak of hostilities with Turkey the stocks in trade of British subjects were seized and requisitioned by the Turkish authorities, their properties forcibly occupied and damaged, and their homes pillaged. After the Armistice was signed many returned to Turkey to find their businesses ruined, their homes uninhabitable, and their furniture and personal effects non-existent, necessitating further calls on their depleted capital for repairs and replacements. These long continued drains on their resources have in very many cases seriously curtailed their operations to the detriment of the trade of Great Britain and to the advantage of its competitors.

Two-and-a-half years have passed since hostilities were suspended and the hope of any immediate relief in the shape of the payment of indemnities seems to be as far off as ever. It was further pointed out by some speakers that it cost the British Exchequer over £3,000,000 for expenses in connection with the Belgian refugees in the United Kingdom; further, that the British Government had recently made an advance of £10,000,000 to the Serbian Government, to enable the latter to make payments to their nationals on account of damage and losses they had suffered at the hands of the enemy. Also that the French Government had voted a considerable sum to be advanced on account of claims of their own subjects. The meeting recognised that difficulties might arise in connection with the validity of claims under certain headings which would have to be submitted to the decision of the Reparations Committee, but they submi)- that a very large percentage of the claims are indisputable, representing as they do the value of goods requisitioned (in numerous cases some considerable time before war with Turkey broke out and of properties and houses seized and occupied by the military authorities or other State departments. The meeting expressed the hope that H.M.'s Government would take into consideration the letter of the British Chamber of Commerce and accede to the request therein contained for the immediate payment of an advance of fifty per cent. on account of the claims put in by the sufferers in Turkey.

A further memorandum has recently been issued by a committee representing British subjects in Constantinople having claims against the Turkish Government arising out of the war.

The Memorandum lays emphasis on the position with which British commercial houses have been confronted since the Armistice. Those firms of Turkish nationality who could not hold their own against British competition, found themselves, at the commencement of the war masters of the situation with an open and undisputed field before them. There have been cases where goods requisitioned from British firms, ostensibly for military purposes, were handed over to Turkish firms for sale at fabulous prices. The "Commission contre l'accaparement' established a few years previous to the Armistice, forced such British firms as were compelled to continue the liquidation of their business to sell goods at prices fixed by the Commission, which, in many cases, meant a dead loss. Goods were sometimes taken over by the Commission itself without payment. Every possible endeavour was made to destroy the trade of British firms. Some firms were forced to adopt the Turkish nationality. Those firms who refused to do so were summarily closed. All were heavily requisitioned. Large sums were forcibly taken from them for subscriptions to the Turkish Internal Loan and for other purposes. They were preyed upon by Government officials, by the police and the members of the National Defence League. The British firms and individuals who remained in Turkey bore all these losses without a murmur, feeling that victory, in which they had full confidence, would release them from their bondage, procure them reparations, and entitle them to Government aid and assistance to enable them to make up for lost time. The war came to a victorious conclusion. Except for the first few months of the Armistice, no, or very few difficulties were placed in the way of trade done by Turkish subjects and firms. The Turks, who made fortunes during the war who had done their best to destroy every vestige of British trade and activity in their country, and who became efficiently organised, were allowed to carry on "business as usual" and take full advantage of the Trade Boom after the Armistice, in competition with British firms who were not organised, whose staffs were scattered and received no financial support or encouragement from their Government. Czechoslovak, Yugoslav, Italian and even French nationality was extended to many Ottoman, and particularly German and Austrian subjects. The British commercial community in Constantinople finds itself in this way doubly handicapped. It lacks in many cases the necessary capital to re-establish its pre-war business and it has to meet the competition of powerful Ottoman and ex-German and Austrian concerns

The committee wish to emphasise the statement made in the Memorandum, viz: that some British subjects who returned to this country after the Armistice found their homes completely ruined and their furniture, household goods and private effecte stolen. Cases have been brought to the notice of the committee where prominent local British firms have ceased to exist because of lack of capital, whereas others have suppressed some of their sections for the same reason. A large proportion of the claims for goods requisitioned by the Turkish Government apply to requisitions effected as and from August 4, 1914, or three months previous to the war between Great Britain and Turkey. The committee wish to point out all that these requisitions were made in flagrant opposition to the capitulations which the Turks had not abolished at the time, and to the written agreement arrived at on the subject with the foreign Powers subsequent to the Balkan war.

A good deal has been said in the local press of a payment which the British Government is said to be prepared to make to the Turkish Government on account of the money deposited against the two Turkish Dreadnoughts which were taken over by Great Britain on the advent of the war. These reports, which have not been denied, have caused a most painful impression amongst the British community. It is felt that this money should be devoted to the claims of British subjects arising out of the war and not handed to the Turkish Government. The committee wish to emphasize their opinion that moneys due to the Turkish Government, be it for the value of the Dreadnoughts, the Egyptian tribute and its participation of the receipts of the Eastern Telegraph Company, etc., should be held to meet the claims of British subjects in Turkey, whose stock in trade, properties and household effects were requisitioned, ruined and stolen by the Turkish Government and people who, it is alleged the British Government is anxious, for political motives, to assist.

Lastly, the reading of Article 302 of the Treaty of Sevres seems to imply that Britishers residing in Turkey on the outbreak of war, are debarred from the right granted to all other British subjects outside Turkey to recover debts owing in Turkish currency to them by debtors in Turkey, at the pre-war rate of exchange. It follows that, if this reading is correct, British firms and individuals residing in Turkey, who are owed money in Turkish gold currency, can only collect the same in Turkish paper money and must thus incur a loss of about eighty per cent. of the capital sum due to them, while the Turkish debtor benefits by the difference, his capital, in terms of paper money, having increased proportionally.

---

The National Bank of Greece has agreed to the request of the Minister of National Economy to re-open its branches in Seres, Drama, and Xanthi which were temporarily closed owing to the shortage of employees as a result of the Greek mobilisation.

## THE ABYSSINIAN CORPORATION.

### Report of Shareholders Committee.

The Shareholders' Committee of Enquiry appointed at the annual general meeting of shareholders held on December 2 last has now issued its report from which we give the following extract :—

We feel we must express our regret that it has proved impossible to issue the report earlier, in spite of the amount of time spent by us on the affairs of the corporation. An enormous mass of detail has been investigated, much conflicting evidence has been heard, and the results have had to be carefully weighed and considered before definite conclusions could be arrived at. In addition we have relaxed no effort to bring about a realisation of the commodities unfortunately held by the corporation, with some measure of success, and to effect a reduction of administrative expenses wherever possible.

We are of opinion that the unsatisfactory position of the corporation is due mainly to the following circumstances :— The corporation was formed at a period when, although inflation had not reached its zenith, the only justification for heavy purchases of commodities would have been simultaneous sales for forward delivery at a profit. It is true that when the purchases were made high prices were obtainable, but no forward sales were effected, nor does any attempt appear to have been made in that direction. It is also true that the Board and the new officials of the corporation had neither experience of trading in Abyssinia, nor knowledge of local conditions. In our opinion the board appear to have had no definite trading policy, but seem to have trusted entirely to Mr. Rey's judgment. The corporation, although it might by prompt action have realised some of its stocks without serious loss, eventually found itself in possession of large stocks of commodities which, when the slump occurred, were either unsaleable or only realisable at a very grave sacrifice.

The general manager (Mr. C. F. Rey) on arriving in Abyssinia in August, 1919, almost immediately drew large sums from London, which, in all, exceeded the then paid-up capital of the company, and exchanged them into Abyssinian dollars at the high rate of approximately five dollars to the £, and with these dollars he purchased very large quantities of hides, coffee and beeswax, as well as the general stocks of certain local traders. In spite of an organisation costing about £45,000 per annum, no regular returns of necessary information were sent to the London office, although repeatedly called for, and no proper arrangements were made to handle the goods when purchased. The fall in all commodities purchased by the corporation was general, and the result was that the corporation suffered heavy losses, which were further increased by a severe depreciation of the Abyssinian dollar, thus affecting articles purchased for sale in Abyssinia, such as cotton goods, as well as the large balance of dollars held. Although the board claim that they were obliged to give full powers to the general manager, owing to the abnormal difficulties and delays in communication generally, and though they suffered from a lack of the information essential to control the situation, yet our considered opinion is that they have shown such an absence of policy and business ability as to be a direct factor in the failure of the corporation's undertaking. Their principal care should have been to move slowly and surely, as they were operating in a country where the trading conditions were not fully understood. The history of their trading, however does not indicate that such caution was exercised.

A considerable loss was sustained by the corporation owing to the fact that, on enquiry being made by the general manager as to prices of cotton goods in England, and despite his request that no cotton goods should be ordered until he had had an opportunity of considering such prices, the London board, through their commercial agents, the Levant Company, made heavy purchases of cotton goods from Messrs. Hendersons (Manchester) Ltd., which company is closely connected with the Levant Company. Mr. Alexander Henderson was at this time managing director both of the Levant Company and Hendersons (Manchester), and also a director of the Abyssinian Corporation. The Levant Company voluntarily forwent the commission of 2½ per cent. to which they were entitled under their agreement with the Corporation, and Mr. Henderson states that the profit made by Hendersons (Manchester), Limited, did not exceed 2½ per cent.

In our opinion, the directors' report, balance sheet and chairman's speech at the first annual general meeting did not indicate correctly the position of the company. For instance, when in his speech the chairman claimed that the directors were showing the worst of the position to the shareholders, it was unfortunate that the board had not realised that the amount of £62,000 which had, in anticipation of loss, been written off stocks held at June 30, 1920, was quite insufficient in view of the fact that sales could not have been effected at the depreciated prices, those prices being purely nominal, indeed since the date of the meeting there has been further depreciation both of the stocks and of the dollar. Again, in the balance sheet no mention was made of the purchase of the Harrar Concession for £20,000 (this being a mineral concession in the Province of Harrar), despite the fact that the liability for this purchase existed in April, 1920. the draft being actually paid in London on August 12, 1920. The Auditors state that this transaction did not come to their knowledge. The directors inform us that this matter was not referred to in the report or in the chairman's speech as they were hopeful of obtaining the rescission of the concession (which has since been done) and desired to avoid a discussion at the general meeting, possibly detrimental to the negotiations which were then proceeding. They state further that in their view the transaction was incomplete at the date of the balance sheet.

It was stated in the prospectus that T. R. Armanza would subscribe separately for 40,000 Shares, whereas he only agreed to subscribe for shares with any monies in excess of £30,000 received by him from the liquidation of the business of Gerolimato and Armanza, which excess had been estimated at £40,000. Upon liquidation such excess amounted to £2,275 only, and shares for this amount were subscribed for by Mr. Armanza. We obtained the opinion of Mr. Clauson, K.C., who advised us that among the statements in the prospectus there was an important inaccuracy in regard to Mr. Armanza's liability to subscribe for a " further 40,000 Shares,"

Upon our representations the board have agreeed to forego all fees owing from September 30, 1920, and to waive any claim thereto. Since the meeting further heavy losses have been made as stocks have been sold at their reduced values on pressure from the banks, and the onerous interest and general charges have continued. We desire to point out that had it nor been for the ready assistance afforded by Messrs. Erlanger, particularly in financing certain cotton consignments, the corporation would have been placed in a position of considerable jeopardy

As a result of our investigations we are of opinion that the financial position at April 30, 1921, indicates a loss of capital estimated at £459,292. The balance of capital, estimated at £116,733, is accounted for as follows :—Land, buildings (say) £30,000, stocks, debtors and cash £211,541, goodwill £21,192—£262,733—less creditors and loans £146,000—£116,733. The Abyssinian stock values have been taken at market prices, converted into sterling at the rate of exchange of 11.70 dollars to the £. We have ascertained from persons acquainted with the conditions in Abyssinia that the possibilities of British trade in that country are considerable if conducted on sound business-like lines. The Regent, Ras Tafari, is a cultured and intelligent ruler who clearly desires the development of his country, both as regards agriculture, and European trade, and is prepared to give every facility for that purpose. Despite the unfortunate history of this corporation, a goodwill of a very definite value has been created and it would appear to be lamentable to sacrifice this asset. Notwithstanding these possibilities there is very little future for the company unless there is a considerable accession of working capital, yet if sufficient finance can be found a prosperous future may be reasonably assured to the corporation.

We have, therefore, prepared the following scheme of reconstruction for your consideration, and submit it in the confident belief that the adoption of this scheme will be in the best interests of the shareholders. We feel compelled to add that, considering that the drafting of the contract clauses in the prospectus had been entrusted by the board to two well known firms of solicitors and to counsel, the inaccuracy in the prospectus was not, in our opinion, caused by any want of good faith by the board.

The scheme of reconstruction provides that the new company be formed with the capital divided into preferred ordinary and deferred ordinary shares, the preferred ordinary shares to be entitled to a fixed non-cumulative dividend of 10 per cent. of surplus profits, and the deferred ordimary shares to be entitled to 80 per cent. of the surplus profits. The new company to purchase the net assets of the Abyssinian Corporation, Limited, for £115,205, payable as to £86,403 15s, in 345,615 preferred ordinary shares of 10s. each, 5s. paid up, and as to £28,801 5s. in 576,025 deferred ordinary shares of 1s. each, fully paid up. The present shareholders (holders of both ordinary and deferred) to be alloted ordinary share of 1s. fully paid, in exchange for each old share of £1, and to have the right to apply for an allotment of three preferred ordinary shares of 10s. each, 5s. paid up, against each five old shares of £1 held by them, the balance of 5s. being called up by easy instalments. The shareholders to have the right to apply for shares in excess of the number to which they are entitled

So as to ensure the success of the scheme Messrs. Erlanger have offered (free of remuneration), in the event of the shareholders applying for at least 65 per cent. of the preferred ordinary shares, to apply for the balance not taken up by the shareholders, and to subscribe also for a further 40,000 shares at par. Messrs. Erlangers have stipulated that their loan of approximately £80,000 shall be reduced to the extent of £35'000 out of the proceeds of the issue, but at the same time they have agreed to leave the balance of approximately £45,000 on loan for three years, subject to reduction by any amount realised on the sale of the present securities held by them.

# ENGINEERING TOPICS.

*By our Engineering Representative.*

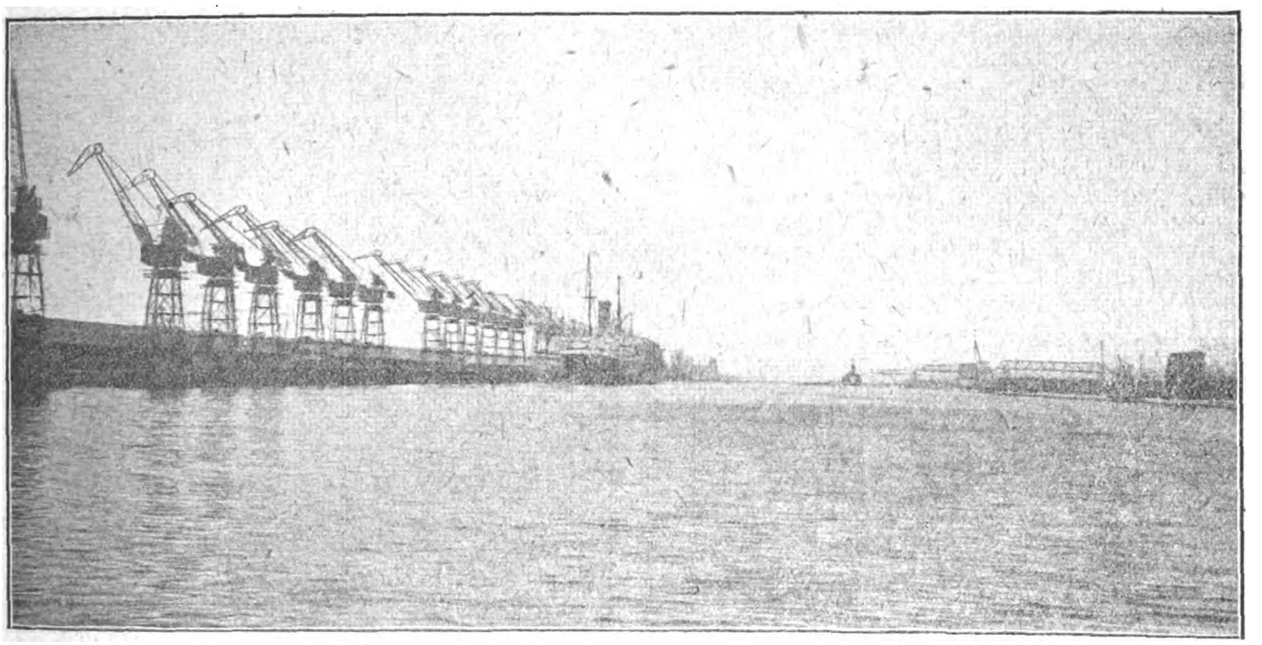
**London's Latest Dock.**

The new dock extension, south of the Royal Albert Dock, is part of the scheme of improvement of the Port of London, the completion of which is estimated to cost about £14,000,000, and which comprises new quays, warehouses and storage sheds in the existing docks in addition to providing new loading and unloading stations, and the deepening of several of the more important channels and waterways.

The new dock has been planned by the most expert engineers in England, and has been constructed on the large vacant area lying between the existing river bank and the Royal Albert Dock. The complete character of the design may be visualised when it is mentioned that it has, at its western extremity, a dry dock which is 750 feet in length, and which can be still further extended should need arise. It is connected with the main Royal Albert Docks by a passage 100 feet in width and the new water area covers no less a space than 68 acres. It will thus rank amongst the largest docks of its kind in existence. Over two and half miles of quays are provided, and the entrance lock is a particularly fine piece of engineering work, being 800 feet in length and 100 feet in with. Facilities are thus afforded for the accommodation of vessels of over 40,000 tons gross tonnage, and vessels of the size and type of the Olympic can be admitted and dealt with.

So far as equipment is concerned the new extension will be second to none, and will afford a striking illustration of the way in which British dock and harbour engineers are leading the world. In the lock, the depth of water on the site at Trinity high water is 45 feet, and should for any reason this be considered insufficient, powerful pumps of the latest type and design, fixed at the lock entrance, can increase the dock water in depth by a further 2ft. 6ins., facilities for a still deeper water being ready for use if called upon The lock entrance is bell-mouthed and no pains have been spared to secure the expeditious admission of vessels. The lock gates are mechanically operated although the electrical equipment of the dock throughout is of the most complete nature. Everything from the huge double bascule bridge at the dock entrance to the buildings provided is such as to enhance the already high reputation of the Port of London. It is noticeable that reinforced concrete construction has been adopted on a remarkable scale, the luffing cranes are of mammoth size and design, and rails and haulage ways are laid down wherever necessary to add to the efficiency of the dock operation. The storage and transit sheds are also of immense size, and it can be safely said that nothing has been omitted from the equipment which could in any way add to the expeditious berthing of vessels and the handling of their cargoes.

No fewer than seven jetties are provided on the south side of the new dock, and at each is accommodation for vessels of 600 feet in length. A luffing crane is provided on each jetty by means of which the vessel's cargo can be discharged into lighters berthed between the jetties and the quay walls. In this way the dock is available for both river and craft delivery, and discharge direct on the quay. This in itself will be found a great convenience, and a means of saving a large amount of time when rail or road transport of goods is required.



**King George V. Dock, from Bascule Bridge looking W.** *Near East Special*]

The transit sheds are ranged along the actual quay which is, of course, provided with railway lines of standard gauge. There are 42 of these transit sheds altogether, measuring 528 feet by 120 feet in width, and in addition to a single berth of 600 feet there is a continuous concrete quay of 4,000 feet on the north side of the new extension. In addition to this accommodation there are three two-stored sheds of reinforced concrete, each 1000 feet long by 20 feet in height. The design of these would seem to the casual beholder to be rather on the massive side, but judging from an engineering standpoint the authorities are to be congratulated on their foresight, and the able way in which they have provided for all eventualities. These sheds are filled with under-slung gantry cranes for handling

Digitized by Google

goods and the design of the building is such that a maximum of light and air are obtainable. Everything necessary for rapid handling of merchandise, from concrete cart areas to a complete network of railway lines has been provided.

The work, which was commenced in 1912 was naturally interrupted by the war, and was not resumed until after the Armistice. Since that date however, it has been pushed on with all possible speed, and its speedy completion speaks volumes as to the energy of all concerned, and to the vast organising ability of Lord Devonport, head of the Port of London Authority.

**Aircraft and Wireless.**

At one time it was believed that wireless telephony would never become possible, but this idea has long been proved incorrect. The rapid strides being made in the advancement of Marconi telephony between the land and aeroplanes have just been strikingly illustrated in the case of experiments carried out by a machine flying over Abbeville and a land station in London. A Handley Page official asked the wireless operator to try for touch with a machine coming from Paris. A minute later the official was asked to speak on his ordinary office telephone, and picking up the receiver heard to his astonishment the voice of the mechanic on board the aeroplane, announcing that the machine was then flying over Abbeville, and proceeding to make the required report. The explanation is simple, although the experience sounded a little uncanny. The ground operator in London in the ordinary way would listen for the sound of the Marconi telephone from the air through ear pieces fitted on a head piece clipped over his ears. Getting a message he would ring up the office telephone and repeat it. In this case he simply obtained the connection to the office, and placing one Marconi earpiece to the receiver of the ground telephone, allowed the air mechanic's voice to carry straight through to the office.

**Oil and Metals.**

A particularly interesting paper was read a few days ago at the conference of the Institution of Civil Engineers on the effect of the war on mineral supplies. A large portion of the paper dealt with the output of iron ore as well as that of other metals, and it was pointed out th at although the output of iron and consequently that of manganese ore had dropped very substantially, there was a remarkable increase in the production of such metals as nickel, chromium, vanadium, and tungsten, due largely to the use of these in the production of special steels. The paper pointed out that these might almost be called "economy" metals for their extensive use enabled economies to be effected in a number of other metals as well as in the processes by which they were worked and in the weight of parts. The increased output of tungsten had had the very important result of economising labour and consequently of reducing production costs.

The marked development in oil production taken in conjunction with the comparative shortage and consequent high price of coal, said the lecturer, raised the question whether oil was not likely in the near future to prove a most serious competitor to coal, especially in the direction of the production of power. Oil reserves are regarded as being very small in comparison with those of coal, but in connection with this it is not easy to speak positively. Our knowledge regarding oil reserves is limited and largely speculative, and it may well be that there are in existence many extensive and at present unknown or unworked oilfields. Further, the world has vast shale oil resources, and there is little doubt but that these will be drawn upon largely in the near future. As one of the subsequent speakers pointed out, it is probable that one of the most largely used fuels of the future will be a mixture of oil and pulverised coal as by the use of this combination we can obtain the same thermal value as oil, bulk for bulk but not weight for weight.

**A New Char-a-Banc.**

A char-a-banc, to accommodate 30 passengers, has just been put on the market, and is of more than usual interest in view of the fact that its makers, Commercial Cars, Ltd., were the first British makers to place a really heavy commercial vehicle on the roads.

The car presents a very handsome appearance, and no pains have been spared to make it as comfortable as possible for the passengers. The seating accommodation is ample, and the springing little short of luxurious, very few passengers vehicles on the road at present could compete with the new production in this respect. The body is of the flush seated torpedo type, and is fitted with a folding round screen, cape cart hood, and a green or grey finish is provided according to the taste of the purchasers.

The chassis frame is of high grade pressed steel specially tested in order to ensure that a high margin of safety exists. The engine is of the four cylinder type, the cylinders being cast in pairs. The bore and stroke are 115 by 140 millimetres respectively, so it will be seen that ample power can be developed when the vehicle is on low gear to carry an exceptionally heavy load up extremely steep gradients. The patent gear box allows four forward speeds and one reverse, operated by a side lever through a gate change quadrant, the gear change being effected by dog clutch engagements. The shafts are particularly short and rigid, mounted on ball bearings and are automatically lubricated. All gear wheels, dogs, and shafts are hardened and accurately ground to size.

The final drive is by hardened steel worm above the axle working in phosphor-bronze wheel. This is mounted in a removable section of the main axle, casting for quick inspection and replacement. The propeller shaft is enclosed in a steel tube bolted at one end to the worm casing of back axle. This tube is provided at its forward end with a spherical enlargement, and acts as a combined radius and torque stay.

With all passenger vehicles, the clutch is an important item as on its smoothness of action much of the comfort of the passengers depends. In this vehicle it is of a rather larger diameter than usual, and is leather lined with a self-contained spring. The body is of light pressed steel, and the drive from the clutch to the gear box is through the usual shaft and disc universal joint.

The wheels are of the hollow spoke type, of cast steel and designed to take solid tyres of 930 by 120 m.m. section single for the front and of 1010 by 120 m.m. for the back wheels. The steering is of the irreversible type through a worm and segment in an oil-tight case. The steering of this model, like that of all Commercial Car products, is extremely easy, a feature which is not always to be found in connection with heavy cars and lorries.

I was very pleased to see that particular attention is paid by the makers to the design and construction of the brakes. On these, more even than on the skill of the driver depends the safety of the passengers, and there should be no fear of any failure of the brakes in this particular car. The footbrake acts by external contracting arms, filled with easily renewable metal shoes, on a large drum, with ample surface, mounted on the rear end of the gear box main shaft. The hand brake operates shoes which expand internally in cast steel drums mounted on the rear wheels. The control is by the usual foot accelerator and hand lever on the steering wheel, and the magneto, which is of the water tight pattern, is also advanced or retarded by a similarly placed lever.

According to news from Athens, the Italian steamship Onoria, 2,580 tons, has sunk off Cape Matapan, after catching fire. The crew has been landed at Patras.

# SHIPPING INTELLIGENCE.

## ROUMANO—POLISH UNDERSTANDING.

(From our own Correspondent.)

Bucharest, July 5.

The negotiations for a commercial treaty between Roumania and Poland have been concluded, and the convention has been duly signed by the respective delegates at the Ministry for Foreign Affairs. The treaty is based on the most favoured nation clause, offering to both countries facilities for the exchange of goods, transport and transit.

Poland has obtained facilities to establish a commercial base by erecting wharfs, warehouses, etc. in one or two principal Roumanian ports on the Danube, probably in both Galatz and Braila, one being used for exports, and the other for imports. The duration of the convention is one year, to continue automatically if not denounced three months previously.

The Polish delegation has visited the important industrial centres in the country, and also the large ports, and everywhere received a warm welcome.

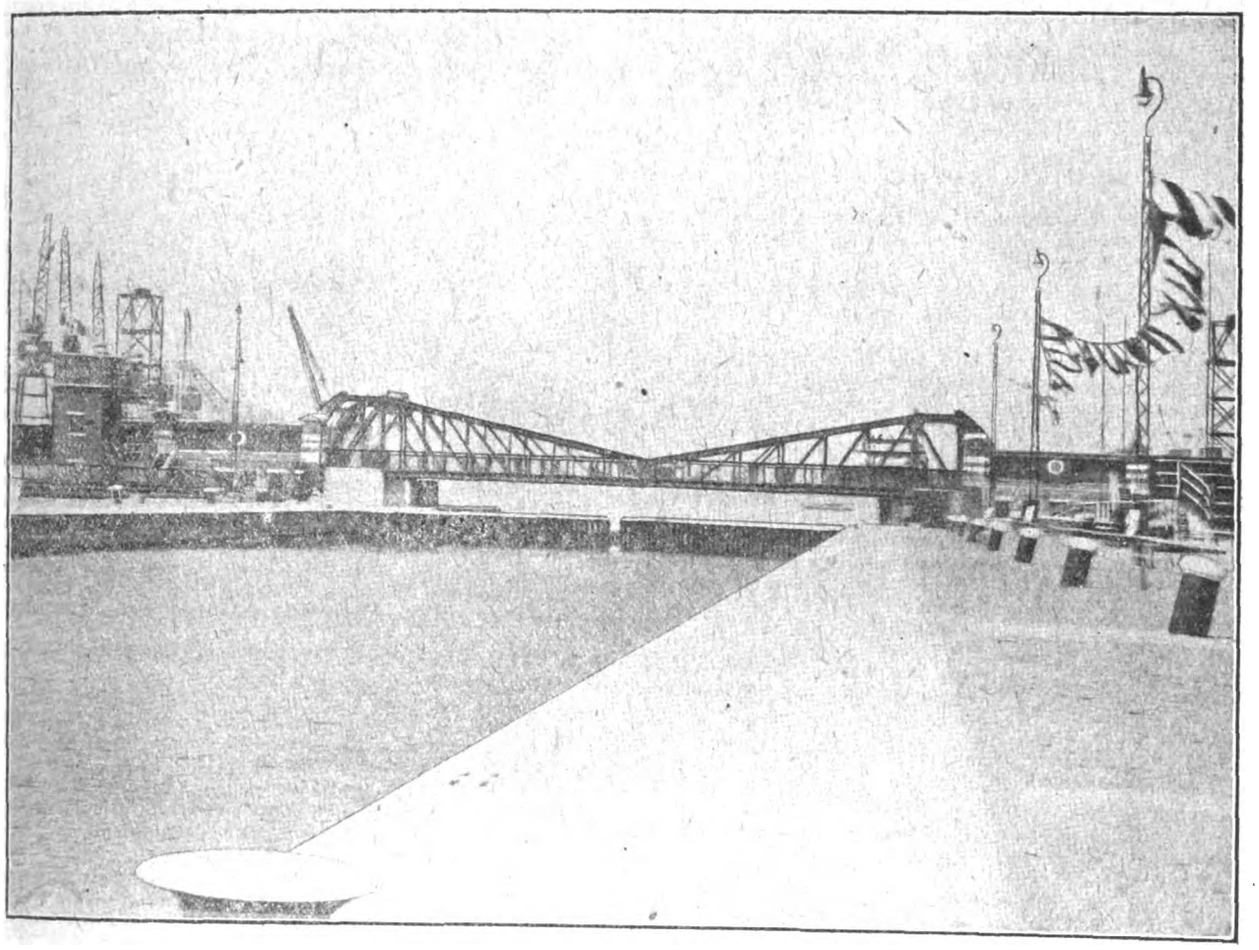
## Packing of Goods for Bulgaria.

A report has been received from H.M. Legation at Sofia that complaints have been made of the somewhat excessive amount of damage to bales from handling at both Varna and Bourgas. It is understood that this is in great part due to the large size of the bales packed in the United Kingdom, and that goods would be much less likely to suffer were the packages smaller.

## EXPORT FROM THE DANUBE.

Practically the first real export season from the Danube since the war will be inaugurated this year, says the Constantinople correspondent of the *Manchester Guardian Commercial*. Before the war Roumania, with a yearly average export of maize of more than one million tons, came second as maize exporting country in the world. Barley was exported by Roumania at a yearly average rate of 1 to 2 million tons, and oats about 0.150 million tons. The export of wheat is still prohibited, but by special arrangement 20,000 wagon-loads of wheat will be shipped to France, in French bottoms, of course. Besides cereals there ought to be taken into account the growing export of timber from the rich woodlands formerly belonging to Austria-Hungary.

The tonnage required for the transport of the main staples of the Danube, the harvest being to all appearances good, is estimated by Roumanian shipping agents visiting Constantinople at about five times that of last year, or at about 1,200-1,500 steamers of medium size. Suitable bottoms for the North Sea route are scarce in local and Greek waters; and freights, though still very low, have already improved. A substantial rise may be expected in a month or two. Freights rise, as a rule, at the time when the great agricultural staples are changing hands, not only under the influence of increased demand of tonnage, but also of certain manipulations by dealers in grain who are using high freights as a means for pressing down prices in the producing countries during the buying season. If by that time, which is more than likely, the coal export from Great Britain, who is the biggest importer of maize from Roumania, has set in again, remunerative inward cargo may be expected for British ships.



**View of Bascule Bridge and Portion of Lock of King George V. Dock.** *(Near East Special).*

## FORTHCOMING SAILINGS.

The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses :—

*Anchor-Brocklebank Line.*—s.s. Maidan, for Calcutta (Birkenhead, July 27); s.s. Makalla, for Port Said, Colombo, Madras, and Calcutta (London August 6); s.s. Maihar, for Calcutta (Birkenhead, August 17).

*Bibby Line.*—S.s. Yorkshire, for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, August 3).

Digitized by Google

*Clan Line.*—S.s. Clan Mackenzie for Bombay and Persian Gulf (Birkenhead, August 6).

*Cunard Line.*—A steamer will sail on August 20 for Algiers, Piraeus, Syra, Smyrna, Volo, Salonika, Constantinople, Varna, Bourgas, Constantza, Sulina, Novorossisk, Batoum, Nicolaief, Odessa, and Poti.

*Ellerman Line.*—S.s. Gerano, for Gibraltar, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, July 30).

*Ellerman's City Line.*—S.s. City of Marseilles, for Bombay and Karachi (Birkenhead, July 27); s.s. City of Benares, for Calcutta (Birkenhead, July 29); s.s. City of Baghdad for Calcutta (Birkenhead, August 15).

*Ellerman's "Westcott and Laurance" Line.*—Steamers sail fortnightly for Mediterranean, Egypt, and Levant ports.

*Glen Line.*—S.s. Glenapp, for Port Said, Port Swettenham, Singapore, etc. (also calling at Genoa) (London, July 28); s.s. Carnarvonshire, for Port Said, Port Swettenham, Singapore, etc. (London, August 11).

*Harrison Line.*—S.s. Astronomer, for Calcutta (Liverpool, August 2).

*Henderson Line.*—S.s. Mandalay, for Port Said and Rangoon (Birkenhead, July 27).

*Holt Line.*—S.s. Pyrrhus, for Port Said, Port Swettenham Singapore, etc. (Swansea, July 29).

*Maindy Line.*—S.s. Maindy Tower, for Antwerp and Moroccan ports (London, end of July).

*Moss Line.*—S.s. Lugne for Gibraltar, Casablanca, Cyprus Malta, and Beyrout (Liverpool, July 25); s.s. Amarna for Gibraltar, Algiers, Malta, and Alexandria (Liverpool, July 30); s.s. Karnak for Gibraltar, Algiers, Malta, Piraeus, Syra, Smyrna, Salonika, Constantinople, Bourgas, Varna, Constantza and Sulina (Liverpool, August 6).

*Papayanni Line.*—S.s. Cressado, for Algiers, Malta, Piraeus, Smyrna, Syra, Volo, Salonika, and Constantinople (Liverpool, August 13).

*P. and O. Line.*—S.s. Nagóya, for Colombo, Madras, and Calcutta (taking cargo for Malta, Port Said, and Aden) (London, July 29); s.s. Dongola, for Bombay (taking cargo for Gibraltar, Port Said and Aden (with transhipment at Bombay) for Indian Coast and Persian Gulf ports) (London, July 29).

*P. and O. British India Line.*—S.s. *Chanda, for Bombay and Karachi (London, July 29); s.s. †Trevorian, for Colombo, Madras, and Calcutta (London, July 30); s.s. *Hatarana, for Bombay and Karachi (London, August 27); s.s. ‡Nirvana, for Colombo, Madras, and Calcutta (London, August 30). *Taking cargo for Persian Gulf and Malabar coast ports; †taking cargo for Port Sudan, Port Said, Suez, and Aden; ‡taking cargo for Port Said, Suez, and Aden.

*Prince Line.*—S.s. Algerian Prince for Tunis, Malta, Alexandria, Jaffa, Haifa and Beyrout (taking cargo for Tripoli (Syria), Lattakia, Alexandretta, Mersyne and Cyprus ports, (Manchester, July 27).

## NEW EGYPTIAN COMPANY.

The gross profit of the New Egyptian Company for 1920 was £182,025, less service of Debentures, amounts written off properties and sundry reserves £66,904, leaving £115,121, plus £61,207 brought in, making £176,328. The directors recommend a dividend of 20 per cent., free of tax, carrying forward £101,328 subject to directors' and managing director's extra remuneration corporation tax and excess profits duty (if any). The net income derived from estates was £18,361, compared with £36,456 in the previous year.

16, Gracechurch Street, London, E.C.3.

## OIL NOTES AND NEWS.

### Anglo-Egyptian Oilfields.

Sir Reginald Macleod K.C.B., presiding at the meeting of the Anglo-Egyptian Oilfields on July 14, made an encouraging statement regarding the outlook for the current year. In 1920 the quantity of crude oil produced was only 155,975 tons as compared with 231,380 tons in 1919, and 277,300 tons in 1918. Of the 1920 total 91,887 tons were produced in the last six months, while for the first half of the current year the production has amounted to over 85,000 tons. Then the past year was marked by the increased cost of material and freight. Since the close of last year freights have fallen, and transport charges will be lower. Sir Reginald stated that one of the exploratory wells drilled to the north of the main Hurghada field had struck oil, thus indicating the possible existence of new reserves within their existing territories.

## TENDERS INVITED.

*(Particulars of tenders marked (D.O.T.) are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W.1.)*

**Egypt.**

Rope.—The Egyptian War Department invite tenders for the supply of rope. Tenders should be addressed to the Inspecting Engineer, Egyptian and Sudan Governments, Queen Anne's Chambers, Broadway, Westminster, S.W. 1. August 3.

Brass, Copper, Iron Bars and Plates, etc.—The Director-General of Ports and Lighthouses Administration at Alexandria invites tenders for the supply of brass, iron bars and plates, lead sheets, tool steel, mild steel, zinc sheets, iron and brass wire, nails, screws, etc., of brass, copper iron or zinc. August 20. (D.O.T.).

Cement.—The Secretary-General, Ports and Lighthouses Administration, Arsenal, Alexandria, invites tenders for the supply of 100 tons of cement required for the second half financial year 1921-1922. August 29.

Metals.—The Director-General of Ports and Lighthouses Administration, Alexandria, invites tenders for the supply of brass and copper, iron bars and plates, lead sheets, tool steel mild steel, zinc sheets, iron and brass wire, nails, screws etc. of brass, copper, iron and zinc. Representation by an agent resident in Egypt is essential. August 20. (D.O.T.)

Blank Cards.—The General Manager, Egyptian State Railways Telegraphs and Telephones, Cairo, invites tenders for the supply of blank cards for railway tickets. August 29.

**Morocco.**

Rails, etc.—Tenders are invited for the supply of 3,000 tons of rails (French standard, 36 kgs. grammes per metre), and 8,000 pairs of steel fishplates for the Tangier-Fez Railway. August 20. (D.O.T.).

## CONDITIONS IN TURKEY.

The following cabled report of conditions has been received by the London Office of the Guaranty Trust Company of New York from its office at Constantinople:—Stocks of essentials are very low. This has necessitated the renewal of orders and has given some slight impetus to markets here. A strong general demand is evident for foreign exchange. The large turnover of sterling has not been sufficient to affect the upward tendency which has been recently been consistent although the movement has been confined within narrow limits. Sterling now quoted 54½. Following sharp break and closing of bourse in Sofia, Bulgarian Levas fell heavily here and touched low level of 90 to £1 (Turkish); now recovered to about 77 with strong demand. Enquiries are made for drachmas by buyers at 12.50 to £1 (Turkish). There is a reported deficit in the Municipal Budget of over £T500,000.

The announcement that commencing July 1 duties of 95 and 27 piastres per 100 kilos will be imposed on imported flour and grain respectively, has resulted in propositions to resume milling operations at Constantinople. Flour stocks are sufficient for about one month. Bulgarian flour now on the market here is coarser than finer American flours but is very suitable for bread requirements. The imposition of duties has, therefore, been favourably received and large consignments are anticipated. Recent investigation of Anatolian conditions shows that the country is well stocked and cost of living there is cheap, although the absence of outlets for produce results in financial depression.

# NEAR EAST MARKETS.

## [LONDON PRODUCE REPORT.]

Sugar.—Home refined has been in good demand at official rates. West Indian crystallized is 1s. up at 45s. to 51s. 6d., and American granulated is up 3s. 3d. at 88s. 3d. Czecho Slovakian is eighteenpence up at 28s. 6d. Quotations are :—July, 16s. ; August, 16s. ; September, 16s. ; October, 15s. 3d. ; November, 15s. ; and December, 55s.

Oils.—Prices are firmer. Linseed oil has risen 3s. to 38s. 6d. Crude rape oil is 2s. up at 54s. ; refined rape oil is 12s. down at 48s. ; Egyptian crude is 1s. up at 38s. 6d., and deodorized is 2s. up at 55s. Turpentine has risen 35s. to 115s.

Dried Fruit. A quiet tone has prevailed in the market. There has been little doing in currants. Supplies of sultanas are very short, and prices are very firm. Persian dates are in strong demand, but prices are unchanged.

### EGYPTIAN CROPS.

The *Bulletin* of the Egyptian Ministry of Agriculture gives the following particulars of the crop conditions in June :—

Cotton.—Weather has been somewhat unsettled generally and the high winds prevailed at the end of the month, causing flower shedding in places. Heavy rains caused considerable damage in a few isolated small areas in Gharbiya and Daqahliya Provinces. Shortage of water has been felt specially at the tail ends of canals. Hoeing and watering are in progress. Cotton worm and wilt have been reported from several localities in Lower and Middle Egypt, but the damage done is negligible. Generally speaking the crop is backward.

Millet (Séfi).—Hoeing, thinning and watering are in progress. The growth of the crop is satisfactory.

Rice (Séfi).—Although the weather was somewhat changeable and water supply insufficient in some localities, germination has been satisfactory and the crop is in a healthy condition.

Sugar-cane.—Weather was on the whole favourable and water supply adequate. Hoeing, manuring and watering are in progress. The crop is growing satisfactorily.

Wheat.—Rains that fell during the month caused no serious damage to the crop. The bulk of the crop is harvested. The yield is slightly above the average.

Barley.—The yield is a good average one.

Bersim.—Grazing of the last cutting has come to an end. Harvesting of the crop for *taqawi* is in progress. The yield is a little below the average.

# CURRENT PRICES.

The prices below are less fractions.

*General Produce.*—Bacon, 194s. cwt.; butter, 215s. cwt.; cheese, 111s. cwt.; chillies, 135s. cwt.; eggs, 23s. 6d. per 120; cloves (Zanzibar), 10d. lb.; cocoa (Ceylon good to fine), 77s. 6d. cwt.; coffee (Costa Rica), 137s. 6d. cwt.; coffee (East India bold), 117s. 6d. cwt.; coffee (Mocha, longberry), 99s. cwt. ; coffee (Santos, superior), 58s. cwt. ; coffee (Nairobi), 100s. cwt. ; lard, 82s. 6d. cwt. ; ginger (washed Cochin), 38s., 9d. cwt. ; nutmegs (110's to 80's), 11d. lb. ; pepper (Singapore black), 4d. lb. ; pepper (Muntok white), 9d. lb. ; raisins (Valencia), 92s. 6d. cwt. ; raisins (Sultana Smyrna), 146s. cwt. ; currants (Vostizza), 86s. cwt. ; sugar (granulated), 57s. 1d. cwt. ; sugar (No. 1 cubes), 61s. 3d. cwt. ; sugar (white Mauritius), 53s. 3d. cwt. ; sugar (West Indian crystallised), 47s. cwt.; tapioca (fair Singapore), 2d. lb. ; sago (small pearl), 26s. 6d. cwt. ; sago flour 17s. cwt. ; rice (Rangoon No. 2), 18s. 10d. cwt. ; rice (bran Rangoon), £7 2s. 6d. ton ; cinnamon (firsts), 1s. 4d. lb. ; mace (fair Singapore), 1s. 1d. lb. ; tea (Indian common to good common), 6d. lb. ; tea (Ceylon common to good common), 8d. lb. ; tea (Java common to good common), 3d. lb. ; wheat (Australian, 81s. 2d. qr. ; wheat (English white), 95s. qr. ; wheat (la Plata), 84s. 6d. qr. ; barley (malting), 50s. qr. ; oats (English), 49s. Oats (La Plata) 28s. 9d qr. ; maize (La Plata), 41s. 3d. qr. ; flour, 64s. 6d. sack.

*Metals.*—Aluminium, £150 ton ; antimony (English regulus) £39 10s. ton ; bismuth, 7s. 6d. lb. ; copper (standard), £72 8s. 9d. ton ; copper (electro), £76 10s. ton ; gold bars, 110s. 6d. oz. ; iron (No. 3 Cleveland), 137s. 6d. ton ; hematite (mixed number), 161s. 3d. ton ; galvanised sheets (24g), £23 15s. ton ; lead (soft foreign), £23 11s. 3d. ton ; manganese Poti, 1s. 2d. unit; molybenite, 46s. 3d. unit ; nickel £190 ton ; platinum, 365s. oz. ; plumbago, £25 ton; quicksilver, £10 17s. 6d. bottle ; silver bars, 36d. oz. ; spelter (G.O.B.), £27 2s. 6d. ton ; tin (standard), £168 8s. 9d. ton ; wolfram, 11s. 7d. unit ; zinc sheets, £35 10s. ton ; tin plates (20 by 14), 26s. 3d. box.

*Chemicals.*—Acids : Boric, 71s. cwt. ; oxalic, 9d. lb. ; citric, 2s. 5d. lb. ; tartaric, 1s. 7d. lb. ; ammonia sulphate, £14 10s. ton ; arsenic (white powdered), £45 10s. ton ; benzole (standard), 2s. 7d. gallon ; bleaching powder (35 per cent.), £19 10s. ton ; borax crystals, 34s. 6d. cwt. ; cream of tartar, 139s. cwt. Potassium : Bi-chromate, 9d. lb. ; chlorate, 5d. lb. ; caustic, £37 10s. ton ; nitrate, £52 15s. ton ; permanganate, 1s. 7d. lb. ; prussiate yellow, 1s. 2d. lb. ; sulphate (90 per cent.), £21 ton; Sodium : crystals, £145s. ton ; bi-carbonate, £11 5s. ton ; bi-chromate, 6d. lb. ; alkali (58 per cent.), £9 2s. 6d. ton ; chlorate, 4d. lb. ; caustic (70 per cent.), £22 10s. ton ; hyposulphite £22 10s. ton ; prussiate, 7d. lb. ; nitrate, £18 10s. ton ; glycerine (industrial 1260 per cent.), £120 ; glycerine (crude 80 per cent.), £106 ; sulphate of copper, £30 10s. ton ; sulphate of iron, £145 ton ; lemon oil, 3s. 1d. lb. ; quinine, 4s. oz. ; red lead, £37 10s. ton ; white dry lead, £41 15s. ton ; white ground lead, £50 10s. ton.

*Hides and Skins.*—Ox and Heifer (first), 90 lbs. and up, 9½d lb. ; 80 to 89 lbs., 9¼d. lb. ; 70 to 79 lbs., 9¼d. lb. ; 60 to 69 lbs., 8½d. lb. ; 59 lbs. and under, 6½d. lb. ; (second), 90 lbs. and up, 7½d. lb. ; 80 to 89 lbs., 7½d. lb. ; 70 to 79 lbs., 7¾d. lb. ; 60 to 69 lbs., 7¾d. lb. ; 59 lbs. and under, 5½d. ; Cows (first), 60 lbs. and up, 6¼d. lb. ; 59 lbs. and under, 5¼d. lb. ; (second), 60 lbs. and up, 4½d. lb. ; 59 lbs. and under, 4⅜d. lb. ; Bulls (first) 4d. lb. ; bulls (second), 3⅛d. lb. Kips (first), 5¾d. lb. ; (second), 4¼ lb. ; (third), 3¼d. lb.

Calcutta Market.—Prices in rupees per 20 lb. :—Arsenic Hides (cows) ; Agras, 8 to 12 ; Durbhangas, 6.8 to 9 ; Patnas, 5.8 to 6.8. Salted cows : 4 to 7. Arsenic hides (buffalo), 3 to 8. Skins : Calf, 8 to 10 ; goat, 225 to 265 per 100 pieces.

*Miscellaneous.*—Cotton (American), 8.32d. lb. ; cotton (Egyptian), 14.55d. lb. ; linseed (La Plata), £19 2s. 6d. ton ; rape (Toria), £21 5s. ton ; soya beans, £13 5s. ton; palm kernels, £21 ton; Oils: Linseed, £35 5s. ; Olive (Levant), £82 10s. ton ; palm, £35 ton ; rape (crude), £52 10s. ton ; soya, £36 10s. ton ; petroleum, 1s. 9d. gallon ; ground nut, £42 10s. ton ; cotton (crude), £38 5s. ton ; shellac (T.N. second orange), 317s. 6d. cwt shellac (A.C. garnet), 302s. 6d. cwt. ; rosin (American). 20s cwt. ; turpentine (American), 75s. 6d. cwt. ; Rubber : Plantation (No. 1 crepe), 8d. lb. ; smoked sheet, 7d. lb. ; fine hard Para, 10d. lb.

### OIL OUTPUT.

British Burmah—Total production of crude oil by this company and Rangoon Oil Company amounted to 69,020 barrels for month of June.

It is reported that Messrs Guest Keen and Nettlefolds has secured a contract to supply 13,500 tons of steel rails for Indian railways at about £10 2s. 6d. per ton. The contract price is 15 per cent. below Belgian quotations and 3½ per cent. above German offers, and but for special considerations it is feared the contract would have been lost to this country.

# COMPANY MEETINGS.

## BANK OF BRITISH WEST AFRICA.

### A Strong Position.

The Twenty-Seventh Annual General Meeting of the Bank of British West Africa, Limited, was held on July 14, at the Cannon-street Hotel, the Right Hon. the Earl of Selborne, K.G., G.C.M.G. (the chairman), presiding.

The Chairman, in moving the adoption of the report and accounts, said that shareholders would notice from the accounts that 50 per cent. had been added to the paid-up capital, which now stood at £1,200,000 and that, by reason of the addition of premium received on the new shares issued, they had increased the reserve by rather over 50 per cent. to £625,000. There was a considerable decrease in the current deposit and other accounts which a year ago had reached a total of £11,800,000. Some large deposits at different offices had been withdrawn, presumably because the depositors had use for their money in their own businesses. On the assets side of the balance-sheet the position disclosed was extremely liquid, the percentage of cash to the bank liabilities to the public being 31.50, and, if the Treasury Bills were regarded as cash, the percentage was increased to 40. The falling off in business was also reflected in other bills of exchange, which had decreased by £2,000,000, and by the reduction in the loans and advances by £1,250,000. Premises and furniture account showed an increase of nearly £100,000. The directors believed that the premises were worth to-day more than the amount at which they stood in the books.

**Profit and Loss Account.**

With regard to the profit and loss account, while the net profit was higher than it was a year ago, it was less in proportion to the increased capital, but it was only fair to say that they had not had the increased capital available for their purposes for the whole year. They proposed to charge to the profits the whole of the stamp duty of £20,000 paid in respect of the new capital, and to apply £15,000 as they did a year ago, to the depreciation of premises and furniture, and £5,000 to the insurance fund. In view of the trade conditions universally prevalent the shareholders would not be surprised to find that the directors had decided to recommend a dividend of only 8 per cent. for the year, as against 10 per cent. last year. Out of 26 dividends declared during the history of the bank, no less than 16 had been at the rate of 8 per cent., so that they were not asking the shareholders on this occasion to accept a dividend which was unusually small. Nevertheless it was a disappointment that there should be any reduction; and were it not that immediate prospects were so uncertain they might have paid something more. The comparatively large sum of £19,000 had been added to the carry forward, bringing that item up to £50,180.

**Difficult Trade Conditions.**

The trade conditions experienced during the greater part of the year under review had more than justified the note of warning he ventured to sound a year ago. Prices of commodities fell with extraordinary rapidity and to an unexpected extent. Under such circumstances no bank could, by the exercise of any forethought, have avoided the granting of some accommodation to its customers which, as matters had turned out, it would have been better not to have granted. The problem facing the West African Governments in regard to their revenues was not one which he was called upon to attempt to solve, but he ventured to hope that the programme of public works would be pressed forward with just so much or so little postponement as was actually dictated by insistent circumstances. So far as revenue was concerned, no one liked the principle of export duties on the products of West Africa, more especially if these exceeded the similar duties imposed by their neighbours in West Africa, but it would not be possible, without more knowledge than he possesseds to offer any practical suggestions as to new alternative source of revenue. In this connection it was announced that a representative committee was about to be appointed by the Colonial Office to consider various questions connected with the economic situation of the West African Colonies, and, under the chairmanship of Sir Hugh Clifford, that committee might be depended upon to examine very carefully the effect upon trade of existing duties. What they all desired was that the West African native should be encouraged to produce and send to market an ever-increasing quantity of raw material.

**Effect of Depression.**

West Africa had experienced all the severity of the slump both in produce and in goods imported—the African could not obtain the cost price of the former, and could not pay the cost price of the goods he wished to purchase. The result was that little business was being done, and heavy losses must be faced by those who decided, and, in his judgment, wisely decided, to cut their loss and take what they could get for their commodities Some of their smaller customers were unfortunately placed, but where loss to the bank was anticipated, or realised, provision had been made, and they believed that the worst had been passed. In Egypt the story was very much the same, a suspension of purchasing power affecting exports and imports alike. In Morocco the position had not been so bad, although business there was very much reduced for the time being.

**The Outlook.**

He was not going to attempt to prophesy as to the future Many factors had to be reckoned with, including not only the inevitable depression following the artificial prosperity which succeeded any war, but the slow restarting of the international machinery of credit and transport, which the late war so thoroughly broke up. We had yet to see real peace established throughout Europe, and at home a better understanding between classes, whose real permanent interests were identical and not separate. When these objects were attained, we should see international trade once more established upon sound lines. But while the clouds were still dark, he would counsel hope. Our country had weathered previous storms, which must have appeared as bad to our forefathers as the present times appeared to us; but we should only bring our country through these very critical times by national unity, by very hard work, by drastic retrenchment, and by restoring pease and commerce among all nations.

## BANQUE MARMOROSCH BLANK & CIE.

### Notable Expansion.

The report of Banque Marmorosch Blank et Cie. read at the ordinary general meeting held at Bucharest on April 21, states:—

The year 1920 plays a similar role in the history of humanity to that of 1915, but in the reverse sense. In 1915 it was necessary to create everything to continue a war that had not been foreseen during the past year it was necessary to envisage everything anew for the resumption of the activities of peace. For six years the organising of military victory was at stake; now economic victory is the first consideration. To achieve that one had, and still has, to make very great sacrifices. On that account the year that has just passed has been one of the most difficult that the world and especially Europe, weakened by so many wounds, has experienced.

Digitized by Google

After the sufferings of a colossal war the energy of nations was a little reduced in 1919, but was renewed with vigour, in 1920 in face of the new efforts called for. In 1920 the period of progressive recuperation began in certain countries, such as England, Belgium, France, and Germany, in the form of a fall in the prices of raw materials and manufactures, as well as by the resumption of production, the reorganisation of transport, and the reduction of freights. In the East of Europe these improvements are still to come; but in this region also valuable indications have appeared which will not escape the watchful observer. The work of reconstruction is going on slowly everywhere; in our country more than anywhere else.

Roumania, so greatly enlarged in territory, so much increased in population and richer in glory, has had to adapt itself since the war to administrative, judicial, and economic necessities altogether unsuspected, and has had to face that state of things with an inadequate material human and technical. It is in these conditions that she has been forced to seek without hesitation and without delay the remedies for the unfortunate issue of a formidable military effort. To the great astonishment of its enemies our country has begun to be victorious in this field also. The arable soil of the new Roumania is almost entirely cultivated to-day, thanks to the distribution of lands to the peasants—a powerful dam against disorders of all kinds; the spirit of work in the industries existing or in course of being created is equally strong and enterprising, as well among the workers as among the masters; the means of communication improve daily and the hopes of a definite restoration are passing more and more from the realm of the prospective to that of reality. All this vast economic renaissance is completed by the financial projects destined to reorganise our taxes and to secure the ordinary and extraordinary expenditure of our Budget, indispensable to our economic reconstruction.

**Foreign Capital Welcomed.**

It is under these auspices that greater Roumania, a Roumania new and powerful, enters upon the period of the consolidation of the peace. It is prepared to accept helpful assistance from any quarter provided that it is offered to us with good intentions —that it will procure for our country the means of realising its natural riches, that it will help us in this national work in exchange for pecuniary remuneration (but exclusively pecuniary), is what our bank has demanded and will demand of foreign capital. These conditions satisfied we shall accept with eagerness economic and financial assistance from abroad, for we believe that it is in that way alone that we shall be able most quickly and most usefully to serve our country, and that we shall facilitate its role as a factor of civilisation—independent and decisive —in this part of Europe.

During the year which has ended—the seventy-third of this institution—your bank has regarded it as its duty to devote very special attention to the new territories, an attention which is evidenced either by the establishment of branches or by the nationalisation of several economic enterprises. It is on the one hand for the carrying out of this task and on the other to re-establish the proportion between our own resources and the deposits which are constantly increasing that we increased our capital from 75,000,000 to 126,000,000 lei. Although we have contributed in a substantial measure to satisfying the numerous requirements arising out of the reconstruction of the country we have nevertheless maintained the fundamental principle of the mobility of our assets, as the balance sheet closed at December 31, 1920, shows very clearly. Our old branches have operated during the past year to our complete satisfaction. The Paris branch closed its balance sheet with a satisfactory result. We have besides established branches at Arad, Brashov, Cluj, Oradea Mare, and Tirgul Muresh. These branches have already commenced their operations. We have also deemed it necessary to establish a branch at New York on account of the large number of our compatriots who are in the United States. In addition to the branch which exists already at Constantinople we have established an agency in the Stamboul district. Thus the number of branches is 24, of which three are in Bucharest. In the principal centres of Ardeal and the Banat where we have not established branches the Bank has applied the principle of collaboration, associating itself with the chief local institutions. Thus at Timishoara we have participated in the increase of the capital of the most important financial institution of the Banat, the "Banque de Timishoara et Société Commerciale par actions." Your bank is represented on the board of directors of that institution, the capital of which is 12,5000,000 lei, and the reserves 23,000,000 lei. For the past year the Banque de Timishoara paid a dividend of 12 per cent. At Satu-Mare we have taken part in the increase of the capital of the local bank "Casa Noastra," established at the commencement of the past year with a capital of 1,000000 lei. Thanks to our participation this institution soon after its foundation increased its capital to 5,000,000 lei, and at the end of one year it has a reserve of 1,300,000 lei, after having paid a dividend of 10 per cent. Your bank has its representatives on the board of directors of this bank. At Baia Mare we have in the same way contributed to the increase of the capital of the local bank "Casa Romana," the balance sheet of which has not yet been published. At Salonika the "Banque de Commerce et de Dépots S.A. Bucarest-Salonique," established with our participation in 1906, and having a branch at Kavalla, has obtained a satisfactory result also in the course of the past year. In union with several Roumanian and foreign banks we have contributed to the increase of the capital of the Banque de Credit Roumain.

The financial institutions in which we have permanent interests have achieved satisfactory results. Most of them have increased their capital during the past year, your bank having participated in these increases. The Banque du Commerce of Craiova increased its capital in 1920 from 30,000,000 to 60,000,000 lei. Its reserves stand to-day at 64,970,000 lei, and it paid a dividend of 14 per cent. for the past year. The Banque Moldova of Iassy, in which we are substantially interested, during last year increased its capital by 10,000,000 lei, bringing it up to 15,000,000 lei. Its reserve funds total 14,300,000 lei. The bank has paid a dividend of 15 per cent. The Banque Centrale de Ploesti, in which your bank has also a controlling interest, has increased its capital to 5,000,000 lei. Its reserves are 2,500,000 lei, and the dividend for 1920 is 10 per cent.

The industrial undertakings in which your bank participates have been successful for the most part in maintaining their production and in giving likewise satisfactory results despite the difficulties that confront them in obtaining raw materials, and in disposing of their products as a result of the transport situation.

**The Balance Sheet.**

In conformity with our custom we have proceeded in the balance sheet which we submit to you on as conservative a valuation as possible of your company. We have deducted for the amortization of doubtful credits for 1920 a sum of nearly 8,000,000 lei; of the credits classed as doubtful in the past we have received in the course of the past year more than 1,000,000 lei.

During the past year the cash turnover reached the total of 18,335,814,580 lei. We think it worth while mentioning that that amount represents the carrying out of the payments and the collections which have numbered 158,800 in 1920, but the total does not include all the cash transactions necessitated by the subscriptions to the various public and private issues made to our branches.

**Current Account Transactions.**

To bring into better relief the remarkable development of these transactions during the past year we mention that the total number of current accounts stands at December 31, 1920, at the considerable total of 10,955, a total in which the deposit accounts are not included.

It is natural that in the presence of such a development of the activities of your bank, the staff has been unable, despite its willingness, despite its devotion to our institution, completely to satisfy the demands created by such rapid progress. We have then had to provide for this insufficiency by increasing the number of the staff. Another striking proof of the intense activity of our offices is the number of letters which go out daily from our head office in Bucharest. The total of our operations is reflected in the figures of the gross turnover, which in the course of the past year has increased by 65 milliards, passing by 27 milliards the corresponding figures for 1919 at 92 milliards

After having given to you the preceding explanations we have the honour to submit to you the general balance sheet closed on December 31, 1920, which balances with a net profit of 51,567,572.98 lei. In conformity with the statutes we are proposing the following division of the profit:—5 per cent to the legal reserve 2,578,378.64 lei, a first dividend on the capital —5 per cent on 75,000,000 lei, 3, 750,000 lei, 2½ per cent on 50,000,000 lei, 1, 250,000 lei—5,000,000 lei, 43,989.194.34, 10 per cent of same to the board of directors, 4,398,919.44 lei, a second dividend on the capital—15 per cent. on 75,000,000 lei, 11,250,000 lei, 7½ per cent. on 50,000,000 lei, 3,750,000 lei—15,000,000 lei, remuneration of the auditors 250,000 lei, "fonds de retraites 'Maurice Blank,'" 3,000,000 lei, extraordinary reserve 9,421,621,3 , leaving 11,918,653.54lei, brought forward from the previous year 2,687,388,388.236 lei, total 14,606,041,77 lei to carry forward to the account of 1921.

The general meeting approved the balance sheet and the profit and loss account closed at December 31, 1920, decided on the payment of a dividend of 20 per cent. for 1920, ratified the appointment as directors of M.M. André Homberg, Al. Vaida Voivod, and Richard Soepkez, re-elected as directors M.M. C. Banu, Aristide Blank, I Boamba, Gr. Junian, Théodore Laurent, and M. Seulesco, and re-elected as auditors for 1920 M.M. Petre Athanasovici, Gr. P. Carp, Gh, G. Duca, G. Kapri, and I Pillat

## LAKE COPAIS COMPANY.

The net profit for 1920 in Greece was £23,535. After adding London revenue and providing for London expenses, interest to January 31, 1920, on balance of prior lien bonds redeemed at that date, loss on sale of investments, income and interest on "A" debenture stock, which is now cumulative, and transferring £1,500 to reserve, there remains £9,942 to be carried to "B" debenture interest account. Out of the balance standing to credit of "A" and "B" debentures, it is proposed to distribute interest at 4 per cent. less tax, on both stocks in respect of 1920, leaving balances of £162 and £565 respectively. In view of the requirements for flood prevention and other development works and the heavy depreciation of the drachma, it is considered imperative to conserve cash resources, and separate meetings of holders of "A" and "B" stocks have been convened to consider a resolution to approve the transfer to capital reserve to the balance of £18,317 standing to credit of profit suspense account together with any surplus profits earned in 1921 and 1922, after payment of interest due on the "A" and "B" debenture stocks in respect of those years, and to waive any claim they may have that part of such profits be applied in redemption of "A" stock.

## INDIAN COTTON MILLS.

In the House of Commons on July 12, Mr. Waddington asked the Secretary for India whether he was aware of the dividends paid by Indian cotton mills, as exampled by Sholapore Company, 1,000 per cent. per annum; Lakshmi Company and Maneckji Company, each 500 per cent.; Kohinoor Company, 375 per cent.; Morarjee Goculdas Company and Swadeshi Company, each 350 per cent.; Madras United, 300 per cent., and many others from 100 per cent. to 300 per cent.; whether, as these dividends were declared shortly before the Indian Budget was introduced, the Indian Government considered these large profits when framing schemes to raise revenue and, if so, what additional taxes, had been imposed upon and what additional revenue was expected from cotton mills companies; and, if such revenue was not in fair proportion to the increases in import duties, would he represent to the Indian Government the need of reconsidering the import duties on cotton goods in view of such large sources of internal revenue being available.

Mr. Montagu: I am aware that Indian cotton mills have recently paid large dividends, but the figures given by my hon. friend appear to be greatly in excess of those published in the Press. The only additional tax specifically imposed on cotton mill companies in connection with the recent Indian Budget lay in the withdrawal of the concession under which machinery and stores imported for use in a cotton-spinning or weaving mill were admitted free of duty.

## ON 'CHANGE.

*(From our own Correspondent).*

London, Monday.

While except in a few directions there has not been any great activity during the past weeks, signs have not been wanting that something approaching a general revival of interest on the part of investors may be approaching. For the first time for very many months conditions as a whole are not adverse, and if nothing happens to postpone the approaching trade boom it should not be long before a considerably better level of values is seen in many directions.

There has been a good deal of selling of gilt-edged descriptions during the week, and quotations have in consequence ruled somewhat irregularly. War Loan Fives are 87 11-16. Fundings close at 70 3-8, while Consols are 47 3-4, the same as last week.

The Industrial group has generally been firm, and while investors are not interesting themselves as yet to any great extent prices here in general show an upward tendency. There has been some small inquiry for shipping shares. There has been no pronounced movement in the oil market. Scottish Americans have been a very dull spot, but Anglo-Egyptian following the hopeful review of the position at the meeting have improved somewhat. Rubbers have had a better week than for some time past, and rises are to be recorded in some of the floriners in particular.

In Near Eastern securities Egyptian Guaranteed 3 per cent. are unchanged at 68 as are Greek Guaranteed 2 1-2 per cent., 1898 at 66. Turkish Guaranteed 4 per cent. 1855 are 5-8 up at 70 5-8.

In Greek shares the 5 per cent. 1881 loan is unchanged at 42xd., while the 5 per cent. 1884 loan is also 42xd. The 5 per cent. 1890 is the same at 40, while Fundings are also unchanged at 40. The 4 per cent. 1910 loan is 29, while the 4 per cent. 1902 Loan is 32xd. The 5 per cent. 1914 Loan is 38.

In Land shares Beheras have risen 1-8 to 8 1-2, but the Preference shares at 3 are unchanged. Anglo-Egyptian Land Allotments are the same at 3, as also the Egyptian Consolidated Lands at 1s. Egyptian Delta Lands at 8s. 3d. have gained 1s. 3d., while Gharbieh Lands at 1 3-16 are unchanged. New Egyptians are 1s. 3d. up at 21s. 6d.xd. but Union Foncieres at 2 1-16 have lost 1-16. Sudan Plantations are unaltered at 2 15-16.

In Banks, Agricultural 3 1-2 per cent. Bonds are 1-8 up at 52, while Agricultural 3 1-2 per cent. Guaranteed Bonds have gained a like amount at 54. Imperial Ottoman Banks are unchanged at 7 3-4 while National Bank of Egypts are 1-16 up at 17 9-16.

In Oils Anglo-Egyptian are 1 17-32, Phoenix are 11s., and Roumanian Consolidated 11s. 9d. Steana Romana are 14s. 6d., and Burmahs are 6 9-16.

In Miscellaneous descriptions Abyssinian Corporations are 2s., Alexandria Waters are 6 1-2, while Morums are 10s., Egyptian Markets 19s., and Egyptian Salt and Soda 29s. 6d.

### Economic Board for Palestine.

The Economic Board for Palestine has been registered as a company limited by guarantee, without share capital. The objects are to assist in the development of Palestine (in accordance with the provisions of the Palestine Mandate, or otherwise), the establishment of a Jewish National Home, and the development of the interests of the Jewish population in Palestine, in co-operation with the Zionist Organisation, or any other appropriate, Jewish agency recognised, or to be recognised, under the said Mandate.

The signatories to the memorandum of association are:—Sir Alfred Mond (Minister of Health). Sir R. Waley Cohen (director Shell Transport and Trading Co., Ltd.). A. I. Belisha, 63, Old Broad-street, E.C., stockbroker. W. H. Samuel (chairman Shell Transport and Trading Co.). J. A. de Rothschild, 34, Park-street, W. W. S. Cohen, Berkhamsted, Herts, barrister. H. Hirst (chairman General Electric Co.).

No persons had consented to act on the executive committee to July 5. The presidents of the Zionist Organisation and Jewish Colonisation Association respectively shall each have the right to nominate two persons on the said committee. Solicitors, Herbert Oppenheimer, Nathan and Vandyk, Parr's Bank-buildings, 1, Finsbury-square, E.C.

## ALEXANDRIA EXCHANGE.

*Supplied by G. L. Mortera, Alexandria and Cairo.*

Prices on July 1 were as follows:—Agricultural Bank of Egypt, £3 31-32; Alexandria Water Co., Ltd., £6 3-16 ex.; Anglo-American Nile Steam, £2½; Associated Cotton Ginners, 23-32; Banque d'Orient, Fr. 56; Behera Ord., £E9½; Brasseries d'Egypte, Fr. 70; Building Lands of Egypt, £⅛; Cassi di Sconto Priv. Fr. 102 ex.; Ciments d'Egypte Priv., Fr. 35; Ciments d'Egypte Div., Fr. 23; Comptoir Fin. et Com. d'Egypte, £¾; Consolidated Land, Pt. 4; Credit Foncier Fondateur, Fr. 780 ex.; Credit Foncier Egyptien, Fr. 591; Credit Foncier 1885 Oblig., Fr. 591; Credit Foncier 1903 Oblig., Fr. 222, Credit Foncier 1911 Oblig., Fr. 222½, Crown Brewery Priv., Fr. 162; Crown Brewery Div., Fr. 130; Eaux du Caire Capital, Fr. 45; Eaux du Caire, Jouissance, Fr. 100, Egypt and Levant, S.S. Ord., 26s. 9d.; Egyptian Delta Light Railways, £4 11-16; Filature Nationale d'Egypte, £9 1-16; Gabbari Lands, £5-16; Immeubles d'Egypte Soc. an des., £5; Khedivial Mail S.S. Co. Ord., 110s.; Khedivial Mail S.S. Co., Pref., £2 9-16; Kom Ombo Ste. Ane de Wadi, £4 3-32; Kom Ombo Ste. Fondateur, £33 9-16½; Land Bank of Egypt, Parts de Fond, £35; Lots Turc, Fr. 42; Menzaleh Canal Navigation, Pt. 270 ex.; Nungovich Hotels, £6; Ramleh Railway, £1 15-16 Salt and Soda, 27 Tram. d'Alexandrie Priv., Fr. 42; Tram. d'Alexandrié Div. Fr. 60; Union Fonciere d'Egypte, £1 29-32 ex; Egypt Hotels, £1 63-64; Urbaines et Rurales, £2 27-32.

# COTTON & COTTON GOODS.

## COTTON SPINNERS DIVIDENDS.

Many Lancashire cotton spinning companies take stock at the end of June, and Mr' Frederick W. Tattersall of Manchester has prepared a summary of the announcements of 100 leading firms.

Out of 76 mills which have a total paid-up ordinary share capital of £7,696,450, the results of which cover the period of three months ended June 30, 48 have not been able to make a distribution to shareholders, one has declared a dividend of 5 per cent, one 11 per cent, two 12½ per cent, two 13 per cent, one 15 per cent, six 20 per cent, and one 24 per cent per annum, which works out at an average per company of 4.82 per cent per annum. For the previous quarter the same concerns paid an average dividend of 7.13 per cent. per annum, and for the three months ended December 31 last, 19.49 per cent. per annum.

The figures for the remaining 24 mills are for the first six months of this year. Nine firms have been able to make a return to shareholders, three have paid 5 per cent., eight 10 per cent., one 13-1-3 per cent, two 20 per cent., and one 25 per cent. per annum. The average per company is 7.2 per cent. per annum, which compares with 22.46 per cent. per annum for the last six months of 1920. The ordinary share capital of these 24 companies is £2,454,000.

An analysis of the trading of the 100 companies for the first half of the year 1921 shows that the average dividend per company is 6.28. per cent. per annum as against 22.52 per cent. per annum for the same concerns for the six months ended December 31, 1920.

## LIVERPOOL COTTON.

Messrs. Reynolds and Gibson report as follows for the week ended July 14:—The improvement which was noticed in our last report has been steadily maintained. The enquiry continues to broaden, in a quiet way, and during the past week has become rather more general in character, although Sakellaridis, as usual, still claims the most attention. Business in Manchester continues "steady to good," but there is a tendency at the moment to cry "halt," owing to a recent stiffening. The same effect of rates is noticed here on the spot, and when holders, in sympathy with an advancing future market, raise their limits, the only result is that the buyer looks elsewhere for his cotton. The spinner who learned his lesson last year, refuses to be "rushed," and this is a point which ought to be thoroughly appreciated. Although official quotations here have again been raised, there is no lack of sellers at anything from 1d. to 1½d. below them. In fact, it it no exaggeration to say that, generally speaking, Egyptian cotton is pressed for sale all round the market at the moment. A fair c.i.f. business continues to be transacted, and the Continent has again received its quota. At the commencement of the week a feature was the sale of 350 bales of (Extra) Sudan Sakellaridis, in one lot, at a price in the neighbourhood of 19.50d. Total sales, 1,600 bales, which includes 100 bales Sudan. Quotations are raised ½d. per lb. Fully good fair Sakellaridis 16.50d.

## CZECHOSLOVAK COAL INDUSTRY.

The Czechoslovak coal industry for the first quarter of 1921 shows satisfactory progress as regards the regularity of output and the results of the miners' work, there having been no serious interruptions through strikes or accidents. The certainty of finding a market for the coal made it possible to employ the shifts to their fullest capacity. As compared with the fourth quarter of 1920, the number of mining concerns increased by eight, two of them producing pit-coal, and six lignite, so that coal mining was carried on in 403 concerns. There were 77,392 workmen engaged upon the production of pit-coal, this being 1240 more than in the fourth quarter of 1920, and 54,235 workmen were engaged upon the production of lignite, this number being more than 749 in the fourth quarter of 1920.

The amount of pit-coal produced was 30,636,056 quintals; the amount of lignite was 54,348,851 quintals, these quantities representing increases of 8.89 per cent. and 8.38 per cent. respectively as compared with the fourth quarter of 1920. The amount of coke produced from pit-coal was 3,974,324 quintals, representing an increase of 5.86 per cent., while the amount of briquettes produced fron pit-coal was 192,862 quintals, representing an increase of 21.46 per cent. The amount of coke and briquettes produced from lignite was 6,173 quintals and 442,630 quintals respectively. The amount of pit-coal and lignite used for working the mines and for distribution among the employees was 10 per cent of the total output, this being 2.65 per cent less than in the fourth quarter of 1920. The average weekly work of a miner oeeupied 5.6 days, this representing an increase of .73 days for pit-coal and .18 days for lignite, as compared with the the fourth quarter of 1920. The capacity of output per workman per shift increased per shift as compared with the same period by .17 quintals to 5.73 quintals for pit-coal, and by 1.1 quintals to 5.73 quintals for lignite. The above figures are a clear indication that the conditions of coal production in Czechoslovakia are becoming more and more stable.

During the first quarter of 1921, 315,139 quintals of pit-coal and 309,780 quintals of coke were imported from Germany to Czechoslovakia. the exports from Czechoslovakia comprised 2,228,420 quintals of pit-coal, 1,114,150 quintals of coke 10,017,450 quintals oflignite and 186,390 quintals lignite briquettes, the greater part being exportef to Germany and Austria.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated July 11, :—On July 8 monsoon vigorous in Peninsula and Central parts of country. On July 10 Monsoon weak in Peninsula but active in Central Provinces, and North-East India. Bombay cotton market dull, as nervousness regarding rain lessened. Fine M.G. Oomra, July Rs. 315, September Rs. 329. Bombay imported piece-goods market dull. Preliminary jute forecast for 1921-22 shows considerable decrease in acreage, of which total for Bengal, Bihar and Orissa and Assam is 1,456,615 acres as against 2,501,636 acres last year. Jute prices which had been Rs. 78 on July 6 were Rs. 72 on July 8 morning and rose to Rs. 80 towards the close of the day, after announcement of the forecast. Hessians steady to firm. Forward positions being brought by Bazaar at higher rates. Mills have again definitely agreed to four days short time working. Heavy goods quiet but steady.

Government of India have suspended issue of further licenses for exports of rice from Burma to countries other than India with no intention of cancelling licenses already issued. Government of India understand that there still remain in Burma 300,000 tons of rice licensed for export but not yet shipped. At tea sale on July 5 few Assams offered were good. Dooars and Terais not so good at this sale. Very few Darjeelings offered. Prices for fannings and broken orange Pekoes steady, but lower for plain liquoring kinds. Well-made black leaf Pekoes and orange Pekoes from Cachar and Sylhet sold well. Commonest kinds slightly dearer. Dusts weak. 28,074 packages sold to date at an average price of 8 annas 6 pies per lb.

No change in bank rates.

---

The reports of the Egyptian bonded warehouses for June, says Reuter, shows the following movement of Manchester cotton gooss during the month (in bales and or cases): Entries 985: deliveries, 1,233; stocke on June 30, 8,956, against 9,531 a year ago.

The directors of the Calcutta Electric Supply Company have decided to offer to existing shareholders the right to subscribe at par for five new ordinary shares in respect of eaoh 11 held. This will mean the issue of 250,000 fresh shares. They will not rank for the interim dividend, but will participate fully in the final distribution.

The Imperial Bank of India announces profit for period Jan. 27 to June 30 of Rs. 58,14,792; dividend at rate of 16 per cent. per annum, free of tax; to reserve fund Rs. 10,000,000; pension funds Rs. 5,00,000; carried forward Rs. 10,14,136.

## NOTES OF THE WEEK.

### *The Greek Success.*

With the capture of Eskishehir the Greeks have achieved a notable success, and have entirely vindicated their military reputation. This time the offensive has progressed according to plan; not only have the General Staff made their dispositions well, but their Intelligence has also been proved correct. The defeat of the Turks up to the point reached has been complete; large captures both of men and guns have been made, and the retreat east of Eskishehir is reported to have been effected in considerable disorder. There will be a natural desire on the part of the Greeks to continue the pursuit as far as Angora; the more so, if the statements regarding the demoralised condition of the Nationalist army and the confusion prevailing at Angora are confirmed. The military situation, however, is not the only concern of the Greek Government, and it is to be hoped that it will not in this matter allow popular enthusiasm to override its better judgment.

### *The Goal in View.*

The defeat of the Nationalists is not a goal in itself; at best it can but be a step towards the end that all have in view, the settlement of the Near Eastern question. In Greece it is held that the elimination of the Nationalist movement following a *débâcle* in the field will leave the ground clear for the ratification and enforcement of the Treaty of Sèvres, and no doubt the Greek Government will shortly claim to have saved the Allies from themselves in connection with their handling of the Turks. In many quarters, however, it will be feared that this is altogether too rosy a view. The Turkish Nationalists may accept defeat—it is too early to tell whether they will do this or, withdrawing into the Anatolian highlands, will continue the campaign in a way that would seriously embarrass the Greeks—but even so they can be relied upon, with or without Bolshevist intrigue, to render the administration of Asia Minor impossible and to prove a source of chronic unrest in the neighbouring countries. The Allies have no interest in merely staving off trouble for a season, although the temptation to regard as sufficient for the day the evil thereof seems to be strong. It will be remembered, moreover, that the the French Government has formally declared its intention not to ratify the Treaty of Sèvres as it stands. We are thus brought back to a situation on all fours with that which has existed ever since the last meeting of the Allied Conference in London, with the added complication that, after their military successes, the Greeks will find it still harder to forgo the advantages offered them by the Treaty of Sèvres.

### *Greece and the Allies.*

The best that could happen would be that the Greeks having established their military superiority, should abandon the campaign and seek, at the hands of the Allies, compensation in other directions than the subordination of Turks under Greek jurisdiction. The worst that could happen would be that the Allies should maintain their cynical attitude and trust to the Greeks overreaching themselves in Asia Minor, in order that both combatants may be exhausted when the Allies decide to impose their views upon them. There are many ways in which Greece can recoup herself for her military efforts, most of them more advantageous in the long run to the Hellenic people than territorial gains at the expense of those who must always prove restless neighbours, if they are smarting under a grievance for which they can hold Greece responsible. Unfortunately the long view is not popular in the Near East; the different peoples are too prone to live in the present only, believing quite sincerely that what has been must always be and reluctant to admit the possibility of their traditional enemies achieving either political or moral pagress.

### *A 'Communist' Crime.*

Following close upon the dastardly attempt upon the life of the Prince Regent of Yugoslavia, comes news of another outrage of the same kind, and again the work of Communists in Yugoslavia. But unfortunately this time the attempt has been successful, and M. Drashkokovitch, the Minister of the Interior, has fallen a victim to an assassin's bullet. The Triune Kingdom appears to have been suffering from a perfect plague of Communists; and though the authorities have been, and

Digitized by Google

are, grappling resolutely with the evil, and though they have made great hauls of undesirables, it is evident that heavy work still lies before them. The letter which we publish this week from our Zagreb Correspondent gives further particulars of the Communists' activities; and it will be remembered that only last April M. Drashkovitch himself, in a lengthy speech in the Belgrade Parliament, shed a flood of light upon the activities of these apostles of Bolshevism at its worst. In all probability it was that speech which cost him his life and lost Yugoslavia the services of a courageous and capable statesman.

### *Its Futility.*

The Communists were alarmed to find that so much concerning themselves and their hopes was known to the authorities, and being alarmed, determined, coward like, to stab in the back the man who had openly declared war upon them. In May one of their agents attempted to shoot M. Drashkovitch, who showed great coolness and courage, and, unarmed as he was, gave chase to his assailant. The attempt failed, but it has been renewed, this time by a Bosnian, and with success. It would seem that the motive for the crime can only have been revenge, and not the wish to prevent M. Drashkovitch from taking further action against the Communists; for, owing to ill-health, he had been anxious for some time past to resign from office and his resignation had actually been accepted, although it had not yet taken effect. The crime will have aroused both horror and indignation throughout the civilized world.

### *Italy and Great Britain.*

It is understood that negotiations are now in progress between Italy and Great Britain with a view to co-operation in the Near East. Such co-operation had good results in the past, and it is not to be doubted that it will have even better results in the future if it can be secured. Nor should it be very difficult to secure it. Whatever might have been said about it not very long ago, Italian foreign policy is now intensely practical; and in the main Italy's interests and Great Britain's certainly seem to lie in the same direction. The thing to be desired is that they should think of these interests rather than listen to intriguing third parties who, for reasons of their own, prefer to see the existing state of confusion continue rather than an attempt to get back to more settled conditions along lines on which alone it becomes clearer day by day, any real settlement can be reached. If only Mr. Lloyd George could be persuaded to leave the conditions of foreign affairs in the hands of the Foreign Secretary, and the Foreign Office, we might expect to see not only a really cordial understanding between ourselves and our Allies, but also a rapid improvement in the situation in the Near East. As it is, our policy, in that region at least, is neither satisfactory nor British—let alone 'Great British.'

### *Strikes in India—*

The report of the Committee on industrial unrest in Bengal has an interest for the whole country, for though the investigation was confined to a single province, the manifestations of unrest have been so uniform in their nature that we may fairly accept Bengal as a sample of the whole of India in this particular matter. The committee examined the facts of 137 disputes occurring in a period of nine months, and they reached the conclusion that, while economic causes probably predominated, the actual strikes were due as much to a spirit of general unrest as to the specific causes alleged in individual causes. To put the matter more plainly, wages lagged, as they are apt to do, behind rising prices, at a time when people were spoiling for a fight; poverty joined forces with ignorance and passion, and the result was an enormous amount of unnecessary waste. India is far too poor to be able to afford waste on such a scale, and the chief interest of the committee's report lies in the suggestions offered for the prevention of similar losses in the future.

### *and their Remedy.*

The line taken by the committee is substantially that which has been urged in these columns, the organisation of machinery for conciliation between employers and their workmen in advance of the formation of trades unions, and not three or four generations behind them, as happened so unfortunately in this country. The members of the committee see no room at present for any measures of compulsion, and they urge the gradual establishment of "Works Committees" on the now well-known Whitley lines, to enable masters and men to understand and appreciate each other's point of view. It is sometimes said that Indian workmen are too ignorant to take part in such discussions with advantage, but here we have a competent body declaring that no such practical difficulties exist, and, even though we may regard that view as somewhat sanguine, we hold strongly that a such *a priori* objections should not be allowed to block the way. The question can be settled only by experiment, and what is wanted now is the formation of a sufficient number of Works Committee not merely in Bengal but in every industrial centre in India, to give the system a fair and thorough trial.

### *The Oudh Agrarian Question.*

The latest news from India shows that substantial progress has been made towards framing the new tenancy measure required for Oudh, where, as our readers will remember, the long-standing dissatisfaction of the peasantry recently developed into serious outbreaks of disorder. It is now reported that the main lines of the proposed measure have been accepted by representatives of the great landholders, without whose support no system, however perfect in theory, could be expected to succeed in practice; opposition is already hinted by some self-chosen advocates of the peasant's case, but the peasants themselves have not yet spoken, and until the text of the Bill is published, it is impossible to form an opinion regarding the adequacy of its provisions. Apart from the importance of securing the foundations of a lasting peace, the proceedings in the Council will have exceptional interest as furnishing a crucial list of statesmanship. There may be a bitter fight between the land and the law, the two largest elements in the Council, leading perhaps to the formation of definite parties for the future, but it will be much more satisfactory if a compromise fair to all interests can be reached. A party-system is probably inevitable, but we should like to see the Oudh question settled before it develops.

# THE WEEK AT HOME.

LONDON, Monday Evening.

**Towards Peace in Ireland.**

After a week of secret negotiations, Mr. de Valera has returned to Ireland with the terms of peace which the British Government has offered in his pocket. He will discuss them with the Sein Fein leaders in Dublin, and they will probably be debated by the Sein Fein Assembly; unless they are definitely rejected—which seems unlikely—he will return to London to negotiate further with the Prime Minister.

The truce has been well kept in Ireland during the week, and the general feeling of relief at the prospect of peace is bound to exercise its influence on the deliberations of Sinn Fein, since a resumption of guerilla warfare would be intensely unpopular. In England the scanty details of the negotiations which have been published are being followed with great interest, and generally in a very hopeful mood ; only the *Morning Post* still continues its incendiary campaign, and accuses Mr. Lloyd George of "shaking hands with murder"—a revival of the *Daily Mail* catchword at the time of the negotiations with Bolshevist Russia. But the *Morning Post* has no plan to propose except coercion and force, and it speaks definitely for a minority. A certain number of extreme Unionists agree with it, but only two members of Parliament have revolted from the Coalition in consequence of the discussion.

**The Plan in Outline.**

Mr. Lloyd George's plan of pacification, so far as it has been divulged, is not startlingly novel. It is practically what is known as Dominion Home Rule, largely after the South African fashion. That is to say, it gives Ireland control of her own finance, education, police and all internal matters. It reserves the army and navy and foreign relations. This is in effect an extension of the existing Home Rule Act.

On the other hand, the plan necessarily differs from Dominion Home Rule on one essential point. Canada in 1867, Australia in 1900, and South Africa in 1913, became political entities at the moment of federation or union ; Ireland will not become a political entity, owing to the opposition of North and South. Ulster and the South will, therefore, according to the Government's scheme, each be a political entity ; there will be two Dominions in Ireland. It is known that this runs counter to the Sein Fein programme, which is opposed to partition. Partition, however, is a fact which no political theory can overcome. Sinn Fein may object that the Government scheme stereotypes partition and makes it permanent, but it does not follow that this is so. In the course of years the two Dominions may find a common bond and draw together and eventually unite. But it is premature to speculate on this matter until we know what Sinn Fein will say to the proposals. It is clear from various indications, and notably from a very carefully expressed manifesto of Sir James Craig, that Ulster will not consent to incorporation with the rest of Ireland ; indeed, there has been a re-emergence of the old Ulster note, "All we ask is to be left alone." The political capacity of Sinn Fein will be tested by its attitude to Ulster. If it accepts the inevitable, the negotiations will probably succeed ; if not, they must fail.

**Home Politics.**

It was made clear to the faithful this last week that an autumn session is not to be avoided. Year after year members are promised a respite from the October sitting but year after year perfidious necessity compels the Government against its will. This year, of course, Ireland is the reason.

Dr. Addison made his exit a few days ago with an attack on the Prime Minister ; those who had upheld the retiring Minister of Health for idealism can have found little idealism in his speech. Mr. Lloyd George, apparently feeling that Dr. Addison has bitten the hand that fed him, returned the compliments in kind. It was not a particularly edifying scene. The Opposition professed unbounded delight, but they were probably conscious that it was rather small beer after all.

However, they succeeded in defeating the Government on another occasion—and on the Budget. It was over the question of co-operative societies paying corporation tax that the Government came out with a minority of two. There is no reason whatever why co-operative societies should not pay the same taxes as anybody else ; but the fact is that there are a large number of co-operators in many constituencies, and many members of Parliament found it convenient to abstain from voting; while the Labour Party, which has been making a desperate attempt to enrol the co-operators under their banner, mustered in (for them) rather unusual force.

There were the usual shouts of "Resign" when the result of the Division was announced, but nobody would have been more seriously inconvenienced than the Labour Party, had the Government taken them at their word. They do not want a General Election for at least another year ; when "the day" comes they hope to run five hundred candidates for the six hundred odd seats available. It is generally believed that some two hundred out of the five hundred will win, which means that the Government would still have an ample majority, particularly as some of the Labour victories would probably be won at the expense of the Independent Liberals.

**The Prince.**

The Prince of Wales is not taking his holiday any too soon. He looked far from well at the Garden Party at Buckingham Palace last week, and the intense heat following on his strenuous life has made rest essential before his visit to India this coming Autumn, which will be anything but a holiday. The Prince suffers in some ways from an excess of popularity ; where he goes it is difficult to persuade people to let him alone. It is gratifying, but embarrassing.

**Chu Chin Chow.**

*Chu Chin Chow* is dead at last, after a five years' run It looked as though the coal stoppage would have killed it, but it seemed almost to lengthen its days. Never was such a play or such a run ; even *Kismet* perished

Leaders of the World's Office Equipment and Filing Systems.

Digitized by Google

prematurely in comparison. But it will revive in the provinces under the touring companies; and if there breathes a man with soul so dead that he has not yet seen *Chu Chin Chow*, which I rather doubt, there will still be ample opportunity during the next year or two outside London.

**Trade Revival and the Revenue.**

There is no longer any doubt that the revival of trade is general. Factories are starting again, and business men are beginning to look ahead with something approaching hope. Reduced prices of raw materials, followed by reductions of wages as the cost of living falls—it was noteworthy, however, that the index figure showed no further drop in June— is enabling manufacturers to turn out their goods at a more reasonable figure, and the further reduction of the bank rate is also helping them. Nothing approaching a boom is to be seen—fortunately —but the spirit of quiet confidence is spreading.

For that reason, I think that those politicans who are clamouring for an autumn budget are unwise. Granted that the figures of the budget introduced three months ago have been knocked sideways by the coal stoppage we have still nine months in which to recover ourselves. In any event there will almost certainly be a pretty heavy deficit next April; but if H.M. Government economises, as it is at last beginning to do, and the country works rather harder and forgoes the luxury of industrial quarrels, the position may become a good deal more favourable than at one time seemed possible. To introduce an interim budget in October would, I think, only distract people from their proper work, and possibly check the revival..

**The Public Health.**

The annual report on the public health for 1920 is a remarkably satisfactory document. The influenza pandemic of 1918-19 was steadily abating, and although there was a rather serious outbreak of scarlet fever and diptheria in the autumn, the death rate was low. The birth rate as a consequence of the post-war marriages of 1919, beat all records—nearly a million children being born. (The number of births, although still large in the early part of 1921, shows a tendency to decline owing to the spread of unemployement). The infantile mortality rate, which has also been falling year by year, was lower than ever before last year. This was to some extent attributable to the cool, wet summer—although it is satisfactory to note that the present heat wave has not perceptibly increased the rate this summer—but mainly it was due to the spread of knowledge among young parents; it is noteworthy, however, that in the opinion of the Ministry of Health, the death rate for the first year for life should still be halved. It remains true that the first month of life is the most dangerous. But generally the public health as a whole shows a tendency to improve each year, and the spread of preventive medicine will no doubt continue and make permanent this improvement.

# THE NEAR AND MIDDLE EAST.

*(From Our Own Correspondents).*

## EGYPT.

*Cairo, July 10.*

**Mediterranean Squadron at Alexandria.**

The third Light Cruiser Squadron, under the command of Rear Admiral Sir Reginald Tyrwhitt, is at present paying a visit to Alexandria, where an elaborate programme has been arranged for the entertainment of the officers and men. Admiral Tyrwhitt has been received by the Sultan, who entertained him and his senior officers at a banquet at which Lord and Lady Allenby, the Ministers, and leading British residents were also present. The High Commissioner has now arranged to take leave about the middle of August, by which time the Honourable E. Scott, Counsellor to the Residency, will have returned from leave, and so be able to take over the work.

**Suspension of a Zaghloulist Organ.**

The two sensations of the week in Egyptian circles are the suspension of Zaghloul Pasha's chief organ. *Al N zam*, and the order to Prince Aziz Hassan to leave the country. *Al Nizam* has been publishing a series of extracts from a pamphlet on the political situation and the reforms which are necessary, and in one of these extracts there appeared a passage making allusions to the position of the Sultan, which were not only offensive to his Highness, but also calculated to lead to public excitement and possible trouble. The Council of Ministers ordered the suspension of the paper for six months, and had the author of the pamphlet arrested and handed over to the military authorities, who will bring him in due course before a Military Court.

The Zaghloulists affirm that the action of the Cabinet is due solely to a desire to stifle opinion which is hostile to the present regime. I am in nowise concerned with a defence of the action of the Cabinet, but in fairness to the Council of Ministers, it should be stated that the passage in the pamphlet the publication of which was followed by the suspension of *Al Nizam* not only infringed the Press Law, but brought the paper within the terms of the Penal Code. The fact that the author of the pamphlet is to be brought before the Military Court is a further indication that wider considerations than those of purely local politics came into play; for the British authorities have steadfastly abstained from any interference with the administration of the country unless public security has been threatened.

**Prince Aziz Hassan's Expulsion.**

As regards Prince Aziz Hassan, this notorious member of the Khedivial family has got even less than he deserved. Ordered to leave the country, together with other relations, at the beginning of the war, and prevented from returning, owing to his connection with the ex-Khedive, he was finally given permission to come back to Egypt last April. Instead of showing gratitude for the concession, and holding aloof from politics, he at once took sides with Zaghloul and became one of the most active organisers of propaganda in favour of the head of the "Wafd." His activities soon cost him his allowance as a member of the reigning house, and as that did not bring him to his senses and he became more daring in his operations, the military authorities were compelled to intervene; and ordered him to leave by the "Helwan" last Friday. This the Prince did, and on his departure he was acclaimed by the Zaghloulists as a patriot. To those who know him and have followed his career during the last 30 years, the idea of his being an Egyptian patriot is simply ridiculous. It is probable that in this, and in former instances, he is trying to satisfy his own personal feelings and to push Turkish——and 'tis said though the Prince stoutly denies it, Khedivial—interests. From every point of view, Egypt is well rid of him.

Meanwhile there is a lull in the local political situation. The success which attended the departure of the Delegation and the firmness shown by the Government appear to have had a very depressing effect on the Zaghloulist camp. For the time being, at any rate, nothing is being done, and "El Rais el Mahbub" is said to be concentrating his efforts on a fight in the last trench, viz: the Constituent Assembly, in regard to the elections, for which he intends to stump the country.

**The Egyptian Auxiliary Corps.**

A very wise step with regard to the various auxiliary corps raised during the war in Egypt has just been taken by the British Government, which has handed over to the Egyptian Government its own share in the profits made out of the control of cotton introduced in 1918 to safeguard the supply of raw material required for the manufacture of munitions. The sum in question amounts to L.E. 960,000, and the money will be devoted to paying indemnitites and pensions to members of the Egyptian Labour Corps, of the Camel Transport Corps, and of other, similar corps who have been disabled through serious wounds, or by permanent physical infirmities, and to the widows and children of the men who have died as members of any of these Corps. The British Government have already given compensation to those who had been wounded, and to the families of those who had been killed; and this further action is an exceedingly wise one, since it has the additional advantage of disarming the criticism hitherto heard, that the British Government had limited the price of cotton in 1918 in order to make money out of the Egyptian fellaheen.

**The Bomb Discovery.**

Of late the Police have been actively searching for bombs, which it was said were to be used against the Cabinet and certain highly placed British officials, and they have now discovered two in Cairo and one at Mataria, on Lake Menzala. An enquiry has been opened but nothing definite can as yet be said with regard to the object for which they were to be used and the question of conspiracy. The bombs, though more scientific in mode of explosion, are similar in pattern to those used during the past three years, and they are certainly of local manufacture. Well informed circles affirm that there is a connection between these bombs and the "Vengeance Society," certain members of which were tried and sentenced by Military Court last summer; but apart from the fact that it is known that arrangements had been made to assist one of the convicted men to escape from prison, and that one of the British Officials mentioned had the men convicted in this case in his custody, it is not possible at the present juncture to say what the relationship is.

## YUGOSLAVIA.

*Zagreb, July 18.*

**Party Manœuvres.**

The political world is quiet just now, but the various groups and parties are busy in a quiet way, and when the Skupshtina meets again in the autumn we shall probably see great changes. It would certainly not be surprising if M. Pashitch, at his advanced age, should retire from public life after his recent personal triumph. M. Protitch, who is just now resting in the country, may combine with Dr. Trumbitch to form an Opposition, which may be joined by the Narodny Club and Raditch's party. In the Democratic Party a split seems to be probable, for the Croatian element is gradually diverging from the Serbian, and some of the prominent men may cross the floor to the Radical side.

M. Pashitch has rearranged his Cabinet, as a temporary measure pending the reassembling of the Skupshtina.

Digitized by Google

M. Pribitchevitch takes over the Interior as well as Education, and M. Uzunovitch is Minister of Communications in the place of Dr. V. Jankovitch, who has definitely retired from the Cabinet. This creates a vacancy in Agrarian Reform, which is filled by M. Kratta Miletitch, a Radical, who has not before held a portfolio, while General Zechevitch takes the Ministry of War, and General Hadjitch has been appointed First Adjutant to the Regent. M. Drashkovitch has definitely retired.

The programme of the Opposition will be the revision of the Constitution. This, as we know, is a series of opportunist compromises with which nobody is really pleased; but the great fact remains that the country has a constitution as a groundwork for improvement and something to go upon. It is a good sign that those who declined to be associated with the passing of the constitution, the Narodny Club, Dr. Koroshets's Slovene Clericals, and the Raditch Party, are apparently condescending to take part now in parliamentary proceedings. As the leaders are experienced politicians and undoubted patriots, nothing but good can be expected from the organisation of a strong and reasonable Opposition.

It is expected that some of the Bosnian Mohammedans will fall out, as a result of their party's conference at Serajevo. They are but a small party, and cannot afford to split, but the loss of any of them will be a serious blow to M. Pashitch's slender majority. Their co-religionists in Macedonia and Southern Serbia, who are mostly real Ottoman Turks, as opposed to the Bosniaks (who are Mohammedan Serbs) are opening their mouths very wide. It will be remembered that they voted for the Constitution, so perhaps M. Pashitch is pledged to grant them at least a substantial portion of their demands. They ask that they have their own schools, at the expense of the State, the teachers to be approved by them, and Turkish schools to be erected for instruction in the Turkish language wherever there is a Turkish population; for a special Mohammedan university for freedom of commerce; for agrarian reform in their interest; for equal rights of citizenship; that officials in their districts must have a knowledge of the Turkish language, and one or two other details. Some of these demands are not unreasonable and will be granted but others are impracticable. They propose to unite politically with their Serbian co-religionists, but this is an unlikely consummation, since the latter are differing among themselves. As many of the brigands and bandit of southern Serbia are Mohammedan Albanians, it is not surprising that these Turks press for the liberation of the interned families of the outlaws.

**Arrests of Communists.**

It will be remembered that at the last municipal elections, the Communists won in most of the towns. As a result of the recent events, the Mayor of Nish has now been imprisoned for a month, together with five members of the council, and their election quashed. The police are making arrests on a wholesale scale in the Voivodina, on the strength of the admission of the prisoners incriminated in the attempt on the Regent's life. Many hundreds are said to be now under lock and key, of whom most are Magyars, probably followers of Bela Kun, helped, probably, on a large scale of Magyar irredentists.

**Good News for Travellers.**

Visitors to Zagreb, while they unfailingly recognise the beauties of the town—"our white Zagreb," as the natives affectionately call it—are naturally more exposed than the residents to one feature in which the Croatian capital is indeed backward. The hotels here, never good, have degenerated to a positively distressed condition. The reason is not far to seek. The management had no power over its guests; for rooms are allotted to visitors by the Lodgings Committee and nobody is permitted to retain a room more than a few days. The natural consequence is that the servants take no personal interest in the visitors, and the management does not care, as the hotels are always crammed full, and the prices fixed. Consequently, everything is allowed to fall into disrepair, and cleanliness is an almost unknown virtue. The Zagreb people are ashamed of their hotels, and many complaints and reproaches are levelled against them in the press. Now at last the police are taking action in the matter, and have informed the proprietors that there will be a regular inspection, and that any failing on the grounds of cleanliness or order will be most severely punished. So now visitors take courage, and it is to be hoped that a visit to Zagreb will not be looked upon any longer as merely an unavoidable evil. Certainly nobody would stay a single day in any of the hotels as they are now unless he were obliged. A radical reform is really required. The hotels are all old-fashioned, and their management original. It is exceptional to be able to get the simplest breakfast in one's room, and when it does come, it is always cold, and of inferior quality. Hot water is a rare luxury and baths are practically unknown. Unwelcome guests are an unavoidable concomitant in the warm weather.

Until recently, the restaurants have not been much better than the hotels, but some progress has been made in this direction. Of the making of bars there has been no end, where bad wine was sold at very high prices in doubtful company; but it is only within the last few months that there has been more than one restaurant where one could count upon getting a good meal, well cooked and decently served. In both these respects Belgrade is far better served than Zagreb.

## GREECE.

*Athens, July 2*

**A Gift to the Byzantine Museum.**

The Greek colony at Leghorn has presented the Byzantine Museum of Athens with three Bibles of great value, two of which are Greek and one Slovene, also with a chalice adorned with diamonds. These precious objects had been given to the Greek community of Leghorn by the Empress of Russia, Catherine II., in 1746.

**The Bulgarian Cattle.**

According to a telegram received by the Greek Foreign Office from its Sofia representative the Bulgarian Government has notified the Inter-Allied Commission in Sofia that it did not intend handing over to Greece the exact number of cattle as fixed by the Treaty of Neuilly. The Bulgarian Government maintains that a certain number of cattle has already either been handed over to the Greeks by special conventions, or carried off forcibly by the Greek frontier troops.

The Greek representative replied that these were merely pretexts of the Bulgarian Government by which they hoped to evade the fulfilment of their obligations; and added that the Hellenic Government insisted upon the delivery of the exact number of cattle as fixed by the Treaty of Neuilly.

**More Refugees Arrive.**

The Greek High Commissioner at Constantinople has telegraphed to the Government announcing the departure for Greece of about 30,000 refugees from the Ismid region who had arrived at Constantinople a few days before the former town was evacuated by the Greek troops. These refugees will be distributed among various towns and islands as follows:—Isle of Mitylene, 9,000; Lemnos, 4,000; Volo, Larissa, and other towns in Thessaly, 8,000; Island of Samos, 6,000; and Pyrgos and Tripolis, 3,000. The authorities in these towns have been instructed by the Government to requisition a number of buildings for the accommodation of the refugees. Furthermore the Minister of Public Assistance has opened a credit of 2,250,000 Drachmae; which is considered sufficient for the maintenance of the unfortunate victims of the war for a period of one month.

## BULGARIA.

*Sofia, July 11*

**Political Rumours.**

There has been much talk in the political world concerning the external policy of Bulgaria, and it would seem that we are back to the spring of 1919, when every parade of soldiers was looked upon as a mobilisation of the Army. There is, however, a serious side to the question of Bulgarian relations with Angora. About the middle of last month an Agrarian Deputy, M. Grozkoff, with two companions, left Sofia on a visit to Constantinople and Asia Minor. Their visit to the former city passed almost unnoticed, but ten days ago certain Turkish newspapers reported the presence of M. Grozkoff at Angora. The Government emphatically deny that he was charged with any mission, and state that he is travelling for purely business reasons. Nevertheless the incident has produced an unfortunate impression.

Rumours, each one more ridiculous than the last, are especially numerous these days. A typical one is the report that the Allies have actually decided to hand over Burgas to the Greeks in return for the cession of Smyrna to the Turks. The country is not being seriously affected by these absurd stories, but M. Stambolisky has deemed it advisable that he should make a personal denial of all the accusations brought against the country, and had announced his intention of leaving shortly for London, Paris, and Rome.

During his visit to the three Allied capitals, the Prime Minister intends to make a full *exposé* of the economic and financial situation of the country. It is not yet known who will accompany him, but M. Tourlakoff, Minister of Finance, is due to leave this week for Paris and Brussels. His visit to the former place is connected with the Bulgarian debts to France.

M. Dimitroff, Minister of War, will presumably act for M. Stambolisky during his absence.

**Bulgaria and the S.H.S. State.**

A point of view that is steadily gaining ground in certain Allied circles is that Bulgaria and the S.H.S. State are on the verge of a complete approachment, which has as it main aim a common policy in Thrace, and the regions adjoining. The Government are even accused of having approached the Serbian Minister here with a view to the incorporation of Bulgaria in the S.H.S. State. Such an accusation, besides being lacking in foundation, is so serious, that it would indeed be advantageous to all parties, if the originators of the report could be discovered. Naturally enough, Bulgaria is anxious to stand well in the eyes of the Yugoslavs, but she is far too independent to desire to be made an integral part of another nation.

Relations between the two countries are certainly improving, but it is not more than two months since the Serbians were threatening hostile action against this country, and although the foreign policy of Balkan States is notoriously versatile, it is hard to believe that old wounds and sores are as yet entirely healed. When they are healed—and it is to be hoped that the process will not be a lengthy one—matters may take on a different turn.

*Sofia, July 18.*

**The Sobranje's Holiday.**

The Sobranje has adjourned until September 1, and the majority of the Ministers are in the provinces. No reply has yet been given to the Inter-Allied Commission regarding the latter's demand for free trade in cereals, but it is expected that the Government will accede to the Commission's request.

M. Tourlakoff, Minister of Finance, is due to leave for Paris-to-day, and he will visit London, Brussels, and other capitals. Besides discussing Bulgaria's debt to France, he will make enquiries about the possibilities of arranging commercial treaties with various European countries. M. Stambolisky, also, will leave for London, Paris, and Rome in the near future.

**Diplomatic Appointments.**

M. Radeff, who has for some time acted as Secretary-General of the Ministry of Foreign Affairs, has been appointed Minister at Berne, vice M. Pomianoff, who, it is said, is to go to Berlin. General Ficheff, a well-known soldier, is to succeed M. Nedesco at Bucharest; while the appointment of a Minister to Constantinople is under discussion. Bulgaria still remains unrepre-

sented in Greece, and there are no signs of M. Kissemoff, the Minister elect, proceeding there.

**The Army.**

The news that the Supreme Council in Paris has been discussing the question of Bulgaria's future Army has aroused much interest here; and naturally so, in view of the fact that on September 1 practically the whole of the present force will have the right to be demobilised. Only a few hundred voluntary recruits have been obtained and unless new measures are taken, either by the Allies or by Bulgaria, the country will be without an army in six week's time. To some people this may not seem a bad thing; but a force of some kind is essential to Bulgaria. In the first place she must have one to keep law and order in her own territory; and in the second place it would be impossible without one to control the bands of robbers and marauders that cause '*incidents*' on the frontiers. The Inter-Allied Military Commission of Control is still in existence, and is presumably able to advise the Supreme Council of the dangerous situation that may soon arise. Another point to bear in mind is that the Reparations Commission may have something to say on this subject; for the cost of maintaining an army recruited on a voluntary basis will much exceed that one recruited by conscription. A volunteer private costs 16,711 levas a year, inclusive; while a conscripted private only costs 6,570 levas.

## ALBANIA.

*Tirana, July* 13.

**The Powers and Albania.**

The Conference of Ambassadors in Paris has begun to consider the Albanian problem. For a long time—more than a year and a half—neither the Peace Conference, the Ambassadors', nor the Supreme Council, had given any attention to the subject. However, on March 2, of this year the Albanian delegation in Paris requested the Supreme Council to recognize officially the Albanian Government; and this request and the determination not to leave the question to the League of Nations induced the Conference to move in the matter. A committee has been appointed to deal with the question; the four members being:—Major Temperley (Great Britain), M. Laroche (France), Signor Galli (Italy), and M. Akosa (Japan). On the 8th inst. the president of the Albanian Delegation, M. Midhat Frasheri, was called before this committee, to make known the desiderata of the Albanian Government. M. Frasheri read a statement, setting forth that Albania desired from the Conference of Ambassadors the official recognition of its Government, and, as a natural sequel, the evacuation of its territory by the Serbs and the Greeks. Asked what was the Albanian view of the frontiers of 1913, M. Frasheri replied that they were very bad, having been laid down with a flagrant disregard of Albania's rights. Nevertheless, he went on to say, having regard to political realities, and not being able to hope for a rectification of frontiers in favour of their country, the Albanians regarded the frontiers of 1913 as being unalterable, even in their minutest detail; and the people were firmly resolved not to permit any alteration at all, however slight..

**The Greek Pretensions.**

The declarations of the Greek delegate to the League of Nations, and the pretensions be advanced in regard to southern Albania have made a painful impression in this country, and public opinion is greatly excited. Yesterday a great meeting of protest took place at Albasan, presided over by Monseigneur Dhimitri Papa; and another great meeting is announced at Valona, under the presidency of an Orthodox Notable, Aristide Rusti.

The subject of the inviolability of the frontiers of 1913 has given rise to a lively and excited debate in the Chamber, where the deputies unanimously voted against any sacrifice of national territory. Forced to take action of some kind the Government has had to take steps to safeguard her frontiers, and a concentration of troops has been ordered.

**A Centre of Albanian Studies.**

For the past year there has existed in Paris, at the School of Oriental Languages, a centre of Albanian studies, with a course in the Albanian language. About two months ago there was added to this centre a bureau of scientific and commercial information, which is intended to be of service to all who wish to travel in Albania or to transport business of any kind with the country. Any of your readers who are interested in such matters might care to write to the bureau. The address is:—M. le Secretaire du Centre d'Etudes Albanaises, Ecoles des Langues Orientales, salle No. 6, 2 Rue de Lille, Paris.

## ASIA MINOR.

*Smyrna, July* 1.

**Ammunition Explodes.**

The salutes and rejoicings for the arrival of the Crown Princess Elizabeth were scarcely over when Smyrna was loudly shaken by two terrific explosions which occured about four o'clock yesterday afternoon. The powder and ammunition depots at Mersinly—one mile distant from Smyrna's northern boundary—were completely destroyed, and very few houses and shops in the city escaped without some of the windows being broken; while the factories at Daragatch were more severely damaged. The loss of life was small considering the enormous amount of powder and ammunition employed; for not more than 20 people were killed.

It is now believed that King Constantine will change his present residence in Cordelio—which is quite near an ammunition depot—and reside either in Bournabat or in Boujah, where are the British Colonies.

## CYPRUS.

*Nicosia, July* 5.

**School Reforms.**

The Greek Community always shows great zeal in the matter of education, although the term hardly comprehends all that is connoted in our use of it, as regards school life. The movement for a higher standard and better pay of teachers has had some success; and attention is now being called to the need of better school buildings in villages throughout the island. In some places Cypriots who have made fortunes in Egypt or elsewhere have built and furnished schools on suitable sites in, or outside villages. But in only too many places elementary schools are in over-crowded, damp, badly lighted, badly ventilated, and often insanitary houses. Hitherto poverty has stood in the way of improvements by village efforts. But the great change, due largely to the war, which has come over the island, has quite altered the situation, and the people should be able to do much more than hitherto to remedy the defects, of which they are well aware. It is now being insisted on that some of the proceeds of rich church and monastery properties should be devoted to these educational needs instead of being largely squandered, or applied to purposes which have become an anachronism: Also it is urged that the Government Loan Fund might be more widely utilised for so desirable an object.

**The Heat.**

The heat has been oppressive. The Government

Central Offices moved to Troödos on June 27. Already there is a large influx of visitors. Mr. Dickenson, President of the District Court, Nicosia, and Mr. Surridge Commandant of Police, have left for England; but the number of British officials going on leave this year is small. The office of Principal Forest Officer is still vacant.

## PRESS ON THE NEAR EAST.

### Turkey and Russia.

The sixth of Mr. Arthur Ransome's articles in the *Manchester Guardian* upon "Russian Policy in the East" is devoted to an examination of the Russo-Turkish Alliance, the most interesting ingredient of which is, he says, "mutual mistrust." The Turks, as the weaker party, were at first the more eager to come to an agreement, which, however, was forced upon both Turk and Russian by the position of the Armenian and Georgian Governments, who threatened them both with intervention. But the respective policies of the two countries, the one short, the other long, differed considerably :—

Angora, of course, was not equipped with any such long distance policy as that involved in the Communist attitude towards the East. I doubt whether even to-day, it goes so far in its plans as the handful of pan-Turanian enthusiasts who are at this moment exploiting the Russo-Turkish alliance with the most decided views as to an eventual parting of the ways when Islam shall be strong enough to stand by itself. The men of Angora were faced with immediate problems. They wanted their rear guaranteed by a friendly power. And they sorely needed shells and cartridges. With these two limited objects they set about making up to Russia. They did it in a characteristic way. In notes which are models of literary ingenuity they echoed the rhythm and refrain of the notes that were issued from Moscow. They were tireless in insisting that the Anatolian movement was a movement of the "workers and peasants of Turkey." Some of their chief spokesmen expressed their belief that the "victory of Bolshevism," not in Turkey of course, but in Western Europe, was the only thing that could save the Turkish people from enslavement. Further, they said, in Turkey capital was foreign, and consequently Turkey in fighting the Sèvres Peace and the regime of Capitulations was engaged like Russia in a struggle against world capital, and therefore deserved the fullest support. What they asked for was an understanding in the East and military equipment for use in the West. They got the one, and it is extremely probable that in one way and another they received a good deal of material supplied originally by the Western Powers, material for which Denikin and Wrangel had had the temporary use.

Even now the Russian Communists have divided opinions upon the Turkish Alliance, some thinking it a frail thing that will be smashed by a reconciliation between Angora and the Entente :—

Assuming that the Allies like themselves, realised that Angora was Turkey, and seeing that the Allies did not seem to care much what happened to Armenia, they thought that the Allies would make friends with Angora, give the Turks a free hand in the Southern Caucasus, and with Turkish aid make a general attack on Russia's connections with Central Asia, repaying themselves for the expenses of such action by the seizure of Baku. The Angoran Government would make its way to respectability over the corpses of Russian Communists and would probably get nominal control of Batum.

—others urging that "every revolutionary movement in the East begins in Turkey." This party would have carried more weight if only they could have been sure that Angora could not be bought. There was yet another line of thought :—

And there was a party of Communists who, reasoning on lines which could not but appeal to Marxists, assured Moscow that it had nothing to fear, since the material interests involved were such that agreement between Angora and the Allies was out of the question. Of these Communists, Skatchko put in an admirably argued report, beginning with a brief analysis of the Sèvres Peace. He makes a list of Turkey's prospective losses and concludes "For Turkey remains only the central part of Asia Minor, deprived of its biggest commercial towns, deprived of all exits to the Mediterranean, deprived of its best Black Sea ports, Trebizond and Sanguldak, and deprived of the Bagbab railway. The part of Asia Minor left in the hands of the Turks is deprived of every chance of independent economic existence. In other words the part of Turkey which remains free politically will inevitably be enslaved by the Entente economically." That is to say that Turkey cannot agree without suicide. But what if the Allies alter the terms? Skatchko believes that this is impossible. Too much is involved. None of the Allies will give up its share except upon a mutual basis, and some will refuse to give up anything. He thinks that Mesopotamia is the key to the situation. No wholesale revision of the treaty is possible while England holds Mesopotamia, and "it is more than enough to read in the English newspapers of the significance of Mesopotamia for England—to hear that triumphal licking of lips—to understand that English Imperialism will not let this tit-bit slip from its mouth." And if England is to have Mesopotamia, she must give France Syria, Greece Smyrma, and so on and so on. Therefore the struggle between the Turks who have signed the National Pact and the Entente is one to the death, and Moscow can safely become intimate with Angora. Further until the end of the struggle with Western Europe, the Turkish influence will support in the Caucasian races a feeling friendly to Soviet Russia. And, "since the end of that struggle will be the victory of world social revolution, there will be no need to worry about any kind of national influence between Angora and the Entente."

And Mr. Ransome follows this paragraph by outlining another fear on the part of Russia which may tend to dissolve the Alliance :—

He, Skatchko, was listened to, yet the words of that last hopeful sentence of his strike a note of mistrust of a quite different kind. And if the old fear of Turkish understanding with the Allies is fading away (Angora's refusal to ratify Bekir Sami's unauthorised compromise with France contributed to remove it) this new fear is daily growing. What if the Turkish nationalist movement is successful and, covering its aims by friendly professions, extends its influence beyond the mountains of the Caucasus, beyond the Caspian, over the cotton-fields of Turkestan, up the Volga, and into the Urals? The Russians would be glad enough to play godfather to a gigantic Moslem movement which would be dangerous to the Allies, but they have no wish to suffer from it themselves. And day by day, as they were moving, readily enough towards the alliance with Turkey, the curtain was lifting on the stakes of that gamble. For the moment valuable Turkish help throughout Mohammedan Russia and in the neighbouring countries of the East from a movement which seemed risen as if by miracle to carry out for them their Eastern policy. But afterwards, supposing that the social revolution should miss its cue, and Russia be faced not by an ally turned Communist but a United Islam which by a single word spoken at evening from a minaret could halve the area of Russia during the night.?

### Palestine.

In the *Fortnightly Review* for July, Mrs. Rosita Forbes has a fascinating essay upon "Palestine," in which she touches lightly upon the country's history, and the characteristics of its chief towns. She concludes with a note upon its possible future :—

War and famine and plague lie behind her, but through them all one catches glimpses of the shepherd and the husbandman. To-day her whole future lies in the hands of those two, and the Jew loves not the country but the town. In colonies he does good work, such as wine-making near Jaffa, but Palestine cries out for the peasant who will live alone in his small grey cabin among the hills, the man who fears neither the silence of the open country nor the storms that rage over it. Wheat and barley can be grown on the high land, fruit trees can be planted on the plains, cotton can be developed in the Jordan valley.

Flocks and herds must still follow their Bedouin shepherd from pasture and pasture, but Syria is *one* land and she is an *Arab* land. From time immemorial she has only been strong when her two provinces have been united and the capital of her glory was Damascus. Science, literature, philosophy, spread from that city and seven rivers. All the great caravan routes lead to her. She is the centre of the great web of commerce which brought her goods from Egypt, the Euphrates and the sea. To-day oil from Persia and the railway from Baghdad must pass her way. She holds the lines that connect the produce of Mesopotamia and Arabia with Tripoli, Haifa, and Beyrout through them, with Europe. She is in the midst of the most fertile country in the world. A sea of vivid emerald, her miles and miles of fruit gardens divide the granary of Hauran from the desert beyond. Seven rivers lavish their prodigal waters on her favoured plain, so that on every side a new city may spread forth, with wide, new streets and modern buildings in open squares, yet never can she reach beyond the shade of her apricots and peaches, figs, olives, and vines. The Caliphate moved between Mecca, Damascus, and Baghdad, but never did it rest at Jerusalem, though the blue Mosque of Omar is the second holiest in the realm of Islam.

Jerusalem never could be a modern capital by her own natural position. Aloof on her steep mountain top, connected with the outer world only by two narrow passes, she is crushed within her old walls by the deep ravines that encompass her. She cannot spread in any direction. Already her houses are wandering up and down impracticable hills, and who tries to drive, bumps perilously from sudden climb to steep descent. No ancient caravan route went near her and no modern main line touches her. With her winter snow and her terrible summer drought, which of old drove every invading army back to the wells of the plains, she is infinitely remote from commerce and from politics, and she is neither Moslem nor Christian nor Jewish. She has neither race nor creed nor prospect of power. Outside the whirl of progress' wheel, with her narrow streets untouched and her old walls kissed by time, she will remain a pilgrim city whose only great buildings are convents and monasteries, churches and hospices—the goal of worship from East and West alike. To Damascus belong the palace and the parliament. To Jerusalem the altar and the kiba.

# NEAR EAST BOOKSHELF.

## AN ANGLO-INDIAN NATURALIST.

"BEAST AND MAN IN INDIA," By J. Lockwood Kipling (London: Macmillan and Co., Ltd., 1921. 7s. 6d. net.

Thirty years have elapsed since the first appearance of the late Mr. Lockwood Kipling's: "Beast and Man in India." The author's sympathy with what used to be styled the "Brute-Creation," his intimate knowledge of Indian folk-lore, and the lambent humour which shines in every page have made his work a classic. Its publication in a pocket edition will he hailed with delight by a generation which realises more keenly than its fathers did that the superior forms of life are linked in ties of kinship. Mr. Kipling's introductory chapter deals with the treatment of domesticated animals by Indians in general. He exonerates the latter from the charge of inborn cruelty so often brought against them; and ascribes their callousness to "necessity, custom, ignorance, rather than to downright brutality of intent." In point of fact the attitude oi mankfnd towards their four-footed slaves passes through three phases—barbarous insensibility, recognition of principle that animals in captivity have rights of their own, and, lastly, affection, which in this country is carried to excessive lengths. Most Indians and far too many Europeans remain in the first stage of this wholesome evolution. Our author noticed, without explaining it, the disappearance of the gigantic cranes known colloquially as "Adjutants," which haunted Calcutta in times of yore. It is due to more efficient methods of dealing with city refuse. Fifty years ago rubbish of all descriptions was thrown out to fester in streets and compounds. Under such conditions the adjutant served as a scavenger, and its wanton destruction was visited with a heavy fine. A decade or so later the local Municipality contracted for a railway which transports waste products to a vast salt lake on the city's, eastern fringe, and the adjutants have followed their food.

At p.p. 221–3 Mr. Kipling discusses the moot question of the elephant's sagacity. Evidence on this point is conflicting. Alone among domesticated animals he masters a small vocabulary of guttural sounds, and is guided solely by his mahout's voice. Again, the use of tools is commonly supposed to differentiate man from his humble relatives. But an elephant suffering from the mosquitos which penetrate the huge pores of his thick integument, puts them to flight by beating his flanks with a bough torn from the nearest tree. On the other hand, a newly-caught adult will submit to the ruling of a lad who climbs on his neck. It never occurs to him that it would be easy to remove the rash intruder with his trunk. Mr. Kipling offered no explanation of the curious fact that dead elephants are never found in the jungle over which they roam in a wild state. In his eyes the absence of their remains was "an orient mystery, dim and inscrutable." While the reviewer was stationed in the Chittagong Division of Bengal, he met an Indian who had discovered an ancient elephantine cemetery far away in the forests which bound Bengal on the north-east. The store of ivory which it yielded gave the lucky finder "wealth beyond the dreams of avarice."

"Beast and Man in India" ranks with the "History of Selborne" as a revelation of Nature's workings. It is free from the eighteenth century starchiness which renders portions of Gilbert White's immortal work somewhat heavy reading; and the author's illustrations add greatly to its charm. F.H.S.

## THE SARACENS.

"A SHORT HISTORY OF THE SARACENS.", By Ameer Ali Syed, P.C., C.I.E., L L.D., M.A. (London: Macmillan and Co. 12s. net.)

Since its first appearance, in 1899, this book has grown steadily in popular favour, and the fact that a new edition is now called for affords welcome proof that its subject has not lost its attraction for British readers. Indeed the prominent part played in the Great War by Arabia and the Arabs must have increased our interest in their history; and the author's sympathetic unfolding of the story he has to tell will do nothing to lessen our liking, or our desire to see a united Arabia restored. We cannot pretend to regard the Preface to this edition as adding to the value of the work; and apart from it, there seems to be very little difference between the first edition and this new one. We are glad to notice, however, that Louis IX is now given as the leader of the unsuccessful crusade which terminated ingloriously in Egypt with his own capture and that of many of his nobles, and which is here referred to as the Eighth Crusade. Three or four illustrations have dropped out, but they can easily be spared.

The title inevitably suggests comparison with Green's "Short History of the English People," and in point of fact it would not be at all surprising to learn that Syed Ameer Ali had to some extent modelled himself on that popular—and deservedly so—work. At all events we find certain strong resemblances in the way of treating the subject, and if we detect certain flaws in the 'Saracens,' as in the 'Short History' we also find the Eastern story full of human interest and life and colour, like Green's book. Indeed, it would take a very stupid writer to make such a story as that of the lightning rise and rapid spread of the Saracen power from anything but interesting; and Syed Ameer Ali is never dull. Sometimes, carried away by his narrative, no doubt, he indulges in a generosity of statement that may make us raise our eyebrows—as, for instance, when he writes (p. 210) that "Saffah was now the undisputed master of Asia and Egypt." But after all, such hyperbole serves only to lend the right Oriental flavour to the wonderful story; and in the main the author is a trustworthy guide. Occasionally his admiration for one character, and his desire to show it in the most favourable light seem to lead him into doing rather less than justice to others, with whom his favourite was brought into contact. Thus, in his account of the struggle between Saladin and Richard of England, his intense—and fully justified—admiration for the Moslem leader carries him so far that he appears to think that Richard achieved practically nothing; whereas, not only did Richard gain the admiration of the Saracens, but the (Third) Crusade secured the very substantial gain that Western pilgrims to Jerusalem should be exempt from the taxes previously imposed by the Saracen princes. But in this matter of 'taking sides' the History of the Saracens is by no means alone among histories. And it makes intensely interesting reading.

The marriage arranged between Mr. Stephen Leggett, Public Works Department, India, and Miss Violet Sendell, of Chigwell Row, Essex, will take place at the Cathedral, Bombay, on September 3.

Our Zagreb Correspondent writes (July 18):—H.M. King Peter has so far recovered from his recent illness as to be able to travel, and so is leaving to take the waters at Arandjelovats.

Prince Hirohito, of Japan arrived at Port Said on July 23, on his way back to Tokyo, and was welcomed by representatives of the Sultan of Egypt, and of the British High Commissioner.

The engagement is announced between M. Marcel Coûteaux, Croix de Guerre (late Belgian Army), second son of M. Gustave Coûteaux, of Constantinople, and Phyllis Lytton, younger daughter of Mr. and Mrs. R. Partington, of London.

A Reuter Berlin telegram says that the *Taegliche Rundschau* states that Dr. Ernst Hertzfeld, Professor of Oriental Archaeology at the University of Berlin, has gone to London to arrange a collection of object which he excavated at Samara.

A marriage has been arranged, and will shortly take place, between Charles Rawdon Manders Fry, Lieutenant 2nd Battalion Royal Sussex Regiment, eldest son of Major-General C. I Fry, C.B., late Indian Army, and Mrs. Fry, of 28, Sackville-gardens, Hove, and Florence Magdalen, daughter of Mr. and Mrs. E. C. Scudamore, of Kingston, Jamacia.

The engagement is announced of Captain Charles Knowler Tester, M.C., Indian Army (16th Royal Light Infantry), only son of Mr. G. Brightling Tester and Mrs. Tester, of Maviswood, Eastbourne, and Josephine (Joyce), only daughter of the late Captain R. A. D. Rowley, Royal Irish Rifles, and Mrs. Rowley, of Clareholm, The Goffs, Eastbourne.

A marriage has been arranged, and will take place on October 1, at Dehra Dun, United Provinces, India, between Harold Dolphin Allan Isaac de Buriatte, of Calcutta, only surviving son of Mr. and Mrs. H. J. Allan Isaac de Buriatte, of Longley-road, S.W. 17, and Marion Doris, younger daughter of Lieut-Colonel J. H. S. Murray, R.E., and Mrs. Murray, of Dehra Dun and Cheltenham.

A marriage has been arranged between Captain Frederick Francis Cooke (late Essex Regiment), formerly of Goorookellie, Ceylon, elder son of F. W. Cooke, Swardeston, Norfolk, and Joan Beryl, only child of James Bruce Rennie, of Galaha, Ceylon, and granddaughter of the late Captain James Rennie, C.B., Indian Navy, and of the late Sir John Hill, Bt., of St. Columbs, Londonderry.

The King received on July 23 the President and Members of the Egyptian Official Delegation, as follows Their Excellencies Sir Adly Yeghen Pasha, Prime Minister; Sir Hussein Rushdi Pasha, Vice-President of the Council and Ex-Prime Minister; Ismail Sidky Pasha, Minister of Finance; Mohammed Shafik Pasha, Minister of Public Works; Ahmed Talaat Pasha, President Court of Appeal and Ex-Minister; and Youssef Soliman Pasha Ex-Minister,

Our Bucharest Correspondent writes :—Their Majesties the King and Queen left this week for Brassov, to be present at the solemnity of the unveiling of the Monument erected to the memory of the fallen warriors buried in the new cemetery of that town. The departure for France of the Royal Family has been fixed for July 15. The King going to Bagnolles to take the waters for a month, and the Queen and Princess Ileana to St. Brienc, in Britanny; the Sovereigns will spend a few days in Paris.

Mr. David Davies, M.P., gave a dinner at the Carlton Hotel last week to a number of prominent Indians now in London, in order that they might have an opportunity of meeting members of the Overseas Committee of the League of Nations Union and others interested in the League of Nations. Among those present were the Right Hon. George Barnes, M.P., Sir M. Bhownaggree, Major the Hon. W. Ormsby-Gore, M.P., Mr. M. Jinnah, Sahebzada Aftab A. Khan, Major-General Sir F. Maurice, Sir C. Sankaran Nair, Sir N. Sircar, and Sir Arthur Steel-Maitland, M.P.

A Reuter Message from Simla stated :—The Mount Everest Expedition arrived at Tingri on June 19. All the members of the party were well except Mr. Harold Raeburn, who has been invalided and sent back to Sikkim. The mountaineers are now exploring the North West approaches to Mount Everest. The remaining members of the expedition are engaged in short scientific excursions to the West. Some 4,500 square miles of new country have already been surveyed, but the setting in of the monsoons is hampering these operations.

## APPOINTMENTS, ETC.

The King has approved the appointment of Mr. Sachchidananda Sinha to be a member of the Executive Council of Bihar and Orissa, in succession to the late Rai Bahadur Krishna Sahai.

The King has been pleased to appoint Mr. Arthur Herbert Cuming, Indian Civil Service, to be a Puisne Judge of the Calcutta High Court, in succession to Mr. C. P. Beatchcroft, Indian Civil Service, who is retiring fron the bench.

## OBITUARY.

The death has occurred of Colonel Charles Verelst Verelst, at the age of seventy-one. In 1869 he joined the 11th (Prince Albert's Own) Hussars as cornet, and served continuously with the regiment in India and elsewhere.

The death is announced of Mr. C. J. Wills, a prominent engineer. Among the public works conducted by him and his firm were the Famagusta Harbour Works in Cyprus, the new breakwater at Port Said, and the new docks in Bombay.

The death is announced, at the age of fifty, of Lieutenant-Colonel Mark Synge, C.I.E., D.S.O., an officer in the Indian Army Supply and Transport Corps. He returned home on leave last December from active service in East Persia, where he had been Assistant Director of Supply and Transport on an 800-mile line of communication over deserts and mountains and many difficult places. He contracted there the illness from which he died. He served in the Tirah and Tibet expeditions in 1897 and 1904, and the Abor Expedition of 1911. In East Persia he was on active service for two years and was awarded the C.I.E. He was known under the *nom de plume* of "Powell Millington" as a writer of stories of life in India. He wrote "To Lhassa at Last," "On the Track of the Abor," and other books. For the Indian Government he wrote officially on economics and subjects helpful to the S. and T. Corps.

Major-General Henry Blackwood MacCall died last week after a long illness. He was born in 1845, and entered the Army in 1864. He commanded the 1st Battalion of the King's Royal Rifle Corps in the Isazia Expedition in 1892, and also served with the Chitral Relief Force in 1895, where his work earned him a mention in despatches and the C.B. He was afterwards D.A.G. of the Punjab Forces and of a Second Class District in India, and was given the command of a division in 1915.

Lady Collins, widow of Sir Arthur Collins, K.C., late Chief Justice of Madras, died suddenly on July 20. at 83, Madrid-road, Barnes.

Our Belgrade Correspondent writes :—An interestin veteran champion of the Yugoslav idea has recently passed away at Dubrovnik in the person of Dr. Pero Chingria, in the 84th year of his age. Always a prominent townsman, he has persistently declined to accept any Austrian decorations. He always looked to the eventual union, and prayed that he might live to see it. He is closely associated with the movement for the collaboration of Croats and Serbs. He was for many years prefect of his native town, Dubrovnik, the beautiful, and maintained a perfectly correct attitude even during the difficult days of the war. The break up of Austria rejuvenated him, and he assumed the chairmanship of the National Council and was rewarded by seeing the arrival of victorious Serbian troops at Dubrovnik in 1918. Finally, to crown his lifelong refusal of decorations from Vienna, he accepted with gratitude and enthusiasm the Order of St. Sava from the Regent, which was a token of recognition of his life's struggle for the cause of Yugoslavia.

Our Zagreb Correspondent writes :—The following have been appointed as viceroys, in place of the former local governors and Ban, respectively in Liubliana, Serajevo and Zagreb. At Liubliana, M. Ivan Hribar, hitherto Minister at Prague, at Serajevo, M. Giurgevitch, and at Zagreb, M. Juraj Demetrovitch.

M. Pantscho Doreff has taken up his duties as Counsellor to the Bulgarian Legation in London.

SCHOOL OF ORIENTAL STUDIES.
London Institution, Finsbury Circus; E.C. 2

**ORIENTAL LANGUAGES AND RELIGIONS.**

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

## THE STATUS OF EGYPT.

When a year ago an agreement was reached between an Egyptian Delegation and Lord Milner's Mission regarding the outlines of a policy for the settlement of the Egyptian question, it was confidently hoped that the work of drafting the treaty that it was then proposed should define the relations between Great Britain and Egypt would prove comparatively simple and straightforward. Much, however, has happened in Egypt since August 1920. Strictly speaking the memorandum to which both parties gave their assent in London has been annulled by the action of Zaghloul Pasha, who has broken his undertaking to support the policy therein outlined. But the good sense of the more enlightened section of Egyptian public opinion has prevailed against the unbalanced egotism of Zaghloul Pasha, and a Government Mission under the Prime Minister, Adly Yeghen Pasha, has arrived in England to negotiate the treaty that is to be the charter of Egypt's independence and to formulate the terms of her alliance with Great Britain. Partly as a result of the action of the Egyptian extremists and partly owing to the further consideration that has been given to the subject in both countries, not only has some of the old ground traversed in last year's discussion to be covered again, but fresh points have arisen. In a sense, therefore, the negotiations start *de novo*, but under a distinct indebtedness to Lord Milner inasmuch as both sides are convinced that complete agreement can and must be reached, and they can lay all their cards on the table in the knowledge that neither has any interest in disguising from the other the difficulties lying in the way of an agreement.

The British and Egyptian points of view, while in no particular antagonistic, are sufficiently wide apart to render protracted negotiations necessary, the more so as the present time finds the British Government occupied with other important matters—the Irish negotiations, the Near Eastern situation, and the Imperial Conference. It is to be hoped, therefore, that in spite of the advanced season of the year both parties will equip themselves with a large stock of patience, while actuated by a desire to draft a detailed agreement with all possible despatch. On the Egyptian side the questions that exercise the minds of Adly Pasha's delegation are: (1) the precise formula which will reconcile Egypt's independence with the special relations binding her to Great Britain both in her own interests and for the sake of British interests; (2) the maintenance of a British military force on Egyptian soil; (3) the powers of the British Financial and Judicial Advisers; (4) Egypt's relationship to the Sudan in view of her dependence on the Nile with its head waters and irrigation works controlled in the Sudan. The attitude of the Egyptian extremists is simple, but it is entirely impossible. They stand for an independence which would not admit Great Britain's peculiar relationship to Egypt, they would have all British troops removed at once, the British Financial and Judicial Advisers, if tolerated at all, would be reduced to more figure-heads, and they would like to see the Sudan administered from Cairo as a province of Egypt. The main difficulty of the Egyptian Delegation now in London arises from the fact that it does not feel strong enough to ignore the extremists altogether; it still hopes to find a solution that will meet to the extent of silencing, if not actually placating, the noisy adherents of Zaghloul Pasha. No doubt, the position of the Egyptian Government is a difficult one, but sooner or later it must decide whether there is any possibility of bridging the gap that divides the political intelligence for which it stands, and on which the future of Egypt must rely, from the folly and irresponsibility characterising the group now associated with the name of Zaghloul Pasha. We are inclined to think that the extremist and the moderate points of view are irreconcilable, and that the only goal which Adly Pasha's Delegation should aim at is to secure the terms which are demonstrably in the lasting interests of Egypt, no matter what views Zaghloul Pasha's faction may express. If a trial of strength has to take place, the sooner it is over the better. Adly Pasha's position has been materially strengthened of late, and the courageous defence of a treaty which offers a reasonable safeguard for Egypt's real interests could not fail to win him further support. One thing is certain, the stronger an Egyptian Prime Minister shows himself in advocating the right course and in opposing clamour on behalf of a wrong policy, the better the terms—from his point of view—that he is likely to secure from the British Government.

There are no subtle reservations in Great Britain's policy towards Egypt. She takes her stand on a number of clearly enunciated postulates: that Egypt must remain a strong link in the chain of her Imperial communications, that the British obligation to safeguard the lives, property, and interests of foreigners in the country must be honoured, and that two generations of British achievement in the country shall not be undone at this stage by the deliberate throwing of Egyptian affairs into the melting-pot. Great Britain is actuated by a keen desire for peaceful and friendly relations with Egypt, and she has no wish for any form of interference with the independence of the country that is unconnected with those three postulates. If the first is held to clash with complete independence, Egypt must reconcile herself to the encroachment; and she can rest assured that the more readily she accepts such restrictions as may be considered necessary the less she will feel them. The second and third postulates are entirely relative to Egypt's own capacity for self-government. It is of no use to claim, as the extremists do, that the whole art of self-government has been mastered in a day by the Egyptians. There is no proof in support of the statement, and the indications are all against its accuracy. On the other hand, the capacity for self government can be acquired and perfected only by practice. The recognition of this fact was the basis of the "Milner Agreement." It is just as stupid on the part of the Zaghloulists to insist upon the withdrawal of the British troops before Egypt has an adequate force of her own to take their place as it is to require that every British official should be withdrawn at once from the Egyptian Administration. Given the necessary good will on each side—we contend that it exists to the full on the British side—it should be a matter of a few years only before Egypt is able to gratify her aspirations. The whole trend of British thought points that way, and Egypt has but to prove herself capable of managing her own affairs. It matters not that Great Britain may seem to-day the sole arbiter of the Egyptians' future achievements; when the time comes they will be able to appeal to a larger tribunal. In regard to a British garrison it is natural that Great Britain should wish to be on the safe side; but there is no reason why the question should not be reviewed after, say, three years. On the subject of the Sudan the Egyptians must accustom themselves to the fact that their only safeguard lies in the community of interests between Great Britain and Egypt. On the day when they decide to antagonise their Ally they will have started to dig their own graves and the dry bed of the Nile will prove as convenient for a cemetery as any other spot. But there is no need for that day ever to arrive.. Good sense and statesmanship can evolve a Treaty of Alliance satisfactory to both countries.

## FROM AN ADRIATIC DIARY.

*By William Ransted Berry.*

(Conclusion)

Bari, Feb. 17.

The captain is right; his melancholy justified.

We are one of but three ships tied up inside the breakwater, and their combined discharge of cargo could be carried in a Thames wherry. On the other hand, I personally felt encouraged when I saw about fifty barrels being put aboard the Dalmatia, for here at least, I thought, was a straw to show how the wind was coming up in the olive oil trade. Not so the captain. His eyes grew stony as he watched a barrel bounce light-heartedly on the floor of the hold. "Empty!" he snorted, and strode away to some far place where, like Achilles in his tent, he sulked what time winches rattled and barrels bounced.

A diverting accompaniment to the process of coaxing the Dalmatia to consent to be laid alongside the breakwater was provided by the evolutions of what appeared to be a boy's nautical school very much at sea in a many-oared barge or whale boat. There was a bearded man at the helm, evidently the instructor, and some ten boys having each an oar, which alternately smote them in the chest when they failed to catch the water—there was quite a little sea—or became entangled with other oars flourished by their owners through an angle of forty-five degrees. But it was not so much the seamanship of the school that intrigued me as it was its faculty of being always where it was not wanted. Did we move forward; the school escaped being cut in two by a hair's breadth. Did we go astern; as by a miracle the school darted from underneath the rudder and was helplessly swept away in the eddying backrush from the screw. Did a hawser suddenly sag; the school was under it and struggled with its dripping coils as do Laocoon and his two sons with clinging serpents; or did we draw close to the quay, broadside on; there was the school waiting to be crushed like an egg-shell, and shot to safety, it seemed, only by the driving quality of our captain's voice. And during these manoeuvres picture the instructor, standing in the stern, bland and eloquent, pointing out the meaning of each movement as we made it, describing every plate and barnacle as his gunwale ground against our iron side, oblivious quite of such a minor theme as danger and as unaware of the leather lungs of our entire company as if he had been deaf—which perhaps he was.

At dinner the captain was a different man. No grig could have looked happier than he when he thrust under my nose a local newspaper and bade me read what Bari had in store for us—which I could not with any proper understanding, for "that soft bastard tongue" which Byron described as "writ on satin," is almost stilled and meaningless to me. Yet I gathered that opera was toward, and thither we went, three ship's officers and I in a bucaneering victoria of the "cruiser" type, lurching over the ill-paved streets of Bari old-town like a Flying Dutchman in half a gale of wind.

The old town looked indeed very old. In fact, judging by its smell I thought it might be dead. But there was considerable movement in its narrow antique streets, and fish stalls all aglow with petrol flares—a reminder of Horace's remark that this is the part of the Adriatic where fish do most abound—were preparing to furnish after-theatre suppers to the patrons of hole-in-the-wall kinemas.

Bari new town is, of course, a horse of quite another colour. Broad boulevards and any amount of plate glass indicate the modern taste, as does a white and surprisingly large opera house which confronted us with enormous placards announcing "Il Forsa del Destino." Hereupon the captain's eyes glittered as with the light of madness. He clutched our arms, as many as he could, and proclaimed that forthwith we would take a box—"and devil take expense, Sapristi!" And so indeed it fell out. But not quite at once, for there is a quaint Italian custom whereby the opera or theatre-goer first buys a ticket of admission at the box office and then, and only then, may purchase from an individual stationed in the lobby the reserved seat he prefers. The system is cumbersome and most annoying if there is a crowd, but—"it has always been the custom, signor, so," with a shrug and snapping fingers, "what would you?"

My recollections of the opera remain somewhat confused by certain features furnished gratis by the audience and others, yet I remember that the orchestra was excellent, the *prima donna* and chorus good, but that the tenor was almost inarticulate in a piping crow like escaping steam. I cannot but remember too that every important aria was punctuated by stentorian "bravas" or fierce hissing demands for silence; that infants in arms were constantly crying or receiving nourishment in various parts of the house; that the prompter's voice was often considerably stronger than the singer's; that a telephone in a stage box rang intermittently or was spoken into by a portly gentleman whose voice could be distinctly heard above the music, and finally, that a stage setting representing the rural encampment of an army was well accepted by the audience in spite of two gigantic marble columns and a portion of the cieling of a great hall which remained inadvertently in the foreground as a legacy from a previous scene.

## WATERS OF BABYLON.

*By "Majnun."*

All day there had been a strong wind blowing from the north; the palm-trees rippled and shuddered and turned their heads from the whistling gusts, while fleecy clouds shot up over the horizon to race madly across the sky, flinging icy showers at the earth. But at last the storm blew itself out, in that backwater of day between afternoon and evening, and a peace, which at first seemed very still and voiceless after the rushing wind, fell upon desert and river. The water, no longer slashing at the banks, glided smoothly and untroubled, deep green in the shadows where the reeds trembled against the blue sky, and in midstream sunlit and sparkling.

Under such conditions the river is really beautiful. These are "The waters of Babylon, where we sat down and wept"; is it possible to believe that the saddest and most beautiful of all exiles' songs, with its slow and solemn cadences of thought, can have been conceived beside some rushing, wind-tortured stream? Rather it was on some such evening as this when peace after the storm, sunlight after rain, and a calm restored to the world, bring to the mind of man quiet associations of their own. And if he be an exile, they will cause him to remember all that he holds most dear.

Here the peace which had seemed voiceless after the storm found expression in small sounds hardly distinguishable from stillness, and not disturbing; gradually they made themselves heard as the voice, the words of Peace itself.

Up in a palm tree a dove fluttered and that glint of grey feathers roused me to the gentle cooing which sounded from the surrounding trees; a rook hopping stiffly along the bank brought to my ears the far off cawing of his brothers who flew high over head. Other sounds unravelled themselves from the silence—the "plop" of diving kingfishers, the miniature rush and flutter as the hawking swallows turned short over the water, and then another sound and sight—those missing words from the sentence which the voice had been striving to complete. For under the bank, ten yards upstream, a widening ring spread on the calm water and the sound of a satisfied gulp reached my ears, then another and another. The fish were rising.

As if by magic the alien palm-trees vanished. There remained the cawing of the rooks, the doves' croon, the swallows wheeling above clear water, and the ripple and gulp of the feeding fish. The sentence was complete,—"Maytime in England."

Some evenings later, when it had grown too dark to see anything of the river, except the dazzling reflection of the stars, I reeled up and turned back to camp very grateful to some little silver fish that had done more than give an evening's sport. For they had brought memories of green fields, deep with buttercups and evenings full of the scent of may. Memories of taut lines and the rush of good trout, of joys and disappointments, and of stories told in the back room of a little Cotswold Inn over beef and beer, by the light of an English sunset. And that counted for much besides the Waters of Babylon.

## NEAR EAST IN PARLIAMENT.

### House of Commons.

July 18.—The Prime Minister informed Viscount Curzon that information had been received that Afium-Karahissar had been occupied by the Greek Army.

Mr. Harmsworth informed Mr. Mills that the Egyptian Government had exiled Prince Aziz Hassan, as they considered it necessary in the interests of public security in view of the leading part he had been taking in mischievous political agitation.

July 19.—Mr. Montagu informed Sir J. D. Rees that the recent disturbances at Aligarh (the seat of the principal Mohammedan Univerity in India) arose out of the trial of a political agitator named Malkham Singh. It would appear quite clear that attacks in the city were directed mainly against the Indian police. No attacks were made on the houses of Europeans; one constable was killed and three dangerously wounded. It is not clear whether any rioters were killed, but a number was wounded. The Mohammedan University was not affected, and so far as is known, no students took part in the disturbances.

Major Steel asked the Secretary of State for the Colonies what was the population of Bethlehem and how many of the inhabitants have emigrated during the past 10 years; and whether any who have emigrated during that period have returned? Mr. Wood replied that the population of Bethlehem is believed to be about 14,000. During the past 10 years about 4,500 persons emigrated from that place and only 393 returned to it. During the last two years the figures are 245 emigrated, 35 returned and 185 emigrated, 65 returned.

In answer to further questions by Major Steel, Mr. Wood stated that there are three official languages in Palestine, English, Arabic and Hebrew. The knowledge of Hebrew is not a necessary qualification for employment in the Government service. The total number of Government officials and servants in Palestine is 2,571, of whom 1,338 are Christians, 719 Moslems, and 514 Jews.

July 20.—Mr. Swan asked the Under Secretary for Foreign affairs whether 2,250,000 of the inhabitants of Egypt have signed declarations in support of the policy of Zaghloul Pasha, and if so, whether His Majesty's Government proposes to continue negotiations in regard to the future of Egypt with the delegation under Adly Pasha. Mr. Harmsworth replied he had no such information; on the other hand a member of the Egyptian Legislative Assembly in a letter published in the local press has pointed out that while the total population of Egypt is 14,000,000 over 17,500,000 signatures purporting to be those of adult males have already been affixed to declaration of confidence or lack of confidence in the Ministry of Adly Pasha. The reply to the latter part of the question is in the affirmative.

Colonel Nall asked the Secretary of State for war what is the size of the garrison in Palestine. Sir L. Worthington Evans replied that the strength of the garrison in Palestine on June 30 was approximately 7,200. This figure does not include Egyptian troops temporarily employed on works, police, and transport duties, and Indian followers (who are not generally classed troops). The estimated cost of the garrison is now at the rate of about £2,500,000 a year, exclusive of any expenditure in respect of capital works services

July 21.—Sir Robert Horne informed Mr. Alfred T. Davies that the total military expenditure incurred by the British Exchequer in respect of Persia between April 1, 1918, and March 31, 1921, is estimated at £39,000,000, but the final incidence of tnis expenditure as between Army votes and Indian funds is still under discussion. Expenditure in Persia other than military during the same period incurred by the British Foreign Office and the Indian Government amounts approximately to £6,500,000 and £6,000,000 respectively, but certain comparatively minor adjustments as between Foreign Office and Indian Funds in respect of this expenditure remain to be made. The total sum, therefore, spent in Persia during the last three years is £51,500,000.

## JEWS IN FAR-OFF LANDS.

"Jews in Far-Off Lands" was the subject of a very interesting descriptive lecture given by Mr. Israel Cohen on July 19 at the South Place Institute, Moorfields, narrating his recent travels in the East on behalf of the Zionist movement. The lecture, which was illustrated by lantern slides prepared from photographs taken by the lecturer on his tour through Palestine, India, Australia, New Zealand, China, Manchuria, Japan, the Phillipines Straits Settlements and Japan, was given under the auspices of the English Zionist Federation in aid of its Propaganda Fund.

# COMMERCIAL & FINANCIAL SECTION.

## NOTES AND NEWS.

Devonshire Square,
London, E.C 2

**Trade with Roumania.**

It is a difficult task in these days to persuade some British firms that trade with the Near East is worth their attention so long as abnormal conditions continue. I hope that those who are of this opinion will take careful note of Viscount Goschen's remarks at the annual meeting of the British-Roumanian Chamber of Commerce. Pointing to the fact that British trade with Roumania during the past year had been much greater than in previous years despite exchange fluctuations, the disorganisation of transport, and falling prices in this country he stated that Roumania had clearly shown during this period of depression that she has a great capacity for absorbing our goods. He was further able to make the encouraging statement that payments had been on a considerable scale, and generally speaking had been made in a satisfactory manner.

**The Export Credits Scheme.**

It is satisfactory to know that increasing use of the export credits scheme is being made in connection with business with Roumania. In the most favourable circumstances a long time must elapse before the leu is established at a level which will permit of normal trade, and without the use of this medium it would be out of the question to look for that development of our commercial relations with Roumania which is to be desired in the interests of both countries. Viscount Goschen was very hopeful as to the immediate outlook. Marked progress has been made in the re-organisation of transport, the large stocks of merchandise are being liquidated, and the harvest prospects are excellent. It is estimated, I understand, that there will be a large surplus available for export, and that, of course, will react on the exchange, an improvement in which will bring about a renewal of buying.

**Yugoslav Currency Regulations.**

Further alterations are made in the Yugoslav currency regulations by a recently issued decree which provides that the import and transit of coin and paper currency is free though the Ministry of Finance reserves the right to prohibit the entry of certain currencies and to regulate the transit of currency. The export of gold and silver coin and of more than 2,000 dinars and of dollars is prohibited. Only authorised banking establishments may sell exchange, and the buyer must guarantee to import within six months goods to the value of the exchange purchased from the country whose exchange has been purchased. Where foreign exchange is required for personal needs authorised banks may sell up to the value of 2,000 French francs without a permit. The State reserves to itself the right to buy from exporters, through the National Bank up to one-third of the amount of foreign exchange acquired in payment for exports.

**Egyptian Cotton Freights.—**

If the attitude taken up by the United States over the Mescpotamia oilfields was absurd what can be said of the controversy now going on with regard to the shipment of the Egyptian cotton crop? As is well-known, a contract is made each year by the exporters for the shipment of the cotton to the United Kingdom and America, one of the conditions being that freightage must be available at regular intervals. Up to the present time the contract has always been obtained by the Liverpool Conference Lines, which alone have had regular services from Alexandria to the United Kingdom and America. Last year however, the United States Shipping Board, having extended its services to the Mediterranean, requested permission to tender, but its tender was higher than that of the Liverpool Conference Lines. Now no one objects to competition on normal lines, and if the American Shipping Board had followed its early policy there could have been no ground for complaint. But that is not what happened.

**—and the U.S. Shipping Board.**

This year a combined tender and also separate tenders to the two countries were asked for by the Alexandria General Produce Association, which deals with the contract, and again the Shipping Board was a competitor. The Liverpool Conference Lines quoted 60s. and 40s. to the United States, and the United Kingdom respectively, the rates to apply as regards the unexpired part of the old contract, while the Shipping Board's quotations were 40s. and 25s. As it was impossible to compare these contracts, the Liverpool Conference Lines were asked to tender again, and they quoted 40s. and 30s. The Association recommended that this tender should be accepted, and a day after they had taken this step a further tender arrived from the Shipping Board of 35s. to the United States, but by the time this had been received 90 per cent. of the exporters had accepted the Liverpool Conference Lines' tender.

**The American Attitude.**

The Shipping Board found occasion for a number of complaints. They urged that their second offer should have been waited for, they alleged undue pressure to make the exporters accept the Liverpool Lines offer, and they further complained that there was an unfair clause in the agreement made between the agents of the Liverpool Lines and the exporters. Naturally they obtained no satisfaction, and the next step was the

intimation that if the contract stood the Jones Act would be put into force by the United States Government, enabling the refusal of the right of entry to American ports of any ship or ships. The position now is that the matter is being dealt with between the Foreign Office and Washington.

### Method or Opportunism.

In the case of the Mesopotamian oilfields it was possible to make the excuse for the United States that the position was not clearly grasped, but as regards the cotton freights no such interpretation is feasible, and one is left to the painful conclusion that there is a movement in America literally to seize trade by any expedients that present themselves. What do we find in this instance? An American combine is beaten in an open tender, and forthwith invokes the aid of its Government. Now the adjudication was made by a body which numbers but few English representatives among its members, and the 5s. difference between the tenders is far more than accounted for by the additional charges that would be entailed in the use of American ships in respect of insurance, dock facilities, etc. Where then was the Americans' grievance? Painful as it is to us the controversy has its humorous side. Had they secured the contract the Americans could scarcely have carried it out!

### The Constantinople Market.

The present position at Constantinople is described this week by our Correspondent, and from what he says it will be seen that things could hardly be worse there than they are. Commerce in the sense that it is generally understood is so precarious that it is almost out of the question, and merchants have even taken to dealing in exchange as a less hazardous method of earning a livelihood! As our Correspondent points out, it is hopeless to look for any improvement until Constantinople regains access to its markets, and unless that takes place soon it is to be feared that the results must be very serious since as a result of the prolonged and unprecedented depression even some of the more substantial houses are beginning to be affected.

### Bank of British West Africa.

At the general meeting of the Bank of British West Africa, the chairman, Lord Selborne, dealt at some length with the difficult trade conditions experienced in 1920. As I pointed out last week the effects of the trade depression have been particularly severe in the regions covered by this bank, and it is not surprising that the result should have been considerable embarrassment among the small traders. It is satisfactory to note Lord Selborne's view that the worst has been passed. He refused to prophesy regarding the future, pointing out that many factors have to be reckoned with, including not only the inevitable depression following the artificial prosperity which succeeded any war, but the slow restarting of the international machinery of credit and transport. We had yet to see, added Lord Selborne, real peace established throughout Europe, and at home a better understanding between classes whose real permanent interests were identical and not separate. Where these objects were attained we should see international trade once more established upon sound lines.

COMMENTATOR.

## COTTON & COTTON GOODS.

### Manchester Report.

(From our own Correspondent).

Manchester, Saturday.

We have experienced a quiet week and there has been a noticeable falling off in cloth inquiry with regard to India. The prospects of the market are exceedingly bright and there is every evidence that a period of renewed activity will shortly commence. In the cloth section no special feature has presented itself in connection with Egypt and the other outlets of the Mediterranean and only day to day buying has taken place Recent advices from Egypt however are a little more favourable. With regard to Egyptian yarn, prices for finer qualities have remained steady, but there has been a tendency for quotations for the lower counts to ease slightly. The spinning mills are now running full time and as the offtake in yarns has only been comparatively small it is only reasonable that spinners should give a little ground. Cloth inquiry for India has not been at all satisfactory and only occasional sales have taken place. Bids for China have been better but there is yet a lot of leeway to be made up. Recent reports received from that outlet show that stocks are gradually being liquidated. Encouraging sales in a variety of goods have taken place for Java and Singapore. The rate of exchange is decidedly against any developments in trade with South America. Users of American yarns have only bought sparingly, but prices on the whole have been fairly steady.

### Textile Machinery in Demand.

Lancashire makers of textile machinery continue to experience a keen demand for their products, chiefly from firms in India, although buyers in France and Japan have booked extensive contracts as well. The official statistics of exports from the United Kingdom of textile machinery show that for the first half of 1913 the shipments from this country amounted to 88,082 tons, and the figure for the first six months of this year is 79,202 tons, equal to 90 per cent of the 1913 half-yearly total. The exports of cotton yarns and piece goods for the first half of this year, so far as quantities are concerned, are only about 48 per cent., and 34 per cent. respectively of the totals for the first half of 1913.

### LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended July 21 :—.

The improved enquiry has been well maintained during the past week, and once again it has been of a general character, practically all Egyptian growths having claimed their share of attention at one time or another. Prices here and there have become somewhat irregular, and one is being constantly surprised by the cheap cotton which is on offer here. On the other hand, the recent sharp rise in the Alexandria futures market proved detrimental to those brokers whose stocks of cotton were based on that market, and prevented them from making any headway. The majority of spinners are working just now on a very narrow margin—some on no margin at all—and under the circumstances it is folly to expect them to rush in and support prices (as many people seem to do) every time the Alexandria market gives way to an hysterical outburst. The whole truth of the matter is that the spinner of this year is working for his bare bread-and-butter, and he cannot afford to pay fancy prices for his cotton when he knows that he may quite likely have to sell his yarns at a loss. It is an open secret that many spinners, finding the cost of their accustomed marks to be prohibitive, are looking in the open market for cheap outsiders, which can be "mixed in," and so reduce the cost of production The spinner is being forced to experiment and these experiments may well produce far-reaching results. It is surely a phase worth considering. Business in Manchester, whilst steady, seems slow in maturing and in certain quarters a fear is expressed that the Egyptian mills will run to over-production now that short time restrictions have been removed. Be that as it may, there certainly is more doing and a healthier tone is apparent all round. Rather more c.i.f. business has taken place. Quotations of Sakellaridis, good and above are reduced 50 points; those of upper, fair to good, are raised 50 points, and all quotations of brown are raised 50 points on the week. Sales, 1,700 (including 70 bales Sudan) Fully good fair Sakel, 16,50d.

Attempts are being made to improve the varieties of grape now grown in Ceylon, and to increase the acreage under viticulture.

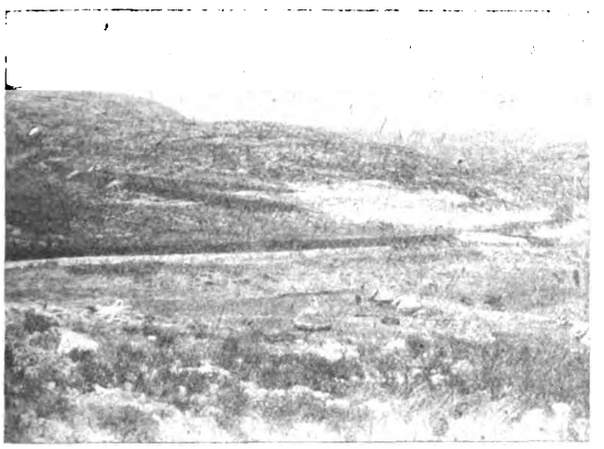
## THE PALESTINE RAILWAYS.

### Kantara—Haifa—Jerusalem.

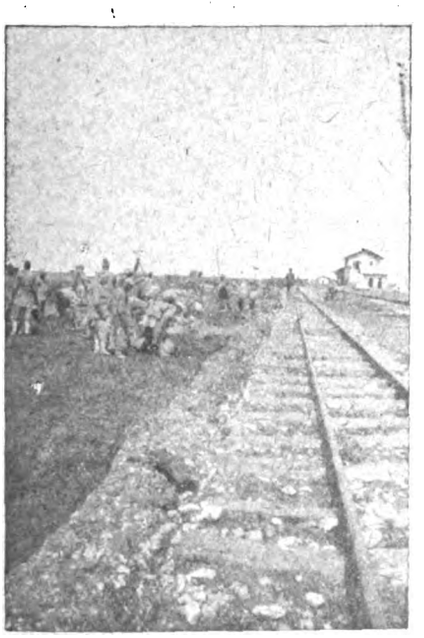
A correspondent sends us the following notes and photographs in connection with the Palestine railways:—

The history of the Palestine Railway—broad gauge from Kantara on the Suez Canal to Haifa and Jerusalem—is rather interesting especially to those contemplating business relations with Syria and Palestine, and the Near East Ports. The early part of 1916 saw the Egyptian Expeditionary Force about to embark upon an expedition with only crude means of transport—camels—a very few at that, and it was decided with the co-operation of the Egyptian State Railways, and the Railway Operative Division (R.O.D. R.E.) to build a railway to feed the force and maintain its supply column.



A station formation completed on the side of a hill.

With the assistance of the Egyptian Army Redeifs—(Reservists) the Egyptian Labour Corps, and the R.O.D. R.E. a start was made from Kantara in March, 1916. Sleepers, rails, and material of all kinds with rolling stock were imported from all parts, and by July 1916 Romani was reached, 40 kilos away, and the railhead was formed for the battle of Romani. All excavations were made by the Labour Corps and rail laying and maintenance was carried out by the Egyptian Army and R.E.'s.

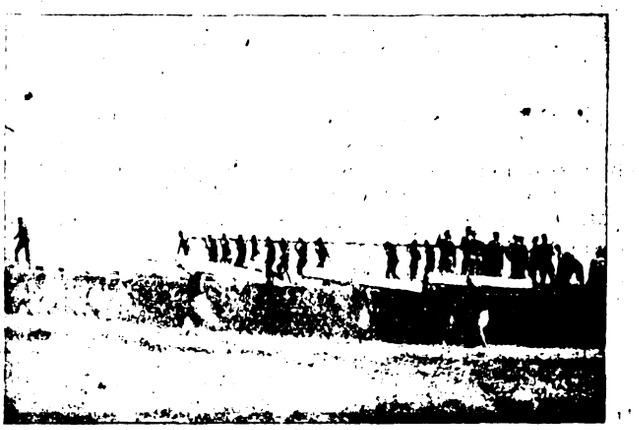


Laying sleepers and rails.

From Romani to El Arish and Rafa few difficulties were encountered, and the work was carried out at a good pace, Rafa being reached by February, 1917 (201 kilos)—practically 126 miles of formation made, and rails laid in less than a year. It was really good work considering that a stay of a month was made at Romani, and of a fortnight at El Arish. Rafa was made a junction, and a branch line was run out to Shellal, and on to Beersheba, and the main line was continued to Belah on the coast.

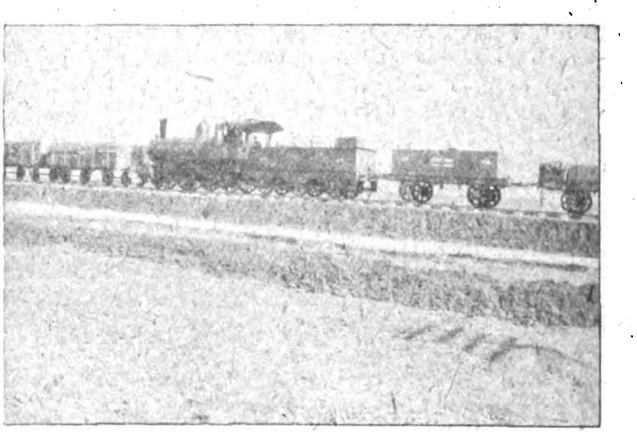
At Belah a base was made from which to carry out operations against Gaza, and a dummy station made at the Wadi Guzzi. The earthwork party then returned to Kantara, and started on maintenance and packing, and on the commencement of the double track. By October, 1917, this was completed, and the line doubled to Rafa.

Following the battle of Gaza in November, the line in single track was carried on without delay to Ludd, 302 (kilos), where a large station was built, and marshalling sidings and depots were constructed. From Ludd a further branch line was started to Jerusalem via the Junction Station and the old Turkish track from



Gang of Native Labourers.

Jaffa to Jerusalem. The old Turkish track from Jaffa to the Junction Station and thence to Beersheba was reconstructed, and the Turkish Narrow Gauge to Tul Keram was put in order, the broad gauge line being carried on to Wilhelm—a Jewish and German farming village. From just north of Ludd a small narrow gauge line was carried out to Rentis and the Hills, and a further narrow gauge from Jerusalem to just below Nablous. Following General Allenby's last big push, the broad gauge was carried on to Tul Keram, and then coastwards to Ceasarea and Haifa (364 Kilos); and the Turkish line to Nablous, Afule, Haifa, Beisan, and Semakh was repaired and in some places practically relaid. From this short *resumé* it will be seen that Palestine is fairly well supplied with railways. The formation



A Goods Train.

from Kantara to Gaza except from Belah and the Wadi Guzzi, is practically sandy soil, and produces next to nothing except isolated date palms, and a few water melons. From the Wadi Guzzi the soils are mostly good black earth covered in some places with a fine layer of sand, which rather seems to enhance the producing properties of the earth. Good crops are general, and with modern farming machinery and more Jewish colonies, Palestine should soon rank amongst the richest of the world's producers, instead of merely providing enough for its own needs.

# Commerce and Industry.

REPORTS FROM OUR OWN CORRESPONDENTS.

## GREECE.

ATHENS, July 2.

**Miscellaneous.**

A telegram has been received from Rethymo, Crete, stating that the heavy rains which fell recently caused much damage to the vines in that region.

The inspector of agriculture in the province of Arcadia has reported to the Ministry of Agriculture that owing to the continuous cold weather prevailing there the gathering of fruit will be delayed.

Much attention has been paid lately to silkworm rearing in Thrace, and the quality of this year's cocoons is said to be very fair. It is estimated that the number of cocoons produced in the whole of Thrace this year will reach 600,000 kilograms which should realise a price of about 8 drachmae per kilo.

Athens, July 12.

**Imports of Timber.**

Very large quantities of timber for building purposes have been imported into Greece since the Armistice in view of the construction of many new buildings by the numerous persons who have made big fortunes during the war, and who have now come to the conclusion that the best way to invest their money is by building houses with it.

Whereas prior to to the war Greece imported all her timber from Austria, Roumania, Sweden and, in small quantities, from Turkey, during and after the war many orders were placed in the United States of America. The quantity of timber imported from America during 1920 represented one-eighth of the total imports. Since December last, however, imports of timber from the United States have diminished to some extent owing to the high rate of exchange. Importers of timber in Athens are of the opinion that very large quantities will be required in this country in the near future for building purposes. Recent statistics show that during 1920 only 1,700 houses were constructed in Athens, whilst it is estimated that the number of new houses during the current year will exceed 2,000. These figures do not nearly represent the actual needs of the Greek capital which in view of its continually increasing population (at present over 300,000) requires at least 5,000 new houses every year.

In 1920 100,000 cubic metres of timber were imported from America, Sweden, and Roumania. Importers much prefer the American pitch pine wood and the Swedish fir wood to the Roumanian timber which is considered inferior. No Austrian timber has been imported lately owing to its high price. Whereas prices in America and Sweden have been reduced considerably of late, Austrian timber continues to be unattainable.

Prices of timber c.i.f. Piraeus are to-day as follows:—American (pitch pine) about 800 drachmae per cubic metre. Roumanian timber (fir and pine), 320-380 drachmae per cubic metre. Swedish timber 400-420 drachmae per cubic metre. Small quantities of timber are also imported from Yugoslavia at a price of 300-320-380 drachmae per cubic metre. The net profit of the Greek timber importers on the above prices is estimated at about 15-20 per cent. It should be pointed out that there are large stocks of Swedish timber on the Greek market at present, but this was considered insufficient in view of the numerous new buildings which, it is anticipated, will be erected in the near future.

**Discovery of Petrol.**

Well boring operations which have taken place in many parts of the country have revealed the presence of petrol in considerable quantities. In Epirus, near the village of Dragopsas, at a distance of a few kilometres from Janina, the petrol found is reported to be plentiful. Wells are being bored in that district by the "Syndicat Franco-Hellenique des Petroles" under the direction of M. Nicolescu, a mining engineer. This syndicate, whose central office is in Paris, intends extending its activities to Aetolia, Acarnania, and the Peloponnesus. Petrol has also been found in the island of Zante where oil drilling operations have been carried out for some time by an American Company.

**Miscellaneous.**

The Greek Legation at Washington has telegraphed to the Ministry of National Economy that the stocks of Greek tobacco in the United States amount to about 45,000;000 lb.

A telegram from Kavalla states that the recent rains which fell in that region have caused serious damage to the tobacco plantations.

It is estimated that this year's production of Calamata figs will only be about 8 million okes as against 13 million okes last year.

The Ministry of Agriculture has informed the Greek Chamber of Commerce in Athens that this year's production of silk will reach 108 tons.

## BULGARIA.

Sofia, July 1.

**Fluctuations of the Leva.**

The leva has fallen very heavily since the beginning of the month, and for a short time on Saturday the 9th, the rate for the £1 was over 600. It rose somewhat later in the day, and at the time of writing is about 485. Almost all foreign currencies have appreciated, and naturally enough there is consternation in financial circles, and external trade is at a standstill.

The reasons for this sudden fall are numerous, but the chief are the fears of the general public regarding the confiscatory legislation of the Government with the resulting purchase of foreign money, and secondly the disquieting rumours afloat concerning Bulgarian intrigues abroad. Speculation also plays a large part, as does the raising of the Moratorium.

**Inter-Allied Commission's Action.**

With the object of arresting the fall of the leva, the Inter-Allied Commission have made strong representations to the Bulgarian Government that it is essential that the export of all cereals should be carried on on a basis of free trade. This would entail the virtual abolition of the grain consortium. At a time like the present, strong measures must be taken, and there are reasons to believe that this action on the part of the Commission will be well received by the majority of clear thinking people. It is not yet known what the reply of the Government will be, and as the Sobranje has been closed until September 1, it may be necessary to convoke a special

Digitized by Google

session so that the law for the export of cereals may be revised. No one wants the leva to fall to the level of the Austrian krone; but in order to avoid this the country must export. Every encouragement must be given to the peasant so that he may sell his produce to the merchant who in his turn must receive full support from the Government so that he may at once dispose of his stocks abroad. In addition to requesting the Government to abolish the monopoly which was engaged by the Consortium, it is understood that the Commission advised that "Article 4" should be modified, and that the proposed legislation affecting capital and property should not be put into force for two years. If the Government accede to the request, important progress will have been made in the economic restoration of the country, and the Government themselves will have gained rather than lost ground in the eyes of everyone.

## ROUMANIA.

Bucharest, July 21.

**Financial Measures.**

The Senate passed this week the first part of M. Titulescu's financial scheme, that providing for direct contributions and progressive income tax. The second part of the scheme, the progressive taxation of capital and war profits is being discussed; it will, no doubt, be passed in due course next week. Its outstanding feature is the progressive taxation up to 65 per cent of war profits, and up to 91 per cent of the fortunes made by public officials since the war. Under the first part of the scheme banks and all limited liability companies that have been in existence since 1909 (five years before 1914) will pay 12½ per cent. of their capital and accumulated reserves up till July 1, 1921; those with a shorter existence will pay ten per cent. If the whole tax is not paid in ready cash, then, either bills for 10,000 lei each, maturing successively within the ensuing ten years, bearing 7 per cent interest per annum, or shares of the respective companies to the amount of the eighth part of their capital, will be accepted.

Foreign companies will pay the whole taxation in ready money, their capital being reckoned as the fifth part of all sums involved in their transactions in this country.

**The New Tariff Regulations.**

The new Tariff came into force on July 3. It will be applied to the former enemy States, whose commercial conventions have lapsed, as well as to France and Italy whose agreements have in the meantime been denounced.

The agreements with England and Belgium remain in force until April 19, 1922, and up to the same date the most favoured nation clause will be applied also to Holland, Switzerland, Yugoslavia, Spain, Sweden, Norway, and the United States. As to Czechoslovakia, and Poland, the recently concluded conventions will come into effect as soon as they are ratified by the respective countries.

The manufacturers of cotton, linen, and hemp goods have addressed a petition to the Prime Minister urging a protective tariff on these goods when imported, as they cannot compete with more highly developed industries abroad, as well as on account of expensive raw material, fuel, transport, and labour.

The 50 per cent. *ad valorem* tax on imported German goods has been abandoned, in accordance with the example set by the Allies.

The tax for storage of goods in the Customs warehouses has been increased as follows:—To double the present tax for the first month or part of it, to five times the present rate for the first six months and ten times the amount after that period.

**Transylvania's Industries.**

The Industrialists' Union of Cluj, in view of the general critical state of the industries in Transylvania, have again addressed an urgent appeal to the Minister of Industry, drawing attention to the catastrophe menacing the industry of that province, if the necessary measures previously indicated by the Union are not taken without delay.

The question of the gold export, which has been pending for a long time, has at last been, though provisionally, solved to the satisfaction of the producers, enabling them to pursue their exploitation, which was greatly menaced for lack of foreign markets. The Government has given permission for the exportation of one thousand kilos of gold extracted from the Transylvanian mines, the quantity approximately in the hands of the producers at the moment. The final solution of the problem is postponed; it will probably, when it comes, take the form either of an agreement with the National Bank or the establishment of a definite basis for export.

**Coke from Czechoslovakia.**

On the basis of the Commercial Agreement between the two countries, Roumania has obtained from Czechoslovakia thirty thousand tons of coke at the same price as that at which it is sold to the Czechoslovak industry, to be delivered in monthly shipments of equal quantities. As a result of this transaction the crisis in regard to metallurgical coke, from which Roumanian industry has been suffering since the war, may be regarded as at an end.

## CYPRUS.

Cyprus, June 28.

**General Items.**

A Communication from the Chief Secretary notifies Cypriots that there is no hope of finding employment in England for either skilled or ordinary labour.

Silver coins to the value of £40,000 have been imported in florins, shillings, and sixpenny pieces, and are being placed in circulation to replace the paper notes of one, two, and five shillings, which have been withdrawn.

Cyprus, July 5.

**Vineyard Prospects.**

Prospects in the vine-lands and the carob growing areas continue to be very favourable. Good news has come, rather unexpectedly, to the wine-producing villages. The price of wines has risen considerably and rather suddenly. Villagers are now getting up to 55s. a "load" (128 okes), which would work out at about 2s. 9d. a gallon. There is much unsold stock of various kinds in the hands of merchants, and there have been considerable losses. Grain of the new harvest is now on sale. At Nicosia the prices are for wheat 10s. the bushel, barley, 3s. to 3s. 9d.; olive oil, 5s. to 5s. 6d. the litre; potatoes 1 to 1½ piastres the oke (2 4-5 lbs.).

The traffic receipts of the Egyptian Delta Light Railways for the week ended June 20, amounted to £E8,984 making the total for the year £E72,025. For the corresponding period of last year the receipts amounted to £E10.262 and £E90,501 respectively

# BRITISH-ROUMANIAN CHAMBER OF COMMERCE.

## Encouraging Report.

The third annual meeting of the British-Roumanian Chamber of Commerce, was held at the London Chamber of Commerce on July 20. Viscount Goschen, who presided, in moving the adoption of the annual report and accounts, after referring to the regrettable death of the late Earl of Bessborough, first chairman of the Council of the Chamber, and to the valuable assistance he rendered in its formation, said that it would be observed from the figures in the report that the value of the trade between England and Roumania during the past year was much greater than that of previous years, although those trading with Roumania had had many handicaps in marketing their goods. Among these handicaps, which were not peculiar to Roumania, had been the exchange fluctuations, the disorganisation of the transport and the falling prices at home. Roumanian merchants had been chary of importing whilst prices were unstable. In spite of these obstacles, Roumania had been on the whole, a very good market during a period of world-wide conditions of trade depression, and had clearly shown that she had a great capacity for absorbing our goods. Payments had been on a considerable scale, and, speaking generally, had been made in a satisfactory manner, although of course, there were cases in which the settlement of debts had been adjourned. In this connection owing to the tightness of money in this country, some English firms had lately shown a tendency to accept payment of their sterling debts in local currency at a rate of exchange superior to the market value. This was due mainly to the anxiety of firms here to obtain cash even at a sacrifice.

With regard to the export credit scheme which had been referred to at their meeting last year he was pleased to say that this appeared to be increasingly utilised for business with Roumania. The market prospects for the next year were most encouraging. The large stocks of merchandise held in Roumania were beginning to be liquidated, and the congestion at the ports had now practically been removed. Considerable progress had been made by the Government in the reorganisation of transport by rail. This and the good harvest prospects were probably the most gratifying features of the present position, and, following the unification of the currency which had been nearly completed, greater activity could be looked for. This would be more especially the case if trading relations were resumed between Russia and Roumania, in which case a large proportion of the existing stocks in Roumania would be quickly disposed of.

Mr. E. W. H. Barry seconded the motion.

M. Gregoire Michaesco, Commercial Attache to the Roumanian Legation, made a survey of the present position in Roumania, in comparison with the previous years, and directed attention particularly to the following facts:—In 1920, when Roumania had still a large mobilised army, 44 per cent of the workable surface of the country had been cultivated and a medium harvest had been exported. This year, with double the area under cultivation, an excellent harvest was anticipated, and there would be 600,000 wagons of cereals alone for export. The petrol depended upon the existing pipe lines of which three had survived destruction by Germany, but in 1914 Roumania was classified as fourth amongst oil producing countries. Other considerable sources of wealth were coal, natural gas, salt (40 per cent of the production having been exported last year), gold, silver, zinc, lead, copper, and other metals. The exploitation of iron ore was developing, though quantities would still have to be imported, and the timber obtained from the Roumanian forests, calculated in normal time at 1,000 million lei was of a very good quality. At present all these sources of wealth were suffering through inadequate transport, but energetic steps were being taken by the Roumanian Government to repair the deficiency. With reference to the new Roumanian Customs Tariff, M. Michaesco indicated the basis upon which the diferent rates had been fixed. To meet the present situation several new banks had been formed with large capitals, while the old and well established ones had extended their operations. Roumania welcomed foreign capital in her enterprises in the form of experience, machinery and materials, her desire being to avoid trusts and to safeguard the national security. There would be held in Bucharest in September-October, 1921, a National Exhibition, and Sample Fair, and British firms were invited to exhibit catalogues, advertisements, &., in a "Foreign Information Pavilion," which would be rected especially for this purpose.

The report and accounts were adopted, and it was resolved on the motion of Viscount Goschen to invite M. Michael Boeresco, Roumanian Charge d'Affaires, to accept the office of President of the Chamber for the ensuing year in succession to M. Nicolas Misu, ex-Roumanian Minister in London. Sir Albert K. Rollit, D.C.L., LL.D., Litt D., Consul General for Roumania in London and Viscount Goschen, were unanimously elected vice presidents for the ensuing year, and the following members re-elected upon the council:—Mr. F. P. Archbold, Mr. E. W. Barry, Sir Trevor Dawson, Mr. Edward Dean, the Right Hon Viscount Furness, the Right. Hon. Viscount Goschen, Sir Clarendon Hyde, Mr. Samuel Lamb, Mr. T. B. Thornton, and Mr. W. M. Watson.

The meeting also re-elected Mr. Locke (Bank of Roumania, Ltd.) as Hon. Treasurer, Mr. Charles E. Musgrave, as honorary secretary, and Mr. Francis W. Pixey, F.C.A., as honorary auditor.

It was decided to invite the observations of members upon the new Roumanian Customs Tariff, as affecting their respective trades, and authority was given for representations in the proper quarter. It was pointed out that so far as the woollen trade was concerned, the new duties had the effect of prohibiting the import into Roumania of certain classes of British goods.

### ROUMANIAN RAILWAY CONSTRUCTION.

H.M. Consul at Cluj (Mr. C. Goodwin) quotes the local newspaper *Vointa* as stating that the construction of a new railway line of about 35 kilometres has been decided in order to re-establish communication between Oradea-Mare (Nagyvarad, Grosswardein) and Arad. The line which formerly connected these two important centres was cut by the new Roumanian-Hungarian frontier thereby cutting off the milling industry of the frontier district from the supply of raw material in the great Hungarian plain, a supply on which it was entirely dependent. Direct communication with the Banat will no doubt improve the precarious situation in which the milling industry finds itself at present.

In addition, the construction of the following lines in the Cluj district are provided for in the programme for the financial year 1921-22 of the Ministry of Public Works according to a notice which appeared in the Bucharest *Argus*:—1. Livenzeni—Bumbesti (27 kilometres), which will establish direct communication between the great coal district of the Jiu valley and old Roumania. 2. Brasov-Nehoias (100 kilometres) which will relieve the congestion on the Braso-Predeal-Ploesti line. 3. Ilva Mica-Vatra Dorna which will connect the Transylvanian system with Moldavia and the Bukovina.

The construction of the following lines is said to be under consideration:— 1. Baia Mare-Sighet which cannot be reached by rail at present without passing through Czechoslovak territory, the Satmar-Sighet line being cut by the new frontier. 2. Toplitza-Bistricioare-Targul Neamtu which would establish direct communication with Iasi. 3. Reshitza-Caransebes to connect the great metallurgical centre with the main line Timisoara-Orsova-Bucharest. 4. Mehadia-Bazias on the Danube which cannot be reached by rail at present, the Timisoara-Caransebes line being cut by the Yugoslav frontier.

# ENGINEERING TOPICS.

*By our Engineering Representative.*

## Heat Saving.

The present method of quenching hot coke with water the moment it is taken from the retorts has long been recognised by engineers as being particularly wasteful as not only is the whole of the heat contained in the incandescent mass wasted, but the cost of the water used is by no means inconsiderable. Further large quantities of dust and dirt are driven by the expanding steam into every part of the neighbouring buildings, and cost for cleaning, etc., is thereby incurred.

In one of the largest gas works in Europe a novel method has been adopted for not only getting rid of all the attendant disadvantages of cooling, but for utilising in addition the heat contained in the coke. The method certainly involves the laying down of a suitable utilisasation plant, but this is not particularly costly, nor does it involve any appreciable structural alteration or need any large amount of ground space.

The plant consists of a large vertical shaft, part of which may be beneath the surface, and parallel with this is a vertical boiler of the watertube type. The shaft is lined throughout with firebrick, and every precaution is taken to prevent the escape of heat into the atmosphere or the surrounding ground. A firebrick wall is built between the boiler and the vertical shaft.

The bottoms of the boiler and the shaft are connected by means of a firebrick flue in the centre of which is a firebrick chamber housing a fan of special construction gear driven, by means of a shafting, by a three phase alternating current motor. The tops of the shaft and the boiler are also connected together by means of a firebrick flue, and in that part of this which is immediately above the vertical shaft a hatchway is provided through which the glowing coke can be shot as it is discharged from the retorts. In this tip flue a network of pipes is fitted through which the boiler feed water is made to circulate.

As soon as a charge of coke from the retorts is shot into the shaft the hatchway and all other openings through which air could gain access are closed, and the fan set to work. The fan is of the propellor type, and the gaseous content and the incandescent coke is driven forward and upward along the top flue, through the feed water network and down the flue of the boiler into the bottom flue where it passes through the fan and is again driven through the mass of coke and along to the boiler and so on. This cycle of operation is repeated some hundreds of times until the coke is practically cooled to the boiler temperature when the charge of coke is withdrawn through an opening at the bottom of the shaft and a fresh charge admitted from the retorts. The hot gas driven through the coke is robbed of a portion of its heat by the feedwater pipes and the water tubes of the boiler. In its second passage through the coke it in turns robs the latter of some heat which it at once gives up to the boiler. The cooling effect is thus rapid and continuous, and there is neither dirt nor steam thrown off into the atmosphere.

It will be seen that the only air that can obtain access to the coke is that which is present in shaft flues and boiler when the coke is admitted. This is quickly burned up in oxidising the carbonic oxide present to carbonic dioxide, and after first passage or so of the gas is completed nothing circulates except carbonic dioxide and a percentage of inert nitrogen. A number of tests have been made, some of which were of an elementary and others of a most exhaustive character, and it has been found that whilst at first the percentages of the gaseous contents of the coke were carbonic oxide 14.4, carbonic deoxide 11.4 and nitrogen 73.2, after the coke was cooled down sufficient for removal the percentages were carbonic oxide 2.4, 24.1, and 73.2 respectively, the balance being apparently unaccounted for. The report of the tests states that during the final and conclusive tests the number of retorts discharged was 66, the coke weighing altogether nearly 22,500 kilogrammes. The temparature of the seed water was maintained at about 110 days Fahr, and it was found that over 11,200 kilogrammes of steam were generated, the steam being at a pressure of 70 lbs., and a temperature of 310 degs. Fahr. The coke, when admitted to the shaft, was at a temperature of 1830 degs. Fahr, and was removed as being sufficiently cooled when its temperature had fallen to just over 600 degs Fahr.

## The Aerial Derby.

Flying at an average speed of 162 miles per hour, a speed which constitutes a record for the race, the Aerial Derby was won by a tiny biplane, spanning barely 25 feet, fitted with a 450 h.p. Napier "Lion" engine. This engine, it should be mentioned, was only fitted in place an hour before the race commenced. In view of the astonishing results attained by the Napier Engine in the Air Ministry trials, its success in the Aerial Derby was a foregone conclusion. The Wolseley Viper and Siddeley Puma engines also put up extremely fine performances, and there is no doubt that in spite of the official apathy towards civilian aviation, our British aero-engine manufacturers are well maintaining their premier position.

## Pilots for Motorists.

A note just to hand tells me that the service of pilots for motorists unfamiliar with the metropolitan area inaugurated a short time back by the Automobile Association, is being widely taken advantage of by provincial motorists and tourists from overseas visiting London for the first time. It is interesting to note that many enquiries have been received for pilots from A.A, members arriving from such distant points as Australia. Canada, and South Africa. These pilots will meet a motorist anywhere on the outskirts of London, or, as in the case of members arriving with their cars, at the Port of London—down at the docks, and pilot them by the best route, avoiding traffic and so forth, either across London (to where traffic difficulties cease) or to any point itself. They are also available for shopping and sight-seeing purposes.

## New Anti-dazzle Device.

The Royal Automobile Club, I understand, has recently tested a new anti-dazzle device for motor-car head lamps, which is believed to offer certain advantages over the ordinary appliance. The inventor is Mr. G. W. Mascord, who resides at Barnes, and so far, I believe the invention has not been placed on the market. In this, however I may be under a misapprehension.

The invention is of a remarkably simple but ingenious character, and consists of a lamp with two glasses, one of which is fitted an inch behind the other. The surfaces of each consist of horizontal strips alternately of frosted and plain glass, but the near glass is so arranged that its frosted strips fall directly behind the clear strips and its clear strips behind the frosted strips of the front glass. The test, I understand, was made on a night which had a visibility some 8 degrees below the normal and it was found that all dazzle ceased at a distance of 53 feet from the lamps. A driver using these lamps, when approaching a pedestrian so dressed as only to be discernible with difficulty could pick him out at a distance of 185 feet provided he was no further from the centre of the beam than 19 feet or half its width. The driver could also see a pedestrian stepping off the kerb into the road 30 feet wide at a distance of 186 feet.

# SHIPPING INTELLIGENCE.

## NAVIGATION OF THE DNIESTER.

(*From our own Correspondent.*)

Bucharest, July 12.

A Roumanian and Soviet delegation met on July 9 on a Roumanian vessel in the middle of the estuary of the Dniester with the object of regulating river navigation questions. This conference was brought about by the Ukrainian Soviet objecting to a Roumanian gunboat being stationed in the estuary.

## FOUNDERING OF AN AMERICAN BOAT.

(*From our own Correspondent*)

Bucharest, July 12.

The American cargo boat Mopang, bound for Constantza with a large consignment of goods, is reported to have foundered at a distance of ten miles off the coast between the Black Sea Ports Varna and Bourgas. Full particulars are not yet to hand. According to one account all hands, numbering 138, have perished, but other reports announce that the crew escaped in the boats. The real cause of the disaster is not yet known. It is surmised that the ship struck a stray mine.

## SHIPPING AT GREEK HARBOURS.

(*From our own Correspondent.*)

Athens, July 12.

There were 167 arrivals of various steamers in the port of Patras during May (O.S.) of the following nationalities :—Greek, 122 ; British, nine ; French, four ; Dutch, three ; German, two ; Italian, two ; Inter-Allied, one ; Norwegian, one ; American, one. The number of sailing vessels which entered the port during the same month was 199, 23 of which were Italian.

There were 17 arrivals of various steamers in the port of Calamata during May (O.S.) of the following nationalities :—Italian, six ; Greek, five ; American, two ; German, two. The number of sailing vessels which entered the port during the month was 17.

## A CENTRAL EUROPEAN WATERWAY

Considerable interest, says Reuter's Paris correspondent, is being taken in a congress which is now being held at Munich, the object of which is the furtherance of an extensive scheme for opening up a waterway between the North Sea and the Black Sea. The German Central Company for River Navigation, the Main-Danube Union and the German Austrian-Hungarian-Swiss Union for River Navigation are discussing the details of this scheme, according to which it is proposed to utilise the Rhine, Main, and Danube so as to provide a means of transit by water from North Western to South Western Europe.

## BRATISLAVA'S FUTURE.

Bratislava's geographical position at the corner of Czecho-Slovakia, Austria and Hungary makes the town eminently suitable for a trading centre, says the Prague Correspondent of the *Manchester Guardian Commercial*. Its choice as the future seat of the International Danube Commission, already decided upon and only subject to confirmation at Paris, will endow Bratislava with a prestige from which it will largely benefit. Work at the harbour is proceeding fast, and the improvement which is noticeable in the traffic returns of the port bears testimony to the foresight of those who have predicted a great future for the town. Once the Ludwig Canal, which connects the Rhine with the Danube and flows into that river above Ratisbon, is enlarged it will be possible to ship goods from the mouth of the Rhine to the mouth of the Danube without transhipping. The importance of this to British traders is obvious. But the scheme of utilising Central European waterways does not stop there. Plans are on foot to connect the Danube by means of canals with the Elbe, Oder, and Vistula, opening up water transport with Poland and Russia, and making the Danube accessible from the Baltic. Thus the Danube will play a principal part in the restoration of Europe, while Bratislava occupies a privileged position on the river.

## FORTHCOMING SAILINGS.

*Anchor Line.*—S.s. Scindia for Bombay (Liverpool, August 11).

*Anchor-Brocklebank Line.*—S.s. Makalla for Port Said, Colombo Madras and Calcutta (London, August 16) ; s.s. Maihar for Calcutta (Birkenhead, August 27) ; s.s. Malakuta for Port Said, Colombo, Madras and Calcutta (London, August 27) ; s.s. Stockwell for Port Said, Colombo, Madras and Calcutta (London, September 14).

*Bibby Line.*—S.s. Yorkshire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, August 3) ; s.s. Warwickshire for Rangoon (London, August 4.).

*Byron Steamship Line.*—S.s. General Napier for Patras, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz, and Braila (Liverpool, August 14).

*Clan Line.*—S.s. Clan Cumming for Colombo, Madras, and Calcutta (Birkenhead, August 4) ; s.s. Clan Mackinnon for Bombay and Persian Gulf (Birkenhead, August 6).

*Cunard Line.*—S.s. Tyria for Gibraltar, Algiers, Malta, Piraeus, Patras, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, and Sulina (Liverpool, August 20 ; Glasgow, August 25 ; and Swansea, August 25).

*Ellerman Line.*—S.s. City of Oxford for Gibraltar, Malta, and Alexandria (Liverpool, August 12).

*Ellerman's "City" Line.*—S.s. City of Benares for Calcutta (Birkenhead, August 5) ; s.s. Lorenzo for Bombay and Karachi (Birkenhead, August 23).

*Ellerman's "Hall" Line.*—S.s. City of Dunedin for Bombay, Karachi and the Punjab (Liverpool, August 2.).

*Ellerman's "Westcott and Laurance" Line.*—Steamers sail fortnightly for Mediterranean, Egypt, and Levant ports.

*Glen Line.*—S.s. Carnarvonshire for Port Said, Port Swettenham, Singapore, etc (London August 11) ; s.s. Pembrokeshire for Port Said, Port Swettenham, Singapore, etc. (London, August 25) ; s.s. Gleniffer for Port Said, Port Swettenham Singapore, etc. (London, September 8).

*Glynn Line.*—S.s. Ravenspoint for Genoa, Leghorn, Naples, Catania, Messina, and Palermo (Liverpool, August 5).

*Harrison Line.*—S.s. Politician for Calcutta (Liverpool, August 11 ; s.s. Craftsman for Calcutta (Liverpool, August 27).

*Henderson Line.*—S.s. Chindwin for Port Said and Rangoon (Birkenhead, August 10).

*Holt Line.*—S.s. Titan for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, August 5) ; s.s. Eumeus for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, August 5).

*Johnston Line.*—S.s. Cundall for Galatz and Braila only (Liverpool, August 6) ; s.s. Aviemore for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, August 20) ; s.s. Venice for Piraeus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, August 27).

*Maindy Line.*—S.S. Maindy Transport for Antwerp and Moroccan ports, (London, latter half of August).

**ANCHOR LINE**

## THE YUGOSLAV HEMP INDUSTRY.

*By our Belgrade Correspondent*

Hemp is grown in considerable quantities for home consumption in several parts of Yugoslavia, more particularly in the south near Vranje, but it is in the Voivodina, and in Srem that it has assumed the proportions of an important industry. It is in the Bachka that it is most developed. Here it was introduced by some Alsatians in the XVIIIth century since when it has been constantly increasing and the methods both of cultivation and of preparation improving. In 1884 Karl Mihelc improved the method of maceration, so that Bachka hemp can rival the best Italian product. In 1913, the output of hemp fibre was between 1,500 and 1,600 truckloads representing the cultivation of from 36,000 to 40,000 *jutara* of land, (one *jutro* is equivalent to .35 hectares). The best lands are in the Danube valley, but hemp is grown for seed in several parts of Croatia and Slavonia. Factories are mainly in the Bachka, where there are thirty, as compared with eight in Croatia and Slavonia and two in the Banat. A good and constant supply of clear water for maceration is an essential condition. The peasants' output, as distinct from that of organised companies and associations, is altogether about 590—600 trucks, representing a cultivation of an area of from 25—30,000 *jutara*. The pre-war average price for crude hemp unleafed was 5.50 krone per 100 kilos, or 6 kronen for the leafed crop. The amount exported in 1913 was as follows (in truckloads) :—to England 150-200, to France 150, to the former Austria-Hungary 263, and to Germany 636. The sale of seed amounts to something over 300 truckloads, of which about fifty were consumed by Hungary. There are ropeworks in the Bachka, but this branch requires development. Most of the rope-making is done by the peasants, especially by the Slovak colony at Odzhici, who take their product to sell on market days. The Bachka hemp is of a very fine quality, and the industry undoubtedly has a great future before it.

---

Yugoslavia's shoe industry is still undeveloped and unable to supply domestic needs.

The German Government have offered to the Yugo-Slav Cabinet Council to settle part of the war indemnity by the delivery of 85 complete railway trains (locomotive plus 50 wagons).

A sample fair of the South and of the Levant is to be held at Catania (Italy) from August 1 to August 20.

## LIONDA AND CO., LTD.

### First Meeting of Creditors.

The first meeting of the creditors of Lionda and Co., Ltd. (now in voluntary liquidation) was held on July 21 at the Institute of Chartered Accountants, London, E.C. Mr. Rendall Gothard, formerly auditor of the company, and now its liquidator presided.

In the course of a short statement with which he opened the proceedings, and in reply to subsequent questions, the Liquidator stated that the claims of unsecured creditors amounted to £27,459, and those of fully secured creditors to £4,770. The security in the hands of these creditors amounted to £9,155. There was here a nominal surplus of £4,385, but a loss on realisation was anticipated ; it was estimated that if there was a favourable realisation the balance would amount to £1,385. There were certain contingent liabilities amounting in gross to £2,921, debts due in respect of directors' fees and salaries amounting to £381, and a contingent liability of £250 in respect of income tax. As to assets, at the time of the shareholders' meeting, on July 4th, 1921, there was cash at bank £22, a cheque not then paid in but which had since been realised, of £440, and cash in hand £5. Bills receivable in the custody of the Ionian Bank amounted to £461, and were estimated to produce £300. Stock in the Near East, which was all the stock in the company's possession was reckoned as £9,003, but was not expected to realise more than £2,353. There was or had been office furniture at London, Liverpool, Salonika, Piraeus, and Athens ; but as regards London an execution creditor had come in, and had not left even the file cases. This creditor was for £650 ; the furniture had originally cost about £750, but had not realised more than approximately £200. At Liverpool there was furniture of the value of £70, estimated to produce £50 when sold. As regards Salonika, Piraeus, and Athens, the amount realised on furniture there would not be much, and, if there were any creditors in Greece, they had probably taken it by now.

Mr. Hodson (General Manager for the company in Athens), being asked as to the value of the furniture in the three branches, said he estimated it at 12,000 drachmae.

The Liquidator, resuming his remarks, said the debts had been divided into good, doubtful and bad. Good debts he reckoned at £596 ; doubtful—£1,186—he estimated to produce £550. Bad debts he reckoned at £261, and did not consider it would be wise to count on anything coming from this source. There was money standing to the debit of the branches at Athens, Piraeus, and Liverpool ; but having had no returns from those branches it was impossible to say whether it was all sheer loss, or whether there were assets which would eventually realise something. It was more than likely that as actual assets these sums should be wiped out. There was an unrealisable asset good will, £1,774 ; this had been the principal consideration in the original agreement entered into in 1915, when the London and Salonika business was transferred to Lionda and Co., Ltd. Under another agreement, dated December 1919, between G. N. Lionda and Lionda and Co., Ltd., all the assets (with the exception of stock), and the liabilities (which were not to exceed £500) of the Athens business were taken over by the company for a consideration of £6,700.

This agreement was to be carried into effect as soon as hostilities ceased, and the transfer was to date from February 1, 1919. He (the Liquidator) had been trying unsuccessfully to find out what were the assets and liabilities that were transferred but had no means of telling what there was tangible represented by this agreement. He had acted as auditor of the company's account. The last accounts were up to December, 1919. They were not full and fair accounts. He had explained this in his certificate and had made a special report. Among other points he had reported on was the exclusion of branch accounts, which made the accounts given practically valueless. His audit had been finished in March, 1921.

In reply to a question as to the stock of Messrs. Lever, Brothers, the Liquidator, explained that the figures he had given for stock did not include goods held on consignment for other firms.

In reply to other questions he stated it was quite conceivable there had been misfeasance, but he did not think it touched upon malfeasance. There had been neglect. Mr. Lionda was now in Hamburg, and would probably not attend the meeting of creditors if it was adjourned to give him the opportunity of doing so.

A list of the principal creditors was read out. The largest were :—W. and T. Avery, Ltd., Soho Foundry, Birmingham, £2,046 ; T. D. Barnes, £2,850 ; Cadbury Brothers, Ltd., Bournville, £2,378 ; F. Mathieu and Co., Antwerp, £2,635 ; J. D. Pappaelia, £2,844 ; United Brassfounders and Engravers, Ltd., Birmingham, £2,053.

A question as to shareholding in the company elicited the fact that there was no uncalled capital.

The proceedings at the meeting were somewhat lengthy ; compulsory liquidation was strongly urged by some creditors ; eventually the following resolution was proposed by Mr. A. J. Giles (Secretary of W. and T. Avery, Ltd.), seconded by Mr. H. E. Luscombe (Alsing and Co.) and carried : "That Mr. Rendall Gothard continue to act as Liquidator, and that Messrs. A. E. Salmon (Henley Telegraph Works, Ltd.) A. J. Giles (Secretary of W. and T. Avery, Ltd.), and H. Bradley (Cadbury Brothers) be appointed a committee of inspection to act with the present liquidator, and that (if necessary) application be made to the court for the appointment or confirmation of the appointment of those persons as a committee of inspection, and that any one of these persons may be appointed to make such application."

## SUPPLIES AND PRICES IN TURKEY

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

Mamouret-ul-Aziz.

The report for May states :—There have been no exports. Inactivity has prevailed as regards imports principally because of Ramazan.

One knows the importance of spring sowings which have been 15 per cent. above those of last year. The cereals, the prices of which have risen similarly during recent years, stand at the level of preceding months. The rains that fell in the second half of May have been very favourable, and the hail has only slightly affected certain fruits.

Stamboul, July 2

No improvement is to be recorded in the Constantinople market. On the contrary the recrudescence of hostilities in Anatolia has had an effect on business, and the financial crisis has been intensified.

The fall in prices of manufactures continues at Manchester and in this market. Consignments made to Roumania are only liquidated with difficulty, and by means of large reductions of price. There is still no news of the result of some tentative consignments made to Batoum.

*Produce.*—Sugar. The fall in prices has stopped for the time being. Buyers are maintaining a very reserved attitude anticipating a fresh decrease in prices in view of the news of exceptional crops from Cuba and Java. The arrivals from Holland and America have been placed at £39-40. per ton. Sugar in customs is quoted at £T30-33 per 100 kilos.

Coffee. The Brazilian Government having ceased purchasing to sustain the market prices have sharply declined.

Rice. Prices are maintained in centres of production. During the week 100 wagons arrived, and have been easily placed. Quotations are :—Saigon and Rangoon shipment Port Said, £16-16½d. per ton ; Siam, £18-18½.

Flour. The market is very firm, and prices tend to rise. The arrivals are notably smaller, and stocks here are much reduced.

*Exports.*—Only the market in mohair presents any animation. The sales of the week amount to 1,000 bales. Prices have risen from 7 to 8 piastres compared with the level of the previous week.

Mersina.

The report for May states :—The commercial crisis which we have recorded in our previous reports continues, and there is nothing to enable one to foresee the end of this state of affairs, which is so prejudicial to the interests of the country on the one hand, and to those of the manufacturers and exporters of Europe on the other.

## ROUMANIAN WHEAT EXPORT DECISION.

Reuter's Bucharest correspondent states under date July 22 :—At the last meeting of the Cabinet the question of this year's exceptional harvest was considered, and it was decided that the Government would reserve to itself the exclusive right of export in regard to the total amount in excess of the country's internal requirements. With regard to other cereals, the Cabinet decided to grant complete freedom of export.

## ON 'CHANGE.

*(From our own Correspondent).*

London, Monday.

There has been little change in the markets during the week. Generally speaking a firm tone has prevailed, but the volume of business has been small, investors for the most part continuing to hold themselves aloof. The further reductions in the Bank rate to 5 per cent, while welcomed all round, has not yet had any great effect, though it has helped to stiffen the gilt-edged market.

Among gilt-edged descriptions War Loan Fives are 88 3–1,6 a rise of ½ on the quotation a week ago. Findings are 3-8 better at 70 3-4, while Consols at 48 1-4 are 1-2 up. Indian Loans were better, the 3 1-2 per cents. closing at 58 1-4, while the 7 per cent. reached 104 3-8. Subscriptions to the Calcutta Loan, also a 7 per cent. issue, opened to-day, and it will be interesting to see how it fares compared with the Government loan.

There is little fresh to say with regard to Industrials. Business has been extremely restricted, except in a few directions, and there have been few changes of price of significance. British Oil and Cake Mills have been a firm spot owing to the belief that the company will benefit from the effects of the drought. Dunlops and African and Eastern have also been firm.

The oil market has generally been weak; owing to adverse influences, notably the report from Mexico that the whole of the Amatlam oilfield was on fire. There have been so many unfavourable reports from Mexico lately that one may perhaps be pardoned if one hesitates to accept all of them at their face value. I imagined that this last report was exaggerated, and according to later messages only two or three oil wells have suffered. Scottish American have been the weakest feature of the week, dropping at one time to 3s., but closing at 4s., while Tankers which slumped in sympathy are 6s. 9d. Anglo-Egyptians have continued to improve, and are now 1-11-16, a rise of 5-32. Phoenix at 10s. 6d. are 6d. lower on the week, while Roumanian Consolidated have shed 3d. at 11s. 6d. Steaua Romanas are 6d. up at 14s. 6d., but Burmahs are 3-16 lower at 6 15-32.

The Rubber market has been rather weaker than during the previous weelk. Still the outlook is decidedly brighter as a result of the rubber growers scheme, and if the proposed Rubber Producer's Corporation eventualises, while it would be too much to say that all the difficulties of the industry will be over, it would certainly make an enormous difference to the situation..

And now for the Near Eastern securities. Egyptian guaranteed 3 per cent. at 68, Greek guaranteed 2½ per cent. at 66, and Turkish guaranteed 4 per cent. 1855 at 70 are all the same as last week.

Greek shares have been firm. The 5 per cent. 1881 Loan is a point up at 43, while the 5 per cent. 1884 is 42 the same as before. The 5 per cent 1890 Loan remains at 40, while fundings at 40 are also unchanged. The 4 per cent. 1910 Loan at 29, the 4 per cent. 1902 Loan at 32, and the 5 per cent. 1914 Loan at 38 are all unchanged.

In Land shares Beheras are unchanged at 8 , and the Preference Shares remain at 3. Anglo Egyptian Land Allotments are 3, while Egyptian Consolidated Lands have finished 3d. up to 1s. 3d. Gharbieh Lands have gained 1-16 at 1-4 , while New Egyptians are 1s. 6d. up at 23s. Union Foncieres at 2 1-8 have gained 1-16, while Sudan Plantations are unaltered at 2 15-16.

In Banks Agricultural 3 per cent. Bonds are unchanged at 52, while Agricultural 3 per cent. Guaranteed Bonds are two points up at 56. Imperial Ottoman Banks are unchanged at 7, while National Bank of Egypts are 5-16 up at 17 7-8.

In miscellaneous descriptions Abyssinian Corporations are 2s., Alexandria Waters have shed 1-8 at 6 3-8, Morums are unchanged at 10s., Egyptian Markets are 3d. up at 19s. 3d., while Egyptian Salt and Soda have gained 6d. at 30s.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated July 18. :—On July 14, Bombay monsoon more active in Peninsula with extension in Rajputana. On July 15 monsoon strengthened in North West India ; on July 16, extension into Sind with weakening in the Punjab. Bombay, July 14—cotton market quiet but steady. Fine M.G. Oomra, July Rs. 336, September Rs. 346. Calcutta jute and gunny markets for week ending July 16 :—Baled jute strong with few sellers except at full rates. After publication of jute forecast prices of firsts advanced from Rs. 59 to Rs. 62, and lightenings from Rs. 42 to Rs. 45. Market closed very firm for lower grade with practically no enquiry for firsts. Balers agreed not to sell new crop until July 22. Hessians quiet ; heavy goods firm with considerable business at improved rates. Good demands for heavy c's, sugar and Liverpool twills.

Rangoon rice market on July 14, fluctuated between Rs. 582, and Rs. 590. Small mills did business for new crop at Rs. 450. On July 15, market fluctuated between Rs. 585 and Rs. 591. Quotation for July-August and September Rs. 585 and opening price for the new crop Rs. 455 and closing price Rs. 445. On July 16 fluctuations were between Rs.592 and Rs.585, and market closed dull. At tea sale on July 12 Assam excellent ; Darjeeling irregular ; Dooars and Terais good. Cachars and Sylhets good Prices firm for finest sorts. Assams sold well ; all grades up to five annas were 3 to 6 pies dearer. 39,099 packages sold to date at an average price of 8 annas 7 pies per lb. Railway survey of 65 miles by Bengal-Nagpur Railway Co., to serve the Talchir Coalfield sanctioned. No change in bank rates.

## ALEXANDRIA EXCHANGE.

# NEAR EAST MARKETS.

## SUDAN NOTES.

*(From our own Correspondent)*

Khartoum, July 5.

Nuba Mountains Province.—There has been a plentiful rainfall during the latter half of May with the result that cultivation is showing signs of remarkable progress. The rains were especially heavy at Talodi, Kadugli, and Heiban, washing away many temporary bridges and rendering conditions very difficult for wheeled transport. Considerable quantities of dhurrah have been brought into Talodi and Rashad markets and have been readily sold. The prices of livestock have fallen, good slaughter bulls being offered at £E3 per head in Talodi market.

Bahr-el-Ghazel Province.—A very heavy rainfall has been experienced throughout the Province, the Wau gauge registering 4.247 inches for May. The river level has fluctuated considerably at Wau, and navigation to Meshra and Shambé has been most difficult. In May the steamer for Meshra was held up four hours march away, occasioning acute inconvenience to passenger and goods traffic. There have been a number of deaths from influenza in the Central district, a fresh outbreak being noted at Tembura. As a result of the energetic measures taken by the medical officers, the outbreaks of small-pox and cerebro-spinal-meningitis in the Eastern district are stated to be on the decline.

## LONDON PRODUCE REPORT.

Dried Fruit. Business has been much brisker during the week. Currants have been in special demand, all grades moving off freely. Sultanas continue in good request, while Persian dates continue to be a good market.

Sugar. British refined has continued in good demand. West Indian has been done round about 48s. 6d., a rise of 3s. 6d. American is 58s. 9d. Futures are; August 18s., September 17s., October 16s. 10d., November 16s. 9d., December 16s. 7d.

Coffee. A quiet time has characterised the market. Futures are steady, quotations being July 42s. 6d., September 42s., December 43s., March 43s. 6d., May 44s.

Oils. The tone has been firm. Linseed oil at 39s. 3d. is 9d. up. Crude rape oil is unchanged at 54s., while the refined variety is 14s. up at 62s. Egyptian crude is 4s. 6d. higher at 43s., while deodorised is unchanged at 55s. Turpentine has been weak, the quotation of 90s. showing a drop of 25s.

Oilseeds. Rates have been steady. Linseed has been firm with Indian at 24s. and La Plata at 22s. Rapeseed is unchanged, Toria being 22s. 9d., bold Ferozepore 22s., and Brown Cawnpore 21s. 3d., while Egyptian black is 13s. 3d.

## CURRENT PRICES.

*General Produce.*—Bacon, 191s. cwt.; butter, 252s. cwt.; cheese, 130s. cwt.; chillies, 135s. cwt.; eggs, 24s. per 120; cloves (Zanzibar), 10d. lb.; cocoa (Ceylon, good to fine), 79s. cwt. coffee (Costa Rica), 135s. cwt.; coffee (East India bold), 117s; 6d. cwt.; coffee (Mocha longberry), 99s. cwt.; coffee (Santos, superior), 57s. cwt.; coffee (Nairobi), 100s. cwt.; lard, 90s. cwt.; ginger (washed Cochin), 38s. 6d. cwt.; nutmegs (110's to 80's), 11d. lb.; pepper (Singapore, black), 4d. lb.; pepper (Muntok white), 9d. lb.; raisins (Valencia), 92s. cwt.; raisins (Sultana, Smyrna), 140s. 6d. cwt.; currants (Vostizza), 86s. cwt.; sugar (granulated), 58s. 7d. cwt.; sugar (No. 1 cubes), 62s. 9d. cwt.; sugar (white Mauritius), 53s. 3d. cwt.; sugar (West India crystallized), 47s. cwt.; tapioca (fair Singapore), 2d. lb.; sago (small pearl), 25s. 6d. cwt.; sago flour, 16s. cwt.; rice (Rangoon No. 2), 21s. 3d. cwt.; rice (bran Rangoon), £8 5s. ton; cinnamon (firsts), 1s. 4d. lb.; mace (fair Singapore), 1s. 1d. lb.; tea (Indian), 7d. lb.; tea (Java), 3d. lb.; tea (Ceylon), 9d. lb.; wheat (Australian), 82s. qr.; wheat (English, white), 84s. qr.; wheat (La Plata), 82s. qr.; barley (malting), 62s. qr.; oats (English), 45s. qr.; Oats (La Plata), 32s. qr.; maize (La Plata), 45s. qr.; flour, 67s. 6d. sack.

**Travellers to the Near East**

Can obtain all information as to the journey from

## NOTES OF THE WEEK.

### *The Struggle in Asia Minor.*

At the time of writing there is little fresh to be said about the struggle in Asia Minor between the Greeks and the Kemalists. Greek troops are reported to have advanced by rail from Eskishehir to a point about halfway to Angora, and the Turks to be preparing defensive positions; but there has been no more heavy fighting, though both sides are claiming successes in minor engagements. At such a time rumours are sure to be numerous, and leaving aside those which are concerned wirh 'victories' and 'defeats,' we may note that an insurrection is said to have broken out at Konia against the Nationalist administration, and that desertions are taking place wholesale from Mustapha Kemal's army. The latter rumour is certainly well founded, and it looks as if the strain imposed on the Greek army by the lengthening of its line of communications will be more than compensated by this means. The position of the Nationalist Cabinet at Angora is not at all enviable just now, and it would not be at all surprising to hear of its resignation any day.

### *The Dream and the Business.*

It seems to be forgotton however that even if Mustapha Kemal and his supporters should fall, and even if their army should be utterly defeated and dispersed, the Greeks would not have reached the end of their hard work. Enver Pasha would almost inevitably appear upon the scene once more, and at the head of a fresh army, and the Turks, disheartened and weary though they now are, would surely flock to his banner, for a fresh attempt to save the 'Turkish homelands' from the *Giaour*. It is reported that most of the guns captured by the Greeks in their recent advance were Russian; and Moscow is doubtless ready to give further help to any enemy of the Entente; yet Greece, it is evident, is already doing something more than dream of an advance upon Constantinople. The Athens Press is discussing the question very keenly, and the Athens correspondent of a Zagreb paper lately reported that Greece had applied for help in the 'defence of Constantinople' to Bucharest and Belgrade, offering in return to support Roumania against Bulgaria on the Black Sea and to cede Salonika to Yugoslavia. The fact that such a suggestion as the latter can be put forward is in itself highly significant. The presence of the Allies in Constantinople seems to have been forgotten, with certain other facts. We trust that for her own sake Greece will refuse to indulge in dreams, at any rate until she has quite finished the business that she now has in hand.

### *The Rising in Albania.*

The Albanian Government is to be congratulated upon suppressing the Mirdite rising. It is difficult to follow the somewhat involved politics of that interesting but hot-blooded land, but it seems to be established that the rising was due to intrigues on the part of and incitement by Marko Gjoni, though what set him intriguing is not quite clear. Obviously, however, Albania has nothing to gain and much to lose by any disturbance within her frontiers at a time, when the question of those very frontiers is actually under consideration by the Powers. It will have been noted that the leader of the rising and many of his followers have taken refuge across the Yugoslav border. The Albanians have been in the past Albanians in the first place and Catholics, Moslems, or Orthodox in the second; if now they are going to reverse that order of things, or suffer outsiders to reverse it for them, it will be a bad thing for themselves and their country.

### *The Egyptian Negotiations.*

As last year the secrecy essential to the success of the discussions between Lord Milner's Mission and Zaghloul Pasha's Delegation was respected by the British Press, so at the present time no attempt is being made to divulge the details of the negotiations in progress between Adly Yeghen Pasha's Delegation and the British Government. From this fact, however, the Delegates need not infer that the British public is indifferent to the future status of Egypt or her relations to Great Britain. It happens that a number of important matters are occupying the popular mind just at this moment, and no subtle comparison between the respective populations nor claim of priority for foreign or Imperial over domestic affairs will convince the man in the street that he should devote more thought to the Egyptian than to the Irish question. So let it not be imagined by the Delegation or in Egypt that the Irish

Digitized by Google

are monopolising attention because they have made more stir than the Egyptian extremists. Rather is it a fortunate coincidence that the two problems should come up for settlement at the same time, for a successful issue to the Irish negotiations can hardly fail to predispose the nation to a similar adjustment of the Egyptian question.

### *The Meaning of Compromise.*

We still hope to find that the Delegation has come to England resolved to discover a *modus vivendi*, in other words, that it is set upon substituting a treaty of Alliance for the Protectorate. In regard to details it will endeavour to obtain the best terms it can, but it will not sacrifice the substance because the shadow does not fall on its side as well. There may be no great difference between the aspirations of Sir Adly Yeghen Pasha, and those of Zaghloul Pasha, but the one is a reasonable man with a logical mind, while the other has posed, since he was in London last year, as an irresponsible fanatic. It is therefore, mere folly on the part of the followers of Zaghloul Pasha to claim that he alone can represent Egypt, for the good reason that he does not represent the sober sense. of Egypt, and if he were her spokesman, could only represent her badly. The role of the present Delegation is to emphasize the ultimate aspirations of Egypt, but at the same time to give evidence of her fitness to make good her claims by recognizing her own limitations until such time as she has proved her capacity to the satisfaction not merely of Great Britain, but also of the whole world.

### *Mesopotamia and the Arabs.*

It is satisfactory to have it clearly stated in the House of Commons, and upon the unimpeachable authority of Sir Percy Cox, that the Emir Faisal has not been guilty of the *bêtise* of announcing to journalists in Baghdad his intention to reconquer Syria. Those who are acquainted with the Emir, or who have followed his policy at all closely can never have credited such a ridiculous rumour; but since it was put forward in the French Press, which—presumably on the principle of being unable to forgive the man you have greatly wronged—loses no opportunity of attacking Emir Faisal, it is well to have the lie nailed to the counter. Sir Percy Cox has stated, in reply to questions put by Mr. Churchill, that the Emir has never made any statement to a meeting of journalists, and that in the only interview he has given to a Baghdad journalist his Highness's allusion to Syrian affairs was most friendly to the French. The Arabs, like the French, have a great reputation for generosity in many respects; and it would seem that the Emir is concerned to preserve it. His patience under extraordinary provocation redounds greatly to his credit, and it is to be hoped that his moderation and restraint will not endanger his popularity either in Irakel-Arabi or in Syria. Active efforts are now being made to bring about a thoroughly good understanding between the principal leaders in the Arab world; and a sagacious ruler in Baghdad, enjoying the confidence of all the Arabs of Mesopotamia and of the neighbouring regions and tribes, would be an important factor in solving the problem satisfactorily.

### *Further Aerial Progress,*

The development of air communications in the Near and Middle East is making almost startling progress. We referred three weeks ago to the opening up of a new and direct route, across the Syrian Desert, from Jerutalem to Baghdad; and we learn now, from the aeronausical correspondent of *The Times*, that the Cairo-Karachi route is receiving close attention from the authorities. Weather conditions on this route are described as generally stable, and when it is remembered that air-craft flying by day only can reach Karachi from Kantara in four days, as compared with nine days from Port Said to Bombay by steamer, the possibilities of speeding up the mails, and later, of establishing a good passenger service, are at once apparent. Indeed, it is estimated that by using relays of aeroplanes the mails could be carried from one of the points mentioned to the other in 35 hours. Even after making liberal allowance for excessive optimism in these estimates, it is evident that we are on the eve of remarkable developments, which we may still hope will prove beneficial in a host of ways, both to India and to this country. Incidentally, it may be added that the story of the opening up of the route across the Syrian Desert seems to promise well for exploration of the much greater Arabian Desert in similar fashion. That region, still mysterious in parts, may soon be as familiar to some of our airmen as his own particular 'run' is to the motor 'bus driver. Moreover, it is reported, the King of the Hejaz has just bought from the British Government four aeroplanes, to serve as the nucleus of a Shereefian Air Force.

### *The Prince's Indian Tour.*

The skeleton programme published of the Prince of Wales' tour in India will, not, we fear, reassure those journals which have been writing of the dangers of overpressure. There are nearly forty places to be visited in the course of the short Indian winter, not much less than 10,000 miles will have to be covered between them, and an extraordinary variety of occasions for interest and emotion is provided. The chief centres of political, intellectual and industrial life, the great military stations, the largest sporting and social gatherings, all are in the list, and along with them a fully representative selection of the Indian States, Rajput and Sikh, Maratha, and Moslem, as well as the Allied Kingdom of Nepal. A steady-going Victorian would have viewed the prospect with something akin to horror, and would have gone through it stolidly with the utmost economy of effort, but the Prince is a son of the twentieth century, which cultivates emotions as though they were muscles, and his hosts are assured beforehand of his response to their exertions.

### *Indians in East Africa.*

We have on more than one occasion referred to the acute differences of opinion regarding the status to be assigned to Indian residents in Kenya, a question which is important chiefly because it is almost universally regarded in India as a crucial test of the sincerity of England and the Empire. Nothing has yet been published regarding the official discussions which have been proceeding in London, but last week an interesting divergence of opinion was disclosed in the Standing Committee of Parliament which has been examining the subject from the Indian standpoint. The majority affirmed the principle for which India is contending, that there must be no trace of inferiority of status; the minority protested that the question is essentially Imperial, and too large to be decided by a body constituted specially to deal with Indian affairs; and when the matter is stated in that way, it is difficult to disagree with the minority. For practical purposes, the most satisfactory solution would be a friendly agreement between Mr. Montagu and Mr. Churchill, but if that is unattainable, Parliament must be the final arbiter, and

Digitized by Google

it should not depend solely on the advice of a committee chosen in the interests of one of the contending parties.

*A Conflict of Experts.*

Last week's meeting of the East India Association was marked by a degree of actuality such as is not very often to be met with in Caxton Hall. The subject for discussion was the great project for irrugating Sind from the river Indus; Dr. Summers, a former Chief Engineer, read a paper strongly condemning the scheme which has been officially adopted, and the subsequent speeches disclosed the existence of a large volume of hostile expert opinion. On the other hand, the India Office claims to have the support of "the weight of expert opinion" for the scheme elaborated after many years of examination, and since the details of the dispute are quite unintelligible to the ordinary layman, he is naturally inclined to leave the topic alone. The questions at issue are, however, serious; the scheme involves an outlay of many millions sterling, its financial prospects are hotly disputed, and, as with all great irrigation projects, the possibility of injurious social and economic reactions looms ominously in the background. For our own part, we think the opposition have made out a *prima facie* case for an impartial committee of the type recently employed in Egypt; when Indian engineers are unable to agree, it is only reasonable to submit the dispute to the judgment of the expert world.

## THE WEEK AT HOME.

LONDON, Sunday Evening.

**The Irish Negotiations.**

There has been no further news of the Irish negotiations, which are officially suspended while Mr. de Valera is consulting the Sinn Fein leaders in Ireland. A preliminary reply has been received from him in Downing Street, but it appears to be a mere statement that he has placed the Government's proposals before his supporters. It has been stated in some quarters that his message was more favourable than had been expected, and in other quarters that it was less favourable. For myself, I shall hazard the entirely novel suggestion, which has not hitherto occurred to anybody, that it was precisely what was expected—merely an interim statement that Sinn Fein had not yet decided its answer to the Government's proposition.

Some of the more trustworthy correspondents on Irish affairs have indicated that there is a division of opinion in Sinn Fein—between the moderates who are ready to accept the Government's terms, at least as a basis for further negotiations, and the extremists who will hear of nothing but an Irish republic. This seems entirely probable.

**The Interview that Never was.**

But even Ireland has had to take a back seat this week; Lord Northcliffe has been the leading figure in the limelight. A remarkable interview in the *New York Times*, was attributed to him in a cable to this country. He was represented as saying that the King said to Mr. Lloyd George: "Are you going to shoot all the people in Ireland?" When the Prime Minister answered: "No, your Majesty," the King was said to have replied: "Well, then, you must come to some agreement with them. This thing cannot go on. I cannot have my people killed in this manner." The interview proceeded to say that when the King went to Belfast, and "got under the skin of the Irish people by his generosity," "the Cabinet tried to spike his efforts by making speeches in the Lords and Commons three hours afterwards, which were intended to irritate the Irish people." It also suggested that the King made his speech to the Ulster Parliament off his own bat, and that it was he who induced General Smuts to go to Dublin.

The air was at once thick with repudiations. The King took the unusual but entirely proper course of sending a message to the House of Commons, in which he affirmed that "the statements are a complete fabrication. No such conversation as this has taken place nor were any such remarks as those alleged made by His Majesty." Mr. Lloyd George denounced the "criminal malignity" of the interview. And General Smuts declared that the reference to him was devoid of foundation. Finally Lord Northcliffe himself repudiated the interview.

The interview appeared in one or two provincial editions of the *Daily Mail*, but not in *The Times*. It remains to be seen what the *New York Times* has to say to the repudiation. It is the most staid and trustworthy American paper, and it is to be noted that Lord Northcliffe did not repudiate it immediately on publication. It was at first surmised here that in his vendetta against Mr. Lloyd George—which made him suggest in *The Times* recently that the Prime Minister was not a suitable person to represent Britain in America, as he was universally distrusted—his passion had entirely run away with his judgment. The matter has been taken very seriously in London, and although Lord Northcliffe has repudiated the whole thing, it is bound to do him considerable harm. The trouble this business has caused is by no means at an end.

**Labour and Rates.**

In comparison with this resounding affair, the refusal of the Poplar Councillors to pay the London County Council and Metropolitan Asylums Board demand for rates seems very small beer. But it is not really so petty as it appears on the surface. Poplar admits that it is legally wrong, but it states that it cannot bear the burden of the rates—which, if levied, would work out at over thirty shillings in the pound—and it suggests that the proper course is to equalise rates in the metropolis.

This controversy, which was first raised some twenty years ago by the Progressives, has rather been allowed to slumber of late years, many of the Liberals who were theoretically in favour of equalisation objecting to it in practice, as it would involve the wealthier suburbs (in which they happened to live) paying for the poorer; but there are signs that Labour intends to take it up.

Labour Councillors have made a full study of the facts and I must admit that they put their case very persuasively and cogently in the Lord Chief Justice's court; it is evident that they intend to run it as an election cry at the municipal elections. I am not fully acquainted with the Labour proposals, but a fair case can be made out, not so much perhaps for equalisation of rates by itself as for a general reform in local government. But English local Government is the most intricate thing in the world, and it would require several volumes to explain it. The question will probably become prominent in the autumn; the return of cooler weather will make us more inclined to squabble.

**Roman and Anglo-Catholics.**

The Roman Catholics have been holding a conference to discuss the question of the Bible. Hitherto they have used the Douay version in this country, but there seems a general tendency to adopt the Authorised Version as the more musical, more popular, and on the whole better rendering. One or two of the speakers at the congress suggested that certain Protestant errors should be expunged, but apart from this there was general agreement that the edition could be used very much as it stands.

Almost at the same time, the Anglo-Catholics, or the High Church School of the Anglican Commission, held their annual meeting at Oxford. It seems to have been as great a success as the inaugural conference held by them in London last year, and it clearly justifies their claim to be the strongest party in the Established Church. It was noticeable that one of the speakers again advocated the celibacy of the clergy on the usual ground that it tends to a more spiritual life for the priesthood. On that matter I have neither knowledge nor opinions, but it does seem possible that the economic condition of our badly-paid clergy will furnish a still more forcible argument for celibacy. It is noticeable that the number of Candidates for ordination is heavily declining.

**The Scottish Census.**

The Census figures show that Scotland has not increased its population very much—it now stands at 4,882,157, an increase of 121,253, or 2.5 per cent. in the past ten years. Women have increased far more rapidly than men, which is attributable, of course, to the war, which hit Scotland very heavily. The increase is practically confined to the urban areas, and there is a general decrease in the rural districts, particularly the Highlands. Aberdeenshire has fallen 3.6 per cent., Banffshire 6.7 per cent., Caithness 11.6 per cent, and Sutherland in very much the same ratio; on the other hand Lanark, an industrial county, has gone up 53,189, or 3.6 per cent. Of the towns Glasgow has gone up, Edinburgh has fallen slightly, and Dundee shows the largest drop—8,134 on a population of 168,217. It will be interesting to contrast the figures with the first statistics of the English census, which will be published in two or three weeks' time.

**The Holiday Season.**

If one may judge by the crowds on the railway platforms, the introduction of excursion tickets should bring a lot of money in to the till. It is now possible to get down to Penzance and back for just under three pounds, which as things go is quite a reasonable figure, and other fares for shorter distances are in proportion.

But it will be a different kind of country that the cockney will pass through this year. In most of the South and East of England the harvest is already cut, and it looks strange to see the fields of stubble at this time of year, the summer. There was no particular reason, except the invariable custom of the calendar, why harvest festival should not have been held on the first Sunday in August.

**The Church Militant.**

It is whispered in ecclesiastical circles that the Church of England is thinking of starting a publicity department. The proposal is not as revolutionary as it sounds, for Rome and the Salvation Army both have press agents. Probably the Anglican Church has lost a good deal by not having a central organisation which could give information to editors and other journalists as to current topics in clerical circles, with the result that published information is often incomplete and inaccurate. The move should be a good one; and if in addition to supplying the laity with good news, it could supply the parsons with good sermons, the new department of the church militant would contrive a double debt to pay.

**The Week's Books.**

A few books are still coming out, although this is officially the dead season in literature.

"Makers of the New World" (Cassell) by "One who knows Them"—but does not know them very intimately—is another series of personal sketches of statesmen. The best is the *Te Deum* of Mr. Lloyd George; the worst is the utterly inadequate account of Mr. Balfour; the rest remind me of the lodger's description of the landlady's pudding: "That there are good things in your pudding, madam, I do not deny; but the pudding, as a pudding, is damnable." "The Eugenic Prospect" (Fisher Unwin), by Dr. C. W. Saleeby, a wonderful veteran, is an admirable account of modern eugenics. Its most forcible lesson is perhaps that conveyed in the following paragraph on the teeth: "Dental irregularities are practically universal among us. Some hundred million teeth have been extracted. About the same number have been spontaneously shed. The decayed teeth number two hundred million; there are about the same number of pyorrhoea sockets; finally, there are some twenty million diseased fang-tips."

"The Universal Church; a study in the Lambeth Call to Union" (Mowbray) by Canon Lacey, is an interesting study of the possibilities of reunion which will "avoid the pitfalls of abstract theory, evade practical difficulties, neglect the negligible, and move forward in the strength of the common sense of Christendom to do what is needed for the good of the Church."

Lastly, two novels: "The Obstacle Race" (Cassell) by Miss Ethel M. Dell; and "The Master of Man" (Heineman) by Hall Caine. Both are primitive, melodramatic, and crude, and both are bound to be popular. Those who like that kind of thing will wallow in it.

# THE NEAR AND MIDDLE EAST.

*(From Our Own Correspondents).*

## EGYPT.

*Cairo, July 21.*

The two official events of the week have been the French Fête and the first ceremony in connection with the departure of the Holy Carpet for Mecca. The latter was presided over by H. E. Abdel Khalek Sarwat Pasha, who in his capacity of Acting Prime Minister, represented the Sultan. The French Fête was, as usual, held in the Ezbekia Gardens and was a great success. It followed upon a reception in the morning at the French Agency at which Monsieur Gaillard, the French Minister delivered a speech reassuring the local colony on the question of their position and the protection of their interests under the proposed new regimé.

**The Alexandria Events.**

The first indication of the disastrous effect to Egypt of the series of demonstrations organised in Cairo and Alexandria by Zaghloul Pasha and his supporters has just been afforded us. After the troubles of March, 1919, a decree was issued setting up a Committee to assess the compensation due in respect of damage done to private property; and the Council of Ministers has now extended the mandate of that Committee to claims for compensation due in respect of damage done in Cairo and Alexandria between the dates of April 23 and May 24 this year. In the case of the 1919 troubles a sum of L. E. 1,000,000 was set aside. No new credit has been opened for claims arising out of the recent troubles, but it may be taken that they will not amount to less than those paid for damage done two years ago.

**Vindication of Tanta Commandant.**

The Court Martial on the Commandant of Police who after the Tanta troubles in April last was suspended from his post for exceeding his powers by firing on the mob, has been concluded, and the Commandant has been acquitted. This decision is most welcome; for there is no doubt that the Cabinet committed a very serious blunder when it took disciplinary action against this official, and that its policy greatly weakened not only the authority but also the *moral* of the police officials. The change in attitude of the Cabinet since the subsequent disturbances in Alexandria and Cairo has to a great extent steadied the Police, and the rehabilitation of the Tanta Commandant, who, after all, merely carried out his public duty, should go a long way towards restoring the confidence of his colleagues and all those who are entrusted with the maintenance of public order hroughout the country.

**The Egyptian Delegation.**

The liveliest interest is being taken in the progress of events in London, and most of the more important vernacular journals are receiving daily messages from their special correspondents in the Metropolis. For the most part these messages are accurate and deal in a temperate manner with the situation. Now and again, however, 'news' is received which, if one may judge from a recent notice issued by the Press Bureau, probably owes its untrustworthiness to the manner in which it has reached the correspondent in London. The paragraph runs as follows:—"A statement has recently appeared in the Egyptian Press based on a telegram received by the newspaper *Al-Ahram* from its special correspondent in London, giving an account of an article recently published in an English newspaper purporting to reproduce a statement of an official of the Egyptian Department of the Foreign Office concerning the forthcoming negotiations between His Majesty's Government and the Egyptian Official Delegation." In view of the extraordinarily circuitous manner in which the *Ahram* representative obtained his information, one is not at all surprised that the Press Bureau declares that there is absolutely no foundation for the statement reported.

At the same time it is to be hoped that more care will be taken with the issue of official *communiqué* by the Foreign Office. The one published on the 13th gave rise to no little flutter in the dovecotes here, owing to the statement that the two sides examined the Milner proposals. This was immediately taken to mean that the Milner proposals and nothing else are being made the basis of discussion; and you can imagine the commotion which was caused until the more instructed were able to explain what the real position was.

**The Civil Service.**

A somewhat humorous situation has arisen in the various administrations in regard to the Adviserships and other senior British posts. The Advisers to the Ministries of Education, Justice and Communications are all on leave; the Advisership in the Public Works is vacant, likewise the Financial Advisership and Under Secretaryship of Communications; while the Under Secretary for Agriculture is also on leave. The only Adviser at present in Egypt is the Adviser to the Interior who has only just returned and who, in addition to his own duties, has now taken over those of the Acting Financial Adviser. In every other administration every senior official is acting either for a colleague or for his immediate chief. In one Ministry, which shall be nameless, the whole of the British Staff has been "acting" for the past year, while for one day last week owing to the non-arrival of the French steamer, there was not a single senior British official left in either the Finance or the Interior. The present situation, which is due partly to the inexpediency of making new appointments in view of the political situation and partly to the inability of high officials to take adequate leave during the war, is regrettable; but it does not seem to have any bad effect on the administration of the country, which the less senior members of the Service seem to be able to carry on quite satisfactorily.

**The Mails.**

During the past month a marked improvement has taken place in the mail service between here and Europe, and we now have at least two regular outgoing and incoming mails, with occasionally an intermediate one to relieve the congestion. This is a nearer approach to the pre-war state of affairs, when we had five mails each way a week. During the war the postal authorities did wonders, but we by no means had regular mails. Indeed there were times when very long periods intervened and we still shudder when we think of the one occasion—thank heaven it was only one occasion—when no mail reached us for a month, and then papers of twenty-eight dates were delivered in one batch. The new arrangement is certainly a greater advance than any previously registered since the Armistice, and one can only hope that it will be maintained and perhaps in time extended into a tri-weekly service, which, if regular, is in reality the maximum that is necessary.

## GREECE.

*Athens, July 20.*

**The Fall of Kutahia.**

The first unofficial news of the fall of this Turkish stronghold was received at Athens on Monday morning by the new private wireless installation of the *Politia*, *Nea Himera*, and *Eleftheros Typos*. The Government, as usual, knew nothing about it until 10 o'clock in the evening when M. Gounaris received General Papoulas official message and communicated its contents to the National Assembly, which was sitting at the time. An hour later everybody in Athens knew of the joyful news. The church bells began ringing, and the air was suddenly filled with the deafening noise of thousands of rifle and revolver shots fired by the over excited Athenians. Spontaneous demonstrations took place at Omonoia

Square and at other parts of the city, and the big crowds in the cafés and the theatres stood up singing patriotic songs and cheering for the King and the Army. Very few Athenians went to bed that night before 3 o'clock. On the following morning a thanksgiving service was held at the Cathedral at which Princess Elizabeth and Prince Nicholas, the Council of Ministers, the Chief of the French Military Mission, and many other officials were present. The Metropolitan of Athens officiated. During the service the banks, all Government and private establishments, and the shops were closed, and a hundred and one shots were fired from the Lycabettus hill. There were big crowds outside the Cathedral cheering for the Army. At night the town was illuminated and gala performances were given in all the theatres.

At the time of writing the first official news of the fall of Eskihehir is through.

**Admiral Countouriotis.**

Fifty deputies have brought forward a motion requesting the cancellation by the National Assembly of the Law which was voted by the Venizelist Government conferring the highest rank of full Admiral upon M. Paul Countouriotis, at the same time granting him an annual pension of 50,000 drachmae. Admiral Countouriotis was in command of the Hellenic fleet which rendered such valuable services both to Greece and to her Allies during the first Balkan war. He was also one of the two superior officers—the other being General Danglis—who in 1914 accompanied M. Venizelos to Salonika, where he played a very important part in the creation of the Provisional Government and the building up of the National Defence Army which fought with the Allies on the Vardar, the Struma, and the Doiran fronts.

It is to be hoped that the National Assembly will reject this unjust demand of fifty of its most fanatical anti-Venizelist followers, as both M. Gounaris and his friends are perfectly well aware that the honour was not conferred upon the distinguished Admiral by the Liberal party alone, but by the entire Nation as a token of deep gratitude for services rendred to the country.

**The Greeks of Trebizond.**

It is reported that the project of the Kemalists to remove all the Greeks from Trebizond into the interior of Asia Minor, has been abandoned owing to the threatening attitude adopted by the Mussulman population of that region. At the time of the Great War when Trebizond was occupied by the then victoriously advancing Russian armies, the Greek inhabitants of that town took the Mussulmans under their protection, and now that the tables have turned the latter are repaying their neighbours' kindness.

**General News.**

The anniversary of the fall of Bastille was celebrated as usual on July 14, by the French colony in Athens. A reception was held at the French Legation by the Chargé d'Affaires, M. Tripier, the Ambassador, M. de Billy not having yet returned from his journey to France. Among others, the Premier, M. Gounaris, the Minister for Foreign Affairs, M. Baltazzi, and the leader of the Liberal Party, General Danglis, visited M. Tripier.

The Piraeus police have seized three large boxes containing Communist pamphlets which had been sent from Trieste. These were addressed to a bookseller in Salonika with a request to distribute them among the Communists of that town. The police have ascertained that the pamphlets were printed at the works of the well-known Italian Socialist paper *Avanti*.

As a result of the publication of an article a few weeks ago in the *Politia* (Royalist) entitled "Monastir under the Serbs," the entry of this paper into Yugoslavia has been prohibited by the Serbian authorities.

King Constantine left Cordelio (Smyrna) for the front this morning. Queen Sophie is returning to Athens to-morrow morning.

The first Turkish prisoners, numbering 360, have arrived here from Smyrna.

## YUGOSLAVIA.

*Zagreb.*

**Murder of M. Drashkovitch.**

The past week was marked by a tragedy which has plunged the country into gloom. M. Milorad Drashkovitch, who but a few days before had relinquished portfolio of the interior—although he had handed in his resignation on grounds of health several months ago—was murdered in cold blood in the presence of his family. Overworn by the cares of office at a difficult period, the Minister had gone to the seaside to enjoy a well-earned holiday with his family, at Delnica, and on the morning of July 21 he was sitting on a bench in the park, reading the paper, when suddenlya young man passing by drew a pistol and fired two shots at him at close range. The Minister sprang up, cried out "Catch him!" staggered a few paces forward in the attempt, and fell dead upon the grass. The miscreant bolted, but a detective who was standing by fired with his revolver, wounded him in the head, and he was quickly captured. The gendarmes had difficulty in preventing him from being lynched by the infuriated onlookers.

**His Career.**

There are few men who could be less spared at this moment than M. Milorad Drashkovitch. Born near Rudnik in Serbia in 1873, he had studied dairy-farming in Switzerland, and contributed much to the improvement of dairy methods in Serbia. He was Chairman of the Zadruga or Co-operative Society of Dairy Farmers, and took an active interest in banking. An indefatigable worker, capable, and honest, he was soon elected deputy in the Skupshtina. He first became a Minister in 1905, since when he has held almost all portfolios. At the

"FIRST IN 1888—
FOREMOST EVER SINCE."

THE DUNLOP RUBBER CO., LTD., Aston Cross, BIRMINGHAM.

Digitized by Google

outbreak of war he was Minister of communications in the Coalition Government. During the retreat through Albania he was Acting Minister of War, and it was largely due to his energy and capacity that that disaster was not greater than it was.

At Corfu he became Minister of Communications and organised the Serbian Red Cross in Geneva.

Originally a Radical, he seceded several years ago, and joined the Democrats on the formation of that party, of which he was a mainstay up to his death. It was as Minister of the Interior in the Vesnitch Cabinet that he produced the *Oznana* or declaration against the Communists, which nipped in the bud their plot of the New Year, and destroyed their organisation. He thus incurred the deadly enmity of the Terrorists, and it will be remembered that there was an attempt upon his life as he was leaving the Kolarats in Belgrade some weeks ago. The late Minister had one quality that is rare among politicians in this country: he was not abused by his opponents, and the Radicals and the Narodny Club respected his high qualities and his honesty. He was known and popular in Zagreb, where his untimely end is as sincerely mourned as in Belgrade.

On the 22nd his body was brought by rail through Zagreb to Belgrade, where he was accorded a State funeral.

**The Criminal—**

The perpetrator of the crime is a young Bosnian named Ali Aliagitch. It appears that he came to Zagreb to look for work, but he could not find it. A friend of his a student named Cholakovitch, a Socialist, has been arrested on the charge of having supplied him with the money and a weapon, and told him that it was the fault of Drashkovitch's *Oznana* if he could not get work. The deed is probably part of a big terrorist campaign.

When the first shock of the news had passed there was a general outburst of anger throughout the country. The Students in Zagreb vented their wrath against Communists and Frankovists alike, not sparing the Narodny Club, and there were disorderly scenes several evenings. The Government has decided to take most energetic steps against the Communists. All Ministers were recalled from leave, and M. Pashitch has postponed his visit to Prague where he was to meet Dr. Benes, M. Take Jonescu, and the Polish Foreign Minister. It is stated that the Government will call the parliament together and ask for a free hand in dealing with the situation, and that the Communist Party will be abolished; for the theoreticians are an element of danger, since, consciously or not, they encourage the criminal and terrorist element. A mass meeting has been held in Belgrade to enrol all good citizens in defence of the country against internal enemies. Major Milorad Stefanovitch, an invalid and president of the Association of War Invalids, in an eloquent and fiery speech, called upon the population to form a league of defence, to be called the Drashkovitch League They passed several patriotic resolutions, bound themselves to national defence and called upon all patriots to close their ranks and form defence leagues all over the country, and to support the Government and Parliament in its struggle against the dark forces.

**—and his Associates.**

The man Cholakovitch is a student of the Commercial School at Zagreb and is only 21 years old. He is a native of Bjelina in Bosnia, and is of good family, but seems to have been an inseparable friend of Aliagitch, the murderer. He insistently denies having had any foreknowledge of the murder, maintaining that he is a Communist by persuasion, but opposed to terrorism. This is in fact the cry of all the Communists, who are terrified at the consequence of the creed they have been preaching It is reported that most of the members of the party in Belgrade are endeavouring to get away and to clear themselves of any implication. It is amusing to learn that three of the leaders in Zagreb, Wolf, Horvatin and Tsvijitch, have applied to the police for protection, stating that their lives are in danger, presumably from the outraged public. In the same way, after the attempt on the Crown Prince, Mosha Pijade, a member of a well-known Jewish family in Belgrade, and a prominent Communist, applied for police protection. How delightfully logical!

One early result of the police investigation has been the discovery of the man who attempted to shoot M. Drashkovitch as he was leaving the Kolarats on May 3. His name is Galovitch, and he is a consumptive youth, who was identified in hospital at Liubliana. He attempted to commit suicide when he learnt that his accomplices had been arrested, for he felt sure that they would betray him. Aliagitch showed every sign of terror when he was arrested, and feared he would have been lynched, as he fully deserved, but recovered his assurance after a short time. He was asked by M. Pribitchevitch, Minister of the Interior, if he knew what fate was awaiting him. "What can there be?" he answered impudently. "The gallows and a rope" said the Minister. "Bah! You cannot hang me," replied the murderer, "the Constitution does not permit the death penalty for political crimes." So they are ready enough to try to take advantage of the law and the police and the organisation of society against which they have declared war, just as they are to betray their comrades when their own precious skins are in danger.

Delegates of all shades of Socialist opinion have been appointed to confer with a view to combination against the Communists.

**The White Ensign at Belgrade.**

The British Danube Flotilla has paid an official visit to Belgrade, where it was received with unbounded enthusiasm. The Serbian public had heard much of the exploits of the British fleet during the war, but had little oppportunity of seeing any representatives of it with their own eyes. The monitors "Glow-worm" and "Ladybird" and M.L. 196 were therefore regarded with great curiosity by the citizens of Belgrade, and the officers and men were received with Serbian hospitality. They were met by Yugoslav naval and military officers: Dr. Kumanudi, Minister of Finance represented the Government. Admiral Pritsa, General Zechevitch, the Minister of War, Marshal Boyovitch, Chief of the General Staff and other distinguished guests were entertained to lunch on board. In the evening the visitors were received at a gathering of Sokols. They were very much impressed by the exhibition of physical drill and rifle drill by the Sokols and a detachment of Yugoslav infantry, after which Britons and Serbs danced the *kolo* together. In the evening the Belgradians were invited to visit the vessels, and for over an hour enquiring crowds investigated the mysteries of the monitors. Finally the visitors were entertained officially at a dinner at the Officirski Dom, and the following morning they sailed for Novi Sad, where they will be received by the Novi Sad River Fleet and by the garrison.

## TURKEY.

*Constantinople, July 12.*

### The War in Anatolia.

Except as regards the actual territory occupied, the Greek and Kemalist official *communiques* directly contradict each other. According to the Greeks there has been heavy fighting, and the prisoners and booty captured by the Greeks are both numerous and important. The Kemalist *communiques*, on the other hand, while more or less frankly admitting the loss of Eskishehir and other important points, make no mention of especially heavy fighting. On the occasion of the Greek offensive last March, it was the Greeks who circulated reports of imaginary victories; this time it is the Turks who are indulging in that particularly useless and silly form of propaganda. Thus, when it was common knowledge that Kutahia had been captured, reports were circulated in Stamboul to the effect that Brusa had been surrounded and that Ushak had been taken by the Kemalists. In such circumstances, it becomes practically impossible to judge the situation with complete accuracy. On the whole, however, there is no doubt that hitherto this round has been most decidedly the Greeks' round, and that the Kemalists have been very badly hammered. Whether the Greeks will succeed in dealing a knock-out blow is, however, still open to discussion; and although the importance of the Greek successes cannot be ignored, it may yet be possible that the final result of the fighting will amount to little more than a displacing of forces.

In well-informed Turkish circles, no attempt is made to disguise the extreme seriousness of the situation, but it is generally affirmed that whatever happens, the struggle will not be relinquished. The Turks still have an army in the Eastern provinces under the command of Kiazim Karabekir Pasha; but it is too late now for that army to be moved in time to be of any assistance in the present operations. In view of the undeniable superiority of the Greeks, therefore, the efforts of the Kemalists are apparently being concentrated upon the preservation of their army as a fighting force, and they will probably continue to retreat until a more satisfactory line of defence has been reached. Such a line can hardly exist west of Kastamuni—Angora—Konia, and it is therefore probable that the Greeks will advance into the heart of Anatolia before they pause. Will the Kemalist army still be of any significance as a fighting force when that moment arrives? It is not easy to form an opinion at the present stage of the operations, but the Greeks are taking no risks; for they are already strongly fortifying the Afion Kara Hissar-Eskishehir lines; and it is more than doubtful whether the Kemalists will ever be able to turn them out.

### The Bolshevists.

In the meantime it would seem that the Bolshevists have been quietly concentrating considerable forces in the Caucasus. At the risk of being accused of being an alarmist, one may at least regard such a circumstance as ominous. Bolshevist policy bears a remarkable resemblance in its essentials to Tsarist policy, however much it may differ in its outward forms; and Turkey's need has always been Russia's opportunity. It will be remembered that only a month or two ago, the details of the Bolshevist scheme for setting up Enver in the place of Mustapha Kemal were revealed in the Anatolian press. Enver, however, has been quietly continuing his task of recruiting an army of Moslem volunteers at Baku, and everything tends to substantiate the belief that the Bolshevists have by no means abandoned their scheme of placing him at the head of an army of "liberation" to save the Turks from servitude to foreign capitalists! Russia's opportunity will also be Enver's opportunity, for he has already proved a great success as a flunkey in the German service. Upon the events of the next two weeks much depends, and there is a promise of dramatic events.

## PRESS ON THE NEAR EAST.

### Mesopotamia.

In an article upon "Mesopotamia" the *Outlook* of July 23 decides against both Mr. Churchill's policy and the policy of evacuation. The decisive objection to Mr. Churchill's schemes is that the country cannot afford them.

On the other hand, we have the policy of immediate evacuation. That is an attractive policy. It is easy to enunciate; it has a pleasing air of determination, of finality; and it holds out a promise of immediate economy to the tune of several millions a year. But the objections to it are scarcely less obvious than in the other case. One need not be a supporter of Mr. Churchill's particular schemes to see that while the evacuation of Mesopotamia may be very good for the prestige of the Coalition in the English constituencies, it will not be so good for the prestige of the British Empire in the East. It is agreed on both sides that the inevitable effect of an evacuation will be that Mesopotamia will relapse into a state of anarchy. We might, perhaps, disclaim any responsibility on that head if our troops had found Mesopotamia in that condition, but they did not. The Turks maintained a fair semblance of order in the country; travelling was safe—safer than it was in neighbouring Persia, under British and Russian control; trade was easy—so long as the proper official received his regular *bakshish*. In these circumstances, are we not under some moral obligation at least to endeavour to set up a strong native government in place of that which our invasion destroyed before we leave the country to its fate? Again, it is clear that if, from reasons of economy, we decide in favour of evacuation we must be prepared to persist in that policy; otherwise it may end by costing us more than Mr. Churchill's plan. We must be prepared, that is to say, to see the tribesmen at each other's throats, to see the trade of the country ruined, to see the Turkish Nationalists and the Bolshevists from the north taking a hand in the game, without interference on our part. It sounds easy, but the history of empires, from Roman times to our own, shows that it is not so easy as it sounds.

And the last paragraph consists of a plea for economy and for the Emir Faisal.

The position then appears to be that we cannot afford to remain in Mesopotamia on Mr. Churchill's terms, but that a too hasty withdrawal may in the end cost us even more, both in prestige and in money. We suggest that there may be a middle course. We suggest, for instance, that Mr. Churchill's figures should be examined. Is it really going to cost us nine millions a year to keep three million Arabs in order? Lord Cromer used to maintain British authority over twelve million Egyptians on exactly nothing a year. Again, we suspect that a good many of the subsidies could be dispensed with, or reduced. Instead of merely clamouring for evacuation some of Mr. Churchill's critics would do well to look into his figures and ascertain whether he is not asking for more than he really needs. To assume, on the contrary, that he will require more than he has asked for, and that all his plans are foredoomed to costly failure is to add unnecessary difficulties to an already difficult situation. Above all, why try to queer the pitch for our candidate, the Emir Faisal, by writing him down a failure before his candidature has well begun? Few people in this country are competent to do more than guess at his prospects; it is a question not only of tactics but of personality. It is however, quite certain that the establishment of a strong native government in Mesopotamia under the ablest of King Hussein's sons, would be, if not the quickest, at any rate the most honourable and, in the long run, probably the cheapest solution of the problem from our point of view. Nor is this simply a question of the future of Mesopotamia. We have definitely, and in a literal sense, "put our money" on the Shereefian family. It is the largest item on the credit side of our present account with Islam. The success or failure of the Emir Feisul will have its effect in Arabia, in Syria, and in the Sudan and India. On that account alone we should wish him well, quite apart from our obligations to him personally.

---

According to the *Temps*, M. Le Marmier, a Frenchman in business in Bulgaria, was shot dead on July 14 at Phillippopoli, on his return home at night from a fête, by men who had hidden in his garden. The crime is attributed to political motives.

## ARABIAN MEDICINE.

**"Arabian Medicine"—Fitzpatrick Lectures, 1919-1920. By Professor E. G. Browne, M.B. F.R.C.P. (Cambridge: University Press. 12s. net.).**

Arabian Medicine, the title chosen by Professor E. G. Browne, for his book embodying the Fitzpatrick lectures, delivered by him last year at the Royal College of Physicians suggests a technical work of interest only to the medical profession, but this is far from being the case, for while it cannot fail to be of the greatest interest to all students of oriental history, it must be confessed that it is hard to discover very much in it likely to be of value to the modern physician. It is in the hope that this scholarly contribution to the historical records of the Arab Khalifates will be widely read by all who are interested in the Arabian political problem of the moment that we specially commend it to the notice of our readers, leaving our medical contemporaries to indicate to the profession the extent to which their knowledge of their calling may possibly be increased by the study of this work.

The tradition that in the dark ages of Europe the lamp of medical science burned brightly in the East, in the great Empire founded by the followers of the Prophet, we are thankful to find is in no way shaken by the searching examination to which it has been subjected by the erudite author of this book, notwithstanding the fact that he effectually disposes of the legend that the Arabian physicians who flourished under the Khalifate were men of original mind who made great medical discoveries, and whose work marks a definite advance in the history of the healing art. The most that can be claimed for them according to Professor Browne is that they rescued the wisdom of the great masters of Greek medicine from the oblivion into which it had sunk under the degenerate Byzantines. The belief that the Arabs imposed their culture as well as their religion on the nations they subdued rests on no foundation of fact. It may offend the *amour propre* of the modern Arab to be reminded that his ancestors were in effect totally uncivilized when they emerged from the desert to sweep over half the world leaving their victorious path strewn with the ruins of half a dozen empires; but it is well that he should remember that the golden age of the Abbassid Khalifate at best marks the period when the Arab had succeeded in absorbing the knowledge laboriously acquired by the people he had conquered during the centuries when his mental horizon was limited by the crude necessities of the pastoral nomad. Admitting however, that he gave far less than he took when he established his dominion over Syria, Egypt, Mesopotamia, and Persia, the fact remains that the transaction of conquest in his case was by no means one sided, and in giving to the lands he subdued his magnificent language he placed the world in his debt for all time. Professor Browne considers that the Arab translations of the Greek medical classics are among the best that have ever been attempted, and the care taken in their preparation, and the insistence of the translators on having access to the original text instead of being content to utilize the Syrian and Latin versions extant at the time, testify to the soundness of their scholarship and the fineness of their literary sense.

The tendency of the modern European to view life from the nationalist standpoint tends so often to obscure his historical sense when the life story of mankind in the East is the object of his enquiry that it is not very surprising that the rise of Islam is more frequently than not completely misinterpreted by him. His failure to grasp the fact that the Khalifate, whether centred at Baghdad or Constantinople has always been essentially an anti-national organisation, may perhaps in some measure explain the chaotic condition of the Middle East to-day. Once one has brought oneself to realize that the assault of the Arabs on the outside world was a missionary enterprise rather than a military adventure the sudden appearance in the early years of the Khalifate of a distinctive culture in the lands converted to Mohammedanism is easily understood. The Arab believer in the divine mission of the Prophet took no account of nationality. He was content to classify humanity into the people of God, and the people of Satan, and by claiming for the former the possession of all the good things of this life and the next, he offered the most powerful of all inducements to the unbeliever to forsake his false gods and embrace the new religion. It was not offered in vain, and in a very short time in the Company of the Faithful, recruited from many races in many lands, the Arabs themselves were in a minority. This is very forcibly brought home to us in Professor Browne's work, for in the long category of distinguished physicians of the Arabian school, whose biographies he briefly outlines, Arabs are few and far between, and as he tells us "scientific literature in the Arabic language was for the most part produced by Persians, Syrians, and Jews, and in a lesser degree by G eeks, but only to a very small extent by genuine Arabs." Persia no less than Greece was laid under contribution by the Arabs for the materials out of which was fashioned the distinctive culture of the Moslem world under the Abbassid Khalifate, and it was on the tradition of the great Persian medical school of Jundi Shapur that the Arabian system of medicine was founded. This school however was far from being a monument of Persian achievement in the field of medical science, for it owed its origin to Nestorian Greek teachers driven from the Eastern Empire by the intolerance of the Orthodox emperors to find protection in Persia under more enlightened rulers. The school, the author thinks, was little affected by the Arab invasion, but it was not until the latter part of the 8th century of our era, when Baghdad became the seat of the Khalifate that its influence began to assert itself in the Mohammedan world until "by the end of the tenth century the Moslems, to all of whom irrespective of race Arabic was not only the language of revelation and religion, but also of science, diplomacy and polite intercourse, had at their disposal a great mass of generally excellent translations of all the most famous philosophical and scientific writings of the Greeks—of the Greek medical writers besides Hippocrates and Galen their favourites were Rufus of Ephesus, Oribasius, Paul of Ægina and Alexander of Tralles; and for materia

medica Dioscorides." During the Crusades when there was a considerable amount of intercourse between the great feudal lords of Christendom and the emirs of the Moslem armies the superiority of the Arabian physicians to their professional brethren in the West began to be widely appreciated. Frequently, the chivalrous Moslems raising no objection, one of the former was called in to attend an urgent case in the Christian camp, no doubt greatly to the annoyance of the western physician in charge. On one occasion at the request of the Frankish warder of one of the castles in the Lebanon, a Saracen emir sent his physician Thabit, who happened to be a Christian, to treat some persons who lay sick there. One of them Thabit found to be suffering from an abscess in the leg for which he very sensibly prescribed a poultice; but the treatment was not carried out owing to the appearance on the scene of the Frankish doctor of the castle. He insisted that immediate amputation offered the only hope of saving the patient's life, and then summoned a stalwart man-at-arms with an axe, and bade him chop off the leg at one blow. The man at arms did his best but the patient expired during the operation. The Frankish physician's interference with another of Thabit's patients also produced fatal results and so he decided to depart, having as he drily remarks, "learned of their medical practice what had hitherto been unknown to me." The book abounds with anecdotes illustrating the practice of many distinguished Arabian physicians, which the author has unearthed from the books in which they are recorded. Some of them are very amusing, and one regrets that space does not admit of their reproduction here. It is notable that in none of them is any attempt made to impute magical powers to the successful practitioner; the cure of the patient is invariably ascribed to the skill of the physician, his powers as a diagnostican being brought into special relief. It would seem as if the mental quality we are accustomed to describe as "smartness" was specially appreciated by the people who lived in the "golden days of good Haroun al Rashid." Intellectual brilliance appealed to them above all things; they liked their learned men to be clever, and had no use for books that were not well written, so one feels that if the gifted professor of Arabic in the University of Cambridge, whose fascinating work is now before us had been fated to live in Baghdad in those far off days he would have held very high rank among the Arabian physicians.

### BOOKS RECEIVED.

"The Desert Mounted Corps: An account of the Cavalry Operations in Palestine and Syria, 1917-1918." By Lieut.-Col. the Hon. R. M. Preston, D.S.O. With an introduction by Lieut.-Gen. H. G. Chauvel, G.C.M.G., K.C.B. (London: Constable and Co. 21s. net.)

"The Jungle Girl." By Gordon Casserly. (London: Philip Allan and Co. 6s. net.)

"With the 1-5th Essex in the East." By Lieut.-Col. T. Gibbons, D.S.O. (Colchester: Benham and Co., Ltd. 12s. 6d. net.)

"Eudocia." By Eden Phillpots. (London: Heinemann. 7s. 6d. net.)

### THE LEBANON HOSPITAL.

We have received a copy of the twenty-second report (1921) of the Lebanon hospital for Mental Diseases, Asfuriyeh, Beyrout, Syria. In the course of their report the London General Committee state that under the changed conditions in Syria the hospital has experienced no restrictions, and that the French authorities have in fact helped its progress. This annual report, which contains an audited statement of accounts and details of the work for the year, mentions that heavy expenses have been incurred during the last three years, and makes an earnest appeal for further funds to realize the aim of the hospital—to be a pattern in equipment and administration.

## OBITUARY.

Mr. C. C. Burnand, of the Agricultural Bank of Egypt. The sixth son of the late Sir Francis C. Burnand, he died on July 20, on board the steamer "Ormond" on a voyage home after a long illness.

---

News has reached England of the death, following sunstroke, of Major Arthur Charles Oldham, F.R.C.S., R.A.M.C. (T.), in the neighbourhood of the Persian Gulf. About a year and a half ago he accepted an appointment under the War Office at Baghdad.

Sir Archibald Fitzgerald Law, late Chief Judicial Commissioner of the Federated Malay States, has died at the age of 68. He went out to Cyprus in the following year as an Assistant Commissioner. He filled many important offices in the island, including the directorship of the survey, the head of the land registration department, principal forest officer, and Queen's Advocate on the Retrenchment Commission of 1891. He received his knighthood in 1908.

---

The death has occurred of Major-General Charles Smith Mackean, C.B., C.I.E., a veteran of the Indian Mutiny. At the siege of Delhi he served with the Guides Infantry, and for his gallantry was recommended for the Victoria Cross. He was severely wounded at Agra. After serving in the China War, 1860, under General Sir Dighton Probyn, on his return to India he led the 1st Punjab Cavalry through the Afghan campaign of 1878-80. For many years he was one of the Deputy-Wardens of the Frontier. In 1889 he was appointed Consul-General at Meshed, and he returned to England in 1891, being promoted later to the rank of major-general.

---

## NEWS IN BRIEF.

A telegram has been received by *The Times* announcing the suppression of the ultra-nationalist Teheran newspaper *Sottarch Iran* by the Persian Government. The sender of the message concludes with the words "Such is liberty in Persia."

Sixty third-class passengers are reported to have been killed or injured in a collision between a mail train from Rangoon to Mandalay and a goods train.

Abdul Hadi, the Afghan envoy to Bokhara, has returned to Kabul, where says the Simla Correspondent of *The Times*, he has doubtless reported the distressing state of Bokhara under Bolshevist domination.

M. Raskolnikoff, the *Pioneer* learns, has arrived at Kabul as Russian envoy instead of M. Suritz, who has returned to Russia on account of ill-health.

Having failed to provide security for his good behaviour, Mr. Ranga Iyer, publisher of the extremist newspaper *Independent* in India, has been imprisoned.

The number of Jewish immigrants who entered Palestine during the three months ending June 30 was 1,893.

The Danube International Commission will hold its session from August 15 to 25 in the presence of representatives from the Danubian countries and the Entente countries.

The French battleship Ernest Renan, arrived at Toulon last week, having brought from Constantinople 17 million francs in gold £680,000), part of the Turkish indemnity. The money will be deposited with the Banque de France.

A message to the French Press reports that a native of Sromdougou (French Sudan) recently found in the auriferous district of Faleme a gold nugget, the weight of which was 2 kilogrammes or slightly over 4lb.

## BRITAIN & PERSIA.

It will be readily understood that the task which Lord Curzon set himself in the House of Lords last week of announcing the failure of Great Britain's policy in Persia was performed with the keenest personal regret For thirty years, as he reminded his hearers, no one has laboured harder for the integrity and well-being of Persia, and it may be added that the sacrifices made by the British Government, to which Lord Curzon called attention, to re-establish and strengthen and guarantee the future existence of the Persians as a nation were borne for the most part at his instigation. But now-as far as he could see, these labours had been largely in vain, and he was unaware of any encouragement to persevere in the task. The Persian Government had deliberately rejected the chance of recovering its for tunes with British aid; it had preferred to fall back on the familiar game of playing off one foreign country against another, even to the extent of accepting Soviet blandishments in the place of British friendship. Persia, appeared to be marching of her own accord towards an end which could not be otherwise than unfortunate. While many will share Lord Curzon's feeling of disappointment, they will, we imagine, lack the personal incentive to despair and will fall back on the consolation that failure in the lifetime of an individual may easily be turned to success in a period that seems comparatively short in the history of a nation. There has been no change in the conditions surrounding the Anglo-Persian relationship. Thirty years ago when Lord Curzon first took up his task there was the same "chronic instability of Persian Governments," the same "atmosphere of incurable intrigue" prevailing among the Teheran politicians. Even the rival to British influence is the same, although the crude methods of Bolshevism seem to be more rapidly effective than the long-sighted scheming of Imperial Russia. The war may have rendered Great Britain's task in many ways more difficult; but the same single-mindedness, the same instinct to keep nations less fortunately placed than herself are her's, and only a faint heart can contemplate a scheme of things that subordinates for all time British influence to that of the Soviets.

We share Lord Curzon's belief in the soundness of the Anglo-Persian Agreement. It was a disinterested attempt on the part of a Western Power to re-establish the existence and secure the prosperity of an Eastern country. Great Britain offered by the terms of that Agreement to reorganize the finances of Persia and to enable her to create a national army and proceed with the development of her means of communication and her internal resources. But no sooner had the Agreement been signed than Persia through her Governments changed her mind. It will be remembered that the British Government caused considerable umbrage in France, by failing to notify the French Government of its intention to come to an arrangement with Persia, and the first obstacle to the ratification of the Agreement came with the direct encouragement which the Shah considered that he had received during a visit to Paris to oppose its adoption. France has, no doubt, forgotten her disservice to Great Britain in this matter, but her work has been taken up and improved upon by Soviet Russia. For a time there was some ground for the hope that Persia would hold herself to the terms of the arrangement provided that the actual Agreement were cancelled. The British Government was prepared to meet the Teheran authorities on this point; the question of ratification was tacitly dropped, but Persia proceeded to give effect to some of the provisions of the Agreement by inviting certain British officials and military officers to assist in her reorganisation. When they reached the country they found the ground cut away from under their feet by the presence of a Soviet Emissary in Teheran. It is customary to inveigh against the familiar Bolshevist methods—the exercise of ceaseless political propaganda, distribution of money and the presence in the background of a Russian force. But there was nothing new or unexpected in these methods when the British Government withdrew its troops from Northern Persia and adopted a course of *laissez faire*. Bolshevist intrigues can only be countered by action and a definite policy; when Great Britain abandoned both in Persia, she deliberately paved the way for the success of the Soviet Minister in Teheran.

To our mind the most tragic feature in Lord Curzon's admission of the collapse of British influence in Persia is his award of the palm of superiority in diplomacy to M. Rothstein. Nine months ago we urged in these columns that only a constructive policy could save the situation in Persia. As public opinion in this country would not sanction the retention of British troops in Teheran, we suggested a complete withdrawal from the North of all the insignia of British power and a definite attempt to build up Persia from the South. It was probable then that the Shah, his Court and the Government would be obliged to follow to Ispahan, leaving the corrupt and demoralising atmosphere of the capital with nothing on which it could batten. Soviet Russia might have taken charge of Teheran, but it would have found itself in possession of an empty shell. It would have been powerless to interfere with the reorganisation of the nucleus of a new Persia in the South. An essential part of the scheme was that it should be entrusted to capable hands, and we ventured to suggest that General Ironside, then commanding the British troops in Northern Persia, might prove the right man. It would be invidious to inquire into the connexion between the loss of British prestige in the East and the record of personal failure on the part ofi so many of Great Britain's representatives, whose attainments may have fitted them for high posts elsewhere, but who lacked the qualifications that are essential to success among Easte n peoples. Lord Curzon may yet outlive his disappointment in regard to Persia, if he will devote himself to the all-important task of finding the men who will take up the work of rehabilitating British influence in that country with the knowledge, the energy and the enthusiasm which he first brought to bear on Middle Eastern affairs thirty years ago. Instead of the rule that British representatives abroad must be applied on the principle that A, having been at X, must now go to Y, let it be realized that throughout the East Great Britain cannot afford in the years immediately ahead to be represented by any but her most able diplomatists, most carefully selected with special reference to the particular country to which each is being accredited.

# BOLSHEVIST RULE IN CENTRAL ASIA.

## 1. Afghanistan.

*(By Sirdar Ikbal Ali Shah.)*

Bolshevist endeavour in Afghanistan has necessarily been carried out in a more circumspect manner than in Bokhara. The penetration of an independent kingdom strong in military resources and the frontiers of which are strengthened by natural barriers, presented a problem of much greater complexity to the Reds than they had encountered elsewhere. That their amicable treatment of Afghanistan was merely dictated by the desire to spare themselves the ardours of a long and expensive campaign is obvious from their behaviour towards Persia, which they had not the same reasons for placating. In the fact that Afghanistan is the highroad to India can be found the keynote of Russia's friendly policy towards the kingdom of the hills. Bolshevism, should it succeed in its Indian adventure, does not desire to have in its rear a discontented and rebellious Afghanistan. Rather does it intend to make use of the military virtues of the Afghan and the strategical possibilities of his country as stepping-stones to the southern treasure-house which it aspires to plunder.

Doubtless the Afghans have no illusions regarding the real nature of Bolshevist friendship; but they dare not quarrel with their powerful and aggressive northern neighbours, and it may be that they are not a little flattered by the court paid them. Nor is this all. They have been informed that Bolshevism is merely Islam in a modern form, and they see for themselves that Great Britain and her allies are not well disposed to Turkey. They cannot understand why Britain, one of the greatest Mohammedan Powers should remain a mere spectator while the future of the Islamic countries is being moulded. The Turks of Angora are still regarded as the greatest power in Asia, and as the official and hereditary centre of the Islamic world. The Greek invasion of Turkey in Asia has greatly excited popular feeling. I have many times heard it stated that the Bolshevists have at least treated Turks, Bokharians, Persians and Afghans well on paper, and the real manner of their behaviour in the neighbouring Islamic countries is not generally comprehended at Kabul. Whilst there I formed the opinion that the general policy of the Bolshevists is to create among the Moslems antagonism to the British power in the East. Frequently I was asked why Great Britain did not join forces with the Moslems to root out the Bolshevist danger. Red Russia has laid it down in her treaty with Afghanistan that no arrangement may be come to with the enemies of either signatory or of the Turks. But in my view no understanding can possibly be come to between Great Britain and Afghanistan unless first of all the Turkish policy of this country is rendered more intelligible to the Moslem world.

The question of the late war between Afghanistan and the Indian Government does not weigh at all. It has left no bad feeling behind. But the Afghans are undoubtedly sore that such scant recognition has been accorded to their previous neutrality. During the war had Afghanistan been disloyal to its traditional friendship with this country, it might have done very serious damage; but at that time its interests were scarcely considered at all by this country; its usual food supply was endangered; its political existence was ignored. The Bolshevists were quick to seize the chance afforded by this extraordinary neglect. They rendered the necessary assistance in food and money without which the population of Afghanistan might have been decimated. Now it is well-nigh impossible to dislodge them from the country. There is still no Afghan representative in London. The question of Waziristan rankles. There is a keen sense of unfair treatment meted out to a people who in the main are better disposed to this country than to Russia, who have a longer traditional friendship with it than with their Slavonic neighbours, whom they can never regard in the same light, or with the same predilections. Yet these predilections are not being taken advantage of—or so they feel.

The Reds have lately obtained concessions in Afghanistan which hitherto British diplomacy has found it impossible to acquire. They are busily constructing telegraph lines throughout the length and breadth of the Ameer's dominions; important military posts have been placed at their disposal; and a network of railways and military roads is being laid down. Three new main lines of traffic now cross Afghanistan from West to East. That to the north runs from Turmez in Bokhara by way of Mazar-i-Sharif, through Kafirstan, to a point on the Indian frontier close to Chitral. It is connected with Kabul, through which passes the midland route from Herat to Jallalabad, which has an extension to the frontier near Peshawar. The most southerly route commences at Farah, passes through Kandahar, and impinges on the Indian frontier close to Quetta. Thus, all three roads run to the borders of India, and menace three points of the first strategic importance.

Russian railways in Afghanistan are linking up with the great system which has been laid down in Bokhara, and which has through communication with Moscow. The Orenburg-Tashkend railway has been extended to the north-east frontier of Afghanistan, and at Turmez links up with the northern road to the Indian frontier. Another line is in active preparation from Khokand, and will effect a junction with the Oxus railway at Kharaba, by way of Shirabad. The Transcaspian railway has also been connected by branch with Kushk Post in the north-west of Afghanistan, with an extension to Herat, linking up there with the roads to Farah and Kabul, whence a line of railway also runs by way of Safed Koh, Bandi Bain, and the Kohi-Baba range.

But the astute Bolshevists policy has addressed itself to the making of friendships as closely as to the making of roads in Afghanistan. The great officials of the Court have received the closest attention from M. Suritz, the Bolshevists envoy at Kabul, and his aide-de-camp, Colonel Rex, who now number among their associates Sirdar Ali Mahomed Beg Turzi, General Nadir Khan, Jamal Pasha and Abdur Raheem Khan, the envoy of the new Bokharian Republic. These personages, it is alleged, are those who stirred up the recent revolt in the Afridi country, securing the election the notorious Mullah Said Akbar, as the "tribal Ameer" of that people. They have allied themselves with Kemal Pasha in Anatolia, to whom they have sent messages requesting aid in men and material for the formation of a large army to be recruited from frontier tribes. From my own personal observations I believe that the prime object of this junta is the total destrction of the Khyber tuunnel. Nct that its partial wrecking would be a matter of any great difficulty. A few large boulders rolled into its entrance would certainly ruin the effectiveness of the railway for days at a time, and the very fact that it is in the Afridi country is sufficient to make it difficult to keep clear as a road through to the north. A far better insurance against the Bolshevist invasion of India is a friendly Afghanistan. And this, I firmly believe, can be won at a minimum of sacrifice.

## THE CARAVANSERAI.

I have to thank a corrrespondent in Port Said for permission to print the following letter written by a young Egyptian who was looking for employment :—"Dear Sir—The Director—I have the pleasure to inform you that I am Z— X— Egyptian youth in fetching for a gop, I was a Clerk at....., Port Said, to give board ships lies in harbour salts, and now this working has been finished, I have obtained a Certificate from the director of the said Company herewith attached. I have heard that a vacancy under your direction is empty and containing a clerk. I am quite ready to work at any gop at Port Said or Alexandria or Suez, etc. Hoping that my application will meet you for such a same. May God crown your work by success and leave you long —I remain Sir to be your obedient servant....." The letter strikes me as quite a good one, but the quaint expression, "fetching for a job" ('gop') and "such a same" make it amusing enough to smile over. And if I had been the recipient I should have considered just what the writer meant by his wish that God might "leave" me "long" Where? Alone? Perhaps it all depended on whether Z.... X.... got a "gop" through my influence! A friend who has read the letter is anxious to know : (1) What kind of salts the Egyptian youth administered on—or to the ships in harbour; and (2) whether the working (of the salts) was satisfactory. I regret that I am unable to reply to either question.

* * *

It is not often that I envy another man his luck, but I must confess that I do feel just a little bit jealous of Captain Yates, who has succeeded in recapturing, if only for a very brief time, something of the romance of the sea. According to the papers, Captain Yates, although he has attained the three score years and ten of the Psalmist, and although he appears to have been in a state of some financial embarrassment, set out on a career of adventure with all the light-heartedness of youth, and really accomplished wonders. Somehow or other, he bought a steamer—the Lydia, an old friend of mine if I may say so—at Southampton, and contrived to fit her out and sail for Malta. Unlike the famous Turkish admiral, he found the island, at the first time of asking; and, though his crew was by this time very hungry and a little inclined to get out of hand, he actually secured a contract to carry the mails between Malta and Syracuse. Unfortunately he took the job on upon terms impossible of fulfilment, and having got himself into trouble by an unfortunate habit of forgetting that short accounts make long friendships, he was finally brought to book by the intervention of an armed trawler. The latter, on approaching the Lydia, found Captain and crew armed to the teeth, and apparently bent on desperate resistance. But—alas, for these decadent days—many of the crew promptly threw their weapons away and, jumping overboard, swam off to the trawler. Others soon followed them, and at last Captain Yates, isolated, fell a victim to the trawler without a struggle. It was a tame ending to an adventure that opened well. If only the Lydia had hoisted the Jolly Roger, I might have felt tempted to join her gallant crew myself. As it is—

* * *

Dean Inge has in me a warm admirer, and I fail utterly to see why he should be labelled by a lot of professional optimists 'the Gloomy Dean.' Possibly my liking is due in part to gratitude, for on the only occasion on which I heard him speak he lightened up a dull and dreary public function with a truly witty speech. He has a whimsical way of telling unpalatable truths, and can put unpleasant facts forward with such an appearance of jesting that he often disarms criticism; and he must, I feel sure, do far more good than many less 'gloomy' clerics. Not long ago, at a meeting of the Social and Political Education League, he declared that he was rather inclined to think that if the House of Commons had taken an 'intelligent interest in the progress of our Indian Empire, we should have lost it long ago. Now, I make no pretence of understanding the great problem presented by India, but I cannot help feeling that there is a lot of truth behind this saying. We have been described as a nation unspeakably foolish in speech but wise beyond other nations in action, and, after all, the House of Commons *is* 'the greatest talking machine in the world.' The men who have made India have not as a rule been men of words, and the great output of oratory—chiefly native—about the country, which has been noticeable of late years does not seem to me to have helped India much.

# COMMERCIAL & FINANCIAL SECTION.

## NOTES AND NEWS.

**The Trade Outlook.**

Hopeful indications are to be found in many directions of a trade revival. So far, however, the process is but slow, and it is evident that the expectations entertained in some quarters that developments would be rapid will not be realised. Stocks are going into consumption abroad, and much of the congestion has disappeared except in such centres as Constantinople, though even there the latest news is that the position is better than it was. Owing to the hopeless confusion in which industry was plunged here by the coal strike it will be many months before the period of normal production is reached which in the prevailing circumstances is perhaps not disadvantageous. If production keeps pace with a gradually broadening demand, then all will be well, but over production is the last thing to be desired at the present time with the congestion that must inevitably result.

**D.O.T.**

The cry for economy throughout Whitehall has not left the Department of Overseas Trade unaffected, and there it is understood that an attempt will be made to decrease expenditure by a reduction of the cost of the headquarters' establishment. No doubt there are ways in which economy can be thus effected, but the advisability of such a course is another matter. While there are those who doubt the value of Government assistance in trade matters, it is very generally agreed that there is no question at all that the Department has done, and is doing, a great work in the interests of British trade endeavour. It would seem in the circumstances a most foolish, not to say ungrateful, policy to do anything, therefore, that would in any way tend to circumscribe the Department's activities. Economy is all very well in the right place, but here one would think was a case rather for the expansion of usefulness than otherwise, seeing how essential it is that British trade should be developed at the present time.

**Sudan Agriculture.**

Attention was drawn in these columns recently to the somewhat serious agricultural situation in the Sudan. The position is dealt with in an article in the current issue of the *Journal* of the Sudan Chamber of Commerce. The writer states things have gone from bad to worse, "the price of wood fuel remains high and supplies are scanty, lack of labour continues, and our cotton lies decaying on the ground in hundreds of kantars." As regards fuel he points out that coal is offered at 60s. per ton Port Sudan, while the railway freight from Port Sudan to Khartoum is 62s. per ton. Naturally fuel at that price imposes an impossible burden on agriculturists.

**The Gezireh Scheme.**

As regards the labour shortage it is the writer's opinion that there are now in the Sudan more enterprises than the labour available can undertake, and he declares that the agricultural prospects and the economic situation of the country must remain uncertain, given the continuance of present conditions. In his view the principal cause is the Gezireh scheme. The proposed dam on the Blue Nile, has, it is maintained, been undertaken many years too early, further it has begun to prejudice what has been accomplished by private enterprise, and finally the writer states that owing to the extremely high price of materials, and the lack of labour the dam will cost four times more than it would have done under normal conditions.

**A Question of Expediency.**

These are certainly weighty objections, and would seem to call for a statement of the official view. Obviously it is no good saddling a country with a burden which it is unable to bear, and development if it can only be carried out at a disadvantage whatever prospects it may hold out for the future, should clearly be postponed. The growth of a young country cannot be forced; it can be assisted to a great extent by careful administration, but there must come a time when a pause is called for so that progress previously madecan be consolidated. The Sudan under the able guidance of British administrators has made an enormous advance in recent years, and it would be a thousand pities if anything were allowed to endanger the splendid results already achieved.

**The Freights Controversy.**

The latest development in the Egyptian cotton freights controversy is that, according to a telegraphic report, the United States Shipping Boards' representatives at Alexandria have decided to break off negotiations with the Liverpool Conference Lines, and that protective measures will be employed. That means, I presume, if the report is correct, that the Jones Act will be enforced. I do not see how in view of the facts which I set forth last week the Shipping Board could have expected to obtain satisfaction. The circumstances may have been unfortunate, but surely the action of the Board is not in accordance with the spirit in which commercial enterprise should be undertaken.

# BRITISH CONSULAR REPORTS.

## IV. Yugoslavia.

We give the following extracts from the report of Captain E. Murray Harvey, O.B.E., M.C., on the economic and industrial conditions of Yugoslavia in 1920:—

There is said to be a great future for agriculture in Southern Serbia, where much land is yet virgin soil, uncultivated since the time of the Romans. The Yugoslav Government is granting free land and other privileges to farmers settling in this district, where the population is at present very scanty.

In Serbia the constant state of warfare, precluding the investment of capital, has left the mineral wealth of the country for the most part unexplored, and therefore unexploited. The absence of technical men of practical experience has resulted in much waste of time and money in prospecting territories which are of little economic value. The granting of extremely large concessions with exclusive right of search to individuals with very small capital has resulted in many promising territories being closed to people actively interested in mining. The laws will probably be amended and the concessions to be held by individuals limited. In Croatia, Slovenia and Bosnia, the rival claims of Austria and Hungary to the development of State mining concessions has in the past adversely affected the development of mining industry in these provinces.

**Minerals.**

The principal iron deposits are the mines of Ljubija, in Bosnia, developed by the Austrian military authorities during the war; those of Vares, Bosnia, mines and iron-works; and those of Zenica, iron works only. Metallurgical works are on a primitive scale, and the production is only pig-iron and small castings. The largest copper mine is that of Bor, owned by a French group, the pre-war output of which was 7,000 tons of blister copper. The output is now, from various causes, much less. There are some other quite small propositions which can, however, hardly rank as producing mines. In north-east Serbia, in the Timok, a certain amount of alluvial gold has been obtained by dredging and sluicing. Some English dredging companies operated on a small scale, but no quartz mining has been done. Silver occurs in the form of argentiferous lead ores, but so far no deposits of great value have been discovered. The State lead mines of Postenje were abandoned in 1907, and a concession granted to a private individual. These mines are now under British control but are not at present being actively exploited. Chrome ore occurs in Serbia and Bosnia, and also in Macedonia, but amongst other reasons the high freight rates at present will not permit the active exploitation of these deposits. Manganese occurs in low grades deposits in Serbia, principally as manganiferous iron ore, but is not yet of high enough grade to bear exportation. True manganese ore has been worked near Sarajevo, in Bosnia, for upwards of thirty years.

Important mines for lead and zinc ore exist in northern Slovenia. Lead and zinc ore had been mined in numerous places in Serbia and Bosnia, but very little work is being done at present. Large deposits of bauxite occur in Dalmatia, and should in future be developed. There are no aluminium works, and such ore as has been mined is exported to Germany, Italy, or Austria. Cement occurs at Beocin, in Croatia, where a large factory is established. Small works exist in Styria, Croatia, and Slovenia. Large works operate at Spalato, which are developed principally for exporting the cement limestone to Italy, where the cement is manufactured. Oil is being prospected in the districts of Belovar, Virovitica and Darovar, in Croatia. The results, beyond the finding of large quantities of natural gas, are at present unknown. To summarise, Yugoslavia may be regarded as a country whose mineral wealth is practically unexploited, and, providing more active encouragement is given by the State, should well warrant investigation and active prospecting. The development of the mining industry, however, is so intimately dependent upon the solution of the existing transport problem, that until a concise statement of the Government's railway and waterfall policy is advanced, would-be investors in mining property will have to show considerable caution in the selection of areas for investigation.

**Factors Influencing Trade.**

The main factors contributing to success or failure in trade in British goods during 1920 were:—(1) Local exchange variations; (2) Time taken in transit of goods from United Kingdom to Yugoslavia; (3) Cash or credit terms of purchase; (4) Competition from countries with depreciated currencies.

It was a common experience that goods bought in the autumn of 1919 did not reach the commercial centres of Yugoslavia until February or March, 1920, that is, having taken five to six months to transit. Again, goods ordered ex. stock in the United Kingdom in February or March arrived in July and August. This delay was caused by:—(*a*) Congestion at port of shipment. (*b*) The fact that Yugoslavia has no port of its own except minor Dalmatian ports, as yet undeveloped to any extent, at which liners did not call during 1920; (*c*) The shortage of shipping; (*d*) The congestion and strikes at Salonika and Trieste; (*e*) Railway transport difficulties; (*f*) Delays in customs clearance, etc. All these hindrances did incalculable harm, especially to those merchants unfortunate enough to receive their delayed goods at a time when the exchange rate was adverse. Merchants or importers who had "sound money" credits and who paid cash for their goods were in an enviable position. On the other hand the unfortunate merchants whose capital was in local currency or who had to rely on bank assistance or finance, as well as those who secured credit terms from sellers in the United Kingdom were in many cases badly hit by the depreciation in the value of the dinar. For example, a merchant who ordered goods in May or June and who gave his sterling acceptance at six months found it necessary to cover that acceptance in December at the rate of 130 dinars to £1, whereas the rate at the date of purchase was 65 to £1. In other words, all his calculations were upset, and he actually paid in local currency twice as much as he had anticipated. Moreover, until he knew the actual figure at which he could or did cover for his sterling requirements, he could not sell his goods with the certainty of making a profit.

**Currencies and Competition.**

Competition from countries with depreciated currencies was very marked towards the end of the year and especially so from Austria, Czecho Slovakia, and Italy. Textile goods, machinery; boots, copper, motor cars, tyres, oils, iron and steel goods, earthenware, etc., were among the articles affected by this competition, the basis of which was the continued depreciation of local currency compared with the £ sterling. The depression in the United Kingdom and the consequent fall in the prices of all manufactured articles towards the end of the year did little to stop the competition referred to above. It is interesting to compare British prices with those of Austria or Hungary. For example, a well-known British 10.h.p. locomobile for threshing machines, 140 r.p.m., cost in November £760, whereas practically the same machine, 10.h.p. with 140 r.p.m. delivered by the machine factory of the Hungarian State Railway cost £206. Threshing machines with 26-in. drum from the same sources cost British £418 and Hungarian £133; ploughs £6, as compared with £1 12s. 0d. It was, however, remarked that typewriters of British and American manufacture easily hold their own against competition, especially those with Cyrillic type or an interchangeable type set.

## BULGARIAN PRE-WAR DEBTS.

At a meeting, held in Sofia towards the end of May, of members of the Union of Bulgarian Merchants, the Union of Bulgarian Manufacturers and delegates of other Commercial Associations the following resolution was passed :—

"This assembly considers that it is indispensable that the action of the Commercial Organisations be continued as regards the question of foreign engagements, and this on the basis laid down by the law on the suppression of the moratorium, recently passed by the Sobranje, that is to say to leave debtors at liberty to arrange their obligations by agreement with their creditors abroad, that is to say, before the foreign obligations are fully settled, to ask that creditors consent to receive the sums due to them in Bulgarian lei, deposited in a bank of the country designated by the creditors themselves, as follows :—For the English pound three times the nominal value i.e. 75 leva ; for the French franc, 2½ leva ; for the Italian lira, 2 leva, for other currencies of importance, Swiss, Dutch, American, Belgian, and Spanish, in triple proportion, interest included, on the condition, that is to say, that creditors will have the benefit of the interest on the sums."

Representations to the above effect have been made to the creditors of Bulgarian firms in the United Kingdom, and, as might be expected, there is no marked readiness to accept 75 leva for the £1 at a time when the pound sterling is quoted in Sofia at anything from 300 to 600 leva. (There has been a rapid recovery from the sudden fall which caused the pound to touch the latter figure). On the other hand, there is a desire to help Bulgarian merchants as far as possible, and it has been suggested that the most practical way would be to allow payment to be made in instalments spread over a wide period, and to remit entirely or in part interest due.

A further point, which was first taken up in "The Near East" and has since been raised in *The Times*, is that all Bulgarian moneys in this country, which were sequestrated during the war, and have now been placed under the jurisdiction of a Clearing Office, should be released. Great Britain is the only Great Power among the Allies which has adopted this procedure in regard to Bulgarian funds ; France, Italy, and the United States have specifically waived their treaty rights in the matter. The funds in question are not enough to meet all Bulgarian indebtedness in the United Kingdom ; but Bulgarian debtors have shown their willingness to meet their obligations, and the release of these moneys would mean that impetus would be given to the resumption of trade between the two countries. In the face of the action of our Allies, British insistence upon the rights fixed by the Treaty of Neuilly is most invidious and harmful to British trade.

British firms, however, in return for any concessions made, and Great Britain as a whole would have the right to expect that Bulgaria should take definite steps to set her house in order. Something should be done to stabilise exchange, which in the space of twelve months has fluctuated from 150 to 600 leva to the pound. Among the suggestions put forward to this end are :— (1) that the note circulation in Bulgaria should be limited and reduced by gradual withdrawals. (2) that the Bulgarian Government should release the export trade of the country from a number of restrictions.

In regard to the latter the Grain Consortium, it is satisfactory to note, is likely to be abolished at once as a result of the action of the Allied Commission for reparations, and other penalties on trade are gradually being removed. Reference has been made in some quarters to the tendency of the Bulgarian Government to increase its expenditure for purposes of representation in foreign countries. There is, no doubt, a natural desire to rehabilitate Bulgaria in the eyes of Europe, and suitable representatives abroad are one of the most effective means. Whether too heavy an expense is being incurred in this direction we are not in a position to say. With a depreciated currency the sums allocated in the Bulgarian Budget for legations and consulate may loom large, but it is hardly to be supposed that possible reductions, although a wise step perhaps for the cabinet's reputation, would have much effect on the rate of exchange.

REPORTS FROM OUR OWN CORRESPONDENTS.

## GREECE.

Athens, July 29.

**M. Maximos' Departure.**

An agreement has been concluded between the Greek Government and the National Bank of Greece by which the latter grants to the former a loan of 150 million drachmae at an interest of six per cent. Immediately after the agreement was signed the Governor of the National Bank, M. Maximos left Athens for London on board a destroyer placed at his disposal by the Government. Official circles here have not given any explanation of his hurried departure, but it is understood that M. Maximos is seriously hoping this time to bring some money back to Greece with him. The *Proïevousa* says that prior to his departure the Governor of the National Bank had received a telegraphic invitation to proceed to London by an important group of capitalists with whom he had been in touch during his last stay in the British capital.

**Import of Motor Cars.**

The number of motor-cars imported into Greece has increased enormously during the last two years. One can safely say that in proportion to its size and population Athens boasts of more cars to-day than London. To the end of last year America headed the list, lately, however, owing to the appreciation of the dollar orders in the United States began to diminish and the Greek market is now flooded with German cars, mostly Mercedes

The table below shows the number of motor-cars imported from May 1, 1920 to October 31, 1920 :— American 183 ( the majority of these were Fords, the Chevrolets coming next ) , French 19, Italian 19, German 11, British 8, Belgian 3. Second- hand motor-cars :— American 101, British 27, French 23, Italian 23, German 11, Swiss 1.

**General News.**

According to official statistics the Hellenic Mercantile Marine on May 31 last comprised 358 steamers of a total tonnage of 547,597 and 1,195 sailing vessels of a total tonnage of 136,159.

The Minister of Supplies has prohibited the import into Greece of American luxury flour. Flour of this quality will henceforward be produced locally ( at the Piraeus ) and sold at 2.57 drachmae per oke, which is the same price at which the American luxury flour is now being sold.

The receipts of the Piraeus Customs during the month of June ( O.S. ) amounted to 4,962,264,75 drachmae in paper, and 172,030,20 drachmae in gold, as against 5, 395,798,90 paper drachmae and 238,949,40 drachmae in gold, which were the receipts for June 1920. There is therefore a decrease this year of 434,534,15 paper drachmae and 66,919,20 drachmae in gold.

## BULGARIA.

Sofia, July 18.

**The Exchange.**

Since my last letter the value of the leva has undergone considerable improvement, and the £1 is now about 360 and 100 French francs are worth about 860 levas. The decrease in the rumours of Bulgarian aggression abroad, and the action of the Reparations Commission in demanding free trade in cereals are the most important factors in bringing about this improvement.

The action of the Reparations Commission in advising the Government to give up, or at any rate to postpone, the putting into force of the law which provided for taxes on capital and property has undoubtedly had a steadying effect on the general situation, and private citizens are not feeling so anxious for the safety of their belongings. It is understood that article 4 will not be put into force any more, and this also will have a salutary effect.

M. Tourlakoff, the Finance Minister, declared on Thursday that he expected to see the leva go up slowly, but did not think any great improvement would take place until the external loan was concluded. Presumably the Finance Minister will have the opportunity during his tour to discuss this matter with European bankers ; the Franco-Belgian Loan of 100 million francs has not yet been finally approved of as it is believed the Reparations Commission are not in complete agreement about the matter.

Sofia, July 27.

**Changes in Bulgarian Policy.**

Yesterday M. Dashkaloff, Minister of Commerce, announced that the Ministry of Finance had been instructed to withdraw the law instituting a tax on capital. He stated that when the Sobranje met in the autumn a vote would be taken to suspend Article 4 which deals with the punishment of those considered to have committed offences during the war. Meanwhile no other arrest will be made in connection with this act, and all trials proceeding will be suspended. The Minister further stated that the monopoly held by the Grain Consortium would be abolished, and that free trade would be established for the export of cereals. These reforms are of the first importance, and will, it may be hoped help to create a more stable, industrial and political situation.

## YUGOSLAVIA.

Zagreb, July 18

**The Economic Position.**

The Minister of Finance, Dr. Kumanudi, recently made a very interesting speech to his constituents at Split. Discussing the low value of the dinar to-day, and its recent further decline, he attributed this to the fact that on the eve of the harvest there was not sufficient surplus in sight to supply a heavy export. Moreover, there had been fairly heavy importing. Besides, ever since the liberation, the finances of the country had not had a fair chance owing to the general disorganisation and difficulties consequent on the unification of the new provinces ; there had been no uniformity of financial policy, but a series of independent ministers, each of whom had by force of circumstances been compelled to be an opportunist. They had also operated without parliament, and had instituted far-reaching measures by ministerial decree. The budget for the current year would work out at 4,800,000,000 dinars, which was not excessive for a state with a population of twelve millions. The deficit was not excessive in proportion, though serious enough under present conditions. The figure was 1,000,000,000 dinars. This the minister went on to explain was a temporary phenomenon and the result of the circumstances in which the young kingdom found itself. One of the main causes of the deficit had been the poor returns of taxes, due in part to the fact that in the new provinces, the financial staff was composed of foreigners principally Magyars, whose national interests had led them to adopt a policy of passive resistance. Import duties and state monopolies had also been disappointing hence the deficit. But, as the political situation had so improved and the state was settling down and organisation improving, especially in the personnel of the Ministry of Finance, there was every reason to hope that, in view of the great natural resources of the country, the budget would balance in a year or two. The success of the recent internal loan of 500,000,000 dinars to be expended solely upon communications was an important political and stabilising factor, and it was interesting to note that those very districts which were reputed to be least sympathetic to Belgrade were the ones that had borne the brunt of the loan and had so contracted great vested interests in the present regimé.

**The New Customs Tariff.**

The new Customs Tariff, which comes into force this week, includes a minimum and a maximum rate, appli-

Digitized by Google

cable respectively to those countries with, and those without a commercial treaty. The rates are raised, but not so much as many of the local industrial people wished, though the tariff will decidedly afford protection to local industries, and this principal is now applied for the first time to iron, timber and textiles. The tax on turnover is abolished, and to make up the consequent loss of revenue, 100 dinars in gold are now to be accepted as the equivalent of 400 silver dinars (bank notes), instead of 200, as hitherto. The 10 per cent import duty on luxuries is maintained.

**Miscellaneous.**

It is reported that the returns of the National Bank on June 30 were :—Bullion 437,336,343 dinars; paper money in circulation, 3,745,943,320 dinars.

## ROUMANIA.

Bucharest, July 20.

**General News.**

A report from Cluj states that Hungary and Czecho-slovakia have closed their frontiers to Transylvanian cattle. In consequence of this unexpected measure there is a danger that the cattle that have been transported in large numbers will die of hunger and the cattle-breeders suffer heavy losses.

The management of the Roumanian railways has granted a reduction of 50 per cent to all industrialists and merchants who participate at the Cluj Sample fair. The same reduction will be made also for the transport of all goods sent to be exhibited.

A Roumanian delegation is about to leave for Germany to take delivery of 5,000 horses according to the Peace Treaty and to superintend their transport through Czecho-slovakia. A special veterinary commission will control and examine the horses in Germany, according to the Wiesbaden agreement.

The Government is taking measures to assist those industrialists whose factories have been damaged during the war and which had to be repaired at great cost. Meanwhile their debts to the banks, which are charging high interests, will be transferred to the National Bank so that they will pay the ruling bank-rate.

---

Owing to mildew, the output of wine in Algeria and Tunis will be below the average.

It is announced that the local authorities of the Department of Tyrnovo, Bulgaria, have decided on the construction of several new standard gauge railway lines.

Owing to the depression in the rubber industry, castor-oil plants are being grown on the rubber estates in Ceylon.

The amount of coal produced in Czecho-Slovakia for the first three months of 1921 amounted to 3,063,600 tons, and the output of lignite for the same period amounted to 5,435,000 tons.

# COTTON & COTTON GOODS.

## SUDAN COTTON.

(*From our own Correspondent.*)

Khartoum, July 13.

Red Sea Province.—The Tokar cotton market and the new light railway from Tokar to Trinkitat were both closed down on June 30. The quantities of cotton marketed during the season were in (Rantars) 1st class, 26,747; 2nd class, 19,869; 3rd and 4th class, 1,272. Prices ranged from PT 97½ to PT 80. for No. 1 PT 79½ to PT 70. for No. 2 and about PT 50, and PT 40. for Nos 3 and 4 respectively.

## LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week ended July 28 :—Although the sales show little difference from last week's total, we fear that on the whole the inquiry for Egyptian cotton here has shown distinct signs of falling off, and this is merely a reflection of what has also been happening in Manchester. Speaking generally, spinners find they cannot buy cotton at present prices and sell their yarn at a profit, and it really looks as if things might drift back again into a deadlock unless some material change in the situation develops. Manchester reports have been going slowly from poor to worse, and to-day the following significant phrase occurred : "spinners are not improving their position." This sums up the situation.

On the spot, there is a quantity of cheap (!) cotton about, of the fully good fair Sakel variety, and this was partly recognised to-day, when the fully good fair quotation for Sakellaridis was reduced ¼d. per lb. The better styles of Sakel are being slowly picked up, particularly staple lots, and some difficulty is being experienced in purchasing similar cotton c.i.f. terms in Alexandria, where fears regarding the staple of the coming crop are freely entertained. For ourselves, we do not place too much reliance on these rumours—they appear unusually like the sea serpent—but at the moment they are undoubtedly assisting Egyptian shippers to obtain full prices for their better cotton. Upper remains very steady, but with very little doing. White cotton has received rather more attention, and other growths are practically neglected. A fair c.i.f. business has transpired. Quotations are reduced ¼d. per lb. all round, with the exception of fully good fair Sakellaridis, which is exceptionally 1d. per lb. lower on the week. Sales 1,600 bales (including 20 bales Sudan). Fully good fair Sakellaridis 15.50d.

## MANCHESTER REPORT.

(*From our own Correspondent*)

Manchester, Friday.

No special feature has presented itself in connection with this market and generally speaking we have experienced a very quite week. Fewer cables have been received from abroad, and the most noticeable falling off with regard to cloth inquiry has been in connection with India. The lull in the situation is accredited to the efforts of Gandhi who is agitating for a boycott of all foreign goods entering our Dependency. The general opinion however is that the threatened boycott will not meet with any permanent success. A rather disconcerting feature has been the slight fluctuations which have occurred in raw cotton rates. With regard to cloth inquiry for Egypt not many cables have been received and only a miscellaneous business has been done Transactions for the Levant have been within a restricted compass but here and there some encouraging sales have taken place for Constantinople. Generally speaking however the position has been rather dull. Not very much business has been about in Egyptian yarns and prices when tested have favoured buyers The cloth demand for India has been very disappointing but shippers to China have operated a little more freely and some encouraging sales in greys and whites have taken place. No fresh business has been reported in American spinnings and quotations on the whole have been a little easier. The Master Spinners' Federation have decided to abolish short time working in the American section of the spinning industry.

# Engineering Topics.

*By our Engineering Representative.*

**An Electric Ship.**

A large merchant vessel, the Invincible, has just been converted to the electric drive, and so successful has been the work, and so promising the results achieved, that the owners are now engaged in converting another vessel of similar size from steam to electric driving. From a description just to hand it appears that the equipment consists of a three phase alternating current motor of the induction type, supplied with energy at 2,300 volts. The source of supply is a three-phase alternator, direct coupled to a steam turbine, this combination being of the rigid frame, three bearing construction. Two 35 kilowatt direct current exciters are fitted, these being engine driven, and the controls for all these are mounted on one switchboard on which are also fitted the rheostats, instruments for all machines, and the necessary switches and circuit breakers.

The motor driving the propellers is self-contained, the bearings being a part of the frame, and the weight of this portion of the equipment is nearly 50 tons, the motor weighing 34,600 and the frame 63,900 lbs. A moveable steel hood is mounted on the top of the rotor, this part being of the ventilating system.

According to the description the main motor is ventilated by a motor driven fan of the induction type, which is capable of forcing 14,000 cubit feet of air per minute through the frame. The motor is of two-bearing design, and was handled during mounting as a complete unit, but it was found impossible to handle the generator in the same way, it being accordingly shipped in two portions which were fitted together *in situ*. After the frame was bolted to the foundations the rotor was inserted and the whole coupled together.

It is interesting to note that all fan ducts, auxiliary pipings from the turbine to the condensers, and other fittings are accommodated in the space between the motor and the turbo generator, but in such a way as to leave a perfectly clear passage for the removal of the motor for repair should this at any time become necessary.

**Magnet House.**

Few of these who take a more than passing interest in electrical matters but are aware that the General Electric Co., Ltd., have recently removed from Queen Victoria Street, where they had been for over 32 years, to their new premises in Kingsway, which they have named Magnet House.

A visit of inspection paid by a representative of "The Near East" showed that exceptional care had been taken in the designing and layout of the premises to cater for the convenience and comfort of visitors, and to ensure the prompt and accurate execution of their orders. Every modern labour saving device has been adopted, the installation being carried out on a scale commensurate with the size of the organisation it has to serve, and being in every instance specially designed to meet its particular needs. As an architectural achievement Magnet House takes a very high place, as an example of the modern store, designed for the convenience of its customers and the speedy transaction of their business it is second to none in London.

The building covers a ground area of 25,750 square feet, and has eight floors including the basement. Each floor is divided into eight sections by brick walls fitted with double iron fire proof doors, 130 in number, which were made by the company at their Fraser and Chalmers Engineering Works, Erith. These doors are of several patterns from plain to highly ornamental, and several have hinged folding sections through which employees can pass without any necessity for opening the entire door.

The various floors are served by five staircases, seven passenger lifts, and eight goods elevators, made by the Express Lift Co., Ltd. This firm was also responsible for the complete system of hoists and runways for loading and unloading vans and lorries, and for handling bulky goods. This lift equipment, comprising a total of 23 machines of various types, forms an epitome of modern practice in lift design and construction. For this reason alone Magnet House is well worth a visit by all interested in lifts or goods handling systems.

All inter-departmental correspondence is distributed by means of pneumatic tubes. A central exchange is located near the entrance hall for dealing with this service and is also used as a sorting office for incoming mail, letters being afterwards sent to the various departments by the tubes. Ventilation is secured by a network of ducts connected to a modern air washing plant and vacum tubes are also installed for cleaning.

An interesting departure from usual practice is that the showrooms are in the basement, where ample space is available for exhibiting every conceivable class of electrical goods. Here is a selection which is said to be the largest and most comprehensive to be seen anywhere a claim which we can well believe to be absolutely accurate. On the left of the vestibule is a handsomely decorated suite of rooms devoted to the exhibition of electric light fittings and domestic electrical appliances. With a full appreciation of the value of display and demonstration the company has devoted the utmost thought and care to this important section, with the result that the comfort and convenience of the visitor is catered for in the most complete manner.

The central apartment is worthy of special attention. Decorated in Georgian style, it contains a large, not to say lavish, display of modern electrical fixtures of all kinds. In the French room, which is tastefully decorated in white and vieux rose is a selection of Loius XIV and Louis XVI electroliers and brackets, together with French statuettes, bronze figures and table standards. The Adam section, carried out in tints of wedgewood green, contains many examples of brackets, pendants and electroliers in this style.

There is also a Jacobean dining room in which are shewn chandeliers, lanterns, and table candle-sticks of Tudor and Jacobean design, many of which are faithful reproductions of antique originals. The section devoted to alabaster ware holds an unrivalled assortment of inverted fittings, vases and pedestals. Unique and artistic sflk shades in great variety are arranged in an adjoining room and the remaining apartment is devoted to an exhibition of domestic electrical appliances Here are demonstrated heating and cooking appliances electric irons and fans, vacuum cleaners, washing machines and, in fact, every conceivable electric requisite for domestic purposes.

The industrial section of the show-rooms contain examples of all kinds of lanterns and fittings for factory lighting, ships' fittings and other items of electrical equipment for marine use, switchgear, telephones, electric light supplies, cables, and wiring materials. One interesting feature of the display is a board shewing full details of the company's new surface wiring system full particulars of which we hope to be able to give shortly in these columns. Whilst on this subject of industrial use of electrical appliances it may be mentioned that the company make great use of them themselves, and practically every type of appliance is to be seen at Magnet House in actual operation.

# SHIPPING INTELLIGENCE.

## FIRE AT CUSTOMS WAREHOUSES.

(*From our own Correspondent*)

Bucharest, July 20.

A big fire broke out at the customs' warehouses in Bucharest destroying merchandise to the value of about 20 million lei. The goods were insured, a large portion of it abroad. An inquiry has been opened into the cause of this mishap.

## SHIPPING AT THE PIRAEUS.

(*From our own Correspondent*).

Athens, July 20.

There were 477 arrivals of various steamers in the port of Piraeus during June, of the following nationalities:—Greek 395, Italian 32, British 15, American 10, Roumanian 4, German 4, French 4, Swedish 4, Spanish 3, Dutch 2, Inter-Allied 2, Belgian 1, Russian 1, The arrivals during June last year were 418 of which 21 were British and 21 Italian.

## POLAND AND THE DANUBE.

(*From our own Correspondent*).

Bucharest, July 20.

A Conference is now being held at Czernowitz, Bukovina, between the Polish and Roumanian delegates to regulate the transport question regarding the transit of goods to and from Poland via the Roumanian Danubian ports.

## LEAVE FROM CYPRUS.

Our Cyprus Correspondent writes:—How to get to and from Cyprus has always been a problem of some doubt and difficulty. For many years the majority have travelled via Egypt, where there is often a delay of several days. Several officials lately have gone by Italian (formerly Austrian) Lloyd steamers, via Venice, and this route is a pleasant one for those going alone. Conditions are now very different for officials from what they were. Not only are salaries largely increased, but the Government pays the passages of officials going on leave, and of their families, both ways, every three years. Formerly there was no allowance of any kind. Indeed for those who were delayed on the voyage, sometimes for weeks, through quarantine, breakdown of steamers, &c., and no fault of their own, all the time lost was vigorously deducted from their pay, and of course from their pensions also.

## FORTHCOMING SAILINGS.

*The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses:—*

*Anchor Line.*—S.s. Scindia for Bombay (Liverpool, August 11).

*Anchor-Brocklebank Line.*—S.s. Makalla for Port Said, Colombo Madras and Calcutta (London, August 16); s.s. Malancha for Calcutta (Birkenhead, August 27); s.s. Malakuta for Port Said, Colombo, Madras and Calcutta (London, August 27); s.s. Stockwell for Port Said, Colombo, Madras and Calcutta (London September 14).

*Bibby Line.*—S.s. Warwickshire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, August 17).

*Byron Steamship Line.*—S.s. General Napier for Patras, Piraeus, Salonika, Smyrna, Constantinople, Bourgas, Varna, Constantza, Galatz, and Braila (Liverpool, August 14).

*Clan Line.*—S.s. Clan Mackinnon for Bombay and Persian Gulf (Birkenhead, August 6); s.s. Clan Cumming for Colombo, Madras and Calcutta (Birkenhead, August 11); s.s. Clan Mackenzie for Bombay and Persian Gulf (Birkenhead, August 18); s.s. Clan Macbride for Colombo, Madras and Calcutta, (Birkenhead, August 18).

*Cunard Line.*—S.s. Tyria for Gibraltar, Algiers, Malta, Piraeus, Patras, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, and Sulina (Liverpool, August 20; Glasgow, August 25; and Swansea, August 27).

*Ellerman Line.*—S.s. City of Oxford for Gibraltar, Malta, and Alexandria (Liverpool, August 12).

*Ellerman's "City" Line.*—S.s. City of Baghdad for Calcutta (Birkenhead, August 8); s.s. City of Benares for Calcutta (Birkenhead, August 17); s.s. Lorenzo for Bombay and Karachi (Birkenhead, August 23); s.s. City of Cairo for Calcutta (Birkenhead, September 3).

*Ellerman "Westcott and Laurance" Line.*—Steamers sail fortnightly for Mediterranean, Egypt, and Levant ports.

*Glen Line.*—S.s. Carnarvonshire for Port Said, Port Swettenham, Singapore, etc. (London, August 11); s.s. Pembrokeshire for Port Said, Port Swettenham, Singapore, etc. (London, August 25); s.s. Gleniffer for Port Said, Port Swettenham Singapore, etc. (London, September 8); s.s. Glengyle for Port Said, Port Swettenham, Singapore, etc. (London, September 22).

*Glynn Line.*—S.s. Ravenspoint for Genoa, Leghorn, Naples, Catania, Messina, and Palermo (Liverpool, August 5).

*Harrison Line.*—S.s. Politician for Calcutta (Liverpool, August 9; s.s. Craftsman for Calcutta (Liverpool, August 27).

*Henderson Line.*—S.s. Chindwin for Port Said and Rangoon (Birkenhead, August 10); s.s. Burma for Port Said and Rangoon (Birkenhead, August 25).

*Holt Line.*—S.s. Demodocus for Port Said, Port Swettenham, Singapore, etc. (Birkenhead, August 12).

*Johnston Line.*—S.s. Cundall for Galatz and Braila only (Liverpool, August 6); s.s. Aviemore for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, August 20); s.s. Venice for Piraeus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, August 27).

*Maindy Line.*—S.s. Maindy Transport for Antwerp and Moroccan ports (London, latter half of August).

*Moss Line.*—S.s. Karnak for Gibraltar, Malta, Piraeus, Syra, Smyrna, Salonika, Constantinople, Bourgas, Varna, Constantza, and Sulina (Liverpool, August 6).

*P. and O. Line.*—S.s. Kaisar-i-Hind for Bombay (London, August 12); s.s. Plassy for Bombay (London, August 19); s.s. Kashgar for Bombay, Colombo, Madras, and Calcutta, (London, August 26); s.s. Nore for Colombo, Madras, and Calcutta, (London, September 9).

*P. and O. British India Line.*—S.s. Chanda for Bombay and Karachi (London, August 6); s.s. Nirvana for Colombo, Madras, and Calcutta (London, August 20); s.s. Hatarana for Bombay and Karachi (London, August 27); s.s. Nardana for Colombo, Madras and Calcutta (London, September 3); s.s. Australia for Bombay and Karachi (London, September 10).

*Prince Line.*—S.s. Glendhu for Tunis, Malta and Alexandria (Manchester, August 12).

# COMPANY MEETINGS.

## BANK OF ROUMANIA.
### Outlook Favourable.

The ordinary annual general meeting of the Bank of Roumania, Ltd., was held on July 27, at Winchester House, Old Broad-street, E.C., Viscount Goschen, C.B.E., presiding.

The Secretary (Mr. H. Locke) having read the notice convening the meeting and the report of the auditors.

The Chairman said: Gentlemen,—In rising to move the adoption of the report and the accounts for the year ending December 31 last, I must first refer to the regrettable death of the late Earl of Bessborough, who was our Chairman for many years and a member of the board of the bank for nearly a quarter of a century. His absence is keenly felt by us and very much regretted. His death was followed within a few months by that of Mr. Pyrame Naville, who had been connected with us for an even longer period. Lieut-Colonel Sir Albert Stern, and Mr. C. de Cerjat have been appointed by the Board to the vacancies thus caused, and you will be afforded an opportunity at a later stage of re-electing them, should you so desire.

I assume that, as usual, you will take the directors' report and the Balance-sheet as read. As you will see from the report, the trading accounts for the year, after deduction of the dividend of 5 per cent. paid in December last, and after making provision for bad debts, income tax, etc., writing down investments in British Government securities to market value and placing £2,000 to pensions fund, show a credit balance of £13,231 os. 9d.

This sum, in view of the unsatisfactory state of the exchanges, has been transferred to a contingency account. I am sure the shareholders will agree that, in view of the great development which may be looked forward to in Roumania, and, in order that we may be in as favourable a position as possible to participate in this development, this is the wisest policy to adopt.

I am very pleased to say that during the past year Roumania has made considerable progress towards the re-establishment of a normal state of affairs. The production of petrol, which in 1919 was 917,276 tons, was for the year 1920 1,030,086 tons, as compared with 1,544,847 tons in 1911. Last year's harvest was not as good as might have been desired, and, in addition, the area under cultivation was considerably below the normal. As regards the prospects for this year, practically all the area possible of cultivation is sown. A little damage has been done to the wheat by the recent heavy rains, but the maize crop has benefited considerably, and, although unfavourable reports were recently circulated, the latest advices received by us from Roumania are to the effect that, speaking generally, the outlook is very favourable, and I might add that in some quarters it is thought that the crop will be an exceptionally good one.

The past year has been marked by a new factor in the commercial development of Roumania—the creation of a number of companies, with purely Roumanian capital, formed for industrial objects. These companies so far have not achieved their full measure of success, owing to the fact that they are hampered in their acquisition of machinery by the adverse rate of exchange.

The effect of the unfavourable exchanges still weighs heavily on the economic life of the country, and, although the country in itself, from the fact of its being chiefly agricultural, is very prosperous, yet commercial and industrial affairs, owing to their dependence on foreign sources of supply for their requirements, are naturally very much hampered by the uncertainty of exchange. It is to be hoped that, with the possibility of bigger exports of grain, oil and wood in the near future, this exchange difficulty will gradually be overcome.

In conclusion, I should like, on behalf of the Board, to thank the managers and staffs, both at home and abroad, for the valuable assistance they have rendered in the conduct of the bank's business, and which we most warmly and thoroughly appreciate. I beg to move the adoption of the report and accounts.

General the Hon. Sir H. A. Lawrence, K.C.B., seconded the resolution, which was carried unanimously.

Lieut.-Colonel Sir Albert Stern, K.B.E., C.M.G., and Mr. C. de Cerjat were re-elected directors to fill the vacancies on the Board, and the retiring director, Mr. E. W. H. Barry, was re-elected.

Messrs. Jackson Pixley and Co., having been reappointed auditors, a vote of thanks to the Chairman and directors and the management and staff concluded the proceedings.

## EGYPTIAN DELTA LIGHT RAILWAYS.
### Increased Expenditure.

The annual ordinary general meeting of the Egyptian Delta Light Railways, Ltd., was held on July 28, at Winchester House, Old Broad-street, E.C., Sir William E. Garstin, G.C.M.G., G.B.E. (the Chairman), presiding.

The Secretary (Mr. F. J. Horne) having read the notice convening the meeting and the report of the auditors,

The Chairman, in moving the report and accounts, said that their earnings amounted to £496,084, an excess of £89,388 over those of the previous year, which were £406,696. The figures for 1920 established a record up to date, and this record had been passed in 1921. Regarding the results from the point of view of their gross earnings alone, it must be acknowledged that 1921 had been a favourable year for their undertaking. There were however, other aspects of the year's working which gave cause for thought as regards the future. Of those the most serious was the heavy increase in their working expenses. He might say at once that that increase in their working expenses was due to causes entirely beyond their control; that was to the situation produced by the war. If they considered this situation they would readily understand why their expenditure had thus increased. The economic conditions existing throughout the world and the abnormal rates of exchange prevailing everywhere had produced in Egypt, as in most other countries, a severe financial crisis. Large increases in the cost of living and in the prices of labour, materials and the necessaries of life had occurred in all countries. The result had been an almost complete stagnation of trade throughout the world. In the case of Egypt, the uncertainty regarding the political situation and the unrest still existing in that country had added to the difficulties of the position. It was unnecessary for him to tell them that in the case of any undertaking as a railway such conditions were distinctly adverse to its being worked upon profitable and economic lines. He felt sure that they would agree with him in thinking that, under the very exceptional circumstances that existed, the results of last year's working were the reverse of unsatisfactory. Nevertheless, as he had already said, there was reason for serious thought as regards the future, and, moreover, no one could foretell how long present conditions might last.

In 1920 they carried 6,502,599 passengers of all classes and their receipts were £261,989. In 1921 they carried 7,389,149 passengers, with receipts amounting to £333,113. The increases last year were then :—586,550 passengers and receipts £71,124. 515,070 tons were carried on their lines last year as compared with 545,783 tons in 1920. The decrease was 30,713 tons. In spite of this the goods receipts in 1921 showed an increase of £18,076 as compared with 1920. This increase was due entirely to the increased rates charged for transport. In comparing the variation of the chief commodities carried it would be found that building materials, coal, fruit and vegetables, all showed increases in 1921, while cotton, seeds, and manure all showed decreases. The main decrease was in cotton.

The increase in their expenditure last year practically extended to every branch of the service. Increases occurred in maintenance, locomotives, rolling stock, traffic and general charges. He had already explained that their expenses for the year were seriously affected by the exceptionally high cost of fuel, labour and materials of all kinds. They were also obliged in 1920 to increase the salaries of their staff in all classes. He informed them of that fact last year and gave them the figures, but they only felt the full effect of the increased charges in 1921.

Those increases were necessitated by the fact that the Government (including the State railways) had increased the salaries of all its services owing to the high cost of living. At that time, too, much unrest and agitation prevailed throughout the labour world, and in order to avoid the possibilities of strikes and discontent which would have seriously affected their working, they were obliged to increase the salaries and improve the position of their workers. That this was wise had been proved by the tranquillity which generally reigned among them during last year. He must impress upon them that those increases were just and could not have been avoided.

The report and accounts were carried unanimously, the declaration of a dividend of 5 per cent. on the preference shares was approved, the retiring directors were re-elected, the auditors re-appointed, and a vote of thanks to the Chairman and directors, and also to the agent and general manager, and the staff, both in Egypt, and in London concluded the proceedings.

## ALGERIAN PHOSPHATE INDUSTRY.

According to an American consular report there was a total production of 502 931 metric tons of phosphate in Algeria during 1920. Of this amount, 351,221 metric tons were exported. During the first quarter of 1921 the production amounted to 133,106 metric tons, an increase on the production of the corresponding period of 1920, which was 88,826 metric tons. The statistics, however, show a decrease from the last quarter of 1920, during which period there was 172,494 metric tons produced. The exports of the first quarter of 1921 are given as 82,595 metric tons compared with 44,335 metric tons for the corresponding quarter of 1920 and 128,769 metric tons for the last quarter of 1920.

## THE HOUSING PROBLEM IN BEYROUT.

The return of many Syrians from North and South America, the presence of the French army of occupation, civil officers, European commercial travellers, tourists, and refugees have together caused an unprecedented housing shortage in Beyrout which is becoming a serious problem, (says an American consular report). The local government has attempted to control the rents by a decree, but the upward trend continues. The several hotels deserving of mention can accommodate only about 250 persons in all. The city, with a population of 190,000, has no first-class hotel. Building material (exclusive of wood, cement, and steel) is easily obtainable in Beyrout. Labour is cheap and stonemasons are highly skilled. Buildings are usually made from sandstone quarried in the vicinity of Beyrout. Such buildings if steel beams be used, require little repair.

The directors of the London County Westminster & Parr's Bank Limited have declared an interim dividend of ten per cent for the half year ended June 30th on the £20 shares, the maximum dividend of 6¼% on the £1 shares for the same period.

## ON CHANGE.

### Markets Inactive but Firm.

*(From our own Correspondent.)*

London, Friday.

A firm tone has continued to prevail during the week, but business has been, if anything, more restricted than ever owing to the holiday season. In the autumn I shall not be surprised to see a considerable change come over the scene, for by that time the effect of the improving trade ought to be felt.

Gilt-edged securities have been strong. Consols are 49, while War Loan Fives are 88 and Fundings 71⅛. As was to be anticipated the Port of Calcutta 7 per cent. Loan was a great success. Indeed, investors seemed to take to it with the same zest as they displayed in regard to the Government Loan. The way in which both loans have been taken up shows that there will always be adequate support for sound issues, and also that we have reached the end of high-yielding gilt-edged securities. Henceforward the trend will be downwards.

There have been no developments so far with regard to Near Eastern Loans. As my readers are aware there are two of these on the tapis. But I imagine that nothing will be done until the exchanges improve which they may be expected to do in the autumn.

There has been a certain amount of irregularity in the Industrial group, and in some directions weakness developed. British Oil Cakes have deen dull. Iron and steel shares generally have been weak, but textiles have been fairly firm. Bank shares have shewn notable strength during the week, Chartered Bank of India and the National Bank of Egypt being among the outstanding features.

There is little fresh to record as regards Oils. The market continues in anything but a stable condition, and for the moment values are moving in the downward direction. However a change may come in this group at any time. The position as regards Rubbers is unchanged. There have been a number of slight declines, but any development of buying would bring about a very marked change in prices.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated July 25 :—Bombay cotton market steady. On July 21 fine M.G. Oomras, July Rs. 340 ; September Rs. 348. In Bombay piece-goods market, reports encouraging ; enquiries from consuming centres due to propitious rains and brisk trade expected soon. Fall in Foreign cloth trade continues at Bombay where dealers await the development of the Swadeshi movement ; Japan-made Khadi now in the market ; local goods moving fairly well and prices steady. Calcutta gunny market, July 23 :—Hessians quiet and rates dropped back a few annas ; heavy goods quiet but firm. Rangoon paddy arrivals fair during week ending July 15 and prices very firm at Rs. 227 to Rs. 230 for both rail and boat. In Rangoon rice market, closing price Rs. 578 on July 21. On July 22 between Rs. 585 and Rs. 577½. No enquiries for new crop. At tea sale on July 19, good selection of useful quality teas from Dooars ; Darjeelings irregular ; few Cachars and Sylhets offered useful ; and few Assams good ; fine teas sold well ; medium grades lower. Teas below six annas were three pies dearer. 48,952 packages sold to date at an average price of 8 annas 8 pies per lb. No change in bank rates.

## TENDERS INVITED.

*Particulars of tenders marked (D.O.T.) are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W. 1.)*

Tenders are invitedfor the following contracts and must be made by the dates mentioned :—

**Egypt.**

Suits.—The Inspector, Model Workshops and Trades Schools, No. 14, Sharia Abdin, Cairo, invites tenders for the supply of dungaree suits for the Cairo and Asyut Model Workshops and Mansura Trades School, August 27.

Calico.—The Surveyor-General, Survey of Egypt, Gitza (Mudfriya), invites tenders for the supply of 2,500 metres calico, 2 metres wide, August 23.

**Yugoslavia.**

Motor Boats.—The Ministry of War and Marine of the Serb-Croat-Slovene Kingdom invites tenders for the supply of twenty motor boats, six of which are described as fast boats for communication purposes, eight as fast boats for harbour and coast service and six as cargo boats for towing and transport. Offers will be accepted for one or more of the classes of boat specified. August 10 (D.O.T.).

Hemp Cloth.—The Direction of the State Monopolies of the Serb-Croat-Slovene Government, Belgrade, invited tenders for the supply of 100,000 metres of Hemp Cloth 76 c.m. wide. A translation of the conditions of tenders, together with a small sample (2 sq. inches) of the cloth required, is available for inspection at the Department of Overseas Trade. Tenders should be addressed to the Direction des Monopolies de l'Etat, Knoz Mihailova Ulica, Belgrade, Yugoslavia, August 16 (D.O.T.).

## GREEK DEBT SERVICE.

The Council of Foreign Bondholders issues the following information, compiled from figures published by the International Financial Commission at Athens, with regard to the revenues assigned under the Law of Control for the service of the Greek debt from January 1 to May 31 (new style January 14 to June 13), 1921 :—

| — | Monopolies, tobacco stamps, stamped paper, Naxos emery | Piraeus Customs. |
|---|---|---|
| | Drachmae. | Drachmae. |
| Gross receipts, May, 1921..... | 6,968,537.99 | 4,078,005.55 |
| Do. do. do. 1920..... | 5,146,104.44 | 4,619,240.65 |
| Estimated receipts for 5 months (Law of Control)..... | 12,041,666.67 | 4,458,333.33 |
| Actual receipts for 5 mhs. 1921 1921..... | 27,486,744.65 | 21,833,153.20 |
| Actual receipts for 5 mhs 1920 ..... ..... | 25,762,452.62 | 25,797,202.55 |
| Difference between estimated and actual receipts for 5 months 1921 | +15445,077.98 | +17,374,819.87 |
| Difference between estimated and actual receipts for 5 months 1920 | +13720,785,95 | +21,338,869.22 |

Note.—Of the surplus over the estimated receipts from monopolies, tobacco, stamps, stamped paper, and Naxos emery, 49 1-5 per cent. is applied towards increasing the minimum rates of interest and sinking fund on the External Gold Loans of 1881 to 1893.

The products of the sales of Naxos emery have been paid in paper drachmae since August, 1920. In the case of the Piraeus Customs, the receipts in gold are included in the above statement at par.

# NEAR EAST MARKETS.

## EXPORT OF ROUMANIAN CEREALS.

*(From our own Correspondent)*

Bucharest, July 20.

In view of the very good cereal crops, the harvesting of which is now in full swing, the management of the railways is organising regular special trains to carry the grain from the inland stations to the nearest small Danubian ports, whence it will be conveyed by barges to the larger Danubian ports and Sulina for exportation.

## SUDAN NOTES.

Khartoum, July 13.

Mongalla Province.—The prospects for crops at the end of May were good as regards the Dinka, Neur, Noru, Yei, and Kajo Kaji districts but very indifferent in the Rejaf and Opari districts, owing to a scanty rainfall. Reports from Latuka state that the crops in that district are promising but backward through lack of rain.

Dongola Province.—Practically all wheat grown in the Government Pumping Areas are to be taken over by the Supplies Department of the Egyptian Army. Irrigation extensions are being carried out in the Gabria Basin, which is being converted into two basins at different levels. All earthwork in connection with the improvement has been completed, and the regulator to control the flow from the upper to the lower basin is under construction. The works were inspected on June 27, by H. E. Sir Herbert Jackson, the Acting Governor General.

The slump in the produce market coupled with the unreasonably high price of sugar has resulted in a greatly reduced consumption of this article.

Berber Province.—The date-palm census in Abu Hamed Merkaz shows an increase of 28,000 over the returns of 1916. The additional trees are nearly all in the central district being chiefly of the Mishrig variety.

During June, wheat fell to PT 240 per 420 rottles, red sagia durrah to PT 142½ per 380 rottles, and maize to PT 100. per 315 rottles. The prices of barley and feterita durrah remained firm.

The sheep and cattle trade is still stagnant, average prices at El Damer being PT 114. and PT 700, per head for sheep and cattle respectively. Exports for June amounted to 719 sheed and 107 head of cattle only.

Halfa Province.—District reports indicate an exceptionally good date crop. Livestock trade shows a slight increase for June.

Kordofan Province.—The average prices of grain in the El Obeid market in June were as follows (in milliemes) :—sesame seed, 737 per ardeb of 330 rottles; dukhn, 569 per ardeb of 420 rottles; durrah (white), 569 per ardeb of 420 rottles; durrah (red), 425 per ardeb of 420 rottles; groundnuts, 784 per ardeb of 210 rottles. There was little movement, and very few sales effected. The cattle trade is at a standstill.

## CURRENT PRICES.

*General Produce.*—Bacon, 181s. cwt; butter 248s. cwt; chillies, 142s. cwt; eggs, 25s. per 120; cloves (Zanzibar) 10½d. lb; cocoa (Ceylon good to fine) 79s. 6d. cwt; coffee (Costa Rica) 137s. 6d. cwt; coffee (East India bold) 120s. cwt; coffee (Mocha Longberry) 103s. 6d. cwt, coffee (Santos superior) 58s. 6d. cwt; lard 90s. 6d. cwt; ginger (washed Cochin) 35s. cwt; nutmegs (110's to 80's) 11d. lb; pepper (Singapore black) 4½d lb.; raisins (Valencia) 87s. 6d. cwt; sultanas (Smyrna) 107s. 6d. cwt; currants (Vostizza) 86s. cwt; sugar (granulated) 59s. cwt; sugar (No. 1 cubes) 63s. 3d. cwt; sugar (white Mauritius) 53s. 3d. cwt; sugar (West Indian crystallized) 48s. cwt; tapioca (fair Singapore) 2d. lb; sago (small pearl) 26s. 6d. cwt; sago flour 15s. 9d. cwt; rice (Rangoon No 2) 21s. 6d cwt; rice (bran Rangoon) £9 2s. 6d. ton; cinnamon (firsts) 1s. 4d. lb; mace (fair Singapore) 1s. 1d. lb; tea (Indian) 7d. lb; tea (Java) 4½d lb; tea (Ceylon) 8½d lb; wheat (Australian) 82s. 6d. qr; wheat (English white) 82s. qr; wheat (La Plata) 83s. 6d. qr - barley (malting) 67s. 6d. qr; oats (English) 45s. 6d. qr; oats (La Plata) 33s. qr; maize (La Plata) 45s. 3d. qr; flour 69s. sack.

*Miscellaneous.*—Cotton (American) 8.71d. lb; cotton (Egyptian Sakel) 15.30d. lb; linseed (La Plata) £22 ton; rape (Toria) £22 12s. 6d. ton; soya beans £15 7s. 6d. ton; castor seed (Bombay) £20 5s. ton; Oils: Linseed £39 2s. 6d. ton; olive (Levant) £82 10s. ton; palm £36 10s. ton; rape (crude) £55 5s. ton; soya £39 5s. ton; petroleum 1s. 10d. gallon; ground nut £49 ton; cotton (crude) £41 10s. ton; shellac (T.N. second orange) 302s. 6d. cwt; shellac (A.C. garnet) 295s. cwt; rosin (American) 20s. 6d. ; turpentine (American) 114s. 6d. cwt; Rubber: Plantation (No 1 crepe) 9½ lb; smoked sheet 8½ lb; fine hard Para 11d. lb.

## OPIUM MARKET REPORT.

Messrs. Barker Brothers, Smyrna, report as follows for the week ended July 16 :—Since forwarding our last report of May 27, the sales of opium on our market amount to 78 cases at 8s. 9d. to 12s. per lb., as to quality. The exchange oscillated from Ps. 500 to Ps. 550 per pound sterling for cheque, and from dollars 0.68 to 0.78 for one Turkish pound, of Ps.100. To-day it is at Ps. 547 per pound sterling and 0.70 dollars for one Turkish pound. The arrivals of old crops ceased on July 8, bringing up the total to 1393 cases against 1745 at same date last year. This week new crop opium has come down, which amounts in all to 6 cases, against 28 at same date last year. Our stock of new and old opium is now 1120 cases.

## NOTES OF THE WEEK.

### *Greek v. Turk.*

A fresh Greek advance has begun, and at the time of writing it is known that the Greeks have attacked in the Lefke region, and that the Turks are retiring. There does not seem to have been any fighting of a serious character as yet; and while the *moral* of the invading force is reported to be excellent, it is clear that the Turks are not only outnumbered, but also disheartened. Turkish deserters are reported to be giving themselves up to the enemy in great numbers; and though the Greek General Staff professes to think that the Kemalists may make a stand at the river Sakaria it almost looks as if Angora may be reached without fighting. The Nationalists evidently contemplate the possibility of losing their capital; for they are reported to be removing their archives to Caesaria. But even if the Greeks should be able to occupy Angora without further opposition, that would not mean that they had reached the end of the story. It would be only the end of a chapter, however satisfactory a chapter from their point of view; and in all probability King Constantine, his Ministers, and his military advisers are quite aware of the fact. If they should then have the courage to offer peace to the enemy upon reasonable terms, they would, therefore, not only be crowning a creditable piece of work, and earning the gratitude of the Allies, but also doing good service to the Greek people as well.

### *An Opportunity for Peace-making.*

For their part, the Kemalists are reported to be in a chastened mood, and it is easy to believe that they would welcome peace. But there is a great difference between wishing for peace and being willing to make sacrifices for it, and it is difficult to see indications of the latter frame of mind on the part of either of the belligerents. M. Gounaris has informed the journalists that the situation is still exclusively in the hands of the Army, which intends to 'smash' the Turks, and the Kemalists appear to have committed themselves so deeply with Moscow that they dare not appeal openly to the Entente for mediation even if they should wish for it. In the circumstances it might be no bad thing if the Allies took action without waiting to be asked. In a letter to *The Times*, Mr. Ameer Ali suggests that "England can still, by a single word, stop this desolating and unjustifiable war." We are unable to share that view, and we regret that it should have been put forward, because it may do harm in the Moslem world, now more sensitive than ever regarding Turkey's misfortunes. But if only the Allies would agree that peace must be made promptly, and would make it clear that they were acting in concert, and meant business, they could certainly put an end to the fighting at an early date. In view of the fact that France is somewhat nettled by the unaccomodating spirit shown by Angora in regard to the Cilician question, while Italy is vexed by the treatment of some of her subjects by the Nationalists, the present time would seem to be favourable for reaching an agreement on this subject at least.

### *"Propaganda"*

That the Kemalists have lately played their cards very badly is hardly to be denied. A little while ago they had a quite good Press in this country, as well as in France; but they have by their utterly unreasonable demands so damaged their reputation, and so estranged goodwill, that very few people can be found to say a good word for them to-day. On the other hand there has never been any difficulty in finding plenty of people ready to say anything that would do them harm; for those who are hostile to them are quite aware of the advantages to be gained by skilful propaganda—and, it must be added, are not burdened by scruples regarding the need of accuracy. In this connection we may note a statement issued through a news agency a few days ago. This interesting communication informed the world that the agency in question had 'learned'—from what source was not stated, but it would not be difficult to guess—that it "was understood" that the British prisoners in the hands of the Kemalists were 'being badly treated.' We are not inclined to credit the statement at all, for with all their faults the Kemalists have not said good-bye to all caution, nor are they lacking in decency. Moreover, we observe that the agency's remarkable statement proceeds to acknowledge that "it is not known where they" (the prisoners) "are at present, although they are believed to be in Angora."

Digitized by Google

It would be interesting to learn how it is known—or why it is 'understood'—that the prisoners are 'badly treated' when even their whereabouts is only a matter of 'belief.'

### *Italy and Egypt.*

The statement by the Italian Minister for Foreign Affairs that Italy had not yet recognized the British protectorate over Egypt, and had made such recognition conditional on the safeguarding of Italian Colonial interests, whether it refers to the Protectorate of 1914 or to the new status of Egypt, serves as a reminder that Italy has never allowed the spirit of the war alliance to cross the Mediterranean. The extent of Italian Colonial interests, as the term is understood in certain quarters in Italy, was indicated by the claims, put forward as the price of Italian support in the war. The course of the struggle as far as the fortunes of Italian arms were concerned did not bear out those claims, and it was generally understood that they had been materially modified. It is certainly desirable that Great Britain, France, and Italy should come to an agreement regarding North Africa, but it is not encouraging to learn that Great Britain, in order to do justice to Egyptian aspirations, will have to make sacrifices in other directions for the sake of Italy's acquiescence. Provided, however, that the latter carries with it a definite undertaking that Italian intrigue in Egypt will cease, Egypt stands to gain by the arrangement. It is noticeable that the Italian Federation of Alexandria has urged upon the Government in Rome the necessity of the maintenance of the Capitulations. This is at least a more straightforward policy than to make the abolition of the Capitulations an occasion for driving a bargain.

### *Yugoslavia and the 'Reds'*

Our Correspondent in Yugoslavia announced, in the letter from him which we published last week, that the Belgrade Government intends to take vigorous action against the Communists; and no time has been lost in giving effect to the determination. At a special sitting the National Assembly by 190 votes to 54, has passed a Bill embodying the Protection of the State and Public Order Law, which will undoubtedly increase the panic that seems to have been caused in Communist circles by the outbreak of public wrath at the assassination of M. Drashkovitch. Under this law anybody destroying public buildings or tampering with the loyalty of the Army is liable to the death penalty; while 20 years penal servitude is the minimum sentence for many other offences. These may be severe measures, but they are not one whit too severe for the offences for which they may be awarded; and Yugoslavia is to be congratulated upon an attempt to make the punishment fit the crime, and on showing those who would destroy organized society, that organized society can on occasion treat them as they wish to treat it. The crime at Delnica has roused the Yugoslavs to a sense of the folly of tolerating Communism in their midst, and public opinion is behind the Government in this matter; and as a result it is announced that the Communist party has been losing members wholesale. The strange thing is that such pernicious doctrines can ever have obtained a hold upon a people so vigorous and so frank as those of the S.H.S. State.

### *A Deputation from Palestine.*

A deputation of Moslems and Christians from Palestine has arrived in London, to lay the views of their fellow-countrymen before the British Government, and to quote the words used by their Secretary to a representative of the *Morning Post*—"confident in the justice and the generosity of Great Britain that she will not permit the ruin of a small people whose destinies are in her hand." It is much to be hoped that their confidence will be in no wise shaken, and that His Majesty's representatives will afford them a full hearing, and give very careful consideration to their views. It would be idle to close our eyes to the fact that the situation in Palestine is very far indeed from satisfactory, and that unless it be skilfully handled it may eventually lead to the wrecking of our policy in the Near East. Sir Herbert Samuel has done extremely well in a particularly trying position, and the blame for the present condition of affairs cannot be laid at his door. It is due rather to our own inconsistency in failing to apply to Palestine, and in Palestine, that doctrine of self-determination on which so much stress was laid in the war, and in connection with which statements and promises were made to the Arabs, which led them on to hopes that now seem unlikely of fulfilment. And, it must be added, the problem has certainly been complicated by the fanatical spirit shown by a section of the Zionists. In this connection it must be remembered that many of the older Jewish residents of Palestine, if not the majority of them, are opposed to the policy of the Zionist Commission, and that other leading Jews—Mr. Morgenthau, for example—clearly regard the policy as outside the field of the practical.

### *The Fears of the Majority.*

The Secretary of the Moslem-Christian deputation now in London has stated definitely:—"We are not against the Jews. We wish to live, as we have lived in the past, in friendship with our Jewish compatriots in Palestine," and there is no reason to doubt the truth of his statement. But he went on to say that he and his friends do protest, "with all the force that a helpless people can evoke," against "the Zionist scheme which will make us helots in our own country, or drive us from that country." Writing in the *Daily Telegraph* on the same subject, Mr. Perceval Landon declares that the restoration of the Jews to Palestine is "to the Arab of Palestine . . . . nothing short of robbery—a cynical theft of the land which was Arab before the Children of Israel entered it, and still is Arab to-day." A little later the same writer refers to the impossibility of allowing the 68,000 Jews to take the leading part in Palestine with its 500,000 Arabs and its 60,000 Christians and to "the practical hopelessness of forcing Jewish authority upon the country." These facts, and others, certainly make us inclined to share the doubt expressed that the British Government may have lent its support to an attractive scheme without due consideration of the means by which it could be realised. If that be so, it has rendered no better service to the Jews than it has to the Arabs, and it had better take stock of its position before it becomes too deeply involved to avoid disaster. By giving the newly arrived Deputation a full and careful hearing it will at least have a chance to learn the views of the overwhelming majority of the inhabitants of Palestine.

### *The Indian Congress Committee.*

Renewed attention has been directed to the political situation in India by the discussions of the extremist body which, with a sound appreciation of the value of a name, still describes itself as the Committee of the "National" Congress. Its attitude had been widely discussed in advance. The results of Lord Reading's personal intervention were quickly seen to be less than some enthusiasts had hoped; the surface drift of opinion appeared to be setting definitely towards the left; and last month anticipations were current in India that the Congress would formally declare itself a republic, or at least adopt what is spoken of as civil disobedience, a policy the essence of which is organised refusal to pay taxes. These anticipations have been falsified. As yet there is no republic; general civil disobedience has been postponed in favour of activities of a more commercial nature and, though it is recognised that individual provinces may feel themselves impelled to stop paying taxes, they have been instructed to obtain the consent of the central body before taking definite action. The principal measure favoured by the majority of the Committee is the boycott of imported cotton goods.

### *The Boycott of Manchester.*

The logical bearing of this boycott on the political situation is not immediately apparent, but some observers already claim to detect the working of the well-known principle *do ut des*, for Bombay, which has subscribed so largely to the funds of the agitation, is the centre of the Indian cotton industry, and prices were rising there last month in anticipation of a boom in the staple product of the city. No one would dream of suggesting that the saintly leaders of the extremists would knowingly enter into such a transaction, but on some previous occasions their knowledge of human nature has proved to be at fault, and it is conceivable that Mr. Gandhi is destined to be saddened once again by the wiles of designing persons. Whatever the logic may have been, the boycott has been started; it is an ugly fact for India, and also for those labour leaders in England who have lent their support to the extremist cause, but we must for the present postpone an examination of its probable consequences, and content ourselves with recording that the Committee decided also to boycott the visit of the Prince of Wales, a decision which was generally foreseen, but which was adopted only after strenuous opposition.

### *The Attitude of the Moderates.*

More significant perhaps than the resolutions adopted by the Committee is the difficulty it experienced in reaching them. There was a time when this body appeared before the public in the garb of unanimity, but on this occasion the reports tell of prolonged and heated discussions, and even in some cases mention the names of the opposition. This change may be read as indicating progress in the arts of politics, but at the same time it must be remembered that minorities in India have not yet learned to work heartily for measures which they disapprove; there is obviously strong driving-force behind the various resolutions, but it is less than the full force of the committee, itself representing only a part of Indian opinion. The immediate interest of the situation lies in the attitude to be adopted towards the boycott by the moderate politicians in the legislatures. To observers in England, it seems as if they must now choose between open warfare and disastrous eclipse, but the cross-currents of opinion are so numerous that no accurate diagnosis is possible at the moment.

## THE WEEK AT HOME.

LONDON, Monday Evening.

### Peaceful Politics.

Politically the week has been unusually quiet—not the quiet that precedes a storm, let us hope, but the quiet that presages more peaceful times. From Ireland there has been practically no news. Mr. de Valera has not yet returned his answer to the Prime Minister, but it is generally accepted that the longer the truce remains in being the more difficult will it be to resume hostilities in the event of the negotiations breaking down. The revelation that an old lady named Mrs. Lindsay was shot some months ago as a spy by the Sinn Feiners, has however, created a painful impression, and has been commented on in strong items by the *Morning Post*—which incidentally has also been urging the Ulster Cabinet not to meet the Sinn Fein leaders on Irish soil. It remains to be seen whether this advice will be accepted.

The Imperial Conference has come to an end. It has been mostly concerned with the Japanese Alliance, with defence, and with airships and wireless. The proposed additional conference on the constitutional relations of the Empire has been, as I anticipated some months ago, turned down by the Dominion Prime Ministers. It was advocated mainly by the centralising and federalist school at home, whose organ is the *Round Table*, but it found little echo in the Dominions, where autonomy is always the watchword.

Meanwhile discussion continues as to the Washington. Conference. A number of false hares has been started, and the matter appears to be generally rather complicated. I should like to think the prospects were bright, but I am bound to admit that the Press seems to be more optimistic than the situation at the moment actually justifies.

### London Government.

The Government are appointing a Royal Commission to enquire into the administration of Greater London. This is not in consequence of the grievance of Poplar, to which I referred last week—the step had been determined on some time before—but if the scope of the Commission does not include an inquiry into the equalisation of rates, which is Poplar's particular grievance, there will be trouble. The Commission is in fact overdue, for London is a tangle of conflicting authorities and administrations, and these must result in overlapping and waste, over-staffing and multiplication of correspondence, and other absurdities. The subject

Leaders of the World's Office Equipment and Filing Systems.

Digitized by Google

is so complicated that it is said only two men have ever mastered the intricacies of London Government; of these two, one is reputed to have had a mental breakdown from the accumulated mass of detail, and the other to have declared that Balkan politics were child's play in comparison.

Apart from the existing tangle, London has grown enormously of late years, and is still growing. Thousands of new houses are being put up at Ilford, Sydenham, Welwyn, and Acton; and since all their inhabitants earn their living in London, there is some case for including them in the county; as indeed there is also for including older places like Wimbledon. Some of the advocates of a greater London would indeed go so far as to incorporate Croydon and Sutton on the South, Romford on the east, and Watford on the north-west; they point out that these are really dormitory suburbs. In that case the population of London would be over ten millions.

**Rates and Local Government.**

It would not be very surprising if the whole question of local Government were not raised afresh as a consequence of this enquiry into London Government. From all over the country comes the complaint that the existing areas are wrong, the administration wrong, and the incidence of rates wrong. There seems to be something in these complaints. Why, for instance, should the rates in Kent be so much higher than those in Essex? As Kent is a rich county and Essex is poor, one would have expected a lower rate to have sufficed in Kent, but the reverse is the case. Then, again, there is the problem of the relation between Imperial and local Government. Mr. Lloyd George admitted that this was ripe for treatment in 1914; it is now long overdue. As a matter of fact, the rates are now in many cases a greater drain on the pocket than the tax, but with apparently less excuse; for half the taxes are due to the war, but the rates are not.

**Who Wants Runnymede?**

We are getting hardened to seeing historic properties put up for sale, but it gives one something for a shock, even in these days of change, to see Runnymede and Magna Carta Island in an auctioneer's catalogue. A good deal of indignation is being shown at the fact that the property is being sold, by order of the Government; even the most stalwart of Anti-Wasters should regret this economy.

Land everywhere is being sold, and some very interesting figures have recently been published in *The Times* to show why the fresh estates are being realised. The fact is that they only returned a small yield before the war, but the increase of taxation has turned that profit into a heavy loss. I notice that the Duke of Portland the other day referred to the possibility that he might have to give up his estates, and even his house; yet the Duke is one of the great land-owners of the country. Unfortunately the larger the holding, the worse the loss.

**The Dean's Deductions.**

There is little need to wonder that the Dean of St. Pauls is not popular with his brother clerics. The latest dictum of Dean Inge is that the Anglican clergy "understand the least, and take the worst measure of human affairs, of all mankind that can write and read;" from which he deduces that "the Church is more divided than any other religious body, and there is no agreement as to what it should stand for." For all that, I find that a good deal of hope is expressed by Churchmen to the work of the new National Assembly. It has shown a business-like spirit at its meetings, and appears to be taking a legitimate place as a parliament of the Church. It has certainly revealed differences of opinion, but that is what parliaments are for; and I cannot help thinking that the reasoned optimism of its members may be of more use to the Anglican Communion than the savage pessimism of its leading dean.

**The Shortage of Water.**

The drought has been officially broken by a few minutes' rain which wet the London pavements, and there have been moderate falls in the north. But the position is now becoming serious; for the springs are becoming depleted, and some of the smaller rivers are following the example of the ponds, and drying up. Only steady and frequently repeated rain over a period of weeks will replenish the springs, and since the consumption of water in the great cities is enormous, it will take a long time before the reservoirs are restored to their normal height. Incidentally the great heat and drought is beginning to produce its inevitable effect on the infantile death-rate. I suppose the holiday-makers would object to a wet August, but I doubt whether anybody else would mind; the farmers, having got in their wonderful crops of wheat and oats, now pray for rain to save the roots and their suffering stock; the doctors ask for rain every morning, and if the Metropolitan Water Board ever uttered a prayer, which is doubtful, it would pray now.

**The Servant Problem.**

There was a time, it is understood, when the one topic of the boudoir was the excellencies of prospective husbands, and the deficiencies of actual husbands, but those useful household ornaments no longer count. Housewives are faced by a worse problem than a shortage of husbands—who can be enslaved for life when caught—in the shortage of servants, who come as a favour, and walk out of the house on the least provocation.

It has been discovered that the Ministry of Labour is partly responsible. Instituted for the purpose of putting employers and employed into touch—which it has notoriously failed to do—it is said now to advise domestic servants not to take posts unless they are treated as daily maids whose work practically finishes at 5.30. As the work of a house does not finish at 5.30, mistresses naturally detest the idea of the "daily maid," and they have been tackling Dr. Macnamara on the subject. His answers seem rather confused and unhappy, but then it is not easy to justify a useless department. It would be a good thing if the Government were to abolish all the Labour Exchanges; for it is notorious that the best working men never use them, and they are merely costly centres for distributing the unemployment dole, an unfortunate experiment which should have been stopped long since.

**Week-Ends and Holidays.**

The railways seem to be accommodating the crowds of holiday-makers with fair success. The last week in July is proverbally the busiest in the year for seaside traffic, but most people go to their destination comfortably and punctually. The speed of trains is not quite so fast as in pre-war days, however; it takes, for instance, just over four hours instead of three-and-a-half to get to Manchester. But probably this is meant as an illustration of kindness of heart on the part of the railway companies; for nobody could really want to spend longer in Manchester than absolutely necessary.

OCELLUS.

# THE NEAR AND MIDDLE EAST.

*(From Our Own Correspondents).*

## YUGOSLAVIA.

*Zagreb, August 2.*

**Communism and Politics.**

The summoning of the Skupshtina to pass a special law of Defence of the Realm to deal with the Communist outburst has to a certain extent revived interest in politics, which had waned owing to the recess and had been overshadowed by the Bolshevist activities.

There seems to be no doubt that the whole Bolshevist plot is inspired from Moscow. The prime mover is said to be one Marco Gagliardi, chief of the Austro-Hungarian section, who had received instructions to carry out a campaign of anarchy in Yugoslavia. He was helped by a former commandant of Bela Kun's Red Army, and a plot had been prepared to murder the Crown Prince, M. Pashitch, M. Drashkovitch and M. Tomlenovitch, until recently Ban of Croatia, and other prominent persons including M. Pribitchevitch. The details were left to terrorist committees which were formed within the country, whose method was to select perverted young men and form them into "troikas," or parties of three, of whom one would carry out the attempt, with the others to assist and act in reserve. The first sign of activity was the attempt on M. Drashkovitch early in May, which happily failed. The lamentable success of another "troika" ten days ago is evidence of their determination. The attempt on the Crown Prince was the work of another "troika." In their investigations the police have unearthed and stopped in time the plots against M. Pashitch and M. Pribitchevitch.

The tools selected for the dirty work seem all to be very youthful, and sick in brain as well as body. The organisers took a great deal of trouble to find disappointed youths, lads of bad character and perverted minds. Such material is easy to mould. Meanwhile the other "troika" is under lock and key, Aliagitch, the actual assassin of M. Drashkovitch, and his comrades Colakovitch and Lopanditch. Their programme of murder included also Dr. Ribar, Speaker of the Skupshtina, M. Pribitchevitch, and General Hadjitch, till recently Minister of War. Another proscribed man was Dragisha Lapchevitch, leader of the Socialists in Serbia. Unfortunately one dangerous individual is at large, Rudolph Hercigonja, who succeeded in escaping before the police had sufficient information. It is characteristic that he is reported to have escaped to Hungary, and there have been received with open arms. It was he who inspired the "troika" of Aliagitch and worked upon their feelings.

Another matter shows the raw material available for criminal purposes in the callow youths who are demoralised and perverted. A whole gang of thieves has been arrested in Skoplje who have stolen goods to the total value of 200,000 dinars, made up of all manner of things, from postal packets and sausages to marble slabs and sheep. The sad part of the business is the fact that they are all quite young, some mere lads, and most of them still schoolboys. They have been corrupted by a scoundrel who keeps a sweet shop in Skoplje. They are well-dressed young fellows, and mostly of good families. They are quite defiant and impudently admit their guilt, decorating their statements with Latin quotations. Where the canker lies is hard to say.

SCHOOL OF ORIENTAL STUDIES.
London Institution, Finsbury Circus; E.C. 2

**ORIENTAL LANGUAGES AND RELIGIONS.**

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

For particulars, apply to Sir E. DENISON ROSS, Director.

**Action against Communism.**

The country is now thoroughly awake, realising that once more it is threatened by a cruel and unscrupulous foe, and the danger is being met in the same spirit in which the less insidious foreign enemy was faced. A mass meeting of citizens in Belgrade has formed a league of protection, a "*Narodna Odbrana*," a title which has played a large part in Serbia's modern history; and the Legislative Committee has passed a draft Bill for the Skupshtina which is an emergency Defence of the Realm Act. The first step is the most logical, and that it is the forcible dissolution of the Communist Party. In vain the leaders declare that they are idealists, whose aim it is to bring about Communism by lawful methods. Nobody wants these people, least of all the terrorists, who have little use for them except as a mask for their underground action. What has clinched this point is the discovery of the fact that Steyitch, who threw the bomb at the Crown Prince received his instructions in the party's committee room inside the Skupshtina itself. So the party is to be wound up and forbidden, and their elections declared void. This will involve 58 by-elections, the results of which will be interesting to see. Propaganda in favour of Communism, Anarchism and Terrorism is forbidden subject to a penalty of death, or, under conceivably extenuating circumstances, penal servitude for twenty years. The Communist press is also forbidden, and of course, helping Communist action, whether at home or abroad, in any way, or interfering with the authorities in their campaign against it, will be dealt with with the utmost rigour. Among other provisions all members of the Communist party are to be disqualified from holding any public office, or to be in government service. All their organisations are closed, and their property sequestered. In introducing the Bill, the Minister of the Interior stated that it was based on similar laws obtaining in the United States and in Switzerland. There is little doubt that it will be passed by the house without delay.

Meanwhile, of course, the police are being very active, and are conducting searches in the houses of all who have been in any way connected or associated with the Communist Party, and it is reported that a large number of hidden bombs and weapons have been found. The majority of the active agents seem to be Hungarians, or former Austro-Hungarian subjects.

## GREECE.

*Athens, July 30.*

**The War in Asia Minor.**

It goes without saying that the Greeks expected to win their new war, but not even the most optimistic patriots ever hoped that after three weeks the beginning of the offensive the road to Angora would be open to the Hellenic forces and that Mustapha Kemal Pasha's army would be reduced practically to half its original strength. That the Greek victory is complete there cannot be the slightest doubt, and Kemal's *communiques* which appear from time to time in certain European papers announcing imaginary successes, such as the re-occupation by the Turks of Afion-Karahissar and Oushak, do more harm than good to the vanquished, and cause a good deal of hilarity here. The official lists of prisoners are not yet ready, and although reports bring their total number up to 50,000, this figure is without doubt greatly exaggerated, the correct number being somewhere near 25,000. The war material which fell into the hands of the victors is also said to be enormous.

Apparently nothing has yet been decided on the next move of the Greek Army. It is realised here that although the occupation of Angora would be a great moral victory, and would place a very strong trump card

Digitized by Google

in the hands of the Greek diplomatists when the time for the peace *pourparlers* arrives, Napoleon's blunder in his campaign against Russia should not be repeated in this instance, and that there should not be any mistake upon which is the real capital of Turkey. The railway line from Eskishehir leads to Angora in the east, and to Constantinople in the north, and the Greeks are now in a dilemna as to which would be the best and surest route to follow. Those few who imagine that the solution of the Near East problem is now in sight will be painfully surprised to hear that the Hellene has sudenly lost all interest in the Treaty of Sèvres; and that it would require a good deal more than the Smyrna vilayet to satisfy his ambition. This is what the Athens *Times* (Chronos) writes:—

Greece having concentrated all her forces, having spent her last penny in order to prepare for the offensive, and having, for the fourth time, taken her sons away from their homes in order to throw them into the struggle, would be extremely silly to do all that for the sake of the small slice of territory which the Treaty of Sèvres awarded her. Had our army been defeated we should have been unable to retain Smyrna, Thrace, and Macedonia, but being victorious, we could not possibly accept any other solution than that which would ensure liberty to the entire Hellenism and not to one vilayet alone. Greece is fighting alone against Turkey, who is backed by the material and moral encouragement of great protectors. She is therefore obliged to do her very utmost in order to overcome so many united enemies. But the enormous sacrifices which she has made, the terrible wearing out which the country is now undergoing, and the inconceivable exhaustion which she will feel immediately after the termination of the war, could not be repaid by the morsels which are given to her by the Treaty of Sèvres. Greece will therefore ask for more than has been given her; she will ask for everything because she has risked everything in this great struggle from which she is emerging victorious.

Practically all the other papers write in the same strain and advise the occupation of Constantinople.

**A War Council at Kutahia.**

On Sunday morning M. Gounaris proceeded to Smyrna, and thence by special train to Kutahia in order to be present at the war council which took place under the presidency of King Constantine. It is said that very important decisions on the future action of the Greek army were reached, but so far nothing has been communicated to the Press. It is generally thought, however, that the Hellenic forces—or at least the bulk of them—will advance on Angora. If there is any truth in the report that the Kemalist Government has been or is about to be transferred to Sebastia, this would be taken as an indication that the Turks are not in a position to offer any serious resistance; and the occupation of their capital should prove a comparatively easy task for the Greeks. The noticeable change in the tone of the European and particularly the French Press with regard to the Greek affairs, is favourably commented upon by the Greek papers, which point out that Europe is at last beginning to see things in their proper light, and realises now how cleverly she had been bluffed by the bogey of Anatolia.

## BULGARIA.

*Sofia, July 25.*

**Political Movements.**

M. Stambolisky is expected to go abroad early this week. Although no definite announcement has been made, it is thought that his trip will be in the nature of a holiday rather than of an official tour. It is said he will first visit the Tirol, and afterwards Switzerland. After his severe illness in May he took virtually no holiday, and in view of the many measures that are due to come before the Sobranje during the Autumn session, it will do him good to have a complete rest.

It is possible that in September there may be a further reconstitution of the Cabinet, as M. Bakaloff, Minister of Public Works, may resign, and become President of the Sobranje, and M. Manoloff, who is now President will replace M. Bakaloff. There are also stories afloat concerning the coming resignation of M. Oboff, Minister of Agriculture. However, the coming month should be a quiet one.

**A Note to the Allies.**

On Wednesday the 20th, the Bulgarian Government addressed another Note to the representatives of the Great Powers at Sofia, concerning the persistent rumours that have been in circulation regarding Bulgarian intrigues with Moscow and Angora, the report that ex-King Ferdinand had been visited by M. Dimitroff and other Government officials, and the allegations that Bulgaria was not loyally executing the terms of the Peace Treaty. The Note contradicted all these rumours, and declared that the policy of the Agrarian Government remained unchanged—to fulfil the country's obligations, and live on good terms with all nations.

In this connection I may refer to the statement, published in an English newspaper, early this month, that the British Minister here had warned King Boris and M. Stambolisky that it would be most unwise to allow ex-King Ferdinand to return. There is the highest possible authority for stating that the Minister never gave any such warning.

**An Unwelcome Development.**

Almost any foreigner, either resident in, or visiting Bulgaria, will affirm that the attitude of the Bulgarians towards foreigners has always been most correct and polite. The Military Missions that represented the Great Powers during the 18 months following the Armistice conducted their work in a spirit of mutual good will, and in no other ex-enemy country were the relations between victor and vanquished more cordial than in Bulgaria. It is, therefore all the more regrettable that during the last few weeks a suspicion—one has neither the right nor the wish to call it more than that—of chauvinism has made itself felt among a certain section of the public. It has not yet raised its head; but to the careful observer its existence below the surface is evident. Naturally enough the foreigners most apt to encounter this feeling are the Inter-Allied Military Commission of Control. The Commission has now been functioning for about a year, and there have been few, if any, unfortunate incidents; but lately a good deal has been

said about the discovery of hidden arms and ammunition, and it is possible that this has been the cause of the beginning of this new phase. Even when relations were most friendly, there was known to exist a section of "irreconcilables," whose policy was anti-Ally, and who had very little love for any foreigners. Signs are not wanting that of late this section has grown more powerful, and although it represents only an insignificant proportion of the population, it would seem to have a certain amount of influential backing.

**"The Allied Demarche."**

On the 22nd the Ministers of Great Britain, France, and Italy notified to M. Stambolisky that they were charged by their respective Governments to draw the attention of the Bulgarian Government to the fact that there were certain disturbing elements at work in Thrace, and that the continuance of these activities of these elements might have serious consequence for Bulgaria. The Prime Minister replied that the contents of the recent Government Note would explain the intentions of his Government, and that in any case all possible measures had been taken to prevent frontier trouble.

## TURKEY.

*Constantinople, July 31.*

**The Russo-Turkish Treaty.**

One of the most important results of the occupation of Eskishehir by the Greeks has been the immediate ratification of the Treaty concluded in Moscow between the representatives of the Soviet Government and of the Great National Assembly, on March 16, 1921. The text of this treaty has been published in the Anatolian press, and as has been previously remarked in *The Near East*, it contains an exceedingly important clause concerning the Straits. Only five clauses have been made public, of which the first and the fifth are of international importance. The first clause not only contains an obligation on the part of either party to conclude no treaty with a third party without the knowledge and consent of the other, but also a clear undertaking on the part of the Soviet Government to refuse to recognise any treaty imposed upon Turkey without the consent of the Great National Assembly; and further includes the recognition by the Soviet Government of the frontiers of Turkey as defined by the National Pact. The fifth clause is of especial importance to Great Britain and runs as follows:—

> "In order to ensure free communications through the Straits, both contracting parties agree to entrust the drafting of the convention relative thereto to a conference to be subsequently held, consisting of delegates of the countries bordering the Straits and the Black Sea. It is understood that the decisions taken by the forthcoming Conference must not infringe the complete sovereignty of Turkey and the security of the Turkish capital, Constantinople."

It has become the fashion in England to scoff at the Bolshevist menace as a bogey; and the Greeks, who insisted that the Nationalist movement consisted of nothing but bluff, stoutly refuse to believe that there is anything to fear from the Bolshevists so far as military operations in Anatolia are concerned. It is undoubtedly true that many months must elapse before any Bolshevist force worth considering could reach the Western Front in Anatolia, and it is also undoubtedly true that in the interval the Greek army may occupy Angora, Kastamuni, and Konia. And then—?

As a matter of fact, however, it requires little discernment to realise that the real protagonists in the microasiatic drama are not Turkey and Greece, but Russia and the Allies, more particularly Great Britain. The foreign policy of Russia must inevitably be the same whether a Tsar or a Bolshevist dictator control the destinies of the Empire, and no Russian of whatever hue could possibly agree to a settlement of the Straits question without the participation of Russia. The Russo-Turkish Treaty practically amounts to a formal declaration addressed to the Allies to the effect that if the voice of Russia is not to be heard in the settlement of the Straits question, there shall be no settlement. Russia may be in the grip of famine, risings, and rebellions may distract the central Government, disease may be decimating the population of entire provinces, but it may be taken as certain that so long as Russia possess a thousand men capable of holding a rifle, there will be no peace in the Near East without consideration of Russian interests. During the war, Bernard Shaw pointed out that the outbreak of Bolshevism in Russia meant that Russia would be at war against the whole world, and his words have been strikingly verified. Bolshevism may be regarded as a bogey, and the possibility of a Bolshevist army rendering the Turks any effective assistance may be scouted as an absurdity, but the bogey has confounded most of the prophets who have been foretelling its downfall for the last three years, and there are a hundred thousand men in the Caucasus.

**The Central Government.**

The fall of Eskishehir seems to have put new heart into the various little cliques whose highest ideal in life does not extend beyond the loaves and fishes of office. The Cabinet, however, acting probably upon instructions from Angora, is resolutely clinging to office; and indeed it is difficult to see what advantage could be obtained from any other Ministerial combination, except to exasperate the Nationalists. The idea has been noted that when the Greeks have occupied sufficient territory, general elections should be held with a view to convoking a Parliament in Stamboul, which would immediately ratify the peace terms proposed by the Allies at the London Conference. The idea is sound enough in many ways, but there are several obvious drawbacks. For the time being, at all events, it is unlikely that there will be any change in the present Cabinet.

**The Russian Refugees.**

Once again the question of Russian refugees in Constantinople is claiming public attention. The French who were solely and entirely responsible for their presence here, have whittled down the relief afforded to them until it has reached practically vanishing point. The result is that there are hundreds of unhappy wretches wandering about the streets, and bereft of both housing accommodation and work. It is pitiful to see them sleeping in the streets at night, and one shudders to think what will happen to them if nothing is done before the winter arrives again. To sleep in the open during the summer is not so bad, but the summer does not last for ever—even in Constantinople. To find work for all of them in the capital is out of the question, for there is already acute distress amongst the native population, owing to unemployment. *If* Constantine can cut the Gordion knot of the Anatolian question, there may be work enough for them, but —.

## ALBANIA.

*Tirana, July 20.*

**The Mirdite Incident.**

It is well known that the Mirdites—the Catholics of the mountainous North of Albania—form three bairaks, namely Orosh, Spac, and Dibri; and latterly two other bairaks, Fandi and Kushneni, have been added to the three original communes; so that to-day the bairaks of Mirdita are really five in number, though sometimes they are wrongly considered as twelve—in which last ralculation Kabash, Selita, Thach, Berisha, Bugjoni, cbali, and Puka are included.

After the death of Bib Doda, at the end of the year 1919, Marko Gjoni was regarded as the chief of the five bairaks of Mirdita. This man, who is sixty years of age, is absolutely illiterate, of small intelligence and quite unscrupulous. Last spring this Marko Gjoni betook himself to Tirana and took the oath to be a faithful defender of united Albania and to do his utmost to preserve order in the mountains. On his return to Mirdita, he was invited by the Serbs to Prizrend. It should be noted here that Yugoslav troops are on the frontiers of Mirdita, and that their presence on Albanian soil handicaps severely the actions of the Albanian Government, seeing that the ways of communication are cut, and a free field is left to Serbian intrigues.

As a consequence of his meeting with the Serbian authorities at Prizrend, Marko Gjoni was won over to their plans. It needed indeed such a creature as him to create difficulties for Albania at the very moment when the Conference of Ambassadors is giving its attention to this country; and to give colour to the belief that Albanian unity is an impossible dream and that the Government enjoys no authority. And so Marko Gjoni returned to Mirdita three weeks ago and assembled the mountain chiefs together at Orosh, exhorting them to declare themselves independent from the rest of Albania, and to proclaim a republic of the twelve bairaks. Marko Gjoni promised help in silver, men, and arms, but in spite of all these promises, he found support only in two bairaks, Orosh, and Selita. All the others refused.

The Government of Tirana immediately dispatched four battalions under the command of Lieutenant-Colonel Fehmi Kosturi, with both heavy and light guns; and this expeditionary force further had officers who were Catholics from Mirdita itself. The troops advanced from Lesh (Alessio) and Puka without meeting any resistance, and since the 15th of this month they have been at Orosh, the whole bairak having submitted fully. Marko Gjoni is at the moment in Serbia as the guest of the Yugoslav authorities.

The Tirana Government is now busily engaged in the organisation of these mountainous districts, where, in spite of the alarming tone and exaggerated nature of Belgrade despatches, there are really no more difficulties.

**The New Government.**

Although for reasons of internal order the Government of Ilias Vrioni resigned, it was a foregone conclusion hat it would be charged with the formation of a new Cabinet. And so it proved. Ilias Vrioni remains President of the Council; Pandeli Evangjeli, the ex-President of the Chamber, becomes Minister of Foreign Affairs; Suleiman Delvina, formerly President of the Council, is Minister of the Interior; Sotir Petsi, goes to the Ministry of Public Instruction; Dhimitri Kacimbro, Minister of Justice; Mehdi Frasheri, Public Works and Agriculture; Tef Curani remains at the Exchequer, and Selaheddin Shkoza at the War Ministry. Most of the oldi Mnisters retain their posts. The admission of Dhimitri Kacimbo, Doctor of Laws, is an excellent sign, the new Minister being an Orthodox Christian and a native of Argyro Kastro, that it to say, he comes from a province which the Greeks persist in claiming for Greece.

**School of Agriculture.**

The difficulties which beset the Government of Tirana do not prevent them from making efforts by peaceful methods for the progress of the country. For instance a Municipal Library has been opened at Tirana, and though as yet it is in a modest building it has already a rich collection of books. Again, the Director-General of Public Health, Dr. Rifat Bey Frasheri, is organising on the best lines the laboratory and the hospital of the town. A measure even more important and of very great service to the country is the creation of a model farm at Valona and of a practical school of agriculture at Lushnia, a small town in the North of the great plain of Muzeka.

## SUDAN.

*Khartoum, July 13.*

From Dongola Province comes news that Government dispensaries, each in the charge of an Assistant Medical Officer, have been opened at Debba, Korti and Argo, and have proved to be so popular amongst the natives that it is hoped to open a fourth dispensary at Kareima early next year.

High temperatures have been experienced latterly, the record being registered at Merowe—119.3 Fahr. on the 3rd June last.

In Berber Province irrigation work in connection with strengthening the Saliba of the Upper Basin at Wad Hamed is reported to be progressing well, and the land is now being cleaned and ploughed preparatory to sowing.

## ASIA MINOR.

Smyrna, July 29.

**The Greek Victories.**

The recent victories of the Greek Army, at first celebrated with frenzied enthusiasm in Smyrna by the dominant Greek population, daily afford less satisfaction to the long suffering Anatolian Greeks, as news arrives of the heavy losses of Smyrna men at the front. A considerable drop in the value of the Drachma was also quite unexpected; and entailed heavy loss to the patriotic Greeks, who naturally anticipated that the value of the Greek money would be enhanced by the Army's success. The only money that has so far increased in value since the fall of Eski-Cheskir, is the Turkish.

**General News.**

H.M.S. "Seraph" (Captain Kirkby) has arrived in Smyrna to replace H.M.S. "Tuscan" which leaves to-morrow to join the Destroyer Flotilla at Buyuk Déré on the Bosphorus.

Sir Harry and Lady Lamb gave a dinner party on July 25, at the British Consulate-General. Besides the officers of H.M.S. "Tuscan," the guests included the new general manager of the Aidin Railway Company, Major-General Raymond de Candolle C.B., and Mrs. de Candolle.

Bournabat Club, represented by Messrs. H. Giraud and E. Whittall played a match against the Cordello Club, represented by J. Giraud and H. Barker, at Cordelio on Wednesday July 27 and the visiting team won, after a hard struggle by 6—4, 10—8,

To-day a motor-car belonging to Mr. H. Giraud was knocked over by an Italian motor-lorry when three of the occupants, two ladies and a gentlemen were severely injured.

## CYPRUS.

Nicosia, July 19.

**Oppressive Heat.**

Intense heat has prevailed, especially on the coast, where the damp is most oppressive. All who can afford to do so are rushing to the hills. Hotels at Platres are filled, and all available houses in the higher villages within reach of Troodos are being taken. Amongst the many picturesque spots on the North Side of Troodos is the village of Kakopetria. Here the Greek Archbishop has sold a plot of land of about 50 donums (about 14 acres) to the villagers, who will construct cottages and bungalows for summer visitors on the site. About 450 persons from Egypt arrived by the last mail steamer.

A new Greek Consul, M. Z. N. Hajjivasiliou, has arrived at Larnaca

The Commissioner of Nicosia, Major Bayley, has convened a meeting of Greeks for Sunday, July 24, to ascertain whether an application to the Loan Commissioners for a loan of £12,000 for school buildings is supported by a majority of the community as required by the law.

# CORRESPONDENCE.

*The columns of "The Near East" are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of "The Near East."*
*Letters must be written on one side of the paper only.*

## GT. BRITAIN AND TURKEY.

*To the Editor of The Near East.*

Sir:—Your Constantinople Correspondent, in his letter published in the issue of "The Near East" of July 7, seems to suggest the basis of a Near Eastern policy. He is of opinion that mercy should be substituted for justice, and expediency for International Law in dealing with Turkey. I really don't think there is much novelty in the suggestion. If the word mercy is made to mean blind fanaticism and hatred, this has been exactly the policy followed in the Near East by the British authorities since the day of the Armistice. Your Correspondent gives in his letter a good illustration of the prejudiced spirit behind it. The main results of this policy have been the following:—

1.—Turkey was in her agony after the war. The best efforts of a friend would not have been sufficient to make her return to life. The blind hostility displayed, the horrors committed in the name of the Allies, coupled with the Greek invasion, have achieved this miracle.

2.—The great British prestige and the passionate love and respect for everything British, the most solid tradition in the Turkish public life since the Crimean War, which had been able to withstand many a crisis, have been systematically destroyed since the Armistice by the English themselves. They have taken pains to prove to the Turks that they were not what the Turks believed them to be.

3.—An unprecedented hatred was stirred up among the different elements of the population, and the Christian minorities were potentially deprived of many excellent opportunities actually within their reach.

4.—The elements of trouble and destruction have been given, literally, by force, a valuable involuntary ally.

If instead of the policy of fanaticism and "expediency," justice and International Law had been upheld, Great Britain would easily have made a tool of Turkey to pacify a large section of the world; much military expenditure would have been saved; and Turkey with her accumulated needs during the war would have become an excellent market for British goods, the basis of a real harmony would have been laid among the different elements of population in the East.

These would have been, from a British and from a world point of view, fine results at a low cost. For Turkey herself the case would be rather different, because there would inevitably be created a situation of dependency for her. She has much more profited by the blunders committed, and the crusading spirit displayed. Although many of us have suffered from it personally, we cannot but feel grateful from a patriotic point of view, to those who are responsible for the blunders. They forced the Turkish nation to overcome the fatigue and apathy of the war, to become for the first time a politically compact nation, to believe in itself, and to create a state of affairs favourable to a real development of the country and the people. The large mass of the educated Turks who never dared to leave Constantinople and to come in touch with the people, have been obliged to do so by the terrors exercised in Constantinople. If our educated class have better qualities of leadership in future, the country will have to feel obliged for it to its would-be executioners.

Your Correspondent speaks of the Malta prisoners. I might tell a different story in this regard. Although formally released on March 27, I am still here in the situation of a political prisoner. So, whatever I say will not be taken as an impartial statement of facts. I only hope that the British public will take interest some day in this matter. After an enquiry, it will be amazed at the character of irresponsible acts committed in its name. *The Near East* has repeatedly alluded, in an indirect way, to this situation by speaking of the wrong done to Rahmi Bey, former Governor of Smyrna.

I think the time has come when a free discussion of the existing facts would be beneficial to every side. Therefore, I should feel grateful, if these lines receive some hospitality in your columns.

I am, etc.,
AHMED EMIN
(Editor of the daily *Vakit*, Constantinople).

Malta, July 17th, 1921.

(Many of the writer's statements and opinions will not stand investigation, but we share his belief in the advantages of open discussion. We are unable to check his statement regarding the circumstances connected with his release, but the trouble is probably due to the failure of the Angora authorities to observe their pledges in regard to the release of British prisoners. The fact that his letter reached us through the ordinary post would seem to indicate that his confinement is not very strict. ED.

## ENGLISH BOYS IN INDIA.

*To the Editor of The Near East.*

Sir,—Would you kindly allow me to call attention to the existence of English boys educated in India. If the inhabitants of any given town or village in England were to be planted down in India only a limited number would be able to afford to send their boys home for education. But boys in India will have to meet Indians in open competition and unless they are as well educated they will go to the wall. It is open to them to go to any of the Indian University Colleges. What they require is an English hostel under English management with as much as possible of the spirit of an English University whilst they are attending Indian University Colleges.

For the last three years I have been raising money in India for such a hostel. There is a representative committee in India including the present and late Vice Chancellors of the Punjab University, and amongst those who have given are Lord Chelmsford and Mr. Montagu. University education is needed for those going to the Engineering College at Roorkee, the Forest College at Dehra Dun, the Medical College at Lahore, the Sydenham College of Commerce at Bombay, and all the Imperial services for which there is now recruiting in India. The hostel is to accommodate a Warden and 25 students. After 3 years' work in India I have raised R.50,000. This together with the Government grant will pay for the site and a small hostel for sixteen students. But there are already 18 students, and 5,000 pounds are urgently needed to complete the scheme and provide for an endowment fund. Times are hard at home, but there is such a thing as the call of blood. At every school and University I have been to at home I am told that the rising generation do not want to go out to India. That in itself will show that boys in India whose parents cannot afford to send them home for education are in a difficult position, and I hope that there will be those who will see to it that these boys more than half of whom are sons of British soldiers do not go to the wall for want of an adequate education.

Donations may be sent either direct to the Younghusband Hostel Fund Account, at the Alliance Bank of Simla, Old Broad Street, London, E.C., or to me at the Church Imperial Club, 75, Victoria Street, London S.W., and will be gratefully acknowledged.

I am, etc.,
OSWALD YOUNGHUSBAND.

## EGYPT AS A WINTER RESORT.

*The Editor of "The Near East."*

Sir,—I have read with great interest your Cairo Correspondent's references, in his letter published in "*The Near East*" of the 30th ult., to the resumption of propaganda work on behalf of Egypt by my Association is fully alive to the necessity of organising the campaign on what he calls "general lines." Unfortunately, however, the country has not yet been sufficiently educated in the matter of advertising to realise the vital necessity of this in these times of competition by rival resorts. The work of the Association was, as you are aware, interrupted by the outbreak of war; but now that it has got going again, it may be hoped that it will receive the hearty support of the interests involved. At present the amount of money available for advertising is relatively small; but steps are being taken to make the best use of the Association's resources.

The Egypt Promotion Association is greatly obliged to your Correspondent for his friendly hint in regard to hotel rates in Egypt. This, I may say, is a matter which is receiving their careful attention. A good deal has been said and written as to the charges made by hotels in Egypt; but whilst I hold no brief for the hotels, it is only fair to state that the vast majority of visitors to Egypt prefer the palatial "hotels de luxe," and are prepared to pay for the privilege. Some countries are benefiting to a large extent in respect of prices owing to the rates of exchange, but it is manifestly unfair to compare the rates at a palatial hotel in one country with tha fates of the far less pretentious but nevertheless comfortable hotels which abound in Europe.

I am not in a position to state what the hotel charges will be next season, but can assure you that the Egypt Promotion Association will do all in its power to see that visitors to this country do not go away with the impression that it is a place for millionaires only.

I might add that there are also in Egypt a few less pretentious hotels which the visitors is perfectly free to patronise if he wishes to do so.

I am, etc.,
For the Egypt Promotion Association,
W. R. TODD,
Acting Secretary.

Egypt Promotion Association,
Cairo, July 19.

# PRESS ON THE NEAR EAST.

### Persia.

Upon Lord Curzon's rec ent announcement that the British Government intends to leave Persia to her fate. the *Saturday Review* of July 30, says :—

It means the temporary ruin of the country and to that extent favours the spread of Bolshevist propaganda, whidh is far more formidable than Bolshevist arms, in the direction of Afghanistan and India. No one can predict what the outcome of that may be, but the decision to withdraw from those parts of Persia that are not vital to British interests, to concentrate our strength in the region of the Gulf, and to trust to time and the inevitable collapse of Bolshevism in Russia to evolve a more favourable opportunity for regaining, if we ever wish to regain, what we are now wisely yielding, is a sound decision. Better Persia Bolshevist than Britain bankrupt is still as rational a counsel as when Mr. Lloyd George first uttered it. Our business is to be strong at home and to realise that a Fabian policy in our present circumstances, however great the temptation to adventures of the old "Forward" school, is one of the essentials of recovery. We can afford to wait; the Lenin regime, whether in Russia or in Persia, cannot.

### The Straits of Constantinople.

The *Manchester Guardian* of August 4, in an article which makes an examination of "Constantinople and the Straits," declares that the custody of these places is one of the "most neglected questions left us by the war." It proceeds to state how important a settlement of this problem is, and dismisses as intolerable the contemplated march of the Greeks upon Constantinople. Then it discusses a possible solution :—

Any settlement which is to hold out a prospect of permanence must, we believe, rest first on a reasonable peace with Turkey, recognising her full right to existence as an independent Power within her agreed boundaries, and secondly on the recognition of the fact that the freedom of the Straits is an international interest and that the custody of the Straits ought therefore to possess an international character. So far there has been no approach to the acceptance by the Powers in possession of either of these principles. What we hold we hold simply as conquerors in the war. Great Britain, France, and Italy hold it jointly, and America—Japan also, for that matter—has just as good a right, if she chose to assert it, to share in the control. The abortive Treaty of Sévres simply continued the ultimate military authoritity of the three Powers, though it established an International Commission to deal with the technical control of the Straits, lighting, buoying, regulation of traffic, collection of dues, and the like. Now obviously this is not a permanent solution. To begin with it must almost necessarily lead to jealousies and possible disputes between the protecting Powers, and if at any time they should chance to be at war with one another the situation would be impossible. But beyond that the arrangement takes no account of the interests of other Powers—of Germany, for instance, and the other Danube Powers, who are vitally interested in the outlet for their trade from the Black Sea to the Mediterranean, or of Russia, whose interest is greater than that of all the other Powers put together, which has fought two great wars for the assertion of this interest and which, undoubtedly, will one day assert it again. When first, after the conclusion of the war, this matter was discussed it was generally assumed that the international solution would be adopted and that a sufficiently wide area on either side of the Straits would be neutralised. This would suffice, of course, to prevent the establishment of permanent fortifications commanding the Straits, such as those by which our own ships were held up in the war, but it would not prevent a sudden rush, and the plunging fire of the modern howitzer, which can be quickly moved, can be quite as deadly as that of guns on permanent emplacements. But it is contended that the presence of troops and the military possession of the critical positions by some established Power is necessary for safety.

And it concludes with an assertion that "it is wrong in principle as it is dangerous in practice to leave the guardianship of a great international waterway to the sole control of a single Power."

The freedom of the Straits would, we are convinced, be far safer under the protection of an international body, such as that which for many years has controlled the navigation of the mouth of the Danube, even though only some modest international force were present to defend it. It would be a grave matter indeed for Turkey, still more for Bulgaria or Greece, to attempt an attack, and if, later, a recovered and reconstituted Russia should be tempted to seize the object of her secular ambition she could do so only at the risk of war with almost every other European Power, and Greece certainly could not prevent her. As for Turkey, the first necessity is to give her a life to live within her own proper boundaries and an assured outlet for her trade, such as every great inland country should possess, to the sea. When we have done this and relieved her of the intolerable burdens and shackles proposed in the Treaty of Sèvres—from the Commission which was to supervise her army, from the Commission which was to control her finance, from the yet other Commission which was to take over her railways—when we have given her a chance of peace and prosperity and a settled order, then we shall have given her something to lose, and she will think many times before she risks all once more in an attempt to regain possession of the Straits. Even Turkey must have learnt something from the lessons of the war.

### Great Britain and Turkey.

The *Saturday Review* of July 30 in an article called "Sanity and the Near East" pleads for a *rapprochement* between Britain and Turkey. On the result of the present campaign of the Greeks against the Turks it does not commit itself :—

We are far from assuming, however, that victory, whether real or factitious, will go to Greece in this futile and ruinous prolongation of the Great War in the Near East. The course which circumstances appear to us to prescribe for British statesmanship is not dependent upon the issue of this conflict, though the difficulty of pursuing it would be increased by the appearance of a triumphant Constantine demanding the spoils of war. Fortunately, our hands are not tied. It was in defiance of our wishes and representations that Athens insisted upon this campaign; we have no commitment contrary to our supreme interest—the securing of a stable peace in the Near East. We abandoned, at the London Conference five months ago, all pretence of standing by the letter of the unratified Treaty of Sèvres. Modifications were then proposed which had for their object the conciliation of Turkish national feeling. We recognised, and rightly, that good relations with Turkey—no longer a despotic overlord of subject peoples, but a self-contained national State—should be the first care of our Eastern diplomacy.

It thinks that the Turkish claims, so far as they are consistent with national right, ought to be admitted; and it concludes :—

It is not only our interests in the Near and Middle East that are jeopardized by the existence of bad blood between us and the strongest of the Moslem peoples. In India we have seen, and we see to-day, the hitherto unimaginable spectacle of a political alliance between Hindu and Mohammedan against the British rule. Its permanence may be doubtful, but it can unquestionably be ruinous to us as long as it lasts. A just settlement in the Near East, accepted by Turkey, would cut at the root of that combination. Cannot the pursuit of which Mr. Churchill speaks be conducted with more energy and sense of direction? Whatever the obstacles in the path, we have no interest so urgent or so plain as the re-establishment of good relations with the Turkish people. We may not admire their type of civilization, or their political record; but are we, in this world, to be on peaceful terms only with those whom we can conscientiously regard as angels?

## MUSICAL NOTES.

### The Jewish Musical Association.

I have received from Lvoff, Poland, particulars of the formation of a "Jewish Musical Association" there, and of a scheme to further interest in Jewish music. Last year I commented upon the possibilities of the recently formed Anglo-Jewish Musical Association, an organisation the activities of which are, I believe, limited to this country. But the "Jewish Musical Association" has wider aims. Formed in the autumn of 1919 it already has a mixed choir of a hundred and fifty voices and a symphony orchestra of eighty instrumentalists. This association performs all kinds of music, but its main purpose is to assist in the enriching of the Jewish musical literature, and with this intent it has inaugurated a competition for "the best musical composition on Jewish popular songs in combination for chorus of men or mixed voices *a capella* or with the accompaniment of the piano," as the circular puts it. Money prizes, the first of which is 3,000 Polish marks, are being offered for the best composition, which must be sent before October 1, 1921, to the President of the Association, Mr. Alfred Plohn, Lvoff, Poland, Legionoff 5.

Further details I have no space for, but I shall be pleased to give them to anyone who cares to write to me. The scheme is undoubtedly an excellent one, for not only is the fact of the prize a real stimulus to the needy composer, but, if successful, he will get his work both performed and published by the Association—factors which are growing increasingly important to composers. There is untold wealth in Jewish melodies, which more than any other folk-tunes needs exploring and amassing. Among the Jews in the Near East alone there must be hundreds of unpublished songs, and I hope that some of them will be rescued by this worthy plan of the Jewish Musical Association. The Jewish composer who can take his place among the world's greatest has yet to arise, but when he does, he will almost certainly build upon the melodies of his race.

### London's Musical Prospects.

The concert season in London is now dead, and, apart from Sir Henry Wood's "Promenades," which begin in August and end in October, will not re-commence until October. Then we are to have what we lacked all through the past year—opera. A way out of the financial difficulty which has persistently beset British performances of opera has been found, so that London is now from every point of view equipped to be what it certainly is becoming—the musical centre of the world. In this revolution—for it is no less—nothing has been of more importance than the extraordinary creative activity of our composers; but in addition to this the interpretative standard demanded of artists is becoming higher and higher here, so that a London reputation is worth more than any other. This is not mere journalist's talk, it is the sober reflection of the views of musicians, all of whom are agreed that, owing to a variety of reasons, some aesthetic, others economic, London for the next five years will be the first capital to attract the world's best music.

ANDANTE.

**FRENCH SELF-TAUGHT, GRAMMAR WITH KEY**

**By J. LAFITTE, B. es L., Principal French Master, City of London School**

For learning the Language by the Natural Method. It contains Classified Vocabularies, Travelling by Rail, Road, and Sea, Cycling, Motoring, Post, Telegraph, &c. Commercial, Naval and Military Terms, &c., Conversation, so arranged that they may be learned AT A GLANCE, with ENGLISH PHONETIC PRONUNCIATION, Tables of Money with Illustration of Coinage, Weights and Measures.

A course of simple and practical lessons in the Grammar and construction of the French language, progressively arranged and fully illustrated with model sentences; useful exercises throughout, and an Alphabetical Vocabulary.

**Crown 8vo., 316 pp. Green Cloth, 6 - net. Postage 4d. extra.**

*Sold by all BOOKSELLERS and BOOKSTALLS. Write for Prospectus and Catalogue No. 25, post free.*

**London: E. MARLBOROUGH & CO., 51, Old Bailey, E.C.4.**

## PERSONAL & GENERAL.

August 11 (New Style).
July 29 (Old Style).
Julhijja 7, 1339 A.H. of the Moslem Calendar.
Ab 7, 5681, of the Jewish Calendar.

The Vali Ahd, brother of the Shah of Persia, sailed for England from Bombay on July 31.

Madame Mamartcheff, the wife of M. Mamartcheff, Secretary ot the Bulgarian Legation, left London last week for Sofia.

Fathollah Khan Noury, First Secretary to the Persian Legation, has returned to London from the Continent, after several weeks' absence.

M. Alexandre Cretziano, Secretary of the Roumanian Legation, has left London for the South of France, on leave.

Prince Nicholas of Roumania honoured the Roumanian Chargé d'Affaires, M. Radu Djuvara, with his presence at luncheon on August 4, at the Traveller's Club.

M. Nicolas Michel Vladesco, Secretary to the Roumanian Legation, has left London for Bucharest. He will be away about two months.

Our Sofia Correspondent writes (July 31):—Colonel Repington, special foreign correspondent of the *Daily Telegraph* has been visiting Sofia. He has been received by King Boris, and has called upon M. Stambolisky.

It is authoritatively stated that the Prince of Wales will arrive in Malta between October 26, and November 1, on his way to India. The Prince will remain two days.

Bulgaria will be represented at the Assembly of the League of Nations by the President of the Council of Ministers, M. Stambolisky, and by the Bulgarian Minsiter at Belgrade, M. Theodoroff.

An engagement is announced between Mr. C. L. Seton-Browne, the Leicestershire Regiment, the surviving son of Mr. and Mrs. Seton-Browne, of Dunfermline, Grenada, B.W.I., and Marjorie, elder daughter of Colonel R. Heard, I.M.S.

In view of the coming into operation of self-government at Malta, the Imperial Government are appointing an arbitrator to adjudicate on such questions as water supply and roads. Field-Marshal Lord Plumer's leave has been extended to September 15. Upon his return to resume the governorship, writs will be issued for the first Maltese Parliamentary elections.

Our Bucharest Correspondent writes (July 27):—The Royal Family left to-day for Paris, where they intend to stay for a few days. The King will afterwards go to Bagnolles de l'Orne to take the waters, and the Queen and Princess Marioara to St. Brieuc.

General Averescu, the Prime Minister, has left for Kissingen where he intends staying thirty-five days to take the waters; during his absence the Cabinet will be presided over by M. Také Jonescu.

Sir Willoughby Dickenson, the Vice President of the "Union of the League of Nations Society" arrived here a few days ago, his visit is in connection with the task he has been entrusted with by this Society to study on the spot the situation of the ethnic Minorities in the Near East; he has already visited for this purpose Yugoslavia and Czecho-Slovakia. Sir Willoughby was received by the King and entertained to luncheon with his wife and daughter.

As the British Government is not in favour of General Townshend's proposed visit to Turkey, the general has decided not to go.

The Bulgarian Minister of Finance, M. Tourlakoff, who has arrived in London on a short visit with M. Stoyanoff, Director of the Public Debt, was received last week by Sir Robert Horne and Sir Eyre Crowe, and has had interviews with several leading British financiers.

The marriage between Mr. R. W. Bullard, C.I.E., and Miss Miriam Catherine Smith will take place at St. Aidan's Church, Bamburgh, Northumberland, on Thursday, August 18.

Lord and Lady Barrymore left London last week for Marbury Hall, Northwich, Cheshire.

Lord Allenby passed through Marsielles on August 7 on his way from Cairo to London. He is accompanied by Mr. Keown-Boyd, Eastern Secretary, and several officers.

The engagement is announced between Gerald Bruce Crole, Sudan C.S., only son of Mr. G. L. Crole, K.C., Sheriff of the Lothians and Peebles, and Mrs. Crole, 1, Royal-circus, Edinburgh, and Katherine Margaret, only daughter of Mr. and Mrs. H. H. House, 4, The College, Malvern. The marriage will take place at Malvern on September 14.

A marriage has been arranged, and will shortly take place, between Lieutenant-Colonel George Cecil Hodgson, D.S.O., 2-23rd Sikh Pioneers, second son of the late Lieutenant-Colonel G. R. Hodgson, Bombay Staff Corps, and of Mrs. Hodgson, of Bexhill, and Mary, eldest daughter of Mr. and Mrs. F. Morten, late of Hampton Court, and niece of the Rev. Michael Graves, B.D., Rural Dean of Wycombe, of Tilecotes, Marlow.

A number of French papers have recently reported as impending the marriage of M. Venizelos, the ex-Greek Prime Minister, and Mme. Schilizzi, a wealthy Greek widow, who had lived for many years in Paris. The *Excelsior* now states that it is in a position to confirm this report, and adds that M. Venizelos and his *finance* are at the present time both at Aix-les-Bains. M. Venizelos, who is a widower with several children, is 57 years of age, and Mme. Schilizzi is 45.

## APPOINTMENTS AND PROMOTIONS.

Rear-Admiral Aubrey Clare Hugh Smith, C.B., M.V.O., has been appointed to be lent to the Greek Navy as head of the British Naval Mission to Greece, in succession to Captain William A. H. Kelby, C.B., C.M.G., M.V.O., the appointment to date October 15. The British Naval Mission is composed of eleven British naval officers, the head of the Mission ranking as a Vice-Admiral in the Royal Hellenic Navy.

M. de Beaufort, the Netherlands Ambassador in Washington, is to be appointed Ambassador in Athens.

The High Commissioner for India has, with the concurrence of the Government of India, nominated Mr. T. Ryan, C.I.E., of the Indian Finance Department (P.W.D. Accounts) to succeed Sir George Collier, C.I.E. as Director-General of Stars, Offices of the High Commissioner for India, when the latter retires after more than 45 years of meritorious service. Mr. Ryan will assume charge on the conclusion of his present duties as Secretary to the Railway Committee.

Mr. Thomas Beaumont Hohler, C.B., C.M.G., has been appointed to be his Majesty's Envoy Extraordinary, and Minister Plenipotentiary to the State of Hungary. He has served, among other places, in Cairo, Abyssinia, and Constantinople.

## OBITUARY.

The death has occurred of Lord Reay, a former Governor of Bombay. For this Governorship he was chosen by Mr. Gladstone in 1885. After leaving India in 1890 he became Under Secretary for India in the Rosebery Ministry, 1894-5, and later devoted his energies to various interests, among which was the Royal Asiatic Society of which he was President.

The death has occurred of Brigade Surgeon Lieutenant-Colonel Arthur Bowen Richards Myers. He served in the Suakim Expedition of 1885, receiving the British and Egyptian medals, and retired from the Army in 1891. He was the author of "Life with the Hamram Arabs,"—an account of a sporting tour of some officers of the Guards in the Sudan during the winter of 1874-5.

## NEWS IN BRIEF.

A serious outbreak of fire in the Sourakhanah district of Azerbaijan is reported, the oilfields there being ablaze.

Mr. Churchill has expressed his willingness to take a suitable opportunity of receiving the deputation which the Indian community of the Kenya Colony is sending to England to see the members of the Government regarding the status of the community in the Colony.

Strikes, attributed to the activities of non-co-operators have occurred in four tea gardens in the Darjeeling and Kurseong subdivisions. In one garden 42 strikers were arrested on a charge of rioting.

The Bulgarian National Council has appointed a deputation to plead for the intervention of the Pope and the Archbishop of Canterbury to secure the proper application of the minority clauses of the Treaties of Peace.

The Bombay Legislative Council, after a long debate, has passed a resolution by 52 votes to 25 in favour of the enfranchisement of women.

Following the arrival of the Commissar Stalin in Georgia a number of public men have been arrested and the policy of repression and Russification is reported to be more vigorously pursued.

According to a message from Melbourne, it is reported that Commonwealth steamers will inaugurate a fast four-weekly service to India and Suez about the end of this year.

Byrout Municipality has presented General Gouraud's soldier-chauffeur, Fernand Boeuf, with a gold cigarette case, set with diamonds, forh is courage and coolness in saving the General's life when the attempt was made against him on June 23, on the road from Damascus to Kuneitra.

M. Steeg, French Senator, has been appointed Governor-General of Algeria.

## RUMOURS AND FACTS IN THE BALKANS.

The rumours that have been current of late regarding Bulgaria's anti-Entente attitude are, no doubt, a reflexion of the troubling of her own political waters as well as a definite attempt by a third party to divert attention from other parts of the Near East. Although they bore on the face of them the stamp of improbability, and have been categorically denied, these rumours may serve as a starting point for an examination of present-day conditions in Bulgaria, for the reason that these conditions, no less than the attitude towards the relatively powerless Bulgaria of her neighbours, are a factor in the question of peace in the Near East. First, then, as to the political situation in Bulgaria. Apart from the natural desire of an Opposition to assume office, there have been other causes for a fluttering in the dovecots of the ten parties that have a common bond in political hostility to M. Stambolisky and his followers. The Zemledeltchesko, or Agrarian Party, now in power, is divided into two distinct sections, one of which acknowledges M. Draghieff as its chief, while the other is under the leadership of the Prime Minister. Although M. Draghieff withdrew his parliamentary candidature at the last elections, on the ground that he did not approve of the party's programme, the Agrarians have so far presented a united front for all practical purposes. There has, however, been trouble in their ranks, which has found expression in certain Ministerial changes. M. Dimitroff, Minister for War, has incurred the antagonism of a number of Agrarians; his standing in the party has been too strong for the malcontents to secure his resignation, but it is noticeable that M. Stambolisky has thought it prudent not to appoint him, in spite of his being the obvious candidate for the post, Acting Prime Minister during his own absence abroad. A further cause for the raising of the Opposition's hopes is to be found in the fact that the present Government was gradually getting out of its depth in connection with its legislative experiments. So long as domestic issues alone were concerned the Opposition realized that it was merely being done by as it would have itself done to the others; but it saw, it is to be feared with no little satisfaction, that, as a result of M. Stambolisky's legislation, Bulgaria was creating trouble with the Entente Powers. It has been counting, therefore, on the latter taking such action as would inevitably lead to M. Stambolisky's downfall.

Of all the Entente Powers Great Britain is the least likely to concern herself with Bulgaria's domestic politics or to wish to have any part in political intrigues. She has satisfied herself of the correctness of M. Stambolisky's attitude, and for this reason cannot fail to wish him well. A new Government could hardly adopt a more correct foreign policy; it might possibly be more successful in its handling of domestic affairs, and so conduce to a more stable condition of things in Bulgaria. British interest, therefore, in the rivalries of Bulgarian political parties is confined to their bearing on the country's future welfare and the maintenance of peace in the Balkans. Under M. Stambolisky there has been less foreign intrigue in Bulgaria than at any time in her short history. One result has been to make the foreign elements that have battened on Balkan intrigue in the past turn to the Opposition parties in the hope of finding a state of affairs more to their liking; and the Bulgarian Opposition, or at least certain sections of it, have felt encouraged to revive the old order of intrigue in their endeavour to displace the Agrarian Party. If, therefore, the Entente Powers had to choose—as fortunately they have not to do—between Bulgarian parties, they would have to decide whether a Government that indulged in embarrassing and sometimes disastrous legislative experiments, while maintaining a sound foreign policy was not to be preferred to a Ministry which allowed internal affairs to run along the usual ruts and at the same time gave rein to the old intrigues that proved Bulgaria's undoing in the past and has always been a fruitful source of unrest in the Balkans. It is one of the misfortunes of Balkan politics that political parties in power are inclined to legislate against the interests of their opponents rather than in the interests of the country as a whole. Much of the legislation of the present Bulgarian Government has been coloured by the desire to "get even" with the authors of Bulgaria's misfortunes; and it is to be feared that a new Ministry will feel obliged to spend a lot of its time and ingenuity in "getting its own back" from the Agrarians. In this unedifying duel the country has little chance of prospering.

It is a matter for regret, therefore, that any Entente Power should be associated, whether officially or unofficially, with Bulgarian political intrigues. The Entente, as already stated, have proved the correctness of the present Government's foreign policy; they have every reason to expect a similar correctness on the part of a Ministry associated with such men as M.M. Malinoff Gueshoff, Liaptcheff, or Madjaroff. But just as they have taken exception to recent Bulgarian legislation which, directed originally against rival parties, has impinged upon foreign interests, so they ought not to lend colour to the idea that they will welcome relief for foreign interests from commercial disabilities at the expense of Bulgaria's freedom from international intrigue. The danger arising from the latter is likely far to outweigh any benefits accruing from the removal of embargoes on commerce and finance. France or Italy may think that they stand to gain by the advent to power of this or that *protégé*, but a more probable result of intrigue in Bulgaria's internal affairs would be the setting in motion of forces which will bring loss both to Bulgaria and the Entente. The strongest political party after the Zemledeltchesko is the Communist, which derives support from the discontent existing in the towns as a result of the high cost of living and from the traditional relationship between Russia and Bulgaria. Even if Bolshevism has not proved successful as a panacea for economic crises, there is bound to be a number of Bulgarians ready to believe that the country's salvation is still linked up with Russia, and the more so, when the ills they resent most are the work of the Entente, and they note that it is against the Entente that the Soviets set out to wage war to the death. The Communist Party in Bulgaria belongs to the Opposition; but it has little or nothing else in common with the other Opposition groups. Its support, however, would be welcome in any scheme for the overthrow of the Government in the present state of parties, and, if it were given, would entail a *quid pro quo*. In thus sketching the political position in Bulgaria as we read it to-day, we have no wish to weigh the scales in favour of or against any party, but we believe that a true understanding of the situation is the best remedy against possible intrigue. It has to be remembered that however much the Bulgarians differ among themselves they are united in their resolve to work for the liberation of their nationals from foreign jurisdiction. They can so work without disturbing the peace of the Balkans, but there will always be that element of political unrest which impedes the march of progress and prosperity. To-day the country is most concerned with the absence of real access to the Aegean Sea. Anyone acquainted with the Balkans is aware that the use of a foreign railway on foreign territory is valueless for practical commercial purposes, and in the case of the Dedeagatch line no steps have been taken,

Digitized by Google

in spite of the paper recommendations of the Supreme Council, to make the concession of any value. The knowledge in certain quarters that on this point as on many others the Paris Conference allowed itself to be hoodwinked by ignorance of Balkan conditions may account for the spread of false reports about the warlike intentions of five million Bulgarians against their thirty-five million neighbours.

## BOLSHEVIST RULE IN CENTRAL ASIA.

### II. Bokhara.

*By Sirdar Ikbal Ali Shah.*

Those who seek to confound the apostles of Russian Communism, and who are searching for a particularly damning illustration of their theories, will find themselves amply rewarded by a consideration of the circumstances of Bolshevist rule in Bokhara, where they will encounter the pattern Soviet state in all its unloveliness. Bokhara is "free," it has its own soviet, its own communistic machinery. Yet its population is sunk in the depths of a slavery more sordid, a helotage more vexatious, than any Oriental conqueror ever imposed upon a fallen foe. With my own eyes I have witnessed the degradation of the once manly and dignified Bokharians. I have seen them driven to the coal-mines and the oil-wells of Ferghana and Samarkand, the bond-slaves of a brutal avarice masquerading as the enemy of capitalism. I have seen them searched for bread by the ruthless Jadidi, or Bolshevist Police. And as I gazed with pity upon the plight of those wretched people, I thought with amazement of the situation in the island I know so well, where a large section of the workers, and especially the coal-miners, were anxious to naturalize the evil thing that had brought ruin to Bokhara. Let those men go to Bokhara and inspect the mines there. Let them have an opportunity of seeing the actual working of the machine for which they profess such an admiration: and when they return, they will go down on their knees and thank Providence that, through no action of theirs this country has been spared from the hideous nightmare of Leninist rule.

The New Russia has seized upon Bokhara in much the same spirit as the buccaneers of the seventeenth century descended upon the rich Antilles. To the 'Reds' it is a mine of raw material to be speedily exhausted, an orange to be sucked dry, not a colony to be cultivated and built up. Of one of its divisions, Ferghana, this is only partly true, for there the 'Reds' are laying the foundations of a great military commissariat to serve for the requirements of the Bolshevist army which one day will attempt the invasion of India. But the remainder of the country can only be described as a ruin, the skeleton of a once prosperous land. The cotton-growing area has shrunk to one-fifth of its former proportions, and the yield per acre to one-half. The peasant proprietor, or what is left of him, must give 90 per cent. of his crop to his Bolshevist taskmasters, and convey it to the depot at his own charges. The miserable people who toil in the mines and on the land are paid in kind, that is, they receive a scanty ration of bread and a dangle of rags by way of sustenance and clothing. Thousands, rather than suffer these conditions, have fled to the desert of Kazil-kum, or wander on the steppe, where, for the most part, they perish miserably. Those who remain must face conscription, either military or proletarian. Such leisure as they have is haunted by spies, the treacherous Ispolkoms, who swarm in every village, and who, upon the least expression of opinion derogatory to Leninism, betray him who dares to utter it to immediate death. Mir Burhanuddin, the chief Qazi of Bokhara chanced to say that in his opinion, the ethics of Bolshevism conflicted with those of the Koran: he was at once dragged before a court martial and shot. Mir Nizamuddin, the Premier, who showed a natural interest in the affairs of his exiled master, the Khan of Bokhara, had to flee for his life, and died suddenly and under suspicious circumstances at Dushambeh. The old spirit of the people has been utterly quenched. They have become a nation of slaves.

And side by side with all this misery the mockery of an intensive propaganda is carried on. The wretched Bokharians and Uzbeks must, forsooth, be instructed in the philosophy of that which has crushed them: the deer must be shown the reason why it should become the prey of the tiger. In order that the sorry burlesque of "enlightenment" may proceed, propaganda trains are run throughout Turkestan and the khanates. These are equipped with the most modern appliances, so that the unsophisticated Uzbeks shall regard with awe the resources of the power which has them in its toils. The printing press, the cinematograph, and wireless telegraphy are all requisitioned for the benefit of the half-starved compulsory students of Leninism. The visit of one propaganda train to an Uzbek village especially remains in my memory. I had great difficulty in getting a seat in a slow-moving train from Bokhara to Turmez. Gradually we crept along until we reached a place called Kershi, half-way between these points. Here all the passengers were obliged to alight, as the line had been cleared for the propaganda train, which would not arrive until the afternoon of the following day. Betaking myself to the *caravan sarayai*, or local inn, I found that the only accomodation to be had was in the courtyard. The pack animals of a caravan which had halted there for the night were noisy neighbours; the place swarmed with noxious insects; and to crown our misery, rain began to fall heavily. The caravan resumed its journey at 5 a.m., and after the usual devotions, I went out to see the village. It was a mere shell. All habitable houses had disappeared, and nothing but huts and dug-outs remained. The place was the husk of what it had been, ruined and deserted, and even the avenues of mulberry trees had been cut down for fuel. I strolled to the railway station, where even at that early hour, hundreds of people had gathered to await the propaganda train. They were a sullen crowd, beaten up by the local commissar, who had told them that they must come to be "educated." Intense heat made the tin-covered station like an oven, and at noon, pillau, a mess of rice, was served out in large portions, as an inducement to the hungry people to remain. From conversations going on around me, I gathered that most of them had come there merely for the sake of allaying their hunger. At three p.m. the train steamed in. It was "decorated" with pictures in glaring colours depicting the atrocities of capitalism, and gilded mottoes in which the equality of all men was insisted upon. The side of one of the carriages opened out and formed a kind of platform, from which a young Uzbek lecturer in the pay of the 'Reds' harangued the weary audience upon the blessings of the Communist state. After he had spoken for nearly a quarter of an hour another took his place, upholding the doctrines of Leninism with fanatical ardour. News bulletins were then distributed. These consisted of a sheet of foolscap paper printed on both sides in Turki and Persian. On one side was what purported to be the latest news, set out in three parallel columns, while the reverse was occupied with a *résumé* of Bolshevist doctrine. Under the heading "Good News" I read a brief description of the coal strike in Great Britain, which lost nothing in the telling, and which assured the reader that Bolshevist envoys were sedulously working for the downfall of capitalism in that benighted land. When it grew darker the cinematograph was brought into play, and a film depicting the evils of capitalism was released. It came to an abrupt ending at an interesting moment, and an announcement was made that the story would be continued on the next visit of the train, which then steamed off in the direction of Turmez. On its departure the crowd for a moment displayed something like enthusiasm The unaccustomed food, the harangues of the speakers, and the excitement of the "pictures" had undoubtedly worked upon their feelings, and many were the expressions of satisfaction and even of pleasure. So does

Digitized by Google

Leninism sport with its victims. I must admit that I was not a little impressed by the efficiency displayed in the conduct of the whole performance. How much more, then, must the poor people who surrounded me have been affected? They are told that in working as they must do they are helping to free the rest of humanity from the curse of slavery, and this many of them actually seem to credit. Or is it that they dare hold no other opinion?

## NEAR EAST IN PARLIAMENT.

### HOUSE OF COMMONS.

*July* 25.—Mr. Harmsworth informed Mr. Raper that the British Government undertook to transmit as an act of courtesy and humanity £48,000 supplied by the Turkish Government to the Japanese Government, to enable the latter to repatriate Turkish prisoners of war from Siberia. No British funds were involved.

Mr. Edward Wood informed Mr. Ormsby Gore that a report had been received that some of the followers of Ibn Saud, not of the Emir of Hail, meditated an attack on Kheibar, a place some distance to the north of Medina. As a result of inquiries by the High Commissioner for Mesopotamia, a telegram has been received stating that Ibn Saud's agent in Baghdad had heard nothing of this report and entirely discredited it. There was on reason to believe that there was any understanding between the Emirs of Hail and Nejd.

Mr. Wood informed Sir William Joynson Hicks that the British Government are now engaged in formulating a scheme with the object of admitting local elements to such a degree of participation in the Government of Palestine as is compatible with the Balfour declaration.

Sir William Seager asked whether the British mercantile community in Turkey, whose stocks in trade both before and after the outbreak of hostilities with Turkey were requisitioned, were forcibly occupied and damaged and their homes pillaged, have filed claims against the Turkish Government without response, and what steps the British Government will take to force the Turkish Government to pay the necessary indemnities. Mr. Harmsworth replied that the answer to the first part of the question was in the affirmative. H. M. Government are most anxious to expedite the pacification of Asia Minor and the entry into force of a treaty of peace with Turkey, but it was impossible to anticipate the latter event so far as the payment of indemnities of this kind was concerned.

Mr. Wood informed Mr. Mills that he was aware that various complaints against the Palestine police had been made by the Jewish section of the population. He wished, however, to remove the impression that the Palestine police was an Arab force. It was a Palestinian force and there was nothing to prevent Jews as well as Arabs enlisting in it. Hitherto comparatively few Jews had come forward. The whole question was engaging the earnest attention of the High Commissioner and steps were being taken to raise the standard of discipline and efficiency.

*July* 27.—Mr. Chamberlain informed Mr. Lyle that the Powers had all along been willing to seize the earliest possible moment for the final conclusion of peace in the Near East, and they made united effort in this direction at the conference held in London in the spring; but while the two principal parties (Greece and Turkey) were actively engaged in fighting the moment did not appear to be favourable for the attempt.

Mr. Churchill informed Mr. Ormsby Gore that the High Commissioner for Mesopotamia and the Council of State were taking steps to ascertain the views of the population of Mesopotamia on the subject of the Emirate, but the date of the referendum had not yet been reported.

Mr. Churchill stated that he hoped to lay further papers in connection with Mesopotamia in the near future.

Replying to Mr. Swann, Mr. Harmsworth said that he did not think this would be a suitable moment to hold an election in Egypt, in view of the fact that the principal members of the Egyptian Government are engaged in negotiations with H. M. Government in this country.

Mr. Harmsworth also informed Mr. Swann that no incident occurred on the day when the Egyptian Delegation left Alexandria. The Delegation drove to the quay unescorted, and held a reception there. Several hundred representative persons from all parts of Egypt having assembled to bid them good-bye.

*July* 28.—The Prime Minister informed Mr. Ormsby Gore that four meetings with the Egyptian Delegation had already taken place at the Foreign Office. The negotiations were pursuing their normal course but it was not anticipated that they would be rapid. It was proposed to adjourn the meetings shortly and to resume them after a short holiday. It was hoped that the negotiations would be concluded before the next Session of Parliament.

The Prime Minister stated that the official date of the termination of the War, as regards Turkey, would be September 1, 1921.

Lord Eustace Percy asked whether agreements defining the obligations of His Majesty's Government in Mesopotamia and Kurdistan are now under negotiation with the Government of Irak, or with the representatives of the Kurds, and whether he could give an assurance that no contractual obligations of any kind would be assumed by H. M. Government in Irak or in Kurdistan until such agreements had been approved by the House of Commons. Mr. Churchill replied that the only definitions of the obligations of His Majesty's Government in Mesopotamia and Kurdistan are to be found in the Treaty of Sevres and the draft mandate for Mesopotamia. He could assure the House that no new obligations would be incurred until Parliament had had an opportunity of expressing its opinion.

### The Emir Faisal.

A statement from the Colonial Office says that the latest advices from Mesopotamia indicate an increasing demonstration of popular opinion in favour of the Emir Faisal as a candidate for the rulership of the new State of Irak-el Arabi. Recently a series of functions were held in the Dulaim Liwah on the occasion of a visit by the Emir. Bodies of tribesmen gathered on the desert road from outside Felujah to Ramadi, and galloped for several miles beside his car, while at the Euphrates bridgehead the paramount chief awaited him with the standard of the Anizeh, horsemen and camel-riders. At Ramadi the Emir was received by Sheikh Ali Suleiman, the chieftain of the Dulaim, with the standard and fighting force of his people.

Later at a great tribal gathering in the Arab Darbar tent, on the banks of the Euphrates, the Emir addressed the tribesmen calling on them to live in harmony with one another, and promising if elected to the rulership of Irak, to respect their rights as his subjects. Sheikh Ali Suleiman and Fahad Bey, the paramount chief of the Amarat Anizah, then swore allegience to Faisal as the friend and ally of the British Government, and all the leaders of the Dulaim laid their hands on his hand in token of their fealty.

## CAMEL CORPS MEMORIAL.

General Sir Philip Chetwode unveiled on July 22 the Imperial Camel Corps War Memorial in the Victoria Embankment gardens almost opposite Cleopatra's Needle. The Camel Corps, which was commanded by Brigadier-General C. Leslie Smith, V.C., Major C. Brown, is surmounted by a yeoman, mounted on a camel in full marching order. The two reliefs represent an Australian officer, dismounted opposite his camel; and dismounted infantry going into action. On the other two sides are the names of the British, Australian, New Zealand, and Indian soldiers who lost their lives in the war; and the inscription on the base is as follows:—"To the glorious and immortal memory of the Officers, N.C.O.'s and Men of the Imperial Camel Corps—British, Australian, New Zealand and Indian—who fell in action or died of wounds and disease in Egypt, Sinai and Palestine, 1916-17-18."

M. Gouanbatielos, the well-known sportsman, has given £10,000 to the "Academie des Inscriptions et Belles Lettres" for necessitous families of French seamen who were killed during the events in Athens on December 1, 1916.

## NOTES AND NEWS.

Devonshire Square.
E.C. 2,

**The Danube Shipping Award.**

Satisfaction will be generally felt that Mr. Hines has at last been able to make his award on the complicated question of the Danube shipping. What the world wants, in particular the Near East, is to be able to devote its attention whole-heartedly to the problems of reconstruction; and obviously the sooner all questions of this kind are settled once and for all and put out of the way the better. The countries concerned are not going to reap any immediate benefit out of the award, for, as pointed out elsewhere in these columns, Yugoslavia and Roumania have been utilising the shipping they seized, and it will certainly be some time before the passenger ships that Austria has to give to these countries, and the shipping that is allocated to Czechoslovakia is available, and the ships will probably be in great need of repair.

**Role of the Danube.**

There is no question at all that the peace settlement has given a significance to the Danube that it never before possessed. In pre-war days it was little more than a fairly important trade channel, and its potentialities were obscured by the misuse of their powers by countries commanding certain sections of the river. It was so easy to impose restrictions on commerce in order to bring a fact forcibly home to a neighbour! Apart from this policy of pin pricks the trend of trade was from south to north. Now for the time being at any rate the Central Powers—or rather should I say the former Central Powers—no longer count, and the trend of trade is to Western Europe, and this for many reasons will immensely enlarge the utility of the Danube, if only the various countries concerned realise the advantage they will gain by doing everything possible to promote the flow of trade on that river.

**The Indian Loan.**

The result of the Indian Rupee Loan may fairly be described as startling. Before the war, the Government counted on raising thirty, or at most forty, millions of rupees in a season when the country was prosperous. This last season has been thoroughly bad, and famine-conditions have been wide-spread, though fortunately not intense, yet, after including conversions and subscriptions made in England, the cash actually offered in India has amounted to 370 millions of rupees, or ten times the normal figure of a few years back. Only a small part of the increase can be attributed to the effects of monetary inflation, and the bulk of it must be due to the spread of the investment habit, which economists have so long urged as one of India's greatest needs. With this evidence before them, the Government need have no hesitation in pressing forward the policy of productive development by means of railways and irrigation works to the full extent of the requirements of the country.

**The Roumanian Outlook—**

I had an interview this week with a prominent business man who has not long returned from Roumania, and what he had to say about the prospects there should prove of interest to those business men who still persist in saying that there is no scope for them in the Near East markets. He has paid several visits to the country since the war, and on each occasion previously he had been somewhat reserved in his opinions. This time there were no qualifications. "I was never more impressed in my life," he told me "than by what I saw in Roumania this time. The possibilities of the country are almost unlimited. As a granary, as an oil producer, Roumania has at her disposal all the wealth she requires".

**—and the Exchange.**

I pointed out that what British business men particularly desired to know was what was going to happen to the exchange. His remarks on this point are of special interest. "You ask me" he said "when the Roumanian exchange will reach a reasonable level, and you tell me that by that you mean about 75 to sterling. 75! The exchange would touch parity next year, yes actually 25, if only the country's administration was on a satisfactory footing. Unfortunately it is very far from being that, and the financial position is bad, as indeed it is almost everywhere else." As our columns show, the Roumanian Government is making great efforts—and on right lines—to put things on the satisfactory footing to which the speaker referred, and I hope soon to see the situation he depicts materialize.

**Egypt's Position.**

Dealing with the outlook in Egypt in his speech at the general meeting of the Egyptian Delta Light Railways, Sir William Garstin pointed out that there were already indications of improvement in the situation. The prices of food crops had fallen considerably, although the cost of production had not yet fallen in the same ratio, but even this showed a downward tendency. It might be some time yet he added, before the cost of production, and the cost of the product fell into such a relation as would enable the producer to realise a profit, but this relation must inevitably arise. Sir William emphasised his conviction that Egypt has a prosperous future before her provided political difficulties do not arise.

## DANUBE SHIPPING.

### Arbitrator's Decision.

It was generally recognised that Mr. W. D. Hines, the American arbitrator on international river shipping questions arising in connection with the Peace Treaties, was faced with an exceptionally difficult task in dealing with the problem of Danube shipping, and the fact that his decision should have been considerably delayed will in the circumstances occasion no surprise. From the nature of the case it followed that lengthy investigations would have to be pursued seeing that so many nations were concerned and so many different interests had to be considered. The award now made follows the expected lines. When the war ended Serbia, Roumania, and France made large seizures of vessels on the river, altogether 1,595 vessels being taken including 609,000 tons of barges and tugs totalling 48,000 h.p. The disposition of these vessels provided one of the principal problems that Mr. Hines had to decide, the issue being whether the vessels were to be regarded as private property, and as such immune from confiscation, or whether they could be looked upon as war material. Nearly all the vessels it was proved had been employed by Austria-Hungary for military purposes, and came consequently under the heading of war material, so Mr. Hines has declared the confiscation to be valid with the exception of a few vessels which were utilised for private purposes. The vessels in question have been regularly utilised by the countries concerned since they were taken over, and no one will cavil at an award which gives to Roumania and Yugoslavia some definite compensation for their sufferings in the Allied cause and one to which their greater concern in Danube navigation justly entitles them. The case of France is different, and it is difficult not to feel that here again our Ally has allowed her zeal to run away with her. Except as regards the development of private enterprise France is no more interested in the Danube than Great Britain. When the war ended this country was in a position to acquire the bulk of the shipping in question, but naturally no such steps were taken, and it is to be regretted that our Ally should have seen fit to follow a course which by no stretch of reasoning can be defended.

An even more difficult question that Mr. Hines was called upon to solve was the amount of shipping, if any, that should be allocated to the other Danube Powers by Germany, Austria, and Hungary. It naturally involved passing in review the whole of the Danube shipping, and the consideration of the normal traffic from the point of view of the extended territories of the countries concerned. Mr. Hines has decided that the vessels confiscated have satisfied the legitimate needs of Roumania and Yugoslavia as regards freight, but that Austria must give these countries certain passenger vessels, while Germany, Austria, and Hungary must give Czechoslovakia 70,000 tons of barges, and 4,450 h.p. of tugs. Time alone will determine how far Mr. Hines has been successful in making allowance for post-war conditions. In the Balkans as elsewhere a state of flux still obtains in commercial matters. Old trade routes are losing ground to new ones, and keen competition is going on in respect to the future paths of commerce. It may be, therefore, that the statistics of the year to come will prove Mr. Hines' award to be in some respects inadequate.

But with that possibility we are not now concerned. In any question of human affairs it is almost impossible to give a decision which will meet with the approval of all parties. There are always some who will find reason to complain, and no doubt Mr. Hines will not lack criticism though he certainly does not deserve it. Faced with a very thankless task in the solution of this difficult problem he has done his work both wisely and well. The delay, as we have pointed out, was inevitable, and the fact that there is at last a settlement will go far to compensate for other considerations. The Rivera in States now know where they are, and will be free to go ahead with their plans for meeting the expansion of Danube traffic that is to be anticipated free from any fear that their proposed measures may be rendered nugatory for the time being by the fact that they have overestimated their resources. It can only be hoped that they will order their policy in the future on sound lines, bearing in mind the fact that the common good is essential to the welfare of each individual country. The Danube now promises to be the great trade artery of the Near East, the main channel in fact of reconstruction. If it is to fulfil the future for which it is so eminently fitted, particularly at a time when other means of communication are either lacking or insufficient, it follows that trade must be as free as possible, that there must be no hampering and unnecessary restrictions, and that each country must do everything to facilitate the commerce of its neighbours. How far will it be possible to reach this position of perfection? In view of what happened before the war there is naturally bound to be anxiety on this point. Then States did not hesitate from time to time to place handicaps in commerce to gain their ends. Any reversion to this state of things would effectually prevent the adequate utilisation of the Danube as a commercial channel, and would also, which is more important, sow the seeds of fresh complications for the future. But any doubt that may be felt in this head will be very largely mitigated by the knowledge that the various states are coming more and more to realize that their interests are not confined to the limits of their own frontiers.

## BRITISH CONSULAR REPORTS.

### IV Yugoslavia

*(Concluded).*

Obviously, the factors influenced the normal course of trade during the year. For example, the principal ultimate consumer of goods, the private individual, took a considerable time to become accustomed to the payment of the high prices resulting from the depreciated value of the currency. Again, the enormous boom in British manufactures and the consequent rise in selling prices to greatly inflated figures militated against actual sales, especially in view of the practicability of acquiring German, Austrian or Czechoslovakian goods, not necessarily of the same quality but answering the same purpose, at much cheaper rates. To some extent this competition was nullified by importers of British goods and British houses themselves covering for sterling requirements when the dinar or kroner rates were exceptionally low (June-July), but local merchants were not and are not provided with so much capital as to enable them to lock up considerable amounts in this manner. Selling for actual sterling payments or against sterling equivalent in local currency was the policy adopted by some merchants with highly successful results, until the dinar depreciated to 120 or worse.

Towards the end of the year there was a rush on the part of British, German, Austrian and Czechoslovak merchants to dispose of their goods on practically any basis. Consignment

terms, credit terms, special delivery facilities, etc., all were offered, but they were not very successful. The Serbian merchant is at all times very conservative, and has been for years accustomed to paying cash for goods bought; and the sudden and unexpected opportunity of securing goods on a much easier basis rendered him suspicious, or at least doubtful, of the firm offering.

**The Trade Position.**

There are many other interesting points affecting trade generally, viz. :—(1) The Fiume question, which is of the greatest importance to Yugoslavia; (2) The first general election held in Yugoslavia, and its after effects; (3) The uncertainty of the political position until the elections were completed and the definite wishes of all the people of Yugoslavia ascertained; (4) The attitude of certain sections in Croatia; (5) The disinclination on the part of many merchants to part with their actual cash or notes to banks, and the resultant shortage of cash at their banks before, during, and after the election period; (6) The formation or rejuvenation of the many Serbian co-operative societies which buy direct from the manufacturer or importer, such as the Railway Servants' Co-operative Society, Bank Clerks, Officers Teachers, Tramway Employees, etc. All these associations represent factors to be considered, not so much in regard to 1920 as for the future. Rail transport difficulties have already been mentioned. They were caused by shortage of coal, lack of engines, or lack of repairing facilities, strikes caused by increased living expenses and inadequate wages, inefficient rolling stock (despite the multitude of wagons available), inexperience of the additional Serbian railway staffs which replaced the old Austrian staffs in Croatia and Slovenia; and various other factors. All these troubles are now being overcome, and rail transport has materially improved. Losses during transport are now considerably less than early in 1920. This fact alone indicates better supervision and management. Strangely enough, however, the improved rail transport caused an even equal trouble, viz., delay in customs clearance at the big cities and towns such as Belgrade and Zagreb, where the Customs premises, sheds and methods were antiquated and not fitted to cope with the increased goods traffic. In October and November for example, the many miles of sidings at Belgrade were so congested with wagons that the emptied wagons could not be cleared and days of shunting full wagons and the withdrawal of hundreds of them for several miles out of Belgrade was required to relieve the congestion. Several merchants and houses have obtained permission, temporarily, to have their own lock-up premises used as customs clearance depots, thus alleviating the congestion to a minor extent. The anticipated prohibition of luxury articles took place and was the cause of considerable annoyance to importers and merchants. Moreover, the detention in Customs for lengthy periods of such articles, despite the fact that they were ordered and perhaps shipped prior to the date of the prohibition, was very harmful. Many protests were made, and now importation is permitted, subject to the payment of additional imposts and taxes. Speaking generally, the shops and warehouses are stocked with manufactured goods of low quality, but for which extremely high prices are charged, the latter being due to the heavy freightage rates, customs and other dues. The general public are content to buy these inferior goods, mainly because they are accustomed to them, and know no other. This being the case, the shopkeeper and merchant have no need to sell anything better, for such goods bring an excellent profit, and can be comparatively readily obtained from Austria, Czechoslovakia, etc.

**Entering the Market.**

For many reasons the best way for British firms to enter Yugoslavia's market is for them to have branches in the country and carry stocks; by this method they can ensure their merchandise being ready for the season's trade for which it is intended (Yugoslavia has a climate remarkable for its great extremes of heat and cold); and the local merchants, by purchasing goods of which they can take immediate delivery, can obviate the risk of loss from exchange fluctuations which must be taken when ordering goods from abroad, the period occupied by the transit of goods to this country being so uncertain. Where this is not possible, the best way is to have a British representative living in the country, who will get to know his customers thoroughly, the personal element being a great factor in business here; or a representative who would visit Yugoslavia periodically. The necessity for British merchants interested to get to know the country, its people and methods, by personal contact, cannot be too strongly emphasised.

# COTTON & COTTON GOODS.

## MANCHESTER COTTON.

*(From our own Correspondent.)*

Manchester, Friday.

We have experienced another featureless week and throughout the market there has been an absence of initiative on the part of buyers. There has been nothing in the market to stimulate shippers to greater activity and generally speaking conditions have been very quiet. With regard to finance the home position is gradually becoming much better, but at the same time many houses still feel the tightness of money. As the week progressed more and more machinery is being restarted throughout Lancashire and the unemployment figures particularly in the weaving towns are gradually being reduced. No big cloth business has been reported for the outlets of the Near East, and generally speaking, only a quiet trade has been done. Cables from Egypt have reported better conditions out there, but shippers to that outlet have not been disposed to purchase very freely. Still, here and there a variety of sales have occurred. In connection with the Levant and Constantinople only a few transactions have been entered upon but traders generally hold optimistic views as to future business. With regard to Egyptian yarns, the business has been on a very restricted scale, and spinners have lost a little more ground. Users have only bought sparingly and prices have been rather irregular. The cloth inquiry for India has not developed and only a few sales have been registered in shirtings and sheetings. Of course, the Gandhi agitation to boycott Lancashire piece goods is having its effects upon trade but, as has been stated before, the boycott will not have any permanent success. The Monsoon news has been very favourable The best of the outlets has been China and some encouraging sales in greys and whites have been put through and more trade is expected in the near future. Buyers for Java and Singapore have not been altogether idle but South America still lags behind. Quotations for American counts have not fluctuated to any great extent but it has been possible to purchase on slightly easier rates. For home use the offtake has been patchy. Yarns for export have met with a good request and quite a big trade has been done during the past week or ten days for India.

## CZECHOSLOVAK DUTIES ON MOTORS.

The Parliament of Czechoslovakia will shortly discuss a legislatice scheme concerning the increase of import duty on automobiles and parts of automobiles. According to this bill, the import duty will be augmented, for countries to which the general tariff applies, by 90 per cent. of the invoice prices; for countries to which a special tariff applies, 65 per cent. of the invoice price.

# Commerce and Industry.

REPORTS FROM OUR OWN CORRESPONDENTS.

## ROUMANIA.

Bucharest, July 22.

**Opposition to New Taxes.**

The Senate passed this week the second part of M. Titulescu's financial project, and in completion of the same passed the luxury tax of 10-15 per cent., and the 1 per cent. tax on turnover. While the financial scheme has thus become law, a section of taxpayers have not ceased expressing their discontentment about it. A meeting, composed of representatives of bankers, merchants, industrialists, landlords, tradesmen, etc. held at the Chamber of Commerce, under the auspices of this corporation, protested against the high taxes and especially those on capital and turnover denouncing them as confiscatory, and therefore anti-constitutional, and foretelling a serious economic disturbance when they are put in application.

**The Reshitza Company.**

The Lower House offered this week the spectacle of a most agitated sitting in connexion with the discussion on the decree-law of last autumn, regarding the Reshitza Company. This concern is believed to be the third largest of its kind in Central Europe; it possesses iron foundries, factories for the manufacture of steel, ammunition, locomotives, railway cars, agricultural machinery etc.; it owns a large tract of arable and forestal land, mines and "metan gas." During the war it supplied a large amount of ammunition to the Central Powers. As it is situated in the new provinces, according to the stipulations of the Peace Treaty Roumania could not proceed to its liquidation, although the management and the board of directors were residing in Vienna, and the whole property belonged to the former enemies.

But in order to nationalise it is far as possible the Government arranged for this concern to be transformed into a Roumanian company with a capital of 125 million lei—although its real worth far exceeds this amount—of which 50 millions were subscribed by Roumanians, and 16 out of 22 seats on the board of directors were reserved for Roumanians. The Government arranged further that a fresh increase of capital for 50 millions, which will be made shortly, should be allotted exclusively to Roumanians, the shares to be untransferable, thus securing preponderence in capital and management for Roumania. Moreover, the 10,000 pastures of arable land will be expropriated under the Law for Agrarian Reform for the new provinces, and only a portion of the land with "metan gas" will be put at the disposal of the company for the manufacture of tubes for the oil companies and for the production of the necessary electric current for the neighbouring towns. All these statements were brought forward by the Cabinet to emphasize the advantages which Roumania has derived from the arrangement with the Reshitza concern.

The Opposition, consisting this time of the Liberals and the different groups of the Federationists, maintained, however, that this company even in its present formation, represents a menace to the security of the State, and insisted that it should at all costs be entirely nationalised, as the manufacturing of the necessary ammunition for the defence of the country could not be left in the hands of former enemies.

Finally the Bill was passed amid the greatest excitement. The Opposition, which abstained from voting, left the House in a body, and marched in procession to the Palace, where they chose from among themselves a delegation of 12 former Cabinet Ministers, who drafted a memorial for the King, declaring that they do not acknowledge the vote, condemning the activity of the Cabinet and its parliamentary majority, and asking for the dissolution of this Parliament, stating that they will no longer attend its sittings.

Despite the Premier's endeavour to smooth matters over at the following sitting, each group of the Opposition read a declaration notifying their withdrawal from Parliament, and ennumerating their reasons. The Premier also made a declaration, stating that when he took over the reins of Government, the first point of his programme was to establish the responsibility for the mismanagement of public affairs—administrative military, economic, and financial—of the different cabinets since the war and up to the formation of his own, and to apply adequate "sanctions," but in the interest of the dispatch of the important reforms the country needed, he did not carry out his intention. But in view of the behaviour of the Opposition he considers this tacit armistice as denounced, and will therefore proceed to the execution of his initial design. The House forthwith decided on the formation of a Commission to this effect.

The Parliamentary Session was closed to-day; during the last few days, three sittings a day were held, in order to pass numerous Bills, including the "Budget" and the "Agrarian Reforms for the New Provinces."

**General News.**

A group of French financiers together with the Credit Foncier d'Algérie et de Tunisie have resolved to found a bank in Bucharest for the expansion of commercial relations between the two countries; the new bank will start with a capital of 50 million francs.

A mixed Commission has been instituted to combat the bovine plague now raging on the Roumanian-Hungarian frontier.

The export of Transylvanian cattle to Italy is being carried on a large scale through Yugoslavia. About 50,000 head of cattle have already been despatched, and a large number are following.

150 more locomotives have recently been ordered in Germany. Delivery will begin without delay, and the first payment on account has already been effected.

The commission tax on imported cotton has been lowered from 2 lei to 0.50 per cent.

In consequence of cholera raging in Russia and the Ukriania, Roumania has taken the necessary measures to restrict the importation of foodstuffs, etc., and to apply the sanitary precautions regarding passenger traffic.

## BULGARIA.

Sofia, July 27.

**Miscellaneous.**

The harvest is now almost ripe and from reports received, 1921 promises to be a good year; although in certain places the hail has done a good deal of damage.

The internal loan is to be issued in September, and meanwhile the conditions of the loan will be made known to the public.

The settlement of pre-war debts between Bulgaria and England is no further advanced, and there would seem to be no indications on our part of the abolition of the Clearing House or on the part of the Bulgarians of paying their debts. The continuance of this situation can do no good to anyone, and it is to be hoped that in the near future a definite line of policy will be taken up by both parties.

The news that Paris and Constantinople are to be linked up by an air service, which will pass through Milan, Triesto and Salonika is disappointing to Sofiates as it will mean that all aerial flights from here will be to Berlin by means of the Dutch-German Company, which is being formed.

Sofia, July 31.

**Bulgaria's Debts.**

It is not without interest to quote the opinions of a few Englishmen who hold that Bulgarian merchants

Digitized by Google

should be made to pay their debts in full at once. Their reason for this is that after the Armistice all Bulgarians had ample opportunities for acquiring sterling at a favourable rate of exchange in order to settle their debts. The rate did not rise above 100 to the £1 until about the month of April, 1919, and during the closing months of 1918 it was between 35 and 60 to the £1. For a certain period Bulgarians were forbidden to send money abroad, but they were never hindered from buying foreign money. However, very few merchants did pay their debts, and now the rate is round about 440, and a decision as to the method of paying will speedily have to be come to. There are at least five methods; firstly to pay the debts in instalments, secondly to pay at the rate of 75 or 100 levas to the £1, allowing the money to lie in a local bank, drawing interest which goes to the creditor, thirdly to postpone the payments, fourthly to allow the firms concerned to arrange matters between themselves, and lastly to follow the ruling laid down in the Peace Treaty. At present it seems as if the first method stands the most chance of success.

## YUGOSLAVIA.

Zagreb, July 19.

**General News.**

The Ministerial Council has decided to abolish the restrictions upon dealings in foreign currency and exchange, and the Centrale des Devises will be abolished and transactions in exchange will be quite free. The restrictions on the export of bullion remain in force, however, and no one may take more than 2,000 dinars in paper money out of the country.

Statistics recently issued from the Banat show that in the Yugoslav portion of that district there are 200,000 Serbs, 100,000 Germans, 90,000 Hungarians, 60,000 Roumanians, and 15,000 of other nationalities, mostly Jews and gypsies.

The Ministry of Agrarian Reform announces that in the Voivodina large estates to the extent of 772,000 *jutara* have been broken up and 247,000 distributed among small holders, and in Croatia and Slavonia 200,000 *jutara* have been broken up. A *jutro*, which means as much land as a man can plough in a morning (*jutro* means morning), is a little over a third of a hectare or a little less than an acre.

Credits to the extent of 100 million dinars for loans to industries and craftsmen, and of 50 millions for the feeding of the "passive" districts, have been cancelled.

Reports from Southern Serbia tell of a better harvest than can be hoped for in the north. The wheat is said to be good, as in the Banat; only the straw is short, owing to the drought, but the quality is good.

## ALBANIA.

Tirana, July 28.

**Tobacco Concession.**

The Albanian Parliament has just voted a concession for the manufacture of cigarettes, and the rights of export and cultivation of tobacco to the Sepheriades Tobacco Company of London, for 21 years.

**Poor Communications.**

The length of the roads fit for traffic in Albania is not very great. The Turks never constructed roads, and the Austrian troops in the course of their retreat used all the old bridges dating back for several centuries.

There are at the present time the following roads with a regular traffic of motors and lorries (the distances representing kilometres):—Durazzo - Tirana, 37; Durazzo - Kavaja, 18; Tirana - Kroja - Milot - Alessio-Scutari, 142; Valona - Fier, 37; Valona - Himera - Saranda, 94; Valona - Argjirokastro - Delvino - Saranda 148; Tepelena - Permat - Leskovik - Korcha - Pogradec, 190; Argjirokastro - Tepelena, 30; total 695 kilometres. In addition 264 kilometres of roads are being constructed the routes being Kavaja - Ebasan - Pogradec; Kavaja-Lushnia - Kuch - Libofsha - Fier; Kuch - Beret - Klisura - Permet.

The narrow gange railway (in kilometres) are:—Durazzo - Kavaja, 18; Durazzo - Tirana, 37; Tirana - Milot, 42; total, 97 kilometres.

## CYPRUS.

Cyprus, July 19.

**General News.**

Mr. C. Dixon, mining engineer and expert, and Mr. Fritz Behr, have inspected the asbestos mines on Mt. Troodos, on behalf of the English company which contemplates purchasing them, and a report will be submitted in due course.

Major Williams, who has been visiting Cyprus, and who will report on the railway and connected matters, has left for England.

**New Monetary System.**

The proposed change in the Monetary System is likely to come into effect in April, 1922. The Receiver General, Mr. Bowring, has recently conferred with the managers of banks. The proposal is to adopt subdivisions of the pound similar to those in Egypt. The £ sterling will equal 1,000 milliemes, the shilling 50; one millieme 8 paras. The bronze piastres and 3 piastre (4d.) silver pieces will be withdrawn and replaced by nickel coins.

## ASIA MINOR.

Smyrna, July 19.

The s.s. "Castilian" has just landed in Smyrna complete material for a well equipped field hospital, including "X-rays" and all modern accessories. This equipment has been supplied by Messrs. Watson, of London, and has been landed in Smyrna by Mr. Jackson, an employee of the said firm.

## TENDERS INVITED.

*Particulars of tenders marked (D.O.T.) are to be obtained from the Department of Overseas Trade, 35, Old Queen Street, S.W. 1.)*

**Tenders are invited for the following contracts and must be made by the dates mentioned:—**

**Egypt.**

Cement.—The Director-General of the Ports and Lighthouses Administration, Alexandria, invites tenders for the supply of 100 tons of cement. August 29 (D.O.T.)

**India.**

Springs, etc—The South Indian Railway Co. Ltd, invite Tenders for the supply of:—(1) Laminated, Volute and Helical Springs. (2) Brushes. (3) Rivets, Nuts, and Springs. (4) Copper Plates for Locomotive Fireboxes. Specifications and forms of tender may be obtained at the Company's Offices, 91, Petty France, Westminster, S.W.1. August 31.

Springs, etc—The East Indian Railway Co. invites Tenders for the Supply and Delivery of Helical and volute springs and Steel boiler and flue tubes. August 24.

The traffic receipts of the Egyptian Delta Light Railways for the week ended July 10, amounted to £E8,926; total for year £E89,066. For the corresponding period of last year the receipts amounted to £E12,793, making the total for the year £E116,173.

# Engineering Topics.

*By our Engineering Representative.*

### Huge Motor Ships.

The growth and development of motor ships, both as regards size and power, is well indicated by the fact that there is now in service an oil-engine tanker with a dead weight capacity of no less than 15,750 tons, being the largest vessel of her class yet built. Some idea of her equipment may be gained from the fact that her engines, which are of the usual type for large motor ships, will develop nearly 5,000 horse power. I understand that she is able to maintain an average speed of 10 knots on a fuel consumption of only about 14 tons of oil per day. A steam driven vessel, with oil fired boilers would require about 200 per cent. more fuel to keep up this rate.

Possibly the advocates of the motor ship are premature in speaking of the doom of the steamers which is the title of an editorial in the *Motor Ship*. In times of great prosperity it is true that there is little difficulty in making profits, and from this the paper deduces that it is when trade is at a low point, as it is to-day, that true values emerge. It quotes a cable as follows: "One of Sweden's largest shipping companies, the Johnson line, has requested Government authorzation to sell abroad four of its liners with an aggregate tonnage of 24,000, stating that its present steamship activity brings nothing but loss and that it intends, therefore, to purchase and use motor ships exclusively."

### A Boom Coming.

The above announcement, received from Stockholm during July is, one would think sufficient indication of the company's intentions and predilections. It, however, becomes even more remarkable in the light of further explanation. The Johnson line, with a fleet of over 20 vessels, owns about an equal number of steamers and motor ships, the tonnage of the latter being rather in excess of that of the former. It was the second shipowning firm in the world to adopt oil engine propulsion, the first vessel, named the Suecia, being built in 1912, and followed closely on the pioneer motor ship, the famous Selandia. Since the Suecia was put into commission the Johnson line has added 10 motor ships to its fleet, whilst not a single steamer has been built. In these circumstances it cannot be said that the owners have arrived at their present decision without a vast amount of experience, for they have operated steam and motor ships under competitive conditions within the widest limits of market fluctuations from inconceivably high rates to the present record depression.

It may be recalled that a few years ago the East Asiatic Company adopted an exactly similar policy, and as a result of their experience extending over a number of years, they decided to sell all their steamers and to become a purely motor owning company. At the present time they own more motor vessels than any other organisation, the Johnson and the Glen lines having fleets which are slightly fewer as regards component vessels.

We thus arrive at this very noteworthy fact: That the two shipowning companies which have the widest experience of the comparative value of steam and motor vessels under all conditions, and each of which owns more ships of the latter class than any other shipping firms, have decided as a result of that experience, not only that their new vessels shall be exclusively motor ships, but that they will dispose of their existing steamers as speedily as possible in order to build and put into commission more motor ships.

In face of these facts the journal considers it not unreasonable to insist that when shipowners commence to order new tonnage, the very force of economic circumstances, and the indisputable evidence of the advantages of motor ships will render it necessary for them to build only vessels of the latter class, except for the time being, when the largest trans-Atlantic passenger liners are in question. Obviously no excuse can be found for building ships which have already been proved to be a source of nothing but loss. Shipbuilding costs have fallen considerably during the past six months owing to the remarkable reduction in the price of steel and the lower labour charges, so that at any moment a revival in shipbuilding may take place when those who have foreseen the march of events will reap their reward.

### Price Reduction.

It is interesting to note that Messrs. Rolls-Royce, Ltd., will now be able to supply the Rolls-Royce Eagle, 360 h.p. aero engine, at the round figure of £1,000, this price including all up-to-date improvements. The Rolls Royce Eagle is certainly one of the best known engines of its type in the world, and carries a wonderful record for reliability over long distances. To its credit must be placed the direct flight across the Atlantic which was one of the most outstanding of recent engineering feats, the flights from England to Australia, the England to South Africa flight, and the record flight from England to India. The Rolls-Royce engine is built throughout of the very finest materials, and is assembled with scrupulous care. Indeed it is the use of highest grade materials, and the extraordinary skill of their work people that have placed the firm in the foremost rank of the world's engineers.

### Motor Development.

In a sense the development and progress of the Automobile Association mark the development of the British industry, and it is pleasing to gather, at the annual dinner of that organisation, that the membership has now reached a total of over 160,000 motorists, and that its annual income is now just about a quarter of a million sterling. In moving the adoption of the annual report Sir William Joynson-Hicks, who has been indefatigable in promoting the interests of the private motorist in the House of Commons said that during the past two years the A.A. has tried to get back to pre-war conditions of service to motorists, and has done its utmost to develop the road service and the road patrols. "To-day, instead of trundling themselves along on push cycles, as they had to prior to the war, the patrols were nearly all now provided with motor bicycles, and were therefore able to cover a very much larger extent of country and be much more useful to members than they were prior to the war. They had also introduced a mechanical first-aid system, which was on its trial, and was in course of development. It had been very useful to members who had broken down, either from the point of view of their cars, or though accidents to themselves. Another post-war provision had been the extension of the A.A. roadside telephone service. They were now able to arrange, by giving members keys to the roadside telephone boxes, that any member in trouble could go at once to a telephone box, even after the hour when the A.A. patrol had left, and get in touch with any part of the Kingdom."

Last year he was able to announce the opening of one roadside fuel supply station at Aldermaston, on the Bath road. To-day there are eight in existence situated at points where where it is generally very very difficult to obtain petrol. With regard to road signs, nearly 17,000 of these have been put up by the Association, but now in accordance with the principles under which we live in these days, the Ministry of Transport in conjunction with their Advisory Committee have undertaken this work, and are supporting the adoption of a signpost which has really been designed by this private motorists' association. The A.A., however, are to keep a very close watch upon the public and local authorities to see that this sign-posting work is properly done, since they would be unable to endure seeing the work which they in the past have carried out so well, fall into neglect simply because public bodies do not carry out their full duties in this direction.

# NEAR EAST MARKETS.

## London Produce Report.

Dried Fruit.—Little activity is to be noticed in this market. Sultanas are a firm spot, and rates are very steady. A number of transactions have taken place in figs. Currants have been rather neglected.

Sugar.—Home refined has been in good demand at the revised rates. London granulated has been done at 35s. 6d., while West Indian crystallised has come to business at 45s. to 53s. American is 60s., and Czecho Slovakian 32s.

Coffee.—The market has ruled quiet with generally a steady tone.

Oilseeds.—Indian linseed has been done at 24s. 6d., while La Plata is 21s. 3d. Rapeseed has been quiet with Toria at 22s. 6d., and bold Ferozepore at 21s. 9d. Cottonseed closed steady, Egyptian Black being 14s. 6d., and Sakellarides, 14s. 3d.

Oils.—Linseed oil is easier at 38s. 9d. Rape oil is firm with crude at 54s., and refined at 62s., Cotton oil is steady. Refined common edible is 50s., Egyptian crude 43s. 6d., and deodorized 58s. Turpentine was dull at 70s.

## ROUMANIAN CROPS.

Messrs. Watson and Youell have forwarded the following translation of a report published in the Bucharest newspaper *Dimineata* of July 22 :—

General situation according to reports received by the Ministry of Agriculture :—In Muntonia the harvesting of wheat, barley, and oats has terminated and threshing is in full swing. The second hoeing of the maize is being proceeded with. In Moldavia and Transylvania the harvesting takes place a little later owing to the difference in land and climate. Maize in general is doing very well indeed. Wheat has suffered slightly owing to rain. Vineyards are excellent. Hay is good but somewhat thin. In the Dobruja yields are not so good owing to drought but in the district of Caliacra reports are excellent. In some districts inundations and hail have caused damage especially in the district of Jalomitza, the Communes of Lupshanii, Independentza, Ulmi, Gaunoshi, and Rosetti being mentioned, but the whole area is reported to be 4980 hectares. In general both autumn and spring sowings are good. Vineyards are excellent the second sprinkling is about finished ; there is a slight blight in some places. In Ardeal (Transylvania) intermittent rains have done a lot of good to the autumn and spring sowings. Harvesting of wheat, barley and oats has commenced. Maize is growing very vigoriously. Forage crops are doing very well indeed ; lucerne and trefoil have been cut for the second time. In Bukovina insufficient rains have fallen. Wheat and rye give good promise. Barley is good with a few exceptions where it has been attacked by rust. Maize is good except in places where it has been attacked by slugs.

Our Bucharest Correspondent writes :—The Ministry of Domains in its last report about the crops, states that the cutting of the wheat, barley, and oats is terminated and that threshing has started almost everywhere. The yield of all cereals promises to be very satisfactory, and the maize plant is in an excellent condition, as it has had so far the necessary quantity of rain.

## THE EGYPTIAN COTTON CROP.

Statistics are now available relating to the Egyptian cotton season for the twelve months ended July 31st. The crop amounted to 4,700,000 kantars, against 5,643,000, kantars in the previous year, and 4,866,900 kantars in 1918-19. A feature of the past season has been the marked decline in exports from Alexandria, the shipments to all parts during the twelve months being only 398,000 bales, against 827,000 bales in the previous year. The amount sent to Great Britain during the past twelve months totals to 203,000 bales, as compared with 398,000 bales in the previous year. There has also been a distinct falling off in takings of the United States the figures being 48,000 bales against 289,000 bales. On the other hand shipments to the Continent amount to 128,000 bales, as compared with 124,000 bales in 1919-20.

## BUKOVINA CATERPILLAR PLAGUE.

(*From our own Correspondent.*)

Bucharest, July 22.

A new species of caterpillar has made its appearance in one district of Bukovina causing great damage to vegetables, trefoil, and the maize-plant. All means employed to destroy this plague have so far proved inefficacious.

## ROUMANIAN WHEAT EXPORT MONOPOLY.

(*From our own Correspondent.*)

Bucharest, July 22.

At a recent council the Cabinet decided that the exportation of wheat should be carried out exclusively by the State, thus creating a monopoly. No decision has yet been taken, regarding the exportation of the cereals.

## AGRICULTURE IN CYPRUS.

(*From our own Correspondent.*)

Cyprus, July 19.

Wine prices have continued to rise, owing chiefly to increased demands from the thirsty land of Egypt. There is no improvement as regards carobs, which have been sold recently at 14s the kantar (180 okes), or about £3 2s. the ton ; which is considerably below the pre-war average. The prospects of the carob harvest, and also of the next vintage are still good, although damage has been done in some districts, by the late severe storms, both to carob trees and vines. Tobacco growers still hope for better results from their enterprise. The Director of Agriculture, Mr. W. Bevan, has found it necessary to notify cultivators that the Government is neither buying nor accepting samples of the different kinds of tobacco ; but that sufficient quantities have been sent to the Imperial Institute in London for examination and for an estimate of their value for extraction of nicotine ; regarding which information will be published as soon as possible.

## BULGARIAN CROP OUTLOOK.

(*From our own Correspondent.*)

Sofia, July 25.

A good crop has already been prophesied, and later reports state that the prospects are very encouraging, especially in the South. The peasants, who are becoming very discontented at the low rate of the leva, and its consequent small purchasing power, should this year show no reluctance in selling their produce. Since the Great War they have been chary of disposing of their cereals as from 1915-1918, so much was forcibly taken from them for the use of the Army, and for export, that they feared a famine. This danger is now over, and it will be to their own advantage to sell all their available cereals, beyond what is necessary for the needs of themselves and their live stock.

## DRIED FRUIT REPORT.

Messrs. J. C. Houghton and Co., report as follows for the fortnight ended August 2 :—

Currants.—The hopes which were entertained of a better demand on the settlement of the coal strike have so far not materialised, and the month's trading can only be described as disappointing. We fear too much was expected in the way of an immediate resumption of buying activity, and probably lack of coal for household purposes has interfered with cooking arrangements to a greater extent than was anticipated. Until supplies reach normal we must look for restricted trade. Business passing has been chiefly in quarter cases of good small Gulf at 66s., good shade dried Panariti at 75s. and Vostizza, 80s. to 90s. Other growths are most difficult to sell even at concessions in price. Total arrivals from commencement of the season are 24,100 tons. Quotations are :—Pyrgos and Amalias, 47s. to 54s. ; Patras, 57s. to 65s. ; Zante, 55s. to 70s. ; Gulf and Panariti, 60s. to 70s. ; Vostizza, 80s. to 90s. New crop reports are to the effect that owing to continued rain during the month of June, shipments will be delayed and that no arrivals are looked for in this country until October. Growers'

ideas are high and latest quotations were :—Pyrgos, 55s. c.i.f. ; Zante and Gulf, 65s. c.i.f. ; Vostizza, 75s. c.i.f. ; and if these pretensions are maintained it does not look as if future spot rates will be much below those now ruling.

Valencia raisins.—Stocks cleared.

Sultanas.—The small Smyrna stocks remaining are being cleared at 140s. to 150s., and Greeks at 138s. Afghans moving slowly, red 102s. to 105s. ; and yellow, 137s. 6d. New crop business in good average quality has taken place at 86s. 6d. to 90s. c.i.f., September shipment. Latest reports are that shipments will be very late owing to difficulties of local transport.

Figs.—Supplies cleared.

## THE MONSOON.

The India Office have issued the following communique on the Agricultural situation in India at the end of July : The early monsoon, though irregularly distributed, was inadequate, except in Northern Bombay, Rajputana, Baluchistan, and North Western India, where the prolonged drought caused much anxiety, especially in Gujarat and Kathiawar. Cattle in Rajputana, Baluchistan, and North Western India suffered severely since the middle of July. Copious rain has changed completely the situation in all these tracts, although rain in still insufficient in certain areas, such as the Punjab, Western Bengal, Central Burma, Malabar, and parts of the United Provinces of Agra and Oudh, and the Central Provinces, while floods have caused some damage in parts of Assam, Sind and Eastern Bengal. These areas aggregate only a small proportion of the total, and generally the position may be described as good in Central India, the Deccan and Lower Burma, and satisfactory elsewhere. Germination is reported to be excellent in the Central Provinces. Famine relief continues, but works are being closed gradually in Bombay, Central Provinces, and Hyderabad. There has been some trans-frontier immigration into the N.W. Frontier Province. The area under the jute in Bengal has fallen off by 39 per cent owing to low prices, a large carry over, and a rise in the prices of foodstuffs. Prices of grain are very high ; they have fallen in Bombay, but are steady elsewhere. The price of rice is generally lower than it was at the same time last year, but the price of other grains is much higher, especially in Northern, Western, and Central India.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated August 1 :—July 28.—Bombay monsoon vigorous causing abundant rainfall in Gujarat. Rainfall also abundant in the extreme North. July 29—Monsoon strengthened in Burma. July 30—Storm from Bay moved to the South-East of Rajputana, causing heavy rainfall. Bombay cotton market weak and irregular ; on July 28 fine M.G. Oomras September Rs. 332½. Bombay piece-goods market, July 28—While sale demand still discouraging; prices steady. Monsoon conditions favourable and dealers optimistic regarding future enquiry. 67,895 packages lying in Bombay port trust warehouse June 30, as compared with 72,048 on May 31, and 76,689 on April 30. Stocks steadily declining. Calcutta jute market closed on July 30. On July 29 mills buying Kutcha bales resulted in sharp rise of Rs. 2½ in Bhita Bazar and this kept Pukka bale market steady. Business reported at Rs. 54½ for firsts and Rs. 41 for lightnings. On July 30, Hessians quiet but steady. Heavy goods strong owing to good enquiry for heavy C's and packing twills. Rangoon rice market on July 29 closed at Rs. 581½ for August-September deliveries. On July 30, market closed strong at Rs. 585 to Rs. 590. New crop quoted at Rs. 437 for February-April. Licenses for Colombo renewed to the extent of 15,000 tons for August and 10,000 tons for September. At tea sale on July 26 general demand was good ; Assams excellent, Darjeelings and Dooars good, Cachars and Sylhets useful, Tippy good liquoring kinds firm, poor liquoring medium, brokens weak, but medium leaf and common grades firm. 62,923 packages sold to date at an average price of 8 annas 9 pies per lb. No change in bank rates.

## CURRENT PRICES.

*General Produce.*—Bacon, 182s. cwt. ; butter, 263s. cwt. ; cheese, 134s. cwt. ; chillies, 145s. cwt. ; eggs, 27s. per 120 ; cloves (Zanzibar), 1s. 0½d. lb.; cocoa (Ceylon, good to fine), 79s. 6d. cwt. ; coffee (Costa Rica), 137s. 6d. cwt. ; coffee (East India bold), 122s. 6d. cwt. ; coffee (Mocha longberry), 104s. cwt. ; (Santos superior), 58s. 6d. cwt. ; lard, 92s. 6d. cwt. ; ginger (washed Cochin), 35s. cwt. ; nutmegs (110's to 80's), 11d. lb. ; pepper (Singapore black), 4½d. lb. ; pepper (Muntok white), 9½d. lb. ; raisins (Valencia), 87s. 6d. cwt. ; raisins (Sultana, Smyrna), 107s. 6d. cwt. ; currants (Vostizza), 82s. 6d. cwt. ; sugar (granulated) 59s. cwt. ; sugar (No. 1 cubes) 63s. 3d. cwt. ; sugar (White Mauritius) 53s. 3d. cwt. ; sugar (West Indian crystallised), 47s. 6d. cwt. ; tapioca (fair Singapore), 2d. lb. ; sago (small pearl), 26s. 6d. cwt. ; sago flour, 15s. 9d. cwt. ; rice (Rangoon No. 2), 22s. cwt. ; rice ( bran Rangoon) £9 2s. 6d. ton ; cinnamon (firsts), 1s. 4d. lb. ; mace (fair Singapore), 1s. 1½d. lb. ; tea (Indian common to good common), 7d. lb. ; tea (Ceylon common to good common), 8½d. ; lb. ; tea (Java common to good common), 4½d. lb. ; wheat (Australian), 82s. 4½d. qr. ; wheat (English white), 72s. 6d. qr. ; wheat (La Plata), 83s. 6d. qr. ; barley (malting), 67s. 6d. qr. ; oats (English), 45s. 6d. qr. ; oats (La Plata). 32s. 3d. qr. ; maize (La Plata), 45s. qr. ; flour, 69s. sack.

*Metals.*—Aluminium, £150 ton ; autimony (English regulus); £39 10s. ton ; bismuth, 7s. 6d. lb. ; copper (standard), £70 2s. 6d. ton ; copper (electro), £76 ton ; gold bars, 115s. oz. ; iron (No. 3 Cleveland), 137s. 6d. ton ; hematite (mixed number), 162s. 6d. ton ; galvanised sheets (24G), £23 5s. ton; lead (soft foreign). £23 10s. ton ; manganese Poti, 1s. 3d. unit ; molybenite, 45s, unit ; nickel (£190 ton ; platinum, 366s. oz.; plumbago, £19 ton; quicksilver £10 19s. 9d. bottle ; silver bars, 39d. oz. ; spelter (G.O.B.), £25 17s. 6d. ton ; tin (standard), £159 7s. 6d. ton ; wolfram, 12s. unit; zinc sheets, £35 10s. ton; tin plates (20 by 14) 27s. 3d. box.

*Chemicals.*—Acids : Boric, 71s. cwt. ; oxalic, 9½d. lb. ; citric 2s. 4½d. lb. ; tartaric, 1s. 5½d. lb. ; ammonia sulphate, £13 11s. 6d. ton ; arsenic (white powdered), £42 ton ; benzole (standard), 2s. 7d. gallon ; bleaching powder (35 per cent.), £17 10s. ton ; borax crystals, 34s. 6d. cwt. ; cream of tartar, 139s. cwt. ; Potassium : Bi-chromate, 9½d. lb. ; chlorate, 5d. lb. ; caustic, £35 ton ; nitrate, £52 15s. ton ; permanganate, 1s. 3½d. lb. ; prussiate yellow, 1s. 3d. lb. ; sulphate (90 per cent.), £19 ton ; Sodium : crystals, 145s. ton ; bi-carbonate, £12 10s. ton ; bi-chromate, 6½d. lb. ; alkali (58 per cent.), £9 7s. 6d. ton ; chlorate, 4d. lb. ; caustic (70 per cent.), £22 10s. ton ; hyposulphite, £19 ton ; prussiate, 7d. lb. ; nitrate, £18 10s. ton ; glycerine (crude 80 per cent.), £106 ton ; glycerine (industrial 1260 per cent.), £120 ton ; sulphate of copper, £30 10s. ton ; sulphate of iron, 145s ton ; lemon oil, 3s. 5d. lb. ; quinine, 4s. oz. ; red lead, £39 15s. ton ; white dry lead, £42 12s. 6d. ton ; white ground lead, £53 ton.

*Hides and Skins.*—Ox and Heifer (first), 90 lbs. and up, 9½d. lb. ; 80 to 89lbs., 9½d. lb. ; 70 to 79 lbs. 9½d. lb. ; 60 to 69 lbs 8½d. lb. ; 59 lbs. and under, 7½d. lb. (second), 90 lbs. and up, 8d. lb. ; 80 to 89 lbs., 8d. lb. 70 to 79 lbs., 8d. lb. ; 60 to 69 lbs., 7-5-8d. lb. ; 59 lbs. and under, 6d. lb. ; Cows (first), 60 lbs. and up, 7d. lb. ; 59 lbs. and under, 7d. lb. ; Cows (second), 60 lbs. and up, 5d. lb. ; 59 lbs. and under, 5d. lb. ; Bulls (first), 4½d. lb. ; (second), 3½d. lb. ; Kips (first), 6d. lb. ; (second), 5d. lb. ; (third) 3d. ; Calcutta Market.—Prices in rupees per 20 lb. Arsenic hides (cows) : Agras, 8 to 12.8 ; Durbhangas, 6 to 7.8 ; Patnas 5 to 6. Salted cows, 3 to 6. Arsenic hides (buffalo), 3 to 7 Skins : Calf, 8 to 10 per 20 lb. ; goat, 225 to 250 per 100 pieces

*Miscellaneous.*—Cotton (American), 8.31d. lb. ; Cotton (Egyptian), 14s. 95d. lb. ; linseed (La Plata), £22 13s. 9d. ton ; rape (Toria), £22 11s. 3d. ; soya beans, £15 15s. ton ; palm kernels, £23 17s. 6d. ton ; oils: linseed, £39 5s. ton ; olive (Levant), £82 10s. ton ; palm, £36 10s. ton ; rape (crude), £55 5s. ton ; soya, £41 ton ; petroleum, 1s. 9½d. gallon ; ground nut, £51 10s. ton ; cotton (crude), £41 10s. ton ; shellac (T.N. second orange), 295s. cwt. : shellac (A.C. garnet), 295s. cwt. ; rosin (American), 20s. 6d. cwt. ; turpentine, 80s. 6d. cwt. ; rubber : Plantation (No. 1 crepe), 8½d. lb. ; smoked sheet, 8½d. lb. ; fine hard Para. 11d. lb.

UBEL

SEMI-ROTARY

PUMPS

Standardization of parts is a feature of these pumps, guaranteeing interchangeability when necessary. This, combined with the looked-for accuracy and finish of the UBEL product, account for the fact that they enjoy an ever increasing popularity and widespread demand.

Double and Quadruple Acting Semi-Rotary Pumps for Domestic and Trade purposes of every description. Contractors' Pumps, Ships, Pumps, Rotary Suds, Pumps for Machine Tools, Plumbers' Force Pumps, Boiler Test Pumps, etc.

*Write for Catalogue Section P, covering whole range of UBEL Semi-Rotary and general hand pumps. Free on application.*

## SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

Stamboul, July 16.

Some sales made for Anatolia and the consignments to Batoum have imparted a certain movement to the Constantinople market. However the last advance of the Greek armies in Anatolia has stopped business here. On the other hand the rise that has suddenly taken place in the last few days in the foreign exchanges increases the difficulties of importers in withdrawing their goods.

The fall in the prices of manufactures has stopped at Manchester, and a sharp recovery is in fact to be recorded. Here cabots have benefited by a rise of about 10 per cent. as a result of the strong demand for Roumania. Other classes of goods are for the moment stationary. Sales on credit, which had disappeared since the war, are becoming more and more general to facilitate the consumption of stocks.

*Produce.*—Sugar. The strong demand for India has stopped the fall, and prices have undergone a sharp recovery. Here business is good, the demand having been active for Roumania, and notably for Batoum. The arrival simultaneously of two cargoes of sugar however, has brought about a fall in prices. Quotations are :—Java sugar £19-20 per ton, disposable and afloat here £37-38 per ton, and in customs £T31-32 per 100 kilos.

*Coffee.*—Despite the purchases of the Brazilian Government and the export of 200,000 bags of Santos, prices remain stationary. The new crop is reported to be excellent.

*Rice.*—This commodity has risen in producing centres owing to the demand. Quotations are :—Rangoon, shipment for Egypt, £17 per ton. Here Saigon No. 1 Ps 13-14 per oke ; Siam Ps. 17-18 per oke ; American Ps. 10 per oke.

Panderma.

The report for June states :—There is nothing to report during the month, business having been at a standstill. The arrival of new cocoons from the neighbouring districts have alone imparted activity to the market. They are estimated at about 35,000 kilos up to the present, and the price is round about Ps. 70-74 per kilo. It is anticipated that the crop will not exceed 70,000 kilos.

Salonika.

The report for May and June states :—The conditions of the last two months have favoured the crops. The quality should be good and the quantity about the same as that of last year. Quotations are :—Wheat 1.20-1.30 drachmae per oke ; maize 0.80-0.85 drachmae per oke ; barley 0.90-0.92 drachmae per oke..

The old stock of cocoons has not been sold. The new crop is better and more abundant. Prices 30-32 drachmae per oke. There is no demand for opium. Stocks amount to 30,000 okes, and prices range from 100 to 110 drachmae per oke. It is estimated that about two million okes of non-manipulated tobacco are held up by the cultivators. Stocks of manipulated tobacco are estimated at three to four hundred thousand okes. The price is 10-17 drachmae Stocks of cotton are exhausted. Smyrna Adana is 6-6½ drachmae per oke, while American is 6½-7 drachmae.

## ON 'CHANGE.

### Tone steady; Business lacking.

*(From our own Correspondent.)*

London, Monday.

The markets have maintained a fairly steady tone during the past week, but business has been unusually restricted even for these times as a result principally of the holiday season. Obviously it is no good expecting anything else for some weeks, but with the autumn, provided no unforeseen factors crop up, there ought to be a great revival of interest in some of the markets

Gilt-edged securities have been fairly firm. War Loan Fives, being 88,1-16, Consols, 49,1-8, and Fundings, 71½.

Industrials have been dull. Iron and steel have rallied somewhat, but here and there weakness has developed. Banks have continued to be very steady.

A rather strong tone has been in evidence in oils as the result of Continental buying. There are not many shares about in this market, and any appreciable revival of buying would be bound to have a marked effect on prices.

The Rubber market has continued to be featureless, and for the moment movements hinge on the future of the restriction scheme.

## GEMSAH OIL REEFS.

A brief report has been issued by the directors of Gemsah Oil Reefs stating that the construction of the jetty and island platform at Gemsah has taken longer than had been anticipated, but the work has now been brought to a satisfactory conclusion. The erection of the derrick and rig has also been completed, and a cablegram has been received from the field manager stating that actual drilling has commenced. Progress of drilling operations will be notified from time to time through the Press.

## ALEXANDRIA EXCHANGE.

*Supplied by G. L. Mortera, Alexandria and Cairo.*

Prices on July 22 were as follows:—Agricultural Bank of Egypt, £4 7-32; Alexandria Water Co., Ltd., £6 5-8; Anglo-American Nile Steam, £2 3-8; Associated Cotton Ginners, 25-32; Banque d'Orient, Fr., 56; Behera Ord., £E 8,9-16; Brasseries d'Egypte, Fr., 82 ex.; Building Lands of Egypt, £5-8; Cassi di Sconto, Priv. Fr. 94; Ciments d'Egypte Priv., Fr., 35; Ciments d'Egypte Div., Fr., 23; Comptoir Fin. et Com. d'Egypte, £15-16; Consolidated Land, Pt., 5; Credit Foncier Fondateur, Fr. 780 ex.; Credit Foncier Egyptien, Fr. 609; Credit Foncier, 1886 Oblig., Fr. 314; 1903 Oblig., Fr., 223, Credit Foncier 1911 Oblig., 223, Crown Brewery Priv., Fr. 162; Crown Brewery Div., Fr. 130; Eaux du Caire Capital, Fr., 77; Eaux du Caire, Jouissance, Fr. 102, Egypt and Levant, S.S. Ord. 27s.; Egyptian Delta Light Railways, £4¼; Filature Nationale d'Egypte, £9¼; Gabbari Lands, 7s. 6d.; Immeubles d'Egypte Sor. an des., £5 3-16; Khedivial Mail S.S. Ord. 110s.; Khedivial Mail S.S. Co., Pref., £2 9-16; Kom Ombo Ste. An de Wadi, £4 21-32; Kom Ombo Ste, Fondateur, £33 9-6: Land Bank of Egypt, Parts de Fond, £35; Lots Turc, Fr., 41 1-2; Menzaleh Canal Navigation, Pt. 270; Nungovich Hotels, £6 5-16; Ramleh Railway, £2¼; Salt and Soda, 29s. 10½d.; Tram. d'Alexandrie Priv., Fr. 42½; Tram d'Alexandrié Div., Fr., 60; Union Fonciere d'Egypte, £2¼ ex.; Egypt Hotels, £1 27-32 ex.; Urbaines et Rurales, £2 27-32.

The preliminary accounts of the Bengal and North Western Railway Company for the half-year ended March 31st, show gross earnings, Rs1,32,32,827, increase Rs4,81,123; expenses Rs59,88,304, increase Rs2,20,110: net Rs72,44,523, increase Rs2,61,013; company's share of net earnings after deduction of Indian income-tax and net Indian charges. £250,706, increase £9,359. Adding £145,839 brought forward and £16,771 gain by exchange gives a total of £413,316.

## COMPANY MEETINGS.

### AFRICAN AND EASTERN TRADE CORPORATION, LTD.

#### Thirty-third Annual Meeting.

Mr. J. H. Batty (chairman of directors) presided over the 33rd Annual Ordinary General Meeting of the African and Eastern Trade Corporation, Ltd., which was held on July 28 last in the banqueting hall of the Exchange Station Hotel, Liverpool. There was a full attendance of directors and shareholders.

The chairman in moving the adoption of the accounts and report said there was no doubt in his mind that the potentialities of the Corporation were unique. They might be going through troubled waters, but he believed they could look forward to the future with the utmost confidence. He had no wish to minimise the deplorable condition of trade this year, but was hopeful that there might be some recovery before the year was completed. In arriving at the results for 1920 no credit had been taken for excess profits tax. Whatever sum was recoverable would be brought into the accounts for 1921. Their directors had had a very anxious and trying time. Not only had they to face the extraordinary decline in produce prices but they also had wide fluctuations in the exchange and depreciation in the value of the ordinary trading stock; and last, but not least, the decline in the volume of trade. After taking all these things into account the directors hoped that the shareholders would appreciate the result achieved. It would still take some time for trade to resume its normal flow. There had been a stupendous swing from the height of prosperity to the depth of depression in the period they had just been through. His anxiety was most keenly directed to their national finance, which would give cause for the gravest anxiety in the early months of next year. Unless they had immediate relief from taxation trade would continue to suffer and there would be increased distress throughout the country. They must be allowed to retain the capital in their businesses and a certain percentage of the profits was needed to finance new enterprises. Trade in West Africa had greatly felt the effects of the world-wide slump, and this was reflected by the serious decline of the imports from these colonies.

Mr. Robert B. Miller seconded and the resolution was unanimously adopted.

On the motion of the chairman, seconded by Mr. Robert B. Miller, a final dividend of five per cent., less income tax, was declared on the ordinary shares of the company, making with the interim dividend already paid a total dividend of 17½ per cent., less income tax, for the year.

The retiring directors, Messrs. J. H. Batty, E. A. Beazley, A. A. Cowan and Major-General W. H. Grey, C.B., C.M.G., were unanimously re-elected.

The directors' fees were agreed upon and the auditors were re-appointed.

---

Until further notice crude petroleum of foreign origin, and products thereof may be exported from Egypt to any destination with which trade is allowed without a specific licence. Crude petroleum of local origin and products thereof (except benzine and kerosene) remain subject to specific licences.

# SHIPPING INTELLIGENCE.

## DANUBE TO ADRIATIC.

(*From our own Correspondent.*)

Bucharest, July 22.

The Governments of Roumania and Yugoslavia are busily discussing the project for the construction of a new railway line that will connect Roumania with the Adriatic, via Yugoslavia. Should the project materialise a new bridge will be constructed over the Danube.

## SPANISH STEAMER FOUNDERS.

(*From our own Correspondent*).

Bucharest, July 27.

A fresh disaster occurred this week in the Black Sea, the Spanish steamer General Tourner with a cargo of grain and cattle from Galatz to Greece foundered at a short distance off the little port of Caliacra. The cause is ascribed to a stray floating mine. The crew and passengers are reported to have been saved.

## THE DNIESTER NEGOTIATIONS.

(*From our own Correspondent.*)

Bucharest, July 22.

The negotiations which are still being carried on in a friendly tone between the Roumanian and Soviet delegations in the Dniester estuary do not show so far any notable result. Roumania has acceded to the Soviet demand to be allowed to fish in the lake Liman also to cut wood in the forests bordering the river provided the Roumanian zone is not encroached upon.

## YUGOSLAV SAILORS' LANGUAGE.

(*From our own Correspondent*).

Zagreb, Undated.

Although the Austro-Hungarian fleet, both naval and mercantile, was chiefly manned by Dalmatians and Croats from the coast, these Yugoslavs were not allowed to use their mother tongues, but had to obey a word of command given in German, Magyar, or even Italian, the latter language, not unnaturally, having had considerable influence on marine life in the Adriatic. Now the Minister of Education has appointed a committee of experts to select a correct terminology in Serbo-Croat which will be officially adopted for the Yugoslav marine, so that in the future these tough sailors may use their own mother tongue when on official duty as well as in their own fishing boats.

## NOTES OF THE WEEK.

### *The Allies and Asia Minor.*

The Supreme Council has taken the decision that the present military situation in the Near East does not warrant at the moment any fresh intervention on its part in the Greco-Turkish conflict or offer of mediation. It proclaims its strict neutrality; but while no official assistance is to be given to either belligerent, no embargo is to be placed on the sale by Allied nations to either Greek or Turk of munitions of war. This attitude is at least consistent with the *laissez-faire* policy which the Allies have adopted so far in regard to events in Asia Minor; whether it corresponds with the dignity of a body charged with the directions of a settlement after a world war that was to end war is another matter. If no principles were at stake and if opportunism were the only policy in international affairs that had anything to commend it, there would be much to be said for keeping a ring for the conflict in Asia Minor. The Greeks have the upper hand and their final victory will appeal to the sporting instincts of the nations. Not only did they resume hostilities despite the Allies, but they also dared to match their military intelligence against that of the French General Staff, insisting that the alleged Kemalist strength was a bubble waiting to be pricked. Events so far have proved them right.

### *King Constantine's Opportunity.*

The Turks have been hard hit and are in retreat, both from their military positions, and it would appear, from Angora. From the point of view of the Supreme Council a Turkey broken and acknowledging defeat would offer the easiest way out of existing difficulties. Greece could be confirmed in the possession of Smyrna and Thrace, and the future would be left to take care of itself. Mr. Lloyd George has admitted that the Allies themselves have torn up the Treaty of Sèvres, but this fact would probably not prevent the French and Italians from agreeing to a reimposition of its terms, if they had satisfied themselves that nothing was to be gained for the time being from supporting Turkey. No one, however, will imagine that peace would thereby be secured for the Near East. A chastened, not a demoralised, Turkey is wanted, and the more complete the collapse in Asia Minor, the greater the need for a practical scheme for restoring to the Turks their self-respect and placing the country once more on its feet. It is no disparagement to the Turks to say that this is work which they can never perform; it will have to be undertaken by one of the Great Powers. Unfortunately there is no indication at present that the Supreme Council has given a thought to the necessity of making itself responsible for this work or of entrusting it to one of the Allies. Now, if ever, is King Constantine's opportunity. At one and the same time he can rehabilitate Greece and establish his own reputation for statesmanship, by insisting that Greece's task is finished with the defeat of the Turks, and that the Allies must take charge of the future of the country.

### *The Bulgarian Army.*

Although the prospect of having to disband her conscript army has been hanging over Bulgaria for more than two years, the blow inflicted by the formal order to comply with this particular provision of the Treaty of Neuilly loses none of its severity. There is no reason to doubt the genuinessness of the steps taken to raise a voluntary army within the limitations of a reasonable budget. Pay out of all proportions with pre-war rates has been offered, but the Bulgarians have not responded to the call. The bulk of the population never will, for they are far too wedded to the soil to leave it save under compulsion. If the rates of pay are raised to the present excessive levels of artisan wages, it will be possible to attract the less desirable element of the urban population. But the financial strain will be unfair to Bulgaria and prejudicial to Allied interests. In the circumstances it is not difficult to understand why the order to form a volunteer army has been received with feelings of dismay; but if the Allied Governments are resolved not to pay any attention to Balkan interests, Bulgaria must bow to the inevitable. She will be better advised to have no army at all than to keep an inadequate one at considerable expense. She will have the satisfaction of leading the way in regard to disarmament, and her neighbours will be unable to attribute to her aggressive designs or to complain if she is unable to keep order on her side of the frontier.

### *The Palestine Deputation.*

The deputation of Moslems and Christians from Palestine has not allowed any grass to grow under its feet since its arrival in London. Through the Press it has begun its work of enlightening public opinion in this country regarding the situation in Palestine; and it has already been received by the Primate and by the Secre-

Digitized by Google

tary of State for the Colonies. The former reminded his visitors that he was not able to speak on behalf of any Governmental authority, but he admitted that they had helped him to a better understanding of the question —and coming from such a quarter, the admission goes to show that the visit of the deputation was not uncalled for. Mr. Churchill is, of course, more closely concerned than the Archbishop with the points raised by the deputation; for it is to him that both parties in Palestine, to say nothing of the people of Great Britain, will look for a solution of a very difficult problem. He is understood to have promised to do everything in his power to meet the demand of the Arabs; but as he is to receive the deputation again, this week, it is too early to make any attempt to forecast what action he will take.

### *Britain's Responsibilities.*

It must be steadily borne in mind that besides the Zionists on the one hand and the Moslems and Christians of Palestine on the other the position and responsibilities of Great Britain have to be taken into account in this matter. The 'Balfour Declaration' has given rise to such conflicting opinions about its true purport that not a few people regret that it was ever made. But made it was, and any pledges it was intended to convey must be honoured. If unfortunately, such pledges should be found to clash with others, the difficulty should be faced at once and frankly. Procrastination, though it may appeal to a certain type of politician, will do no good in this instance. Mr. Churchill, we hope and believe, will tackle the question boldly, because he recognises its great importance, and because lack of courage cannot be imputed to him.. One way in which the business may affect Great Britain very seriously is indicated in a letter written quite recently by an American gentleman from which we give an extract on another page. The prospect therein adumbrated is not pleasant to contemplate. If we regarded it as purely illusory we would ignore it. As it is, we should like to see the whole problem grappled with boldly.

### *A Strayed Telegram.*

Egypt is now comparatively quiet, waiting to see what comes of the negotiations in progress in London. Both the supporters of Zaghloul Pasha, and, to a less extent perhaps, those who favour the Government still continue to send telegrams to this country supporting the claims of their own side. Among those which we have received lately is one from Tanta which refers to: "The parliamentary questions put forward by you and your friends as well as your criticism of the misdeeds of the hirelings of the Residency" ets., etc.; and, later informs us that "any agreement based on Lord Milner's proposals . . . will never find favour here." It concludes with thanks for the trouble we have taken in championing the senders' "good cause," followed by a list of names which occupies three pages of the telegram. We should like to think that the Tanta notables and others who sent this message really wished us well; but as we have never been privileged to put any 'parliamentary questions,' we fear that there has been a mistake somewhere. Our ignorance of any 'misdeeds' of 'hirelings' of the Residency has moreover prevented our meriting any thanks for exposing them; and, assuredly we do not see eye to eye with the Tanta telegraph-senders in regard to Lord Milner's proposals. It really looks as if some of the Zaghloulists' funds have been thrown away by a bit of carelessness; and that does not argue well for the organization of the 'party.' Such telegrams however, seem to serve a purpose in tickling the vanity of certain Labour M.P.'s.

### *The Situation in Persia.*

Recent reports from Persia, though somewhat meagre, suffice to show that the new all-Persian Persia bears no more resemblance to Utopia than did the old Persia. The British officers and the British advisers have either left or are leaving the country; the Mejliss is sitting at last; and the forerunner of the political millenium, the Bolshevist Minister, is shedding the light of his countenance on Teheran; and yet all is not well with the Land of the Lion and the Sun. It is true that a deputation from Angora has arrived at Resht, for the purpose of negotiating an agreement with Teheran, and that Moscow has given its blessing to the attempt but recent developments in Asia Minor may make the Persians doubtful about the value of any alliance with the Kemalists; and in the meantime the very important province of Khorasan has declared its independence. Unless the affable M. Rothstein takes a hand in the game and provides some 'Red' troops to bring the recalcitrant province to heel, it is difficult to see what the Shah's Government can hope to do in the matter. And the Shah's Government seems to have its hands full in settling quarrels in the Mejliss. A very pretty example of these quarrels took the form of an attempt to unseat Prince Firooz Nusrat ed-Dowleh, the deputy for Kermanshah. This led to a debate which lasted a week and was marked by violent personal attacks all round. When he sees where his latest *coup* has landed Persia. the Sardar Sipah—our old friend Colonel Riza Khan—must be inclined to regret having parted company with Seyyid Zia ed-Din.

### *British Communities Overseas.*

In Constantinople advantage was taken of an official dinner on the occasion of the King's Birthday to discuss the subject of a common meeting ground for the large British community in that town, and a committee has been formed to consider practical steps to that end. Owing to the existence in the city of an international club, which owes its success to British example and initiative, the need of a separate institution for the British community had not been acutely felt in the past. But with the growth of that community, with its tendency to be split up into groups living in Constantinople proper, along the Bosphorus, or on the Asiatic Coast, it is most desirable that there should be an essentially British rallying point. It need not compete with the Constantinople Club, for in a cosmopolitan city an international rendezvous is indispensable. A British Club should be primarily just what the word implies as a social institution, but it would also try to fill an additional role by promoting in a variety of ways, educational as well as recreational, constant touch among British subjects in Constantinople, and a consciousness of a community of instincts as well as of interests. We trust that marked success will attend the Committee's efforts. In Athens a British Club has been evolved with a British Chamber of Commerce, but having a separate existence. Bucharest, which alone of the capitals of that region has a large enough British community for the purpose, is still without a British Club, and it is to be hoped that some one will be found with sufficient energy and organising ability to start one, as the city is so given up to external gaiety

Digitized by Google

that it has little time for the more homely type of hospitality.

### *Indians in the Empire.*

It was stated last week with some show of authority that the Indian representatives were well satisfied with the results of their efforts at the Imperial Conference, and certainly we do not think that anything more could have been expected than what was actually accomplished. The conference as a body recognised the desirability of granting rights of citizenship to Indians lawfully domiciled in other parts of the Empire, but South Africa dissented from this decision, and the outcome is that India has a difference of opinion with one Dominion only, whereas a few years ago she had a lively differences with at least three. The position in South Africa is undoubtedly exceptional, and there is much to be said in favour of the suggestion put forward by the Indian representatives that it should be handled by direct negotiation between Delhi and Cape Town; Indian sentiments should be mollified by the decision on the general question, and the way is thus opened for it to accept something less than its entire claim, while South Africa may reasonably be expected to make an advance out of deference to the opinion of the remainder of the Empire. In this connection it is a pleasure to record that Mr. Sastri, one of the Indian delegates, has been invited to visit Australia, a graceful act which shows how much ground has been gained for friendship in the last few years.

### *The Government of Burma.*

The abandonment of the Government of Burma Bill marks a stage in the constitutional development of the joint Committe on Indian affairs. Nothing but a formal notification is necessary to put Burma on an equal footing with the different provinces of India, and the justification for introducing the Bill lay in the fact that last year differences of opinion existed on the question whether Burma should have Indian institutions, or should be equipped with institutions of its own. The Bill having once come into existence, was referred to the joint committee, the committee went into the whole question, found that the differences of opinion had for all practical purposes disappeared, and recommended that the Bill should be passed; but the final result is that the Bill is dropped, because it has served its purpose, and the introduction of Indian institutions, being no longer seriously opposed, will be effected as a matter of routine. The arrangement seems to be quite satisfactory and perhaps the next stage will be to hit on some procedure for referring questions to the Committee without the numerous formalities incidental to the introduction of a Bill.

**THE NEAR EAST IN CYPRUS.**

Messrs. George, Sons, and Co., Nicosia, have been appointed Agents for *The Near East* in Cyprus.

## THE WEEK AT HOME.

LONDON, Monday Evening.

**Ireland.**

De Valera's answer to, and refusal of Mr. Lloyd George's offer has been read, and commented on, with profound regret in practically all quarters. The Government's offer was generous, and it was not anticipated that it would be turned down without further parley, and even before the terms had been submitted to the elected representatives of Sinn Fein. To say the least, this seems bad strategy.

It is noteworthy, however, that many of the Irish papers take the view that, uncompromising as De Valera's answer is to the ordinary reader, it does not entirely close the door on negotiations; and that it is merely his way of asking for further concessions from the Government. It may be so; but if so, the Irish representatives are playing an extremely dangerous game.

From the publication of General Smuts' letter it is evident that in his opinion the Sinn Feiners should have accepted the terms offered, and as a disinterested statesman, his word will carry weight. But reading between the lines of the De Valera reply to Downing Street, it is thought in some quarters that where things have broken down is not so much in the question of independence—as is alleged—as in the refusal of Ulster to submit to Sinn Fein. It is argued that if De Valera had intended to insist on independence, he would have insisted from the start, as otherwise there would have been no point in negotiating at all; for he knew perfectly well that Downing Street would not concede independence, and well-informed Irish politicians were at least under the impression that he would only formally put forward the demand as a basis of argument.

The situation is now both obscure and grave, but the truce has not yet been denounced, and it is hoped that some fresh *via média* may be opened during the week. The next word is with Sinn Fein; if it remains obdurate the prospect is gloomy in the extreme, for nobody in this country, and assuredly very few people in Ireland, can look forward without despair to a resumption of civil war.

**The General Election Again?**

The talk of a general election in the Autumn has revived since it was understood that Mr. Lloyd George was not going to Washington. But the more cautious spirits are hedging with the alternative suggestion that political strategy may dictate an appeal to the country in the early spring—say in February or early March. Accidents may happen of course, but it is in the highest

degree unlikely that this particular accident will happen. A General Election just before the Budget would be an outrage only to be excused by overwhelming necessity. The prospect of an autumn election—as to which at the moment I would bet five to four against—depends entirely on the Irish negotiations.

It might be good business for the Government to have an election, for there is no doubt it would give them another lease of power; the chief opposition comes from the Tories, who want to see the Parliament Act smashed next year under cover of reforming the House of Lords, and prefer to take no chances. The only danger to the Government comes from the anti-waste people, who are almost abashed at their own popularity; but their bite is nothing like as bad as their bark, and as soon as they are in the House it is very difficult to distinguish them from the ordinary Conservative. I fancy they will do more damage to the Labour Party than to the Government, and Labour detests them accordingly. The Liberals, of course, do not count. There has been some talk lately of disposing of Mr. Asquith, his leadership being so ineffective; but the difficulty is that there is nobody to put in his place.

**Silesia.**

The fiasco of the Supreme Council over Silesia is regretted by all save that little band who are steadfastly anti-French because they are pro-German, but the failure of Mr. Lloyd George and M. Briand to settle the problem was not unexpected. For more than a year past the policies of England and France have differed over Poland. Most of the early differences were bridged over more or less skilfully; but the genius for compromise broke down over the rich coal-fields of Kattowitz. It has seemed to some in England that the aim of France was simply to strengthen Poland as an ally in place of Russia against Germany; and to some in France it has seemed that England was beginning to look at things through German spectacles. There was nothing very dreadful in the attitude we attributed to France, which is merely the old diplomatic maxim of "making friends with your neighbour," and strengthening him as far as possible; but the French suggestion, and still more the fashion in which it was expressed in the Parisian Press, rather hurt our feelings. To be told that we love our enemies is embarassing; it conveys the suggestion that we are better Christians than we are.

The League of Nations, which has once again been used as a dustbin by the Powers, now has the opportunity of tackling Silesia. This should give pleasure to Lord Robert Cecil, who has been denouncing the British Government for its failure to take the League seriously. But the reference of Silesia to the League will give a further opportunity for intrigue and chicane, at Geneva this time instead of Paris, and two other doubts present themselves. Will the decision of the League, whenever it is given, be accepted by the Powers, and if not, how is it going to enforce its decision? These considerations make it evident that the reference to Geneva is simply a means of gaining time. The real lesson of the incident is that these hurried meetings of Prime Ministers at week-ends, who have not had time to digest the situation thoroughly, are bad in principle. When the eye is on the clock throughout the proceedings, the reporters at the keyhole, and the experts under the table, there is little chance of that real statesmanship which looks for permanent and just decisions.

**The Return of Rain.**

The drought broke, as was to be expected, the day before the last Test Match began at the Kennington Oval, and rain has since been general. The holiday-maker's August promises to be wet and unsettled, but few people will regret this change. Certainly the farmers will not, although I doubt whether they have really much to grumble at. Corn has been a bumper crop, and most of the harvest is already in; the roots have suffered, but not beyond recovery; and live stock has stood the heat and drought much better than was expected. But the farmers will continue to grumble for all that.

The Metropolitan Water Board has recently been through a period of anxiety, for the reserves of water for London were getting low, after a deficiency of rain every month for the past eight months; the rain of last week will not of course do much to replenish the springs, but at least it is a sign of hope. The rapid growth of London since the war, by the way, means a further drain on the resources of the Thames and the Lea, and the Londoner may yet regret that he did not adopt the ambitious scheme for bringing his water, like his political oratory, from the Welsh mountains, when the opportunity was offered some years ago. Birmingham, it will be remembered, took the water and refused Mr. Lloyd George.

**The Week's Books.**

Lord Esher's "The Tragedy of Lord Kitchener" (Murray) is a much better book than the official biography by Sir George Arthur so far as the war is concerned. He makes it clear that Lord Kitchener was "no longer the K. of K. of the Sudan and South Africa, and he only as yet was aware of the tragic fact." Had he "been able to divest himself of twenty years, had he been the lithe, wiry horseman of the Sudan, the control and course of the war might have taken a different course."

In a remarkable passage Lord Esher says that "Arabia deserta seems to me to be the key of Lord Kitchener's character and methods. The spirit of the sand, like the spirit of the sea, puts an unconscious constraint upon the nature of a man. Lord Kitchener's aloofness, patience slowness if you will, were the outcome of life lived in solitude, where the passage of time counted for very little. When he thought of war it was after the manner of Darius—slow- moving hordes concentrating slowly upon their objective with fatal method. He took no heed of the lightning stroke of Napoleon."

Once, when told that he had been accused by a Cabinet colleague of "Oriental methods," Kitchener answered humbly "Yes, I suppose it is so, but I am an old man, and I cannot change my methods; it is too late."

Incidentally there is a story of a Cabinet meeting which could not agree. "Please remember," said Mr. Asquith, "that in an hour's time I have to tell the House of Commons what the Cabinet has decided." There was silence, and then Mr. Balfour said "You had better tell them that the Cabinet has decided that it is quite incapable of conducting the business of the country and carrying out the war." No observation having been made on this, the Prime Minister asked, "Am I to say that to the House of Commons?" On which Mr. Balfour retorted, "Well, if you do, you will at any rate be telling them the truth." It was probably about this period that the Cabinet was described as a vestry meeting with a vicar in the chair.

# THE NEAR AND MIDDLE EAST.

*(From Our Own Correspondents).*

## EGYPT.

*Cairo, July 28.*

**The Mecca Pilgrimage.**

The ceremony in connection with the departure of the Holy Carpet to Mecca, for which the Acting Prime Minister and the Ministers came up to Cairo, took place yesterday, and the Caravan will leave Suez to-morrow. Although from the point of view of public security in the Hejaz the pilgrimage should go off very satisfactorily, there appears to be some difficulty over the question of passport and other fees which the Hejaz authorities want to charge. Colonel Lawrence, who has been sent out by the Foreign Office to discuss pilgrimage arrangements with King Hussein, has arrived at Jeddah, and it is to be presumed that the above-mentioned difficulty will be settled. At the same time there is reason to believe that other more important subjects will be dealt with during the next week or so, as various other prominent persons connected with the Arab world have been summoned to Jeddah.

**The War in Asia Minor.**

The developments in Asia Minor have been attracting much attention out here, and a very successful pro-Kemalist campaign has been carried on for the past three months. The news of the capture of Eskishehir has very much depressed the Egyptians, while quite naturally it has caused rejoicing in the large Hellenic colony. Scenes of very great excitement have taken place in Alexandria, and one can only hope that no untoward incidents will result. In this connection it is interesting to note, as showing the ignorance of the masses as well as the pro-Turk sentiments which prevail, that there has been a strong conviction in the country that, whatever happened in London, Mustapha Kemal would succeed in giving Egypt her independence.

**Public Security.**

The effect of the political agitation, which has swept over this country during the past three years and of the acute economic situation during the past year is eloquently demonsfrated by the latest judicial statistics, which reveal a remarkable increase in criminality and ordinary litigation. While crimes during the preceding judicial year were 75 per cent. misdemeanours, 30 per cent., and contraventions 50 per cent. above those registered in 1917-1918, the figures for the first six months of the current judicial year are respectively 4 per cent. above, 11 per cent. below, and 37 per cent. above those of the corresponding period of 1917-1919. On the other hand, on the civil side the number of cases, which during 1919-1920 were 29 per cent. above those of 1918-1919 and about equal to those of 1917-1918, increased during the first half of this judicial year by 55 per cent. as compared with the figure for the corresponding period of the preceding year. The excellent work done by the Courts is evident from the fact that except in the case of the Cantonal Courts the arrears are less than they were at the beginning of the judicial year.

The situation from the public security point of view is sufficiently serious, though it is what was to be expected as a result of the war and of the state of feeling created by the political situation; and it is to be feared that this upward tendency in crime and litigation will continue until a settlement is obtained in the political and a return to relative normal is secured in the economic sphere.

*Cairo, August 4.*

**The High Commissioner.**

The High Commissioner proceeded on leave for England this week, the Honourable E. S. Scott returning just in time to take over from him. Lord Allenby will be absent about three months, and is expected to return by the last "Government" sailing of the "Caledonia," which has again been chartered this year for the express purpose of bringing back Government officials and residents who are due to return at the time when the demand for accommodation to ports East of Suez is very great. Before his departure His Excellency held an investiture at the Residency at which military and civil recipients of honours and decorations were handed their insignia. In this connection it is very noticeable that Egypt and the Sudan have shone by their absence from the Birthday and New Year's honours lists during the past year. In fact, if my memory serves me right, there has been nothing since January 1919 beyond a very small list of those whose work during the March troubles of that year called for special recognition. There are still quite a number of officials and others whose services during the war have been brought before the attention of the Foreign Office but have had no recognition. It is believed, however, that this matter will be adjusted as soon as a settlement of the political situation has been arrived at.

**The Political Situation.**

Political matters here remain very quiet. Zaghloul Pasha has been ordered to rest by his doctor and has been on his estate near Benha for the past ten days. Public attention is still centred, as is only to be expected, on what is taking place in London, and the vernacular press is spending a small fortune on special messages from their own correspondents, which deal at great length with the negotiations, and in particular are reporting *in extenso* all the questions asked and the answers given in the House. Very great irritation is detectable in all circles in regard to those questions, and in fact in regard to the propaganda which Zaghloul Pasha's emissaries are conducting. There is, indeed, very strong disapproval of this effort to discredit the Official Delegation in London. As many intelligent Egyptians shrewdly point out, such tactics only aggravate the Egyptian case and the sole result is to put further arguments in the hands of those who are opposing any measure of self-government being granted to Egypt. Zaghloul Pasha is bitterly critisised on every hand for his short-sighted policy, which, however, it is generally admitted, is characteristic of the man. At the same time much quiet amusement has been aroused by the flood of telegrams and letters which have come in from various parts of the country repudiating Mr. Swan's imputations that support of the Cabinet was only obtained under pressure, and emphasizing that on the contrary, these expressions of confidence were given voluntarily; for Zaghloul's manoeuvre has thus been turned to the advantage of the man whose downfall he is striving to achieve by all means even at the cost of his country's interests.

**Palestinian News.**

Every effort is being made by the authorities to facilitate traffic between Egypt and Palestine. Recently an agreement was come to between the Customs Administrations of the two countries with regard to the fixing of the fiscal boundaries between them, and it was agreed that the chief customs control of railway traffic should

be at Kantara West. It is now announced that as from August 1 all accompanied baggage booked through from Egypt to Palestine or *vice versa* will be examined at Kantara West, while unaccompanied baggage from Palestine will be allowed to proceed under seal to Cairo, Alexandria, Port Said and Suez, no baggage being handed over to consignees by the railways unless the policy has been stamped by the Customs.

Very disquieting news comes from Palestine, where anti-Jewish feeling continues to run very high. Great hopes are reposed by the Arab community in the Palestinian delegation which is now on its way to England in order to lay the Arab case before the British public; and trustworthy travellers, who have come through after a tour of the country, agree in stating that unless some greater satisfaction than has been forthcoming hitherto is given the Arab population there will be very serious trouble when the delegation returns. Outside the chief towns public security does not exist, and there have been several cases of highway robbery, as well as cattle raids, which the authorities have been powerless to punish. The Palestinian Government has decided on the formation of a gendarmerie, but its strength, 500, is considered by those who know the country and the present state of affairs ludicrously inadequate to cope with the present situation.

## YUGOSLAVIA.

*Zagreb, August 3*

**Yugoslav Communists.**

The House has accepted the Defence of the Realm Bill which now becomes law. The Privilege Committee promptly handed over the Communist Members to the police, and many are already under arrest. All their elections are declared null and void, so the Government has fifty-eight by-elections in front of it, in which the Democrats, Radicals, Mohammedans and Agriculturists will go to the country as one *bloc*. This group of parties look upon themselves as the national *bloc*, and they all voted for the Defence of the Realm Act, the voting on which was 190 for and 54 against. The minority was naturally largely made up of such Communists as were not yet in gaol, and by the Clericals, Republicans and Socialists, who expressed fears that it would be a powerful weapon in the hands of the Government which might be abused and turned against their political opponents.

Twenty-six Communists at Subotitsa have been put over the border into Hungary, where they will doubtless find friends. A message to the Belgrade *Politika* from the same town reports a meeting of Croatian renegades at Zalaegerszeg, with Hungarian royalists. These Croats are completely hapsburgised, and look upon the union frankly as a disaster. One of the leading spirits is Colonel Lehar, a friend of the ex-Emperor Karl.

Yugoslavs who return from Russia are now looked upon, naturally, with great suspicion, and are subjected to a rigorous quarantine before being admitted. A party of 460 has recently arrived, and it seems that most of these are infected with Communism, and some have held office under the Bolshevists. The leader of the "party" in Belgrade, Dr. Simo Markovitch, is in Moscow, and these returning Yugoslavs report that he made a speech to them before they left, exhorting them to be good Bolshevists. For his services in the cause, he has been promised the post of Chief Commissar for Yugoslavia. So it will be seen that the Communist movement, which has made such a stir in Yugoslavia, is a foreign-inspired disease, encouraged by the enemies of the union for the purposes of their own. Such Yugoslavs as are affected have caught the disease in Russia, or are feeble-minded perverts of the criminal type, easily acted upon by astute and unscrupulous rascals. That Communism should ever take root in this country of sturdy peasant-proprietors is unthinkable. The few dreamers must pay the penalty for their association with the criminal and anarchist types, to whom Communism is a kind of sanctification of their own particular form of vice.

**An International Convention against Bolshevism.**

M. Pashitch has invited the Governments of Czecho-Slovakia, Roumania, and Italy, which States are all suffering from the same danger, to negotiate a convention for mutual assistance and protection against the Bolshevists. The position in Roumania is analogous inasmuch as hostile and jealous neighbours are interested in attacks upon the State. Communist literature was found on many Bulgarian *komitajis* who have been killed or taken prisoner on Serbian territory. Reports from Bitolj refer to such literature in Bulgarian and in Turkish, the latter calling upon the Mohammedans of Macedonia to rise; and this is doubtless the result of Turkish Nationalist activity hoping to create a diversion in the southern Balkans. To deal with the situation in the southern districts, the Government is reinforcing the gendarmes, who have a difficult task in conducting what is a guerilla warfare against Bulgars on the east and against Albanians on the west. This body is strengthened by another three thousand men, of whom five hundred are Russians selected from General Wrangel's army.

**M. Protitch's Position.**

Politically the most interesting problem is what role will be played in the future by M. Stoyan Protitch. He is far too strong a character and too prominent and practised a politician to be content to plough a lonely furrow for long. It seems strange that the strong man of the Salonika Government, the Prime Minister of the Coalition of a year ago, the leader of the Radicals when M. Pashitch was in Paris, should have withdrawn from the party at so critical a moment, have boycotted the Constitution, and retired to the country, there, it is averred by some, to organise an opposition consisting of the Narodny Club, Raditch's Peasants, and other oddments. But the Narodny Club press came out with a startling declaration to the effect that they did not want him. It was admitted that he had shared their policy with regard to the Constitution, because

his own draft—which had provided for a wide degree of local autonomy to seven provinces—was not accepted, but, the Croats continued, M. Protitch is a Serb, a Serb patriot, and a "Great Serb," whose interests must clash with the purely Croatian policy of the National Club. They fear that his action has been a very crafty move to ensure the control of the Opposition elements; and that M. Protitch is really nothing but M. Pashitch in disguise. Now another interesting suggestion is made: that M. Pashitch is very desirous that his old lieutenant should rejoin him, and accept a portfolio in the reconstituted Cabinet, and that he has made him very attractive proposals. The chief obstacle to this is the personal anomisity which unfortunately exists between him and M. Pribitchevitch, which led to the break-up of the Coalition of 1919, and both are very strong, unyielding men. Some of the papers definitely state that Dr. Liuba Davidovitch has been exercising his influence on M. Pribitchevitch to induce him to let bygones be bygones, and even to cede the portfolio of the Interior to his former antagonist. The revelations of the Bolshevist plot have so profoundly stirred public opinion throughout the country, that it is quite probable that M. Protitch will accept the dangerous, but necessary and difficult post of defending the country against the black forces.

**New Survey.**

A new topographical survey of Serbia is now begun. Owing to a totally inadequate grant of funds, but little work had been done in this respect for many years, although the Director of the State Survey had succeeded in getting together a small staff, including several Russian engineers, and doing some very valuable work under conditions of considerable difficulty. This work will now be expanded and the cadastre reorganised and a new systematic land valuation made.

**A Social Club.**

A welcome addition to the social amenities of Belgrade is the club, which has secured excellent premises in Prince Michael St. Here the visitor who is introduced, or the resident member, will find very comfortable smoking-rooms and reading rooms, with the latest papers from England and France. The card room is always well patronised, there is a good American Bar, and a dining-room where a really excellent dinner is served, probably the best in Belgrade, at a trifling price. The club is, indeed, a boon to the foreign colony in Belgrade, whose thanks are due to the energetic and enterprising pioneers.

## ROUMANIA.

*Bucharest, August 3.*

**Political Movements.**

Following the ostentatious withdrawal of the entire Opposition from both Houses, an official notification was addressed to each retiring member, inviting him to state the motives of his absence from the sittings; else, according to regulation, his seat will be declared vacant. The various groups concerned, with the exception of the Liberals, who ignored this intimation, retorted that their withdrawal does not imply their resignation, and reiterated their unwillingness to co-operate further with the present Parliament, demanding its dissolution and also the resignation of the Cabinet. The leaders of these groups have, in turn, been received in audience by the King, to whom they expounded their grievances against Parliament and the Cabinet, urging on him the necessity of dismissing the Cabinet and holding fresh elections.

Public feeling was at first uneasy, but gradually became composed when Parliament calmly continued its work and the Cabinet transacted its daily business as usual. Soon afterwards, when Parliament was closed and the Royal Family and General Averescu went abroad for their health, it became evident that the settlement of dispute has been deferred until after the return of the King. The Opposition however, claims to have scored a success as the "Reshitza Bill," which was the main cause of the trouble, was not sent to the Senate in this session.

The Opposition, this time led by the Liberals, is determined to run a vigorous campaign to overthrow the Cabinet; the Liberals openly claim the power in collaboration with the Transylvanians. They greatly wish to preside at the Coronation festivities, which are fixed for the end of September, considering this as their due because they conducted the war and secured the union with the new provinces.

The other parties and groups are also playing for position, so as to have a connection with the Cabinet to come. The Federationist *bloc* has been dissolved by mutual agreement of the component parts. The Bessarabian party split into two sections, the one, under M. Inculetz, is leaning towards the Liberals; and the other, under M. Stere, may unite with the Peasant Party of the Old Kingdom. The National Transylvanians, under M. Maniu, are treating with the Liberals for a combined formation of the eventual future Cabinet, there is, however, a good number among them who distrust the Liberals. The Nationalist Democrats, under Jorga are holding aloof for the moment; they sympathise, however, with the Transylvanians. The Peasant Party, although against the continuance of the present Cabinet, is even more adverse to the advent to power of the Liberals. The other minor groups carry no weight. The present Cabinet which is formed of elements of the People's League under General Averescu, and Conservative Democrats under M. Take Jonescu, are well prepared to face the intended attack. Some suggest that it may win over the Peasant Party under certain conditions. The near future will show which course these cross-currents will take.

**Miscellaneous.**

The crowns which will serve for the coronation of the Sovereigns will be wrought by a great specialist firm in Paris; the gold and precious stones for their making have already been sent to Paris by a special courier.

Dr. M. Gaster, the well known philologist, in answer to an invitation from London has arrived in Roumania to give a series of lectures in the principal centres of Greater Roumania. He will spend a month in this country.

The Roumanian-Soviet delegations are carrying on their negotiations in the estuary of the Dniester without, so far, any apparent result. Meanwhile well-armed bands of Bolshevists, bent on pillaging, frequently cross the river at points where there are insufficient Roumanian garrisons, damaging the railway line, telegraphic and telephonic wires, also terrorizing and plundering the inhabitants. The military authorities are taking vigorous measures to cope with these outlaws.

## BULGARIA.

*Sofia, July 31.*

**Present and Future Reforms.**

A definite stage has now been reached in the negotiations between the Government and the Inter-Allied Commission. On the 26th M. Dashkaloff, Minister of Commerce, announced that the proposed law for the tax on capital would be withdrawn, and "Article 4" abrogated when the Sobranje re-assembled; that meantime no more cases will be proceeded with, and that the monopoly hitherto enjoyed by the Grain Consortium would be abolished. The Government is to be heartily congratulated on the decision they have taken anent these matters; and the Inter-Allied Commission on their firm attitude. The reforms, if properly carried out, will enormously enhance the prestige of the Government with all thinking people in the country. There is, however, a lot more to be done and one of the chief grievances that exists in the mind of the average citizen is the strict censorship that prevails, and a second is the "Centrale des Devises." The former is dealt with more fully below.

**A Quiet August.**

Sofia is preparing for a quiet August and more than half the Diplomatic representatives have gone on leave. It is announced that the King will leave Sofia next week for a holiday. He will probably spend some time at the Palace of Euxinograd, near Varna, and at his other

Digitized by Google

places in the country. No more has been heard about the visit of the King and M. Stambolisky to the United States in the Autumn ; and in view of the Prime Minister being abroad at present and the numerous matters that will come up for consideration during the Autumn Session of the Sobranje, it seems probable that the visit to America will be at any rate postponed.

A great many Sofiotes have gone off to Varna, and it is reported that the town is so full that no more accommodation is available for visitors. The resorts near Sofia, such as Tchamkorea, Banki, and Gorna-Banya, also have their full quota of visitors, and as the weather is now very hot, the baths at the two latter places are largely patronised.

**The Censorship.**

During the war there was in Bulgaria a censorship exercised by the Military over the news appearing in the Press, on much the same lines as that in England. When the war came to an end, the censorship continued in a somewhat modified form, the object being to prevent any items of news creeping into the papers likely to be regarded as detrimental to the interests of the Allies, whose armies of occupation were then in the country. A little over a year ago the Allied occupation was finished but still the censorship is continued. It exerted a severe control over all news of external and internal interest. M. Dashkaloff, Minister of Commerce, was the Minister charged with the supervision of this work and by the majority of people his control was considered to be moderate and reasonable ; but last January M. Omarchevsky, Minister of Public Instruction, succeeded M. Dashkaloff, and the censorship became much more severe.

Regarding external news there is a good deal to be said for the continuance of a censorship as there are unfortunately some writers, who,if altogether unchecked, might do grave harm to Bulgaria, by unwise and inaccurate statements. But as to internal affairs, there would seem to be no real reason against the freedom of the Press being allowed full play. As the situation is at present no article containing a remark which might be regarded as even slightly damaging to the Governments interests is allowed to appear. Thus, the opposition parties cannot print their opinions, so they circulate them about the country by letter or word of mouth, and the outcome is apt to lead to a very exaggerated idea being taken of various events. If there was no censorship, criticisms would be exhausted all the earlier, and many matters would die a natural death instead of being prolonged for many weary months. It is to be hoped that when the Sobranje meets the question of the continuation of the censorship will be considered as much in the interests of the Government itself as of the country at large.

---

*Sofia, August* 5.

**The Question of the Army.**

The expectation that August would be a quiet month has not been fulfilled. At the end of last week a telegram was received by the Inter-Allied Military Commission of Control from the Council of Ambassadors, stating that Article 65 of the Peace Treaty, which lays down that the Bulgarian Army must be a voluntary one, must be enforced by October 10. At first sight, the Bulgarian Government would appear to have three alternatives:—they can refuse to comply with the Allies' demands, which is extremely unlikely, as a refusal would only mean the putting into force of " sanctions ; " they can endeavour to carry on without any Army, which is also extremely unlikely, unless they can persuade one or more of the Great Powers to take the country under its protection in a military sense ; or they can try to raise a voluntary army at all costs. As to the first of these alternatives the present Government know well that their neighbours are not inclined to over-friendliness, and that any open and serious breach of the Peace Treaty would be immediately followed by warlike action. Against the armed forces of two or three of the neighbouring powers Bulgaria would to-day stand no chance of success. In fact even to try conclusions would mean complete ruin for her. The second alternative does not offer much greater chances of success. Without an armed force, it is practically impossible for any Government to rule Bulgaria. Order has to be maintained within the country and along the frontiers, and if the Government is not supported by an armed force, there is every chance that the Communists may become strong and gradually assume the upper hand. If a Communistic Government came, into power they would probably overthrow the King and the Constitution, ally Bulgaria with Moscow and Angora, and create internal disturbances in a country that during the last three years has left itself absolutely quiet. There is always the possiblity that the present Government might appeal for protection to the Great Powers ; but it is difficult to see which Power would be willing to send a more or less permanent armed force to Bulgaria.

We thus come to the third and last alternative : the raising at all costs of a voluntary army. At present there are about 300 voluntary recruits and roughly 2,500 officers and N.C.O.'s, who will form part of the new army. In fact, no real progress has been made in the task of recruiting volunteers. The Government claim to have done all that lies in their power to obtain recruits, but without being exceptional regarding their efforts, one feels that more can yet be done in the way of persuasion, advertisment, and the granting of more favourable terms. First of all, the pay must be raised to at least 1,000 levas a month for a private soldier. In addition to this he must be well fed, housed, and clothed. In this connection it is worth noting that about 18 months ago a suggestion was made to the Minister of War by an influential Allied officer, that a party of Bulgarian officers should proceed to England for the purpose of studying the administrative side of our army. Nothing has so far come of this suggestion, but even now it is not too late.

The great difficulty that stands in the way of obtaining voluntary service is undoubtedly Article 72 of the Peace Treaty, which ordains that all N.C.O.'s and men shall sign on for 12 years. In a country such as Bulgaria, where up to now voluntary service has been unheard of, it is not easy to prevail on the citizens and peasants to sign on for such a period. Under the old régime, all males were accustomed to regard 2 years of their life as given up to military service ; but there is a vast difference between two years and twelve years, and besides, this, while service was formerly universal, it now effects only a relatively small proportion of the male population.

**An Inter-Allied View.**

If the Government makes another and more determined effort to recruit a voluntary army, it must be borne in mind, they stand the chance of meeting with opposition from the Commission whose duty it is to see that the indemnity is paid. For it stands to reason that if a vast sum of money is to be expended on the army, there will be less money available for the indemnity. In the circumstances the Bulgarian Government will surely have the right to say : " We are only complying with the orders and wishes of the Allies in creating a voluntary army." Thus we get a vicious circle, and it is not easy to see a way out of it.

Many people are of the opinion that the continuance of a compulsory army of 33,000 inclusive would be a danger to no one, as all the neighbouring States have much bigger armies, and apart altogether from this there are and will continue to be in Bulgaria for the next 10 to 15 years, approximately three-quarters of a million men who are fully trained soldiers, and whom all the Peace Treaties in the world cannot stamp out. As these soldiers really exist, does it matter, whether the 33,000 men actually in the army are conscripts or volunteers ? For there are surely big issues at stake; it cannot be in the interests of the Allies to have yet another European country plunged into disturbances. Before it is too late would it not be possible for a thorough study of the matter to be made on the spot by Allied experts ? The

Digitized by Google

reasons for suggesting such a course are strengthened by the knowledge that the majority of the members of the Inter-Allied Military Commission of Control in Bulgaria do not see exactly eye to eye with the Council of Ambassadors in this question of the creation of the future Bulgarian Army.

## TURKEY.

*Constantinople, August 8.*

**Bombastes Furioso.**

During the lull which has followed the battle of Kutahia, it has been possible to obtain a fairly accurate estimate of the net result of the operations that came to a temporary conclusion with the fall of Eskishehir; and whilst there can be no doubt as to the positive victory of the Greek army, it is none the less certain that the reports of the practical annihilation of the Kemalist Army were false and misleading. Far from being destroyed, the Turkish army on the Western front seems to have been able to escape the double enveloping movement of the Greek army with the loss of not more than thirty per cent. of its rifle strength and artillery force. This is, of course, only a rough estimate; but it means that the Kemalist army is still a force to be considered, and that peace is not a whit nearer, in spite of the Greek victory. In the circumstances it is a pity that the Greek Government should permit the circulation of exaggerated information, and put every possible obstacle in the way of the transmission of information tending to correct the erroneous impressions made thereby. Falsehood comes home to roost sooner or later, and the Greeks would gain rather than lose if the Turkish version were allowed to be made known and proved false. Such has been the policy of the Greek Government in this connection, however, that even the muzzled press of Athens has protested. No doubt there will soon be another offensive, and this time the objective will be Angora itself, but there are no signs that the prospect of having to evacuate their capital has daunted the resolution of the Kemalist leaders. There has been no announcement of any modification of the terms of the National Pact, and rumours concerning any secret negotiations between the Greeks and the Kemalists may be regarded as sheer inventions at the present moment. Whether the position will in any way be altered if the Greeks succeed in capturing the Kastamuni-Angora-Konia line remains to be seen, but it is extremely doubtful. In fact, unless the Allies decide to intervene, and succeed in persuading both sides to accept their intervention, there is every prospect of a winter campaign.

**The Central Government.**

One of the principal factors in the failure of Constitutional Government in Turkey has been the complete absence of a virile and honest opposition to the Committee of Union and Progress. The only party that has opposed the Committee, the Entente Libérale, has been regarded as completely futile owing to its having been unable to produce a practical programme which would appeal to any considerable section of the nation. The principal consideration of its members has always been the spoils of office. Once again the party has proved true to its traditions, and the disturbance of public opinion caused by the Greek victory has been seized as an opportunity for the development of intrigues whereby this pasha or that bey may become Ministers. Fortunately, by this time all the Allied High Commissions seem to have taken the measure of the Opposition, and there is little likelihood of a change of Cabinet in such a manner as further to complicate an already too intricate situation.

**Turko-Italian Relations.**

Considerable amusement has been caused by the sudden transformation of the friendly relations between the Italians and the Kemalists into such as exist between the Kemalists and the other Allied Powers. The refusal of the Turkish authorities at Adalia to permit the Italians to arrest a Turk who had shot an Italian subject and the attempt of the Italians to effect the arrest by force were merely indications of the change in the direction of the wind. As a matter of fact there had been a change in Nationalist opinion soon after the fall of the Giolitti Cabinet; and it must be frankly admitted that the Italians have only themselves to blame. Ever since the Armistice Italian policy in the Near East has been of a doubtful nature, and so far as the Turks are concerned it has not hitherto been such as to inspire either awe or respect.

**The Bolshevist "Menace."**

There is still no confirmation whatever of the entry into Antolia of either Bolshevist troops or of Bolshevist generals. Whatever the future may bring forth, it is pretty certain for the time being there is no prospect of the Greeks having to face a Red Army in Anatolia. It is rather curious that whilst it is maintained on the one hand that the Turks are responsible for the raising of the Bolshevist bogey, it is affirmed in some quarters that the Greek Government hopes to escape from its embarassments by involving the Allies in a conflict with the Bolshevists over the Anatolian question. It may be admitted that the Greek Government has little to learn in regard to diplomatic finesse, but the former theory is far the more credible of the two. At the same time, there can be little doubt that without Bolshevist assistance, the Kemalist movement would have collapsed long ago.

## CYPRUS.

*Nicosia July 26.*

**Greek Rejoicings.**

The Greek victories at Kutahia and Eskishehir have caused enthusiastic manifestations of joy in all Greek quarters. Thanksgiving services have been held in the churches, and a telegram has been dispatched to King Constantine by the Archbishop, congratulating the King and the Army, and espressing hopes that these triumphs will be followed by the liberation of "all enslaved Hellenism" under the King's sceptre. A similar telegram has been sent to the Foreign Minister at Athens. On July 22 a service was held in the Cathedral church of St. John, in memory of the Greek Archbishop Kyprianos and others, both clergy and laity, who were put to death at Nicosia in July 1821, by the Turkish Government for complicity, real or alleged, in connection with the Greek rebellion.

**A Banished "Patriot."**

It may be remembered that the Archbishop and Greek members of the Legislative Council recently sent a petition to the Colonial Secretary, protesting against the expulsion of M. Katalanos from Cyprus. The Acting Chief Secretary has replied, by direction of the High Commissioner, that the Secretary of State has fully satisfied himself that M. Katalanos is "a danger to peace and good order" in Cyprus, and that he cannot be allowed to return. A similar reply has been sent to the Nicosia School Committee, who petitioned for his return. The truth is that this notorious agitator and "patriot" should have been deported 10 or 15 years ago. He has been a very undesirable instructor of budding "politicians" in the island.

**The Summer Season.**

The attractions of Mount Troodos and of Platres, a few miles below the "Camp," continue to bring an increasing number of visitors from Egypt. It must not be imagined that there are not many other attractive heights in other parts of the island. But hotels and houses to let, have not yet been built elsewhere. At present in the East of the island, in the Famagusta district, there is limited accommodation in the mountain range, in which stand the interesting and picturesque ruins of the Kantara Castle that have fascinated so many travellers. Here is one of the most beautiful spots in Cyprus, whence magnificent views are obtained. There is a supply of cold, pure water. A few houses are available, and when additions to these are made in the future, the place should become a very favourite

Digitized by Google

one. There has been some more rain. This summer will long be remembered for the torrential and damaging storms of June. The general outlook for carobs and vines continues to be satisfactory.

## ALBANIA.

*Tirana. August 1.*

**Albania and the Ambassadors' Conference.**

So long ago as April the Albanian case for independence was considered by the Conference of Ambassadors at Paris, yet since the commission of experts discussed the question on July 6 practically nothing has been done. For this delay there are various reasons. First, the Conference could not make a unanimous decision: England wishes above all—so at least we are told—to guarantee the absolute independence of Albania, without recognising any special right or privilege in Albania to any foreign power. On the other hand, it is stated that the Marquis della Torreta talks of "the particular interests of Italy" in Albania, at the same time giving his assurances on her indepedence! This pretention is a hollow one, for it is known here that Italy made certain reservations in her decision upon the future of Albania, endeavouring to secure for herself certain rights and privileges not yet determined. And England for her part alluded to a rectification of the Albanian frontier in favour of Serbia and of Greece. It really looks very much as if the Conference of Ambassadors will do nothing towards a solution of the Albanian problem, and it is doubtful whether the Supreme Council concerns itself with the matter.

Political circles and semi-official groups here do not conceal their astonishment. On all hands you may hear it said that the Conference of Ambassadors does not busy itself with either the integrity or the independence of Albania, although these two rights were recognised in 1913. What this country demands at the present moment is the re-establishment of diplomatic relations with other Powers, and the evacuation of her soil by Serbs and Greeks.

It is still considered here that the Conference has no right thus to put the question of Albania in the background and to view the whole matter from the stand-point of the secret treaty of 1915.

**On the Frontier.**

The efforts of the Conference of Ambassadors at Paris seem to encourage the Serbs and the Greeks. The Belgrade authorities persist in their frontier intrigues, terrorising the inhabitants of Louma—a purely Albanian region, but occupied by Yugoslav troops since 1918—and trying to induce them to make common cause with Marko Gjoni. But the mountaineers of Louma, and also those of Mirdita have refused to obey the Serbian threats. Greek marauding bands are reported in the South. In the face of these menaces the possiblity of mobilisation is being discussed.

**Stormy Sittings.**

The Albanian Parliament had decided to telegraph to the British, French, Italian, and American Governments, to draw their attention to the excesses committed daily by the Yugoslav authorities on the Albanians of Kossova. It had also deemed it expedient to draw the attention of the Skupshtina at Belgrade to this point. Here was an opportunity for the two neighbouring nations to establish relationship; but the Skupshtina answered with a denial of the acts complained of, and giving its approval of the civil and military authorities.

Whereupon several Albanian deputies on July 28 spoke at length upon the Serbian excesses; according to some the number of Albanians massacred by the Serbs since the Balkan War of 1913 was 85,767, of whom 12,000 were killed during the last two months. Among the numerous villages destroyed by fire there are seven new ones situated in the districts of Djakova:—Tablamitza, Baoshi, Stonza, Triutch, Decian, Tsernorbrek, Babailutch. The speakers further described a Serb organisation called "Tserna-Ruka" (the Black Hand), the aim of which is the extermination of the Albanian element at Kossova, to replace them by Russians who have just come from Russia.

**Demonstration at Chimara.**

Your readers have already been told of the change which Chimara has suffered and of the loyal union of this district with the rest of Albania, a union which was dictated by political and economic reasons. It appears that patriotic sentiments are growing fast at Chimara, for yesterday a huge meeting was held as a protest against the pretentions of the Greeks.

**Civil and Judicial Administration.**

In connection with the intrigiues of the Mirdite chief, Marko Gjoni, military forces were conveyed to the mountains of his districts; these forces have as yet had to undergo no engagement. The Tirana Government has taken advantage of the occasion to enlarge the civil, military, and judicial organisation in this region; and in conjunction with this the construction of several roads to improve the economic situation of the country is contemplated.

*Tirana, August 2.*

The Serbs are following a crooked policy. They declare that they wish to see an independent Albania, with the frontiers of 1913, yet they intrigue against and attack Albania. Last May M. Pashitch promised the Albanian delegate, M. Ali Riza Kolonia, that Serbia would thenceforth refrain from hostile action against her small neighbour; but the promise is hardly borne out by facts. The other day we had the incident of Marko Gjoni, the blind tool of the Serbs. That manoeuvre having failed, the Serbs have had recourse to force openly: two majors of the Reserve of the Yugoslav Army, with 1,200 *Komitajis*, crossed the frontier on July 31, with the intention of stirring up the Mirdites. But the Mirdites, thankful to be freed from Marko Gjoni, and his intrigues, took up arms and uniting with the Albanian *gendarmerie*, put the invaders to flight. The latter were driven across the frontier, losing fourteen killed and 31 prisoners.

**New Postage Stamps.**

Albania has hitherto used Austrian postage stamps, which have been surcharged. She has now had printed two new series of stamps, one ordinary and one for taxed letters. The ordinary series has a design showing a double-headed eagle, with the head of Skanderbeg in the centre. There are six stamps: Of 2, 5, 10, 25 and 50 centimes, and of 1 franc. The other series shows a view of Durazzo and comprises 4 stamps—of 4, 10, 20 and 50 centimes. Postage on a newspaper for a foreign country is 2 centimes, of a postcard 10, and of a letter 25 centimes.

## ZIONISM, AMERICA, AND GREAT BRITAIN.

In a letter received in England last week the writer, an American whose name is familiar to many readers of *The Near East* in connection with Palestinian affairs, says:—

"Having worked there, I know how dangerous a movement political Zionism is. We have over three and a half million Jews in America; they have been quite deceived by the Zionist leaders and have an absolutely false impression of Palestine and the Palestinians. For example, Dr. Weizmann on his recent visit to America appealed for 50,000 American Jews to emigrate in a year to Palestine. Of course if they went, there would be a tragedy, for the people do not want them and the country could not support them. When the attempt to found a Jewish state in Palestine—the aim of the Zionists—fails, as fail it must, American Jews who are asked to raise eighty million dollars for the movement, will cast all the blame on England. More bitter feeling will then be stirred up between Great Britain and America, and we shall have a body larger, more powerful and more fanatical than Sinn Fein attacking England and trying to embroil our two nations."

## PALESTINE SCHOOLS.

The Government of Palestine has made arrangements to distribute grants-in-aid to non-Government schools, based mainly on the average attendance of pupils; and a central education committee of four Moslems, three Jews, and three Christians has been formed. Since January last 34 new village schools, providing elementary education for 1,360 children, have been opened, while 46 State-aided schools, provided in villages by the inhabitants, have been taken over by the Government. An additional 35 schools will be opened during the current financial year, and measures are being taken for the development of the two training colleges that have been established—one for men and another for women—with the object of providing places for 130 students by September next. Teachers are also being appointed to live among the Bedouin tribes and teach their children.

So comprehensive is the education scheme of the Government that at the present rate of progress the whole country will be covered with schools within a period of four years. Under the arrangements now in force the people of the villages provide the buildings with furniture and keep them in repair, while the Government pays the salaries of the teachers and meets other costs of maintenance.

Digitized by Google

# PRESS ON THE NEAR EAST.

**Greece.**

In the *Contemporary Review* of August, Mr. Harold Spender writes on "The Resurrection of Greece." After tracing in vivid detail the story of Greek efforts towards independence up to the Battle of Navarino, he concludes :—

How was it that the peoples of Europe insisted on saving Greece, despite the opposition of the Chanceries and the indifernce of the European Statesmen. What was it in Greece that redeemed her from the squabbles of her leaders and the blunders of her generals? Without doubt, it was the dogged and desperate heroism of the mass of the Greek people. It was the self-sacrifice of the multitiude which glorified the contest. In the wonderful closing episode of the siege of Missolonghi, when a whole population marched to death rather than surrender to the Turk, you have only the most vivid example of this war of self immolation. Above the squalid details of factious strife between the rival Greek chieftains, with which the letters of Stanhope and the memoirs of Trelawney are filled, there emerges always the valour of the Greek sailors and the Greek peasantry both on the mainland and in the islands. Here was a nation of little more than 1,000,000 struggling against an Empire of 20,000,000. Yet such was their defiance of death, such was their splendid disdain of life, that the Turkish hosts proved powerless in face of that spirit. That was the "glory which was Greece." That was the splendour which inflamed Europe with a kindred enthusiasm.

To-day we are face to face with what is essentially the same situation. In front of the stage we see the same factiousness of the Greek parties, the same incurable turbulence of her politicians. But in the background there stands the same wonderful people, remaining under arms long after the rest of Europe has been demobilised, unstinted in sacrifice, unsparing in endurance, and making the same appeal to us as their forefathers made a hundred years ago—the appeal of light against darkness, of the future against the pat, of freedom against slavery.

"We are all Greeks," wrote Shelley, in that magnificent way of his, in the splendid preface to "Hellas," written in the first year of the War of Independence. "We are all Greek, Our laws, our literature, our religion, our arts have their roots in Greece."

That is the unbreakable tie. That is the immortal bond.

**Persia and Mesopotamia.**

The *Christian World* of August 4 pleads for a strong policy in regard to our difficulties in the Middle East. It feels that British action in this region is dictated by daily expediency. On the "mess" that has been made in Persia, and on the fact that the Foreign Secretary could offer no advice or remedy, it says :—

It is not only in North Persia, where Russian influence has always been dominant, that British influences have collapsed, but in the South as well, where a close connection has always been maintained by us with North-West India. There was a corps of South Persian Rifles maintained by British contributions and doing admirable work in policing the caravan routes and curbing the dangerous predatory tribes infesting the trade arteries from India to Seistan. This force is to be disbanded when the British contribution is exhausted, and it is easy to foresee the blow that will fall in consequence on the trade of the South, and on the prestige of the Empire. When this corps disappears all that we have built up in South Persia will be left defenceless. With the gradual decay of our power that of Russia is bound to increase, and is already increasing.

The use which the Bolshevists intend to make of Persia remains to be seen, but it is a fact that recent occurrences have placed Persia more than ever at their mercy. The Bolshevists are well entrenched in Turkestan and Transcaucasia. They have become less aggressive than they were a year ago, but there they are, and wherever they are their presence must always be a menace to settled government. In Teheran there is a Russian Jew acting as Soviet Minister whose attitude towards this country is one of avowed hostility. That this Rothstein will do his utmost to destroy our remaining influence in Persia is certain. He will not succeed in converting the Persians to communism, but the venal Persian officials will be his faithful servants. And what about the esxtension of Rothstein's activities into Afghanistan? Are we taking any steps to see that the undertaking of the Bolshevists to refrain from any attempt to encourage the peoples of Asia in any form of hostile action against British interests or the British Empire is being faithfully carried out? Without being too pessimistic regarding the facts of Persia in the near future, we cannot but feel deeply concerned at the course her Government is pursuing. Hitherto Persia has been a country with which we have had the warmest sympathy, and on which we have spent millions of money. But Persia now appears, as Lord Curzon points out, to be marching of its own accord towards an end which we cannot attempt to forecast, but which cannot possibly be otherwise than unfortunate. The danger of interfering in the affairs of Persia is evident, but now that she has determined to pursue her own courses might it not be well to forsake our attitude of passivity, and to consider whether the Russian Trade Agreement does not give us a means of protecting our interests in the neighbourhood of India? ..

But on Mesopotamia the article is much more cheerful :—

Our task in Mesopotamia, after all, is a very simple one. It has been complicated by the grandiose ambitions of those who would regard us as a triumphant military Supremacy in the Middle East. This we can never be, and no temptation should ever induce us to adopt any such insane policy. Our business is Mesopotamia is simply and alone to aid the people in establishing a good government, under which every man in the land shall feel himself free and prosperous. Our business is to place the ripe experiences we have gained elsewhere, in administration and in the development of neglected lands, at the disposal of the people of Mesopotamia, and to avoid all and everything that our critics and enemies may regard as self-seeking. Our position in Persia is endangered and almost lost because of our reluctance to fulfil our commitments there. What we are doing in Mesopotamia may loom vast and dangerous in the eyes of those who neglect to gauge and weigh the tremendous burden upon us in the Middle East, but with patience, and a clearer understanding of our grave responsibilities there, we shall arrive at those just conclusions of action and conduct which have never failed us in the past.

**Articles to Note.**

"The New Indian Legislatures at Delhi," by Sir George Barnes, K.C.B., K.C.S.I.; and "The Balkans to-day," by Noel Buxton, in the *Nineteenth Century* (August.) D. in the *Contemporary Review* (August). "Present Conditions in India," by Sir Michael F. O'Dwyer, G.C.I.E., K.C.S.T.; "The Palestine Government," by Horace B. Samuel; "The Danube as an International Highway," by H. Charles Woods; and "A Neglected Genius: Sir Richard Burton," by Arthur Symons in the *Fortnightly Review* (August).

## TERROR IN GEORGIA.

The Georgian Information Bureau has sent us the following telegram, received from Constantinople :—"As the result of the arrival in Georgia of the Moscow Commissar, Stalin, repression and the policy of Russification have been more rigorously instituted. The President of the Revolutionary Committee of Georgia, Philip Makharadze, has been replaced by Dudu Mdivani, the Ex-Bolshevist representative at Angora. On July 12, the arrest took place of leading public men, among whom are two very well-known leaders, Sylvester Djibladze (the founder of the Social Democratic Party) and Isidor Ramichvhili, also Dgebauadze (a worker), Chiabrishvhili, Lomtatidze (Vice-President of the Constituent Assembly), and N. Tasintsadze (Assistant Minister for Education), the population is in a state of great indignation; the visit of Stalin to the workers' quarter of Tiflis took place amid great obstruction."

A very interesting article on a "Philistine coin from Lachish," by E. J. Pilcher, and one upon "The Phaestos Disc," by Prof R. A. S. Macalister, are the outstanding features of the current *Quarterly Statement* of the Palestine Exploration Fund. The report of the Annual General Meeting is also included.

## THE PERSIAN GULF.

**"Le Golfe Persique." Par R. Vadala.**
(Paris: Rousseau et Cie. 10 Fr.)

It is a wild, rock-girt stretch of water, the Persian Gulf, full of dangers for the incautious navigator, and able, in parts and at times, to give points to the Red Sea in the matter of heat and general discomfort. But it is not without a fascination of its own: Elphinstone's inlet, one of the most wonderful natural harbours in the world, is but one of the places in the Gulf that would make an ideal haunt for the Pirate of Romance, if it were not for its climate, which is a near approach to that of Jehannum; many of the little ports and villages along the coast have an out-of-the-way air that lends them attraction; and the history of the Gulf in the past century, at any rate, is full of interest for Englishmen. For it is due to the British Navy that these waters are safe for peaceful merchantmen even to-day, that slavery has been almost—but *not* quite—suppressed, and that the waters have been charted, and in places, buoyed and lighted. Moreover, if prosperity such as that which it knew in the days when it tempted Albuquerque is ever to return to it, it will surely be chiefly due to our efforts. Our record there is one of which we may well be proud, and in which the littlest of Little Englanders would find it hard to pick holes.

In "Le Golfe Persique" M. R. Vadala gives us much information about this region, which he has studied on the spot, in the service of his country; and the book will be almost as interesting to English readers as to French. Indeed, English readers who know the Gulf may find a new pleasure in seeing it through French spectacles, and they will be grateful to the author for his generous recognition of what Britain has accomplished in these waters. The author's principal aim, it is very evident throughout his book, is to interest his own countrymen in the Gulf and, if possible, to stir them to renewed commercial activities there; but he gives the impression that he has almost lost hope of achieving his purpose, and his frank acknowledgement of our commercial success is therefore all the more generous and pleasing.

To be quite candid, the French never seem to have made any very determined effort to capture the trade of the Gulf, or even to obtain any great share of it. The first representatives of France in that region, according to M. Vadala, were certain Carmelites who were sent out early in the 17th Century, and these were generally Italians; and it was not until the following century that the Compagnie des Indes moved in the matter of the appointment of a lay and purely commercial consul at Busreh. M. Martinville, the first French consul then arrived in June 1739, and seems to have had some trouble to get himself recognised. He died at his post in November, 1741, and was succeeded by an Orientalist of some repute, M. Otter. In those days, when quinine was unknown in the Gulf, the climate and conditions of life played havoc with Europeans, and the early representatives of France's commercial interests came and went at very short intervals. The introduction of the drug has effected a real amelioration in this respect—our author assures us that the natives prefer the quinine of Paris to any other, a fact which we had not observed for ourselves—but our French friends seem never to have taken kindly to the Gulf, and in spite of spasmodic efforts to obtain a larger share of the shipping and trade, they still leave this field very largely alone. M. Vadala believes that it could be made profitable to the Marseilles shipowners and merchants; but these interests evidently think otherwise. An examination of the stastistics given in the book (pp. 52-84) inclines us to share the latter point of view.

What the author has to say regarding the relations between the Persians and the Arabs—who form the bulk of the coastal population— is interesting. He gives us the impression that he prefers the latter, and of the former he remarks that (on the coast) they have done nothing themselves. Their Customs, their posts, their telegraphs, their rare steamboats, are run only under European direction, and their Government takes very little interest in its southern coastal region, from which it is separated by wide regions infested by tribes which do not wish to recognise its authority. If not exhilarating, the picture is a true one. Like every one else who has ever given the subject of the Persian 'Navy' a thought, M. Vadala evidently finds it an amusing one; but he is far more polite about it than some other writers.

At the end of the books there are classified lists of works—historical, geographical, political, etc.—dealing with the Gulf. These are useful, but when they are revised for another edition, M. Vadala should surely include H. J. Whigham's "The Persian Problem," and Colonel S. B. Miles's "The Countries and Tribes of the Persian Gulf." 'Curiously, the reports of the latter and of Major (now Colonel) E. Mockler for 1882 & 1883, are included among the 'Documents Officiels;' but no later reports. The lists are, however, useful, and the book as a whole is very interesting.

## STAGE SET FOR DESERT SCENE.

**"Under Desert Stars." By Kathlyn Rhodes.**
(London: Hutchinson, 8s. 6d. net.)

The million people who have, according to advertisement, bought copies of Miss Rhodes' stories must, one imagines, like to see the authoress pulling the wires to make her little marionettes move on a carpet of yellow desert against a star-sprinkled background, preferring not to run the risk of having their emotions touched by any attempt to represent some "breathing human passion" or to create beings which might at least appear to move of their own accord. Miss Rhodes certainly treats her four chief figures as if they were dummies, and she never fails to make use of them to display some fresh and carefully described arrangement of wearing apparel each time that they are made to re-appear on the scene. The four figures are a heroine, another girl, a hero and a villain. Cynthia, the heroine, has an unfortunate past, as she has on two occasions stolen jewellery, but we are told that this is really to be regarded as an act of filial piety. Certainly an extraordinary succession of coincidences had made her thefts most temptingly easy. Her fiancé is told of this chapter in her past life by the villain—who had acted at the time as her evil genius—and he leaves her in Egypt to fend for herself. She then becomes the paid companion of the other girl, Olga, who has been brought to Egypt by an anxious father, partly for her health and partly in order to nip in the bud a love affair with the villain. The villain follows her out and makes matters very difficult for Cynthia, and for the hero, whose blue eyes, we are repeatedly told, are usually laughing, but whenever we meet him they are very grave, rather naturally in the trying circumstances, as he has a very short respite between the breaking off of Cynthia's first engagement and the discovery that she has been a jewel thief. The villain pursues his wickedness until it brings him to a violent end, Olga learns sense, and Cynthia and her hero are borne away to England and happiness. And we have a satisfactory feeling that the starry back cloth has been rolled up and the puppets carefully packed away in their box.

SCHOOL OF ORIENTAL STUDIES.
London Institution, Finsbury Circus; E.C. 2

**ORIENTAL LANGUAGES AND RELIGIONS.**

Instruction is given in the principal languages of the East and of Africa, and on Oriental and African Religions and Customs.

## THE CASE OF THE PALESTINE DELEGATION.

(*From a Correspondent.*)

There arrived in England on August 2, a deputation of seven influential Natives of Palestine, who have been delegated by the Moslem and Christian Committee to represent the case of their country to the British people. The Delegation is composed of four Moslem and three Christian gentlemen, who are well fitted to state the case of the Syrian natives of Palestine in England, where, at present, it is hardly known.

Certain facts of elementary justice support their case. The Syrians are the descendants of the ancient Canaanites, who were dispossessed of their land by successive conquests, but were never expelled. Though they are now unquestionably of very mixed blood, they do represent the ancient stock, and are as much the natives of the land as are the Scots, or the Britons, or the Welsh, of theirs. Of the entire population of Palestine, at least 80 per cent. are Moslem Syrians, and 12 per cent. Christians. The Syrians are naturally agriculturists, traders, shop-keepers; in these branches of labour they have been eminently successful wherever they have had a free hand, and these are branches of labour essential to the reconstruction of Palestine to-day. They have proved themselves also in Egypt and the Sudan as exceedingly able seconds in Government positions, and they can be loyal.

The Syrian case is briefly this. During the long years of Turkish tyranny, they, the natives of the land, bore the full brunt of an alien rule; the Turk was a blight upon every place he touched, and to the last he remained a hated stranger in the territories he had seized. The Syrian population (united under British rule as never before in all their long history), whether Christian or Moslem, ask nothing better than that Great Britain should rule Palestine absolutely, garrison it, improve it, control it; and that, under Great Britain, they should be allowed an equal chance to work it. They protest against any preferential treatment of the Jews, whom they regard as foreigners. They protest against the policy which opens their country to invasion by thousands of foreigners from all parts of the world, whose entry is so loosely controlled as to be practically unchecked. They contend that these immigrants, chiefly from Russia and Poland, are foreigners only, speaking the tongue of the country just left and no other; foreigners, who have never seen Palestine before; illiterate, uneducated. It is urged by those responsible for the rush of immigrants that Palestine can easily support a much larger population than it has at present. That is true but *not yet*. The country has been blasted by a rule more devastating than any plague of locusts; it needs care and time before it can support a normal population. The high prices prevailing in Palestine are one proof of its inability as yet to provide for a rise in population which is forced and not natural. There are not buildings to house them, nor fuel to warm them, and the result is suffering and hardship all round. Skilled labour is needed, and capital, evenly expended. A carefully selected and controlled imigration of this type would meet with general welcome.

The Syrians ask for an even chance in Palestine. They realize that their land has been won in open fight, and that conquest entails certain rights to the conquerors; but they ask a fair chance to make good in their own country; a free hand to prove to the world their loyalty to the Power that liberated them, and their ability to work their country under its aegis.

The Delegation, sent by the people of Palestine, believe that they have a sound case and a just plea; and that the apathy of people in England as regards the Syrian cause is simply the result of ignorance about it. They are confident that British justice will give them a fair and free hearing, in the Press and in all ways. Whether they succeed in their highest hopes, time alone can show; but if they can convince the people of this country of the justice of their claim, it *will* be carried — now or later.

## PERSONAL AND GENERAL.

**TO-DAY.**

August 18 (New Style).
August 5 (Old Style).
Julhijja 14, 1339 A.H. of the Moslem Calendar.
Ab. 14, 5681 of the Jewish Calendar.

Lord Allenby arrived in London on August 12.

Prince Paul of Serbia, left London last week for Paris.

The Maharaja of Kapurthala has arrived at Carlsbad from London.

The Maharaja of Indore has left London for Paris, and later will go to Switzerland.

On August 10, at 17, Cambridge Square, W.2., a son was born to the wife of Humphrey E. Bowman, Director of Education, Palestine Government.

The marriage arranged between Flying Officer W. G. Nicholl, R.A.F., and Miss Sydney Gedge will take place in India in October.

Sheikh Kidwai, of the Indian Moslem Mission, returned to London last week from Paris, where he has had conferences with the Aga Khan and Bekir Sami Bey.

The marriage of Major A. W. Daldy, I.A., and Marjory Louise, widow of Lieutenant-Colonel F. Fisher, I.A., and second daughter of Mrs. Grantham, Bexhill, will take place on September 1, at All Saints' Church, Knightsbridge.

The Persian Heir Apparent and his consort, who arrived last week at Alexandria on their way to Constantinople, have accepted an invitation to stay for a week at the Antoniadis Villa, in Alexandria, as the guest of the Sultan.

The engagement is announced between Douglas Ashby, second son of the late Silvanus Ashby and Mrs. Ashby, of 37, Vernon-terrace, Brighton, and Irene, third daughter of Mrs. Sills and the late Mr. Francis Sills, of Calonne road, Wimbledon, and Bengal, P.W.D.

The marriage arranged between Captain Herbert Pease, D.S.O., Western Arab Corps, Egyptian Army, and the Hon. Cynthia Chaloner, third daughter of Lord and Lady Gisborough, will take place at Gisborough, Yorkshire, on September 28.

The marriage between Violet, daughter of Sir David and Lady Hughes-Morgan, Penally House, Pem, and Mr. Brian Alexander Spencer-Lewin will take place at the Cathedral, Bombay. Miss Hughes-Morgan is sailing in September, accompanied by Mr. and Mrs. Ernest Mathias, of Penally.

### DEATH OF KING PETER.

As we go to press we learn from a *Reuter* message from Belgrade that King Peter, King of the Serbs, Croats and Slovenes, died on Tuesday afternoon at 5 o'clock. King Peter had been in very indifferent health for a long time, and it will be remembered that in June a report of his death reached this country. We published an appreciation of his person and career in our issue of June 23.

Digitized by Google

The marriage between Captain F. A. I. Richardson (late of the Lincolns), second son of Mr. and Mrs. E. A. Richardson, of Hampstead, and Eileen, eldest daughter of Mr. and Mrs. W. Hollis, of Angmering-on-Sea, Sussex, will take place at Colombo on or about October 10.

A marriage has been arranged, and will take place in Bombay late in September, between Flight-Lieutenant David S. Don, Royal Air Force, late R.N., only child of Mrs. Sargant, 40, Park-lane, and Mary Monica, elder daughter of Mrs. MacDermott, 59, Redcliffe-gardens, S.W.10.

A marriage has been arranged, and will take place shortly at Dar-es-Salaam, between Captain James Frederic Godman, second surviving son of Percy S. Godman, of Hampsteel, Cowfold, Horsham, and Muntham, Horsham, and the late Mrs. Godman, and Florence May, only daughter of Mr. and Mrs. Arthur Bartram, of Fen Ditton, Cambridge.

The engagement is announced of Noel Alexander Hodgkinson, B.A., late Captain 3rd Warwickshire Regiment, son of Alexander Hodgkinson, B.Sc., &c., late of Manchester, and of Mrs. Hodgkinson, Bradshaigh, Farnham, and Carol, only child of Mr. and Mrs. Francis Bennet, Chartered Bank of India, Australia, and China, 22, Buckingham-mansions, N.W.6.

A marriage has been arranged, and will take place in Cairo during the winter, between Lieutenant-Colonel Ronald S. Stafford, D.S.O., M.C., Ministry of Interior, Cairo, son of the late E. Howard Stafford and Mrs. Buckland Cockell, and Mary Everard Bevan, daughter of the late Mr. and Mrs. George Dixon, of Watlington, Oxfordshire.

The King has approved that the Hon. V. S. Srinivasa Sastri be sworn a member of His Majesty's Most Honourable Privy Council. The honour conferred upon Mr. Sastri is a recognition of the work he accomplished in association with the Maharao of Kutch and Mr. Montagu at the Imperial Conference, and follows quickly upon the conferment upon him of the freedom of the City of London.

Sir Arthur Peel, the British Minister at Sofia relinquishes his post an August 23. The British Government has asked whether the appointment of Mr. Erskine, now British Minister at Havana, Cuba, as British Minister at Sofia will be agreeable to the Bulgarian Government. Until the arrival of the new Minister, Mr, Rodd, the Secretary, will be Charge d' Affaires.

A marriage has been arranged, and will shortly take place at Constantinople, between Oliver Harwood Matthews, British High Commission, Constantinople, second son of the late Dr. C. E. Matthews, of Tiverton, Devon, and Mrs. Matthews, Weymouth, and Ida Elizabeth Charlotte, elder daughter of Ninian Finlay, W.S., Edinburgh.

Sir Charles Stewart-Wilson, K.C.I.E., Deputy-Commissioner on the British Delegation of the Inter-Allied Commission of Reparations in Bulgaria, has resigned his post and will be returning to England next month. His place will be taken on the Delegation by Mr. H. J. Bruce. The latter, who joined the Diplomatic Service in 1904, was recently First Secretary at Tangier. He married the famous Russian dancer, Madame Tamara Karsavina.

It is announced that for the future officers of the Royal Marines, who remain seconded for service under the Egyptian Government for more than 10 years will be placed on the retired list at the expiration of that period. Furthermore, the rule whereby Officers of the Royal Marines have been allowed to count service in unhealthy districts as double time for purposes of retired pay or gratuity is abolished in the case of officers seconded for service under the Egyptian Government for the future, but will remain in force in the case of those who are serving at present.

## APPOINTMENTS AND PROMOTIONS.

M. Pavlè Karovitch, Secretary of the Legation of the Kingdom of Serbs, Croats, and Slovenes, has been appointed Consul-General in New York.

The Simla Correspondent of *The Times* announces that Major Blood, of the Guides, has been appointed head of the special section at Army Headquarters which will deal with the visit of the Prince of Wales. He will be assisted by Staff Captain Kane, of the Dogras.

## NEWS IN BRIEF.

The King has directed that the appointment of Shakar Khan to be a member of the Civil Division of the Order of the British Empire shall be cancelled and annulled, and his name erased from the Register of the Order.

It is reported from Athens that a British aeroplane fell into the Sea of Marmora, near Rodosto, but that the aviators were rescued by an English vessel and taken to Constantinople.

A further six inches of rain have fallen in less than twenty-four hours in North-West India. The railway lines are blocked, and the Malir River is again in flood.

A memorandum presented to Lord Curzon setting forth the case for Armenia has been issued in pamphlet form by the British Armenia Committee, of 96, Victoria-street, S.W.

M. Nichol Charitca, a rich Greek, of Alexandria, who died recently, is stated to have made the Greek Treasury residuary legatee of his fortune, of which £30,000 is to be devoted to the requirements of national defence.

Permission has been given for the publication in Cairo of a daily newspaper by the Old Nationalist Party, which is hostile to the present Cabinet.

A postal convention has been concluded between Persia and Afghanistan.

The Royal Naval School of Music at Eastney Barracks has been commanded to furnish a band to accompany the Prince of Wales to India in the Renown, now fitting out at Portsmouth for his Royal Highness's voyage.

Arrangements are being made to transfer 600 Armenian orphans from Cyprus to the vicinity of Constantinople, where they will be under the charge of Dr. W. A. Kennedy, who is superintending the erection of new premises. This work is being undertaken by the Armenian Refugees' (Lord Mayor's) Fund.

Mr. Gandhi and Mr. Mohammed Ali have arrived in Lucknow. The President of the Lucknow Municipality, by his casting vote, negatived a resolution to present an address of welcome to Mr. Gandhi.

Lord Reading, as Chief Scout of India, has issued an appeal in support of the Prince of Wales's Fund for the Boy Scouts' Association.

A decree issued by the Sultan of Turkey restores to the civil list the Crown property confiscated by the Young Turks at the time of the deposition of Abdul Hamid.

Under the Indian Territorial Force Act, 1920, the Government of India has constituted University Training Corps at Bombay, Calcutta, Allahabad, Lahore, Madras, and Burma, and Territorial Force infantry formations for the United Provinces, Punjab, Madras, Bengal, Bombay, and Burma. These will be affiliated to Regular regiments.

## THE INDIAN BOYCOTT.

We have already recorded the decision of the committee of the self-styled Indian National Congress to organisea boycott against all imported cotton goods. The influence of that Committee is less than it once was, but the possible consequences of its action are nevertheless sufficiently serious to justify an examination of the subject in some detail. In order to appreciate the magnitude of the interests involved, it is necessary to realise the extent of the consumption of imported cloth. In the years of comparative stability before the war, India was buying annually about 3,000 million yards of piece-goods; their value was something like forty million sterling, by far the largest single item in the Indian import trade, and the goods themselves represented the ordinary clothing of a majority of the whole population, who, as things now stand, must either wear foreign cloth or go naked as their forefathers did. What possible hope, it may well be asked, can any body of politicians have of bringing to an end a trade of such importance to the people on whose support they depend? The answer to that question must be looked for in the present day mentality of India, or rather of that portion of India which takes an active interest in politics. It is a curious blend just now, of fact and fiction, of noble sentiments, unworthy prejudices, and lofty if not always practical aspirations. Indians believe, and justly, that, at a time when European industry was in its infancy, their country provided clothing for most of Asia from the produce of their own fields, manufactured in their own looms. They have been led to believe further that this great industry was deliberately ruined by the malignant policy of England; they see in the modern import trade the seal of their national degradation; and they aspire to recover their lost markets, not merely as a profitable enterprise, but as a token to the world that their national regeneration has at last been accomplished. It would be easy to question their views of past history, but to do so would be to miss the point; the views themselves are the important fact, and their existence makes it possible to understand why astute politicians, in search of a rallying cry, should single out the trade in piece-goods as the object of attack.

For ourselves, we are not disposed to quarrel with the aspiration to restore India to her former position in the clothing trade of Asia. The object is in itself legitimate and our criticisms relate, not to the end, but to the means by which its attainment is now sought. Much spade-work must be done before India can hope to succeed. The raw material she produces does not attract her prospective customers, and she must arrange to grow much more cotton, the bulk of it of much better quality than now. Many more factories must be built and equipped. Railways, coal-supplies, and hydro-electric installations must all be developed; and in order to keep the factories going, a machine-industry must be established in the great metallurgical district now coming into being around Jamshedpur. Every one of these essential preliminaries is already included in the policy of the present "bureaucratic" and "satanic" administration. The problem of raw material is far on the way to solution; much has been done to facilitate the opening of new factories; the development of the great hydro-electric resources of the country has made a start, Jamshedpur itself owes its existence to the Government almost as much as to its able and enthusiastic promoters. What is wanted now is driving force, and surely the wise policy would be to organise national aspirations to serve this purpose, and to secure their aid in providing capital, increasing technical skill, and employing the resources of the country on the lines already marked out. Such a policy is, however, forbidden to the members of the extremist section by their self-imposed refusal to co-operate with the Government; true to their past record, their personal feelings must count for more than the welfare of their country; and the course adopted by them must be designed to embarrass the authorities as far as possible.

Their measures are simple. Foreign cloths must be discarded, and nothing must be bought or worn that has not been made in India. Since the mills cannot clothe the country, the hand-spindle must be set to work, and since even then there will not be clothes for all, weavers and dealers must be persuaded—perhaps peacefully—not to raise their prices. And these measures are to be taken at a time when, owing to war and bad seasons, India is already short of clothes. In the famine districts, the children are crying out for something to wear: in Bombay, the politicians are making bonfires of serviceable cloth. That is a fair sample of the India which would result from the success of the extremist policy, the masses impoverished and miserable, while the autocrats are pampering their own disordered tastes. What the outcome will be is still uncertain. The influence of the extremists is probably sufficient to affect the cloth market to an appreciable extent, and the success of the boycott will be measurable by the increase in the misery of the people. The leaders will then doubtless endeavour to direct the resulting ill-feeling against the established Government, and for a time they may succeed. The most doubtful factor in the problem is the strength of forces yet undisclosed the fundamental good sense of middle opinion, and the nascent self-consciousness of the masses. It is on those forces that the new India has been founded, and it is possible that, even at this early stage, they may justify the confidence of the builders. The boycott is in essence the challenge of the old India to the new. The ground has been skilfully chosen, and the future of the country will be determined very largely by the way in which the challenge is met.

## THE POSITION OF ALBANIA.

*By the Hon. Aubrey Herbert, M.P.*

In attempting to analyse the present position of Albania*, and to forecast its future, it is essential to remember its past, and that its history is consecutive and does not start at any abrupt date. Albania is a country of three creeds—the Orthodox Greek Church in the south, the Catholic of the north, and the Mohammedans of the north, centre and south. It was always the interest of the neighbours of Albania to foster the differences that divided the country. The Turks supported the Mohammedans, the Austrians subsidized the Catholics, the Greeks claimed the southern Orthodox. In spite of this, these antagonisms were never very deep. Inter-marriage took place; there was blood-brotherhood between Christians and Mohammedans, and when the people, who are essentially quick-witted, realised that their country was in danger, they adopted, spontaneously and in common, the creed of patriotism. They saw that only by unity could they live, and they achieved unity.

This necessity first became apparent to them in 1908, when the Turkish revolution occurred. The Committee of Union and Progress promised autonomy to the various nationalities of the Ottoman Empire. The Albanians were the first to perceive that this pledge was illusory; and in 1910 they rebelled. After much fighting, during which the Albanians lost heavily at the hands of the Turks, and later at the hands of the Serbs and Greeks, the country was recognised at the Conference of London and the Prince of Wied, in 1913, was given the mandate of governing Albania, not too difficult a task in itself, but impossible in the face of the intrigues of the Great Powers.

In 1914, the Great War broke out, and in April, 1915, Albania was provisionally partitioned by the Allies, between Greece, Serbia, Italy, and Essad Pasha. This treaty has never been fully published; what knowledge the public has of it, it owes to the Bolshevists.

On December 9, 1919, a mandate, with reservations essential to Albania, was given to Italy by President Wilson, Mr. Lloyd George, and M. Clemenceau; but Mr. Wilson went to America; and in February, 1920, the partition of Albania was decided upon by Mr. Lloyd George and M. Clemenceau. These two statesmen reversed the policy of that gallant brigand, Robin Hood: it was his habit to take from the rich and to give to the unfortunate; it was their policy to take from the poor and to give to the prosperous. So, Greece received an accretion to her new Empire and the rich kingdom of Yugoslavia was further enriched at the expense of of neutral Albania. But President Wilson had still power to frustrate this chivalrous design. Early in 1920, the trouble between Italy and Albania came to a head. Under General Ferrero, the relations between the two peoples had been excellent, but General Piacentini introduced new methods and a new spirit. Count Sforza finally put an end to an intolerable situation at Rapallo, when Italy disclaimed all intention of interfering with Albania. This may have been due to her reversion to the generous principles of liberalism and nationalism that have so often characterised her policy, or to the fact that Count Sforza saw that, in the end, friendship was essential between the large and the small country, and that the only road to friendship was through an unselfish policy.

In some respects it is possible to compare Italy's interests in Albania with British interests in Egypt. Two things are vital to us—to hold the Suez Canal, and that no Great Power should hold Egypt. It is essential to Italy to control the Adriatic and to see that no Great Power holds the ports of Durazzo or Valona, which point a dagger at her heart.

A few months later, at her own request and on the initiative of Lord Robert Cecil, Albania became a member of the League of Nations. It is difficult to describe the immense relief that the whole country felt at this event. It is not a reprieve from death; it was salvation. The sword of Damocles was taken down; the fears that had haunted the country were banished, and a peaceful people gave thanks in its different Churches for the League of Nations and Lord Robert Cecil. Albania had sailed in rough and heavy seas and there had been none to help her and many fanatical for her destruction, but her own dogged and determined efforts, which had preserved her nationality through the ages, had achieved the unity which made it possible to enter into the fraternity of the peoples. Her ship had come into the harbour at last; but though the independence of the country appeared to be saved, it was still bleeding from many wounds. In the north, one-sixth of her territory was occupied by Yugoslav troops. Thirty thousand refugees from the devastated areas had to be fed, if not housed, by the Government of Tirana. The Greeks, more than once, mobilised on the southern frontier, and a great portion of the population there was still homeless or living in ruins; but the Albanians looked forward to the League of Nations to heal these wounds. The country was no longer like a man tied down under an ant-heap. It was a free man, who had the right and the title to plead his case in open court. This happy state of affairs was not to last for long.

Mr. Lloyd George was soon 'at it' again. The Albanian Government appealed for a decision by the League of Nations on the question of frontiers. Now the frontiers of Albania had been settled, detrimentally to that country, in 1913, with the exception of a small portion of the north-eastern line. The League of Nations had, therefore, considerable guidance to rely upon, but the League of Nations was not allowed to handle the question. It was deftly removed to the secrecy of the Council of Ambassadors in Paris, and the reason for this is obvious. The Greeks had been offered Asia Minor, the goods of a strong man which it is certain that, in the end, they will not be able to hold as a possession. It may, then, ease the situation if they are offered the goods of one who is less well armed and less strong.

Had Essad Pasha been alive, he would, at this juncture, have served the desires of the Supreme Council admirably, but Essad Pasha sold his country once too often and paid the penalty. He is dead, but he is now resurrected and multiplied in the body that is the Conference of Ambassadors in Paris, which executes the commands of the Supreme Council, and the last move of the Supreme Council appears to be successful. They have done their best to break Albanian unity and, with the mighty weapons at their command, it is hardly possible that they can fail. There is a limit to the endurance of men and nations. The Albanians united themselves; their Ulster and Sinn Fein shook hands; they forgave and forgot, and were rewarded by being enfranchised amongst the peoples. But it was all of no avail. The Supreme Council will respect neither their neutrality, their independence nor their unity, but is determined, upon one pretext or another, to break its word and to plunder their country. This is how the

ordinary Albanian sees it, and could one wonder if their fortitude should fail and they should play into the hands of their enemies by abandoning that unity which they knew in the past to be, and which still is, their only hope, and attempt to make the best sectional terms that they can?

It is possible that the League of Nations, at its next Assembly, may hold its own and may rescue the question of the frontiers of Albania from the decisions of the Conference of the Ambassadors. If this is not so, something greater than the cause of Albania will have failed. The League of Nations, no doubt, and its machinery, will continue to exist, but the purpose for which is was created, of seeing justice done and protecting the weak from the unscrupulous and preventing unnecessary wars, will have been destroyed. If the Ambassadors' Conference gives portions of southern Albania—such as Argyrocastro—which were definitely within the Albanian frontier of 1913, to the Greeks, the preparation for a new Balkan war will have been made. Serbia will demand compensation in the north, which Italy will follow by demanding garrisons at Valona and Durazzo. This will, for the moment, be the end of national aspirations of a very tough people, but it will also be the end of this League of Nations for all time.

## NEAR EAST IN PARLIAMENT.

### House of Commons.

*August* 8.—Replying to Mr. Aneurin Williams, Mr. Harmsworth said that France had been selected as the mandatory power for Syria by the principal Allies. The provisions of the Syrian Mandate had not yet however, been approved by the Council of the League of Nations. Although the draft mandate presented by the French Government to the Council had not yet been published, he understood that it contained articles similar to Nos. 8 and 10 of the draft mandate for Mesopotamia.

Mr. Rupert Gwynne asked the number of Jewish immigrants into Palestine since our occupation. Mr. Wood replied that the number of Jewish immigrants into Palestine up to September 1920 was approximately 6,500; and from October 1920 till the end of June 1921, the number of immigrants was 8,579.

Mr. Swan asked whether the Foreign Office on July 30 received a telegram from representatives of various governerates and provinces in Egypt, assembled under the Chairmanship of Fathalla Pasha Barakat, protesting that martial law still continued, and that the right of free speech in Egypt is denied to any who hold views in opposition to the present Cabinet, and what reply has been given or is proposed to be given to this telegram. Mr. Harmsworth replied that the telegram referred to was one of many which had recently been received from persons in Egypt. A large number of these telegrams contained protests against the questions which the hon. Member (Mr. Swan) and others had asked in this House, as casting unjustifiable aspersions on the methods of the Egyptian Government. No useful purpose would be served by replying to this or to similar telegrams.

*August* 9.—Mr. Churchill informed Commander Kenworthy that the arms traffic in Arabia is limited by international agreement and by the local law of the various territories adjacent to that country. There was at present with Ibn Saud, Emir of Nejd, no British representative, nor any representative of any other European Government, nor of the King of the Hejaz, so far as he was aware. The subsidy of £5,000 a month paid to the Emir, is paid in gold.

*August* 10.—Mr. Ormsby Gore asked whether Musa Kasim Pasha El Husseni, ex-Mayor of Jerusalem, who is proceeding on behalf of a Moslem committee from Palestine to various capitals of Europe to protest against British and Allied policy in Palestine, has been received in audience of the Pope; whether the British diplomatic representative at the Vatican was present at the interview; and whether this visit to the Pope was authorised by the British Government. Mr. Harmsworth replied that the answer to the first part of the question was in the affirmative, and to the second and third parts in the negative.

Commander Kenworthy asked why the speech of the Secretary of State for the Colonies on the estimates for the Middle Eastern Department had been censored out of the Palestine newspapers. Mr. Churchill replied that brief reports of the debate on the estimates which included a *resume* of the speech of the Secretary of State for the Colonies, were in one or two instances not released for publication in Palestine as it was thought that such brief reports were calculated to give a wrong impression. Extended reports were subsequently received and no ban was imposed on their publication in the press.

*August* 11.—Sir John Rees asked the Secretary of State for the Colonies whether he had any information to the effect that Christians from Bethlehem were emigrating to South America owing to their dissatisfaction with the Zionist Government of Palestine. Mr. Churchill replied that the answer was in the negative, and added that the present Government of Palestine should be correctly described as a British Government, and not a Zionist Government; and stated in answer to a further question that the High Commissioner for Palestine is himself under strictures from the ardent section of Zionists.

Mr. Aubrey Herbert asked the Leader of the House whether his attention had been called to the report of the Prime Minister's speech the previous day at the Supreme Council to the effect that nationals of the Allied Powers are to be allowed to supply arms and ammunitions to the combatant powers Greece and Turkey; if it is not a fact that the Supreme Council is itself responsible for the existing hostilities, and if it is consonant with the theory of the League of Nations to encourage the present war by countenancing the supply of arms to the combatants. Mr. Chamberlain replied that he had received information that the Supreme Council had agreed to continue an attitude of strict neutrality with regard to the Greeks and Turks, it being understood that this in no way infringed rights of private persons to freedom of trade. This is in accordance with the principles of International Law and the traditional practice of this country. The answer to the second part of the question was in the negative. In reply to a supplementary question by Captain Elliot as to the fairness of this country interfering in this case when it had derived so great an advantage from buying arms from private individuals in a neutral country during the war, namely America, Mr. Chamberlain stated that this brought to the mind of the House the habitual practice of this country in this matter. It was not the duty of a neutral to restrain its citizens from supplying arms to belligerents. He did not think that in view of the establishment of the League of Nations that this international law should now be reversed. It would be a very large decision to come to, merely because we had hoped that in the future the League of Nations might prevent many wars if not all wars.

## THE BAIRAM FESTIVAL.

The celebration of Eid-i-Bairam, or Feast of Sacrifice, on August 14, attracted a concourse of Muslims from Turkey, India, Arabia, Afghanistan, Baluchistan, the Federated Malay States, the United States, the British West Indies, France, and Germany to the Mosque, erected 35 years ago, at Woking, by the late Begum of Bhopal. Among the prominent faithful who attended were Reshid Pasha, Turkish Chargé d'Affaires, and his staff; M. M. N. J. Chotani, president of the Indian-Turkish delegation; Mirza Mohammed Ali Khan, Persian Consul-General in London; Lord Headley (President of the British Muslim Society); Sahibzada Afdabahmad, Indian Member of the Council of State for India; and Khwaja Nazin Ahmed.

THE
EUPHRATES & TIGRIS
STEAM NAVIGATION CO., LTD.

Regular Service of Passenger and Cargo Steamers running at frequent intervals between BUSREH (Persian Gulf) and BAGHDAD on the River Tigris, and between MOHAMMERAH (Persian Gulf) and AHWAZ on the river Karun.

Cargo booked on a Through Bill of Lading to BAGHDAD and/or AHWAZ by the chief liners sailing from the U.K. Continent and India.

The engagement of land transport for Cargo to towns in the interior of Mesopotamia and Persia undertaken on behalf of Shippers of Through Cargo to BAGHDAD and AHWAZ.

## NOTES AND NEWS.

Devonshire Square.
E.C. 2,

**The Cotton Carrying Controversy.**

The unfortunate dispute that has arisen in connection with the Egyptian cotton carrying contract is the subject of some interesting comments in a letter that has reached me from Cairo this week. The writer points out that the United States Shipping Board was not successful in tendering despite its low quotations because " for one reason both shippers and spinners prefer to continue shipping by the lines which have in the past served them so well, and have special facilities for handling the cotton which the Shipping Board do not possess, and secondly because the small margin between the British rates and the offer made by the Shipping Board would be more than counter-balanced by the higher premium. which British insurance companies would charge on cotton shipped in American bottoms."

**Position Misunderstood.**

That sums the position up, but unfortunately the Americans did not view their failure in that light, and in the words of my correspondent " have not taken their defeat in a friendly spirit," a very mild way of putting it in view of the complaints advanced and the threat to apply the Jones Act. " Investigation of the facts " adds the writer " does not make at all clear in what respect the Liverpool Lines have been guilty of unfair methods, and it looks very much as if the Americans, through misunderstanding the position and attitude of the shippers and the spinners, have been led to assume that the Liverpool Lines have used unfair methods, and so have endeavoured to obtain at any rate the American part of the carrying trade by threatening to enforce the famous Act.

**Position in Roumania.**

The latest of the consular reports to make its appearance is that on Roumania, some extracts from which will be found in another column. It is rendered of special interest, not to say importance, by an exceedingly able survey of the handicaps with which Roumania has been confronted as a result of the war. Mr. Adams does not take an optimistic view of the outlook. Reconstruction, he thinks, must of necessity be a somewhat lengthy process extending over a period of years. In this respect he clashes with those who have recently had an opportunity of seeing the country. But the discrepancy is purely on the surface. Since the report was written notable advances have been made in many directions, and while at the end of 1920 the prospects were far from promising, the latest accounts, one of which I gave last week, are extremely encouraging.

**Openings for Business.**

The greatly improved outlook gives an added importance to what Mr. Adams has to say of Roumania as a market for British goods. As he justly points out the partial elimination of the Central Powers gives this country "a magnificent opportunity to redeem her past neglect of this market and to take her stand as the principal supplier of manufactured goods." Of the particular openings for business I must refer my readers to the report, and will merely say here that their variety and nature should make the market specially attractive to the commercial community here. There are very few lines of goods, indeed, for which there is not a demand, and given favourable conditions a little enterprise should richly repay British firms.

**Labour—The Writing on the Wall.**

Messrs. Yarrow's decision to close down their works temporarily on or about the end of November has provided the sensation of the week. In the notice announcing this intention it is pointed out that the cost of shipbuilding has become excessive owing to repeated strikes, reduction of output, and demarcating disputes in various industries, and that it is further impossible to promise dates of delivery. The chief problem with which shipbuilding firms in this country are confronted is briefly that the present selling price of tonnage is about one-third of its cost price, which of itself would be sufficient to explain this step. In addition the exchanges and more favourable labour conditions in other countries place British firms under a serious handicap in tendering for contracts abroad. Messrs. Yarrow recently made a tender which allowed for no profit, but their tender was much above that of a Belgian firm, which obtained the contract.

**Messrs. Yarrow's Record.**

Messrs. Yarrow have a record for enterprise second to none among British firms. Thus about fifteen years ago when conditions in Poplar became unfavourable they removed to Glasgow, and it may justly be assumed therefore, that a firm which has coped so successfully with crises in the past will have considered every resource before coming to its present far-reaching decision, and that in short, the proposed course has been adopted because it was inevitable. The firm expresses its faith in the future of the shipbuilding and engineering industry in this country, and believes " that prosperity will return when everyone realises that commercial undertakings can only be carried on with success in accordance with economic laws."

REPORTS FROM OUR OWN CORRESPONDENTS.

## TURKEY.

Constantinople, July 31.

**A Pleasant Change.**

During the last month there has been a slight change for the better in the commercial situation. The change is not yet very important, but it is nevertheless fairly well-defined, and justifies to a certain extent the hope that it marks a turning point in the long period of depression from which the Constantinople market has been suffering. Undoubtedly one of the most important factors in the incipient revival is the recommencement of trade with Batoum. There has been a sharp rise in the price of Manchester goods, which are greatly in demand in the Caucasus, and business is being done for cash, that is non-Bolshevik money, as well as on the basis of an exchange of goods. There is a certain amount of tobacco available for export in Georgia, as well as Astrakhan skins, for which clothing and pharmaceutical products are required in exchange.

In the next place, by dint of resolute selling almost regardless of the loss involved, the huge stocks that had accumulated last year have been reduced by about sixty per cent., and the market has been considerably relieved, although perhaps rather weakened by the process. Cotton goods have risen about 15 per cent. in price, and foodstuffs have followed suit.

**Government Finance.**

The Government has at last come down to the bed rock of those irregular means by which it has hitherto succeeded in more or less making up the deficit of revenue required for the two and a half millions of monthly salaries and expenses. Everything saleable has been sold, and every debt collectable has been collected. The only means left of finding the money for the needs of the top heavy administration is to increase taxation The first tax to be increased will, of course, be the house and property tax, and the next the *temettu*, or income tax, which, it is said, is to be increased by five hundred per cent! On the other hand, the Government finds it impossible to make any further economies on its personnel.

## ROUMANIA.

Bucharest, July 27.

**The Financial Position.**

Now that Parliament is closed, a section of the Press has been commenting on the rapidity with which the budget has been passed through both Houses, this having been accomplished in two sittings only, owing to the absence of the Opposition. The general budget amounting in round figures, to the aggregate sum of 10½ milliard lei, is divided up into three distinct ones: the ordinary of 7.6 milliards the extra-ordinary for liquidation of 1.4 milliards, and a further extra-ordinary one for reconstruction also of 1.4. milliards; with corresponding revenues for each of them, leaving a balance of 38 million lei for eventual supplementary credits. This is the first budget of Greater Roumania fully covered by sure revenues, which will enable the Exchequer to meet all State requirements, ordinary and extra-ordinary, for the current financial year.

During the discussion M. Titulescu dealt with the financial situation of the country in connection with the financial relations with the Allies. He pointed out that Roumania had had to suffer very much in consequence of the war, her pre-war debt of one milliard lei having risen to 27 milliard lei. The present Cabinet had contributed very little to this increase; the whole responsibility for it fell on the former Governments. One of his constant preoccupations was the regulation of the foreign debt. He also had striven to establish the rights Roumania had to obtain from the Allied and non-Allied States, and to reduce her Treasury-Bonds which were in circulation..

M. Titulescu went on to state that the question of the oil wells, which had been set fire to during the war, had been solved. Roumania would indemnify the oil companies, and England would indemnify Roumania in compensation. As regards the Treasury Bonds circulating abroad, some had been cancelled, while those which remained would be duly honoured.

The coupons in arrears which were due to England had been paid since September, 1920; those due to France being more numerous, a series of arrangements had to be made, including a sale of 10,500 waggons of wheat, to be delivered from April 15 to October, 1921, of which 2,000 waggons had already been shipped. All coupons had been paid since July 1, 1920, to those holders who could prove having possessed them since August 1, 1914 The Minister declared that he was not adverse to foreign capital; on the contrary, Roumania would always welcome it, provided it was controlled and utilised for the development of the country's resources.

Bucharest, August 3.

**Miscellaneous.**

Roumania has given a contract to the Czecho-slovak factories at Stadig, Nesseldorf, Snichcy, Krolovo, Pole and Freistadt, for the repair of a number of railway trucks. This work will occpuy these establishments until the end of this year.

The cost for transport of goods on the Roumanian railways has been increased by 10 per cent. as from August 1.

The question of the exportation of gold is still unsettled. The Minister of Finance, replying to a Commission of Directors of the various mines, expressed disapproval of exportation on account of insufficient production.

The Ministry of Domains is making active preparations for the organisation in May, 1922, of a great exhibition of domestic animals of all species.

The Exhibition and Samples Fair now in progress at Cluj, Transylvania, will probably be transferred later on to Bucharest as a part of the similar exhibition which will be opened on September 12.

A group of American financiers intend to erect a factory for woollens at Arad, Transylvania, at a cost of 30 million lei.

The Roumanian Commission sent to Bulgaria for the identification and acquisition of the rolling stock taken during the year, has returned; the Bulgarians refusing to restore the locomotives and trucks.

Large stocks of Roumanian and Czecho-slovak goods are to be stored in Budapest. The establishment of

this depot has been agreed upon by the respective delegates to serve as a basis for the trade which will be carried on by both countries on Hungarian territory.

A Commission of experts is starting for Bulgaria to receive the cattle the Reparations Commission has allotted to Roumania.

According to statistical data, Roumania possessed in 1920 18 million head of oxen, horses, asses, buffaloes, sheep, goats, and pigs. It is estimated that the number of these animals has since increased by 1½ million head.

The German Government proposed to supply the Roumanian State with locomotives to the value of 450 million lei on account of the Banca Generala notes issued during the German occupation, without prejudice to Roumania with regard to the decisions of the Inter-Allied Reparations Commission. The German Government is willing to commence the despatch of these locomotives forthwith, and also of any other machinery or material required. The German offer has been accepted in principle, and will most probably be carried into effect.

## GREECE.

Athens, July 30.

### General News.

By order of the Minister of Finance, Custom duties will, in future, be paid in gold on a basis of 2.50 drachmae to the golden drachma. It is estimated that this new taxation will bring an extra 400 million drachmae per annum to the State. The additional duty does not apply to cereals and flour.

The Consortium of Banks has issued a circular stating that goods in transit may be re-shipped without previously obtaining the sanction of the Consortium.

The Ministry of Interior has notified that in accordance with its circular dated May 29, 1921, all tins of condensed milk imported into Greece should bear Greek labels as from July 1.

The Consortium of Banks announces that persons leaving Greece are not allowed to be in possession of more than 1,500 francs in foreign moneys. They may take with them as many drachmae as they wish. Persons coming into this country from abroad must not be in possession of more than 500 drachmae. In this case there is no limit as regards foreign currencies. In case of difficulties or trouble with the Customs officials in connexion with the above, travellers should promptly apply to the Consortium of Banks.

## YUGOSLAVIA.

Zagreb, August 9.

### A Loan Desired.

During the recent brief session the Skupshtina approved in principal a foreign loan of 500,000,000 francs The Minister of Finance, Dr. Kumanudi, pointed that the objects of the loan were three-fold. The chief one was to build the railway to connect up Serbia directly with the Adriatic, which is a prime necessity for this country. The second was to cover foreign obligations. At present the Government is constantly buying foreign exchange on the Bourse in order to meet its obligations abroad, and this is doing a great deal of keep the dinar down. With a substantial foreign loan, they could clear many of their war loans obligations, and leave the Bourse open to commerce, which would improve the position of the dinar. The third object was to pay off the debts of the Government to the National Bank. These now amounted to four milliards of dinars, with the result that there was too much paper in circulation, which again kept the dinar down. The moment the Government paid off some of this debt a corresponding amount of paper would be withdrawn, which should react favourably on the rate of the dinar. After some discussion the bill was passed by 157 to 29 votes.

### New Export Tariff.

The new export tariff is expected shortly to become law. The duty on wheat will be 10 dinars per 100 kgs (the export of oats, barley and hay is at present forbidden) on opium, 500 dinars per 100 kgs., cattle and buffaloes, 150 dinars for beasts over 400 kgs., and 100 dinars for those under; for small stock, sheep, pigs, etc, 80 dinars; on fresh meat 50 dinars; pigs below 120 kgs., 80 dinars; for those over 120 kgs., 200 dinars; fresh pork 50 dinars; horses 400 dinars per head; bacon 60 dinars; salt pork 40 dinars; per 100 kgs; lard 60 dinars; wool 250 dinars; eggs 100 dinars; hides of cattle 100 dinars; of calves 200 dinars; of sheep 100 dinars; old iron 100 dinars. The export of timber is free, except oak timbers. The export of coal is subject to license.

### Miscellaneous.

A new *prirez* or additional tax is foreshadowed. This is to be a percentage added to the *porez* or direct tax paid by everybody, and will be cumulative. Thus, on a *porez* of 30-150 dinars, the *prirez* will be 15 per cent; from 151-200 it will be 17 per cent., and so progressively, until the man who pays a *porez* of 200,000 dinars will have a *prirez* of 50 per cent. into the bargain.

The official gazette issues a notice that the British Ministry of Agriculture and Fisheries has published a notification permitting the importation of horses, asses and mules from Yugoslavia. The advertisement looks odd when one sees in Serbian dress such expressions as "ponies trained for playing polo." The country is rich in horses, and considerable quantities have been exported this summer. It opens, too, a fresh field of activity for commercial men, and should help the difficulty of exchange.

## BULGARIA.

Sofia, August 14.

### The Rate of Exchange.

In "The Near East" of July 27, reference was made in the "Notes of the Week" to the quick recovery of the leva. It was stated that it had rapidly returned to the rate of 350 levas for a £1. This was of course the rate in London, not in Sofia. Three weeks ago the rate was about 600, the lowest that it has ever been, and during all this period the highest rate that it has reached is 388, which was what £1 could be bought for on the 20th. This serves to show the difference which exists between the London and Sofia rate; of course this difference is not confined to Sofia, but exists in Vienna and Bucharest to name but two European capitals.

## BAKU PETROLEUM CRISIS.

### A Soviet "Triumph."

(*From a Correspondent.*)

The Soviet economists are greatly alarmed at the state of the Baku petroleum industry. "The past four months (January-April) were characterised by increasingly unfavourable conditions," says the *Ekonomicheskaia Zhizn* for June 28, speaking especially of the Baku petroleum industry. The principal cause of the stagnation is the food shortage (as usual). There is no doubt that the failure of the harvest in the Volga provinces and the Northern Caucasus—the very districts from which Baku gets its corn supplies—must fatally affect both the Baku and Grozny oilfields. The same article points out that owing to the exhaustion of the supplies of food, as early as the middle of April the highest bread ration at the Baku oilfields was reduced to 1.35 lb. per diem "with an abrupt deterioration in the quality of the bread." Moreover, it was proposed not to issue the supplementary rations.

"The systematic underfeeding," says the report of the Petroleum Committee, "has caused outbreaks of scurvy among the workmen, which is beginning to deplete their ranks, while the productivity of their labour is steadily declining. Previous reports made mention of absence from work, refusals to do overtime and piece-work, of watchmen leaving their posts and falling asleep on duty, and carelessness frequently bordering on criminal 'sabotage.' All this has become a matter of common occurrence at the works."

"The consequences are now apparent," continues the writer of the article. "In April there was an accident at the works. Owing to the carelessness of a stoker, the water let into four boilers simultaneously rushed into the main and got into the turbines of the electric power station. All the works had to be stopped and the turbines cleaned, owing to which the power of the latter was decreased by 60 per cent." Such was the state of affairs even before the failure of this year's crops.

The inability of the Soviet food organisations to provide bread for the workmen make it impossible to increase the number of the latter from the existing 25,000 to the required 40,000. The petroleum undertakings are suffering especially from the absence of borers and pump-hands, the number of which is decreasing. Owing to the absence of pump-hands it is impossible to exploit all the oil-wells. In March 834 wells were at work, and by April their number had fallen to 799. According to the programme it was proposed to increase the number of working wells every month, up to a maximum of 1,500 at the end of the year. The idle wells are flooded, especially those in the so-called "old areas" (Balakhany, Sabunchi and Romany), where the amount of water in the wells has risen to an alarming extent. In these oilfields, which yield oily naphtha of special value, for the first four months of 1921 the output was 46.5 per cent below that for the corresponding period of 1920.

Boring operations have likewise ceased, owing to the absence of workmen. According to the programme it was proposed to bore 1,400 *sazhens** per month. (Before the war the monthly borings used to be from 4,000 to 5,000 *sazhens*). Nevertheless, the programme had to be considerably reduced. It had been proposed to bore only 320 *sazhens* in April, but the actual borings only reached 170 *sazhens*.

The shortage of labour is especially felt by the auxiliary undertakings, without which the Baku petroleum industry cannot exist. The average number of skilled workmen employed at such works hardly reaches 25 per cent. of the number required, and sometimes falls as low as 10 per cent. Besides the shortage of labour, the oilfields are suffering from a great want of technical appliances. Conditions grew worse in April. "The stocks of materials are steadily decreasing, and in many cases (copper, tin and bricks) are quite exhausted." The following figures will give some idea of the stocks of certain materials. "By, May 1, 1921 the stocks of materials were: Cables—1,310 poods whereas 10,536 poods are required; gas pipes (black)—10,422 poods, as against the 1,600,000 poods required; leather—12 poods, instead of the 400 poods required. The percentage of the requirements fulfilled by the central institutions fluctuates between 0.1 per cent. and 25 per cent."

*One *Sazhen* —7 ft.

This acute shortage of technical materials is partly due to the stoppage or low output of the auxiliary works, and partly to the absence of deliveries of materials from other districts of Russia and from abroad. Such a state of things makes it impossible to raise the productivity of the petroleum industry, in spite of all efforts to do so.

The constantly fluctuating monthly output of petroleum averages about 220,000 tons, and has never once reached the standard fixed by the modest programme of the Soviet Government, i.e., approximately 230,000 tons per month. (In 1912 the monthly output was 648,000 tons). According to the *Ekonomicheskaia Zhizn* 218,000 tons of petroleum were raised in April.

Matters are no better as regards the treatment of petroleum at the oil-works. In April the amount of petroleum treated was less than in March. The programme estimated that 215,000 tons per month would be manufactured. The actual amount treated in March was 190,000 tons, and in April—177,000 tons. As regards the refineries, matters are even worse. The total amount of petroleum refined in April was 71,700 tons, or 27 per cent. less than in March. The programme provided for 220,000 tons being refined per month.

In normal times the output of refined kerosene alone reached 200,000 tons per month. "The fulfilment of the refining programme varies in the case of the different products. The percentage of the actual quantity refined as against the estimates was as follows:—Kerosene—80 per cent.; benzine—58.5 per cent.; machine oil—about 49 per cent.; and cylinder oil—20 per cent. The manufacture of special kinds of oil has not yet been started, and possibly may never be begun." There is no hope of any improvement in the condition of the works. "There is more reason to expect still more negative results."

As has already been mentioned, hitherto the shortage of Baku petroleum has not been felt, as there were old stocks to fall back on. Owing to the disorganisation of transport, where was no possiblity of exporting the whole, but if the productiveness of the oilfields does not increase, by next year the reserves of Baku petroleum will be exhausted. The *Ekonomicheskai Zhizn* gives some information on the output and consumption of Baku petroleum. On February 1, 1921, the Baku stocks of petroleum and its products were 3,600,000 tons. By May 1, 1922 the stocks of petroleum products should amount to 6,400,000 tons. This estimate is based on the supposition that the average monthly output will be 213,000 tons.

The expenditure for the same period will be as follows:—(a) 853,000 tons for Transcausasia and Turkestan; (b) 82,000 tons for exports through Batoum; (c) 2,935,000 tons to be sent to the Volga for Russian home consumption. (Before the war this figure was 6,500,000 tons). The total consumption will amount to 3,870,000 tons. The balance in hand for May 1, 1922, will not exceed 2,530,000 tons i.e., will be considerably less than the quantity which will have to be taken out of the oilfields during the navigation of 1922. Even if the petroleum exports (through Batoum) were omitted from the foregoing estimate, that would make no substantial difference in the matter.

The Soviet Government proposed to use the proceeds of such exports for the purchase abroad of the technical materials required by the petroleum industry. So far the money has had to be spent on purchasing food for the petroleum workers at very high prices in Constantinople. Usually such food was bought in the Terek and Kuban territories, where this year likewise there was grain to be had, but for some reason or other the Soviet food organisations did not transport grain from these districts adjacent to the oilfields. It would be interesting to find out what will be the cost of the petroleum obtained under such conditions.

The whole of the foregoing calculation is based on the supposition that the production of petroleum will be stabilised. As has already been said at the beginning of this article, there is no doubt that the failure of this year's crops in Russia must inevitably affect the work of the Baku petroleum industry. The output of Baku oil must inevitably decline, and the Soviet Government will be unable to supply Russia even with the inconsiderable and far from adequate quantity of petroleum estimated by the programme of production. Taking into consideration that the output of coal and wood-fuel will likewise be below the estimates, it will be seen that the fuel situation will most fatally affect the whole economic life of Soviet Russia, which is already in a state of complete stagnation.

# BRITISH CONSULAR REPORTS.

## V. Roumania.

We give the following extracts from the report of Mr. Alexander Adams, Commercial Secretary, H.M. Legation, Bucharest, on economic conditions in Roumania in 1920 :—

The economic condition of Roumania at the present moment must be viewed through the veil of the disorder which has come over Europe since 1914. The effects of the war on Roumania are more apparent to the observer in the destruction of material facilities of civilization, but it is undoubted that the psychic destruction has not been less.

**The Import Trade.**

The present partial elimination of Germany and Austria from the circle of suppliers gives the United Kingdom a magnificent opportunity to redeem her past neglect of this market and to take her stand as the principal supplier of manufactured goods. With the advantage of sea transport to the Danube doorstep of Roumania the United Kingdom is able to give quicker deliveries of merchandise to Roumanian importers than are possible to-day from Germany, or even the former Austria-Hungary, which two countries formerly held that advantage. The breakdown of land transport in Central Europe has so far acted as an almost insuperable barrier to the sale of German or Austrian goods in Roumania in any large quantities, and may continue to do so, at any rate, for some years. During this time the British exporter will have every opportunity of making acquaintance with this market and of firmly establishing his goods in the favour of the ultimate consumer, but as the passage of every month brings with it an amelioration in the existing state of transportation, merchants and manufacturers interested in the future wants of this market with eighteen million customers are recommended to take steps as soon as possible to make themselves acquainted with those wants and the best means of supplying them.

In the tables of British exports to Roumania, the large increase in the value of fish is due to the shipments of herrings, more especially, made to the Danube during 1920. Previous to the war Russia was one of the main sources of supply for imports of fish, but the disturbances in that country have allowed of a wider market being now available for British catches of herrings, together with salt and dried fish of other kinds. Sardines in tins from various countries, more especially Italy and France, also form no inconsiderable item of these imports.

During 1920 imports of cotton yarns increased considerably over those for 1919. A large proportion of this cotton yarn is of the quality known as extra hard twist. It is imported principally from about half a dozen Lancashire shippers, some of whom have been in the trade for scores of years.

Cotton goods as a whole show an increase over the previous year's shipments. During 1920 competition in the lower grades of cotton goods was very keen. In the standard article known as "cabot," which is bought by Roumania in large quantities, competition came, not only from America and Italy, which might have been expected, but also from Japan. At one time during the latter half of the year Japanese cabot was cheaper than Italian, whilst Italian in its turn was cheaper than the British material. The fall in the value of the Italian lira undoubtedly gave an artificial support to Italian competition, but the purchases made from a country so far away as Japan are a much more serious matter, for, in order to ship to Roumania at prices and qualities competitive with British goods, the cost of production in Japan must be very low indeed. This attempt on the part of the Japanese manufacturers to enter the market was, however, considered as an isolated one and not likely to be repeated in consequence of the heavy freight on the goods from the Far East.

The demands of the petroleum fields caused an increase in the imports of machinery and belting during the year under review. During the year it became very difficult to sell paints and varnishes owing to the competition of cheaper goods from Vienna and Germany. An additional obstacle is met with in Roumanian manufactured goods of exceedingly low quality it is true, but apparently serving the purpose in times of stress like the present. The sale of high class varnishes sank almost to nothing, as may be deduced from the figure of twenty-six thousand pounds odd which covers this whole class of goods.

**Market for British Goods.**

Roumania offers a market for British goods in very many lines, of which the following seem to be those of most importance :— Electric dynamos and motors; fans, lamps, etc., gas and oil engines, pumps, iron pipes and tubes, razors and cutlery, tinplates, black and galvanised sheets, terneplates (roofing) brass, ironmongery, wire ropes, belting, rubber goods (machinery). *Agricultural*: Binders and reapers, threshing machines, steam ploughs, tractors. Leather goods, boots and shoes, motor tyres, rubber goloshes, coal, coke, tallow, fatty acids, sulphuric acid, sulphate of copper, chemicals, caustic soda, Fuller's earth, ammonia, palm oil, linseed oil, tea, coffee, sugar, fish (salt and cured) tinned provisions, drugs and pharmaceutical preparations, whiskey, rice (from India), paints, varnishes, colours, steam tugs, explosives (to Roumanian Government only), motor cars and lorries, sacks, woollen and worsted goods, cotton yarns and threads, linen goods, binder twine, manilla ropes, perfumery, fancy soaps.

British firms interested in the shipping of produce, such as rice and tea from India, and sugar from the West Indies, could probably develop sales in these goods in Roumania much beyond the point at which they stand at present. Direct shipments of tea and rice, less in amount than a full cargo, could be made from India by transhipment at one of the Suez Canal ports or Alexandria, whence the cargo could be carried by the Roumanian Service Maritime steamers to this country.

By the Peace Treaty the size of this country was more than doubled, so that all calculations based upon pre-war norms are likely to be somewhat beside the mark. Instead of a population of some seven and a half millions, of whom, according to Roumanian official statistics, nearly 85 per cent. were rura inhabitants, there now exists a country of about eighteen million people with a smaller percentage of rural population and several scores of populous and thriving market towns. This large town population is desirous of purchasing similar types of goods to those sold in Western Europe, and under its influence the spread of Western European modes of living is being fostered; until to-day even the peasant classes are touched by it. All the thousand and one small articles which make up the material

Digitized by Google

side of Western civilisation are coming into the hands of large masses of the Roumanian population, and this movement is gathering force every year, with the consequence that the market for all these goods is rapidly being extended. This point should be considered by British export houses wishing to open up trade with Roumania. The figures of imports into the country for the ten or fifteen years before the war show an increasing vitality, and from those of United Kingdom exports given in this report for 1920, compared with 1913, it will be seen that British goods are more than holding their own, notwithstanding deductions to be made because of the rise in prices since 1913.

**Danube Navigation.**

The number of lighters at the present time suitable for river navigation is 469, which is a reduction of 199 lighters from the pre-war number. There were 110 lighters destroyed or sunk in the Danube, and 89 were sold or taken abroad during the war period. This marked reduction on pre-war space is not only an absolute reduction as compared with the total tonnage, but also a relative reduction in the carrying capacity per year by the same lighter, as tugs and handling facilities have also decreased in number. In addition a large amount of warehouse space at Braila and other river ports has been destroyed, and until quite recently a number of lighters were in use for the pontoon bridge which was in operation across the Danube at Cernavoda. The shortage of space is therefore much greater relatively than would be presumed from the number of lighters still left.

Before the war about 60 per cent. of the grain shipments of the Danube was loaded at Sulina into sea-going steamers, but during 1920 most of the loading was done at Braila, to which port the floating elevators formerly stationed at Sulina had been brought. This course was taken to save the great expense of lightering cereals down to Sulina, notwithstanding the fact that its adoption means ordering the sea-going steamer to ascend the river to Braila. The depth of the river being insufficient for fully laden steamers of the usual type employed in the Danube trade, cargoes have to be completed at Sulina or at Constantza. The number of tugs on the river in Roumania is stated to be 58, which is a reduction of 22 tugs from pre-war times. Of these 14 were captured in 1916, and 8 were sunk during the war. The number of floating elevators employed on the river in the loading ports is 34.

Not only does the available tonnage of river craft show an absolute reduction and a relative reduction in carrying capacity per year, but at the same time the area covered by Roumanian river operations has been greatly increased by the navigable rivers of the new territory, especially the Pruth and the Dniester, whilst the river Sireth also demands lighters and tugs. This increased demand for water transport is made in face of an absolute decrease of over 30 per cent. of the pre-war capacity in lighters.

There seems to be an opportunity here for the employment of many more river craft, and although at the present moment there would probably be difficulty in selling such craft to Roumanian purchasers, yet British builders could perhaps make arrangements either to extend credit on terms, or to take an interest in navigation companies to be formed for the purpose of supplying some of the deficiency in transport.

## CZECHOSLOVAK MACHINERY EXPORTS.

M. Kolovrat, Vice-President of the Federation of Machinery Manufacturers, publishes in the Czech paper *Tribuna* the following information regarding the export of Czechoslovak machinery to Russia:—At the beginning of 1921 the chief Czechoslovak machine factories, the firms of which are Skoda, Ruston, Czech-Moravian, Laurin-Klement Kolben, Tichterle, Bacher, and Melichar amalgamated in a union for the Czechoslovak machine industry with a view to the exportation of Czechoslovak machinery to Russia. As it is impossible for the moment to contemplate extensive commercial relations with Russia, the union is concentrating its activity on the Baltic countries, Bessarabia and Volhynia. In the principal centres of these regions the Union has its representatives and agents. Excellent results have been achieved hitherto, if it is considered that these beginnings are of comparatively restricted character and the purchasing capacity of the regions in question not very extensive. There has been a specially large demand for agricultural machinery, installations for distilleries, motor pumps, etc. The Czechoslovak machine industry has thus acquired new outlets in the Baltic countries in spite of the very active competition on the part of German industry which has recently made considerable reductions in its prices.

The Government of Bombay has sanctioned a survey for a broad-gauge railway between Kurla and Bombay.

Of the three detachments of horses which Germany has to hand over to Yugoslavia, 3,299 have so far been delivered. These, together with others on the road make up the figure of 6,300 horses, which is the first contingent.

# Engineering Topics.

*By our Engineering Representative.*

## A New Welding Machine.

For some time past a series of exhaustive investigations have been made by a firm of electrical manufacturers into the conditions obtaining in connection with the welding of comparatively small metal articles, made from light sheet metal either by stamping or spinning. As a result they have now been able to place on the market a machine for seam welding the bodies of stamped kettles and similar goods, and the chief interest from an engineering standpoint is that the "spot-seam" principle has been adopted, by which is meant that the rollers between which the metal plates pass during welding do not rotate continuously but intermittently, making a series of over-lapping spot welds in rapid succession. Each spot weld is made whilst the roller is stationary, and extra pressure is applied to the roller before it moves forward, and in this way it is claimed that a much stronger weld can be made than is obtained by] use of the average Continental welding machine in which the pressure of the roller is only normal and is maintained through the operation.

One important advantage of the spot seam is that raw and unpickled metal, as ordinary black plate, can be welded without the slightest difficulty, and there appears to be little or no tendency for the scale, should such be present, to attach itself to the rollers. Certainly there is far less likelihood of this occurring than when the rollers are allowed to rotate over the metal at a welding temperature.

An examination of the machine shows that it comprises a low pressure transformer arranged to suit the voltages and frequency of the available electric supply, which should of course be of alternating current. If this is not obtainable a converter should be used, as it is necessary to get the pressure of the energy down to two volts, which is that given by the secondary coil of the transformer mentioned. There is of course no possibility of any shock to the operator at so low a potential. The welding roller or electrodes are connected to the secondary circuit, the upper one being mounted on a pivoted arm, and driven by a rachet mechanism. The lower one is fitted on a slide, and is so mounted that it can be moved from side to side by means of a hand lever. To make a weld the slide, which is locked during the actual work, is released, and the object to be welded placed in position over the lower electrode. A pedal which can be connected, and sets the machine in motion, and the removal of the foot instantly brings the machine to a stop and cuts off the current.

## Big Magnesite Deposits.

During the investigations which are in progress with a view to determining the geological character and estimating the probable mineral wealth of Manchuria, which are being undertaken by Japanese engineers, some new deposits of magnesite have been located, and both these and the known beds have been examined as closely as possible. It is stated that the deposits consist of almost pure magnesite, and that it is necessary to mix a certain percentage of iron ore with it before it can be moulded satisfactorily into bricks. These bricks are used chiefly as refractories in iron and steel furnaces where the basic process is used, and in some electric furnaces.

Already Japanese agents have secured the ownership of practically all the magnesite-bearing area, only a comparatively few square miles being left in Chinese hands. The latest report from Tokio is to the effect that valuable talc deposits run co-incident with the magnesita beds, and that exhaustive tests show this talc to be equal to the best French variety. All the deposits referred to are within a distance of 10 miles from the South Manchuria railway system.

## Power Station Developments.

Whilst much has been written within the past few years upon the desirability of generating electric power on new and more economical lines, progress in that direction has been slow and disappointing. The report which was issued in 1917 by the Coal Conservation subcommittee gave details of a colossal scheme for the supply of cheap electric power throughout the kingdom, but for various reasons which need not be discussed little or nothing of a practical nature has so far been accomplished. There is no doubt that, from the point of saving coal, the policy of erecting large power stations in place of the many small and comparatively uneconomical stations now in existence is sound, provided as the *Engineer* says, that it can be shown that the capital expenditure involved will not place the customer in a worse position than that in which he already finds himself. When the report was issued the possibility of the cost of labour and materials attaining the high level that it has reached apparently was not realised, but so far as London is concerned, at any rate, the wholesale scrapping of plant at this juncture is impracticable. On account of the present high cost of plant and mains as compared with pre-war prices proposals to abolish existing stations, and especially the largest and best managed stations, should be considered with extreme care, for it might easily happen that, although in some ways the generation of current in a small number of super stations would be beneficial, there would be no gain in the direction of supplying current at cheap rates. Instead, therefore, of shutting down all existing stations, and taking current from new capital stations, erected upon suitable sites, as was originally proposed, the tendency appears to be at the present time to retain and develop certain more or less modern stations, and gradually to shut down the remainder and to establish new capital stations as desired and as required. This proposal, it appears, has been put forward in connection with the supply of electricity to London, and the idea seems equally applicable elsewhere.

## The New "Bristol."

The new 10-seater Bristol aeroplane, which is fitted with a 450 Napier "Lion" engine appears to be of greater interest from an engineering point of view than was at first imagined. The span of the machine is 54, and the over-all length, 42 feet, the height being 11ft. As a passenger machine the weight of the machine, empty, but with water is only 3,900 lbs., so that we can easily see the total weight loaded to be under 7,000 lbs. The fuel and oil supply for a distance of 400 miles—the engine at speed will require about one gallon of petrol every four miles—will be 798 lbs., and we can take the weight of the crew as being 130 lbs. each, or 360 lbs. Eight passengers, on the same basis, will weigh 1,280 lbs., and we may estimate 400 lbs. of luggage, making a total of 6,800. As a cargo carrying machine it is estimated that the total weight would be 7,100 lbs. The efficiency of the Napier "Lion" engine is remarkably high, and the machine at full load would be able to attain a speed of 122 miles per hour at the ground level, 112 miles per hour at 5,000 and 114 miles per hour at 10,000 feet. It would only take 9 minutes to climb to 5,000 and 22 minutes to climb to 10,000 feet, a highly meritorious performance for so large an aeroplane.

The chassis is of the four-wheel type, with wheels in tandem, oil as well as elastic shock absorbers being fitted. Brakes are fitted to the rear wheels and are operated by a car type level in the pilot's cockpit. A gate is provided for the brake lever so that the brakes may be operated together or singly as desired, whilst the flying controls are operated by means of a single lever of the wheel type. All the cable pulleys are 5 inches in diameter, and the angle of incidence of the tail planes can be varied by means of a lever and quadrant fixed in a most accessible position, by means of which the machine may be trimmed under all conditions of speed and load distribution.

# Near East Markets.

## LONDON PRODUCE MARKET.

Dried Fruit.—Business is showing distinct signs of revival. Currants have been in better request. Reports of the 1921 crop are favourable, and a reduction of rates is therefore looked for. Sultanas have been a firm spot, while Figs have been in strong demand at harder rates.

Sugar.—Home refined has been in active request. West Indian crystallised has been done at 45s. to 52s. 6d. American has come to business at 60s., while white Mauritius has been done round 53s. 6d.

Coffee.—The market has been quiet and steady. Futures are:—September, 44s. 3d., December, 44s. 6d., March, 44s. 10d., May, 45s. 6d.

Oilseeds.—Indian linseed has been done at 24s., while La Plata has come to business at 21s. Rapeseed is steady with Toria at 22s. 6d., bold Ferozepore, at 21s. 9d., and Brown Cawnpore at 20s. 9d. Indian cottonseed is 11s. 9d., while Egyptian Black is 14s. 3d.

Oils.—Linseed oil has come to business at 39s., a rise of 3d. Rape oil is steady with crude at 55s. and refined at 62s. Cotton oil is firm with refined common edible at 53s., Egyptian crude at 43s. 6d., and deodorized at 50s. Turpentine is lower at 68s.

## ROUMANIA'S SURPLUS CEREALS.

(*From our own Correspondent.*)

Bucharest, August 3.

The surplus of wheat for export this year is estimated at 500,000 tons. That of barley and oats will be much larger. The maize plant is in need of rain.

## YUGOSLAV CROP PROSPECTS.

(*From our own Correspondent.*)

Zagreb, August 2.

The tobacco crop promises to be very good this year. It is estimated that the total yield will be about 13 million kilos, of which six millions comes from Macedonia, four from Bosnia and Herzegovina, two from the Voivodina and one from Dalmatia. The home consumption is about 10 millions, so there will be about three million kilos available for reserve and export.

Yugoslavia is suffering from the heat and drought that seems general in Europe. A heavy storm over Belgrade the other day produced big hail stones which damaged the vineyards, but the moisture is a blessing to the important maize crop. In Croatia there had been no rain for a long time; the temperature has been between 33 and 36 degrees C. in the shade for a long time As Zagreb is low-lying in the Save Valley, the climate is moist, and the heat has been almost unendurable in the town, with the result that people have been frequenting public places in all manner of dishabille.

## COTTON INDEX NUMBER.

The Cotton Trade Circular published last week by Mr. Frederick W. Tattersall, of Manchester, states that the general average of current cotton prices in the Manchester market is unchanged, compared with a month ago. Taking the range of prices ruling at the end of July 1914 as a basis of 100 the index number is now 174.

During the month American cotton has advanced 9 points from 125 to 134, but cloth and Egyptian yarn have declined 3 points and 6 points to 177 and 191 respectively. American yarn at 179 and Egyptian cotton at 188 remain unaltered. It is of interest to note that at the beginning of this year the general average was 229, whilst twelve months ago the figure was 574.

## LEVANT MARKET REVIEW.

We give the following extracts from the market review of the National Bank of Turkey for June :—

It has been decided that, in future, foreign importers may request that the *ad valorem* duty be applied whenever it is more advantageous than the actual tariff. The *ad valorem* 11 per cent. duty is appllicable to all merchandise of allied or neutra origin which may be imported into Constantinople by Allied subjects, as well as to all merchandise of Allied origin imported by neutral or Ottoman subjects.

The following British manufactures are insufficiently represented here : Brassware, kinema films, cheap cutlery, chinaware, clothing, fishing tackle and nets, glassware, gramophones and accessories, harness and saddlery, imitation jewelry, manures, and window glass.

Imports from the United Kingdom have decreased particularly in the Manchester goods line. Big stocks of flour from America are still coming in and fairly heavy shipments of sugar have arrived from Holland. The traffic with Batoum, consisting of transhipments, is small but fairly regular. There has not been much movement towards Bulgaria and Roumania.

**Produce.**

Flour.—Between 150-160,000 sacks arrived from America and Egypt at prices ranging from £22 to £26 per ton c.i.f. Constantinople. Exports amounted to 20-25,000 sacks to ports on the Sea of Marmora. On and after July 1st, a duty of 95 piastres per 100 kgs. will be placed on wheat flour entering Turkey. Stocks on hand are estimated at 90-100,000 sacks.

Sugar.—About 1,500 tons arrived from Holland and America at prices between £39 and £43 per ton c.i.f. Constantinople. Exports amounted to 800 tons of which 3-400 went to Roumania, the balance going to the Black Sea ports.

Rice.—500 tons arrived from Rangoon at prices between £16-18 c.i.f. Constantinople and 80-100 tons were exported to Bulgaria. During the month there have been no fresh cargoes from America and Blue Rose is very nearly unobtainable on this market. Stocks are getting low.

Coffee.—About 500 sacks were sent to Bulgaria and Thrace. There is nothing of interest to report on this market. Business is very dull. Stocks on hand are fairly heavy.

## INDIAN JUTE AND SILK.

An interesting volume on Indian jute and silk has just been published by Mr. John Murray (price 5s.) in the series of Reports of the Indian Trade Enquiry conducted at the Imperial Institute under the auspices of the Committee for India of the Institute. The first part of the volume deals with the results of an enquiry into the possibility of the increased commercial utilisation of jute and allied Indian fibres and contains three appendixes comprising, respectively, statistical tables, summary of evidence of witnesses, and a copy of a Report of the Committee of the Indian Jute Mills Association on the subject of trade after the war. India at present has a monopoly in the production of jute, and the recommendations of the Imperial Institute Committee refer chiefly to the question of keeping the trade in the fibre and its utilisation within the Empire and of improving the quality and yield.

The portion of the volume devoted to silk consists of two parts :—(1) a report on the question of the prospects of an increased utilisation of Indian silk within the Empire, and (2) a detailed statement prepared at the Imperial Institute on the silk trade of the world. The production of raw silk in India at present is insufficient to meet local needs, and large quantities of both raw silk and silk yarn are imported for use in the Indian mills. The opinion is expressed, however, that the enhanced value of Indian silk which would result from a radical improvement in its quality and standard of reeling should render it possible for the Indian product to compete successfully with Japanese and Chinese silks. The types of silk, both cultivated and wild, which are most likely to find a market in the United Kingdom are indicated.

## PROMISING SERBIAN SILK CROP.

(*From our own Correspondent.*)

Zagreb, August 9.

The silk crop from southern Serbia promises to be a good one. It is anticipated that half a million kilos of cocoons will be available for export, representing a value of seven million dinars.

## ASIA MINOR FRUIT REPORT.

Messrs. C. J. Giraud and Co., Smyrna, report as follows under date August 1.

In the report we issued on September 1, 1920, we estimated the probable result of the sultana yield for last season at 15,000-16,000 tons, and the fig production at 18,000-20,000 tons. With regard to sultanas we have been supplied by the Administration of the Ottoman Public Dept, with the results obtained based on the tithe duty actually encashed, and the yield has proved 289,000 Turkish kintals, say tons 15,890. So far as the production of figs is concerned the supplies that reached our market amounted to 103,000 loads or tons 22,600. These results closely confirm the forecasts we had made.

Shipments to the U. K. during the past season have been as follows :—

| | Boxes Sultanas | Sk/ton C/s & Boxes Figs. | Bags Natural Figs |
|---|---|---|---|
| To London .. .. | 331,904 | 7,382 | 289,328 |
| To Liverpool .. .. | 246,297 | 4,259 | 131,586 |
| Out-ports .. .. | 44,110 | 392 | 26,870 |
| Totals: | 622,311 | 12,033 | 447,784 |
| Equal to about net tons: | 8,000 | 1,800 | 5,600 |

**Crop Prospects.**

Interest now centres on the prospects for the coming season.

The rain-fall during the past winter was below normal, but fortunately, abundant spring rains compensated to a great extent for the lack of moisture in the country, and materially improved the outlook which, for a time, had appeared very unsatisfactory. During the past few weeks dry weather and occasional spells of intense heat have caused some extent of damage to the vineyards. Reports which the Administration of the Ottoman Public Dept. had received from the various centres of production towards the end of May and during the course of June, assessed the likely result of the vineyards at 720,000 kintals or say about 40,000 tons.

Owing to unfavourable atmospheric conditions, in the interval, these earlier estimates have undergone some modification and the latest figures now stand as follows (the totals in brackets representing the actual yield in 1920) :—Vourla, 90,000 kintals (48,000); Chesme, 8,000 (2,500); Sivrissar, 12,000 (6,000); Carabournou, 5,000 (4,000); Smyrna, 50,000 (29,000); Nymphio, 75,000 (59,000); Menemen, 7,000 (4,000); Magnesia, 180,000 (77,000); Cassaba, 65,000 (22,000); Salihli, 12,000 (9,000); Alacheir, 15,000 (6,000); Axar, 15,000 (6,000); Kirkagatch, 10,000 (4,500); Soma, 2,000; Pergamos, 6,000 (4,000); Phocea, 10,000 (4,500); Scalanova, 1,000; Sundry districts, 5000, (3,500).—568,000 kintals (289,000). Say about 31,000 tons, against 15,890 tons.

The above estimates are based on the latest and most conservative figures received from the respective districts. Then yield practically, as a whole, may be reckoned on present showing as likely somewhat to exceed that obtained in the season of 1919 when the final result was slightly over 29,000 tons. Reports from the Meander Valley are favourable, and it is anticipated that at least 100,000 loads, or about 22,000 tons of figs will be available this autumn. All the principal fruit producing areas are situated in the Hermus and Meander valleys, and are now entirely under Greek occupation. Although labour and transport difficulties may, in the earlier stages of the season, retard the flow of supplies, there is no concern about the eventual gathering and drying of all the fruit that will reach maturity. Some rains have been reported since yesterday, and the cold damp weather prevailing is beneficial to both vineyards and fig orchards.

The director of State Monopolies in Yugoslavia has authorized 60 farmers to cultivate tobacco within the Department of Tselye.

## CURRENT PRICES.

*General Produce.*—Bacon (Continental), 200s. cwt.; bacon (Canadian), 160s. cwt.; bacon (American), 130s. cwt.; butter (Danish), 260s. cwt.; butter (Australian), 230s. cwt.; butter (New Zealand), 260s. cwt.; cheese (Canadian), 134s. cwt.; cheese (New Zealand), 134s. cwt.; cheese (Australian), 125s. cwt.; lard, 92s. cwt.; chillies, 145s. cwt.; eggs (Danish), 28s. per 120; eggs (Syrian), 20s. 6d. per 120; cloves (Zanzibar), 1s. 3d. lb.; cocoa (Ceylon, good to fine), 77s. cwt.; coffee (Costa Rica), 137s. cwt.; coffee (East India bold), 122s. cwt.; coffee (Central American), 117s. cwt.; coffee (Jamaica), 60s. cwt.; coffee (Mocha longberry), 104s. cwt.; coffee (Santos superior), 60s. cwt.; ginger (washed Cochin), 35s. cwt.; nutmegs (110's to 80's), 11d. lb.; pepper (Singapore black), 4d. lb.; pepper (Muntok white,) 9d. lb.; raisins (Valencia), 85s. cwt.; raisins (Sultana, Smyrna), 86s. cwt.; currants (Vostizza), 92s. cwt.; sugar (granulated), 61s. cwt.; sugar (No. 1 cubes), 65s. cwt.; sugar (white Mauritius), 54s. cwt.; sugar (West Indian crystallized), 48s. cwt.; sugar (centrifugal), 21s. cwt.; tapioca (fair Singapore), 2d. lb.; sago (small pearl), 26s. cwt.; sago flour, 18s. cwt.; rice (Rangoon, No. 2), 24s. cwt., rice (bran Rangoon), £9 ton; cinnamon (firsts), 1s. 4d. lb.; mace (fair Singapore), 1s. 2d. lb.; tea (Indian common to good common), 8d. lb.; (medium to good) 1s. 2d. lb. (fine to finest), 2s. 3d. lb.; tea (Ceylon, common to good common), 8d. lb.; (medium to good), 1s. 3d. lb.; (fine to finest), 2s. lb.; tea (Java, common to good common), 4d. lb.; wheat (Australian), 77s. cwt.; wheat (English white), 71s. cwt.; wheat (La Plata), 80s. cwt.; barley (malting), 67s. cwt.; oats (English), 46s. cwt.; oats (La Plata), 32s. cwt.; maize (La Plata), 45s. cwt.; maize (American), 42s. cwt.; flour, 60s. sack.

*Metals.*—Aluminium, £150 ton; antimony (English Regulus), £40 ton; bismuth, 7s. 6d. lb.; copper (standard), £70 5s. ton; copper (electro), £75 ton; gold bars, 114s. 2d. lb.; iron (No. 3 Cleveland), 137s. ton; hematite (mixed number), 160s. ton; galvanized sheets (24G), £22 5s. ton; lead (soft foreign), £23 15s. ton; manganese Poti, 1s. 2d. unit; molybdenite, 44s. unit nickel, £190 ton; platinum, 365s. oz.; plumbago, £20 ton;; quicksilver, £11 bottle; silver bars, 38d. oz.; spelter (G.O.B.), £26 ton; tin (standard), £159 7s. 6d. ton; tin plates (20 by 14), 27s. box; wolfram, 13s. unit; zinc sheets, £35 10s. ton.

*Chemicals.*—Acids: Boric, 71s. cwt.; oxalic, 9d. lb.; citric, 2s. 4d. lb.; tartaric, 1s. 5d. lb; ammonia (sulphate), £13 ton; arsenic (white powdered), £42 ton; benzole (standard), 2s. 8d. gallon; bleaching powder (35 per cent.), £17.ton; borax crystals, 34s. 6d. cwt.; cream of tartar, 136s. cwt.; Potassium: Bichromate, 10d. lb.; chlorate, 5d. lb.; caustic, £35 ton; nitrate, £53 ton; permanganate, 1s. 3d. lb.; prussiate yellow, 1s. 3d. lb.; sulphate (90 per cent.), £19 ton; Sodium: Crystals, 141s. ton; bi-carbonate, £12 10s. ton; bi-chromate, 6d. lb.; alkali (58 per cent.), £9 12s. ton; chlorate, 4d. lb.; caustic (70 per cent.), £22 10s. ton; hyposulphite, £20 ton; prussiate, 7d. lb.; nitrate, £18 10s. ton; glycerine (crude 80 per cent.), £106 ton; glycerine (industrial 1260 per cent.), £120 ton; lemon oil, 3s. 5d. lb.; quinine, 4s. oz.; red lead, £39 15s. ton; white dry lead, £42 12s. 6d. ton; white ground lead, £53 ton; sulphate of copper, £30 ton; sulphate of iron, 45s.on.

*Hides and Skins.*—Ox and Heifer (first), 90 lbs. and up, 10d lb.; 80 to 89 lbs. 10d. lb.; 70 to 79 lbs., 10d. lb.; 60 to 69 lbs. 10d. lb.; 59 lbs. and under, 8d. lb. (second); 90 lbs. and up, 9d. lb.; 80 to 89 lbs. 9d. lb.; 70 to 79 lbs. 9d. lb.; 60 to 69 lbs., 8d. lb.; 59 lbs. and under, 6d. lb.; Cows (first), 60 lbs. and up, 7d. lb.; 59 lbs. and under, 7d. lb. (second), 60 lbs. and up, 5d. lb.; 59 lbs. and up, 5d. lb.; bulls (first), 5d. lb. (second), 4d. lb.; Kips (first), 6d. lb. (second), 5d. lb.; (third), 3d. lb. Calcutta Market. Prices in rupees per 20 lb.:—Arsenic hides (cows): Agras, 8 to 13.8.; Durbhangas, 6 to 7; Patnas, 5 to 6. Salted cows: 3 to 6. Arsenic hides (buffalo): 3 to 7. Skins: Calf 8 to 10 per 20 lb.; goat, 250 to 275 per 100 pieces.

*Miscellaneous.*—Cotton (American), 8.94d. lb.; cotton (Egyptian). 15.00d. lb.; linseed (La Plata), £22 ton; rape (Toria), £22 10s. ton; soya beans, £16 12s. 6d. ton; palm kernels, £24 ton; Oils: linseed, £39 ton; olive (Levant), £82 ton; palm, £37 10s. ton; rape (crude), £55 10s. ton; soya, £42 10s. ton; petroleum, 1s. 10d. gallon; turpentine, 80s. 6d. cwt.; ground nut, £46 ton; cotton (crude), £42 10s. ton; coconut (Ceylon), £53 5s. ton; shellac (T.N. second orange), 295s. cwt.; shellac (A.C. garnet), 287s. 6d. cwt.; Rubber: Plantation No. 1 crepe, 9d. lb.; smoked sheet, 9d. lb.; fine hard Para, 11d. lb.

It is proposed to form a French Chamber of Commerce in Bombay with a view to the promotion of trade between France and Western India and the Persian Gulf.

It is announced that the personnel at the Varna Custom House is shortly to be increased, with the result that not more than three or four days' delay should elapse for the future in clearing goods.

# COTTON & COTTON GOODS.

## MANCHESTER REPORT.

Manchester, Saturday.

No feature of importance has presented itself in connection with this market during the past week and a very quiet state of affairs has prevailed. Cloth demand from most of the outlets abroad has proved very disappointing, and there has been nothing to stimulate buyers' to operate on a more active scale. There has been no faith in current rates, and many shippers hold the view that lower prices will eventually prevail in the near future. The strength displayed in raw cotton circles has in no way helped business in this market. With regard to cloth inquiry for Egypt not many cables have been received and sales on the whole have only been within a restricted compass. Not much business has been about for Constantinople and the Levant. In the yarn section Egyptian spinnings have been rather irregular in quotation with a tendency to ease somewhat. Buyers for home use have bought sparingly. The cloth demand for India has been very disappointing and only a few minor transactions have occurred. The Gandhi agitation is still causing a great deal of uneasiness. No developments have taken place with regard to China and only small sales in greys and whites have been mentioned with the exception of one fairly large transaction in a well known make of shirtings. South America still lags behind, but the position out there is said to be improving. Prices for American yarns have been a little easier with only a small offtake. There has been a decided falling off in demand for export numbers. Taking the market as a whole the position at the moment is rather gloomy but there are hopes that before very long a period of greater activity will prevail.

**Smaller Lancashire Dividends.**

A table of the stocktaking results declared during the past month by well known Lancashire cotton companies is given in the monthly cotton trade circular issued this week by Mr. Frederick W. Tattersall, of Manchester, and an analysis of the announcements confirms the reports of the lean times through which nearly all concerns have recently passed. The review relates to 59 mills where the spinning of cotton yarn only is carried on, and the total paid up ordinary share capital is £7,054,750. For the quarter ended July thirty-nine concerns have not been able to make a distribution to shareholders, two have paid a dividend of 5 per cent annum, ten per cent. per annum, one 13 1-3 per cent. per annum, six 20 per cent. per annum,and one 26 2-3 per cent per annum. The average dividend per company works out at 4.58 per cent. per annum, and for the previous three months trading the same 49 companies made an average distribution of 6.78 per cent. per annum.

## Liverpool Report.

Messrs. Reynolds and Gibson report as follows for the week ended August 4 :—In comparison to the prices demanded for similar qualities in Egypt, our market continues to be the more attractive to buyers, and the turnover has been maintained at about the total of recent weeks, the sales amounting to 1,500 bales (including 120 Sudan), against 1,600 in our last report. Prices continue to be irregular, especially in the medium grades of Sakel, of which quality the major portion of the turnover consists, and generally sellers find themselves unable to obtain the benefit of the higher quotations. The demand is not of sufficient weight to absorb the holding of those anxious to liquidate, and at present buyers are well advised to ascertain at what price they can obtain their cotton on the spot here before purchasing overseas, as there are undoubted bargains in certain qualities. Brown cotton has been in slightly better request, and in some cases has been taken by regular buyers of "extra Uppers," which at the moment appear rather prohibitive in price Egypt sends some cheap c.i.f. offers for the medium and lower grades of Uppers. We are rather inclined to the opinion that the present is a favourable opportunity for users in the above to cover themselves, certainly, in comparison to American cotton, the basis appears very reasonable. Quotations for all grades and qualities are raised 50 points in the week.

The traffic receipts of the Suez Canal from August 5 to August 11 amounted to 2,240,000 francs against 3.130,000 francs for the corresponding period of last year.

## TOBACCO HARVEST IN YUGOSLAVIA.

The Commercial Secretary to H.M. Legation at Belgrade (Captain F. Murray Harvey) in a report to the Department of Overseas Trade quotes the Belgrade journal *Politika* of August 1 as stating that this year's tobacco crop in Yugoslavia promises to be exceptionally good. Certain regions, Macedonia for example, have suffered from hail but the drought generally experienced has favoured the cultivation of tobacco. It is predicted that this year's crop will be about 13,000,000 kilogrammes, as follows:—Serbia and Macedonia, 6,000,000; Bosnia and Herzegovina, 4,000,000; Vojvodina, 2,000,000; Dalmatia, 1,000,000.

The *Politika* adds that this quantity will not only be able to satisfy the normal consumption of the country, but will enable stocks to be held in reserve as the normal requirements for consumption in Yugoslavia are about 10,000,000 kilos per annum. It will be possible after forming reserves for a considerable quantity to be exported. An improvement of the quality of Yugoslavian tobacco will result from the installation of a large number of storing sheds in Macedonia, thus permitting of the proper sorting of the crop.

## SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank.

Mamouret-ul-Aziz.

The report for June states:— A number of local merchants have left for Constantinople to obtain articles for winter. Those of Malatia more numerous, who have not been able to obtain locally all the paper they require have arrived here to purchase by cheque for a total amount of £T100,000, which has temporarily brought about a fall in gold.

Some traders, who went away some time ago, are on their return from Samsoun; but they are unable to purvey their goods because of the lack of means of transport. In winter the cost of transport of one batman (about 7½ kilos) of goods from Samsoun to Mamouret-ul-Aziz is 200 to 240 piastres. It fell to 150, but to-day is 250 with a tendency to rise.

The sales of dry cocoons in the course of the month registered by the Ottoman Public Dept, amount to 3938 kilos at a mean price of Ps. 88 per kilo. The silk is utilised for the manufacture of local stuffs, especially at Diarbekir. The grains produced in the country are sold chiefly to Baghdad and Persia. At present, because of the interrupted communications with these countries local producers are seeking purchasers.

## OIL IN ALBANIA.

Reuter's Athens correspondent in a message dated August 14, states that a telegram from Yanina (Southern Albania) says that explorations for oil springs have given satisfactory results. Eighteen wells have been bored in the region of Dragotza and are yielding a rich oil comparable in quality to the Baku product.

## GREECE'S CHEESE PRODUCTION.

The cheese production of Greece for 1920-21 is 30 per cent. less than for 1919-20 on account of lack of pasture, the winter having been mild and snowfall insufficient (says an American consular report). The production of cheese has been: Casseri cheese, 4,252,250 pounds in 1920, and 2,962,575 pounds in 1921; macaroni cheese, 9,875,250 pounds in 1920, and 6,912,675 pounds in 1921; cheese sliced in brine, 8,464,500 pounds in 1920 and 4,937,625 pounds in 1921.

## ON 'CHANGE.

### Markets still Inactive.

*(From our own Correspomdent.)*

London, Monday.

There is little change to record in the markets this week. Business has been very restricted, but there have been no price movements of any great significance.

The gilt-edged group has been rather dull. Consols are 48¼, a decline of 7-8, while Fundings are 1-8 down at 71,3-8. War Loan Fives have continued a firm spot, and are 1-16 up at 88 1-8.

An inactive tone has prevailed in the industrial group. Shipping shares have been rather better, P. and O. Deferred being 350.

Banks have provided one of the best features of the week, a number of the leading descriptions being in strong request. P and O. Banking Corporations went up considerably early in the week, but close below the best at 11 11-16. Imperial Ottoman Banks are 7¾, while National Bank of Egypt are 19 1-8. Agricultural 3½ per cent. Bonds are 52, and Agricultural 3½ per cent. Guaranteed bonds are 55.

Oil shares have been dull, Anglo-Egyptian being 1 15-32, Roumanian Consolidated 10s. Steaua Romana 12s. 6d., and Burmahs, 5,11-16. Stagnation describes the position in the rubber markets, and there are no indications at the present time of any improvement.

In Near East securities Egyptian Guaranteed 3 per cent. are 68, Greek Guaranteed 2½ per cent. to 98 and 68, and Turkish Guaranteed 4 per cent 1855 are 69.

In Greek shares the 5 per cent. 1881 Loan is 43, while the 5 per cent. 1884 is 42. The 5 per cent. 1890 is 41, while Fundings are 40. The 4 per cent. 1910 Loan is 31, while the 4 per cent. 1902 Loan is 33. The 5 per cent 1914 Loan is 43.

In Land shares Beheras are 8¾, while the Preference are 3 1-8. Anglo-Egyptian Land Allotments are 3, while Egyptian Consolidated Lands are 1s. 6d. Egyptian Delta Lands are 8s. 3d., Gharbieh Lands are 1¼, New Egyptians are 23s. 6d. Union Foncieres are 2,5-16, while Soudan Plantations are 2¾.

## INDIAN INTELLIGENCE.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dated August 4:—From July 31, to August 21 storm from Bay caused heavy rain in Sind, Gujarat, Rajputana, and Baluchistan. August 2, monsoon also strengthened in Peninsula. August 3, strengthened in Central Provinces. Bombay cotton arrivals from September 1, to July 29, were 2,748,000 bales, as compared with 3,317,000 during the corresponding period of the last year. Calcutta gunny market for week ending August 2 :—Hessians quiet ; heavy goods very firm with rapid advance in prices for qualities in demand. Market closes firm. Rangoon rice market August 1—Rs. 577½ ; August 2—steady at Rs. 580. Paddy firm at Rs. 235. Government of India has allotted 25,000 tons rice for Ceylon, 15,000 tons for Straits, 10,000 tons for Mauritius, against which Licences will now issue.

The traffic receipts of the Smyrna-Aidin Railway for the week ended July 30, amounted to £7,257.

The traffic receipts of the Egyptian Delta Light Railways for the week ended July 20 amounted to £E9,454 ; total for year, £E98,520. For the corresponding period of last year receipts amounted to £E12,784 ; total for year £E128,921.

## ALEXANDRIA EXCHANGE.

*Supplied by G. L. Mortera, Alexandria and Cairo.*

Prices on July 29 were as follows :—Agricultural Bank of Egypt, 4½ ; Alexandria Water Co., Ltd., £6¾ ; Anglo-American Nile Steam, £2½ ; Associated Cotton Ginners, 13-16 ; Banque d'Orient, Fr., 57 ; Behera Ord., £E 8¾ ; Brasseries d'Egypte, Fr., 78 ; Building Lands of Egypt, £5-8 ; Cassi di Sconto, Priv. Fr. 94½ ; Ciments d'Egypte Priv., Fr., 35 ; Ciments d'Egypte Div., Fr., 23 ; Comptoir Fin. et Com. d'Egypte, £1 ; Consolidated Land, Pt., 5 ; Credit Foncier Fondateur, Fr. 810 ex. ; Credit Foncier Egyptien, Fr. 634 ; Credit Foncier, 1886 Oblig., Fr, 320½ ; 1903 Oblig., Fr.. 223, Credit Foncier 1911 Oblig., 226, Crown Brewery Priv., Fr. 162 ; Crown Brewery Div., Fr. 130 ; Eaux du Caire Capital, Fr., 78. ; Eaux du Caire, Jouissance. ## COMPANY NOTES AND REPORTS.

**Bengal-Nagpur Railway.**

The interim report of the Company states that actual returns for the year ended March 31st 1921 have not yet been received but the company's share of surplus profits, Rs6,56,701 has been duly paid to company's credit by the Government of India. Owing to the prevailing rate of exchange the directors have thought it inadvisable to transfer it to England at present. The Board has declared an interim dividend in respect of the half-year at the rate of 15s. per £100 Ordinary stock and bonus of 10 per cent., payable July 1, making together with guaranteed interest £3 per £100 Ordinary stock, tax being deducted from interim dividend and bonus at 4s. 9d. in £ and from guaranteed interest at 6s. in £. Balance of undivided surplus (including accrued interest on investments, but excluding depreciation of securities in excess of £25,000) available on July 1, is estimated at £228 700, after providing for present interim dividend and bonus.

## CZECHOSLOVAKIA ELECTRIFICATION SCHEME.

A scheme involving the contruction of a barrage 70 metres in height at Stchovice, near Prague, has been submitted to the Minister of Public Works. This barrage, situated 30 kilometres south of Prague would produce over 250 million kilo-watt-hours a year, and would save Czechoslovakia, 60,000 waggons of coal. The realisation of this scheme would cost from 250 to 300 million crowns. All organisations concerned in Central Bohemia, notably the Chamber of Commerce at Prague, the Agricultural Board, the Federation of Czechoslovak Industries, support the project, which has attracted the attention of many foreign engineers and financiers. The electrification of Central Bohemia and the improvement of the Vitava as a waterway will completely alter the economic situation of that region.

It is reported that all imports into Bulgaria, from whatever country are subject to the " General " rates of Customs and other duties which were brought into force on August 9, until new commercial treaties have been concluded.

# SHIPPING INTELLIGENCE

## SUEZ CANAL TRAFFIC.

A White Paper issued last week gives particulars of the shipping and tonnage passing through the Suez Canal in 1919. The total number of transits was 3,986, and the net tonnage was 16,013,802, 2,679 of the vessels were British, their net tonnage being 11,355, 067. Japan came second with 438 vessels of a net tonnage of 1,449,839, and Holland third with 181 vessels, and a net tonnage of 754,517. Of the total shipping 2,068 were merchant vessels, 1,351 of them being British with a net tonnage of 6,109,721, while Japan, again second, was represented by 283 vessels of a net tonnage of 934,545. The total receipts for the year amounted to 144,983,678 francs. The mean duration of the passage of vessels, after deduction of delays caused by naval and military requirements, was 16 hours 4 minutes.

527,502 passengers went through the canal, 311,406 being outward and 216,096 homeward bound. Of the total 278,530 were British, and of the remainder 102,717 were French. Five hundred and ninety-six vessels made the passage for the first time, of which 95 were under Government charter and 164 belonged to shipping lines, which have sent a traffic of not less than 90,000 tons through the canal during the year.

## DISTRIBUTION OF THE DANUBE FLEET.

A communique issued by the Czechoslovak Bureau of Information regarding the arrival of shipping to Czechoslovakia states :—Czechoslovakia will receive 3 passenger vessels, 7 tug boats and 116 cargo boats. The passenger vessels will be delivered by the Danube Navigation Company, the tugs and cargo boats by the South German Navigation Company, the Hungarian Danube Navigation Company and the "Atlantik" Company. The former of these companies will supply Czechoslovakia with 2 passenger vessels of 360 horse-power each (the "Agstein" and "Wachau,") which will ply between Parkany and Bratislava, and a vessel of 710 horse-power (the "Wien"), which hitherto plied between Vienna and Budapest. The South German Navigation Company will supply 5 tug boats (the "Wien" 850 horse-power, "Munchen" 600 horse-power, "Bayern" 500 horse-power, "Irene" 350 horse-power, "Wittelsbach" 500 horse-power). The Hungarian Danube Navigation Company will supply Czechoslovakia with its largest tug boat, the "Magyar Orszag," 1,200 horse-power, while the "Atlantik" Company will supply the tug boat "Beatars," 450 horse-power, this making a total of 5,886 horse-power in place of 4,000 horse-power granted. Out of the 116 cargo boats, the South German Navigation Company will supply 52, the remainder being delivered by the three other companies.

## INFORMATION ON ROUMANIAN PORTS.

The Commercial Attaché of the Roumanian Legation in London has notified the Department of Overseas Trade that the Chambers of Commerce at Braila, Galatz, and Constantza have signified their willingness to supply by letter or cable any kind of information required by British shippers and shipowners as to the conditions at those ports with regard to loading and unloading facilities.

## FORTHCOMING SAILINGS.

*The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses :—*

*Anchor Line.*—S.s. Castalia for Bombay (Liverpool, September 8).

*Anchor-Brocklebank Line.*—S.s. Malancha for Calcutta (Birkenhead, August 27); s.s. Malakuta for Port Said, Colombo, Madras and Calcutta (London, August 27); s.s. Manipur for Calcutta (Birkenhead, September 8); s.s. Stockwell for Port Said, Colombo, Madras and Calcutta (London, September 14).

*Bibby Line.*—S.s. Leicestershire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, August 31).

*Clan Line.*—S.s. Clan Mackenzie for Bombay and Persian Gulf (Birkenhead, August 18); s.s. Clan Macbride for Colombo, Madras and Calcutta (Birkenhead, August 25).

*Cunard Line.*—S.s. Cypria for Gibraltar, Algiers, Malta, Piraeus, Patras, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, and Sulina (Liverpool, August 20).

*Ellerman Line.*—S.s. Belgravian for Gibraltar, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, September 3).

*Ellerman's "City" Line.*—S.s. Lorenzo for Bombay and Karachi (Birkenhead, August 26); s.s. City of Cairo for Calcutta (Birkenhead, September 6).

*Ellerman's "Hall" Line.*—S.s. City of London for Bombay, Karachi and the Punjab (Liverpool, August 31).

*Ellerman's Westcott and Laurance Line.*—Steamers sail fortnightly for Mediterranean, Egypt and Levant ports.

*Glen Line.*—S.s. Pembrokeshire for Port Said, Port Swettenham, Singapore, etc. (London, August 25); s.s. Gleniffer for Port Said, Port Swettenham Singapore, etc. (London, September 22).

*Glynn Line.*—S.s. Ravenspoint for Genoa, Leghorn, Naples, Catania, Messina, and Palermo (Liverpool, August 26).

*Harrison Line.*—S.s. Craftsman for Calcutta (Liverpool, August 27).

*Henderson Line.*—S.s. Burma for Port Said and Rangoon (Birkenhead, August 24); s.s. Martaban for Port Said, and Rangoon (Birkenhead, September 6).

*Holt Line.*—S.s. Tydeus for Port Said, Port Swettenham, Singapore, etc. (Glasgow, August 25); s.s. Hector for Port Said, Port Swettenham, Singapore, etc. (Glasgow, August 25); s.s. Machaon for Port Said, Port Swettenham, Singapore, etc. (Swansea, September 2).

*Johnston Line.*—S.s. Aviemore for Piraeus, Volo, Salonika, Bourgas, Varna, Constantza, Sulina, Galatz and Braila (Liverpool, August 20); s.s. Venice for Piraeus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, August 27).

*Maindy Line.*—S.s. Maindy Tower for Antwerp and Moroccan Ports (London, end of August).

*Moss Line.*—S.s. Limoges for Casablanca, Gibraltar, Malta, Haifa, Beyrout and Cyprus (Liverpool, August 25); s.s. Assiout for Gibraltar, Algiers, Malta, and Alexandria, (Liverpool, September 3).

*Papayanni Line.*—S.s. Serbino for Tangier, Algiers, Malta and Alexandria (taking cargo for Beyrout, Alexandretta, Haifa, Mersina, Jaffa, Port Said, Cyprus, etc.) (Liverpool, August 23).

*P. and O. Line.*—S.s. Soudan for Bombay (London, August 19); s.s. Kashgar for Bombay, Colombo, Madras, and Calcutta (London, August 26); s.s. Nore for Colombo, Madras, and Calcutta (London, September 9); s.s. Morea for Bombay (London, September 9).

*P. and O. British Line.*—S.s. Hatarana for Bombay and Karachi (London, September 3); s.s. Nardana for Colombo, Madras, and Calcutta (London, September 3); s.s. Mundra for Colombo, Madras, and Calcutta (London, September 17); s.s. Mandala for Bombay and Karachi (London, September 23); s.s. Nevasa for Bombay and Karachi (London, October 7).

**Three vessels of the British Danube Flotilla, which has been paying an official visit to Belgrade, arrived at Budapest on July 27, on their way to Vienna. The members of the crews were received by the local officials.**

## NOTES OF THE WEEK.

### *The Asia Minor War.*

The Greek advance on a semi-circular front, some eighty miles in extent, had reached a point within fifty miles of Angora before encountering any serious resistance. A battle on the River Sakaria is reported to be in progress as we go to press, and on the right wing the Greeks announce an important success. The Turkish centre still holds, but if the battle goes against the Turks Mustapha Kemal's chances of offering any serious defence of his capital must be dwindling. The difficulties of King Constantine's army increase each day, but it is obviously well in its fighting stride, and a swift stroke may bring it valuable booty at the Angora terminus in the form of needed rolling stock. Speculation as to the future course of events is at this stage altogether idle, as it is not known to what extent Mustapha Kemal in defeat will be able to claim to speak for Nationalist Turkey, or whether he will be reduced to be a mere chieftain of guerilla warfare. It would suit both Greece and the Allies better if there remained in Asia Minor some recognised authority capable of entering into negotiations in a chastened and reasonable frame of mind. Mustapha Kemal failed to seize the opportunity offered him, and it is at least problematical whether he will be given a second chance.

### *The Allies and King Constantine.*

Whatever form the ultimate settlement of Asia Minor may take, Greece has gained a priceless possession which we may hope will never be taken away from her again. She has achieved once more national unity under King Constantine. No good purpose can be served by ignoring the facts. M. Venizelos may have stood head and shoulders above his generation ; he saved Greece from herself in 1910 and rendered possible the Balkan victory over Turkey ; his services to his country in the Great War and after the Armistice seemed to make him still more Greece's greatest benefactor, but their immediate result was to divide the whole Hellenic world into two bitterly hostile camps. The price paid for his successes proved too high. A country's interests should always rank above any question of personalities, and in acclaiming the national unity which the Greeks will have regained with their victories in Asia Minor there is no desire to detract from the lustre associated with M. Venizelos's name or to invest King Constantine with merit that does not belong to him. He will probably be the first to realise that such greatness as is his up to this point has been thrust upon him as the outcome of a loyal nation's devotion. His capacity for constructive statesmanship has yet to be shown. But at least he has shamed the Allies out of an attitude which did rank injustice to a whole people in gratification of petty personal spite, and this passive achievement may yet bring more real happiness to Greece than the victories against Mustapha Kemal's forces.

### *Greece's Status.*

By doing nothing at this juncture in regard to the Greco-Turkish question the Supreme Council may be congratulating itself that it follows the line of least resistance, in the knowledge that, as soon as such a policy becomes impossible, it can shuffle off its responsibility on to the Council of the League of Nations, as in the case of Silesia. Each day, however, that sees a decision on the subject shirked brings fresh complications. The British Prime Minister is authority for the statement that the treaty of Sèvres has been torn up by the Allies ; but it is doubtful whether the latter will welcome Greece's intervention in scattering the scraps of the torn treaty to the four winds. The Greeks went to Smyrna on the instructions of the Allies ; they reopened hostilities against the Nationalists on their own authority, and it is on the same authority that they are now extending their administration over all the conquered parts of Asia Minor. As there must be an administrative authority recognised in these regions, the step may be inevitable, but unless it is taken on a clear understanding previously reached, the final liquidation of the position is bound to be rendered more difficult. M. Stratos, probably the shrewdest politician now in Greece, has put the whole issue in a nut-shell by blaming the Greek Government for not obtaining a definite answer from the Entente Powers to the question whether Greece had ceased to be an ally or not. The Supreme Council has been glad enough to burke the question, in order that it might " save the face " of its members by regarding itself as a neutral towards King Constantine, while retaining M. Venizelos, an unofficial Hellene, within the Alliance. The resumption of rational relations with Greece is an indispensable preliminary to a satisfactory settlement of the Greco-Turkish question.

### *Albania's Appeal.*

After being passed on to the Ambassadors' Conference for the settlement of her boundaries, Albania has again appealed as a member of the League of Nations to the Council of that body with regard to alleged aggressions on

Digitized by Google

the part of Yugoslavia (or rather the Serbians) on her northern frontier. The subject was referred to in our Albanian correspondence last week, and if a tithe of the Albanian allegations are true, both the Supreme Council and the League of Nations will be incurring a grave risk in postponing a strict investigation of the matter. It would have been thought that the statesmen constituting the former body would have already realized what a poor figure they are likely to cut in the judgment of future generations as a result of their handling of the Near Eastern question as a whole; but their attitude towards Albania has been even more cynical than that which they have adopted towards other details of a complex problem. It is indeed worse than the abandonment of Montenegro, in regard to which they may possibly plead inability in the stress of war and amid a conflict of asseveration to arrive at the true facts. No such plea holds good in regard to Albania. Not the least ominous feature is the alleged reappearance of the Black Hand Society which is said to have played such a prominent part in the crusade, extending over a score of years, against Montenegro. When allegations and counter-allegations are bandied about in the Balkans the wise man takes no sides without sufficient evidence. But in the interests of the general peace of the Peninsula it is imperative that the anomalous state of affairs on the Serbo-Albanian frontier should not be allowed to continue indefinitely.

### *King Feisal*

The overwhelming vote in Mesopotamia (96 per cent. in an electorate of "about one million") in favour of the candidature of the Emir Feisal for the rulership confirms official expectations and incidentally offers a good augury of a comparatively peaceful life for the new monarch. With the ceremony in connection with King Feisal's accession, which took place on August 23, a new Arab State comes into existence. Its designation as a democratic constitutional monarchy introduces a new conception into the Arab world, but events since the Armistice will have familiarised, if not all the dwellers in Mesopotamia, at least a considerable proportion of them with the part they will be expected to play in the Kingdom of Irak. For the rest, King Feisal appears already to have won over the Sheikhs whose attitude until his arrival was problematical, and is apparently more acceptable to the desert tribesmen as a whole than any local candidate would have been. It will be Irak's fault rather than his, in all probability, if his reign is not a success.

### *Turkish Intrigue.*

"A minor outbreak of disorder" is reported in Mesopotamia, and so far there is no ground for challenging this description of the fresh trouble. On July 31, according to the Colonial Office statement, a post of Arab police at Batas (63 miles E. N. E. of Mosul) was suddenly attacked by a body of Kurdish outlaws, stiffened by a number of Turkish soldiers, and surrendered. A few days later a detachment of Turks took possession of Rowanduz, the chief town in the immediate district, on the road from Mosul to Urmiah. Air attacks failed to dislodge the tribesmen, and it has been found necessary to send a column to demonstrate in the unsettled area. Unless the movement spreads, there is no need to dignify the outbreak as a new "revolt." It has been recognised all along, and was insisted upon by Mr. Churchill in his speech to the House of Commons that the tranquillity of Mesopotamia was dependent upon a working agreement with Nationalist Turkey. So long as Nationalists are pleased to consider Great Britain as their arch-enemy they have it in their power to foment disturbances in Mesopotamia. The remedy is not to scuttle from that country, and thereby enable the Turks to extend the sphere of their hostile activities to a region where they would be more dangerous, but to remove the injustices that the Treaty of Sèvres seeks to impose upon Turkish aspirations. It is not to be supposed that the Turks will now be over anxious to meet us half-way in this matter. The difficulties experienced will be the price to be paid for past mistakes.

### *British Representations in the Near East.*

The fact that within three years Great Britain will have had four different representatives at the Legation in Sofia justifies an appeal to the Board responsible for Diplomatic appointments to revise its estimate of Near Eastern posts in the scale of Imperial importance. Such frequent changes anywhere are liable to be prejudicial to British interests; in the Balkans at the present juncture they are particularly so. The time has come when South Eastern Europe should be regarded from the point of view of British interests as a single political entity. Separate representation is required in the various capitals, but if the importance of the Balkan countries as a whole in their relation to the scheme of the British Empire is appreciated, it will be realised how important it is that British representation there should be best available, of a specialist type and correlated. By the latter term we mean that the representatives should be encouraged to regard their work as dovetailing into a compact whole; with a common policy aiming at bringing the different countries together and composing their differences, there is as much need for frequent exchanges of views among themselves as for regular communications to and from Downing Street. The constructive work that British representatives in the Balkans will have it in their power to perform in the coming years will be invaluable to the Empire; but it will not be done, if they are led to suppose that their appointment is merely a matter of routine, to which the rule of "the less heard of you the better" applies still. With the frequent changes at Sofia may be compared the retention at Athens after the restoration of King Constantine of a Minister whose appointment is supposed to have been asked for by M. Venizelos. Better work has never been done in Greece than by Lord Granville, and if official relations with the Court could have been resumed at once, the old closeness of touch between the Palace and the British Legation, which the Earl and Countess Granville could have been relied upon to restore, would have served the interests of both countries. As things are, it must seem in Greece that the British Government has gone beyond subservience to an Ally's pique by indulging in pin-pricks herself.

### *The Indian Cotton Duties.*

Mr. Montagu's reply to the deputation from Lancashire which waited on him last week showed no weakening of his attitude towards the Indian duties on imported cotton-goods. Interference from this side was, he declared, absolutely impossible, and, if Manchester was suffering, the right thing to do was to apply to India for redress, a course which, by the way, has already been accepted in principle by the Manchester

Digitized by Google

Chamber of Commerce The Indian Fiscal Commission will be sitting this winter, and it will doubtless be prepared to hear any representations addressed to it on the subject, though this will be rather cold comfort for the manufacturers and operatives who complain of losing business every day, seeing that the Commission has many months of work before it can hope to submit its report; and for practical purposes, it might be better to devote a little effort to counteracting the boycott of which we wrote last week, surely a more imminent danger to the Lancashire industry than even the enhanced duties, whatever the result. The heckling of Mr. Gandhi by a party of trades unionists could scarcely fail to conduce to the enlightenment of both sides.

### *The Indian Munitions Affair—*

The India Government is certainly in a mess over the Calcutta Munitions affair. Hitherto the case has attracted little attention in this country, but India has been talking scandal about munition frauds for some years, and when definite charges were at last brought, there were general anticipations of important and interesting disclosures. These anticipationswere, however, disappointed, for, after the charges had been explained in court, the prosecution was formally withdrawn on the ground that, owing to the financial position of some of the accused persons, their conviction would be disastrous to struggling industries and large numbers of small shareholders. An outcry naturally followed. The quidnuncs were deprived of the expected sustenance; the accused persons complained that, while charges had been publicly made, they had been given no opportunity of making their defence; sticklers for legal and constitutional propriety asked if impunity was to depend on the number of a man's directorships; and all alike turned their invective against the Viceroy on the not unnatural assumption that it was he who had stopped the case.

### *—and Its Consequences.*

Then came a second surprise. The order withdrawing the case turned out to have been given by Members of the Council for Industry, who,we are told,had consulted some of his colleagues, but not the Viceroy or the Council as a whole. Lord Reading in fact learned of it through the newspapers; he was prompt to express his disapproval; and the India Office began to cable supplementary questions, the replies to which have not yet been disclosed. Lord Readings' disapproval seems to cut the ground from under the feet of those who defended the action of his Government on general grounds, but the important question just now is less of the past actions than of the present position of the Government. The times call for an exceptional union of statesmanship and vigour, but the Council is divided on one of those moral issues where compromise is usually impossible and the fact of the division is made obvious to the world at large. The result can hardly fail to be a loss of power, and of prestige, which may produce serious effects in the near future.

---

Our Cyprus Correspondent writes:—

Greek papers publish letter in English from Bishop Copleston and others inviting help towards the memorial to Bishop Blyth to be placed in St George's Collegiate Church in Jerusalem. Bishop Blyth often visited Cyprus, where he was much esteemed and respected.

## THE WEEK AT HOME.

LONDON, Monday Evening.

### Parliament and Ireland.

Parliament has been adjourned till the autumn, after a pretty little squabble between Lords and Commons over the Safeguarding of Industries Bill. In the old days the question whether that particular measure was or was not a Money Bill within the meaning of the Parliament Act would almost have shaken the political heavens; but constitutional points do not rouse the new electorate as they did the old—it is very doubtful whether the cabman's wife of Peckham Rye (who has a vote, "even as you and I") could give a correct definition of a Money Bill to save her life.

Anyway, we are a Protectionist State now. Mr. Harold Cox assures us that we are in a fair way to ruin ourselves and the world by our folly; we read these things in the Sunday papers after church, and take as much notice as the ordinary sinner does of the sermon.

The fact is, Ireland has made us forget everything else in the political field. And things are not going well with the Irish negotiations. It is true that Dublin still professes the utmost confidence, at least in its leading articles. And the London Press, with the exception of the *Morning Post*, still expresses the conviction that the terms, or something like the terms, must be agreed upon; civil war is as "unthinkable" now as was war with the Germans seven years ago, according to the newspapers. But the public is less assured as to the foundation for this optimism. It has read De Valera's speech at the opening of the Sinn Fein Parliament, and anything less like conciliation was never spoken. If De Valera meant to accept the terms, it is argued, he would have spoken very differently. That is perhaps not the whole truth. I believe it to be the fact that a large party, perhaps even the majority of Sinn Fein, wants an honourable compromise, and thinks—as the rest of the world very emphatically does also—that the terms offered by Downing Street as a basis of settlement are not merely adequate, but generous. There is, of course, a considerable irreconcilable fraction, who will be satisfied with nothing but complete separation; but these are apparently not the majority.

The real explanation of De Valera's *intransigeant* attitude, I gather, is not that he altogether disagrees with the terms offered, but that he is angry that Ulster has escaped him; he would sooner carry on the present position without Ulster than arrange a *concordat* which recognises Ulster as a separate unit. In other words, the position is still what it has been for a very long while past—while England is the nominal enemy who must be publicly blackguarded as the tyrant at all costs, Ulster is the real problem. The pose of "England the Enemy," however, has been increasingly ineffective of late years, and since the offer of a Dominion status, which De Valera scoffs at—although it was good enough for General Smuts—foreigners are less than ever likely to believe in the tyranny of the British Government. The real trouble to-day, as for the past thirty years or more, is that Irishmen cannot agree upon which form of Government they want, and they will not show any toleration

to each other. However, the situation, although critical, is not yet altogether hopeless; and it is possible that the Sinn Fein Parliament will be wiser in secret session than it has so far shown itself in its public exhibitions.

**By-Elections and Anti-Waste.**

There are now four by-elections on, but the contest at Westminster holds the public attention most. In this constituency politics have been reduced to a farce. There are three candidates, one of whom is an anti-vaccinator, anti-vivisectionist and pacifist, and who hardly counts as a serious factor. But all three candidates have labelled themselves anti-waste; and as one is a General, and the other a Colonel, and neither had ever been heard of before outside military circles, the position has become ridiculous. Anti-waste, in fact, was too good a cry. No candidate can do without it, and therefore every candidate, whatever his politics, tacks it on to his banner. Now that this has happened, the Anti-Waste party seem doomed. It is the fate of all parties without fundamental political principle, as had been foreseen; but one had not expected it to be doomed so soon, or in precisely so ludicrous a fashion.

**A Schism in the Church.**

The Broad Church Conference which has just been held at Cambridge is likely to give rise to some serious difficulties. The Broad Church party has for some time been urging that the time has come for a re-interpretation of the fundamental truths of Christianity, and it has secured a considerable following, despite the suspicion and alarm with which both high and low varieties have regarded them; but in its desire to minimise the "miraculous and mythical element" of religion, it seems in a fair way to give up the essentials altogether. A paper by the Dean of Carlisle has received wide publicity, and has been immediately answered by Bishop Gore and Dr. Welldon—the latter of whom makes an effective point by saying that the Broad Churchmen are always telling him what they do not believe, but the time has come for them to say exactly what they do believe.

As the Dean has blamed the reporters for inaccuracy and misrepresentation, and I have not yet seen the full report of his paper, I cannot judge how far he is personally responsible for the controversy. But the revision of the Creed which has been suggested by Dr. White at the Conference shows that the general alarm is not groundless. The proposed new Creed runs as follows: "I believe in God the Father of all, and Jesus Christ the Revealer of God and Saviour of Man; and in the Spirit of Holiness, which is the Spirit of God and of Jesus; by which Spirit man is made Divine. I acknowledge the Communion of all faithful people in beauty, goodness, and truth; and I believe in the forgiveness of sins, the glory of righteousness, the victory of love, and the life eternal."

It will be noticed that there is no allusion here to the divinity of Christ; the Resurrection as well as the Virgin Birth have both disappeared, and the Trinity is refined away to a shadow. This is in fact pure theism; and while Canon Barnes a year ago gave up the fall of man in a celebrated sermon, Dr. White and his colleagues now give up the whole of the Pauline theology founded on that doctrine.

There is, of course, no prospect whatever that the Church of England will adopt this proposal; it would cut itself off from the rest of Christendom if it did, and become practically a Unitarian body. Some indignation is being expressed against the reformers by ardent churchmen, but I think the more general attitude is that while they have a perfect right to hold these views (which are, indeed, very largely held by laymen outside the Church) those who hold them cannot honestly and loyally remain in the Church. The example of Sir Leslie Stephen, who resigned holy orders when he was no longer able to accept the doctrine of the Church, is being recalled in many quarters as an admirable one to follow. It is not likely that this episode will be suffered to die down without a good many resounding echoes.

**The Last Test Match.**

The fifth Test Match ended tamely in a draw. But in cricketing as in clerical circles controversy is afoot. In the last innings of England, when a drawn game was inevitable, Armstrong, the Australian captain, only put on his second-best bowlers, and so far from urging his side to play keenly, lolled about in the outfield himself, and hardly troubled to change his position at the overs. His action has been severely criticised, and it is not in fact easy to defend.

The remedy is obviously to play fewer matches, and to allot four, or , if necessary, five days to Test Matches, as is done in Australia. Our visitors attach less importance to county cricket than we do, and stake everything on the international matches; but they should have arranged their programmes differently in the first instance. Having agreed to the full programme, they should certainly have played up to the last ball. But the fact is, they and we alike are suffering from a surfeit of matches; and cricket, like other sports, has become too much of a business and too little of a game. The takings have been excellent, and the Australians are undefeated—but frankly, other tours have left happier memories.

**London for the Holidays.**

Every seaside town is crowded with Londoners on holiday, but London itself is fuller than ever, and the hotels, unlike the theatres, are turning people away nightly. A large invasion of Americans and country cousins are doing the sights of the Metropolis, from the Houses of Parliament to Madame Tussaud's, and the Tower. Despite the hard times, the visitors seem to be spending money freely, and the shopkeepers are making up something of what they lost earlier in the year. The Londoner can never get over his amazement at anybody coming to London for pleasure, but I saw a countryman on a motor-bus the other day who was enthralled by his first sight of Fleet Street. He informed me reverently that "this is the place where they make the news"—I let it go at that—and told me that he was going on to the Old Bailey, to see if he could get into a murder trial, as he had always wanted to see a judge put on the black cap. It seemed a *macabre* idea for a holiday.

**Books of the Week.**

Two new books that have come my way recently have provided good reading. In the first, "A Philosopher with Nature" (Methuen) the late Mr. Benjamin Kidd, whose name is well known as a sociologist, writes delightfully of birds and other animals. The other is very different. "Reflections of a Financier" (Hodder and Stoughton) by Mr. Otto H. Kahn, shows the great American banker in philosophical and ethical mood. In a very interesting series of essays he emphasises the note of service. The wealthy man "should never forget that the advantages and powers which he enjoys are his on sufferance, so to speak, during good behaviour. My eagerness is not to gain, but to serve. Materially and in other ways I owe a heavy debt to this my adopted country (America), and I am anxious to repay such part as I may, by placing at its disposal my experience and modest capacities for what they may be worth." The modern American school of sociologists has rather unduly stressed the "acquisitive" side of business; it is just as well that Capital should show that it owns, as one might say, a soul among the greenbacks.

The first two volumes of "Mr. Punch's History of Modern England (Cassell)" really require no introduction. They are by Mr. Charles L. Graves, whom I have always thought the most remarkable journalist of our times, since he is on the staff both of the *Spectator* and *Punch*—about as difficult a combination, one imagines, as the *Church Times* and the *Sporting Times*. However, here he traces *Punch* from its beginning as a confessedly Radical organ to a Conservative middle-class paper. It is practically a social history of the mid-Victorian age. I must add that it is written in a style which makes one regret that Mr. Graves has buried so much of his talent in the small print of the *Spectator*, instead of writing books under his own name, where one could identify him.

## EGYPT.

*Cairo, August* 11.

**An Act of Remembrance.**

Annually on the anniversary of the entrance of Great Britain into the great war members of the French community have visited the Military cemetery at Hadra and deposited wreaths on the graves of the British soldiers buried there. This year this touching ceremony again took place, and appropriate speeches were made by the Acting High Commissioner and the French Consul, a guard of honour being furnished by the Sherwood Foresters.

**The Political Situation.**

Strenuous efforts are being made to reconstitute the late Mustapha Pasha Kamel's party the "Hisb El Watani," and a conference, which Prince Mohamed Ali attended, was held this week. The question of the reconstitution of the party was debated, and it was decided to start an organ for the foundation of which permission was obtained from the authorities several weeks ago. The new organ will bear the title of *El Lewa El Masri* (the Egyptian Standard), after the former organ of the party, which was so prominent in the early part of the century and was finally suppressed in 1912 for seditious propaganda. At the conference the speakers attacked both Adly Pasha and Zaghloul Pasha, the policy advocated and approved by the assembly being that no negotiations ought to be undertaken with regard to the future status of the country until Great Britain had recognised the independence of Egypt and the Sudan and Ziela, Massawa, and the other former African possessions of Egypt had been restored to her. Since the death of Mustapha Pasha Kamel, and of his successor Mohamed Bey Farid the "Hisb El Watani" has played a very minor part in Egyptian politics. It is true that it has periodically intervened during the present controversy, but it no longer holds the position it formerly had, and it does not appear likely to have much influence over the present situation.

Beyond this the only other item of political interest to report is the message of thanks sent by Zaghloul Pasha, who is still in his Ezba, to the Labour members who signed the memorandum recently published in the *Morning Post*. In this message he informed them that every statement made by them was substantiated by documentary, and in many cases official, evidence, and that martial law was being used in order to further the intimidatory tactics which the present Cabinet was following.

**The Constituent Assembly.**

Steps are being taken to form the committee for the elaboration of the new electoral law which has been rendered necessary by the decision to summon a Constituent Assembly to ratify the Anglo-Egyptian Agreement. The committee will consist of some Government officials, several former leaders of the Native Bar and some of the dissentient members of the "Wafd." An invitation has been extended to Fathalla Pasha Barakat and others of the active supporters of Zaghloul Pasha, but it is not yet known whether they will agree to serve on this committee. The action of the Government in trying to make the committee as representative as possible of all parties is exceedingly wise, for on the one hand it shows that it wishes to have the collaboration, in such an important matter, of even its political opponents, and at the same time it serves to disarm criticism from the latter source.

**The Bomb Discovery.**

The bomb affair recently reported has not developed as was expected. It is believed by the authorities that the whole case was engineered in the hopes that they would be taken in and that when, as was bound to happen, the case failed before a Military Court, discredit would be thrown on them, and thus confirmation would be forthcoming of the accusations made against them by the opposition. Action is however being taken against the informers for giving false information, while the men who had the bombs will be brought before a Military Court for being in possession of bombs. Thus the biters will themselves be bitten. While it is satisfactory that this firm action is being taken against those who formed this alleged "conspiracy," it is distinctly disappointing that the source of these "infernal machines" has not yet been discovered. Whether in this instance there was actually a conspiracy, or whether as is surmised, it was but an endeavour to discredit the authorities and make political capital out of the affair, is really not so important as the fact that the existence of these bombs and their technical examination show that the organization for the manufacture of such weapons, which was known to exist a year ago, is still active and is indeed becoming more scientific in its work. I fully recognize that the police and Public Security are much handicapped at the present juncture, and that they have done remarkable work under most trying conditions; but nevertheless it is high time that the organisation responsible for all the bombs used during the past two years should be run to earth.

**The Cadre Commission Report.**

The report of the Cadre Commission to which reference was made about a month ago has been released for publication, and the Council of Ministers has approved of it in principle, with the exception of the grades for the two higher classes of officials and the provisions made for the extra payment to non-Egyptians in the form of an expatriation allowance. It is calculated that the application of the new grading, when it is in full working, will cost the Government an extra million a year, the bulk of which naturally, and very rightly, will go to the lowest grades. From what one can gather, however, little satisfaction is felt by the service at the result of the work of the Cadre Commission, and considerable opposition is promised from more than one important Department. The Cadre Commission does certainly seem to have failed lamentably in the performance of its main duty, which was to provide wider classes, so as to give better prospects of advancement and do away with overlapping grades and the constantly recurring "special cases," since except in the lowest grades the classes recommended and the margin in each remain practically unchanged. One would like to wager that within five years the Government will be confronted with exactly the same problems as those from which the Cadre Commission was expressly intended to relieve them.

Sub-Commissions are about to sit in order to adjust the anomalies and put each employee and official in his proper grade. With regard to the expatriation allowance to non-Egyptians, the action taken by the Council of Ministers in postponing its decision is quite logical in view of the impending change of regime and the placing on pension of an abnormal number of non-Egyptian officials. The time for the application of this provision will come when non-Egyptian officials are required to work under the "independent regime." However, since all the posts have been fixed at salaries which an Egyptian holding them should receive and the Cadre

was drawn up on the understanding that non-Egyptian holders of those posts would draw expatriation allowance in addition, it follows that all posts at present held by non-Egyptians will have to be regarded as at a higher figure, so as not to penalise existing non-Egyptians whose actual pay in many cases is higher than the maximum fixed under the new Cadre for their grade. Otherwise the existing European officials will hope to remain in their present Cadre, and the state of affairs will become one degree worse than that which the Cadre Commission was intended to remedy.

## YUGOSLAVIA.

*Zagreb, August 9.*

**The Communist Party.**

The Communist Party has ceased to exist. After the voting in the House the other day, a number of dejected and depressed members walked out to find a batch of detectives with a posse of gendarmes waiting for them, and some cabs. They were straightway driven off to the prison and their interrogation began. One or two were exempted, as they had severed their connection with the party directly they saw which way the wind was blowing. After the interrogation, a few were returned to their homes, where they will live under strict police supervision. Most of these, however, are reported to have requested permission to stay longer in Belgrade, till the keenness of the national anger has blown over, as they fear a somewhat warm reception on the part of their friends and neighbours..

One simple old soul, who was among the arrested deputies, was asked why he joined the party. His reply was interesting. He was naturally a supporter of his own class, the labourers, and was surprised when someone came to him and told him to stand for the Skupshtina. He protested that he was too ignorant and was illiterate and quite unfit to be a member; let them chose somebody more suitable. "No, you will do well," they said to him, "All you have to do is to vote as you are told, and to make a noise and howl and whistle when you are told to." As he was to be paid 120 dinars a day for doing this, and could hardly earn more than 30 with his hands, he very naturally accepted, and made much noise in the house for his money whenever he was ordered. And that is about as much as most of the Serbian Communists know about their "policy." The very vocabulary conveys nothing to these simple Slavs, for they do not see any meaning in such words as "communism," "dictatorship of the proletariat" etc. They usually try to twist in some meaning based on their own language. "Proletara" to them, if it means anything, means something to do with "flying through," and one old man was most indignant when somebody explained to him that it meant people who were no good for anything else but producing children. "Bolshevism" would convey to them the idea of "something better," and therefore should be a more attractive word.

An old Croat peasant, a keen "republican," of Raditch, had a fine strapping son, who attracted his officer's eye, with the result that he was selected for the Royal Guard. The old father came hurrying along, as soon as he heard the news, to see the officer, and to thank him. As the officer shook hands, the old man, with tears in his eyes, said: "Ah, now, Gospon," I will no more be a republican." Thus are politics understood in these climes'

**The Albanian Frontier.**

The Albanian hillsmen are being constantly troublesome on the borderlands. On July 31, a party of them attacked a Serbian merchant and a young officer who were quietly travelling to the market at Ipek. The merchant was killed and the young officer severely wounded. On August 4, a band of fifteen of them attacked a family party on the road from Ipek to Mitrovitsa, robbed them to the skin, then butchered them. But a nemesis was in store for at least one powerful band, led by the notorious Azem Galitch, about 150 strong, which was in a village called Yablanica near Jakovica. For some time they had been the terror of the neighbourhood, and the local commandant was delighted to hear of their presence in that village. He collected all the men he could, with a mountain gun and some machine guns, and surrounded the village, about midnight, and waited. At daybreak, the robber band was surprised to find itself enveloped. They attempted to break through, but were met with a devastating fire on all sides. After about an hour, about fifty of them did succeed in breaking their way out, as the gendarmes were not numerous enough to make the cordon absolutely tight, but with dead and wounded, a good hundred of them were left on the ground or prisoners.

**The Trial of Dr. Shufflay.**

The trial of Dr. Shufflay and his fellow-conspirators for high treason, which has been dragging on for a long time in Zagreb, has at last reached an end. Dr. Shufflay has been sentenced to three and a half years' imprisonment, Pavao Zena to twelve years, a number of others to various shorter sentences, and a number have been released. It will be remembered that they were accused of intriguing with the Hungarians for the break up of the Union. The Yugoslavs have to be particularly alert against the Magyar danger, for it has been always averred, and is now stated to be proved, that the Hungarian irredentists have been helping and encouraging the Bolshevist and Terrorist activities in the country.

**General News.**

Owing to the drought the chestnuts of Zagreb have withered, and they assumed their autumn tints a long time ago. But one tree has been so misled by the long heat that it thought spring had come back and so has broken into flower a second time.

Now that the ban is removed on the export of money, it is anticipated that an international service of postal money orders will be revived in Yugoslavia.

## ROUMANIA.

*Bucharest, August* 10.

**Party Politics.**

As had been expected hostilities between the Liberal Party and the Cabinet have already begun. M. Marzescu, former Liberal Minister, has, by order of the Central Committee, fired the first shot by convening his constituency of Jassy to explain the motives of his withdrawal from Parliament and the resignation of his mandate as member of Parliament. In this meeting he reviewed the whole activity of the present Cabinet, criticising and condemning it most violently, and finally declaring it most harmful to the country.

M. Argetoyanu, present Minister of the Interior, was not long in making his answer. Taking advantage of a political function in the provinces at which he presided, he delivered a most cutting speech against the Liberals. After repudiating the insinuations and accusations of the Liberals and bringing into relief the important reforms which the present Cabinet had accomplished, he asserted that the chaotic state in which the country had been plunged, prior to the advent to office of the present Government, was the outcome of the incapable and self-seeking administration of the Liberals; and he further insisted that the reason the Liberals were now striving for power was solely to prevent the carrying out of the fiscal law, which would in the first place strike at them, as they and their followers were those, who, during the neutrality and the war, had scandalously amassed enormous fortunes. The Minister at the conclusion of his speech compared the Liberal Party with the former occult and unscrupulous Italian organization, the "Mafia," declaring that one of the chief points of the Cabinet's programme was to purge the country of this "Mafia," appealing to all conscientious and honest people for due support in this combat.

Some papers construe this appeal as an invitation to the constituent groups of the former Federationist block to a collaboration against the Liberals, in order to thwart a Liberal-Federationist coalition. The Liberal Press is agitating for the immediate revision of the Constitution prior to the Coronation celebration, fixed for September 27, to enable the King to take the oath on the revised Constitution, otherwise, they urge the Coronation will be unconstitutional. The Government Press treats with derision this transparent stratagem aiming at the dissolution of Parliament—as the revision has to be carried out by a "Constituante" emanating from fresh elections. It assures the Liberals that the King need not repeat the oath on each modification of the Constitution, and as to the Coronation festivities, over which the Liberals are so eager to preside, they will presumably be postponed until May next on account of the impossibility of completing this autumn the principal works, especially the decoration of the Cathedral.

**General News.**

The British flotilla on the Danube which arrived on August 5 in Vienna, will stay there until August 12, when it will resume its downward cruise.

On the rumour of an intended attempt on the line where the Royal train had to pass, the Roumanian peasants from Banat, have, on their own initiative, decided to keep watch all along the line from Arad to the frontier. At each 100 metres a neatly dressed peasant armed with a rifle or cudgel was seen guarding the line until after the Royal train had passed. The Royal family was deeply moved by this deed of devotion.

A Transylvanian paper reports that Magyar gendarmes have attacked with machine guns the Roumanian pickets at the frontier along a distance of a few kilometres; there were wounded on both sides. The attack, which lasted a whole night, was repelled after the Roumanians had received reinforcements. The British representative in Budapest has been informed of this assault.

On account of too numerous thefts and assaults perpetuated of late, the police have organized regular nocturnal raids, which have resulted in the arrest of a large number of vagabonds. Everybody, including the floating population, is advised always to carry papers of identification to avoid inconvenience.

## GREECE.

*Salonika, August* 11.

**Salonika To-day.**

Your Sofia Correspondent is paying a short visit to Salonika and is therefore writing to you from there instead of from Sofia. In the first place, he would remark that the weather is hot, abnormally so, even for Salonika. The temperature at mid-day yesterday was 49 Centigrade (120 Fahrenheit) in the sun. Life is hardly bearable until sun-set, and it is only after 6.30 that the town begins to present a more or less animated appearance. At a restaurant such as the "King George," mid-night is, in fact, the opening hour, and the clientèle remain on till the small hours. The town is very full of soldiers, some of them being home wounded from the Anatolian front, but the majority forming part of the large garrison of Macedonia.

This province is now under the orders of M. Alexandropoulos, Minister without Portfolio, who has his headquarters in the old Turkish Court of Justice, situated on the hill behind the burnt area of the town. It is four years on the 17th of this month since the great fire that destroyed upwards of 9,000 houses, took place, and so far very little has been done in the way of reconstruction and re-building. The burnt area indeed presents a blot on the landscape of an otherwise pretty town, and one hopes that when Greece is at peace again, she will set about the work of reconstruction.

There are not many outward signs of the fact that less than three years ago Salonika was the headquarters of a large Allied Army. From the English point of view the most significant thing is the number of ex-Army motor cars, Vauxhalls and Sunbeams principally, that one sees in the streets. Recently in addition to motor cars, a hundred and fifty British Army lorries have been sold to the Greeks.

**The War Spirit.**

Everywhere one goes one meets with an extraordinary pro-Royalist feeling. Blind faith is exhibited in King Constantine and the latter has now become an idol, who can do no wrong. His popularity has indeed become such that his wishes and desires are able to have uncontrolled sway. Naturally enough the Greeks are very proud of the successes of their Army in Asia Minor, and the local papers predict that the second and final stage of the operations is about to begin. Confident is only a mild word with which to describe the feeling, for there is no doubt that the country anticipates a complete victory over the Kemalists. It is no secret that Constantinople is looked upon here as a possible prize, consequent on a victory in Anatolia, and great hopes are entertained that England, and in particular Mr. Lloyd George will support the Greek claims in this

direction. The only misgivings that one hears expressed concern the question of the financial position, arising out of the vast expenses caused by the present war. If the much talked-of loan from abroad is not secured, the present Government will lose much of its popularity. Strong hopes, however, are entertained that the loan will be obtained, by private, if not by official means.

**Greece and Bulgaria.**

After having heard nothing but one side of the story for some months it is very interesting to come here and hear a totally different version. Relations between the two countries cannot be said to show any improvement. The Bulgarians are believed to be very active in fomenting "Komitaji" activity along the frontier, particularly in the area S.W. of Adrianople, and articles in reference to this matter appear almost daily in the local newspapers.

The question of the compliance by Bulgaria with the military clauses of the Peace Treaty is also being followed with great interest, and fears are expressed that the Allies will allow themselves to be deluded into permitting Bulgaria to maintain too strong an Army. Regarding this matter it is idle to speculate, because, as I mentioned in my last letter, the Council of Ambassadors at Paris have given strict orders concerning the disbandment by October 1, of the present Conscript Army.

Although both Greece and Bulgaria are members of the League of Nations, and, in theory at any rate, believe in the Gospel of freedom and goodwill, there is no hiding the fact that the two countries heartily detest each other. The most serious aspect of the case is that the youth of both countries are brought up to believe in this way of thinking. It is also unfortunately true that of late Greece's policy has been to make the Bulgarians seem her principal enemies—not the Turks. At present she is at war with the Kemalists, but strong attempts have been, and are being, made to conciliate the Turks living in Macedonia and Thrace. The bad feeling is now so strong that it will require many years of careful statesmanship and diplomacy on both sides before the situation can be improved. In these circumstances it is very necessary that Bulgaria should at once send a diplomatic representative to Athens, as relations have been broken off for far too long a period.

## CYPRUS.

*Nicosia, August 9.*

**An Unhappy Accident.**

An unfortunate event at the northern town of Kyrenia has placed several families there and at Nicosia in mourning. On July 29 its small harbour was visited by five British destroyers of new type. The officers organised aquatic sports, and all Kyrenia turned out to witness them, many villagers also coming in to enjoy the spectacle. Towards the close of the various contests a small building belonging to a Greek named Antonio Brakhas near the quay, which was occupied by more than 20 spectators, collapsed with a loud crash, precipitating all the occupants, who were chiefly women and children, with some fatal results. The shrieks of the wounded and others directed all to the spot, where many were found in a pitiable condition. The victims were transported in all available motors to the hospital, which is here maintained in excellent order. Four died within an hour, one a lady leaving a family of young children. Fortunately some young children who would have been victims had been taken a few minutes before the accident to the quay. All the medical aid within reach was obtained, and everything possible was done by the Commissioner, Mr. E. McDonald,, who telegraphed to Nicosia for the District Medical Officer, by the Mayor, the Police, and others. The funeral of those who died took place on the following day, and at the service the Bishop of Kyrenia gave an address. It was attended by the Chief Justice, Mr. S. Fisher, and other English officials who were visiting the port.

**A Prison Wedding.**

By special permission of the High Commissioner, given in special circumstances, a Greek who is undergoing a sentence in the Central prison of Nicosia, in connection with the disturbances of March 25, was married last week to a village bride, to whom he had been for some time engaged. The ceremony took place in the office of the Director of the prison, the Chaplain of the gaol and other priests officiating. After affecting scenes the bride, who had worn a wedding dress for the ceremony, took leave of the bridegroom, and then resumed the black dress in which she had arrived. The unfortunate prisoner was taken back to his cell.

**General News.**

Greeks continue to celebrate the victories in Asia Minor, and hold doxologies in many churches. The King of the Hellenes has sent a telegram from Eskishehir, thanking citizens who wired their congratulations. Summer fairs are being held as usual at the large Monasteries, there being no restriction on account of epidemics this year. There is no diminution in crime. Several murders, on what we should consider quite trivial grounds, have been committed last week in both Greek and Turkish communities. The Ottoman community will celebrate the Kourban Bairam on August 14. Unfortunately the festival is not a very happy one on this occasion.

## ASIA MINOR.

*Smyrna, August 6.*

**General News.**

The correspondents of the *Manchester Guardian* (Professor Toynbee), and of the London *Daily Telegraph* (Mr. Beaumont) are back in Smyrna from the front. It is interesting to note that Professor Toynbee, who has been on the Ismid front, has very little to say in favour of the Greeks, and in fact is emphatic in his denunciation of their wanton cruelty towards the Turks; whereas Mr. Beaumont, who has been on the Ushak-Eskishehir front has lost none of his enthusiasm for the Greek cause. The two correspondents are now comparing experiences, and just in what precise manner they "agree to differ" will doubtless appear in their respective newspapers.

Prince Paul has returned to Smyrna from the front and left for Athens on the cruiser "Hellas." It is rumoured that King Constantine will shortly return to Smyrna from the front. M. Gounaris and M. Theotikis await his arrival.

The British nurses working in Greek hospitals in Smyrna are far from happy. The British Consul has cheered them up a little by getting their salaries paid; and the S.N.O. has gone one better by inviting them on board, three at a time, for breakfast, as they could not get accustomed to break their fast off a small cup of black coffee and a rusk.

*Smyrna, August 11.*

H.M.S. Tomahawk has arrived in Smyrna to replace H.M.S. Seraph, which proceeds to Constantinople to join the Destroyer Flotilla at Buyukdéré.

During the week the Seraph team played two water-polo matches with the Smyrna Greek team, and won on each occasion by 2 goals to nil.

Four thousand wounded Greek soldiers have reached Smyrna from Eskishehir, but only the severely wounded have been detained in the Smyrna hospitals; the others have been shipped off to Piraeus in the fine hospital ships working between the two ports.

Two buildings occupied by the American Red Cross Clinic at the Kalamaria Camp at Salonika, for Greek refugees from Russia, have been destroyed by fire. Dr. Wingfield, head of the unit, was seriously burned, and the Greek interpreter died of injuries.

Reports on atrocities by Greeks and Turks in the districts of Yalova and Guemlek and in the Ismid peninsula were issued last week as a White Paper, Turkey No. 1, 1921 (Cmd. 1478).

# CORRESPONDENCE.

*The columns of "The Near East" are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of "The Near East." Letters must be written on one side of the paper only.*

## ZIONISM AND PALESTINE.

*To the Editor of "The Near East."*

Sir:—In your issue of the 18th inst. you publish an extract from a letter received from an American, in which a number of statements are made that call for correction.

(1) The writer states that the Jews in America "have been quite deceived by the Zionist leaders" and "have an absolutely false impression of Palestine and the Palestinians." He must have a very naive idea of the American Jews if he imagines that this is the case. Since the conclusion of the Armistice scores of American Jews, including eminent Zionists like Mrs. Mary Fels, Justice Brandeis, Dr. Harry Friedenwald, and others, have visited Palestine, and upon their return to America have either given addresses or interviews, which have enlightened their fellow-Jews upon the situation in Palestine. Moreover, the members of the American Zionist Medical Unit in Palestine form another good channel through which information has been conveyed to America for the last three years. And both the general and Jewish press in the United States have devoted and do devote very considerable space to matters Palestinian. I have therefore no hesitation in affirming that the Jews in America cannot possibly have been deceived by the Zionist leaders and that they have as correct an impression of the situation in Palestine as anybody can have who has not actually visited the country.

(2) The writer states that Dr. Weizmann appealed "for 50,000 American Jews to emigrate in a year to Palestine," and he predicts there would be a tragedy if this appeal were literally complied with. The American correspondent has evidently taken a sentence out of its context, without which its purport cannot properly be appreciated. If, for example, 50,000 well-to-do Jews with ample capital, emigrated to Palestine there would hardly be a tragedy. But what the unnamed correspondent entirely overlooks is that immigration into Palestine is under such strict supervision and is so carefully regulated that the hypothetical disaster he foreshadows is utterly inconceivable.

(3) The unnamed writer further states that when "the attempt to found a Jewish state in Palestine fails" then "American Jews who are asked to raise 80 million dollars for the movement will cast all the blame on England." This statement implies that the American Jews will actually raise the "80 million dollars," otherwise they would obviously not be justified in casting "all the blame, etc." As a matter of fact, they are asked to contribute their proper quota of the £25,000,000 which the Jews all over the world are called upon to raise within the next five years. The purposes for which the money is required are all clearly set forth, viz. purchase of land, colonisation, irrigation, afforestation, education, sanitation, etc. No responsible Zionist has ever said that the money is required "to found a Jewish state." The fears of the American writer, who seems quite ignorant of the published contents of the British Mandate, thus arise from a gross misconception bred of ignorance; and the alarming picture that he paints of possible complications between Great Britain and America testifies simultaneously to the fertility of his fancy and the poverty of his judgment.

On the subject of the Palestinian Arab Delegation, I should like to observe that "its work of enlightening public opinion," to which you refer, has received a salutary check. The Delegation stated that the Sephardic Jews in Palestine are on their side, a baseless assertion that immediately evoked an emphatic contradiction from the Chief Rabbi and other leaders of the Sephardim of Palestine.

In your issue of the 11th inst. you stated that "many of the older Jewish residents of Palestine, if not the majority of them, are opposed to the policy of the Zionist Commission." The fact is that the "Vaad Leumi," the Jewish National Council, elected by all sections of Jews in Palestine, goes further in its nationalist demands than the Zionist Commission. On the general question of the need of amicable relations between Jews and Arabs I am in perfect agreement with you; but I must point out that all the implications of the British pledge contained in the Balfour Declaration can be carried out without the least infringement of the rights of the Arabs.

I am, etc.,
ISRAEL COHEN.

## THE GREEKS IN ASIA MINOR.

*To the Editor of "The Near East."*

Sir,—The lessons of the great war have been learnt, alas! by nobody. Why should your "disillusioned" correspondent expect the Greeks and Turks alone to take them to heart? War is always a last and horrible expedient, and in this case especially it is for Greece a supreme and terrible one. All other means have however, been taken from her, all other paths closed, and by war alone can she redeem her national inheritance, the land of her fathers, and save from total extermination millions of her children who through long centuries have been awaiting their deliverance from slavery and untold suffering.

The "clock of progress" has been at a dead stop in Asia Minor ever since the Turk wiped out the great civilisation of which only remnants and ruins remain in stone, and records in history and song. The Greek Government proposes to wind it up at double speed and to make up for lost time.

Your correspondent is too pessimistic when he asserts that "the future rises gloomy and threatening from amidst this chaos!" War means disorder, but why assume this chaotic condition will be lasting?. Since 1912-13, Greece rules over a minority of alien peoples Turkish and Jewish; there have been no complaints against the Greek administration, and in this most crucial moment no signs of discontent, no agitation, no rising in either Thrace or Macedonia; the Turkish and Jewish deputies are giving proofs of utmost loyalty in the National Assembly, and the Government receives daily official documents signed by the Muftis and Turkish communities of the newly annexed cities giving thanks for just and liberal treatment by the Greek administration and for the protection given to all alike by the army of occupation. I enclose a translation of two of these documents.

There will be no "ruling by force of arms of a subject race" but absolute justice and equality, respect of religion and national customs. To absorb, not to dominate, has been through history the ruling principle of Greek civilisation; we have no doubt that under this liberal rule Greeks and Turks will live in good fellowship, and work together for the good of the bountiful land left fruitless through many centuries of misrule.

England and Greece have this in common, that alone of all European nations they know how to rule alien races with a light hand, not the clenched fist, but the open grasp of friendship.

England has not yet fully realised how much she has in common with the little land ringed about with sea and rock, whose people

(Madame Psycha encloses translations of two declarations, one signed by the Moslem Deputy- Governor of Nicomedia, the other by eleven residents of Pazartzik, testifying to the humane and generous conduct of the Greek troops. Ed.)

## ARAB AND ZIONIST.

We have received the following communication from the Arab Delegation now staying at the Hotel Cecil; it is dated August 18.:—Dr. Weizmann's idea of a Conference between the Arabs and Zionists with a view to arriving at some workable agreement is not new.- The Palestine people have not accepted the Balfour Declaration and will not accept it. Repeated protestations have been made through its Representative Societies, Congresses and Institutions, because it believes that the terms of the Declaration are self-contradictory and cannot be harmonized in their execution. The present unhappy state of Palestine and the recent disturbances that took place there are ample proof of this. The Arab Delegation therefore cannot enter into negotiations on the basis of this Declaration. The Delegation has come to England to put its case before the British Government and the British Public and to show the danger of putting this Declaration into effect. Furthermore the Delegation has come to obtain for the people of Palestine the safeguarding of their civil, political and economic rights.

# PRESS ON THE NEAR EAST.

### The Supreme Council.

The *New Statesman* of August 13 makes, in an article called "The Great Delusion," a heavy indictment of the Supreme Council. For itself it favours the League of Nations, and in comparing the two institutions pointedly says:—"There is no greater delusion than to suppose that the League stands for Utopia, and the Supreme Council for political realities. We endure the incompetent tyranny of the Supreme Council not because we are realists, but because we are cowardly romantics." And it specifically attacks the Supreme Council:—

Its weakness is only too apparent, when one examines its practical record. The present state of Europe and of Western Asia, indeed, is damning evidence of its failure. For two years it has lived less by solving difficulties than by creating them. It has been the battleground of conflicting interests and a hotbed of intrigues. Its decisions, on the rare occasions when it makes them, inspire no respect. Look at what it has "settled" in Germany, Russia, Poland, Austria. Or consider its handling of Turkey. The Treaty of Sèvres was bad to begin with, animated as it was by a mixture of ignorance, greed and vindictiveness. The Conference at San Remo consolidated and extended the original vices of the Treaty. Mr. Lloyd George, infatuated with Greece, presented M. Venizelos with an empire. Neither France nor Italy liked it, but, for reasons which we need not discuss, their opposition was overborne. From that time affairs in the Near East have gone from bad to worse. There has been perpetual fighting, on a large or a small scale; the Greeks have squandered blood and treasure in the vain attempt to secure their spoils; all Turkey has been driven into an intransigent nationalism. The conflict has had its inevitable reactions on the Russian Bolsheviks, on the peoples in Western Asia and on the Mohammedans of India, who are supporting the Gandhi movement, not because they believe in non-co-operation, but because they are being persuaded easily enough that the British Government is heading an attack of Christianity upon Islam. Meanwhile, the three great European Powers are at daggers drawn in the Near East, each struggling to secure its own interests with as little regard as possible to those of its Allies or of the world at large. Here are concentrated all the faults of a body which is founded on brute force, which has no unity of purpose and no power to settle the strife which it has itself stirred up. The problem has again figured on the agenda in Paris this week, and it has been disposed of on the Micawber principle of waiting for something to turn up. The moment has not arrived for any attempt at mediation; the war is to continue, on the understanding that none of the Powers shall give assistance to either of the belligerents, though—by a benevolent afterthought—this prohibition is not to apply to private purveyors of munitions. Mr. Lloyd George still cherishes the belief, it seems, that the Greek armies will achieve a brilliant and final success, and, as if he had not already done sufficient harm, is not ashamed to proclaim his sympathy with them. Is there anything in all this lamentable business on which the Supreme Council can congratulate itself? We can see nothing but the bankruptcy of statesmanship. Whether the Greeks are right or the Turks, or whether both are in the wrong, the Supreme Council has proved itself a disastrous failure.

### Baghdad.

The *Manchester Guardian* of August 17 contains an article, written by a correspondent in Baghdad, and entitled "The Baghdad of To-day." The article begins:-

The celebrations are over. The great day has come and gone. The Emir Feisul has been welcomed and acclaimed by the people, and, whatever the future holds, there can be no doubt that his arrival in the city produced a large amount of genuine enthusiasm amongst the public at large. How far this was due merely to "holiday" excitement, how much to a sincere wish to have the Emir as their king, it is difficult to say. The Emir is popular with the country people and is probably as acceptable to the Bedouin on the fringe of civilisation as anybody is likely to be. On the other hand, the townspeople and "intellectuals," Jews, city Arabs, and the like give him only their grudging support, counting it slightly *infra dig.* to welcome openly a person whom they look upon as being merely a petty prince from the middle of Arabia, insignificant and probably uncivilised.

It describes in glowing terms the personality of the Emir Faisal, who it says "is genuinely anxious to do his job well."

And what of the future?—The elections, apparently, are to take place in the autumn, and after that the new Arab Government will gradually become a fact. Opinions are curiously divided about the possible result. Undoubtedly there are people who hope everything from it. To them this is the real renaissance of the ancient Arab race, released at last from the grim pressure of the Mongol. But on the whole, general opinion is against them. The pessimists have the day. There is a general belief that there is no one man strong enough and popular enough to rule here as King, and the mere fact of there being several candidates in the field is inauspicious. Feisul has the support of the British Government, and will probably win; but there is a strong party in favour of his brother Abdullah, who is considered the easier man to manage; a party supporting the Sheikh of Mohammerah, who on the other hand is reported to have resigned his candidature; a party who support British or European control and development—and this party is stronger than might be supposed; and a not inconsiderable number who don't want any ruler or rule at all. If the British control is to be loosened, there is no doubt that a fairly numerous class exist who would like to have the Turk back. These are mostly, curiously enough, the Jews and Christians, who apparently have had less to fear from the Turk here than in Turkey. Their contention is that the Arab is utterly unable to govern himself, and that the country should be controlled from Europe; but if that is not to be, they would rather have the Turk, who is easy-going, nearly powerless, and kept just enough order to enable ordinary life to "carry on." As to administration of justice, they point out that the Arab is every bit as bad as the Turk. Already it is necessary in the local courts to fee certain people before your case has the slightest chance of a decent hearing.

The standard of Englishmen in these post-war days is not, unfortunately, quite what it was in this respect. There can be no doubt that as a race, we have lost the prestige and popularity here that we had in 1918. Ill-breeding, open drunkenness, petty dishonesty, bullying, and a lack of understanding of or sympathy with the native have all combined to produce a bad impression. The Englishman is still feared, but he is no longer liked. Our present day soldiers and officers cannot be compared with the fine fellows who formed our original army of invasion, picked as they were from the cream of our home population; and it is difficult to make even the intelligent Bagdadi appreciate that the cheerful, clever, bright young man whom he used to enjoy meeting so much at one of the local coffee-houses was not really a representative British soldier. A race like the Arabs, to whom soldiering is still the supreme profession, can hardly be expected to appreciate the fact that with us the cream of the population never is, and never was, in the Army, except in emergencies. Looking on soldiers as invariably the best that a nation can produce, they not un-naturally are unimpressed by the present breed of Englishmen.

The writer then shows how the prevailing political uncertainty has reached in the business world; and he concludes:—

The future remains uncertain; but the ordinary Bagdadi shrugs his shoulders and hopes for the best. Undoubtedly this city and country are capable of great development. Probably only political trouble will hold it back. The stranger who has mixed with the people cannot help but hope that somehow or other means will be found to adjust the political situation satisfactorily, and that the natural genius of the people may have another opportunity to express itself.....

## PERSONAL AND GENERAL.

**To-day.**

August 25 (New Style).
August 12 (Old Style).
Julhija 21, 1339 A.H. of the Moslem Calendar.
Ab. 21, 5681 of the Jewish Calendar.

Mrs. Alec Tweedie has decided to remain in London during the autumn.

Prince Djemal-ed-Din has arrived at the Hotel du Palais, Biarritz.

Major-General Sir Frederick and Lady Sykes have returned to London from Le Touquet.

Sir Roper Parkington has left Harrogate for Broadwater Lodge, Wimbledon.

The Minister of the Kingdom of Serbs, Croats, and Slovenes, M. Michel Gavrilovitch, returned to London last week from Paris.

The engagement is announced of Lieutenant-Colonel A. T. McGrath, D.S.O., Royal Artillery, to Mrs. Rosita Forbes.

A marriage has been arranged between David Jardine Bethell, of the Sudan Political Service, and Erica Gwytherne de Grey, of 2, The Terrace, Camberley.

Prince Loftallah has arrived at Geneva to organise the Syrian Congress, which is due to open to-day, August 25.

It is announced that the coronation of the Emir Faisal as King of Irak took place on August 23 at Baghdad.

M. Bèla de Zottan, who for many years has been Hungarian Judge of the Mixed Tribunals at Alexandria, is in London as the Hungarian member of the Anglo-Hungarian Mixed Arbitral Tribunal.

The Ven. J. J. Beauchamp Palmer, Archdeacon of Kottayam, Travancore (South India), has been presented by the Dean and Chapter of Wells Cathedral to the living of Mudford (Somerset).

A marriage is arranged, and will take place in India in November, between Douglas Hendrie Currie, 18th Lancers, Indian Army, and Maud Vernon, youngest daughter of the late Lieutenant-Colonel G. W. Anson, of Garvock, Sevenoaks.

A marriage has been arranged between A. W. Harrison, son of the late H. A. Harrison, I.C.S., of Doghurst, Sipson, Middlesex, and Maud Elsie, widow of Charles Johnsone Mitchell, D.S.O., Oxford and Bucks Light Infantry.

Our Bucharest Correspondent writes (August 10) :—Colonel Arthur Poillon, American Military Attaché, and his wife have returned from Paris, and Captain A. Brickley, aide-de-camp of the former, has left Bucharest for the United States.

M. Nedkoff, Bulgaria's first representative since the resumption of diplomatic relations, has left Bucharest for Bulgaria to occupy a high post at the Foreign Office. He is being succeeded here by General Fitchoff, who has just arrived.

The betrothal is announced of James Kirkwood, of Bansra House, Raneegunge, and Toriburn, Ranchi, India, second son of the late John Kirkwood and Mrs. Kirkwood, of Denny, Stirlingshire, to Adela, elder daughter of the late Edward Joseph Williams, Bristol.

The engagement is announeed between Olive, youngest daughter of the late Stuart Snell, of Bromley, Kent, and of Mrs. Stuart Snell, of 24a, Sinclair-gardens, and Ronald Melville Pym, of Mirror, Alberta, Canada, fifth son of the late Bishop of Bombay.

A marriage has been arranged to take place in October between Captain J. S. Morrow, attached 1-3rd Queen Alexandra's Own Gurkha Rifles, of Londonderry, and Violet, only child of Mr. and Mrs. Norman Robinson, Glenlyon, Sydney-parade, Dublin.

The engagement is announced between Richard Marsh Crofton, Indian Civil Service, second surviving son of the late Captain D. Crofton R.N., D.L., and Mrs. Crofton, of Lakefield, Mohill, Co., Leitrim, and Olive, younger daughter of Mr. and Mrs. C. Stewart Cox, 23, Redcliffe-gardens, S.W.10.

The engagement is announced, and the marriage will shortly take place, between Robert Tor Russell, D.S.O., P.W.D., Delhi, son of S. B. Russell, of Gosmore, Hitchin, and Ethel Frances Hatch, M.B.E., younger daughter of H. F. Hatch, retired, Bombay Civil Service, and Mrs. Hatch, of Hitchin, and granddaughter of General W. S. Hatch, R.A.

A marriage has been arranged between Ralph Clarmont Skrine, elder and only surviving son of Surgeon-General H. W. Stevenson, S.C.I. (I.M.S., retired) and of Mrs. Stevenson, of Balladoole, near Castletown, Isle of Man, and Barbara, elder daughter of the late Jonkheer R. J. R. Boreel, and of Madame Crommelin, the Liberian Legation, 13, Eaton-place, S.W.1.

### APPOINTMENTS AND PROMOTIONS.

**Mirza Hossein Khan Alai, who was formerly Persian Minister at Madrid, and who has now been appointed to Washington, left London last week to take up his new post.**

The King has approved of Colonel C. A. C. Godwin, Indian Army, being appointed Aide-de-Camp to the King, Indian Establishment, vice Colonel A. Le G. Jacob, Indian Army, promoted Major-General, with effect from March 20, 1921..

The King has approved of the following appointments: M. D. del Burgo, as Consul of Roumania at Hull; Senor Don Daniel Castel v. Marco, as Consul of Spain at Calcutta; -Senor Don Miguel Maluquer v Salvadorm as Consul of Spain at Bombay, with jurisdiction also in Ceylon and Aden; Dr. E. F. Underwood, as Consul of Liberia at Bombay.

The Hon. William Augustus Forbes Erskine, M.V.O., who is expected to succeed Sir Arthur Peel as British Minister at Sofia, entered the Foreign Office in 1894. He was Acting Third Secretary at Teheran from June 1901 to December 1903, and became Acting First-Secretary in the Diplomatic Service in 1906, receiving substantive rank in 1910. After holding appointments at Stockholm and Rome, he was nominated in November 1913, British Delegate on the International Finance Commission at Athens, where he was twice Chargé d'Affaires between 1914 and 1917. He was promoted Minister Plenipotentiary at Havana two years ago.

In a recently published list the following names, the recipients of decorations and medals awarded by the Allied Powers at various dates to the British Forces for distinguished services rendered during the war, occurred: By the Sultan of Egypt, Order of the Nile, 3rd Class, Major B. H. Archer, O.B.E., 18th London Regt.; By the late King of the Hellenes, Medal for Military Merit, 3rd Class, Lieut. G. H. Law, R.A.; By the King of Roumania, Order of the Crown of Roumania, Cavalier, Lieut. G. N. Carey, Manch, R.; Temp. Capt (Temp.

Digitized by Google

Lieut.-Col.) R. J. McAlpine, O.B.E., M.C., Spec List. By the King of the Hejaz, Order of "El Nahda," 3rd Class, Capt. W. D. G. Batten, 3rd Gurkha Rifles, I.A

## OBITUARY.

The death has occurred of Mr. Percy Beart Thomas, C.I.E., Inspector-General of Police of the Madras Presidency.

We regret to learn as we go to press that Mr. Winston Churchill, Secretary of State for the Colonies, and Mrs. Winston Churchill have suffered a bereavement by the death of their three year old daughter, Marigold Frances.

The death occurred last week at Geneva of Lieutenant General Sir David Henderson, K.C.V.O., K.C.B., D.S.O., Director-General of the League of Red Cross Societies and formerly Director of Military Aeronautics. Among many distinguished services was his part in the Sudan campaign of 1898.

It is announced from Athens that M. Rhallis, the former Greek Premier, died last week from cancer. M. Rhallis, who it will be remembered, succeeded to the Premiership of Greece last November when M. Venizelos resigned, and King Constantine returned to the throne, first made his mark in 1890 as leader of the "Young Greek Party." Four times before the advent of M. Venizelos he had been Premier, but after the fall of King Constantine in 1917 he withdrew from politics, and though he returned in 1920 to form the Restoration Cabinet, ill-health and other causes led to his final retirement in the beginning of the present year.

## SKETCHES OF MOROCCO.

There was evidence of astonishing versatility in the exhibition of paintings, water-colours and etchings by Mr. T. Blake Wirgman recently held at the Alpine Club Gallery, Bond Street. For not only was mastery shown in the different *media*, but successful attempts were made in things so opposed as portrait and landscape, or mood and movement. Of all Mr. Wirgman's work, which included scenes from Great Britain, Spain, South America, and Morocco, we liked best, apart from his portraits, his Moroccan sketches. His representation of such direct scenes as "Buntingford," or "Puy de Dome Auvergne," may have been, certainly were more refined and exquisite in details than these Moroccan subjects; but we did not see anything in the exhibition better than the incisive accuracy of "Muley Ali, the Sheriffa of Wazan," or than the extremely suggestive half-light of "Loading Camels, Morocco," or of "Saddling Horse at Dawn." Mr. Wirgman's colours are not rich or grand, but his fidelity of observation alone is sufficient to make all his work satisfying. What he can do when his vision is direct and intellectual can best be seen in the fine sketches of Mazagan, and of Casablanca; and how, when his vision is more poetical, his limitations are revealed, is obvious in his management of a "South American Sunset," and of "Casablanca after Sunset."

This was a thoroughly interesting exhibition, and for the sake of "Widow placing Myrtle on her Husband's Tomb," and of "A Street in Fez" alone it was worth visiting.

## NEWS IN BRIEF.

Marshal Lyautey arrived in France last week from Morocco.

Parcels may now be sent by post to Albania—Valona only—and to the State of Fiume.

Famine is reported to prevail in Azerbaijan. The people are stated to be flocking into the fields in search of grass to eat, the Red Army having seized all the corn in Baku.

The foundation of a large Doric temple have been discovered at Sicyon. The temple, which was destroyed during the Roman epoch, is probably that of Artemis.

Part II. of the Administration of Justice Act, 1920, in which provision is made for the reciprocal enforcement of judgments in the United Kingdom and other parts of the Empire is now extended to Cyprus.

The impeachment of the members of the Radoslavoff Cabinet, which was responsible for Bulgaria's entry into the war, has been referred to the Appeal Court. The defendants, who include two Generals, will be tried in default.

The Viceroy has appealed to the Princes and people of India for contributions towards the sum of 14½ lakhs (about £96,500) required to complete the Victoria Memorial, so that the building may be completed by December, when the Prince of Wales intends to open it.

## KING ALEXANDER OF THE SERBS, CROATS AND SLOVENES.

It is a matter for keen regret that the death of King Peter should have occurred at a moment when his successor is abroad and ill. Fortunately the news of the condition of the new King of the Serbs, Croats and Slovenes is more reassuring, and the hope is entertained that he may yet be able to leave Paris before many days elapse, in order to return to Belgrade, in the event of it being established that an operation is not necessary. King Alexander's coronation, however, which had been fixed for August 26, will now have to be postponed.

During the strenuous period of his Regency King Alexander has won for himself golden opinions both at home and abroad. He has proved a conscientious ruler, and his zeal and tact give promise of a successful reign. The difficulties of his position however, are apparent. He succeeds to the throne of a new State, which, in spite of the fact that it realises the dreams of generations of the Southern Slavs, has not yet found itself and may yet have to weather some storms before it enters upon an expanse of quiet water. In England the new King has frequently been a welcome guest, and in his own person constitutes an important link between the two countries.

### Memorial Service for the late King Peter.

A Requiem Mass for the late King Peter Karageorgevitch was performed at the Russian Church in London on August 23. H.R.H. the Duke of Connaught, accompanied by his A.D.C. Captain the Hon. F. E. Needham, M.V.O., attended on behalf of His Majesty the King. Among those present were His Excellency the Minister of the Kingdom of the Serbs, Croats and Slovenes and members of the Legation Staff, Major-General Sir John Hanbury-Williams, K.C.B. Marshal of the Diplomatic Corps, and the members of the Diplomatic Corps in London.

The service was conducted by the Very Rev. Eugene Smirnoff, assisted by the Rev. A. Theokrittoff.

The Court has gone into mourning for the late King for a fortnight from August 16.

Our Cyprus correspondent writes:—A member of the Sivitanides family, some of whom have made large fortunes in Egypt have left by will £250,000 to King Constantine of Greece, for the founding of an industrial and technical school at Athens; as well as other sums for the benefit of various Greek institutions in Egypt While some surprise is expressed that nothing has been done for Cyprus needs, warm tribute is paid in the press to the generosity of the benefactor.

## THE PROBLEM OF ASIA MINOR

The statement of the Supreme Council's case in regard to the problem of Asia Minor that Mr. Lloyd George gave to the House of Commons last week was necessarily condensed; but we may infer that it was intended to present all the points which seemed relevant to the Prime Minister in justifying the policy adopted by the Allies. As the whole Turkish question is still in the melting-pot, it is of interest to examine the statement with a view to finding out, in the light of subsequent events, whether the Allied Governments acted for the best in all the attendant circumstances, or whether other methods and other measures reasonably open to them with the knowledge then available might have saved the present *impasse* and brought about a settlement which seems still postponed indefinitely. The basis of the Treaty of Sèvres, Mr. Lloyd George explained was that the parts of the Ottoman Empire which were Turkish should remain Turkish, and that the non-Turkish parts should be allotted to those who comprised the bulk of the population. In order to determine which parts were Greek, commissions were appointed by the Allies, presumably working and deliberating separately, "to investigate the whole problem of boundaries and population, and to a certain extent to go into the history of those countries." The Commissioner appointed by Great Britain was Sir Robert Borden, Prime Minister of Canada, and by his report, as well as by the reports of the various experts who assisted him, Smyrna and Thrace were assigned to Greece. The French experts "came to exactly the same conclusion," and the decision was accepted by the Supreme Council. Owing to "the danger of anarchy and its consequences in those various areas" France occupied Cilicia, the Italians occupied Southern Anatolia and the Greeks were invited by the Supreme Council to occupy Smyrna and Thrace. When the Nationalist insurrection occurred the Greeks were anxious to deal with it immediately, but were "held up" by the Allies. Mr. Lloyd George implied that this action was a mistake, as he interposed the remark that what had happened since showed that M. Venizelos was quite justified in the view he took then that he could have disposed of the insurrection without the slightest difficulty. The Allies, however, attempted mediation, and "when we made certain proposals to King Constantine, unfortunately both parties refused to accept them." Of the two alternatives, compulsion and leaving Turks and Greeks to fight it out, the Allies chose the latter on the ground that, they would have had to compel both parties and they could not compel the Turks. Both these races, Mr. Lloyd George holds, will be easier to deal with when their limitations have been brought thoroughly and clearly to their minds. "The time for mediation," he added, "has not yet arrived. When it does, I have no doubt the Treaty of Sèvres will have to be reconsidered. You cannot expect a country that has waged a successful war to accept the same terms as a country prepared to forgo its full claims to avert the risks of war."

The first point that will have struck those who listened to or have read the British Prime Minister's statement on the recent deliberations of the Supreme Council in Paris is the difference between his handling of the Silesian question, and that of the Near Eastern problem. He has come to grips with the former; with the latter he is merely speaking to his brief, which has no personal interest for him. It would be unreasonable to expect a single mind to have the same grasp of all the complicated problems that awaited settlement at the end of the war; that Mr. Lloyd George has failed to master the Near Eastern question cannot be a grave indictment in the circumstances, but we are probably right in supposing that it has been a grave misfortune for the Near East. In the first place it was a mistake, unless he had unsuspected knowledge of the affairs of South-Eastern Europe, to entrust to Sir Robert Borden the difficult task of unravelling the tangled skein of Near Eastern history, with its paradoxes, overlapping intrigues, and falsifications. The evidence of the most perjured witness may seem altogether credible, if he is not cross-examined with knowledge. Mere ability and impartiality are not enough for the man who would draw up a just settlement of the Near East; without knowledge and vision he would be capable of the worst injustice. It is for this reason that the settlement which commended itself to the Allies has broken down; but so little does the Supreme Council appreciate the fact that Mr. Lloyd George appears to imagine that only a "reconsideration" of the Treaty of Sèvres is required to secure lasting peace in the Near East. The outlook for the future would be brighter, if the Supreme Council welcomed the tearing up of the Treaty of Sèvres as an opportunity for revising the whole of its Near Eastern settlement and resolved that with more time at its disposal it would not perpetuate its past mistakes.

The day has not come when the settlement of the Near Eastern problem can be left to the peoples immediately concerned. If the goal that Europe has to set itself in order to avoid a repetition of the disastrous war is unification, the principle must first be applied in the Balkans; there it must be applied from above, and not left for possible application from within. Economic and other facts, as well as the lines of future development, call for closer consideration in determining that settlement than dubious historical data presented according to prejudices of the exponent. The most superficial knowledge of Near Eastern affairs would have told the Allied Governments that the occupation of Smyrna by Greece could only produce the very conditions that the French were being sent to Cilicia and the Italians to Southern Anatolia to prevent. Unless the desire is to perpetuate the existing muddle, the Supreme Council must adopt a more resolute line of action than the issue of indirect appeals to Greece. She is warned not to make the cardinal error of insisting upon exaggerated terms. But the attitude of the Entente Governments compels her to put her claims high, because so long as the senseless boycott of King Constantine is maintained, she is debarred from that intercourse on an equal footing which is essential to reasonable negotiation. If Greece take the Allies at their own word, then the war in Asia Minor is exclusively a matter between herself and the Turks, and as she feels that she has a chance of wiping the latter off the map, her training and traditions must prompt her to risk much in making the attempt. If, on the other hand, she is reminded that she is a member of the Great Alliance, and that the future of Turkey is the concern of all the Allies, less would be heard of Greek "claims." As things are, Greece through the personal pique of the members of the Supreme Council, has been dropped from the Alliance, and the world is treated to the unedifying spectacle of the organisation that defeated the Central Powers confessing its impotence to deal with her. When a just settlement has been evolved there will be no need to talk of bombarding Greek harbours or of spending scores of millions in an Anatolian campaign. The Supreme Council will have other means of imposing a settlement; it is powerless to-day because its cause is an unjust one, and the settlement it seeks to impose glaringly at variance with the principles for which the war was fought.

# BOLSHEVIST RULE IN CENTRAL ASIA.

## III. The Tragedy of Azerbaijan.

(*By Sirdar Ikbal Ali Shah.*)

No region, perhaps, has suffered so much at the hands of the Bolshevists as the fair land of Azerbaijan. The most striking feature of the whole situation has been the extraordinary development of a system of terror, which the agents of the Soviet Government have thought fit to visit upon the helpless Azerbaijanians. The reason is not far to seek; for unlike the Uzbeks of Bokhara and the nomads of the Steppe, the people of Azerbaijan are blessed with a shrewd understanding, and have a broader outlook on life. The common sense of the Moslem population there had for long condemned the Moscow philosophy, and refused to be lured into a position which was neither practicable nor profitable. But it was deemed to be necessary for the Soviet cause to implant itself in Azerbaijan at all costs, in order to come into close touch with Persia and Asiatic Turkey. The opposition of the Azerbaijanians had, therefore, to be subdued by force of arms. Force was thus employed not only to subjugate; the Reds found it the only means of preventing a general rising against them in the newly occupied country.

Strict and constant requisitioning of grain and live stock has thoroughly aggravated the peasant population. Large numbers of once very prosperous farmers, having abandoned their homes, have taken refuge in the hills, and visit their wrath in the shape of night raids on the local Bolshevists. In most cases the confiscation of the entire property of irreconcilable Khans and Begs has turned the aristocracy against the invaders. The new Government, working under the Soviet authorities, has drawn up a very elaborate scheme for opening a large number of schools throughout the country, but the people are more concerned about food for the body than food for the mind. Despite a very active propaganda, which endeavours to preach the blessings of Lenin's doctrines, the people have not failed to notice that the new order of life is chiefly responsible for the high prices.

Prices are not only very high, but there is an entire lack of all manufactured goods. The working classes, who in the beginning were the prop of the Bolshevists in Azerbaijan, and were dreaming of all the luxuries of wealth and equality, are also disillusioned—for all that the Soviet "Comrades" are able to do now is to eke out a miserable existence, procuring little better than famine rations. The "Chrezvychaika" appointed by the Reds had to see that none dared to raise a voice of protest.

In practical politics the "Chrezvychaika" plays a very important role, as he is responsible for the so-called Soviet elections. A greater farce would be difficult to imagine than the election, for the Communists are inevitably elected. Lists of chosen candidates are read to the electorates and then it is asked whether there are any dissenters. Naturally there are no objections, for dissension means an indirect challenge to the terrible authority of "Chrezvychaika." Such sham elections are always followed by laudatory articles in the newspapers subsidised by the Soviet Government.

The 'Red' army consists for the most part of men who have been conscripted. They are ill clothed and ill fed, and not in the least anxious to see any active fighting. Had it not been for a very efficient propaganda in the army the fighting element in the Soviet Azerbaijan would have revolted long ago. Not a few times the Red commanders have held out to their units prospects of plunder in regions hitherto unattacked by the forces of the comrades. The Soviet authorities are running no risks, and have established a system of espionage. No man is safe from it, and woe betide a man who comes under the "observation" of a Bolshevist spy. I write from personal experience of this fact.

The officers in the Bolshevist army, stationed at different parts of Azerbaijan, are a motley crew. While the commander of one division may be an ex-clerk, that of another may very possibly be a man who, in the pre-Bolshevist period, was a tramway conductor. Young men are sure to receive special attention when a command falls vacant. The army is having a very difficult task in fighting disease, for epidemics of malaria and typhoid, together with cholera are very prevalent. While at Barfrush in the southern Caspian region, I heard that the last named disease had increased in its prevalence since the arrival of many workmen from Kuban and Georgia. Medical assistance is difficult to procure. Hospitals which I visited are in the very worst state of sanitation; patients are neglected, and not one of them is supplied with a pillow.

The general effect of the Bolshevist regime has been to alienate in the most definite manner the sympathy of the Moslem population. Bribery among the officials is the usual method of securing immunity for the individual from requisition or mobilisation. The Red "sailors" have a most privileged position; while a soldier may be starving, a naval officer has luxuries at his command. A civilian may be shot on the least suspicion of indulging in speculation, a sailor, it seems, is allowed to explore any avenue whatever to swell his cash deposit. It has, for instance, often been noticed that warships leave Baku for Resht or Astrakhan, laden to their utmost capacity with every kind of article for sale, and the high naval command, in the person of "Comrade" Raskolnikov, simply allowed them to pass unheeded.

The Azerbaijanians are thoroughly tired of the state of affairs which Bolshevism has brought in its train, and they look forward to the day when they may be able to rise against the Russians, Bolshevists or otherwise. For the present they are compelled to remain in this wretched condition, and nurse their wrath, because the Bolshevist system is too firmly established to be overthrown without a well organised effort.

## SIR STANLEY MAUDE.

In the House of Commons on August 13, Sir R. Sanders (Under Secretary, War Office), in answer to Mr. Forrest (Co. L., Pontefract), said: A memorial to the memory of Lieutenant-General Sir Stanley Maude and his comrades of all ranks of the 13th Division who were killed in Mesopotamia has been erected on a site overlooking the Diala River. In addition, as a result of purely voluntary subscriptions, several memorials dedicated to Sir Stanley Maude either have been or are being erected in Mesopotamia. At the time of the death of this gallant officer, a civil and a military fund were opened with a view to commemorating his distinguished services in Mesopotamia. The very considerable sum subscribed by civilians of whom some 90 per cent. were natives of Mesopotamia, has been devoted to the erection of local war memorial hospitals—such as that now under construction at Basra—schools and similar public buildings. With the fund spontaneously subscribed by the British and Indian troops in Mesopotamia—the individual subscription being limited to one day's pay—it is proposed to erect an equestrian statue of the late Sir Stanley Maude at Baghdad.

## THE NEAR EAST IN PARLIAMENT.

### HOUSE OF COMMONS.

*August* 15.—Commander Kenworthy asked the Prime Minister whether any British firm of armament-makers had been permitted to furnish the Greeks with munitions since the last conference of the Greek and Turkish Governments in London; and whether British firms would be permitted to sell or supply arms to the Turkish forces defending their home-lands against Greek invaders. The Prime Minister replied that His Majesty's Government had no control over the export of arms and munitions in this country except that provided by the Orders in Council of March 24, 1921, which entitle the Government to refuse licences for the export of certain arms and ammunition and similar goods. The full list was published in the Board of Trade Journal of March 31, 1921. No licences have been issued for the export to Greece and Turkey of any articles on this list since January last. The answer to the last part of the question was in the affirmative, but he was not prepared to accept the hon. Member's description of the roles of the respective belligerents.

*August* 16.—Mr. Wood informed Col. Archer Shee that immigration of Zionists and others Jews into Palestine, which was temporarily suspended as a result of the recent disturbances at Jaffa, has now been resumed and is proceeding under close supervision.

Commander Kenworthy asked whether any blockade of Turkish coasts has been declared by either Greece or the Allies; what is the extent of the coast blockaded; and whether the British Navy is being used to protect British merchants engaged in the arms traffic, to either the Greek or Turkish forces from molestation. Mr. Chamberlain replied that the answer to all parts of the question was in the negative.

In the debate on the second reading of the Consolidated Fund Bill the Prime Minister made a statement with regard to the situation in the Near East, which is dealt with fully in the leading article of this issue.

*August* 18.—Mr. Harmsworth, replying to Col. Sir Charles Yate, stated that the dissolution of the South Persia Rifles was already in progress and that about one-third of the force had been disbanded. Negotiations were, however, being carried on with the Persian Government with a view to maintaining some part of the force in being, and with regard to the compensation to be paid by Persia to the Government of India for the expenses incurred in maintaining peace and security in Southern Persia during the last few years by means of this force.

In reply to Major Barnett Sir Robert Horne said that the British Government owed to the late Government of Azerbaijan certain sums in respect of transactions which took place during the occupation of parts of the Caucasus by British troops after the Armistice with Turkey. The amount at present ascertained was approximately £450,000, but the exact amount could not be stated pending the results of the examination of the accounts of the local military authorities which was at present taking place.

Mr. Wood informed Mr. Ormsby Gore that a full report had been received from the High Commissioner of Palestine on the administration of that country during the past year on August 17, and that this report would be published as soon as possible. The question of introducing constitutional developments in Palestine was now being discussed by the High Commissioner with representatives of local opinion in Palestine, and the matter was also being discussed with the Colonial Office. There was no intention of perpetuating any anomalous or unfair discrimination between different races or creeds which might have been made under the Turkish regime in this matter. All possible steps were being taken by the police authorities in Palestine to collect fire-arms in the possession of unauthorised persons. The report of the inquiry into the recent disturbances at Jaffa had not yet been received and until it had been received he would prefer to reserve judgment.

Mr. Churchill informed Sir John Rees, who asked questions regarding the official language in Malta, that Italian being the official language of record of the courts in Malta, a British subject or any other person who, although knowing English, was unable to swear that he had not sufficient knowledge of Italian fully to understand and follow all the proceedings if conducted in that language, was tried in Italian. No disability was attached to a person who was tried in a language with which he was thus familiar. The present law did in practice provide separate lists for English and Italian speaking jurors, those who spoke English and not Italian forming the special jurors, and the Italian speaking the ordinary jurors.

On the motion for the adjournment the Prime Minister gave an account of the proceedings of the recent conference with the Prime Minister and representatives of the Empire. He informed the House that the question of Egypt had been considered, but that it was difficult for him to say anything because of the negotiations going on at the present moment with some very distinguished Egyptian representatives. He was hoping to have the pleasure of seeing the head of the delegation himself on the following day. He was sincerely desirous of an understanding which would make it possible to make Egyptian freedom and British interest coincide. He was very sanguine that such an arrangement could be achieved.

Sir Donald MacLean expressed the hope that there should be no avoidable delay in dealing with this most urgent problem which was of such vital importance to the Empire.

Mr. Ormsby Gore hoped that as soon as the House met again the Government would avail itself at the earliest opportunity of taking the House fully into its confidence in regard to all proposals connected with Egypt, but he fully realised the need of saying nothing which would in any way interfere with the good progress of the present negotiations which he understood were now proceeding smoothly.

## THE STORY OF A SHELL.

Our Zagreb Correspondent writes (August 9):—The latest sensation in Belgrade is a legacy of the bombardment, nothing more or less than the discovery of an unexploded shell buried in the ground in the Pozorishna Ulica. It was an immense thing, from one of the big Austrian 30.5 c.m. siege guns, of the type that did such damage at Liège, Namur and Maubeuge. A military commission of experts pronounced it extremely dangerous to attempt either to remove or destroy it, as the slightest concussion would probably produce a terrific explosion, and referred the matter to the police, as a purely civil business, since no military lives nor property were concerned. The police, however, declined with thanks, averring that shells, as munitions of war, fell within the province of the military. Meanwhile, a Government office in the immediate neighbourhood shut up shop, and all people who lived near spent most of their time in cafés and restaurants, returning home on tip-toe to pass a few hours anxiously attempting to sleep, talking in whispers. It looked like a slump in rents in that district, when the owner of the house offered a reward of 5,000 dinars to anyone who would rid him of the nuisance. A Government official from a peaceful ministry, who had previously worked at Kragujevats arsenal, undertook the delicate job. With extreme care, little by little, he removed the earth round and finally exposed the monster completely. With the help of eight brave men, he slung it as gently as could be in a hammock, walked it steadily down to the Danube and consigned it to the waves, to the immense relief of the owner, the neighbours, and no doubt also of the police and military authorities.

The shell was fired from one of the identical heavy Skoda siege guns which had battered Antwerp and Liège in the early days of the war. It came unscathed from the western front and was set in position in the Laudonov Shanats at Zemun to fire on Belgrade. It was well camouflaged, but had not thrown many shells before the Serbian airmen spotted it. They succeeded in putting it out of action on the second day, by dropping bombs on it which laid out a number of the crew, who were surprised to find that their reception on the Danube front was hotter than it had been in Belgium.

THE
EUPHRATES & TIGRIS
STEAM NAVIGATION CO., LTD.

Regular Service of Passenger and Cargo Steamers running at frequent intervals between BUSREH (Persian Gulf) and BAGHDAD on the River Tigris, and between MOHAMMERAH (Persian Gulf) and AHWAZ on the river Karun.

Cargo booked on a Through Bill of Lading to BAGHDAD and/or AHWAZ by the chief liners sailing from the U.K. Continent and India.

The engagement of land transport for Cargo to towns in the interior of Mesopotamia and Persia undertaken on behalf of Shippers of Through Cargo to BAGHDAD and AHWAZ.

# COMMERCIAL & FINANCIAL SECTION.

## NOTES AND NEWS.

Devonshire Square.
E.C. 2,

**A Successful Tender.**

After all the criticisms that it has fallen to my lot to make regarding contracts that have been lost by British firms owing to their inability to quote sufficiently low terms it is with special pleasure that I am able to record the success of a British firm in tendering for the supply and laying of 105 miles of water mains in Bombay. Messrs. Braithwaite and Co., of Calcutta, are the successful tenderers, and their tender for the contract, which will be carried out with English steel, was roughly £1,640,000. Previous experiences naturally suggested that the American manufacturers would easily outbid British firms, but as a matter of fact the second lowest tender was that of Sir John Jackson, which was £2,333,000, while the American tenders ranged from £2,500,000, to just over four million pounds. It would perhaps be unwise to make too much of this success, but at any rate it does seem to indicate that the time has ended when our foreign competitors can have things all their own way.

**The Rupee Rising.**

After its prolonged depression it is quite refreshing to be able to refer again to the rising rupee. At the time of writing the quotation is 1s. 4,11-16d., while at the end of last week the rupee ultimately touched 1s. 5⅛d. Needless to say this movement has been the subject of lively comment in the City. The view generally taken is that the cause is to be found in speculation initiated in the belief that the excellent monsoon will give rise to the development of the export trade with a corresponding growth of demand for rupee exchange on this side. But while the monsoon has so far been good it would appear, to say the least of it, to be going too far in taking it for granted on that account that there will be heavy shipments of jute, and other Indian products. The argument in normal times is sound, but who can tell to-day that there will be the markets that justify the shipments?

**The Outlook.**

Supposing for a moment that the speculators are right in their hypothesis as regards the immediate future, and that in due course the export trade develops. In that case a further rise may be looked for in the exchange, but how far it will prove permanent is another thing altogether, and depends on quite a number of doubtful factors. The demand for India's produce depends only to a limited extent on the capacity of the home market. Had it been otherwise the rupee would not have been so low for so many months. India in common with the rest of the world has suffered from the fact that one result of the war has been to remove temporarily large areas from the world's markets. Until Central Europe and Russia are again in a position to take their normal supplies India will have great difficulty is disposing of her surplus stocks. That fact coupled with the general situation gives reason for doubting whether the improvement in the rupee that is expected can prove anything but transitory.

**The Slump in Oil Shares.**

The vicissitudes in oil shares have been the outstanding feature of events on the Stock Exchange during the past few days. First came a remarkable slump, then a reaction; and with the opening of the present week liquidation has set in again. A comparison of present prices with the highest that ruled last year gives some remarkable results. The main reason for the fall is to be found in the general conditions, but it must be emphasised that the high prices that have obtained were not justified *prima facie*. They were based on the expectations of the future, and as just at present buyers are not indulging in any particular optimism there is little or no support for the market. It will be rather unfortunate if present conditions obtain through the autumn, for we are then promised quite a number of new issues, including I believe, at least two for the Near East.

**P. and O. Banking Corporation.**

In a circular letter to the shareholders in this company Lord Inchcape announces that a refund is to be made of the extra £37,500 that had to be paid when the concern was launched. It will be remembered that it was originally intended to issue the prospectus in January, 1920, but that it was delayed at the request of the late Chancellor of the Exchequer. Then came an increase on the capital duties on new issues in the Finance Act, and companies which had postponed the issue of prospectuses found themselves in the position of being penalised for meeting the wishes of the authorities. As the result of representations a clause was inserted in this year's Finance Act exempting from the operation of the new duties, companies which would otherwise have been promoted up to January, 1920. "You will be glad to know, as I am," says Lord Inchcape in the letter in question "that there is still justice to be done to the individual when the decision rests with the House of Commons."

REPORTS FROM OUR OWN CORRESPONDENTS.

## EGYPT.

Cairo, August 11.

**New Source of Revenue.**

Following on the recent introduction of an excise duty a decree has now been published extending this impost to liquids such as beer, cider, castor-oil, turpentine, sulphuric acid, and ammonia; to provisions such as coconut oil, tinned meat, and fish, condensed milk, gelatine, dried fruits, tea, coffee, cocoa, and pepper, and to construction material, such as zinc and lead sheets, lead tubes, window-glass, marble, asphalt, iron and steel bars, angles, girders, sheets, pipes, etc. This excise will be levied on these articles whether imported or locally produced, and where they are imported the excise duty will be collected in addition to the ordinary import duty. At the same time as these new duties have been introduced an increase has been made in the fees for all land transactions, registered in the Mixed Courts or Mehkemehs Sharia, the fees being raised to 5 per cent. *ad valorem*.

## ROUMANIA.

Bucharest, August 10.

**Parcels Post.**

A commission has been appointed to regulate the parcels post service with foreign countries. It has been decided, in principle, that parcels may weigh up to 10 kilos, while with regard to the Customs officials' visits the system obtaining in Germany and Switzerland will be adopted. The commission will also deal with the question of packages with declared values in foreign currencies in order to determine the equivalent sum to be maintained in lei in case of loss.

**Miscellaneous.**

The economic convention with Austria expired on August 1, and negotiations for the conclusion of a new convention will begin on August 15. The Roumanian Commission will start next week for Vienna.

The proprietors of the various rapeseed oil factories have requested the Minister of Industry to prohibit the export of this seed in order to safeguard their supplies. They declare that they will have to suspend work and close their factories if this is not done.

Three representatives of the Manchester Co-operative Societies have paid a visit to the head-quarters of the Peasants Co-operative Societies. They stated that their societies desired to establish a close connection with the co-operative movement in this country.

The arrival of the animals to be delivered by Bulgaria has been postponed until September 14, on account of the excessive heat.

**BRADBURY, WILKINSON & COMPANY, LIMITED.**
**25 & 27, FARRINGDON ROAD, LONDON, E.C.1.**

*Designers, Engravers, and Printers of*
**Bank Notes, Postage Stamps, Bonds, Share Warrants, Coupons, Letters of Credit, Cheques, Bills of Exchange, & all Monetary Documents.**

*Telegraphic Address: BRADBANK, LONDON.*

The Ministry of Industry announces that machinery and parts of machinery that cannot be manufactured in the country are exempt from import duty in compliance with the law for the encouragement of industries

## SALONIKA.

(*From our Sofia Correspondent.*)

Salonika, August 11.

**The Commercial Situation.**

The situation here although not too bright is much better than in the majority of Oriental and Balkan towns. The drachma is maintained at an approximate rate of 66 to the £1 sterling, and goods are arriving from abroad in fair quantities. Of these goods however, about 70 per cent. represents merchandise in transit destined for Yugoslavia. One meets with complaints on all sides regarding customs duties, thefts from the quays, increased tariff duties, and the like, but notwithstanding all this there is a good amount of commercial activity. Thrace, which was formerly a barren field for commerce, is now demanding a steady supply of certain goods, which is largely due to the needs of the Greek Army stationed there.

No trade worth speaking of is being carried on with Roumania and Bulgaria, but the tobacco industry is very much alive, and some American firms are making large purchases of raw tobacco. It must be remarked that great strides have been made in the manufacture of cigarettes, and some of the best local brands can be very favourably compared with those sold in the West End of London.

Owing to the fact that the great bulk of the manufactured goods and produce was imported into Greece at a time when the drachma was at a very high level, prices are not at all high as a result of the recent fall in the exchange for those possessing English, American, and other currencies of a like value. Even for a Greek, there is no abnormal rise in the cost of living, and to give an example the minimum train fare before the war was 15 lepta, and is now only 25. The cost of labour has also risen very little indeed, perhaps 60 per cent. at the most. Generally speaking Salonika is not dear, and one is able to buy almost anything one wants.

## YUGOSLAVIA.

Zagreb, August 9.

**The Coming Loan.**

The passing by the Skupshtina of the bill authorising an external loan of 500 million francs is welcomed in Zagreb, where it is hoped that the loan will be successful and the rate of the dinar improved.

## CYPRUS.

Nicosia, August 9.

**The Economic Situation.**

The outlook is far from satisfactory. Returns just published show that for the quarter ended March 31 last imports amounted in value to £345,003 as against £564,670 for the corresponding period in 1920 and exports to £160,296 as against £262,570. Thus a sum of £184,707 goes from the island, while the depression in almost all branches of trade continues. Again the papers urges with very good reason that much greater economy and self-denial are needed on the part of the people, while Government is again urged to relax present regulations that prohibit the export of various articles and stores which conditions are now said to justify. As regards luxuries, there seems no disposition to be behind the times and a mania for the newest fashions prevails.

Digitized by Google

## ASIA MINOR.

Smyrna, July 28.

**General News.**

Major-General Raymond de Candolle, C.B., C.E., has taken up his duties as general manager of the Aidin Railway Company, which runs from Smyrna to the Egedir Lake, and has visited the part of the line which is free from the Kemalist operations. To-day he left for Ouchak on the French line, accompanied by Mr. Martin, assistant-general-manager of the Société de Chemin de Fer de Cassaba.

The abnormal heat in Smyrna, where hot north winds have prevailed for some considerable time, has caused the hotels at the seaside resort, Lidja Chesmé (opposite Chios), to be filled to overflowing by the European colony. Unfortunately the hot winds are causing much shrinkage in the figs and grapes crops on which the commercial prosperity of Smyrna so greatly depends.

## INDIA'S PRECIOUS STONES.

(*From a Correspondent.*)

In bygone ages the nations drew from India a great part of their supplies of precious stones. Considerable interest attaches, therefore, to the recent discovery of a rich sapphire mine in Kashmir, and a fresh prospect of diamonds in the Central Provinces. Sapphires of fine quality used to be mined in Kashmir, but centuries of working have almost exhausted the old sites. As ancient is the diamond industry in Southern India, in the northern part of the Indian Peninsula, and in the Central Provinces, but in late years it has become very limited owing to lack of fresh workings.

Few are aware to-day of the immense resources of India as regards precious and semi-precious stones, the mining trade of which has never been properly developed. There are mined the diamond, ruby, sapphire, spinel, tourmaline, garnet, rock crystal, and various forms of chalcedonic silica, jadeite, and amber. At the present time the ruby and jadeite are the only stones produced in India of any great value. Ruby mining is carried on in Upper Burma, and, next to petroleum, is the most profitable of the mineral resources of the State. A few years ago one ruby of seventy-five carats was taken out, and it realised £35,000, and in 1914 others of about equal worth were obtained.

In the same ruby-bearing gravels of Burma are found the yellow, white, blue, and green varieties of the sapphire. The spinel is also got in large quantities in Burma and a fine quality of tourmaline stones of blue, green, and black colouring is found in Upper Burma. Beryls are found also—many of good value—but many more so fissured as to be of little worth. Garnets are mined in Kishangarh, Jaipur State, and form a considerable industry. Rock crystal, that is cut by the natives for cheap jewellery, known as "vallam diamonds," is found in Tanjore, Madras Presidency, and another quartz crystal, obtained in Kalabagh, is cheaper, and is used for making necklaces that are so popular among the native women.

Chalcedonic silica, called India 'hakik,' and taking in many varieties of agate, is mined in the Deccan. Agates and cornelians are cut and prepared for the market at Cambay, the Madras Presidency. The agates come mostly from the State of Rajpipla, and large quantities of them are shipped to Europe and China for use in the jewellery trade.

The turquoise of India, which has been famed for many centuries, and celebrated by Eastern poets, is obtained in various parts, but large quantitites of it in its finest form come from Sikkim and Tibet—that from the second country being harder and dark or blue has therefore greater value. It is possible, then, that at some future date India may become again a great supply source of precious gems.

The Government of India have exempted manufactured mica from the payment of import duty.

## BRITISH CONSULAR REPORTS

### VI. SYRIA.

We give the following extracts from the report of Mr. H. E. Satow, O.B.E., H.M. Consul-General, Beyrout, on the trade of Syria for 1920 :—

As regards imports there was after the Armistice a demand for almost every kind of commodity. This demand had died down by the middle of 1920. Exports have throughout been weak. The chief imports from the United Kingdom are cotton goods. Other British imports are coal and patent fuel, woollen goods, bar tin, tin-plates, galvanised sheets, alum, caustic soda, bicarbonate of soda, other drugs and chemicals, confectionery and tinned foods, and motor engines and accessories.. There was a fairly constant decline in the imports of manufactured goods towards the end of the year due to heavy overstocking of the Beyrout market in the hope, unrealised, of the interior becoming open for trading. Moreover, owing to the high prices ruling for British, American, and French goods, the German traveller and those from the new countries which formed part of the old Austrian Empire are making considerable headway towards recovering their pre-war share, at least, of the business in Beyrout.

Before the war the most important local industries were the production of silk and silk spinning. There were in 1910 about 150 spinning factories in existence. The southern districts exported the spun silk which went mostly to Lyons, while in the north dried cocoons only were exported. In 1920 there was some export of silk from Beyrout, about 500 bales. The industry was, however, on the down-grade before the war and there is scant sign of revival. Mulberry trees are still being cut down, and in the plains the tendency to replace mulberry plantations by orange groves continues.

Other local industries on a modest scale are weaving, tanning, dyeing (especially at Aleppo), olive oil production and soap making. All have need of development. The olive crop in 1920 was affected by heavy snow in February. The yield was 1,200 tons as compared with 2,500 tons in a normally good year. In the Latakia district the yield was about 500-600 tons.

**Labour Shortage.**

There is a shortage of labour in the country. The Lebanon is reputed to have lost nearly two-thirds of its population from starvation during the war and from emigration after it. Emigration is now officially forbidden. As the result of this and of the great cost of living wages are high. An ordinary labourer receives 5s. a day, a skilled mason or carpenter about £1 a day, and their assistants about 10s. a day.

Since the French occupation great attention has been paid to road making and good results have been obtained. The Lebanon especially has a large extent of good driving roads. Conditions are therefore favourable for motor transport. There has been a considerable import of motor cars during the year. American cars greatly predominate owing to their cheapness. Their lightness and power suit them for the rough roads and arduous climbs. British low-priced cars are not sufficiently powerful for the climbing, while the higher-priced ones are too dear for the market or too heavily built. Owing to the small carrying capacity of the Damascus Railway under present conditions and to the high rates, merchants even now find it cheaper to transport goods to Damascus by road. Lorries and vans are also in use in Beyrout itself and in the coastal region.

There is nothing definite to report as to the project for building a port at Alexandretta, but it will eventually be realised in course of time. The branch line from Alexandretta to the Adana Aleppo main line has just been completed. The journey to Aleppo takes about six hours. There is now a scheme for a branch line by Ras el Khanzir, Antioch and Haram to Aleppo, by which the journey should take three hours. The extension of the Beyrout port has been decided upon, but nothing has yet been done.

There are some schemes under discussion for obtaining electric power from streams in the Lebanon. A beginning has been made with one such scheme at the Nahr Ibrahim, north of Beyrout, but it has made little progress.

Such mineral wealth as exists, and it is believed to be fairly considerable in the northern parts of Syria, awaits development. As far as the Beyrout district itself is concerned the only known mines in the past were some unimportant chrome and asphalt and bitumen mines in the Latakia region, and some lignite deposits in the Lebanon.

### VII. MOROCCO.

The following extracts are taken from the report of Mr. E. H. Selous, H.M. Vice-Consul at Saffi, on the position in the French zone :—

The continued depreciation of the franc was disastrous for United Kingdom goods. Time and again prospective customers, tempted by the favourable delivery date as compared with that offered by French firms, were reluctantly compelled to relinquish the benefit resulting from the margin between delivery dates in view of the high cost of British goods, the difference between which and the French cost was sufficient to swallow up all profit to be derived from the earlier delivery. This was particularly and most unfortunately noticeable in the case of machinery and is much to be regretted, coming as it does at a moment when the demand for machinery has begun to make itself felt, thanks to the point of general and industrial development now reached by the young Protectorate, and in view of the fact that British machinery has at last made it appearance on the local market, many important United Kingdom engineering firms now having accredited agents at Casablanca for the French Zone.

Some consolation may be derived from the fact that during 1920 a British make of motor car at last made its appearance on the Moroccan market, a limited number arriving in the course of the summer and finding an immediate sale. In this respect it is regrettable that United Kingdom manufacturers could not see their way to reserving a greater proportion of their output for foreign markets during the motor car boom. Morocco is now flooded with French and American cars whilst there are probably not more than twenty-five cars of British make in the whole of the Protectorate. Had British cars been available during 1919 and 1920, both of the mass production and of the better class tourist types, they would have been able to establish themselves in the country. The average sale price of the fifteen or so British cars sold at Casablanca during 1920 was £1,000.

The mineral resources of the country, whilst still undeveloped, are on the eve of being opened up along what will probably turn out to be the most important mineral line of the Zone, *i.e.*, phosphates. The Administration has hopes of beginning the export of phosphates in the course of the next two years. Two phosphatic areas of such importance have been discovered that Morocco will take a place alongside Florida and Tunis as one of the premier phosphate-producing countries of the world.

The oil possibilities of the Zone continue to hold out great hopes of eventual realisation. Two permits of exploitation have been issued by the Mines Department of the Protectorate Government, and many permits of research have been accorded for prospecting in the area of oil indications which stretches from N.W. of Gabil Tselfats to Fez and Taza.

The 1,200 or so research permits which had been issued up to the end of the first quarter of 1921 in the French Zone cover almost every kind of mineral, but only phosphates have as yet been definitely proved to be, as regards both quantity and locality, a comercially exploitable proposition, whilst oil certainly holds out very good hopes.

---

The traffic receipts of the Egyptian Delta Light Railways for the ten days ended July 31 amounted to £E10,157, making the total for the year £E108,677.

# Engineering Topics.

*By our Engineering Representative.*

**Coal Waste.**

It has lately been observed that there is a wide difference between the popular and industrial view of coal and that held by scientists, the former regarding it as something that should be burned whilst the scientific view is exactly the opposite. Actually coal is too valuable to be burned; to burn it is to squander it. The by-products of coal are more valuable than the mineral itself, and not until these by-products have been extracted should the residuum be used for industrial or domestic purposes. Sir Edward Mackay Edgar recently asked how far this latter view is commercially practical, and what sort of a market could be found for the coke and other by-products that would result from the systematic carbonisation of coal; whether legislation would not have to be enacted absolutely prohibiting the burning of raw coal in any British household; whether the true function of coal is not to be transformed into gas or electricity, and to be treated simply as raw material for lighting, heat, and power. He went on to say, and rightly, that on these and a dozen other of the almost infinite ramifications of the coal problem we are waiting, so far in vain, for the considered verdict of science.

That the coal trade does not minister to other British industries one whit more than it is dependent upon them was one of the chief points made by Sir Edward. In the long run, he continued, it rises or falls with them, and as their well-being is determined by the complex interplay of forces and conditions that operate all over the world it follows that the coal trade itself is equally subject to these external factors and influences and can only flourish as long as it recognises and allows for them. In his view, if anything can save the coal industry of this country it is science, and if science cannot then nothing can. It will continue as an industry and a great one, "but it will no longer be the greatest or the most vital; it will have been deposed from the front rank."

Probably many readers will disagree with the statement that it is curious how little chemistry has achieved for coal in the way of developing, cheapening, and popularising its by-products and its use as compared with what it has done for oil. As a matter of fact had it not been for chemistry coal would have remained merely something to burn under furnaces, a mere competitor with wood, instead of being the source of practically all our colours, our drugs, our disinfectants, essences, and flavours. The efforts of the chemist have been of untold value to the coal industry, and though he has admittedly done much for oil it would seem on the face of it that he has done ten times as much for the older fuel. One witness before the Royal Commission estimated that about a quarter of our total consumption of coal should be saved every year. But it is only the chemist and the chemical engineer who can bring about so desired a result, and consequently it is obvious that although much has been done much remains to do. The growing popularity of the gas producer and the gas engine, the extensive use for power and heating of blast furnace gas, the adoption of central heating, and the utilisation of waste steam and of low grade coals and lignites are all steps in the right direction, and whilst engineers to an extent agree with those who criticise our present methods they are ready to admit the value and the extent of the progress that has already been made.

**Direct Ore Treatment.**

A considerable amount of experimental work has been carried out in certain metallurgical plants with a view to ascertaining how far extraction can be improved and capital and other costs reduced by dispensing with the erection and use of gravity stamps, and the adoption of other methods. It appears that these investigations have now practically solved the problems, and that the experiments have reached a stage which has decided the technical experts in charge to increase the crushing capacity by 10,000 tons per month by the erection of four new tube mills. It is said that direct tube milling has resulted, under certain conditions, in finer grinding, and correspondingly lower residue. As to the relative costs of this method it is obvious that on account of the elimination of stamps, the capital charges in a new plant will be much lower, whilst operating charges may be less.

**Copper in Steel.**

At one time the presence of a slight percentage of copper in pig-iron for steel production was regarded as being detrimental to the product, but the discovery that it possessed a marked anti-corrosive effect did much to alter opinion. A good deal has been written and said as to this, but in comparison little has been brought out prominently regarding other benefits which copper confers upon steel. As a matter of fact the presence of anything up to one per cent. copper not only advances the yield point and tensile strength as compared with medium-carbon steel without any percentage of copper, but it also renders the steel measurably more resistant to shock, which is a very important consideration. Hardness is also increased by copper, and as far as is known at present, the behaviour of copper in steel closely resembles that of nickel.

The view that copper was detrimental was accepted almost universally at one time, and many troubles due to other causes were laid at its door, and there is no doubt, also, that those who partially or completely recognised its value overlooked it in the greater importance and use of nickel, chromium, and vanadium. It is certainly cheaper than any of those metals and its use may, and doubtless will, become wider as our knowledge broadens. It would seem as though further research work would be advantageous, and this will no doubt be undertaken by our big steel concerns especially in view of a statement recently made by a large maker of convertor steel castings. From several years of experience he has became convinced that the presence of copper, to the extent of from 0.75 to one per cent., in his steel, unavoidably present by reason of the grade of pig iron he uses, has had the effect of raising the tensile strength and other physical properties of his products by at least 10 per cent., with no detrimental effects in other directions.

**The Crossley Car.**

I have always had a high opinion of the Willy's Overland Crossley, and I was pleased to note that a letter has been received by the firm which bears out my view, and that of other users of the Crossley production. The writer says in his letter: "I purchased on February 17, of last year one of your Model 4 touring cars and as one of your satisfied clients am happy to give you the following particulars. The car has run 14,000 miles without once giving trouble. The average petrol consumption works out at 25.2 miles per gallon. The first set of tyres were replaced at 9,000 miles. A considerable amount of London work, as well as long-distance runs, has been done, and the lowest petrol consumption recorded was in a 1,000 mile trip up the East coast, when, with one passenger, the car averaged 30 miles to the gallon."

**A Convenient "Set."**

Particulars have just been received of a compactly designed electric lighting set, which so far as generation and storage is concerned, is self contained, and needs merely coupling-up to the main cables of any small petrol engine, which is direct-coupled to a small continuous current electric dynamo capable of giving out 300 watts at 24 volts. In addition there are the necessary instruments and oil and petrol tanks, and a battery of 12 cells. Working on full load the engine will consume 1 gallon of petrol in 10 hours. The dynamo is specially constructed, with laminated fields, to remain perfectly cool, and in addition it is provided with a cooling fan. The cells are capable of supplying six lamps for a period of 10 hours.

# SHIPPING INTELLIGENCE

## THE CONGESTION AT BRAILA.

### Railway Transport Difficulty.

The following extracts are taken from the report of Mr. Vice-Consul Hutcheon on shipping at the port of Braila in 1920 :—

The troubles experienced by shipping in the port of Braila during the past year have been mainly due to the difficulties of railway transport, the exceptionally low level of the river, and the inadequacy of facilities for the loading and discharge of cargo. The railway difficulty has been the most important. Before the war, anything from 500 to 900 trucks of grain would have arrived in the port daily during the busy season, whereas, in 1920, days passed without the arrival of a single train. Imported goods for the interior lay for months on the docks for want of trains to take them away. In consequence, ships were delayed pending the arrival of cargoes and because the congestion of goods on the docks impeded unloading operations.

The level of the river in 1920 was the lowest on record. The entrance to the dock basin, where all cargo, except that coming by the mail steamers, is unloaded, was for a considerable time not more than 10 feet in depth, though this was also due in part to the inadequacy of the dredging service. Vessels had, therefore, to discharge part of their cargo into lighters before they could enter the basin. The movement of lighters bringing cargoes of grain from up-river to load at Braila was likewise greatly impeded and strandings were frequent. All this meant delay to shipping in the port. There was also a shortage of lighters, some 110 having been sunk during the war and about 90 having left the Danube and gone to Constantinople. (The number of lighters between Sulina and Turnu Severin at present is about 470).

With regard to the facilities for the handling of cargo, there are in the port 27 berths in all for the accommodation of ocean-going vessels. Of these, 12 are in the dock basin, 7 outside the basin but within the dock limits, and 8 outside the dock area along the *platforma cerealelor*, or grain-loading quay. At five of the berths within the dock basin the quay is vertical and steamers can lie right alongside. Elsewhere it is slanting, and pontoons and gangways are necessary. There was a fair provision of these before the war, but now there are only two steel gangways and about ten pontoons, the others having been removed or destroyed by the Germans. In the great majority of cases, therefore, wooden stages have to be erected, causing delay. Only three berths—within the basin—are provided with cranes, of which there are five in all : two electric cranes capable of lifting 2½ tons, two steam cranes lifting up to 1½ tons, and one hand crane for loads up to 10 tons. The design of the first four mentioned is such that they cannot be used for vessels standing high in the water which must therefore rely for unloading purposes on their own derricks. The working of the hand crane is a very slow process, and steamers requiring to have recourse to it may have to wait some considerable time until the berth at which it is stationed is vacant. There was formerly a floating crane in the port capable of lifting up to 40 tons, but it met with an accident in 1919 and sank in the river. There are, consequently, no facilities for unloading very heavy pieces.

The dredging apparatus used in dredging the dock basin is also out-of-date, and in a state of disrepair and, as already mentioned, the dredging service last year was altogether inadequate. The total capacity of the sheds in the docks for the accommodation of imported cargo is 6,400 tons. In normal times this was not considered to be by any means sufficient and during the past year, owing to the difficulties of railway transport to the interior —for which the bulk of the goods discharged at Braila are destined—the storage accommodation was inadequate and, as already stated, vessels were considerably delayed on account of the congestion of goods on the quays.

It may here be mentioned that before the war there were 348 warehouses in the port, with a total capacity of 200,000 tons, for the storage of grain awaiting export. Nine-tenths of these were destroyed during the German occupation and only about a half have so far been repaired. During the past season, however, owing to the slowness of the arrivals by rail the lack of storage accommodation for grain has not been felt.

Amongst other troubles experienced by shipping during 1920 mention may be made of the delay caused by the stoppage of all loading operations for two periods of five days each in the month of November, as a result of an order by the Government for the revision of all export permits. The port has also had its share of labour troubles during the year. There was a general strike of dock labourers and carters for some days in the latter half of the month of October, and shipping was likewise affected by the strike, more or less general on the Roumanian State Railways lasting from the middle of October to the first week in November

The pilot service in 1920 was also not quite adequate. The Danube Commission, which provides pilotage on the river between Sulina and Braila, has at present a force of only 27 pilots, apart from those employed at the bar, whereas before the war the number was 40. There were cases during the past year where vessels ready to leave were unable to obtain a pilot from the Commission and had either to wait till one was available, or employ an outsider at considerable expense. Pilotage in the port of Braila proper is performed by pilots attached to the (Roumanian) Port Captain's Office. The Port Captain has only three pilots so that when there are 30 or 40 vessels in port, several of which are waiting to be moved, delays must frequently occur. In so far as the Danube Commission service is concerned the position should improve, as a number of new men are undergoing instruction and should qualify as pilots in a few months time.

The main difficulties, however, with which shipping has had to contend in this port during the past year, and of the removal of which there is no immediate prospect, are the railway problem and the lack of adequate facilities for the handling of cargo. Of these the former is by far the more serious, and is affecting the whole country. Locomotives, however, are beginning to arrive from abroad, and this should bring about an improvement. Once the railways are running smoothly, things will begin to approach to pre-war conditions. The other matter is a question of money and time. The financial condition of the country prevents the Government from spending at present the sums necessary to replace the material destroyed or taken away during the war and to provide the port with all the modern facilities which it requires.

---

The shipping and dumping charges on coal at the port of Calcutta, have been revised to 8a. and 3a. per ton respectively.

It is reported that the Greek stokers at Athens have stopped work for higher pay. All coastwise shipping from the Piraeus has ceased and it is feared that the strike will spread to all Greek steamers arriving there.

## SHIPPING, ENGINEERING AND MACHINERY EXHIBITION.

At the Shipping, Engineering and Machinery Exhibition which is to be held at Olympia from September 1 to September 28 one of the most interesting exhibits will be that of the Parsons Motor Co., Ltd., who will have on view three sets incorporating their well-known engines as follows :—( 1 ) 30 k. w. Parsons combined generating set, comprising 60- h.p. type 4-cylinder vertical enclosed paraffin engine, direct coupled to Crompton dynamo, 230 volts., D. C. the set mounted upon cast-iron bedplate. ( 2 ) 28 h.p. type Parsons marine set, comprising 4 cylinder paraffin engine, fitted with standard fly-wheel and clutch and positive reverse gear, all mounted pon angle steel bearers with propellor shaft, stern tube and propeller. ( 3 ) 14 h. p. type Parsons ships auxiliary plant, comprising 2-cylinder vertical enclosed paraffin engine, direct coupled to Cromptons 7.5-k.w. dynamo, 100-160 volts D.C., and also driving Reavell two-stage enclosed compressor by gearing ; the whole set mounted upon special steel bed.

The engines are representative of the modern type of high-class internal combustion engines, and the features of construction are such that long service under heavy industrial conditions is assured. The present day engine is the result of some 20 years experience in the manufacture of paraffin and petrol engines, and when such points as forced lubrication, separate cylinders, and magneto timing drive are taken into consideration, it will be realised that these engines are first class in every way.

## FORTHCOMING SAILINGS.

*The following are the sailings for the Near East and India, the ports of departure and closing dates for cargo being given in parentheses :—*

*Anchor Line.*—S.s. Castalia for Bombay (Liverpool, September 8).

*Anchor-Brocklebank Line.*—S.s. Malancha for Calcutta (Birkenhead, August 27) ; s.s. Malakuta for Port Said, Colombo, Madras and Calcutta, September 10) ; s.s. Stockwell for Port Said, Colombo, Madras and Calcutta (London, September 14).

*Bibby Line.*—S.s. Leicestershire for Marseilles, Port Said, Colombo and Rangoon (Birkenhead, August 31).

*Clan Line.*—S.s. Clan Matheson for Bombay and Persian Gulf, (Birkenhead, September 3) ; s.s. Clan Urquhart for Colombo, Madras and Calcutta (Birkenhead, September 8).

*Cunard Line.*—S.s. Sea Glory for Gibraltar, Malta, Piraeus, Constantinople and Galatz (London, September 15).

*Ellerman Line.*—S.s. Grodno for Gibraltar, Malta, Patras, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas, and Varna (Liverpool, September 3) ; s.s. Belgravian for Genoa, Leghorn, Naples, Palermo, Messina and Catania (Liverpool, September 8).

*Ellerman's "City" Line.*—S.s. City of Cairo for Calcutta (Birkenhead, September 6) ; s.s. City of Calcutta for Calcutta (Birkenhead, September 19).

*Ellerman's "Hall" Line.*—S.s. City of London for Bombay, Karachi and the Punjab (Liverpool, August 31).

*Ellerman's Wescott and Laurance Line.*—Steamers sail fortnightly for Mediterranean, Egypt and Levant ports.

*Glen Line.*—S.s. Gleniffer for Port Said, Port Swettenham Singapore, etc. (London, September 8) ; s.s. Glengyle for Port Said, Port Swettenham, Singapore, etc. (London, September 22) ; s.s. Glenogle for Port Said, Port Swettenham, Singapore, etc. (London, October 6).

*Harrison Line.*—S.s. Patrician for Calcutta (Liverpool, August 31) ; s.s. Explorer for Calcutta (Liverpool, September 15).

*Henderson Line.*—S.s. Martaban for Port Said, and Rangoon (Birkenhead, September 7).

*Holt Line.*—S.s. Tydeus for Port Said, Port Swettenham, Singapore etc. (Birkenhead, September 1) ; s.s. Machaon for Port Said, Port Swettenham, Singapore, etc. (Swansea, September 2).

*Johnston Line.*—S.s. Venice for Piraeus, Syra, Smyrna, Volo, Salonika, Constantinople, Bourgas, Varna, Constantza, Sulina, Galatz, and Braila (Liverpool, August 27).

*Maindy Line.*—S.s. Maindy Tower for Antwerp and Moroccan Ports (London, end of August).

*Moss Line.*—S.s. Assiout for Gibraltar, Algiers, Malta, and Alexandria, (Liverpool, September 3) ; s.s. Siptah for Gibraltar Algiers, Malta, Syra, Piraeus, Smyrna, Salonika, Constantinople, Bourgas, Varna, Constantza, and Sulina (Liverpool, September 10).

*Papayanni Line.*—S.s. Bosnian for Algiers, Malta, Piraeus, Syra, Volo, Salonika, Smyrna, Constantinople, Bourgas and Varna (Liverpool, September 17).

*P. and O. Line.*—S.s. Kashgar for Bombay, Colombo, Madras, and Calcutta (London, August 26) ; s.s. Nore for Colombo, Madras, and Calcutta (London, September 9) ; s.s. Morea for Bombay (London, September 9).

*P. and O. British Line.*—S.s. Hatarana for Bombay and Karachi (London, September 3) ; s.s. Nardana for Colombo, Madras, and Calcutta (London, September 3) ; s.s. Mundra for Colombo, Madras, and Calcutta (London, September 17) ; s.s. Mandala for Bombay and Karachi (London, September 23) ; s.s. Nevasa for Bombay and Karachi (London, October 7).

*Prince Line.*—S.s. Soldier Prince for Tunis, Malta and Alexandria (Manchester, August 30).

## TENDERS INVITED.

**Egypt.**

Electric Light Set.—The Director-General, Mechanical Department, P.W.M., Cairo, invites tenders for the supply of a second-hand electric lighting set consisting of compound steam engine suitable for steam pressure of 150 lbs. per square inch direct coupled to a direct current, shunt wound dynamo, capable of giving 32 amperes at a pressure of 110 volts. September 1.

Cement.—The Surveyor-General, Survey of Egypt, Giza (Mudîrîya), invites tenders for the supply of 40,000 cement or other blocks. September 6.

Cooking Material.—The Sub-Director of Stores, Ministry of Education, Sharia Insha, Cairo, invites tenders for the supply of cooking, housewifery and laundry material required for 1921-1922, September 4.

**Roumania.**

Rice, etc.—The Roumanian Ministry of War invites tenders for the supply of the following commodities :—25 waggons rice, 3 waggons tea, 65 waggons sugar. (Each waggon is 10,000 kgrs. net). No information regarding conditions of tender is available and firms should state their own terms when submitting offers. Tenders should be addressed direct to the Direction d'Intendance Strada Jules Michelet 24, Bucharest. (D.O.T.). September 1.

## AGENTS WANTED ABROAD.

*ADVERTISERS requiring agents abroad may insert a paragraph in the following column free of charge. Letters in reply should be addressed to "The Enquiry Bureau, 'The Near East,' 1, Devonshire Square, London, E.C.2." when they will be redirected to the firms concerned. It must be understood that "The Near East" accepts no responsibility in connection with such replies.*

111 Agents wanted in the Near East, with good connections in the Typewriter and Stationery Trade, to represent a first-class English firm of manufacturers, on commission basis or own account.

118 Well known Sports Goods House with factory in India, wish to appoint Agents in Near and Middle East where not at present represented.

## ENQUIRY BUREAU.

*Readers abroad desirous of getting into touch with British manufacturers, export merchants, etc., are invited to insert a brief reference as to their requirements, in this column free of charge.*

*Replies should be addressed "The Enquiry Bureau, 'The Near East,'" 1, Devonshire Square, London, E.C.2."*

*ADVERTISERS in and annual subscribers to "The Near East" will be supplied with names and addresses of enquiring firms on application. All catalogues sent to "The Near East" for transmission abroad must be accompanied by stamps to cover postage.*

*No guarantee is given as to the financial stability of firms using this column, and enquiries as to status, etc., must be made by the firms concerned.*

113 Import and Export Merchant in Smyrna invites inquiries from British firms wishing to trade with this territory. Will act as agent or on commission basis.

114 Importer in Karachi (India), travelling throughout India, wishes to get in touch with merchants and manufacturers in England and elsewhere. General merchandise.

115 An import and export firm in Spalato, Yugoslavia, wishes to enter into business relations with British manufacturers, importers, and exporters. Specialities :—Exports : Medicinal herbs, dried fruits, hides, timber. Imports : Oils, food products, tarpaulins, mackintoshes, sacks.

116 Import Merchants in Adana, Cilicia, Asia Minor, wish to represent British firms for any kind of British-made goods. Own account and commission basis. Good references provided. Send catalogues and samples with prices and terms.

117 Importer in Roumania, interested in jute trade, wishes to get in touch with firms dealing in sacks, new and old, Dundee and Calcutta makes.

# COTTON & COTTON GOODS.

## MANCHESTER REPORT.

(*From our own Correspondent*).

Manchester, Saturday.

The tone of the market during the past week has been dull and there has been a total absence of initiative on the part of the big shippers. Perhaps the quietness of the market is the result of many operators being on holiday, but at the same time one cannot disguise the fact that business has been extremely dull and feature less. Cloth demand for Egypt, Constantinople and the Levant has been rather disappointing, and although a few tentative bids have been received, sales of any weight have not been mentioned. With regard to Egyptian yarns, users have bought very sparingly and prices when tested have shown an easier tendency. Many weak sellers have been about and spinners are full of complaints. Inquiry for piece goods for India has not been met with on a large scale, and generally speaking trade with that outlet has been unimportant. Better advices have been received from China, but shippers have shown no disposition to operate on a larger scale. South America still lags behind. American counts have been anything but eagerly sought after and prices when tested have favoured buyers. Not much business has been done in export numbers. Taking the market as a whole there are no signs of an immediate improvement, and when trade does take an upward move, progress will be very gradual. Buyers do not trust current rates on account of the belief that prices have not yet touched the bottom.

## LIVERPOOL REPORT.

Messrs. Reynolds and Gibson report as follows for the week **ended August 11:—The fact that cotton can be purchased in this market at a considerable saving compared to the prices demanded for similar qualities in Egypt has become more readily recognised with the result that quite a fair business has been transacted. Except in the finer qualities of Sakel, which are not offered in quantity, sellers, in face of the larger sales, are still willing to meet the demand, and until prices stiffen here materially, or Egypt modifies offers appreciably, the turnover is likely to continue at the present total, or even expand further. The major portion of the sales have again consisted of Sakel grading, fully good fair to good, and, judging from the selection, there must be a considerable stock here of these qualities. Some holders of the above cottons are reluctant to let any possible business pass them, and, taking the official quotations as a basis, undoubtedly cheap cotton has changed hands. Owing to the present state of trade in the fine counts, spinners have not been able to avail themselves to any great extent of the exceptional conditions prevailing here. In normal times the weight of business would soon readjust the differences between this market and Egypt. Uppers and brown have been in only very moderate request. Sudans and Tokars also have claimed little attention. The sales for the week amounted to 2,900 bales (including 100 Sudan), against 1,500 last week. Quotations are unchanged, except fine Sakellaridis, which is 150 points higher.**

# COMPANY MEETINGS.

## FURNESS WITHY & CO.

### Intérests in Danube Trade.

The thirtieth annual meeting of Furness Withy and Co., Ltd., was held on August 18, at the Great Eastern Hotel, Liverpool Street, E.C. Sir Frederick W. Lewis, Bart., presided.

The Secretary having read the notice convening the meeting Mr. Ralph T. Warwick, of Messrs. W. T. Walton and Son, read the auditors' report.

Sir Frederick W. Lewis, Bart., in moving the adoption of the report and accounts, said :—" The profit for the year, including the balance brought forward, amounts to £955,848 4s. 6d., which is arrived at after making provision for all taxes payable both in this country and abroad. After deducting the dividend on the Preference shares and the two half-yearly dividends at the rate of 5 per cent per annum, free of income tax, on the Ordinary shares, there is an available balance of £703,348 4s. 6d., out of which the directors have allocated £300,000 to depreciation account, and now recommend the payment of a bonus of 5 per cent., free of income-tax, on the Ordinary shares, which will leave £203,348 4s. 6d. to be carried forward to the current year's account. I scarcely think there is anything in the balance-sheet which calls for special comment.

We have continued our policy of developing and extending our organisation upon natural lines, and since we last met we have added several highly important units to our properties.

In the early part of this year I visited all our organisations in the Mediterranean, where the Prince Line and Johnston Line particularly have very important interests. As you know, we already have offices in Piraeus, Alexandria and Constantinople, and it was a pleasure to me to see at first hand the efficiency of these branches and the loyal work of our representatives there.

For a long time past we have taken a special interest in the Danube trade, and to strengthen our already strong position there we have during the year acquired an interest in the firm of Watson and Youell, one of the most highly respected firms trading in the Near East, with offices at Bucharest, Braila, Galatz, Sulina, Constantza and Oltenitza. The firm, as previously constituted, did a merchant business as well as a shipping agency but as we always make it a rule not to engage in merchant business in possible competition with our shippers and consignees, it was mutually agreed that the merchant business of Watson and Youell should be entirely separated from their shipping business, and the latter section is now operated under the style of Watson and Youell Shipping Agency, Ltd., and it is in this section alone that we are interested.

Altogether my visit to the Mediterranean was a most interesting one, and I returned with full confidence that no other company is better organised for the development of the various interests with which we are associated in those waters.

I need not tell you that since we last met we have experienced a very heavy drop in freights. It is a commonplace to say that this fall is due to the volume of overseas trade falling below the supply of ships, but while that is obviously the primary cause of the depression it is worth while analysing the position somewhat more fully. A study of the statistics recently published by *Lloyd's Registry of Shipping* shows that of the total world's steam tonnage of 54,217,000 gross tons, there is, eliminating wooden vessels altogether, 11,703,000 gross tons of shipping afloat more than there was in 1914, notwithstanding the tonnage lost during the war. The approximate increase that would have occurred normally during this period of seven years is 15,000,000 gross tons—that is, on the assumption that there had been no war and no substantial increase in the shipbuilding plants of the United States. It will, therefore, be seen that there has been no over-production in the ordinary sense of the expression. Vessels on the register of over 25 years of age represent 5,757,175 gross tons, of which 4,055,847 are owned abroad and 1,701,328 are owned in the United Kingdom. If for the purposes of estimating the effective world tonnage these are disregarded we arrive at an increase of 5,945,825 gross tons over 1914. Of this increase, however, 2,940,000 gross tons are represented by the increase in bulk oil carriers, and while to some extent these may displace coal carrying, for ordinary general purposes of the world's trade, it may be said there are, in effect, only 3,005,825 gross tons more of serviceable vessels afloat to-day than there were in 1914. Notwithstanding these figures, there is laid up in the world's ports an amount of tonnage which was recently estimated at round about 10,000,000 tons. It follows, therefore, that the principal cause of the decline in freights is due not so much to the over-production of tonnage as to the falling off in the world's overseas trade, and, so far as ship-owners are concerned, I can only see one practical thing to be done, and that is to reduce operating costs to such a level as will help forward a revival of international trade.

It is no use disguising the fact that shipping has a difficult period to face, and it will take a good deal of time and patience before all our difficulties are overcome. With the wonderful natural resources which we as a nation possess, with the commonsense which has invariably triumphed over our past difficulties, and with a broad-minded understanding between Capital and Labour, I believe ultimately we are capable of regaining our erstwhile commercial supremacy which will reflect itself in our particular industry.

## SOCIETE ANONYME DU BEHERA.

### Egypt's Economic Position.

The ordinary general meeting of the Societé Anonyme du Béhéra was held at the company's offices at Alexandria on July 19, Mr. M. C. Salvago, the Chairman, presiding.

The report of the directors, read at the meeting, states :—The year under review, as you know, has been one of extreme contrasts. The brilliant prospects with which it commenced in April were followed in the autumn by a correspondingly profound collapse. So complete was the fall on the cotton market, that the prices realised for the crop hardly more than covered the cost of production which has been carried on throughout the summer at the high prices reigning during the first half of the year.

Needless to say this sudden change in the economic situation has produced an acute reaction throughout the country, and your company in common with other similar concerns has suffered from a falling off in the encashments to an amount considerably below what had been anticipated. There is every reason, however, to hope that the position will right itself automatically from the fact that agricultural labour has fallen back almost to the normal. The present cotton crop will, therefore, be produced under approximately normal conditions as to cost, and will, in consequence, it is to be hoped, leave an ample margin of profit for the producer.

On the other hand the greater part of the expenditure has been undertaken with a view to meeting the needs of the large areas sold under our deferred sales system, and it is most desirable that this expenditure should not be curtailed more than is absolutely necessary. In this respect two new drainage installations with their systems of deep drains are nearing completion. Two further installations for which plant has been purchased, have been temporarily suspended pending a clearer outlook. This latter plant figures forthe time being in store which accounts for the greater part of the increase of that item in the balance sheet.

The registration of land sales has been brought to an almost complete standstill, purchasers being unable to meet their engagements for lack of funds. Nevertheless the area of land sales registered during the year exclusive of Sidi Salem attained 2,322 feddans in addition to which the company holds sale contracts maturing for registration, mostly under our deferred system for an approximate area of 11,063 feddans and a value of L.E. 538,513.

The Sidi-Salem transaction shows that after meeting all annual charges, interest and capital expenditure, the total debt has been reduced from L.E. 200,605 to L.E. 194,028. A considerably greater reduction was anticipated in view of the excellent business done in this estate but the encashments as elsewhere failed. The great amount of work has been carried out at Sidi-Salem to meet the requirements of the fresh sales. Large areas have been canalized, and a powerful drainage installation designed to deal with 10,000 feddans is in course of construction. When this work with its system of deep drains is completed practically the whole estate will be provided with good artifical drainage and a very important reduction in capital expenditure will then be possible. Land sales for an area of 638 feddans have been registered during the year, and sales contracts maturing for registration cover an approximate area of 4,228 feddans for L.E. 295,962.

**Dredging Contract.**

By a further agreement with the Egyptian Government, the general dredging contract has been again prolonged to June 30, 1921, to give time for the preparation of a fresh contract. This contract is at the time of writing under discussion, and it is hoped that the terms will be definitely settled before long. During and since the war the repairs to the company's dredging fleet, have been reduced to the minimum possible, due to excessive cost of repairs and the complete uncertainty as to whether it was the Government's intention to renew a long period contract. In order to give full and proper effect to the proposed contract a large expenditure on repairs will be necessary and two or three new dredgers required. In view of the above, your board proposes to set aside a sum of L.E. 20,000, from the profits to be applied exclusively to this object. One dredger has had new machinery installed during the year and has been otherwise reconstructed and modernized which accounts for the greater part of the increase in the item Plant and Furniture in the balance sheet. Dredging under the Government contract has amounted to 768.885 m.3, in addition to which we have dredged for the Suez company in the Abassieh Canal, 35.811, total for the year, 804.696 m.3. The latter work is continuing.

Turning to the liabilities in the Balance Sheet, it is to be noted that the increase of the item " Sundries " under" Creditors and Other Accounts " is due principally to the inclusion of the aforesaid L.E. 20,000 destined for the repairs of the dredging fleet. " Profits on Land Sales " show an increase of L.E. 57,564. Among the assets " Debtors for Land Sales " has increased by L.E. 79,648 of which L.E. 24,612 represents a fresh accumulation of arrears in the payment of the annual instalments. " Debtors and Other Accounts," which has risen from L.E. 45,625, to L.E. 73,491, has since been reduced by L.E. 21,000 by encashments of sums due by the Government on account of dredging. Other important items under this heading which will be recovered from first payments next cotton season represent advances to our purchasers of cotton seed, amounts due for the clearance of canals and drains, and fees for artificial drainage.

Mr. E. Monnerat, whose resignation after 38 years service in the company, was communicated to the shareholders at the extraordinary general meeting held on May 7, 1920, retired from active control of the industrial section on December 30, last. He has since taken over the general management of the Cairo Water Company in which post we heartily wish him every success.

Your board has, therefore, thought it advisable once more to reunite the two branches of the company under one control and to this end have appointed Mr. G. C. Foster as general manager. Mr. R. W. Andrews, who has been in the company's service since 1904, has become Manager of the Territorial Branch, and for the industrial branch, we have been fortunate enough to obtain the services of Mr. F. D. Scott, late of Messrs. Vickers.

Mr. B. Hornsby, C.B.E., on whom has devolved the Governorship of the National Bank of Egypt, in Cairo, has resigned from the board. His special financial aptitude and the unfailing cordiality with which he entered into our work will remain as a souvenir of his all too short sojourn amongst us. In virtue of Article 13 of the Statutes we have invited Mr. O. J. Finney to join the board of directors. His wide knowledge of the commercial side of the cotton industry will be of great help to us and we do not doubt that our choice will obtain your full approval

**Profit and Loss Account.**

After setting aside the arrears of rents amounting to L.E. 657.090 transferred to "Accrued rents in suspense" and a sum of L.E. 20,000 transferred to " Reserve for Dredging Plant " the net profit for the year 1920-21 amounted to L.E. 41,313.909, to which must be added the balance brought forward from 1919-1920, L.E. 51,834.945, making a total of L.E. 93,148.854. From which must be deducted the interest on the preference shares paid during the year 1920-21, LE. 24,375, leaving a total of L.E. 68,773.854. Deduct 5 per cent. on 500,000 ordinary shares. L.E. 12,500,—L.E. 56,273.854. Deduct 10 per cent. to statutory reserve viz :—net profit of the year, L.E. 41,313.909, interest on preference shares L.E. 24,375, 5 per cent. on 50.000 Ordinary shares, L.E. 12,500,—L.E. 36,875,—L.E. 4,438.909 10 per cent. L.E. 443.890—L.E. 55,829.964. The directors propose to pay a dividend of 3 per cent on 50,000 ordinary shares making a total for the year of 8 per cent., L.E. 7,500—leaving a balance of L.E. 48,329.964 to be carried forward.

One of the shareholders present pointed out to the chairman that the area of land sold in recent years appeared small in comparison with the extent of the properties. The chairman explained the point, the chief reason being the deferred sales system adopted by the company.

The meeting accepted unanimously and without discussion the accounts thus presented as well as the distribution of profits as proposed by the board, and decided to carry forward the balance of L.E. 48,329.964. The meeting fixed the payment of coupon No. 20 of the 50,000 ordinary shares at the rate of P.T. 40 (forty piastres tariff) per coupon, payable from Monday, August 1, 1921. The meeting ratified the nomination of Mr. O.J. Finney to the board of directors for a period of 5 years. The directors' fees were fixed at L.E. 5 per sitting as before. Messrs. Russell, Harris and Co., were re-elected auditors for 1921-1922 with the same remuneration of L.E. 250.

## NEW ADVERTISEMENTS.

Those of our readers who may be interested in sports goods are invited to refer to the advertisement of Messrs. Phillips and Co., of Sialkot, India, and London, on page 240. An inspection of this firm's wide range of goods, including hockey sticks, footballs, tennis racquets and cricket balls, proves that they can be recommended to prospective buyers with every confidence. A comprehensive illustrated catalogue is published, and is sent free to all interested.

The total approximate gross earnings of the Indian State Railways for the second quarter of the year amount to Rs.19.83 crores.

The Government of Bengal, has decided to license the sale of swords, sword-sticks, and daggers.

## SUPPLIES AND PRICES IN THE NEAR EAST.

The following extracts are taken from recent reports received by the Imperial Ottoman Bank :—

Panderma.

The report for July states :—Stagnation has prevailed in the market. Apart from about 90,000 kilos of grains of flax destined apparently for the Piraeus there have been no exports.

Stamboul, August 13.

Notwithstanding the state of war in Anatolia the position of the market is less unfavourable at the present time owing to consignments made to Roumania and notably to Batoum, in which town sales of merchandise are carried out at advantageous prices.

Manufactures—The activity previously recorded in textile manufactures continues The market is in a healthy condition. The losses sustained over the liquidation of old stocks do not seem to have greatly affected the position of importers. The recovery at Manchester and the trade with Roumania and the Caucasus enables one to look forward with a certain amount of confidence to the future of the trade in textiles which constitutes the chief branch of imports of our town.

Produce.—Sugar. After being quiet at the beginning of the week the market has shown a certain activity towards the end following on the news that the English refineries, lacking stocks, had made important purchases. Nevertheless, despite the rise that has taken place on the chief European markets ours remains quiet for lack of business, and prices quoted are below those ruling in Europe. The arrivals of the week amount to 350 waggons from Java, America and the Netherlands and three-quarters have been warehoused. Stocks here are estimated at 600 waggons. Quotations are :—Java, August September shipment, £30 per ton, Dutch sugar £31 per ton, in customs £T 30-30 per 100 kilos.

Coffee.—The damage recorded to the new crops in certain districts coupled to the general demand in Europe as a result of the exhaustion of stocks has given an upward tendency to prices. The rise has made its effect felt on our market, where the quotations are Ps. 44-45 per oke for coffee in transit, and Ps. 60-62 per oke in customs.

Rice.—The market is firm, despite the arrival of a consignment of 80,000 sacks of Saigon at Marseilles. Prices are rising at that place. Quotations :—Prompt shipment from Marseilles 110 francs per 100 kilos ; here Ps. 15 per oke.

## DROUGHT IN ROUMANIA.

(*From our own Correspondent.*)

Bucharest, August 10.

The hay crop is being endangered owing to the prevailing drought in many regions. In consequence the price of cattle is falling throughout the country, also the price of beef which is now five to seven lei per kilogramme according to quality. The production of vines is reported to be of excellent quality and a large output is anticipated. On account of the drought the mildew and other fungi have made no progress.

The Caraaman salt lake in the Dobrudja has dried up, and the inhabitants while raking its surface, discovered a layer of white powder, which after analysis proved to be comestible salt, which will be invaluable to the local fishermen for salting fish.

## ON 'CHANGE.

### Fluctuations in Oils.

*(From our own Correspondent.)*

London, Monday.

The past week has been redeemed from the sameness that has characterised preceding weeks by the fluctuations in the oil market. Otherwise the tone has remained much the same as before.

Gilt-edged securities have been rather weak. Consols have shed ¼ at 48. War Loan Fives are 3-16 down at 87,15-16, while Fundings at 70,7-8 have lost ½.

A dull tone has continued to be in evidence in the Industrial group. Shipping shares show little change, P. and O. Deferred being 347.

Bank shares have reacted somewhat after the recent rise. P. and O. Banking Corporations close at 11,1-8, a decline of 3-16. Imperial Ottoman Banks are unchanged at 7⅞, but National Bank of Egypt have shed ¼ at 18,-7-8. Agricultural 3½ per cent Bonds have firmed up ¼ to 52½, but Agricultural 3½ per cent. Guaranteed Bonds are ¾ down at 54½.

After a pronounced slump in the early part of the week a re-action set in the Oil Market, and prices are well above the worst. Anglo-Egyptian are 3-32 down at 1,3-8, while Roumanian Consolidated have shed 3d. at 10s. 3d. Steaua Romana are 6d. down at 12s., while Burmahs are 1-8 down at 5,9-16. There is nothing fresh to report as regards Rubbers.

In Near Eastern securities Egyptian Guaranteed 3 per cent. are unchanged at 68, while Greek Guaranteed 2½ per cent., and Turkish Guaranteed 4 per cent. 1855, are the same at 68 and 69 respectively.

In Greek shares the 5 per cent. 1881 Loan remains at 43, while the 5 per cent. 1884 Loan is unchanged at 42. The 5 per cent. 1890 Loan is 41, while Fundings are a point up at 40. The 4 per cent. 1910 Loan is unchanged at 31, but the 4 per cent. 1902 Loan at 34 shows a gain of a point. The 5 per cent. 1914 Loan is unchanged at 43.

In Land shares Beheras have shed ¼ at 8½, but the Preference are unchanged at 3,1-8. Anglo-Egyptian Land Allotments are 3, and Egyptian Consolidated Lands are 1s. 6d. Egyptian Delta Lands have lost 3d. at 8s., but Gharbieh Lands are unchanged at 1½. New Egyptians are 1s. down at 22s. 6d., while Union Foncieres have lost 1-16 at 2½. Sudan Plantations are 1-16 up at 2,13-16.

In Miscellaneous descriptions Abyssinian Corporations are 2s., and Alexandria Waters are 6¾. Morums are 10s., Egyptian Markets, 19s., and Egyptian Salt and Soda 33s.

## NEW COMPANIES.

### Trans-European Co.

The Trans-European Co., Ltd., has been registered with a nominal capital of £150,000 in 10,000 8 per cent. preferred ordinary shares of £1 each and 200,000 deferred ordinary shares of 1s. each. Objects:—To carry on the business of merchant bankers and financiers, to create or acquire interests in undertakings, owning and-or operating on the Continent of Europe or elsewhere sleeping, restaurant, trains de luxe, or other cars, rolling stock or equipment used on railways. The directors are:—Sir Henry Worth Thornton, K.B.E., Great Eastern Railway, Liverpool-Street Station, E.C. (general manager Great Eastern Railway). Sir George McLaren Brown, K.B.E., 61, Cadogan-square, S.W. (European general manager Canadian Pacific Railway Co.) Geoffrey P. Denton (Messrs. Swan Hunter and Wigham-Richardson, Ltd., 21, Russell-square, W.C.1. (director Moorgate Investment and Agency Co., Ltd.) The first members of an advisory council are to be appointed by the directors. The council may elect two members of their body to be governor and deputy-governor respectively, and the secretary of the company shall be secretary of the council. Any member of the council may be a director.

### Smyrna International Ferry.

The Smyrna International Ferry Service, Ltd., has been registered, with a nominal capital of £101,000 in 100,000 ordinary shares of £1 each and 20,000 deferred shares of 1s. each. Objects:—To enter into an agreement with Bowen, Rees and Co., Ltd., D. Forbes, C. Whittall and Co., and Eliear Guiffray to establish and maintain a service of steamers and other vessels for the transportation of passengers and merchandise of all kinds to, from, and in the Gulf of Smyrna.

## Indian Intelligence.

The Indian Trade Commissioner has issued the following cabled news received from the Director-General of Commercial Intelligence, Calcutta, dared August 8:—Monsoon active in Northern India, weak in Peninsula. In North-West India, including to the West of the United Provinces of Agra and Oudh, and in Peninsula, total rainfall of August and September likely to exceed average. For North-West India and Burmah, conditions too uncertain to justify a forecast. Conference freight trade for Continent and Marseilles, 40s. since April; now 45s Cotton normal; much improved by recent rainfall but area below the average. Rice and Sesamum normal. Indigo poor. Bombay cotton market, August 4—weak. Fine M.G. Oomras, September Rs. 316½. Government of Bombay in order to stop mixing of short stable with Surati Cotton has introduced Transport of Cotton Restriction Act, 1921, to control transport by rail of cotton and cotton waste. Bombay piece good market unchanged. Enquiry in local goods encouraging. Calcutta jute and gunny markets, August 6—quiet but steady. August 7—Jute market closed. Gunny unchanged. # Near East Markets.

## LONDON PRODUCE REPORT.

Dried Fruit.—Business has been much brisker during the past week. Currants have been in special demand, and rates have advanced. There has not been much business in sultanas, and stocks of the old crop are now practically exhausted. Dates continue to present a steady aspect.

Sugar.—Home refined has continued to be in active request. West Indian crystallised is unchanged at 45s. to 52s. American is 2s. lower at 58s., while Czechoslovakian is 33s.

Coffee.—A steady tone has been maintained in the market. Futures are :—September 46s. December 46s. March 46s. 6d., May 46s. 10½d.

Oilseeds.—Linseed has been weaker with Indian at 23s. 3d., and La Plata at 20s. 6d. Rapeseed has been fairly steady with Toria at 22s. 3d. and bold Ferozepore at 21s. 6d. Cottonseed is closing easier with Indian at 11s. 3d., Egyptian Black at 13s. 9d., and Sakellarides at 13s. 3d.

Oils.—Linseed oil at 36s. 3d. is 2s. 9d. down. Rape oil has been steady with crude at 55s. and refined at 62s. Cotton oil has been variable. Common edible is 1s. down at 52s., while Egyptian crude is 6d. lower at 42s, but deodorised is 5s. up at 50s. Turpentine has again declined, and is 4s. down at 64s.

## CYPRUS CROP OUTLOOK.

(*From our own Correspondent.*)

Nicosia, August 9.

There has been more rain in the hills, but no serious damage is reported. The carob crop should be excellent. The dates for picking beans are fixed annually by the District Courts of Administration (*Meglis Idare*). This is done in order to prevent or minimize the losses which would otherwise be experienced by owners of trees from thefts. Under this law any person found in possession of carobs before the fixed time is liable to prosecution. The dates fixed for the Nicosia district are August 15 and 22, for the lower and higher villages respectively and for the gathering of olives, September 19 and 21. The fixtures in other districts are not yet published.

## ROUMANIAN WHEAT FOR FRANCE.

(*From our own Correspondent.*)

Bucharest, August 10.

The execution of the remainder of the contract for the 15,000 waggons of wheat sold to France has been entrusted to the headquarters of the peasants' co-operative societies. It is announced in this connection that ever since June 18 France has been asked to send five boats to ship part of this contract, but has not yet complied with this demand, and the barges carrying the wheat have since been incurring demurrage.

## EGYPTIAN CROPS.

The *Bulletin* of the Egyptian Ministry of Agriculture gives the following particulars of the crop conditions in July :—

Cotton.—The weather was favourable. Shortage of water has been felt, especially in some localities in Lower Egypt and in Minya Province. The cotton worm attack has been severe in certain provinces. Boll-worm has appeared in most provinces The crop is backward.

Millet (Sefi).—The weather was on the whole favourable and water supply sufficient. Slight attacks of stalk-borer are reported from Beni Suef, Minya and Qena Provinces, but damage done is negligible. Heads are formed ; the condition of the crop is generally satisfactory. Harvesting will take place in August.

Sugar-cane.—The weather was favourable to the growth of the crop. Water supply was generally sufficient except in some places in Giza, Minya and Asyut Provinces. The stem-borer attack is very slight.

Rice (Sefi).—Weather was on the whole favourable. Shortage of water has been felt, especially in lands at the tail ends of canals. In some small areas the rice has dried off for want of water. No enemies are reported. Prospects of the crop are below the average.

Maize (Nili).—Preparation of land for sowing is in progress. The area intended for maize is expected to exceed the normal.

Ground-nuts.—Weather was favourable. Nuts are formed in early-sown crop in Sharqiya Province. Shortage of water has affected the growth of the crop.

The Motor Trade Association are organising a motor exhibition at Calcutta, during the coming winter.

## CURRENT PRICES.

*General Produce.*—Bacon (Continental), 167s. cwt. ; bacon (Canadian), 157s. 6d. cwt. ; bacon (American), 127s. 6d. cwt. ; butter (Danish), 265s. cwt. ; butter (Australian), 230s. cwt. ; butter (New Zealand), 135s. cwt. ; cheese (Canadian), 134s. cwt. ; cheese (New Zealand), 135s. cwt. ; cheese (Australian), 125s. cwt. ; lard, 88s. 6d. cwt. ; chillies, 145s. cwt. ; eggs (Danish), 28s. per 120 ; eggs (Styrian), 19s. 6d. per 120 ; cloves (Zanzibar), 1s. 2¾d. lb. ; cocoa (Ceylon good to fine), 78s. 6d. cwt. ; coffee (Costa Rica), 145s. cwt. ; coffee (East India bold), 122s. 6d. cwt. ; coffee (Central America), 109s. cwt. ; coffee (Jamaica), 60s. cwt. ; coffee (Mocha longberry), 109s. cwt. ; coffee (Santos superior), 60s. 6d. cwt. ; ginger (Washed Cochin), 35s. cwt. ; nutmegs (110's to 80's), 11¼d. lb. ; pepper (Singapore black), 4½d. lb. ; pepper (Muntok white), 9¾d. lb. ; raisins (Valencia), 82s. 6d. cwt. ; raisins (Sultana Smyrna), 86s. 3d. cwt. ; currants (Vostizza), 82s. 6d. cwt. ; currants (Calamata), 45s. 6d. cwt. ; sugar (granulated), 61s. 1½d. cwt. ; sugar (No. 1 cubes), 65s. 3d cwt. ; sugar (white Mauritius), 53s. 9d. cwt. ; sugar (West Indian crystallised), 49s. 6d. cwt. ; sugar (centrifugal), 20s. 9d. cwt. ; tapioca (fair Singapore), 1 15-16d. lb. ; sago (small pearl), 26s. 6d. cwt. ; sago flour, 18s. 3d. cwt ; rice (Rangoon No. 2), 23s. 9d. cwt. ; rice (bran Rangoon), £9 2s. 6d. ton ; cinnamon (firsts), 1s. 4d. lb. ; mace (fair Singapore), 1s. 2½d. lb. ; tea (Indian, common to good common), 8½d. lb. ; (medium to good), 1s. 3½d. lb. ; (fine to finest), 2s. 4d. lb. ; tea (Ceylon, common to good common), 9¾d. lb. ; (medium to good), 1s. 4d. lb. ; (fine to finest), 2s. 7d. lb. ; tea (Java, common to good common), 5½d. lb. ; wheat (Australian), 82s. 4½d. qr. ; wheat (English white), 67s. qr. ; wheat (La Plata), 83s. 6d. qr. ; barley (malting), 70s. qr. ; oats (English,) 36s. qr. ; oats (La Plata), 31s. 9d. qr. ; maize (La Plata), 42s. qr. ; maize (American), 39s. 3d. qr. ; flour, 60s. sack.

*Metals.*—Aluminium, £122 10s. ton ; antimony (English Regulus), £39 10s. ton ; bismuth, 7s. 6d. lb. ; copper (standard), £69 16s. 3d. ton ; copper (electro), £75 5s. ton ; gold bars, 112s. 1d. oz. ; iron (No. 3 Cleveland), 133s. 9d. ton ; hematite (mixed number), 162s. 6d. ton ; galvanised sheets (24G), £21 15s. ton ; lead (soft foreign), £23 6s. 3d. ton ; manganese Poti, 1s. 2½d. unit ; molybdenite, 43s. 9d. unit; nickel, £190 ton ; platinum, 360s. oz.; plumbago, £20 ton ; quicksilver, £10 8s. 9d. bottle ; silver bars 37½d. oz. ; spelter (G.O.B.), £25 16s. 3d. ton ; tin (standard), £155 7s. 6d. ton ; tin plates (20 by 14), 23s. 6d. box ; wolfram, 12s. 6d. unit ; zinc sheets, £35 10s. ton.

*Chemicals.*—Acids : Boric, 66s. cwt. ; oxalic, 9½d. lb. ; citric; 2s. 4½d. lb. ; tartaric, 1s. 5½d. lb. ; ammonia (sulphate), £13 12s. ton ; arsenic (white powdered), £39 ton ; benzole (standard), 2s. 8½d. gallon ; bleaching powder (35 per cent.), £17 10s. ton ; borax crystals, 31s. 6d. cwt. ; cream of tartar, 132s. 6d. cwt. ; Potassium : Bi-chromate, 9¾d. lb. ; chlorate , 5d. lb. ; caustic, £35 ton ; nitrate, £52 15s. ton ; permanganate, 1s. 3d. lb. ; prussiate yellow 1s. 3d. lb ; sulphate (90 per cent.) £19 ton ; Sodium : crystals 141s. ton ; bi-carbonate £12 10s. ton ; bichromate 6¼ lb ; alkali (58 per cent) £9 7s. 6d. ton ; chlorate 4d. lb caustic (70 per cent.) £22 10s. ton ; ; hyposulphite £20 ton ; prussiate 7d. lb ; nitrate £18 10s. ton; glycerine(crude 80 per cent) £106 ton ; glycerine (industrial 1260 per cent) £120 ton ; lemon oil 3s. 5½ lb ; quinine 4s. ½d oz ; red lead £39 15s. ton ; white dry lead £42 12s. 6d. ton ; white ground lead £53 ton ; sulphate of copper £30 10s. ton ; sulphate of iron 145s. ton.

*Miscellaneous.*—Cotton (American) 8.90d. lb ; cotton (Egyptian) 15.25d. lb ; linseed (La Plata) £21 2s 6d. ton ; rape (Toria) £22 11s. 3d. ton ; soya beans £16 7s. 6d. ton ; palm kernels £23 2s. 6d. ton ; Oils : linseed £39 5s. ton : olive (Levant) £82 10s. ton ; palm £39 10s. ton ; rape (crude) £55 10s. ton ; soya £42 10s. ton ; petroleum 1s. 9½d. gallon ; petrol 2s. 6d. gallon; ground nut £54 15s. ton ; cotton (crude) £43 5s. ton ; cocoanut (Ceylon) £53 5s. ton ; turpentine 68s. 6d. cwt ; shellac (T.N. second orange) 287s. 6d. cwt ; shellac (A.C. garnet) 282s. 6d. cwt ; Rubber : plantation No 1 crepe 8½d. lb ; smoked sheet 8½d. lb ; fine hard Para 1s. lb.

*Hides and Skins.*—Ox and Heifer (first), 90 lbs. and up 10½d. lb. ; 80 to 89 lbs. 10½d. lb. ; 70 to 79 lbs., 10¾d. lb. ; 60 to 69 lbs., 10d. lb. ; 59 lbs. and under, 7¾d. lb. ; (second), 90 lbs. and up, 9d. lb. ; 80 to 89 lbs., 9¼d. lb. ; 70 to 79 lbs., 9¼d. lb. ; 60 to 69 lbs., 8½d. lb. ; 59 lbs. and under, 5½d. lb. Cows (first), 60 lbs. and up, 7½d. lb. ; 59 lbs. and under, 7¼d. lb. (second), 60 lbs. and up, 5½d. lb. ; 59 lbs. and under, 5¼d. lb. ; Bulls (first), 4½d. lb, (second), 3¼d. lb. ; Kips (first), 6d. lb. (second), 5d. lb. (third), 3d. lb. ; Calcutta market. Prices in rupees per 20 lb. :—Arsenic hides (cows) : Agras, 9 to 14 ; Durbhangas, 6 to 7 ; Patnas, 5.8 to 6.8. Salted cows, 3 to 6. Arsenic hides, buffalo, 2.8 to 7.8. Skins : calf, 8 to 10 ; goat, 250 to 285 per 100 pieces.

Considerable quantities of Czecho-Slovak sugar have been sold in Great Britain, and it is probable that before the beginning of the new season all the available supplies of Czecho-Slovak sugar for export will have been disposed of.

H.M. Acting Consul-General at Algiers reports that the export of barley from Algeria to all destinations is now permitted up to a total of 50,000 metric tons (exclusive of the quantities exported to France). The maximum quantity may be increased if the results of the French and Algerian harvests prove sufficient.

## NOTES OF THE WEEK.

### *The Fighting in Asia Minor.*

The best made war rarely goes according to plan outside German *communiqués*, but military authorities, whatever their nationality, are exceedingly loth to admit the fact. In Asia Minor the Greek army since the resumption of the offensive has conspicuous achievements to its credit, and stands to forfeit none of its reputation, if its advance is slower when it encounters the main body of Turkish resistance. The tenour of the earlier communications, however, led the outside world to believe that the Turkish army had been completely broken and that there was nothing to prevent the Greeks from marching into Angora. As the event has proved, the Nationalists were yet to put up their stiffest fight, and the battle of the River Sakaria would seem to be still in progress. Greek reports continue favourable, but indicate that the enemy remains able to attack as well as to offer a stubborn defence.

### *Revision in Paris.*

An attempt has already been made to connect the reported decision of the Ambassadors' Conference on the subject of Albania's frontiers with party politics in Greece. The decision, we are solemnly informed, is an indication that the weakening of the Greek position attendant upon the return of King Constantine to Athens is not limited to Asia Minor. Possibly the Supreme Council has exposed itself to the charge by the nature of the settlement that it devised for the Near East; but it is to be hoped that the insinuation will be refuted. In extenuation of that settlement we may bear in mind General Smuts' description of the Paris Conference as a seething cauldron of human passion and greed, and we may be inclined to be more lenient than we should otherwise feel towards certain decisions arrived at under such conditions. Arrangements now made can be reached in a more judicial atmosphere than was possible two years ago, and this, it is to be hoped, is the explanation of the change of opinion now recorded.

### *Albania's Frontiers.*

The suggestion of a drastic partition of Albania was first accepted by the Allied Powers in 1915, when the British and French Governments were prepared to promise almost anything, in order to secure Italy's support. It is unlikely that the Albanian point of view received any consideration at the time. The same partition schemes had been put forward in 1912-13, and were then investigated, by no means impartially as it happened, but with less prejudice than was possible in 1919. The compromise effected in 1913 did no little violence to Albanian nationality, but it was at least a workable solution, as it provided a well defined geographical frontier. No doubt the ethnological position in the case of Argyrocastro has been modified during the last few years to the prejudice of the Albanians; but that fact would not necessarily justify the Ambassadors' Conference in rejecting the considered judgment of the 1913 Territorial Commission. Their decision, we may feel sure, has nothing to do with events in Greece. The allocation of Argyrocastro is in any case a difficult question to decide; but there can be little doubt that its incorporation in the new Albanian State is better calculated to promote peace in the Balkans than if it were given to Greece. The Greeks can well afford to take the decision in good part. If the new Albania makes good the Greek inhabitants will have little to complain of; if on the other hand, as the Greeks expect, Albania fails, their case will be proportionately strengthened, and districts which, handed over to-day, would always remain a source of friction and unrest, will pass unchallenged into Greek possession.

### *The Bulgarian Army.*

The demobilisation of Bulgaria's conscript army in accordance with the provisions of the Treaty of Neuilly has been begun, and is to be completed by the end of the month. So far only four hundred volunteers have been secured for the new force, and Bulgaria is in danger of finding herself before many weeks have passed unable to guard her frontiers or to keep order in the country. As a defeated enemy she can not claim much commiseration in a matter of this kind; moreover, appeals to the Great Powers largely miss their mark, as the question of the army is one that concerns more closely the smaller States that are her immediate neighbours, and the Great Powers naturally hesitate to take a step which cannot affect them in any way but would be held to prejudice their Balkan Allies. It is impossible, however, to conceive of any situation in which advantage is to be obtained by eliminating common sense. Nobody wants to see Bulgaria rendered capable of aggression or even mischief; but it is equally in nobody's interest, certainly not in her neighbours', to have Bulgaria a prey to internal disorder. The first effect of impotence on the part of the Sofia Government will be

Digitized by Google

felt on the frontiers, where there always is, and particularly at this time, an element anxious to be a law unto itself, free from all restraint of a central authority.

### *A Common Sense Solution.*

It is urged in certain quarters that the failure of the Bulgarian Government to raise a volunteer army is not genuine, and is merely a device for stultifying the Treaty of Neuilly. As against this allegation it can only be pointed out that the Inter-Allied Military Mission is of a contrary opinion. This body would meet the difficulty by raising the pay of the volunteers to an amount that would certainly be vetoed by the Inter-Allied Commission for Reparations. The Bulgarian plea is that voluntary service is out of the question in a country where conditions are as they are in Bulgaria. There must be a definite reply to this contention, affirmative or negative. Roumania and Serbia with their preponderating agricultural populations, although peasant proprietorship is not developed to the same extent as it is in Bulgaria, can supply the answer; but it should be given in circumstances in which the reply would carry conviction, as a result, perhaps, of an exhaustive cross-examination. The matter, therefore, should be settled at a round-table conference at which Roumania, Yugoslavia, Greece and Bulgaria are represented, together with the Entente Powers, under a chairman of American or neutral nationality. The head of the French Military Mission in Bulgaria is understood to have suggested that Bulgaria should be allowed to raise three or four thousand volunteers annually, and to make up the balance of the twenty thousand by ballot. The scheme is said to have been rejected by the Ambassadors' Conference; but it would probably be subjected to a more judicial investigation by the round-table conference that we have suggested. Moreover, it would be in the interests of a better understanding in the Balkans to have representatives of the four Balkan States meeting on equal terms to discuss a subject so closely allied to the big question of disarmament.

### *King Alexander of Yugoslavia.*

The illness that detains King Alexander of the Serbs, Croats, and Slovenes in Paris is not yielding to treatment as rapidly as had been hoped, and so far no attempt has been made to fix the date of his Coronation. It is satisfactory to learn that his condition gives no cause for anxiety. Rumour and report are busy over the House of Karageorgevitch, and the news of the King's engagement to the Duchess of Vendôme is now contradicted in Belgrade. In the meantime the question of the succession has had to engage the attention of the Yugoslav Government. Until the King has an heir, he will nominate his successor from a collateral branch of the family, with the consent of the Skupshtina. Of the collaterals of the Karageorgevitch dynasty there are to-day a cousin of King Alexander, Prince Paul, born in Petrograd on April 15, 1893, only son of Prince Arsen, the younger brother of the late King, and a nephew, the young prince Vsevolod (in Serbian, Svevlad), born on January 7, 1914, the son of Princess Helena, eldest daughter of the late King, and Duke Ivan Constantinovitch of Russia, who was murdered by the Bolshevists in 1919.

### *A Fresh Problem.*

The complication which threatened the European settlement as a result of the Hungarian province of Baranya, situated between the Drave and the Danube, at their confluence, declaring itself an independent republic under Yugoslav protection, has given place to trouble over the transfer of Burgenland to Austria. By the Treaty of Trianon, Baranya, which contains the coal-mining district of Pécs (Funfkirchen), is ceded to Hungary, and was to be evacuated by Yugoslav troops on August 28. The Belgrade Government was inclined to make the surrender of the province conditional upon the previous cession to Austria to Hungary of Burgenland, also in accordance with the Treaty of Trianon; but the Ambassadors' Conference had reversed its former decision and had called upon the Yugoslavs to evacuate Pécs first. The movement in Baranya, although favouring Yugoslavia, was more personal and political than national; there is a strong labour element comprising Germans, Magyars and Slovenes, that is opposed to being placed under the jurisdiction of the present Hungarian Government, in view of its attitude towards socialism and the fact that some of the "republicans" are deserters from the Hungarian Army. Once again an awkward situation was avoided by the correct attitude of the Yugoslav Government, which refused to countenance the Baranya movement, and the evacuation took place without incident. The Magyars, however, have forcibly resisted the transfer of Burgenland, and Oedenburg has been the scene of fighting.

### *Italy and Egypt.*

Three weeks ago reference was made in these columns to the action of the Italian Colonial Federation in Alexandria in urging upon the Italian Government the necessity for the maintenance of the Capitulations. It was not clear at the time whether this was a spontaneous act of the local body, or part of a scheme to strengthen Italy's hands in making her bargain with Great Britain over the proposed change in the status of Egypt. The memorandum in question, however, proved double-edged; it fitted in well with the declarations of the Italian Foreign Minister that Italy had not yet recognised the British protectorate over Egypt, but at the same time it could not fail to give umbrage to the Egyptians. Accordingly the Federation has been called to account, and has had to publish a chastened explanation that its original memorandum had been erroneously interpreted, that there is nothing inimical to Egyptian independence in the demand for the maintenance of the Capitulations, and that the Italian colony is always sympathetic towards Egyptian aspirations. It ended pleasantly with an expression of the hope that Egyptians will succeed in concluding an agreement realising *all* their national hopes. It will be interesting to see whether a further memorandum is issued to explain tha in wishing the Egyptians the realisation of *all* their national hopes the Federation did not intend to include any hopes that affected the integrity or safety of Italy's Ally, the British Empire.

### *The Moplah Outbreak.*

Last week's news of the Moplah outbreak near Calicut came at a moment when the sensational Press was short of topics, and enjoyed the honour of larger type than has been given to India for some time, but we do not think that any considerable section of the country took the matter very seriously. To well-informed readers, the surprising item of the news was the smallness of the force originally employed to arrest the leaders of a tribe notorious for a degree of fanaticism which is fortunately rare in India. Everyone in Malabar knows that, when the Moplahs break out, as they do every few years, there is serious fighting ahead, and the temporary withdrawal of the troops suggests either that the strength of the

Digitized by Google

movement must have been seriously underrated, or that political considerations may have been allowed to jeopardise the lives of the small force actually employed. The latter conclusion has in fact been drawn by observers of recent events in other parts of India. The old, and undoubtedly humane, maxim was that, when force was necessary at all, it should be ample to effect its purpose; of late there have been instances where, possibly with the idea of avoiding what is called provocation, bloodshed has resulted from the attempt to make a few files do the work of a regiment. It is bad tactics, and, we think, bad politics also.

### *Political Education in India.*

The mere fact that troops should be required on occasion to suppress internal disorder emphasises the backwardness of India in the essential matter of political education. In rural England it would be nearly impossible to raise a mob; in rural India it is sufficient to spread a few well-chosen lies, for the people are not yet able to detect such spurious coin. We are glad to see that the importance of this matter was insisted on by the President of the Legislative Assembly in a speech delivered recently in Bombay. Mr. Whyte eulogised, as was only proper, the achievement of the new legislatures, but he went on to say that the work to be done outside was even more urgent. Parliamentary institutions, he said, demand the closest touch between representatives and their constituencies, and it is essential to interest the people in the work of those whom they have chosen to represent them. We trust that Indian politicians will be quick to take this advice. Educating constituents is, of course, thankless work at the moment, but the constituents need it, and, if it is not taken seriously from the outset, the next elections may prove an unpleasant surprise to these who have neglected it.

### *The Indian Services.*

A striking illustration of the change in India's position was furnished by the official announcement issued last week regarding a partial revision of the scales of remuneration of the superior services. In the old days Whitehall regulated such matters autocratically, and was by no means over-anxious to receive suggestions from the other side; now we are given, in place of an authoritative statement, a telegraphic summary of the orders passed by the Government of India, and along with it a warning that the summary may be incomplete, so that we should await the arrival of copies of the Resolution by the ordinary mail. It is to be hoped that when these arrive the India Office will so far depart from its attitude of detachment as to see that they reach the various educational authorities, whose attitude counts for so much in regard to the recruitment of the Indian Services. We gather that in some centres the best young men are just now being warned off India on prudential grounds, and while we should not ourselves attach too much importance to opinions formed by college tutors, their influence is in fact sufficiently great to render it desirable that they should have full information of the latest developments.

---

The High Commissioner for Palestine has given his consent to the formation of a Palestine Gendarmerie Force for the purpose of securing the frontiers against the invasion by brigands and to aid the civil police in the maintenance of internal order. This force will be employed and trained as a military police force, and after a period of six months' training will be accommodated, in groups of either 50 mounted men or 100 foot, in barracks in various parts of Palestine. None but individuals of the best character will be accepted. The strength of the force will be 500, and will consist of 300 cavalry and 200 infantry. The force will be a mixed one of Jews, Arabs, and Christians.

## THE WEEK AT HOME.

LONDON, Monday Evening.

### The Irish Answer.

The reply of Sinn Fein to the Government has proved a profound disappointment. Many had hoped to the last that Dublin would prove less intractable in secret session than in the public fulminations of Mr. De Valera; but apparently the demand for freedom to separate is maintained. To that demand Mr. Lloyd George has returned the only possible answer.

It is believed in some quarters that even now further negotiations are possible, and that De Valera would not be averse from another invitation to visit Downing Street. It is argued that he obviously did not contemplate separation a month ago, since in that event he would not have come to London, and the three long conversations with the Prime Minister would have been a waste of time for both; moreover, those who discussed the position with him personally some months ago did not gather that his aim was then full independence, and his public speeches—and even the latest letter—contain phrases susceptible of more than one interpretation.

There is a school of opinion which holds that the demand for separation is in fact a cloak for the real demand, the inclusion of Ulster in a united Ireland. If that is so, Sinn Fein is playing a very dangerous game; for Irish unity is not, as the attitude of Ulster has shown, a reality; and the idea that Sinn Fein either could, or would be allowed to, coerce Ulster is ridiculous. Even those Liberal journals in England which retain a general sympathy with Sinn Fein have strongly discountenanced the possibility of coercing Ulster.

The situation is extremely serious. The next word rests with De Valera; but nothing can disguise the fact that we are on the verge of civil war again, and civil war in a worse form than before. The one good result of the negotiations is to demonstrate to the world that England wants peace and an honourable settlement, and is prepared to go to the utmost limit to ensure it; this, indeed has been generally admitted in other countries, even by newspapers, which are not usually too friendly to us.

It may be necessary to call Parliament together again in September, should the situation become hopeless. The Government is pledged to do so in any case in the event of an absolute breakdown of the negotiations, and it is now probable that a general election will be held in the autumn, as the Cabinet will naturally feel its hands stronger, if it has a fresh vote of confidence from the people. There is no doubt that it would secure another majority.

**The Census.**

The preliminary figures of the Census, which were published last week, are of extraordinary interest. The population of England and Wales has increased by 1,814,750 to 37,885,242 in the decennial period; and there are now 1,720,782 more women than men—surplus women, as some tactless person called them. This sounds very alarming; but as a matter of fact it only means that there are nearly eleven women to every ten men; it is more in the towns, and less in the country, which seems to show that women dislike solitude more than men. It is most marked in the watering-places, such as Harrogate, Tunbridge Wells, Eastbourne, and Bournemouth—in the latter place, indeed, there are 56,279 women to 35,491 men. At Aldershot and Eton, however, and one or two other places where there are schools and camps, men are in a majority.

The great towns have increased in size, while the country remains practically stationary; curiously enough, London appears to have diminished, but that is a trick of the figures, owing to the fact that there are more factories in the inner area, and the population has moved out. All the outer suburbs show huge increases, with the curious exceptions of Sutton, Epsom, and Dorking, where slight declines are shown. The greatest actual increases, however, are shown by seaside places, Blackpool and Southend leading; the greatest proportional growth is at Clacton and Frinton, which twenty years ago were little more than fishing villages.

It is interesting to note that almost exactly half the net increase of population in the country was accounted for by the birth-rate of 1920, when 957,782 babies made their positively first (unless one believes in reincarnation) appearance; the birth-rate is now beginning to drop a little, like the death-rate and the criminal statistics. We are all becoming more virtuous and consequently longer-lived; and women, in spite of their lack of clothing live longer than men.

**The Lost Airship.**

The wreck of the great airship over Hull last week was a terrible tragedy. It took with it some of our most experienced airmen; and its loss will naturally give pause to those who have advocated the lighter-than-air machine. Either the ship had structural imperfections, as rumour alleges, or was subjected to too great a test; these are matters for expert enquiries. It is nowhere suggested, however, that experiments in this type of craft should cease, although opinion more and more holds to the view that the aeroplane is the real human bird of the future. Apart from questions of safety and stability, the difficulty of berthing the huge bulk of an airship gives the aeroplane an enormous advantage.

**Reputations in Parliament.**

The parliamentary writers are engaged in the usual discussion as to the rise or fall of reputations during the past session, and they seem fairly well agreed over their verdicts. Mr. Lloyd George admittedly retains his old personal ascendancy over the Commons, his authority was so complete already that it was hardly possible for him to increase it. His one ineffective performance was over the Addison business; but an Archangel could hardly have done better in that difficult situation. Mr. Bonar Law was not much missed at first when his health broke down; it was a commonplace in April that even the greatest figures in politics are forgotten before six months have passed. That is no longer strictly true, for a large section of the Unionists, and most of the Coalition Liberals, would now be glad to see Mr. Bonar Law back again. The fact is that Mr. Chamberlain has not been quite so successful as his predecessor; he is rather stiff and stark, and unapproachable in manner; he is respected rather than popular. Mr. Bonar Law, it is true, always looks utterly miserable, whereas Mr. Chamberlain looks more cheery than he is; but behind a dismal countenance—to parody a well-known hymn—Mr. Law hides a kindly heart. Even his *penchant* for ginger ale and chess, two almost incredible failings in the eyes of most politicians, has not really weakened his hold on the political affections of the House.

Sir Robert Horne stands much where he did; he has so recently taken over effective control of the Treasury that he had had no time to make his mark as Chancellor of the Exchequer. Sir Gordon Hewart as Attorney-General has increased his reputation by his successful piloting of the new Licensing Bill; nor has it done him any harm that the Prime Minister could not spare him from the Cabinet to take the Lord Chief Justiceship. The great lawyers, indeed, have both done well; for while Lord Birkenhead has made several notable speeches in the Upper House, his legal judgments have been highly praised by the Bar—which is not by any means a respecter of persons merely because they hold high office.

In the Commons Mr. Winston Churchill has made only one important appearance, but his speech on Asiatic policy was an unqualified success. He is cultivating a novel reticence in these days, but it is not necessary for a Colonial Secretary to be always in the limelight, and there are those who believe that his period of office will in the end prove as noteworthy as that of Mr. Joseph Chamberlain.

**The Opposition.**

On the other side there is little to record. Mr. Asquith has been less effective in 1921 than he was in 1920. He has never caught the tone of the new House, and he seems to have a contempt for it. Some of his followers are inclined to wish he had taken a peerage—of course he could have one any day he hinted a desire for it—and left the leadership of the Liberal Independents to more forcible hands. His one notable act during the session has been to stop the incipient courtship of Independent and Coalition Liberals, as expressed in a couple of informal lunches; and there are two opinions as to the wisdom of that irreconcileable attitude.

The small band of Independents have put up a better fight against the Government than most people realise, but it has not counted for much; they are still relying on a great revival of opinion in favour of Free Trade—which is no longer the official policy of the United Kingdom—but there are no real signs of any such revival. On Ireland both their early criticism and their subsequent support of the Cabinet have gone far better.

The Labour Party has not recovered from the shock of the coal strike. Its members rarely attend the House. When they do speak, they are usually dull and platitudinous—with the exception of Messrs. Thomas and Clynes, and our new discovery, Mr. Graham; and they are now busily engaged in quarrelling among themselves. They are beginning to realise that the cry of State Socialism is not so effective as was once supposed, but they have no alternative gospel to put in its place. How are the (potentially) mighty fallen!

Among the private members, three only have increased their reputation. The Cecil brothers, who joined the Opposition with a fine gesture of independence, have perceptibly lost ground; Lord Robert is no longer spoken of as a possible Prime Minister. Captain Elliott and Mr. Austin Hopkinson have both spoken well on occasions; but Mr. Ormsby Gore, who only escaped office by the skin of his teeth, is rapidly coming to the front as who never speaks without knowledge particularly on the Church of England and the Near, and Middle East.

**Surrey v. Yorkshire.**

The controversy as to Armstrong's captaincy in the last Test Match still continues, and although he has not lacked defenders, opinion on the whole has been adverse to him. But the most exciting event of the cricket week was, curiously enough, a drawn game. Yorkshire were in process of beating Surrey by an innings at the Oval, and a victory for the northerners would have had an important effect on their chances of the championship; but on the last afternoon, when the game was in their hands, a sudden downpour stopped play. It was one of the heaviest thunderstorms that have visited London during the past few years, and it speedily turned the wicket into a swamp. It was very hard on Yorkshire to lose merely through the weather; but Surrey have had such bad luck this season through the breakdown of Hobbs that one can hardly begrudge them their one piece of undeserved good fortune.

# THE NEAR AND MIDDLE EAST.

*(From Our Own Correspondents).*

## EGYPT.

*Cairo, August, 18*

**The Crown Prince of Persia.**

A noted arrival has been the Crown Prince of Persia, who, together with the Crown Princess, is on his way to pay a visit to his father who is at present at Constantinople. The Crown Prince and party, who arrived at Port Said, proceeded by special train to Alexandria, where they are staying as the guests of the Sultan. The feast of Courban Bairam is just over, and Government offices re-opened to-day after having been shut for a full week. The usual reception was held at the Palace on the first day of the feast. It was exceedingly well attended, amongst those present being the Crown Prince of Persia.

**The Political Situation.**

Politically things remain quiet here, but there is a growing indignation at the blundering tactics followed by Zaghloul Pasha and his emissaries in England, tactics which are recognised as being nothing short of an appeal to the British Government to intervene in the internal affairs of the country and protect one portion of the population from alleged oppressive methods adopted by the other. He has just made another blunder in the message to the nation which he has issued on the occasion of the Bairam feast. In it he defends himself against the accusation levelled at him of prejudicing the national cause in his opposition to the Cabinet, but at the same time he makes the significant admission that the Cabinet's political programme is identical with the national aspirations, and people are asking themselves the obvious question why there should be all this campaign to bring to the notice of the British public that the Egyptian Cabinet is suppressing public opinion when the Cabinet is fighting for the very objects for which that public opinion is said to be asking. The long and short of it all is that Zaghloul Pasha is proving more and more how absolutely inconsistent his mental outlook is, and how utterly unqualified he is to represent his country in such delicate negotiations as are at present being carried on.

## YUGOSLAVIA.

*Zagreb, August 16.*

**Communism in Yugoslavia.**

Allegations have frequently appeared in the press that the Communists are acting in harmony with the Magyar Irredentists and with the Frankovist Separatists and, in fact, with everybody who hates the union and wishes to break up Yugoslavia. In the absence of definite proof there was a natural tendency to regard the statements made as exaggerated, but confirmatory evidence is rapidly being accumulated. M. Pribitchevitch, Minister of the Interior, in a recent speech in the Skupshtina, in support of the Defence of the Realm Act, pointed out that the Yugoslav Communist Party, in contradistinction to the Social Democrats of France, Italy and other States, accepted the Third International, but in a blind and naive way. The authorities are in possession of a proclamation dated May 29, 1920, launched from Moscow by Zinovieff to the proletariat of Bulgaria, Yugoslavia, Roumania, Turkey and Greece, calling upon them to make a single revolutionary front in the Balkans. This certainly points to Muscovite inspiration for the movement, of which many people were sceptical.

The next step was the deposition of a witness named Joseph Fa, a Hungarian, who had been a commissary under Bela Kun. He claimed to be a chauvinist Magyar, who wished to break up Yugoslavia and recover the Voivodina for Hungary, and admitted receiving money from the present Hungarian Government. Another link in the chain has been supplied by the arrest by the Austrian authorities, at Graz, at the request of the Belgrade Government, of Dr. Manko Gagliardi, who is on the list of war criminals for atrocities committed in Serbia during the Austrian occupation. Dr. Gagliardi fled from the country on the defeat of Austria and took up his abode at Graz.

Recently the authorities at Belgrade came into possession of definite proof that Gagliardi was concerned in the plot against the Regent, and the Austrian authorities arrested Gagliardi. A mass of incriminating documents was seized in his lodgings, including correspondence with the Communist Party in Belgrade.

The authorities, therefore, now consider themselves in possession of proof on the international and criminal plot against the Yugoslav union, of which the attempt on the Regent and the murder of M. Drashkovitch were incidents.

Criminal elements in the country have been enlisted into the plot, as well as open foreign enemies. An outburst of crime in the Voivodina, murders, thefts, and robbery, are held to be the work of Communists. The truth is probably that professional criminals have found in Communism a convenient mask and encouragement for their misdeeds. A band of fifteen robbers, of Roumanian nationality, has recently been captured. They called themselves Communists and confessed to a number of murders. It is probable that the majority of the members of the "Croatian Legion" which Gagliardi helped to organise are misled. Most of them are former Austro-Hungarian prisoners of war in Russia, who have been more or less affected by Bolshevik propaganda there and were captured by Gagliardi's agents on their way home, and won over to the cause.

**Frontier Problems.**

The Sofia correspondent on the Zagreb *Rijec*, which does not feel such intensity of feeling as the Belgrade papers, reports a conference of *komitaji* leaders near Kustendil. There were over forty voivodas present and they resolved to proceed at full steam with their activities in Macedonia. The telegram goes on to say that the Sofia authorities sent a detachment to stop one party crossing the frontier near Strumnitsa on July 24, where one notorious voivoda was killed, and his band was broken up. Bulgarian troops at other points have succeeded in preventing the infraction of the frontier.

Yugoslavia is maintaining a strictly neutral attitude in the Albanian question, regarding the rising of the Mirdites as an internal matter of that country, though refugees across the frontier are not turned back. But all along the frontier, a large quantity of proclamations in the Albanian language is said to have been found, inciting the Yugoslav Shipetars to rise, murder any who are well disposed towards the Slav authorities, and to encourage the *kachatsi* or brigands.

**Miscellaneous News.**

The remains of Vladika Peter II, of Montenegro, the great patriot ruler, and perhaps the greatest Yugoslav poet, which were removed from their tomb on the Lovchen by the Austrians on August 12, 1916, in order to depress the moral of the Montenegrins, were returned to their resting place on the anniversary, August 12, 1921.

Owing to the terrific heat (the temperature has exceeded 104 degrees F. in the shade) the population of Belgrade has been crowding to the bathing-places on the Save, where many sit in the water up to their necks all day long. The other day a party of about two hundred were waiting on the plank bridge for their turn to secure tickets, when the bridge, not designed for such a weight, collapsed, the crowd received their bath sooner than they expected. As it is not known exactly who was there, and the water is twelve or fifteen feet deep under the bridge, it is feared that there may have been some drowned, especially as there was a large proportion of women and children in the crowd.

In spite of the stringent regulations compelling strangers to report to the police and register themselves and obtain permission to stay in the town, a hunt round by the police has discovered no less than 1,402 persons of doubtful character, strangers to the place, in Belgrade, without proper permission. These have been at once expelled. This has cleared the town of a lot of doubtful customers, and may contribute to ease the lodgings question.

Sir Alban Young, H.M. Minister at Belgrade, has returned from London.

M. Milos Budisavljevitch, President of the Yugoslav Red Cross, and M. Nikola Petrovitch, Yugoslav Consul at Geneva, will represent the Kingdom of the Serbs, Croats and Slovenes at the forthcoming international congress shortly to be held at Geneva to deliberate on the problem of helping the famine-stricken population of Russia.

The library of the late M. Vesnitch, former Yugoslav Minister in Paris and President of the Council in the last Coalition Government, consisting of over ten thousand volumes, has been left to the Belgrade Faculty of Law.

On August 10, an earthquake was felt at Skoplje (Uskub). There were three distinct shocks, apparently travelling from north to south, which lasted several seconds. A certain amount of damage was done.

## ROUMANIA.

*Bucharest, August 17.*

**Political Movements.**

This week passed quietly, without any sensational incidents. Political strife was kept alive by the Press of the various groups and parties. The tone of their articles marks the state of the cross under-currents, and conveys the impression that, while the whole Opposition is unanimous in its clamour for the withdrawal of the Cabinet, its various component parts are drifting apart, so as to render impossible united action. Thus, the Tzaranists (Peasant's Party) are at daggers drawn with the Liberals, and much the same can be said of the advanced wing of the Ardeleni (National Transylvanians); while M. Jorga, the chief of the National Democrats, who was the spiritual leader of the late Federationists' block, repudiates the Tzaranists for having welcomed M. Stere in their midst, besides accusing them of fostering class-hatred. He warns the young element of the Ardeleni—who are flirting with the Tzaranists—to be aware of them, as an eventual class-hatred in Transylvania would spell disaster to the Roumanian cause, for the irreducible Magyar foe would inevitably take advantage of such defection. M. Jorga recommends a combined Liberal-Transylvanian Cabinet, provided that the Liberals abandon their absolutist and reactionary methods, and adopt a purely democratic programme to meet present exigencies. It would appear that in consideration of prevailing conditions among Opposition parties the Cabinet need not worry much about its own future; but it is aware of the fact that it could do no practical parliamentary work if the entire Opposition were to continue to boycott Parliament. The Cabinet is therefore endeavouring to win over some strong elements and especially the Tzaranists and a portion of the Ardeleni under M. Maniu and M. Vaida. It is rumoured that negotiations were broached with the Tzaranists, but they had to be discontinued on account of the exaggerated pretensions of the latter.

This state of things will presumably continue until the arrival of the King and General Averescu; and everybody expects that a change in one way or another will take place before the re-opening of Parliament. Two by-elections will be held shortly, in which the Liberals, in accordance with their determination to ignore the present Parliament, declared that they will not compete. The Anti-Liberal Press construes this more as a cheap way of avoiding certain defeat at the poll; it asserts that the Liberals should, on the contrary, face the voters, in order to ascertain their views upon the Liberals' hostile attitude towards the Cabinet.

**Miscellaneous.**

The Duke d'Amalfi, Spain's Minister to Roumania, has returned to Bucharest.

The French Aviator Captain Pelletier d'Orsy landed in Bucharest after having flown direct from Paris. The flight lasted nineteen hours, with halts at different places. The feat is the more remarkable, since it was accomplished with a modest monoplane of the "Morane Saulnier Parsal" type. This intrepid aviator has the merit of having inaugurated the aerial service which will, next spring, link together the two capitals.

A group of British Boy Scouts were invited to participate at the sports, exercises, games, competitions, and festivities which are being carried on from August 10-20, at Sibiu, Transylvania.

By order of the Primate a great religious procession took place on Sunday, followed by public prayers for rain.

Two more disasters have occurred in the Black Sea owing to stray mines. Both ships foundered; one was Russian and the other Danish. It is reported that eight men, of whom one was an American naturalist, met their death on the latter ship.

A terrible disaster occurred at one of the fortresses near Bucharest, an enormous quantity of explosives blowing up the fortress. The real cause has not yet been ascertained; it is surmised that the explosives decomposed on account of excessive heat and consequently ignited. There were luckily no casualties, but the damage is enormous.

A Roumanian-Yugoslav Commission is being instituted to definite the boundaries between Roumania and Yugoslavia.

The Roumanian-Soviet negotiations regarding navigation on the Dniester have been suspended. The Soviets declined to adhere to the Roumanian claim, that the navigation on the Canal Bugas should be carried on with Roumanian pilots and under Roumanian supervision.

## GREECE.

*Athens, August 13.*

**The General Situation.**

The lull after the storm, but for how long? The Minister of War says that the beginning of the second phase of the operations is only a question of days now. The talk about advancing on Constantinople has ceased completely—at least for the time being. Probably Reuter's semi-official message to the effect that if the Greek Army embarked upon such an undertaking, it would find itself face to face with the Allied garrison forces in that town, has something to do with it. The Hellenic High Command is once again concentrating all its attention on the arch-bluffer of Angora, whose army, or what is left of it, is apparently in for a bad time. King Constantine and General Papoulas have come to the conclusion that the occupation of the Nationalists' capital would not help them much, so long as the fifty

Digitized by Google

or sixty thousand men whom Kemal is still supposed to have are at large. The sole aim, therefore, of the forthcoming operations is the complete destruction of the enemy forces. Speaking recently to some journalists, M. Gounaris said that if it were necessary to gain its object, the Greek army would even go beyond Angora.

Meanwhile the deliberations of the Paris Conference are followed with great interest and without anxiety. It is generally believed that Greece's staunch supporter, Mr. Lloyd George, will again have it his own way, and that there are no more "Notes" coming forth, for the present. What however is causing a certain amount of anxiety is the silence of M. Maximos. Nearly a month has elapsed since he left in a great hurry for London, but we have not so far heard anything about the so-much-hoped-for loan. Has it fallen through again? Matters will look really bad if the Governor of the National Bank returns to Greece empty handed this time.

**The War Minister's Declarations.**

On Tuesday last the Minister of War, M. Theotokis, received the representatives of the Press and spoke to them about the operations in Asia Minor and the brilliant successes achieved by the Hellenic Army. The Minister at first emphasised the rapidity and the methodical manner in which the preparations for the offensive were carried out. He laid stress upon the fact that the whole organization of the offensive, which was due exclusively to the efforts of the competent departments of the Greek Army without any exterior assistance, was so perfect that it even rivalled the order and efficiency of similar organizations in the British Army. M. Theotokis then referred to the recent operations and pointed out that, as a result of these, one third of Kemal's forces had ceased to exist, while the remainder had received such a moral shock that it had lost all its military value. The battle of July 21 was the most brilliant feat of the Hellenic Army. Being under the impression that the Greeks after a fortnight's continuous fighting would be worn out with fatigue, also that, owing to their rapid advance and the considerable distance from their base, it would be difficult to bring up supplies for a day or two, Kemal attacked with the bulk of his forces consisting of seventeen divisions. But the Greeks not only repulsed the Turkish onslaught; they also counter-attacked. The results were known. The enemy suffered an extremely severe defeat and retreated in disorder sustaining enormous losses and abandoning huge quantities of war material in the hands of his pursuers.

Speaking of King Constantine, the Minister of War declared that His Majesty's presence amongst the troops was greatly responsible for the triumphs of the Hellenic arms. The area of the territory occupied up to the present exceeded 36,000 square kilometres, which was equal to half the size of Old Greece. With the exception of 150 kilometres of the Eskishehir-Angora line which was also expected to shortly fall into their hands, the Greeks were in possession of the entire Turkish railway system. The Decauville line between Angora and Sevastia, which was only 50 kilometres in length, would be of little use to the Turks, seeing that the distance between these two towns was about 500 kilometres.

Referring to the second phase of the operations, M. Theotokis said that this would begin within the next few days and would be quite as successful as the first phase. The people of Greece should place their entire confidence in the Army. This would do its duty and would obtain great results. The aim of the forthcoming operations was not the occupation of towns and positions but the definite crushing and destruction of the enemy.

As far as M. Theotokis knew, no peace overtures were made by Kemal, but in any case Greece was not going to repeat the mistake of the Allies in Mudros in 1918. She would exact and obtain such guarantees as would make it absolutely impossible for Turkey to attempt any more of her perfidious tricks. The Christian populations of the recently liberated territories would be safeguarded from future aggression and ill-treatment.

**The Greek Casualties.**

According to the official casualty list issued by the War Office the total losses of the Greeks up to the present are as follows:—

1st Army Corps:—Officers: Killed 35, Wounded 86. N.C.O.'s and Men: Killed 436, Wounded 1,743. Missing 647.

2nd Army Corps:—Officers: Killed 18, Wounded 78. N.C.O.'s and Men: Killed 399, Wounded 2,059. Missing 153.

3rd Army Corps:—Officers: Killed 12, Wounded 47. N.C.O.'s and Men: Killed 218, Wounded 964. Missing 34.

IV. Division:—Officers: Killed nil, Wounded 5. N.C.O.'s and Men: Killed 13, Wounded 112. Missing 3.

XI Division:—Officers: Killed nil, Wounded 4. N.C.O.'s and Men: Killed 26, Wounded 99. Missing 7.

The total Greek losses are therefore as follows:—Officers:—Killed 65, Wounded 220. N.C.O.'s and Men:—Killed 1,092, Wounded 4,977. Missing: 844.

## THE AEGEAN COAST.

*(From our Sofia Correspondent.)*

*Kavalla, August 16.*

**Kavalla.**

Your Sofia Correspondent is still in Macedonia, and has arrived here on his way from Salonika to Adrianople. It is much more pleasant to travel by boat these hot days, and the s.s. Roumelie from which I have just disembarked is, although small and not fast—one does a steady 11 miles an hour—a comfortable ship, with good food and a nice old Greek Captain who is very proud of his half dozen words of English. This morning at day-break we lay off Athos, and landed some provision for the use of the monks. The Athos Monastery, which is one of the oldest in Greece, has to-day more monks than it ever had before, owing to the fact that all those who belong to it are exempted from military service. From Athos to Kavalla is eight hours' journey, and we passed quite close to the island of Thasos where a number of British officers and men were stationed during the war.

Kavalla, the port from which the world famous "Xanthi" tobacco is exported, is a picturesque little town with its Turkish quarters situated high up on a big rock jutting out on the sea; behind this rock lies the long water aqueduct. It is satisfactory to hear that this year's tobacco crop is good, and that large quantities of the seed have been purchased by Americans, English, and others. Until this year Kavalla served only as a depot and sorting house for the tobacco, but a German-Dutch combine have now started actually to manufacture cigarettes at the place itself. Since wages are not dear, the venture should be successful, an average semi-skilled labourer receiving about 20 drachmae a day, which is equal to 6s. in our currency. Kavalla has still to rely on motor transport to connect it with the interior and it is a little over an hour's drive over the hill to Drama. The war has outwardly left few marks on the town beyond some houses destroyed by the Bulgarians and a small area close to the sea which suffered from the bombardment of the British Fleet.

**Dedeagatch.**

Leaving here late in the evening, we woke up next morning to find ourselves at Dedeagatch, the port to which Bulgaria has been promised, but has not yet secured, an economic outlet by the second Treaty of Sèvres. The railway runs down to the water's edge, and the land facilities are thus good; but as a port it is quite useless, as all cargo has to be landed by means of lighters, and during the winter a steamer sometimes has

to lie off for a fortnight before a favourable opportunity for landing her cargo presents itself. It is estimated that the cost of making a port will run into many hundred of million drachmae, and Greece has at present so many calls on her exchequer that one doubts whether she will be able to meet this bill for some considerable time to come. On the other hand it is not probable that Bulgaria will be willing to assist in any construction scheme unless she can be sure of possessing afterwards an absolutely free and independent use of the port. During the summer months when the weather conditions are propitious a certain quantity of goods is landed, and it is from here that the Greek Army in Thrace receive the greater portion of their supplies.

The town itself is of course very small, and possesses no industries beyond some flour mills which were destroyed during the war. Nevertheless for a mere passer-by like myself, there were certain compensations, and the greatest of these was the view to be had from the sea front. Looking south-west one saw the Island of Samothrace some fifteen miles away, while on its left quarter, although farther away, lay Imbros, and on the dim horizon and dead south were the western shores of Gallipoli. My steamer, now a mere dot on the horizon, could be seen steaming away for Smyrna—her final destination—and away to the east there was a fleet of white sailed fishing boats lying absolutely becalmed under the roasting beams of the August sun. There is always a fascination in the sea, and it was with a feeling of regret that I turned my back on the watery panorama and made my way to the station to catch my train for Adrianople.

**Bulgarians in Thrace.**

It might not be out of place to say a little here as to the supposed ill-treatment by the Greeks of Bulgarians living in Thrace. The chief complaints levelled against the Greeks are that Bulgarian is not allowed to be taught in the schools, that Bulgarians are made to fight in the Greek Army, and that a number of Bulgarians have been deported to the various islands along the coast of Greece. Now the first complaint seems to be well founded and is the one fault which the Greeks would be well advised to correct, as it will always tend to continue the bad feeling which is already existent. As to the statement that Bulgarians are made to join the Greek Army, this must be accepted with considerable reserve, as naturally enough the Greeks would not dream of sending to the front soldiers who they knew were there against their will and who would probably desert at the first opportunity. Nor, as far as can be ascertained, are the Bulgarians being taken for home service, although if Greece finds it necessary to mobilise more classes, Bulgarians may be called on to perform garrison duty. There have been a few deported who were sent away to the islands, but their numbers do not appear to have been very great. They were sent away for having caused trouble, and are not confined to prison, but are allowed full liberty.

In so far as a cursory look-round enables one to see the situation, it would seem that up to the present the Bulgarians in Thrace are not being actually ill-treated, but they live under the fear of what the future may have in store for them. The bitter hatred—one can call it nothing else—that exists between Greek and Bulgarian is not calculated to make the life of a Bulgarian under Greek rule, or *vice versa*, an easy one, and it is not surprising that the great majority of the Bulgarians left Thrace when the Greeks started to occupy the province fifteen months ago. With the Turk, relations are on the surface considerably better, and as I wrote last week, the Greek seems anxious to conciliate him, but he has a very hard task ahead of him. In fact one can only hope that the Greeks will maintain their present attitude of leniency and restraint towards the various nationalities, other than Greeks, in Thrace. If they do they should meet with great success, as there is no denying the fact that as administrators they are ahead of either Turks or Bulgarians.

## ALBANIA.

*Tirana, August 22.*

**Argyrocastro and Koritsa.**

The event of the week has been the receipt of a dispatch from the Albanian Delegation at Paris, announcing that Great Britain definitely recognises Argyrocastro as Albanian, and that she will make no demands for a rectification of the frontiers in favour of Greece. The question of Koritsa has already been decided, so that Albania now has the frontier of 1913.

The news sent a thrill of joy through the country, and the Government sent telegrams of thanks to London, Paris, and Rome; and the municipalities of Koritsa and Argyrocastro have despatched specific messages of gratitude to the British, French, and Italian Cabinets.

The welcome news came through just when the representatives of Chimara were at Tirana, whither they had arrived a few days before to express their gratitude to the Government for the new administration which has just been installed.

**An Amnesty.**

Last week Parliament granted an amnesty to those Albanians who have been detained under the accusation of having participated in the "Essadist" movement of the Spring of 1920. These men had been in prison for more than a year, and, the danger of a similar new movement having vanished, it was deemed wise to set them at liberty, and so to show confidence in their goodwill.

**Albania and Serbia.**

There are no more difficulties, in the North with the Mirdites in whose region there is now complete peace. Unfortunately the "Serbian Committee"—whose centre is at Podgoritza—is ceaseless in its endeavours to create friction with Albania. Unable to recruit supporters in Albania itself, the Serbs are forming bands in Yugoslav territory which demonstrate on the Albanian frontier. The Albanian Delegation has brought to the notice of the League of Nations this hostile and disloyal attitude of the Serbs, and the General Secretary of the League has invited the two Governments to send their representatives on September 1, before the Council at Geneva, where an inquiry will be made into their differences. The Albanian delegates will be Monsignor Fan Noli and M. Midhat Frasheri.

# THE LATE KING PETER.

*From our Correspondent in Yugoslavia.*

Zagreb, August 24.

King Peter, the Great, Liberator of the Serbs, Croats and Slovenes, his official title before posterity, is at last released from the cares of this world, where for nearly eighty years he drank his full of the misfortunes and fortunes of this life. He has been laid to rest in his family home, in his own foundation, by the side of his grandfather, Kara George, the Liberator, whose tradition he so gallantly and so successfully carried on, bringing it finally to its logical conclusion, with the recent passing of the Constitution of his united people.

In 1870, when a prisoner of war in the hands of the Germans, whom he instinctively hated, he escaped by a bold plunge into the Loire, and, amid a shower of bullets escaped and returned to the French army in which he was serving. The chill which he caught in those wintry waters inflicted a rheumatism which never left him, and it was due to rheumatism that he withdrew from public life on the eve of the Great War, though it did not prevent him from taking an active soldier's part in the tremendous events of 1914-1918.

It would be hard to find a more romantic life than that of Peter Karageorgevitch. Brought up in the spirit of democracy, an exile for forty-five years from the land and people that he loved so well, he entered upon his real life's task at an age when most men think of retiring. He was almost sixty when he mounted the throne, vowing to devote his remaining years to the task of liberation; ten years he spent in preparation, and then ten years of storm and strife and war and again exile, until finally he was able to see the realisation of his life's dream, the union of his people, and to know that his part was played, his work done, success achieved.

The change, in 1903, from the tyranny of the degenerate Obrenovitch to the democratic constitutionalism of King Peter was positively startling. His unfortunate predecessor never dared to stir abroad without a troop of guardsmen. But Peter strolled about the town and on the hills of Topchider attended by a single officer and orderly. When a lieutenant endeavoured to clear a way through the crowds that pressed round to kiss his hand, his cloak, his sword, the King said; "Do not trouble. I do not like police protection. My people will protect me." And this was his attitude to the end. During those long years at Geneva he associated with Socialists and with Bakunin, the King of Anarchists, with Svetozar Makovitch, leader of the Serbian Socialists, and met Karl Marx. There he discussed the future of his country with Nikola Pashitch, like himself, an exile in those days. When he was translating J. S. Mill's "On Liberty," Milton, and Machiavelli into Serb, his thoughts were for his people, for their intellectual advancement, at a time when he was prevented from struggling for them physically.

He was always a lover of liberty and a good hater of tyranny; that is why he offered his sword to France in 1870, and all his life hated the Germans, above all, the Austrians and Magyars, who were in particular the enemies of his people. A tale is told of how he was talking with German officers at the close of the Franco-Prussian War, when they were in occupation. A Prussian bully was expressing contempt for the French, as a degenerate people, when Lieutenant Karageorgevitch protested. The Prussian then turned his abuse to the young Serbian volunteer, whose hot blood boiled up at the insult, and he struck the German in the face. They exchanged cards. Next morning, the German had first shot, and missed. But the Serb did not miss, and the bully fell with a bullet through his brain.

In 1875, he saw another chance of fighting for his ideal, and this time with his own people, against the Turk, and he hurried to Bosnia to join the insurgents. He launched a proclamation calling for volunteers, from Austrian territory, for he lay hid, making his plans, in Zagreb, as a jumping-off place, while the authorities in Vienna wanted his blood. He took the name of Peter Mrkonitch, and raised his band and fought many a successful action. In his enthusiasm for the cause of his people, he sent a letter to Prince Milan Obrenovitch at Belgrade, calling on him to forget past hatreds and unite in the cause of Serbdom. The reply was characteristic. Milan sent a creature named Toda Erceg to assassinate him. Fortunately his faithful adherents discovered the plot, and Peter was warned; but this obliged him to abandon his crusade.

It is interesting to note that only his most devoted friends were aware of his identity. Vienna, Constantinople and Belgrade were out for the blood of Prince Peter Karageorgevitch, but could not identify the Voivoda Markonitch, or Zoritch, as he was sometimes called. A detective from Vienna referred in his reports to a "distinguished gentleman whose name I cannot ascertain." One of his officers, a Montenegrin Peter Golubovitch, only knew him as Mrkonitch, and thought, as many did, that he was a French officer. The Austrians did not even know that he had his base in Croatia and Slavonia, that he launched his proclamation from Zagreb, that he collected volunteers from the Save to the Drave, or that on March 4, 1875, he travelled from Zagreb in the Susak train for the Bosnian frontier. The tale of this rising and of his part in it is a romance in itself.

He inherited a fortune from his father Prince Alexander in the form of an estate in Roumania, but he dissipated most of this in the Bosnian rising. When he ascended the throne, he finally sold the property and devoted the proceeds to building a church at his home at Topola, where the family vault is and where he is now buried.

**The Funeral.**

The funeral scenes at Belgrade were impressive in the extreme. Several small details show that strong vein of sentiment that runs through the Serbian people. Fifteen of his old comrades of the Bosnian Rising collected a wreath of wild flowers from the spot where they first met their beloved leader; they came as a deputation to the funeral, under Moja Hrvacianin, and at their particular request, their offering was placed in the coffin before it was sealed. As he lay in state, there were pinned upon his breast two more medals, each the first issued, of the Albania Medal, in memory of the Great Retreat of 1915, and the Serbian War Medal.

The wreaths numbered over a thousand, and it is interesting to note that the first delivered was from the grateful Russian students now in Yugoslavia. Many public institutions and banks gave large sums, running into many thousands of dinars, to be devoted to the erection of a permanent memorial, in some practical cause such as the King would have loved, a hospital or a school.

The Minister of War, General Zechevitch, issued an Order of the Day to the Army and Navy, which is interesting as throwing a light upon the psychology of the

Serbs. It is worth reproducing. After reciting the fact of the demise of the crown and accession to the throne of the Regent, under Article 56 of the Constitution, the Order proceeds :—" The noble heart of the grey-haired King, which for seventy-seven years beat with unrivalled love for all three branches of our single-blooded people has to-day ceased to beat. His noble soul has sped aloft to the heavenly heights to the Throne of the Almighty. Heroes! Sons of our dear Shumadia, Weep! for to-day there has died the first and most perfectson of the Shumadia. Son of rocky Hezegovina and Montenegro, of wonderful Dalmatia, of the wild Krajn and of lofty Bosnia, Weep! for to-day Peter Mrkonitch has breathed his last. Heroes and sons of wondrous Macedonia, Weep! for your Liberator is no more. Heroes, sons of lofty Croatia, of glorious Slovenia, of our rich Slavonia, of our flat Srem, Backa and Banat, Weep! for the stalwart arm has grown for ever cold of that great King who brought you together in common brotherly embrace after the separation of centuries. Heroes all, Serbs, Croats, Slovenes, pour forth your tears! for to-day there has breathed his last that great and grey-haired Sovereign who, together with your grandfathers, fathers and brothers, in the teeth of unheard-of struggles and fierce war with the enemy has created the free, indivisible fatherland of all Serbs, Croats and Slovenes. With tears of grief, pray to God, heroes,for the repose of the Soul of the Great King Peter I Karageorgevitch, and in the common mourning of all our three-named people, close your ranks more firmly than ever by the side of His Successor, His Majesty King Alexander Karageorgevitch."

The gun-carriage which bore the coffin is a veteran of the Salonika front. It was present in all the heavy fighting at Rosna, Banica, on the lofty pass of Gornitchevo, on the Chuka, on Hill 1378, and came to Belgrade with the 1st Army, penetrating into Hungary as far as Subotitsa. From it were fired 16,000 rounds, and half a dozen gunners were killed by its side. After the funeral the gun-carriage will be handed over to the National Museum.

## CORRESPONDENCE.

### THE WAR IN ASIA MINOR.

*To the Editor of the Near East.*

Sir,—The very pertinent questions which Lieut.-Colonel Aubrey Herbert asked in the House of Commons regarding the supply of munitions of war to the belligerents in Asia Minor were met by Mr. Chamberlain with platitudes about the "principles of international law and the habitual practice of this country." But the Leader of the House did not explain how it was possible to be strictly neutral when the Powers were in military occupation of the Straits and the Turkish capital. The fact that the Greeks who had originally gone to Smyrna as the Mandatory of the Powers now refuse to listen to the advice of the Supreme Council was ignored entirely. How can we wonder either at the Mohammedans in India being more than doubtful as to the sincerity of our declarations seeing that in 1897, when the Turks had beaten the Greeks to their knees, there was no hesitation; we at once intervened and prevented the Turks from enjoying the fruits of their victory. Mr. Churchill in his speeches has explained the necessity of bringing the war in Asia Minor to an end without a further break up of the Turkish Empire. Yet what has our Government done to bring about this pious wish? Who is the evil genius who is ever ready to persuade the Cabinet to come to a wrong decision whenever this Near Eastern problem is under discussion? The Press this last week has been full of extracts from Lord Esher's book—"The Tragedy of Lord Kitchener." But if the truth be ever told, some historian of the future will assuredly record that the shortcomings of our War Office during the fighting were more than surpassed by the errors of our Foreign Office in its conduct of the peace since the Armistice. It may also possibly be pointed out that in the peace negotiations there was no Kitchener's Army to write up on the credit side of the account. To paraphrase a well known saying, "Peace hath her tragedies no less than war."

I am, etc.,

COLES PASHA.

14/8/21.

## "THE NEAR EAST" COUPON FOR THE ENCYCLOPAEDIA BRITANNICA.

Special attention is directed to the advantageous offer made in this issue to readers of the Near East, enabling them to obtain a complete set of the Encyclopaedia Britannica (XIth Edition) for the initial payment of 21 shillings, together with, in the case of readers overseas, the cost of freight.

For the convenience of overseas readers we print below the approximate cost of sending a complete set of the Encyclopaedia Britannica to a number of ports and cities. In view of the fluctuations in the cost of freight it is not possible to determine beforehand the actual charges, but in the event of our being able to despatch the goods at a lower rate than that quoted the amount overpaid by the purchaser will be refunded.

### WHAT YOU HAVE TO DO.

1.—Make out your order on p. 264d. and post it to The Manager "The Near East," 1, Devonshire Square, London E.C.2.

2.—Send with your order a cheque or Banker's order for the amount required by the terms of purchase (according to the binding), *and*, if you reside overseas,

3.—Send a second cheque for, or add to the first cheque, which should be made payable to "The Near East," an amount covering the freight charges indicated for the nearest port or city in the table form below.

**Points to Note.**

1.—**Free Insurance.** The volumes will be packed in tin-lined cases for all purchasers overseas and will be insured at the charge of "The Near East."

2.—State the address to which the bill of lading is to be sent, in order that notice of shipment may be dispatched immediately.

3.—You can secure the Encyclopaedia Britannica for a minimum payment of 21 shillings a month for 25 months; but by spreading your payments over seven months only you secure a reduction of 7 per cent; by paying *cash with order* (£23 12s. 6d.: plus freight, if abroad) you obtain a discount of 10 per cent. and receive *free* a bookcase.

### THE POST WAR EDITION.

Although the XIth Edition is ten years old, it still remains an unsurpassed encyclopaedia of human knowledge. There will, however, be issued shortly a

**SUPPLEMENTARY EDITION OF 3 VOLUMES.**

of identical size and type, which are now being completed These new volumes will bring the XIth Edition completely up-to-date in all branches of knowledge. The three volumes will not be offered to the general public until owners of the XIth Edition have been afforded an opportunity of purchasing them at a pre-publication price.

**Freight on a complete set** (29 volumes) of the Encyclopaedia Britannica (*Handy Volume Issue*).

| Ports, &c. | Without Bookcase. | With Bookcase. |

# NEAR EAST BOOKSHELF.

## THE CAVALRY OPERATIONS IN PALESTINE AND SYRIA, 1917-1918.

**"The Desert Mounted Corps."—By Lt.-Col. the Hon. R. M. P. Preston, D.S.O., with an introduction by Lieut.-General Sir H. G. Chauvel, K.C.B., K.C.M.G. (London : Constable and Co., Ltd.).**

Those who have read Mr. Massey's two great books "How Jerusalem was Won" and "Allenby's Final Triumph" might imagine that for the general reader the last word had been given on this great campaign. This history of the "Desert Mounted Corps" shows how much more there is to tell. Although covering the same military events as the above-mentioned books it deals with the special work of the Cavalry with such intimate personal knowledge and experience and with so much detail as to form a story of enthralling interest. In his introduction Lieut.-General Chauvel states that "in writing this history Lieut.-Colonel Preston has done a service to his country which I am sure will be fully appreciated." While naturally of predominant interest to those who served in the Mounted Corps it will appeal to all who take an interest in Allenby's great success.

The narrative commences at the re-organization of the force when General Allenby took over command in June 1917. The Desert Mounted Corps was composed of the Australians, New Zealanders, British Yeomanry, Territorial Horse Artillery and Indian Cavalry. The last greatly predominated after the withdrawal to France in April, 1918, of the Yeomanry division. In the last operations a French "Regiment Mixte de Cavalerie" two squadrons of regular French Cavalry and two of Algerian Spahis took part and greatly distinguished themselves.

In following the work of the Campaign nothing is more surprising than the number of times when the Cavalry got home with only moderate losses by galloping straight for the enemy's trenches or the enemy's guns. The capture of Beersheba at the eleventh hour was a fine piece of work.

"As soon as the batteries were in action, General Grant's two regiments swept out into the open, in column of squadrons in line, and galloped straight at the Turkish trenches.

Seen from the rising ground on which our guns were in action, it was a most inspiriting sight. It was growing dark, and the enemy trenches were outlined in fire by the flashes of their rifles. Beyond, and a little above them blazed the bigger deeper flashes of their field guns, and our own shells burst like a row of red stars over the Turkish positions. In front the long lines of cavalry swept forward at racing speed, half obscured in clouds of reddish dust. Amid the deafening noise all around, they seemed to move silently, like some splendid, swift machine. Over the Turks they went, leaping the two lines of deep trenches, and, dismounting on the farther side, flung themselves into trenches with the bayonet. The whole position was in our hands in ten minutes and was consolidated immediately."

A similar thing happened at Huj.—

"As our cavalry appeared, thundering over the rise the Turks sprang to their guns and swung them round firing point-blank into the charging horsemen. The Infantry, leaping on the limbers, blazed away with their rifles till they were cut down. There was no thought of surrender ; every man stuck to his gun or rifle to the last. The leading troops of the cavalry dashed into the first enemy battery. The following troops, swung to the right, took the three heavy howitzers almost in their stride, leaving the guns silent, the gun-crews dead or dying, and galloped round the hill, to fall upon the mountain battery from the rear and cut the Turkish gunners to pieces in a few minutes. The third wave, passing the first battery, where a fierce sabre v. bayonet fight was going on between our cavalry and the enemy raced up the slope at the machine guns. Many saddles were emptied in those few yards, but the charge was irresistible. In a few minutes the enemy guns were silenced , their crews killed, and the whole position was in our hands."

At El Mughar "the squadrons lost more heavily both in men and horses than the two (squadrons) that had gone on with the sword." The three things which the Turks feared most were a threat to their communications, a charge of cavalry and a heavy aerial attack. They received all these to the full before their armies were utterly destroyed.

One of the greatest difficulties experienced in some phases of the campaign was the scarcity of water—even where water was present it had often to be drawn from deep wells and the pressing need for haste made it impossible to provide an adequate supply. It is amazing to read how at a pinch cavalry were able to progress under conditions which were once thought impossible. "One battery of the Corps marched and fought for nine consecutive days, during which period its horses were only watered three times, and this was no isolated example."

The author cannot praise too highly the Australian horses. "The majority of the horses in the Corps were Walers and there is no doubt that these hardy little horses make the finest cavalry mounts in the world." When ridden by an Australian trooper each horse carried a weight of over twenty-one stone, all day and every day for seventeen days on less than half the normal ration of forage and with only one drink every thirty-six hours.

In connection with cavalry tatics and the more technical side of mounted warfare this work will, we feel sure, be of considerable value to the student of military history, but for those also who wish to obtain a vivid and realistic picture of the campaign from the capture of Beersheba to the surrender of Aleppo nothing better has ever been written.

E.W.G.M.

## THE ETERNAL DESERT.

**"The Sahara."—By Pierre Loti. With Frontispiece in Colour by A. Lamplough. Translated from the French by Marjorie Laurie. (London : T. Werner Laurie. 10s. 6d. net.).**

If M. Pierré Loti is disappointed in the English sales of his latest work he will have neither his own literary power, the acumen of the reading public nor the skill of his translator to blame. He will find the cause of any lack of popularity to lie in the title with which he has chosen to docket the volume. It is safe to assume that nine-tenths of the casual reading public will pass the book unnoticed unless they happen to be looking for a descriptive volume on desert lands. This is a pity, because although the Sahara plays a naturally important part in the development of M. Pierre Loti's work it really only serves as a stage upon which is set a drama of intense human interest.

The plot is an old one ; old as the visitations of white men to dark continents ; but few authors could equal M. Loti in his portrayal of the characters who were in it, especially that of Jean, the pure minded, loving, sinful Frenchman, member of the Corps of Spahis, serving his military term at St. Louis. This man with his hopes, his loves, his ambitions and his failures, makes the book, while the pressure of the sweltering breathless desert is pregnant in every phase. Here is a man, a simple home-loving peasant drafted to Africa for five years service. Straight and clean living in the midst of unspeakable vice, he carries the memories of his parents and of his bethrothed triumphantly adequate until he falls victim to the wiles of a white skinned mulatto wanton, who is true to him for just as long as his whole-hearted adoration amuses her. When at length accident reveals her duplicity, Jean for a period follows the path most usually trodden by men in such circumstances, only, however, to pull himself together under the influence of a letter from his mother. It is here, perhaps, that M. Loti's art is the most manifest. Never for a moment is the vague shadow of gloom lifted ; a shadow so slight that it is quite indefinable ; yet intruded in such masterly style by the author that no sun of Africa can dispose it. We read of Jean's release from the bondage of St. Louis, we see him duly embarked upon his journey to Algiers, but deep in our minds we feel that the spell of the amulets, "woven like a web across his room" is still potent to his undoing. Of the actual progress of the story it would be unfair to write, it must suffice to say that in his final chapters M. Loti has dallied with no consideration outside his art, for which in these days of literary insincerity we may be truly thankful. This

Digitized by Google

is not a book for the young to read; many passages are distinctly unpleasant, but the author has given us a picture of life in the Sahara, and life is not always free from unpleasantnesses. The translator, Miss Marjorie Laurie, is to be congratulated upon her accomplishment of what must have been a very difficult task, and the frontispiece by M. A. Lamplough, is quite up to the high standard we are accustomed to expect in this artist's paintings of the East.

## WITH THE 1/5th ESSEX IN THE EAST.

**"With the 1/5th. Essex in the East."—By Lt.-Col. Gibbons, D.S.O. (Colchester: Benham and Company Ltd., 12s. 6d.)**

"When I look back on the record of these men of Essex—their splendid devotion to duty, their patience in adversity, their cheerfulness under every conceivable hardship and discomfort, their steadiness and bravery in action and their exemplary conduct at all times, I am in despair at the feebleness of my pen and wish they could have produced a historian better able to do them justice." So writes the author of this book; its reader will, however, not agree that the splendid records loses much through the narrator. Indeed the members of the Battalion are to be envied in having such a faithful, interesting, and detailed record of their doings. Every individual known action by a member of their battalion, all the honours gained, and all the casualties seem to be recorded.

While, however, the book must be of permanent interest to the members of the 1-5th Essex there is much of great general interest, and the author has spared no pains to make intelligible the various actions in which he was engaged, as well as the historical associations of the places seen. In some respects the accounts of engagements given here considerably amplify other records. Of Gallipoli there is a vivid picture—of the miseries and hardships endured, in common with many other regiments, by this regiment. The account of the Palestine fighting covers new ground to some extent, and is a welcome addition to our information. The mystery of the first battle of Gaza is not solved here. A letter is quoted from Brigadier General Dodington in which he states:—"I can tell you, however, that we had the Turks stone cold in Gaza on the night of the twenty-sixth and could have bagged the lot if only those higher placed had known what we knew. We had them too on the twenty-seventh if only certain action had been taken." All the military operations about Gaza are greatly elucidated by a capital sketch map.

The work of the Battalion after the capture of Jerusalem, along the banks of the River Auja, and later on the foot-hills near Wady Ballut is told in considerable detail. Then came the second great advance. The 1-5th Essex gradually progressed up country until at length when hostilities with Turkey ceased on October 31, they found themselves on the neighbourhood of Beyrout. Finally, after some exciting experiences in Egypt in suppressing rioting, on November 19, "the 1-5th Essex after a brief but glorious career ceased to exist." This volume will ensure that this "glorious career" will not be forgotten.

It may be added that there are over two dozen excellent original photographs, and six maps.

E.W.G.M.

## NOT OF THE NEAR EAST.

**"A Market Bundle."—By A. Neil Lyons. (London: Thornton Butterworth. 7s.)**

Save for a chance reference, of an uncomplimentary character, to ex-King Ferdinand of Bulgaria, we have been unable to find any reference to the Near East in this book—and we have read it from cover to cover. But we are very grateful to the publishers for sending it to us, for it is capital fun, and has given us many smiles and a few hearty laughs. Mr. Neil Lyons' work is new to us, but we hope to know more of it ere long. These stories are all very short—there are forty-four of them in this particular 'market bundle'—but if they are 'little' they are, emphatically, 'good' also. They are told with a verve and neatness that mark their author out as a born short-story teller, and though many of them are mere nothings, one or two will set readers thinking, if not very profoundly. A good book indeed, and one which we recommend to readers both at home and abroad.

## MUSICAL NOTES.

**Spanish Music.**

There is an England to-day a real and fast increasing interest in the artistic doings of Spain, a country whose genius, so long obscured by bad governments and national indifference, is now finding full expression. As yet, it is true, we know little of the real Spain; our conception of its music is too much derived from Bizet's "Carmen," and in its literature many have not yet passed the Ibanez stage. But we are learning. Great attention was given to the exhibition of Spanish paintings held last year at the Academy; Galdos (now that he is dead) is being worthily appreciated; and the names of Granados, Albeniz, and de Falla are seldom absent from the programmes of our concerts. Above all the Russian ballet of Diaghileff has given to English interest in Spanish art an enormous impetus.

Now there is probably no country in which Eastern and Western music have so commingled as Spain, or rather as Southern Spain. The exact extent of Moorish influence in the Iberian Peninsula it is impossible to gauge, but the study of it is fascinating and one of peculiar interest to readers of "The Near East." To them, therefore, I specially command a book recently published by Messrs. Constable: "A Picture of Modern Spain: Men and Music," by J. B. Trend (15s. net.) It is written with engaging enthusiasm and complete knowledge, and, what is a notable virtue, it does not indulge in that false glamour which many dishonest travellers have thrown over their writings on Spain. There is in it a vast amount of information not obtainable elsewhere, but to say it records facts alone would be very wrong, for Mr. Trend never conceals his own opinions, which incidentally are extended over all the arts and occasionally to politics and religion as well. But though everywhere the book is of extreme interest—whether the subject be "Education in Spain," or "The Catalan Question," or "Spanish Opinion on the War," it is chiefly the music of Spain that concerns me here. On this Mr. Trend has much to say, mostly from the operatic or stage aspect; and one is very grateful to him for a "bibliographical guide to Spanish secular music." How sensitive he is to the beauty of Spain and how well he can describe it may be seen from the following passage on the Alhambra, taken from a chapter on "Music in the Gardens of Granada:" the author was with de Falla at the time:—

> In the day-time the Alhambra is difficult to understand. It is too strange, too remote to be completely intelligible. . . . And then Sr. de Falla with Sr. Vaizquez Diaz, one of the most modern of Spanish painters, took me at night. The moon was waning, but it showed about half, and covered everything with an intense, queer light which was now violet, now greenish, but emphatically not white. The atmosphere seemed friendly, familiar, not strange and uncomfortable as in the daytime. The long tank in the Court of Myrtles stretched away into an uncertain distance; and a man with a lantern passed slowly under the arches in front of the Hall of the Ambassadors. Then I realized what had happened. The atmosphere of the Alhambra at night is the atmosphere of opera. . . . Moonlight and Moorish art gain indefinitely by their association.

It will be easily realized how valuable a book it is that a man whose impressions are so suggestive as this extract shows them to be has written, and, quite apart from the great instructive worth of it, Mr. Trend's volume should be read for the insight into the soul of the country which such passages provide.

## PERSONAL AND GENERAL.

**To-day.**
September 1 (New Style).
August 19 (Old Style).
Julhijja 28, 1339 A.H. of the Moslem Calendar.
Ab. 28, 5681 of the Jewish Calendar.

The Roumanian Minister, M. Boeresco, has been granted an extension of leave owing to indisposition.

Lord Porchester has left London for Constantinople to take up his military duties at G.H.G.

M. Boliet, Professor of Oriental Languages at Paris, is now on a visit to Bulgaria to study the language.

Mrs. Arthur James has left Brides-les-Bains to visit Sir Horace and Lady Rumbold at Constantinople.

The Pope received in private audience last week Mr. Ronald Storrs, the Military Governor of Jerusalem.

The Greek Chargé d'Affaires and Mme. Rangabé have left London, with their family, for The Birches, Penshurst, Kent.

The marriage arranged between Graeme Oliviera, of Harrington, Kotagala, and Glenny Jaques of Shedfield, Hants, will take place in Ceylon in October.

The King of Roumania left Bagnolles on August 27 to spend the week-end at Saint-Lunaire, where the Queen of Roumania is staying.

Madame Stancioff, wife of the Bulgarian Minister in London, has left for the South of France with her son, and will be away some weeks.

The marriage of Mr. Edward Stevenson, M.C., 2nd Battalion Seaforth Highlanders, and Miss Ela Peyton will take place at Meerut, United Provinces, India, on October 5.

Lieutenant-Colonel Douglas Capitaneano, Military Attaché to the Roumanian Legation, returned to London last week from visiting the King of Roumania at Bagnolles-sur-Orne.

General Newman, Chief of the General Staff in Egypt, who was seriously injured in an aeroplane accident at Heliopolis on August 15, is now making satisfactory progress in hospital.

Vali Adh, the Heir-presumptive of Persia, who is on his way from Bombay to England, has arrived at Constantinople to visit his father, the ex-Shah, who has been living there since his deposition. ..

The marriage of Colonel-Commandant A. D. Kirby, C.B., C.B., C.M.G., R.A., and Miss Muriel Wilson is arranged to take place in Bombay during October. Miss Wilson intends to leave England during the last week in September.

An engagement is announced between Captain John Warnes Hudson, Indian Army, younger son of Mr. and Mrs. G. Hudson, of Blakeney, Norfolk, and Margaret Evelyn Overman, younger daughter of Mr. and Mrs. Gilbert W. Overman, of Weasenham, Norfolk.

Sir Arthur Peel, the retiring Minister of Bulgaria, left Sofia on August 23. A distinguished company assembled at the station to bid him farewell. The King has conferred the national Order of Civil Merit of the First Class upon him.

Sir Charles Stewart-Wilson, K.C.I.E., who has resigned his position on the Inter-Allied Reparations Commission in Bulgaria, has received from the French Government the Cross of Officer of the Legion of Honour.

A marriage has been arranged and will take place on September 6, between Colonel P. Matcham Davies, R.A.S.C., son of the late Lieutenant-General A. Matcham Davies, Indian Army, and Mrs. Davies, late of Branksom Park, Bournemouth, and Hildur Ohlson, daughter of the late Captail Elias Ohlson, R.N., of Stockholm, Sweden.

The marriage arranged between John James Flockhart, only son of the late James Flockhart and Mrs. Flockhart, Leytonstone, Essex, and Flora Evelyne, younger daughter of Sir George Watt, C.I.E., L.L.D., and of Lady Watt, Chinsura, Lockerbie, Dumfriesshire, will take place at Wellesley-square Church, Calcutta, early in December.

A marriage has been arranged, and will take place at Karachi, India, in October, between Captain Arthur Amys Fausset-Baker only son of the late Major Fausset-Baker and Mrs Fausset-Baker, and Flora Jane Evans, second daughter of Mr. and Mrs. Lewis Evans of Witheby, Sidmouth, Devon.

Our Athens Correspondent writes (August 13):—Earl Granville, who had proceeded last week to Portaria, a picturesque village on Mount Pelion, has returned to Athens.

Vice-Admiral Kelly, Chief of the British Naval Mission to Greece, has returned from England after an absence of over two months.

It was announced in a Reuter message from Athens on August 25 that King Constantine has been indisposed during the last few days owing to gastric troubles; but the latest bulletin states that His Majesty's health is quite restored and that he has once more taken up his official duties. King Constantine is at present at the advanced base of Eskishehir, and will continue to stay at the front until the end of the war.

On August 24 King Ferdinand of Roumania celebrated the fifty-sixth anniversary of his birth. His Majesty, was the recipient of numerous messages of congratulation, among them being a cordial message from King George and another from the Roumanian colony in London. During the day cards were left at the Roumanian Legation in London on behalf of the Prime Minister, the Secretary for Foreign Affairs, the Lord Chamberlain, and the State Chamberlain.

A marriage has been arranged and will take place next year between Major James Strachey Barnes, son of Sir Hugh Barnes, K.C.S.I., and Miss Moseley Williams, until lately attached to the Junior American Red Cross at Tirana, Albania. Miss Williams, by her personal courage and acts of devotion has endeared herself to the Albanians, to whom she is known as the "Duchess of Pertrella," from a rocky fortress, 500 feet high a few miles from Tirana on the Elbasan road. At the wedding, which is to be celebrated at Scutari, the Archbishop of Scutari and Monsignor Bumtsi, one of the four Albanian Regents, will officiate, and Bairani Tsuri, the famous Albanian *guerillero*, will act as best man.

## APPOINTMENTS AND PROMOTIONS.

Prince Michel Soumbatoff has been appointed Chargé d'Affaires of the Georgian Legation in London.

## OBITUARY.

Captain Cecil Gledstances Treherne, R.N. (retired), died at The Chestnuts, Weybridge, last week. As a sub-lieutenant he served in the Téméraire during the Egyptian War in 1882, for which he had the medal and the Khedive's Bronze Star.

The death of Admiral Charles James Barlow, D.S.O., occurred recently. Born in 1848, he entered the Navy in 1862, and took part in the Egyptian Expedition of 1882, being present at the bombardment of Alexandria. He was second in command of the Naval Brigade during the Burma Annexation War (1885-6), and received the D.S.O. in 1887.

The death has occurred in his ninety-fourth year, of Commander George Barnett Goolden. He entered the Navy in 1845; was made mate in August, 1852, and in that rank served in the paddle-sloop Vesuvius in the Mediterranean. He served in the Diamond as flag-lieutenant to Rear-Admiral Boxer in the Black Sea during the war with Russia in 1854-55. For this service he received the Crimean and Turkish medals with the Sebastopol clasp and fifth class Medjidieh.

The death is announced of General Henry Alexander Cockburn, an Indian Mutiny veteran. He was posted to the 53rd Bengal Native Infantry in 1851. In 1854 he was made adjutant of the 1st Cavalry Gwalior Contingent Force, and did good work in the North-West Provinces. In November, 1857, he was second in command of Meade's (Central India) Horse, and he commanded that regiment and the Sipri Field Force from 1859 to 1861. After 1862 he held various appointments under the Government of India, and on four occasions he was thanked by the Government of the North-West Provinces.

## NEWS IN BRIEF.

At a mass meeting held in Delhi last week resolutions were passed of loyalty to the British Government and against the Gandhi policy of Swaraj (Home Rule), which was described as involving "unheard-of sufferings for the depressed classes in India."

An official telegram from Sofia states that letters purporting to contain secret orders of the Bulgarian authorities in regard to concealment of war materials are forgeries.

The India Office have informed the Merchant Service Guild that it has been decided to grant on a reduced scale war gratuities to marine officers who served in Indian waters during the war at other than Naval or Royal Indian Marine rates of pay. The grant will be at the rate of 31 days' pay for each complete year of service under the usual Admiralty conditions.

A big fire broke out on August 21, at Scutari. The flames spread over a large area and 150 houses were destroyed. The Allied troops stationed at Constantinople aided in combating the flames.

A telegram, dated August 21, from Beyrout, stated that a small band of horsemen, who arrived in the Jebel Druse from Trans-Jordania claiming to represent the Emir Abdulla, were obliged, by the attitude of the population, to give themselves up to the French.

The Montenegrin Consulate at Rome was visited by the police on August 23. Strict secrecy was maintained as to the motive of the perquisition. It will be remembered that the Montenegrin Legion in Italy was dissolved a few months ago, one reason stated by the Foreign Minister for such dissolution being that the Montenegrins were carrying on hostile propaganda in Italy.

A Madras message states that the Madras public is spending five lakhs of rupees on a children's hospital, in order that through it they may commemorate the Prince of Wales's visit.

A Bucharest message states that Cardinal Gasparri, Papal Secretary of State, and M. Penesca, Roumanian Minister to the Vatican, have signed a concordat whereby Roumania officially recognises the (Roman) Catholic Church. Two bishops are to be appointed shortly.

The anti-Bolshevist rising in Azerbaijan is reported to be gaining in strength. Tartars are in full revolt in the Karabagh and Nakhitchevan districts, while Armenians render active co-operation at Zangezur.

The Palestine Government has announced the establishment of a regular weekly passenger and goods train service between Haifa and Amman (Transjordania). The train will leave Haifa every Wednesday and return from Amman on Friday.

It is stated from Alexandria that the native Press is publishing messages from London asserting that an agreement has been made to prolong the Mixed Courts on their present basis for five years.

## THE ACCESSION OF KING FAISAL.

We have received the following statement from the Colonial office:—Further advices from Baghdad state that the ceremony of the Emir Faisal's accession to the Kingship of Irak took place on Tuesday morning, August 23, in the Great Court of the Serai. At 6 o'clock the Emir left his residence in procession, accompanied by the High Commissioner, the General Officer Commanding-in-Chief, and Sayid Mahmud, eldest son and representative of his Highness the Nakib, President of the Provisional Council of State. As the Emir mounted the dais the immense audience rose to its feet, while the British Guard of Honour, provided by the 1st. Battalion Royal Berkshire Regiment, gave a general salute. The High Commissioner took his seat at the Emir's right hand, and the General Officer Commanding at his left, with Sayid Mahmud next to him.

The ceremony began by the Secretary of the Council of State reading in Arabic the Proclamation of the High Commissioner, announcing the election of the Emir Faisal by the people of Irak and proclaiming him King, ending with "Long live the King." The national flag was immediately broken on the flagstaff over the dais, a Royal salute given by the Guard of Honour, and a Royal salute of 21 guns fired. Sayid Mahmud then read a loyal address from the Council of State and ended by paying homage on behalf of his Highness the Nakib.

His Majesty then returned in procession to his residence. After a short interval the High Commissioner, accompanied by the General Officer Commanding and Sayid Mahmud, took leave and drove away in state. The ceremony occupied half-an-hour and passed off brilliantly. Simultaneous Royal salutes of 21 guns were fired at Mosul and Busreh, and at all the leading towns the National Flag was simultaneously hoisted on all Irak Government offices.

## THE GALLIPOLI MEMORIAL.

The War Office announces that Lieut.-General Sir Aylmer Hunter-Weston, K.C.B., D.S.O., M.P., who recently visited the Dardanelles on behalf of the National Battlefield Memorials Committee, has now submitted a detailed report signed by himself and Commander James Somerville, D.S.O., R.N., representing Admiral Sir John de Robeck, G.C.B. After an exhaustive inquiry as to the most suitable site, Sir Aylmer Hunter-Weston has recommended that the National Memorial should be erected on Guezji Babi (called on Turkish maps Kurgi Baba), an eminence about 150ft. above the sea, and 500 yards north-east of the Helles Lighthouse, the highest point on the southern end of the peninsula. He advances very strong arguments in favour of this position, and there is little doubt that it is the one which will be finally adopted. The report also makes various valuable suggestions as to materials for construction, and steps are being taken by the Imperial War Graves Commission to make all preliminary arrangements for giving effect to this report, so that the matter may be submitted by the Government, at its first meeting, in the autumn, when the question of design will be immediately considered.

The International Danube-Commission has definitely decided to make Bratislava its seat for 1922-1927.

A Jewish steamer, the Zion, has just been put into service on a line which includes calls at the Mediterranean ports.

Senator Machado has submitted a proposal to the Brazilian Senate for the creation of legations in Roumania, Serbia, Bulgaria and Turkey.

A message from Smyrna states that it is proposed that a statue to Mr. Lloyd George should be erected in the city, while Constantinople Greeks propose to draw up an address of gratitude to the British Prime Minister.

THURSDAY, SEPTEMBER 1, 1921.

## THE ALBANIAN QUESTION.

It is announced from Paris that the Ambassadors' Conference, to which the Supreme Council transferred the question of the frontiers of Albania on the latter's appeal to the League of Nations; has decided in favour of the retention of the frontiers as determined in 1913. If, as may presumably be taken for granted, this decision is confirmed by the Supreme Council and becomes the law of Europe, a definite and important step has been taken in the liquidation of some of the questionable arrangements made by the Allies under the stress of the Great War. By the secret treaty of April 1915 between Great Britain, France and Russia on the one hand and Italy on the other it was agreed that Albania at the end of the war should, in effect, be partitioned between Italy, Greece, and Serbia. It was in accordance with this undertaking that Italy occupied Southern Albania; but when on June 3, 1917, General Ferrero, Commander of the Italian troops in Albania, in a formal declaration proclaimed "the unity and independence of the whole of Albania under the shield and protection of the Italian Kingdom," the participation of other countries in the slicing of the melon appeared to have receded into the distance. Although the term "shield and protection" was liable to interpretation in a variety of ways, there could be no question from the Albanian point of view as to the general intention of the proclamation. On December 9, 1919, Italy's position with regard to Albania was seemingly regularized by the grant of a mandate by the other members of the Supreme Council; but two months later the British and French representatives reopened the question of the partition of Albania. A protest from the United States caused the proposal to be dropped, and in the meantime under General Ferrero's successor the relations between the Albanians and the Italians had changed for the worse. The period of conflict, however, was finally brought to an end by the Italian Government's renouncing all intention of interfering with Albania. A treaty of friendship was signed; the Italians withdrew from the mainland, but were confirmed by the Albanians in their occupation of Saseno, the island dominating Valona.

When, last December, Albania was admitted as a member of the League of Nations it was pointed out in these pages that, in view of the fact that the League pledges itself to defend the territorial integrity of its members, the Council of the League must have regarded the question of Albania's frontiers as a *chose jugée*. The only official and valid ruling on the subject was the decision of the London Conference in 1913, as the League would have no official cognizance of the secret treaty of 1915. As events have proved, the League ignored the boundary question, and Albania was admitted to membership at a time when portions of the territory to which she could lay claim under the 1913 Agreement were in the occupation of her neighbours. When the matter was formally submitted to the League the Supreme Council, as already stated, intervened, reserving the subject for its own consideration. No little anxiety exists in Italy lest the decision to confirm the frontiers of 1913 implies a challenge of Italy's occupation of Saseno. In the face of the unselfish attitude displayed by Italy in her recent dealings with Albania, and in view of the fact that the pact purported to be a free and voluntary undertaking on both sides, it is hardly to be expected that the Tirana Government will seek to go back upon its word in regard to Saseno under the protection of the League of Nations. In such circumstances the fate of the island will not be called in question. Opposition to the decision of the Ambassadors' Conference will come from Yugoslavia and Greece. The former urges strategic reasons for a rectification of the 1913 frontier in the north and is actually in occupation of a considerable extent of Albanian territory. It is understood that she will be confirmed in her possession of some of this terrain by the new decision. Greece, however, is likely to take far greater umbrage than Serbia at the Ambassadors' ruling, as she will have to abandon Argyrocastro and Koritza, both of which were assigned to Albania by the Delimitation Commission of 1913, after investigation on the spot and the most careful consideration of rival claims.

Of these 1913 frontiers, it is not without interest to note, Sir Thomas Holdich writes in his "Boundaries in Europe and the Near East" as follows:—"On the whole the eastern boundaries of Albania, as they now stand, are based on strong geographical features, forming a nearly continuous mountain wall of great significance, in which wall most of the rivers of Albania take their rise and flow westward to the Adriatic." It must be supposed that the advantage of a well defined frontier weighed with the 1913 Conference and prompted it to hand over to Albania's neighbours certain districts which by general consent are regarded as Albanian. Be that as it may, the decision of the Paris Conference to-day to restore to Albania her 1913 boundaries is a logical and defensible course. It is common knowledge that Greece believes implicitly in her claims to Argyrocastro and Koritza, but we hope that she will take an adverse verdict philosophically. She has not been badly treated in regard to Epirus, and by now she must realize that peace and friendly relations with the Albanians are going to be more profitable to her in the long run than a comparatively small accession of territory. The Albanians would never have remained quiet for long under any diminution of their 1913 territory. They have the reputation of being restless neighbours in any case, but in their favour it must be said that hitherto they have been able to plead ample justification. This time they will have a chance, it is to be hoped, of working out their own salvation free from foreign intrigue. Albania cannot be eliminated from the scheme of Balkan development, but she will always be a drag on her neighbours' progress, if she labours under an obvious injustice. The Allies' decision is the first step in the reversal of the unjust provisions of the Near Eastern settlement. May it prove the herald of many other similar steps.

# THE ENCYCLOPAEDIA BRITANNICA

## (11th Edition).

**is now published in two forms :--**

**1st.—The Cambridge Issue printed on fine India paper, with large type, large pages, and large margins, in 3 bindings. Cloth, Half-Morocco, and Full Morocco.**

**2nd.—The newly-devised Handy Volume Issue AT HALF THE COST, on the same India paper, but with smaller type and page. The letterpress, illustrations, bindings are identical with the Cambridge issue.**

**The attention of readers of " The Near East " is particularly directed to the**

# NEW HANDY VOLUME ISSUE AT HALF COST.

**The entire 29 volumes despatched upon a first payment of only 21/-,**
(together with cost of freight, if overseas. *See p.259*)
**followed by 24 monthly payments of the same amount.**
**(See Special Order Form 3 pages further).**

The 11th edition of the *Britannica* gives you accurate, authoritative, and easily accessible knowledge upon every subject in the world; written by the greatest authorities, experts, and scholars. There is no other work which can take its place, and throughout the English-speaking world " what the *Britannica* says " is readily accepted as a definite statement of fact. In the law courts, the board-room, the club, the lecture-hall, the college, the library, the laboratory, the workshop, and the office, the 11th edition of the *Encyclopaedia Britannica* is regarded as the sure source of accurate information upon any topic or subject.

The special index volume, moreover, enormously facilitates the use of the work—making it perfectly easy to turn at once to the precise volume, page, and section of a page containing the information you desire

The production of the complete *Encyclopaedia Britannica* in such a compact, convenient form, and at such a remarkable economy in price, is one of the most notable developments that have taken place in the 150 years which have elapsed since the 1st edition of the *Britannica* was issued. Actually it makes this great work *the cheapest book in the world*, despite the fact that in quality of paper, of press work and of binding and above all, in the authoritative character of its contents, and the high reputation of its 1,500 contributors the Handy Volume issue of the *Britannica* is far above the standard of ordinary book production. Each of the 29 volumes contains *at least* as much as is contained in 15 ordinary books—yet the price of the *Britannica* is a mere fraction of the price that 15 ordinary books would cost.

**A CONVENIENT PLAN OF SMALL MONTHLY PAYMENTS IS APPLIED TO BOTH ISSUES.**

**The entire set of 29 volumes of the Cambridge Issues will be despatched upon a first payment of 42s., followed by 24 monthly payments of the same amount.**

OR

**The entire set of 29 volumes of the Low-Priced Handy Volume Issues will be despatched upon a first payment of only 21s., followed by 24 monthy payments of the small amount.**

**In each case freight must be defrayed by the purchaser.** (*See p.259*)

ONLY in size of type and of page do the two issues differ. The quality of the India paper is identical: the style and quality of the bindings are identical: word for word and line for line the pages are identical; the illustrations, colour plates, maps and plans are identical. The saving effected by the reduction of size decreases the cost of manufacture by nearly 50 per cent., and thus enables the Handy Volume issue to be sold at just half the cost of the Cambridge Issue.

### THE " BRITANNICA " IN THE NEAR EAST.

Previous editions of the *Encyclopaedia Britannica* have always been in great demand by English speaking residents in the Near East. It supplied them with accurate information of the utmost importance to them—dwelling in strange countries, amongst wholly unfamiliar people, and with everything to learn as regards the history, geography, climate, productions, industries, manners and customs, religious, prejudices, and traditions of the locality to which their business or other interests had brought them. Nowhere else but in the *Britannica* can they get to know what it is imperative they should know.

With the 11th edition—printed upon fine durable India paper and in volumes *only one inch in thickness*—you have at all times access to any kind of information you require. No matter where you are living, no matter what your business is, no matter whom you have to do business with, the *Britannica* enables you to avoid those troublesome mistakes which new-comers are so liable to make. Ignorance of a local custom or prejudice, heedlessness of national traditions or religious differences may give occasion for serious offence and greatly, if not irremediably, damage business prospects. You cannot know too much for your own sake, and for your business sake.

### A PORTABLE LIBRARY.

Moreover, possessing the 29 vols. of the *Britannica* you possess the equivalent of a library of 400 volumes at a fraction of the cost and in a convenient and portable form. The entire Handy Volume Issue **weighs only 44lbs. and occupies less than one cubic foot of space.** Its equivalent in the form of ordinary books would weigh infinitely heavier, would occupy the walls of a good-sized room, and would cost you many times the price of the *Britannica*, which, in its neat handsome bookcase, can stand ready to your hand beside your desk or table.

### 40,000 LETTERS OF TESTIMONY.

To show how greatly the 11th edition of the Encyclopaedia is appreciated by the shrewdest and most successful business and professional men we may mention that over 40,000 letters of testimony have been received from Canadian and American purchasers of the *Britannica*.

Over 1,000 similar letters were received from British purchasers **within the space of a single week,** each saying, in his own way, how he valued this indispensable work. A few of these letters are reprinted in the second page following this. Turn to that page and read for yourself what those who own and use the *Britannica* say about it.

### NEW SUPPLEMENTARY VOLUMES.

So thoroughly is each edition of the *Britannica* brought up-to-date (often, indeed, it proves to be years in advance of "current" knowledge) that periods of 30 and 35 years have elapsed before a new edition has been in any way necessary. When the 11th edition was published just before the World War, therefore, it was not anticipated that any fresh edition would be required before 1935 at the earliest.

But the World War was an event which wrought revolutionary changes, politically, socially, and geographically and this has necessitated the immediate preparation of supplementary volumes to the *Encyclopaedia Britannica*.

Not only the war itself, but special subjects (such as Aviation) in which great strides have been recently made, will be exhaustively treated in the three new volumes (which will form volumes 30, 31, and 32 of the *Encyclopaedia Britannica*.

**These new volumes will not be offered to the general public until all owners of the 11th edition have been supplied at a special pre-publication price.** This makes it doubly important to secure a set **now**, either of the Cambridge issue or the Handy Volume issue—both issues carrying the right to the special privileges referred to.

**Read the next two pages of interesting information about the new issue of the Britannica, and then turn to the Order Form and mark which set, which binding, and which method of payment suits you best.**

Digitized by Google

# ALL HUMAN KNOWLEDGE IN ONE SET OF BOOKS.

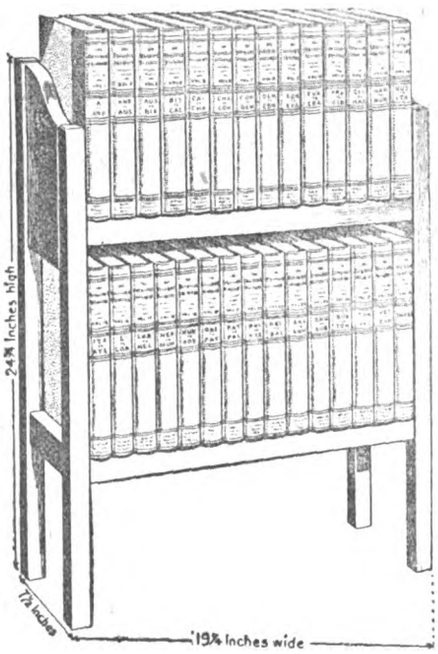
THE 11th edition Encyclopaedia Britannica (see previous page) enables a reader to learn whatever he may wish to know about anything. No matter what the subject or fact in which he may be interested, the Britannica will tell him about it, and what it tells him is invariably written with the utmost care and accuracy, by a man who is qualified to write about it because of some special knowledge he has acquired from actual experience or study.

The first edition of The Encyclopaedia Britannica was published in Edinburgh (1768-71) twenty years before the French Revolution, and while America was still a British colony. It consisted of 3 volumes; 2,679 pages and 160 plates.

**The present 11th Edition consists of 29 volumes, containing 30,000 pages and 41,000 complete articles, comprising some 44,000,000 words of text, as much reading matter as is found in 440 books of ordinary size. There are over 15,000 illustrations and maps, including 450 full-page plates, many of them in color. Every article in the Britannica is founded on the fullest knowledge, and gives a clear account of recent progress.**

**The 1,500 contributors represent, some a scholars, some as industrial exsperts, some as explorers, financiers, chemists, surgeons, agriculturists, engineers, sailors, soldiers, administrators, and so on through a long list, every variety of work and every kind of human interest.**

They were selected solely with a view to subjects upon which they were invited to write. For example, a Dutch scientist wrote on light, a Columbia professor on ancient China, a German on the microscope, while the article on Mohammedan law came from the Hartfort Theological Seminary, notwithstanding the fact that the British Empire had more Mahommedan subjects than any other country.



*The 29 vols. of the Handy Volume Issue in the bookcase measure only 24¾ inches high and 19¾ inches wide. The weight is only 44lb. and yet the set—which a child can lift—contains 30,000 pages and 41,000 articles—44,000,000 words (equivalent to a library of 440 books).*

These contributors represent 21countries and apart from the hundreds of British contributors of the very highest reputation, there are 214 Americans, 53 Germans, 37 Frenchmen, 11 Italians, 11 Dutchmen, 4 Russians, and 2 Japanese, each a distinguished authority upon the subject on which he writes.

The following table suggests their standing as scholars, specialists and men of action.

**The Whole World of Scholarship and Expert Authority.**

Why has The Encyclopaedia Britannica maintained its unequalled position during 150 years, becoming with each of its successive editions, more authoritative, always increasing its fame, its sale and its usefulness?

The explanation is very simple. It is indeed to be found in the facts already stated. The original idea of the projectors of the first edition was that this encyclopaedia was to be a book in which the knowledge of the world should be written by scholars *out of their own knowledge* and by experts *out of their own experience*, and not by ordinary "hack" writers. In the carrying out of this idea, The Encyclopaedia Britannica has in each of its editions been written by recognised authorities, such as those already described, by those who were known to be identified with the world's progress.

## WHAT BUSINESS MEN NEED.

Business to-day is on a national and an international basis to a far greater extent than ever before. The business man in keeping pace with his competitors must have an acquaintance with the industries, the products and the general features of every country in the world. Then again we buy from Europe and we sell to Asia; we import from India things produced in the remote villages of the Himalayas and of Burma; we sell goods in Chile and in Australia. The things we wear, the things we eat and drink, the things that cater to our ease and comfort, or that enter into the manufacture of the luxuries we enjoy—These bring us in hundreds of ways in touch with other lands. And the merchant and manufacturer, if he studies his business in all its ramifications, will be surprised to discover how much he can learn from the Britannica about every phase of it.

**As a practical book for practical men, as a book about work, the Britannica has no equal.**

# WHAT OWNERS OF THE ENCYCLOPAEDIA BRITANNICA SAY.

Within the space of a single week nearly one thousand letters were received from men and women who had purchased and used the 11th edition of The Encyclopaedia Britannica. These letters constitute the most remarkable volume of voluntary testimony ever seen—emanating as they do from every class of the community—from an ex-Premier to a coal miner—and from every part of the kingdom.

Very many of these letters are from men whose names are "household words" and whose opinion is universally esteemed. Side by side with these come letters from men in humble life, and from men at the head of big business undertakings.

In order that intending purchasers of the Britannica may have an opportunity of learning what those who already possess the work think of it, we have reprinted a few of these remarkable letters.

It is not necessary to comment upon them: they speak for themselves. But we would like to point out the extraordinary diversity of vocations and occupations represented by the writers of these letters—a circumstance which fully justifies the oft-repeated assertion that there is no man living who cannot be helped to a very great extent by the possession of this "library of all human knowledge."

**From an Architect.**

*Alfred Condor, F.R.I.B.A., "Spring Bank," Shepherds Hill, Highgate, N.*

"My possession of the 11th edition of The Encyclopaedia Britannica has been of much benefit. I have been specially interested in the article upon 'Architecture,' with its excellent illustrations. This has been found to be just such a comprehensive and concise review of the subject as very many people have sought to have."

**From a Surveyor.**

*J. L. Bolden, C.V.O. (Member of Council of the Duchy of Lancaster), 28, Lansdowne Road, W.11.*

"I have pleasure in stating that my set of The Encyclopaedia Britannica has been a constant source of interest and enjoyment to me, and that I consider it of the greatest value in every way."

**From a Chartered Accountant.**

*G. P. Norton, Huddersfield.*

"I suppose no work has ever been published in readable type containing so vast an amount of reliable and interesting information in so small a space. It has been most useful to me in a great variety of ways."

**From a Merchant Banker.**

*Sir Edward D. Stein, 4, Carlton House Terrace, S.W.1.*

"I find The Encyclopaedia Britannica very useful. It is so pleasant to have one source in which it is possible to get clear and accurate information quickly on the subject."

**From a Naval Historian.**

*H. W. Wilson, 207 Elgin Avenue, W.9.*

"My candid impression of The Encyclopaedia Britannica various editions of which I have had and used for 25 years, is that the 11th edition is a most excellent book, and allowing for limitations of size and space, the best thing of the kind ever produced. I have had occasion to go to it almost daily, and have nearly always found what I wanted quickly. . . . . I was from the first thoroughly satisfied with the book and could not do my work without it. It is one of the indispensable tools of a historian for the quick verification of facts."

**From a Farmer.**

*Alfred Cook, Southcot Lodge, Pewsey.*

"My recreation is study—Farming, History, Theology. My friends and instructors live in the Britannica, 11th edition. I find them always willing to tell me all they know. My set on India paper in flexible covers in the neat case sent with them I should hesitate to part with on any terms whatever."

**From a Librarian.**

*The Director and Principal Librarian, British Museum, London, W.C.1.*

"The Encyclopaedia Britannica is in constant use as a work of reference in the Reading Room of the British Museum. The bibliographical notes attached to its articles are of great service in assisting the researches of students."

**From a Barrister-at-Law.**

*David Bowen, 11, New Square, Lincoln's Inn W.C.2.*

"I have had very frequent, and almost daily, occasion to consult The Encyclopaedia Britannica on scientific, technical, legal, and political questions, and on no occasion have I been disappointed. The work is remarkable alike for its comprehensiveness and its accuracy, and I feel certain that no one who is deeply emerged in general affairs can afford to be without a copy. Its value is inestimable, both for special and general purposes of reference."

**From a Director.**

*Herbert A. Dugard (Director of Public Companies), Shadwell Street Mills, Birmingham.*

"I have used The Encyclopaedia Britannica for many years, and consider it the most useful book I possess—not only as a book of reference. The articles are entertaining, accurate, and instructive, and I should be very sorry to be without it."

**From a Journalist.**

*F. H. Brown, C.I.E.*

"The 11th edition is not only of incalculable use to me professionally, but is also an intimate friend of the family. Historical literary, general, and even 'dictionary' questions which crop up in conversation or newspaper reading are ordinarily decided by reference to the 'E.B.' Whenever there is illness in the house or amongst our friends, and when the question of choice of place for a summer or spring holiday arises, my wife turns to its pages—and scarcely ever draws a blank. For three or four years—past my schoolboy son (now 14) has been a frequent and absorbed reader, both in relation to home lessons from one of our great public schools and in pursuit of such hobbies as philately, heraldry, and the study of feudal customs."

**From an Engineer.**

*(Chief Mechanical Engineer, Midland Railway, formerly Director of Production, Ministry of Munitions.*
*Saxelby House, Osmaston Road, Derby.*

"I am very glad to state that the weekly use of your Encyclopaedia Britannica has been of great use to me, not only in connection with my profession, which is that of Chief Mechanical Engineer of a large Railway, but also strange as it may seem, in connection with the work I have done as Leader of a Class of Young Men on Sunday."

**From the Earl of Ancaster.**

*(Parliamentary Sec. to Ministry of Agriculture).*
*Grimsthorpe, Bourne.*

"I have found The Encyclopaedia Britannica most useful and instructive. When I have turned up some subject on which I required information, I find if difficult to put the volume down, as immediately I find other subjects of great interest to peruse. On one occasion I was saved from making a most disastrous investment owing to information on the subject which I obtained from the Encyclopaedia."

**From a Banker.**

*William Graham, 8, Glenorchy Terrace, Edinburgh.*

"My set of The Encyclopaedia Britannica purchased about ten years ago, has been in constant daily use in my family—ever increasingly valued as years have passed. The reduction in bulk by the use of India paper and the flexible binding greatly enhance its convenience in use; but apart from form or style the countless references to its contents, the infinite variety and thoroughness and the general satisfaction of inquiry have taught us to regard the work rather with the affection one has for a tried friend than as a mere compendium of information. If to his Bible, Robinson Crusoe could have added an Encyclopaedia Britannica he need never have sighed at solitude."

**From an Iron and Coal Merchant.**

*Col. Sir Johnstone Wallace, 23, Dean Street, Newcastle-on-Tyne.*

"Col. Sir Johnstone Wallace wishes to say that the 11th edition is in constant use and has been indispensable to himself and his family, especially to two of his sons, who are University graduates."

**From a Manufacturer.**

*A. F. Bates, Station Street, South Wigston, Leicester.*

"Not to be impressed by The Encyclopaedia Britannica, with its vast array of ordered knowledge (which one can only hope to draw upon in the most infinitesimal way), is almost equivalent to apathy in the face of the phenomena of the universe. No one could be in any sense grudging of praise before a publication which, by no means perfect, is yet amazingly extensive and intensive."

**From a City Engineer.**

*A. E. Collins, M.Inst. C.E., City Engineer, Norwich.*

"The Encyclopaedia Britannica is essential to any man requiring good general information; especially to an Engineer, for whom in addition to the great amount of information it gives on all sorts of purely professional subjects, there is also the vast quantity of other knowledge it contains on subjects constantly arising in the practice of his profession not dealt with in Engineering text-books."

## "THE NEAR EAST" ORDER FORM.

*TO* THE ENCYLOPAEDIA BRITANNICA CO., LTD.

_____192

Please send me THE ENCYCLOPAEDIA BRITANNICA XIth Edition, 29 vols., as soon as possible, in the binding against which I have put (x) a cross. I enclose £ and agree to pay the balance, if any, by_____further consecutive monthly payments of £ I agree that the books remain your property until the full amount has been paid.

THE HALF-PRICE **HANDY VOLUME ISSUE**

**£1 1s.** with order and 24 monthly payments of **£1 1s.**
**£3 9s. 8d.** with order and 6 monthly payments of **£3 9s. 8d.** (*This is a discount of 7 per cent.*)

**£23 12s. 6d.** with order, completing purchase.
(*This is a discount of 10 per cent. and a bookcase free.*)

**THREE-QUARTER MOROCCO. No. 2.**
**£1 5s.** with order and 24 monthly payments of **£1 5s.**
**£4 3s.** with order and 6 monthly payments of **£4 3s.**
(*This is a discount of 7 per cent.*)

**£28** with order, completing purchase.
(*This is a discount of 10 per cent. and a bookcase free.*)

**FULL MOROCCO. No. 3.**
**£1 15s.** with order and 24 monthly payments of **£1 15s.**
**£5 16s. 3d.** with order and 6 monthly payments of **£5 16s. 3d.** (*This is a discount of 7 per cent.*)

**£39 7s. 6d.** with order, completing purchase.
(*This is a discount of 10 per cent. and a bookcase free.*)

**BOOKCASE (For Handy Volume Issue) Price 30s.**
This is made of the best satin walnut, with mahogany finish, and measures 25 inches in height, 7¾ inches in depth, and 20 inches in width. It has two tiers, the upper of which is uncovered, like a rack. It is extremely light and portable. To be paid for with first instalment.

THE LARGE TYPE **CAMBRIDGE ISSUE. CLOTH. No. 4.**

**£2 2s.** with order and 24 monthly payments of **£2 2s.**
**£6 19s. 6d.** with order and 6 monthly payments of **£6 19s. 6d.** (*This is a discount of 7 per cent.*)

**£47 5s.** with order, completing purchase.
(*This is a discount of 10 per cent. and a bookcase free.*)

**THREE-QUARTER MOROCCO. No. 5.**
**£2 10s.** with order and 24 monthly payments of **£2 10s.**
**£8 6s.** with order and 6 monthly payments of **£2 6s.**
(*This is a discount of 7 per cent.*)

**£56 5s.** with order, completing purchase.
(*This is a discount of 10 per cent. and a bookcase free.*)

**FULL MOROCCO. NO. 6.**
**£3** with order and 24 monthly payments of... ... **£3**
**£9 19s. 3d.** with order and 6 monthly payments of **£9 19s. 3d.** (*This is a discount of 7 per cent.*)

**£67 10s.** with order, completing purchase.
(*This is a discount of 10 per cent. and a bookcase free.*)

**BOOKCASE (for Cambridge issue)** ... ...**60s.**
Also made of best satin walnut, with mahogany finish. Its dimensions are:—Height, 35½ inches; depth, 10½ inches; width, 20 inches. It has two covered shelves, and is of substantial build. To be paid for with first instalment.

*Address*_____

NOTE.—A Reference is *not* required when the full amount is being remitted, or when a Banker's Order or post-dated cheques are given

## HOW TO OBTAIN A FREE BOOKCASE
### and at the same time save yourself both trouble and expense.

The system of payment by small monthly instalments, which enables a purchaser to buy articles of considerable value without the inconvenience of withdrawing from his capital a large sum at any one time, has won general favour, but at the same time it carries with it certain disadvantages. In the first place, there is the trouble of having to having to remember the exact date when the instalment falls due, and having to, write and post a series of cheques for a single transaction; and then, at the present time, one soon comes to realize that a twopenny stamp on each cheque and another two-penny stamp on each letter adds in the long run a noticeable amount to the price of the article.

In the present sale of The Encyclopaedia Britannica a new feature has been introduced to obviate this difficulty. In place of posting the instalments month by month, you are invited to send one Banker's Order (which requires no stamp) instructing your banker to pay the instalments for you as **they become due**; or if you prefer it, we will accept 6 or 24 postdated cheques, each dated for the date upon which your monthly payments have been made by the ordinary method.

This method gives you all the advantages of the ordinary instalment system: you do not have to pay any sooner, but draw the interest from, or have the use of, your money in the meantime. And you rid yourself at once of the trouble and expense of making payments month by month.

Since this system also saves us expense both in bookkeeping and postage, we are presenting *free* to every purchaser who adopts it a *handsome two-tier bookcase* made of fine satin walnut with mahogany finish, to hold the Issue selected.

This offer is open to you whether you select the Cambridge or the Handy Volume Issue, and whether you prefer to pay by 6 or by 24 instalments. But, as you will see from the Order Form above, the purchaser who completes the purchase in 6 payments receives a cash discount of 7 per cent., besides the additional discount represented by the bookcase, to which he becomes entitled by sending a banker's order or 6 postdated cheques.

**NOTE.**—If, before ordering, you wish for further information regarding the 11th edition of the Britannica, please write asking for a copy of the Illustrated Booklet, giving specimens of the exact size of page and type used in the two issues, also illustrations and pages reproduced from the 11th edition, with the 3 styles and binding. This will be sent you free of all cost.

# A SIDE-SHOW OF A PEACE TREATY.

In the depths of a musty library at Whitehall the other day I was perusing some documents relating to the Peace Conference of 1919, with a view to adding to them myself in time. Nothing but the fact that I am an old philosopher and an incorrigible lover of stale Government literature could have kept me so long at that dusty work on a warm June day. As it was, there I toiled with my secretary between the shelves dedicated to the problem of the Near East, set forth, explained and annotated, in more or less vehement prose, by writers representing all the races of the Balkans.

Suddenly I came across a pile of neatly- bound pamphlets sent in to the Peace Conference by one of those enemy delegations successively called to Paris by the Allies for the purpose of receiving their respective Treaties. Remembering how long each of these Delegations had in turn been kept waiting, for what must have been to them the Day of Judgment, I did not marvel at the amount of literature this particular group had produced during an irksome inactivity in some pompous residence at the very gates of Paris. I was still less surprised to note, being a Government official myself, that most of the documents had never been cut.

However, as I opened one of the green books, a paper fluttered to the floor, closely covered with erratic characters, looking curiously feminine. As I picked it up I saw that it was a letter written in English, probably the work of some interpreter who had then unwittingly mislaid it in an overcrowded office. This is the letter:—

Chateau de——
Neuilly-sur-Seine, Paris,
8 October, 1919.

My dear Girl,

If I have not written to you for such ages it is because I have been so busy. You see the text of the Peace?-Treaty was delivered to our Delegation last week, and you can easily imagine how overworked we have all been since. It is quieter now because our principal Delegates have left for our own country, to submit the fatal document to Parliament.

As you ask for the latest news, the " day of the Treaty," as we call it, was a perfect nightmare at the Chateau ; though the Conference people found the conditions tame and made bad jokes about the unfortunate victims. By the way I must not depart from my rule of never writing about politics to you. Some of the English papers and Reviews *have* been pretty decent about it, I must say. (Ditto, Sorry !)

Well, there was the ceremony at the Quai d'Orsay, at which secretaries like me did not assist, then the reading of the Treaty here, by our President ; while at the same time people were getting ready to leave for our distant land the next evening. A curious day, really ; work, work, work, noise and grief and trouble ! The tragedy of the side-scenes of a very simple official act ! A dull, grey sky, too, with unexpected cold showers—horrid !

The entire text had to be translated into our own language, during that one day and night left before the journey ; all the experts and secretaries had immediately assembled to hear the text of the Treaty, and pages of a copy were then dealt out to each. I crept up to the Minister present and asked him not to give the pages about the Army to the Army people to translate. I thought, you see, it would mean so much to them—three Captains, all wounded in the last war. But the statesman in question growled : " Why, what nonsense ! Run along ! " and everyone received the clauses they were expected to know about or " odd " things. (I, for instance got Navigation articles !)

Off we went, in grim silence to our rooms—I left my own translation for the night, having plenty of other work to do for my chief, the President of the Delegation, in regard to the journey and the like. Suddenly, I remembered that my favourite secretary was one of the three Captains, and that he must be " feeling it " badly. Thirty years old, unmarried, splendid soldier, three war medals ; in the Regular Army since 1912, tall strong, square, ankles, hands and all that a bit too massive for my taste ; a rather interesting face with firm hard lines ; narrow, grey-green eyes and one beauty ; a charming smile that suddenly makes him look quite soft and young and changed. Not my type, though !

So, I ran up to his room, on the pretext of getting a book I wanted, and knocked at the door. No answer ! I knocked again. " Come in," snarled a voice that was anything but encouraging, and I slipped in.

He was lying back in an arm-chair, with one of his strong brown hands across his eyes and could not see me.

The treaty lay open on the desk beside a clean sheet of paper. " Hullo ! " I said, with apparent calm, " I want the . . . . book, please."

He started and rose rather reluctantly to his feet (all this because you are a writer and a psychologist) muttering something about " not having known it was *me*," " beastly old book," and so on. I was sure, by the way, that he had *not* got the book at all ; he fumbled about for it rather clumsily, and I do not know why, but I did not look at him.

" What's the matter ? " I asked next, " headache ? " He answered yes ; pushed another arm-chair towards me, and sat down again in his own. Then for the first time, I glanced up at him ; white as his collar, with dull, angry eyes.

" You do look seedy," I said in French slang, " lie down and rest." He pointed to the Treaty. I fingered the pages aimlessly feeling rather an idiot, and suddenly discovered his three war decorations, underneath the pages about the army, and you know what those pages are and mean . . . .

It was too pathetic and tragic. I had guessed it would be " like that " in his case, but those medals . . . Then he began to speak, in a voice that cut the words through, like a sword, saying what it meant for him, talking about the war, the past, his own men . . . I durst not answer, I durst not look ; and suddenly, to my horror, he burst into tears—a terrible fit of sorrow, the man-sorrow, that is so harsh, desperate and fearful to witness, with great choking sobs, audible strength, audible passion. The Treaty, the medals, that great strong boy crying stormily in a hotel room at Neuilly ! . . . . I felt as if Clemenceau and the rest of those wise men ought to have seen it all. (They might have understood part of it, at least.)

I must add that this boy is one of the most reserved, iron-nerved men I have ever met, with a power of self- control that is even rather annoying at times, and a fearful amount of pride ! I felt that he would hate me for ever for having "seen" and "heard."

I said nothing. Tell me, please, what *you* would have done in my place ? I just wondered, felt more idiotic than ever, picked up the pages about the army, pulled down the blind, left the room, noiselessly locked the door on the outside and put the key in my pocket.

Then I went to my work with my Chief, got through it as quickly as possible, rushed to my room, and ( with frequent interruptions ) did *his* translation. It took two hours and it was nearly dinner-time when I had finished. I put the pages in an envelope, dashed upstairs, unlocked the door, saw and felt absolute darkness and nothing else, threw the envelope into the darkness and ran away again, leaving the key this time.

He did not appear at dinner, and owing to the general confusion nobody noticed the fact.

After dinner, I had to pack, as I had promised, for several clumsy delegates, who would insist on wrapping up lace and ribbon for their wives in newspapers and stuffing books and ink-bottles among shirts and collars. Then there were more letters

GUARANTEED
WHITE HORSE
WHISKY

BY APPOINTMENT
PURE SCOTCH

Digitized by Google

to write, and I actually began to do my own translation at one o'clock, after having definitely said "good-night" to everybody and locked up for good.

Five minutes later some-one knocked. I opened the door and saw a very sleepy-looking servant with a big envelope in his hand: "Captain X woke me up, Miss, just now and told me to bring you this. No answer. Only work, he said it was, Miss." He shuffled away. Of course you have guessed! It was *my* part of the translation, I mean the pages that he had somehow discovered had been allotted to *me*, and *he* had translated, and there was a crumpled note in French: "To Miss S. You are a brick", and his Christian name, that's all!

Either you have gone to sleep, or you are smiling, or perhaps feeling curious! Tell me!

The next day I met him in one of the offices, looking very white and tired, but quite cheerful, and telling people that he had had toothache! We both said good-morning and stared at the floor, with sudden interest in the carpet!

As *you* always want to hear about *men*, and I happen to have no work to do to-night, you've suffered from both consequences! What do you think of my big brother boy? His name is Cyrill.

Child, life is not an orange to me now, but a lemon! Yet the crushing system is the same; it is only the taste of the juice that is different; but one finally gets used to it!

I feel more than ever that I am wasting my youth. Do you remember all the plans and prospects we discussed together before the war, both meaning to get as much as we could out of this world? But we were at Sorrento then! How far away it seems! And now I live among shabby peace?-delegates from a Balkan land, and my horizon extends from untidy neck ties to coloured socks of bold design! Shall I ever know the knight to whom I shall sing:

"*Quand je mourrai,*
"*Viens a mon chevet*!
"*Regarde-moi*.....
"*Et je ne pourrai plus*.....*mourir*!"

In any case, I should never choose one of my present companions, though some of them are dears!

Your own wild and good
SLAVIANA.

For the old philosopher, who has fallen into a quiet doze, and no longer troubles over the psychology of enemy Delegations to a Peace Conference,

Yours very sincerely,
His Secretary,
NADEJDA KLADENSKA.

## PRESS ON THE NEAR EAST

### Bulgaria.

In the first of a series of articles upon "Bulgarian Affairs," published upon August 22, which Lieut.-Colonel Repington is contributing to the *Daily Telegraph*, he deals generally with the position of Bulgaria—an unhappy position, created, he says, by the hate or prejudice of her neighbours. Moreover "the danger of fresh trouble is aggravated by the general ignorance of Occidentals concerning Bulgaria, and by troubles and disorders within Bulgaria herself":—

"We need to be here but a week to discover that we are living in another world, and a world some 200 years behind the West. It is not possible to understand the psychology of the leading personalities here without seeing them and listening to them. It is the same with regard to acts and events which pass here. Things which seem manifest and simple to Western statesmen lead them to make decisions which they would reverse after a week spent here, and if the Council of Ambassadors in Paris would depute a committee to come here with full powers they would be more likely to arrive at a true estimate of the situation than they would at a distance. "Come here and judge for yourselves" is a demand frequently made to Paris by Allied authorities who find their advice ignored. The decisions are sometimes unduly favourable to Bulgaria and sometimes the reverse. The Little Entente authorities form a solid and united body of opinion, but their constant complaint is that the Great Powers are not united on Bulgarian affairs, while the Reparations Commission and the Inter-Allied Military Control occasionally import conflicting opinions into the common stock.

And he proceeds to describe the present political condition of Bulgaria:—

The Bulgarian people remain, as they always were, a good, solid, and laborious population, strongly democratic, better educated than their neighbours, not fond of military service, nor even warlike, but uncommonly good at fighting when fighting is afoot, and with a love of discipline, a sense of order, and a regard for worthy representation which makes them prefer constitutional Monarchy to Republican institutions. They are thoroughly disillusioned by their heavy losses in the war, and by a peace so disastrous to them and their ambitions. If the peasant proprietors were alone in question the country would soon settle down to work on the land. But, unfortunately, there are now almost as many Bulgarians outside Bulgaria as there are within it. The settlement after the war filled the country with half a million refugees, who are not a stable element, but quite the reverse, while the long course of hostilities rendered many others incapable of steady work, and infected them with the poison of savagery. Deserters from the Bulgarian and other armies drifted towards the bands of evil repute, and Turkish Nationalists, as well as Soviet commissaries, found in the country a not altogether unfruitful field for their activities. The secret Macedonian committees, composed of the extreme revolutionary section of some 10,000 out of 200,000 Macedonians in Bulgaria, also continue, by a reign of terror, in which assassination plays no small part, to influence politics and to disturb the calm of the country.

Home politics are also in a peculiar state, because the governing Agrarian party, composed of about 120 members out of double that number in the Sobranje, have so willed that they govern the country without the aid of any of the middle parties, with the result that the best part of the intellect, brains, and experience of the best educated classes is not represented in the Government. There is only one member of the Government who speaks any language but Bulgarian, and there is probably no other Government in Europe less fitted to handle foreign affairs or more ignorant of its rudiments. The Agrarians are better organised than any party, except the Communists, while the middle parties are much split up, and suffer from the rivalries of their chief representatives. So the Agrarians, under their decidedly powerful leader, M. Stamboulisky, do pretty much as they please. Many deny to them the name of a Constitutional Government, and describe them as a tyranny.

After describing the arbitrariness of some of M. Stambolisky's methods of exercising power, he says:—

Bulgaria is, in fact, suffering from a surfeit of democracy. The mass of the people are extremely Left, almost Sovietic, but obviously the extreme Bolshevik theories, including ex-propriation of land and goods, could not be applied to a nation of small peasant proprietors, and the people, finding that their political ideas cannot be carried out in practice, owe the Agrarians and Stamboulisky a grudge. . . . . Politics in Bulgaria can be many things, but they can never be dull.

And his estimate of M. Stambolisky's character is interesting:—

Stamboulisky has one merit, namely, that he prefers plain speaking to beating about the bush, and did not take it amiss when I recounted to him, one by one, the many charges against his Government, and asked for his answers to them. He replied at some length on each charge, but as his answers have already been given in a despatch to the Allied Governments, which has, I believe, been published, I can reserve his arguments until I go into the charges themselves.

Is Stamboulisky genuine and is he sincere? Genuine, yes; a regular son of the soil and of the mountains, full of vigour, vital energy, and resource, but upon the question of his sincerity opinions differ. Some think him sincere at first and alter their opinions later. I think that he is a product of the times and of his surroundings. I do not believe that he is so inept as to risk the destinies of his country by making secret treaties with Kemalists or Reds. But in foreign affairs he blunders along like a bull in a china shop. He is adventurous, rash, headstrong, and quite ignorant of the diplomatic convenances. I think it possible that he plays with fire from sheer robustiousness and love of excitement. I doubt whether any man of his type regards a treaty as a settlement, or as anything more than a jumping-off place for fresh adventures. There is much evidence that he has thrown feelers to the Roumanians, Serbs, and Greeks in turn, and, if he is not trusted, he owes it to his own indiscretions. He seems to think that he has the monopoly of knowledge which every one possesses, and fancies wrongly that his courageous action at the Council has absolved Bulgaria for her past political sins. He does not properly comprehend the delicate and even dangerous position in which Bulgaria stands on these counts, and if he were to hand over foreign affairs to some trained diplomat of the bourgeois parties I think that he would confer a benefit upon his country. All the same, most people like Stamboulisky. There is something engaging about his virility and sansgêne.

### Egypt.

The *Manchester Guardian* of August 26 contains an article, written by an "Egyptian Correspondent," on "The Position on Egypt," the sub-heading of which is "Zaghlul Pasha losing Ground." He comments upon the present lapse into quietude in Egypt, and analyses its causes thus:—

In the first place, the continental attitude to the proposed independence of Egypt, with its unexpected and careful conservatism in view of the Alexandria riots, involves a political experience and understanding beyond the mental horizon of a people consisting of over 90 per cent. illiterates and principally fed hitherto on the intense excitements of purely local affairs,

Digitized by Google

The general fact of continental opposition to great change, however, is well understood. In the feeling of disappointment which has crept over the people Zaghlul Pasha has lost still further prestige, not only because he had no immediate solution to offer in the advancement of affairs, but because he has opposed the official delegation to England on peculiar personal grounds. It is noted on all sides that no objection was raised by its oppon ents to the present Delegation until it became quite clear that Zaghlul would not be appointed its president. All this has confirmed public opinion in tending to leave the problem in the hands of the present president of the Delegation, with his more balanced political conceptions and farther-sighted outlook.

A second factor, the writer of the article says, is that the season of the crops, and especially of the cotton crops, is at hand; and "it is appreciated that the cotton situation in Egypt demands stability in the country for the realisation of a successful season." He then states that the desire for political change and administrative improvement has led to schemes for the reorganisation of various Ministries—a delicate task that must perforce be left to experts. And he concludes by pointing out who are the real political leaders in Egypt to-day:—

The limiting condition of Zaghlul Pasha's political work is that he is a fellah. The fellah, whom Kitchener loved, has very great and admirable qualities, especially those of kindliness, hospitality, and humour; but he has not the mental alertness of other strains in the population of Egypt; and he can be supremely obstinate at the wrong time. The political lead in the country is therefore passing to the more agile-minded members of the society who recognise the necessity and value of compromise on occasion, and particularly to the descendants of the old Egyptian-Turkish families, themselves as Egyptian as the rest, as national, and as patriotic, but more fitted by their traditions and their mentality to carry on political service. So far as anything at all may be foreseen in politics it seems to be the case that for some time at least this section of society must serve Egypt in establishing its independence on a sound and workable basis. Unfortunately, Zaghlul, who might have enjoyed a unique position in representing his own people in the supreme councils of the nation, has secured the wilder students and the mob, especially in Alexandria, for his partisans, and has alienated the sympathy of the soberer elements.

It is understood here that the outstanding difficulties are few, but require anxious study. The question of the Sudan must give rise to much discussion in Egypt, but a valuable attempt at solution has already been laid down in the Milner Report. The question of British garrisons in Egypt has altered considerably since that report was issued on account of the Alexandria riots. While some of the natives consider that the riots have been deliberately exaggerated by those interested in the preservation of the capitulations, others are prepared to consider a limited number of garrisons as a price which must be paid for the great benefits desired. Egyptians for the most part have never been ungenerous in according England facilities for Imperial communications. It is assumed also that a duty will devolve upon England in assisting towards the financial stability of the country. But there is much difference of opinion among the thinking part of the population, and an Egyptian statesman with a straight lead and a defined policy is the only hope of providing a stable settlement.

## Palestine.

The *Fortnightly Review* for August contains an article on "The Palestine Government," written by Mr. Horace B. Samuel, and inasmuch as it is written, in the words of the Editor of the *Fortnightly*, "from the standpoint of the Zionist Organisation," it illustrates well the differences between the Jews themselves, and the consequent difficulties in the way of Sir Herbert Samuel. After briefly reviewing the general history of Palestine since the appointment of the High Commissioner, the writer comes to the Jaffa riot, which, he says "was in broad feature an attack by the Arabs on the Jews," and proceeds to comment upon the High Commissioner's recent declaration and to complain of—the way in which the High Commissioner interpreted and emasculated that Balfour Declaration with which it was generally believed that he was in sympathy, which he had been sent by His Majesty's Government to turn from a formula into an actuality, and against which an armed conspiracy had been recently engineered. The root principle of the Balfour Declaration was that Jews and Arabs were parallel nations in Palestine with equal rights, and that the right of access of each Jew, as such, to live in Palestine was as absolute and unrestricted as the right of each Englishman to live in England. The root principle of the High Commissioner's interpretation is that Palestine is not a Jewish and Arab, but an Arab country, and that the Jew exists on sufferance and only in so far as he can help not his brother Jew, but the Arab, to develop the country. It is significant that the phrase "Jewish nation" is not once used, and that the expression "National home" is apologised for, explained and whittled away into some spiritual limbo which can, and preferably should, be enjoyed from the other end of the world, but may possibly be entered by a few favoured ones who enjoy the good graces of their Arab brethren.

## The Balkans.

In the *Nineteenth Century* of August Mr. Noel Buxton writes upon "The Balkans To-day." After lightly touching upon the commercial and political interest which Europe in general must always entertain for the Balkans, he analyses the Paris settlement of these regions. Then he sketches in outline the present political conditions of the various Balkan countries (including in these Roumania, and giving the most space to Bulgaria), and concludes with a hopeful comment on "The New Balkan Outlook:—"

The most important and fundamental change in the Balkan situation produced by the war does not emerge from the foregoing summary. It could not be included there because it is shared by all the Balkan peoples. This change may be summed up in a phrase: while the critics contend among themselves whether or not Europe has been "Balkanised," it is undeniable that the Balkans have been "Europeanised" to an extent which no man dreamt of seven years ago. Geographically, Bulgaria and Albania are now the only two countries which are Balkan countries and nothing more; Serbia, Roumania and Greece have big parts to play on another stage. Intellectually years of co-operation in military affairs with the more highly developed countries of the West have left behind a leaven of knowledge and love of new ways of living and thinking which will constitute a civilising force in the Balkans until the present generation pasess away. The admirable efforts of such organisations as rhe Serbian Relief Fund and the Scottish Women's Hospitals have added their contributuons to this influence. An eager desire for closer acquaintance with Western literature and culture is everywhere to be noticed, and France in particular has already done much, through the subsidised organisation known as the 'L'Alliance francaise,' to place her contribution to our civilisation before the enthusiastic youth of the Balkan countries.

The all- important question which it rests with the future to decide is whether this many-sided movement in the direction of 'Europeanisation' will enable the Balkan States to form a self-protecting group or whether it will involve them in fresh entanglements which will leave them no better off in the long run than they were before the war. From this point of view the tendencies towards a reapprochement between the two main branches of the Southern Slavs are significant, although as yet they are no more than tendencies. One event in recent months, however, provides some concrete evidence that non-Balkan Powers may find some difficulty in future if they attempt to carry out the time-honoured policies of buying the alliance of Balkan States for their own political ends. The so-called 'Little Entente' comprising the Serb-Croat-Slovene Kingdom, Tchecho-Slovakia and Rumania, is in origin a group formed for defence against any possible attempt to restore the Habsburg dynasty. If the recent adventure of the ex-Emperor Karl had met with any success in Hungary the 'Little Entente' would undoubtedly have taken measures to deal with the situation. And it seems equally certain that it would act effectively against any similar *coup*, even if it were counterbalanced or engineered by one of the Greater Powers. Thus the 'Little Entente' may perhaps be looked to for the formulation eventually of a sort of Monroe Doctrine for a portion of the Balkans.

# THE CARAVANSERAI.

*Think, in this batter'd Caravanserai*
*Whose Doorways are alternate Night and Day,*
*How Sultan after Sultan with his Pomp*
*Abode his Hour or two and went his way.*
—OMAR KHAYYAM.

* * *

As a true corsair, I am naturally of a shy and retiring disposition, but I am beginning to wonder whether this has not been a mistake on my part. I have been led to this idea by studying the pages of *The Daily Telegraph*. A most assiduous contributor to its columns is a " Diplomatic Correspondent," and as I always believe what I read (writing, myself, only what is absolute fact), I wondered at the marvellous condescension of one or other of our Ambassadors in placing his services at the disposal of the Press. Then I began to study the communications more closely and soon I came to the conclusion that the writer was not a British Ambassador after all, but must be a foreigner, possibly a diplomatist turned out of office by the vicissitudes of party politics, who preferred to stay on in London rather than return to his own country where, possibly, a warm reception might be awaiting him. Once again I found myself wrong, because something was stated which no diplomatist, however unused to the role, could ever have written.

* * *

So I began to make inquiries, and I find that I have been altogether wrong. A " diplomatic " correspondent, apparently, does not mean necessarily a correspondent who is or was a Diplomatist, with a big D, or even tries to be diplomatic, with a little d. No. You become a diplomatic correspondent by calling on diplomatists. To revert, therefore, to my shyness and retiring disposition. My discovery has set me thinking. Up and down the world are a number of Palaces whose visitors' books have been honoured with a bold scrawl that is Corsair's. So far I have always been content to leave it at that; but now, if you find that in future I sign " A Royal Corsair," you will know that I am taking a leaf—or line—out of *The Daily Telegraph's* Diplomatic Correspondent's book. If, however, I still stick to " Corsair " plain and simple, you will know that my name is not Gerothwohl.

* * *

But the reason why I touched upon the subject of *The Daily Telegraph* is to express my admiration of the whole-hearted way in which it plays the game of journalistic ninepins. Comes along " A Diplomatic Correspondent " and solemnly sets out a series of statements calculated to bring the grey hairs of the hardiest old pirate's head with sorrow to the grave. For if there is one thing more than another I set my heart on, it is that a finished war is done with. As far as Germany is concerned, and perhaps Turkey, I have an open mind; but when it comes to Austria, to Hungary and to Bulgaria, surely the Allies can write the word *Finis*. This is not the view of " A Diplomatic Correspondent." Out come his ninepins, day after day. We are bidden to shudder at the very mention of the word Bulgaria. The world's peace is endangered; if it is not ex-King Ferdinand who is responsible, it will be one or more of Bulgaria's monster population (5,000,000). Does M. Stambolisky read a paper? Beware lest it be a secret treaty with Mustapha Kemal or Sun Yat-sen. A formidable indictment, for it is penned by " A Diplomatic Correspondent." For some weeks it holds the field, subtly renewed day by day in three-to-four-inch paragraphs. Suddenly Colonel Repington emerges on the scene to the extent of two columns. He writes from the dreaded country. One by one every single ninepin so carefully set up by " A (gullible) Diplomatic Correspondent " is bowled over by the man who is able to check the fantastic tales on the spot. Will either the D.C. or the D.T. mend its ways? D(oubtful) V(ery).

* * *

A correspondent writes:—The Belgrad *Politika* has secured a copy of the *Kolokol* (" The Bell "), a comic paper which is produced in Russia secretly and is therefore seen rarely in Europe. The number in question included a parable that is worth repeating.

One morning a horse obtained audience of Lenin, and said: " Vladimir Ilitch, I represent the Transport Workers, and have come to demand a Licence to Trade." " Certainly," replied the autocrat. " You have deserved it; " and gave the horse the right to trade in anything he liked. The next day there came a cow and said: " Vladimir Ilitch, I am by profession a mother; trusting in your invarying support of maternity, I have come to ask for a license to trade." Lenin did not seem pleased, but could hardly refuse, and, rather grudgingly, gave the license demanded. But the next day he was very irritable when an ass appeared before him. " What do you want? " roared the autocrat. " A License to trade " said the ass. " The horse and the cow have earned theirs," cried Lenin, " but what the devil have you done for us? " The ass ony replied: " Comrade Vladimir Ilitch, do you really think tht you could have climbed to power by any other means. thln over the heads of us asses O " CORSAIR

## A SERBIAN SHERLOCK HOLMES.

Our Zagreb Correspondent writes (August 9):—An interesting detective story comes from Tetovo, marked on our maps under the Turkish name of Kalkendelen. A workman named Andon Yeftimovitch came in a great state of mind to the police to report the theft of gold to the value of 50,000 dinars from his lodgings. It seemed incredible that such a man should own so large a stock of gold, but, knowing the Macedonian habit of hoarding gold, the authorities at once detailed a young detective who had recently completed a four months' special course at the police school at Belgrade organised by Professor Reiss. He was a smart and intelligent young officer, for he followed up the tracks in the most approved Sherlock Holmes manner, and in a short time arrested a man named Damian Etsovitch, who at once confessed, and restored all the money. This consisted of 185 Turkish pounds, 90 napoleons, 70 golden ducats, and a quantity of smaller gold coins. The thieves are indignant at the employment of such methods, and wonder what we are coming to with these new-fangled ideas, which makes life almost impossible. It is a feather in the cap of the young detective Tasitch, and incidentally of his teacher Professor Reiss, and is also interesting as throwing a light upon the amount of gold hoarded in Macedonia, where it is a common thing for a casual labourer to carry anything up to a hundred gold coins, chiefly Turkish and French in his belt, a practice which is undoubtedly conducive to wayside murder. British officers in control of labour in Macedonia during the war were frequently asked by the most ragged of workmen to take care of a bagful of gold for them, which made a very sound guarantee of good behaviour.

## NOTES AND NEWS.

Devonshire Square.
E.C. 2,

**The Freights Controversy.**

There has been a development during the week in connection with the cotton freight controversy that is not without interest. Out of 100 exporters 96 signed the Conference Lines contract, and now out of the four remaining exporters two have signed, leaving only two outside the contract. As the American case has been given ample publicity, this action on the part of those who are in a position to know the facts speaks for itself. The controversy, as I have had occasion to point out, arose like the dispute over the Mesopotamia oil-fields from a complete misunderstanding of the position by the Americans. Now that they have had a little time to reflect over it, it may be hoped that they will have realised the error into which they have been led. and instead of pursuing a useless controversy will save their energies for a further attempt to obtain a contract next year.

**The Cotton Syndicate.**

From our Cairo Correspondent's letter this week it will be seen that the syndicate which was formed in Egypt a year ago to keep up the price of cotton has found a new market for its activities. I pointed out at the time the syndicate was formed that it was extremely doubtful whether it could achieve its object, and ultimately it confessed its failure by asking the authorities to do what it had set out to accomplish. It has now come into prominence by issuing a series of memoranda in connection with the cotton freights controversy, and our Correspondent records the interesting fact that the syndicate throughout its memoranda has given publicity to the American side of the case. It is, perhaps, significant of the times that this should be so. From what our Correspondent says it would appear probable that this will not be the last invasion of the syndicate into the political arena, and he suggests, indeed, that it may eventually provide the foundation for an important political party. From conserving the interests of cotton cultivators to politics seems a far stretch; it will at any rate be interesting, to observe the progress of this enterprising body.

**Turkish Contracts.**

Until Turkish finances are on a much sounder footing than they are at present there can be but little inducement to British firms to tender for contracts there. There has just been an adjudication at Constantinople for motor fire pumps and a floating engine, the contract for which has gone to a French firm, whose quotation was far above that of the British firm competing. But, to use the words of the Journal of the British Chamber of Commerce of Turkey and the Balkan States, " at the present time it does not appear as though the successful firm will reap the benefit of the order, as it is not at all clear from what source the Municipality will obtain the money to pay for the engines."

**Opportunities in Yugoslavia.**

I wish to draw the special attention of British firms to the particulars which our Zagreb Correspondent gives this week of the plans of the Yugoslav Government for the improvement of the communications for which purpose the internal loan of 500,000,000, dinars was raised. It will be seen that there is a very comprehensive programme of railway development including the construction of a number of new lines, new stations, and railway workshops, and the repair of rolling stock, while in addition substantial sums are to be expended on dockheads, and the purchase of tugs, launches, cranes and elevators, etc. Naturally a great part of the material needed for carrying out this programme will have to be imported, and if British firms lose no time in showing the necessary enterprise there is no reason why the bulk of the contracts should not be secured by this country.

**Oil Developments.**

The first of the new oil companies that I indicated might be expected before the end of the year has already made its appearance. Brief particulars are given elsewhere of the company, which, it will be noted, is to operate in Yugoslavia. In addition to this company I understand that one, if not two companies, are to be formed for the exploitation of Roumanian oil-fields.

**Housing in the Near East.**

In most parts of the Near East as elsewhere a serious housing shortage has been experienced as a result of the war. It has been much more pronounced in some regions, as for instance at Salonika as a result of the great fire, and at Constantinople and elsewhere in Turkey owing to the great influx of refugees from South Russia and elsewhere. In Turkey, indeed, the question is particularly acute to-day, and it has been rendered more serious by the recent fire at Scutari which destroyed over 700 houses. It would seem that the most ready means of meeting the situation would be by the erection of small portable dwellings, and it is surprising that British firms manufacturing them have not shown more enterprise in introducing them to these markets.

REPORTS FROM OUR OWN CORRESPONDENTS.

## EGYPT.

Cairo, August 11.

**Adverse Trade Balance Growing.**

The June returns issued by the Egyptian Customs Administration reveal an extraordinary shrinkage in the foreign trade of the country. During the half year imports amounted to L.E.30.104.275 and exports to L.E.12.140.021 as against L.E.47.770.586 and L.E.64.623.998 respectively in the same period of the preceding year. There is therefore a reduction of about 40 per cent. in imports and 80 per cent. in exports. Re-exports on the other hand have increased from L.E. 1.137.559 to L.E.4.670.983(due to a greater demand for cereals, agricultural produce, coal, and textiles made by Syria, Palestine, and other parts of the Levant). Consequently as the result of the first six months of the current year there has been a swing over in the trade balance of nearly L.E.32.000.000, the adverse balance being now L.E.16.811.004.

The principal imports during the half year have been: Fresh and preserved meat L.E.208.875, wheat L.E. 1.262.614, flour L.E.4.960.512, petroleum L.E.748.118, coal, L.E.2.573.059, cotton textiles L.E.3.249.754, woollen textiles L.E.M.397.518, silk textiles, L.E. 417.854, manufactured iron and steel L.E.1.321.904, and tobacco L.E.1.046.209. Except as regards coal, wheat, and meat there were substantial reductions under almost every head. In yarns and textiles alone the reduction was L.E.13.346.893, and indication of the manner in which prices have fallen off is afforded by the figures for flour and coal imports, both of which doubled in quantity but only increased by 50 per cent and 33 1-3 per cent respectively in value.

Under exports the main items were eggs L.E.178.295, rice L.E.251.654, cotton seed L.E. 1.139.448, cotton cake L.E.319.979, onions L.E.347.850, sugar L.E. 122 770, phosphates, L.E.107.902, cotton L.E.8.420.682, and cigarettes L.E. 316.203. On this side again every item showed a marked diminution in value, the only exception being rice which increased in value by 50 per cent. Here again the drop in prices is reflected, and an instructive illustration of the cotton slump is afforded by the figures for cotton export, which fell off by 30 per cent. in quantity but the value of which decreased by 85 per cent.

The United Kingdom's share of imports diminished considerably even in proportion to the decrease in the total. This was mainly due to the reduction in textile imports. Reductions are likewise recorded by most other nations, the only increases of any importance being under Argentina, Roumania, Mexico, and the United States. The increases under Argentina and Roumania were mainly due to cereal imports; the reappearance of Mexico was the result of a large increase in oil fuel imports; while the United States jumped from L.E.2 674.762 to L.E.7.102.505 in consequence of cereal imports amounting to over L.E.4.000.000, coal imports of L.E.1.437.000, and railway locomotives valued at L.E.456.000, the latter being in completion of the contract obtained last year from the State Railway. Germany showed marked improvement, her imports being more than double those of the previous year. Although the total figure is only L.E.716.510, she is making considerable headway in stationery, wooden articles, synthetic indigo, worked iron and steel door fittings, locks, machinery, motor cars, toys, pianos, &c.

Under exports there is of course an all round reduction but the share taken by the United Kingdom has increased, contrary to the experience of all other countries, the proportion being 50 per cent. as against 35 per cent. at the end of June, 1920. The United Kingdom took as usual practically all the eggs, cotton seed, onions, and 45 per cent. of the cotton. As regards the latter item the greatest reduction was in the case of the United States which in the previous half-year had taken over 40 per cent. of the total and this year took barely 12 per cent. For similar reasons France, Italy, and Japan all figured with relatively small amounts under exports.

Trade between Egypt and the Sudan also fell off considerably, imports to Egypt amounting to only L.E. 511.241 and exports to the Sudan to L.E.1.331.160 as compared with L.E.1.482.875 and L.E.2.032.654 respectively on the same date in 1920. The main import into Egypt was cattle L.E. 135.513, which was about one quarter of the previous half-year's traffic; while exports to the Sudan were wheat and wheat flour L.E.74.443 (a slight increase), sugar L.E. 223.710 (less than half of 1920), cotton textiles L.E.345.621 (30 per cent. less) and tobacco L.E. 121.326 (a slight increase). The decrease in imports and the items which bear the greatest falling off show that the Sudan is suffering somewhat similarly to Egypt from the economic stress.

Cairo, August 18.

**The High Cost of Living.**

The monthly statistical return issued by the Ministry of Finance for the month of June gives some very interesting information not only with regard to cotton and other agricultural products but also in connection with the cost of living, which as everyone knows has been exceedingly high during the last two or three years. Compared with June last year there has been an enormous drop, the index number of the wholesale prices of 22 of the commodities in most general use being 166 as compared with 292 in June 1920, 224 in June 1919, and 100 before the war. This big drop is good news for housekeepers who are justified in hoping that the decline in wholesale prices will soon make itself felt in the retail prices. Unfortunately we are very much in the hands of the retailers, and current prices, although a guide, can rarely be obtained by Europeans. Nevertheless a drop of 66 per cent. in the index number must have its effect in every direction, and we are hoping that provided cotton does not soar to abnormal prices we shall get down to about double pre-war prices, which is what one may consider to be a reasonable post-war level taking all things into consideration.

**The Cotton Freight Controversy.**

While a sign of the effectiveness of American propaganda in connection with the cotton freight dispute has been the fact that beyond one or two letters from the Acting-Chairman of the Alexandria General Produce Association only the American side of the case has been ventilated in the local press, a disconcerting and disquieting feature has been the part played in the controversy by the Egyptian Cotton Growers' Syndicate. The latter, it should be explained, was founded with a great

flourish of trumpets about a year ago, when the cotton slump set in, for the purpose of holding up 2,000,000 kantars of cotton, and of assisting cultivators until prices should have sufficiently recovered. The syndicate, which is entirely Egyptian, was unsuccessful in obtaining the necessary funds from the Egyptians, and in the end it had to appeal to the Government to take action. This the Government did, but its action was dictated more by political considerations than out of the soundness of the proposals made.

Experienced observers did not look with favour on the formation of this syndicate, which was suspected of being a political move. The attitude which it has adopted in the cotton freight controversy would seem fully to bear out the view of these critics and to justify premonitions as to the future. The syndicate has issued several memoranda on the subject of the controversy, but throughout these memoranda have solely given the American arguments and dealt with the American point of view. The Syndicate has made no effort to ascertain what the views or the explanations of the British interests might be; it has accepted as gospel truth every statement and every accusation made by the Americans; and it has used those statements in order to persuade its fellow countrymen that the British shipping lines have been actuated with a desire to squeeze the Egyptian cultivator for British interests.

It is because of its attitude on this question that its future activities must be watched with attention. The syndicate has its branches and agents throughout the country, and is almost entirely composed of landowners who have grouped themselves to protect their own interests, and we may therefore expect that where in future the interests of landowner and tenant clash, the voice of the former will prevail through this syndicate. We have already had an illustration of the political pressure it is able to bring to bear on the Government and it would not be at all surprising if under the new regime this syndicate developed into a strong political party.

The manner in which the landowner is inclined to squeeze the tenant was evident during the past year, and had it not been for our presence in the country there might have been serious agrarian trouble. As under the new regime, where there will be no British control, this syndicate, through its delegates will possibly be in a position to block in the new Assembly any measure which in the interest of the tenants will be against that of its own members, there will be great danger of a recurrence of this tension between these two elements, and close attention will have to be paid to this question if agrarian trouble is to be avoided.

## YUGOSLAVIA.

Zagreb, August 16.

**Improvement of Communications.**

The following particulars are issued of the estimated expenditure of the recent internal loan of 500 million dinars, a great portion of which is to be spent upon communications, (the figures representing dinars) :—Loop line at India to avoid changing direction Belgrade-Zagreb, 4,000,000; sleepers, points, etc., 32,000,000; briquetting plants, 20,000,000; completion of central stores at Batajnica, 4,000,000; material for Bosnian railways, 1,670,000; repair of locomotives and trucks, 34,000,000; water stations at various places, 8,000,000; narrow-gauge engines and rolling stock, 15,000,000; shops for narrow and standard gauge, at Zagreb, Beckkerek, Nish, and Sarajevo, 12,000,000; shops at Liubliana, 5,000,000; railway buildings, 5,730,000; expansion of Belgrade and Zagreb stations, 12,000,000; expansion of engine accommodation, 5,000,000; doubling lines for crossings at Zagreb, Belgrade, Nish, and Guevgueli, 40,000,000; tracing new lines, 3,500,000; completion of the Nish-Kniazhevatz line, 28,000,000; completion of the Gornji Milanovac-Ugrinovtsi line, 9,000,000; new line Uzhitsa-Vardishte, 15,000,000; tunnel in Ivan Mountains to avoid rack and pinion, 2,500,000; new line Gospich-Knin, 15,000,000; new line Bos-Krupa-

Bihacs-Ermanja, 30,000,000; new line Titel-Orlovat, 10,000,000; improvement of Subotitsa-Senta-Choka Karlova-Kirkinda line 6,000,000; completing improvements Racha-Uglejevik, 2,000,000; narrow gauge line Parachin-Stalach, 5,000,000; new line Topchider-Mala Krsna-Pozhearevatz, 25,000,000; iron bridge over Drina at Medjedja in Bosnia, 4,000,000; new line Ljutomer-Ormozh–Murska Subota, 10,000,000; also the following expenditure on dockworks:—Barosh Gulf-Matinshitsa, Bakar, 25,000,000; Split and Shebenik Harbours, 15,000,000; improvements of small landing stages, 5,000,000; signals, 4,000,000; purchase of tugs, launches, cranes, elevators, motor boats, etc., 6,000,000; office buildings and dwellings for staff, 5,000,000; highways and roads, 45,000,000.

## SOME ECONOMIC ASPECTS OF TURKESTAN.

(*From a Correspondent.*)

Signs are discernable in Russia that affairs have taken a turn for the better. The Soviet Government recognises the absolute necessity for Russia again to be a factor on the world's markets and for the restoration of her former economic stability by official and unofficial negotiations for the resumption of trade. The decision of the British Government to resume trade with Russia will prove to be a master-stroke of economic policy. Those who cavil at the action of the Government would do well to remember that when the Turks were committing wholesale massacres on the Armenians it did not prevent the Western nations from eagerly bidding for concessions from the Turkish Government; nor did the driving of 10,000 Chinese into the river Amour in 1890 by the Cossacks hinder competition for concessions from the late Imperial Russian Government.

The principles of Bolshevism as a basis for the erection of a new era of prosperity for the proletariat have resulted in national ruin. The fundamental policy of the old regime in governing the people with despotic sway differs only in form; indeed, without dominant severity it would be impossible to govern the Russians. A century of steady progress and educational enlightenment must elapse before the nation will possess the capacity for self-government. The foreign policy is as aggressive as ever, the manner of procedure alone has changed. Russian Governments until recent years have always followed a policy aimed at the extension of Russian influence in Afghanistan, which was regarded as a menace to India by British Governments. At present the Soviet Government is making strenuous efforts to gain the good-will of the Amir of Afghanistan, while at the same time an active propaganda is being carried on in the country. When very recently the writer was at Merv he conversed with emissaries of the Soviet on their way to Afghanistan and India carrying with them literature for propaganda. These emissaries find no difficulty in crossing the Afghan-India frontier. Two years ago a school was founded in Moscow for the training of Asiatic and Oriental students in communistic doctrines. The average number of students was 300. A commissary informed me in Moscow that these students were apt pupils in learning the subtleties of communism. Among the Mohammedan races their propaganda is carried on under the name of Pan-Islamism; thus the simple people are influenced by the vision of the union of all Mussulman races.

As a field for commercial enterprise Turkestan offers excellent opportunities. This fact has not been lost sight of by American and German firms and already their representatives are on the ground. The soil generally is fertile, and grows very many varieties of fruit including the choicest kinds. The grapes are of the finest quality, large and of good taste and colour. The method of drying raisins is very primitive, and does not give an attractive appearance. The wines of Turkestan are well known in Russia, and have obtained a high reputation, being well flavoured and of good body. There is scope for a profitable trade to be done in tinned and dried fruits. The best fruits sold in the large towns of Russia come from Turkestan. The cultivation of cotton has hitherto given satisfactory results. The cotton compares favourably with the best varieties grown in America. Mulberry trees are in great abundance, making practicable a lucrative silk industry. The trade has been carried on with excellent results, but needs to be developed.

Certain districts are well suited for the cultivation of tea, tobacco, indigo, rice, and all kind of cereals as well as lucerne of the best quality. Thus it is possible to carry on sheep breeding on a large scale. In some parts the ground is of a boggy character, and requires drainage to render it suitable for the growth of many products. In other parts where the land is dry irrigation is necessary. Water is easily to be obtained by mechanical power. Efforts have been made by Belgian and English companies to obtain concessions for the construction of drainage and irrigation works, but without success. In 1918 a Russian engineer laid a proposal before the German Government for the undertaking of this work, but owing to political unrest the matter was left in abeyance. Oil is to be found in Samarkand district. A concession was given to a Russian Minister, and the working gave very satisfactory results. There are also to be found gold deposits and rubies of magnificent colour, as was proved when in the year 1885 the officials of the Government visited Bokhara and Khiva, and were met by the Amirs with their suites many of whom were adorned with rich gold ornaments and rubies. This aroused the curiosity of the Russian officials, and it was not long before an exchange of commodities for the ornaments began. These transactions assumed considerable dimensions, but the Amirs became alarmed, and put an end to the business.

It may be hoped that these details of the riches of Turkestan will stimulate interest in that country as a sphere for commercial enterprise. It is only with trade that the present deplorable conditions of the country can be changed for the better.

**BANQUE FRANCO-SERBE**

Capital - Frs. 20,000,000.

## NEW COMPANIES.

**Croatian Syndicate.**

The Croatian Syndicate, Ltd., has been registered as a private company, with a nominal capital of £130,000 in £1 shares. Objects: To acquire oil-bearing lands in any part of the world and to promote or aid in promoting companies or partnerships in the United Kingdom, the kingdom of the Serbs, Croats and Slovenes or any other country. Solicitors: Linklaters, 2 Bond-court, Walbrook, E.C.

Goods imported into Czechoslovakia will be subject to the general Customs tariff pending the revision of the Customs agreement between Czechoslovakia and other countries.

An experimental farm has been established in Dhrangadhia State for the improvement of the quality of cotton.

**A New Kinema Lamp.**

As a result of a series of exhaustive experiments a new type of kinema lantern has been designed, which promises to revolutionise the production of moving pictures. The new lamp is of the high intensity type, and will give twice the illumination on the screen that can be obtained by the low intensity lamps used at present. There is no increase in current consumption, and it is said that the special carbons used give a quality of light which entirely prevents eye strain.

Many claims have been made from time to time as to the production of light which resembles daylight, but few of these have been substantiated in practice. It is claimed that this new lamp gives a light closely approximating to sunlight, but whether this be so or not it seems clearly established that the new light gives a clearer definition to the pictures and brings out the true value of the tints where colour photography is used. Especially is this so in the case of blues and greens, which frequently appear muddy when thrown by an ordinary arc.

The lamp operates automatically, with the exception of the initial striking of the arc, and a feature of the mechanism is that only two hand adjustments are embodied instead of five as in the usual type. During normal operation no adjustment of the carbons will be necessary, the only movement required to set the arc at the focus being a longitudinal one which, once determined, never requires readjustment.

The positive carbon, instead of being vertical, is projected horizontally through the positive nose, the negative carbon being at an angle of 60 degrees to the horizontal and so located that its tip is never between the crates on the positive carbon and the lens. Actually 90 per cent. of the whole illumination given by the arc comes from the deep crates in the positive carbon which offers the whole, instead of only a part, of its brilliant illumination, to the centre of the lens. The positive carbon, it is interesting to note, is held tightly by a clamp to the feed screw which, with the carriage, is rotated by a bevel gear and pinion connected to the motor through a worm-gearing. The carbon is fed forwards by means of a star wheel and detent, operated electro magnetically and working on the feed screw itself. The negative carbon is not rotated, but is fed by means of a clamp on the feeding screw which is turned by means of bevel gears, motor-driven through a worm gear train and clutch. This constant rotation of the carbons during the working of the lamp ensures the crates and arc being kept in regular form and in the most efficient state possible. The length of the arc is regulated automatically by means of a motor which is so arranged across the arc circuit that its speed is independent of any fluctuations in the main power supply and depends solely on the arc voltage.

Carbon-changing, when necessary, is a matter of a second or so, as no vertical or horizontal adjustments are required to get the crates at the focus of the lens, it being impossible for this focus, once adjusted, to get out of position. A further point is that the current is only carried through the carbons from the holders, which are fairly close to the craters, to the tips, and consequently the remainder of the carbon does not become hot as it would were the current forced through its entire length. The lamp, although so powerful, is extremely compact, and comparatively light.

**An Interesting Band Saw.**

Horizontal band saws are now being made in sizes suitable for dealing with logs of from 24 to 48 inches square and with rough timber up to 5 feet in diameter. Two cast iron columns, 10 feet in height, carry the pulleys round which the band saw is carried, the centres being about 7 feet apart. The cross slide for carrying the band saw pulleys is bored to slide on these columns, the weight being approximately balanced by counterweights which are arranged to rise and fall inside. The saw pulleys are 5 feet in diameter, and are fixed to ground steel shafts, 3 inches in diameter, revolving in roller bearings, the outside casings of which are bolted vertically to fixed brackets on the cross slide at the driving pulley end, and to adjustable tensioning slides at the other extremity. These slides, which have turned necks fitting into bosses, bored on the cross slide, are independently adjustable, in a longitudinal direction, by means of two internal hand wheels. In this way any desired tension can be given to the band saw, and its transverse position on the pulley rim can be controlled by slightly advancing or withdrawing one of the tension slides as required. Allowance for heat expansion is made automatically by means of a weighted compound lever device, which gives a constant tensioning pressure. Adjustments to suit different widths of timber are made by means of movable brackets with hardwood band saw guides carried below the cross-slide.

The driving pulley of the saw described is 30 inches in diameter by 10½ inches in width, and it absorbs about 50 horsepower on full load. Power for raising or lowering the cross slide and for the feed motion is obtainable either from a small electric motor or an auxiliary belt drive as desired. All movements are controlled by three locking handles in the switch rack and vertical movement of the cross slide is effected by two square-threaded screws driven by gears from a cross shaft, the actuating clutch of which is manipulated by a central hand lever.

**Ball Bearings.**

These are now so universally fitted to all kinds of high speed and heavy duty machinery that they are taken largely as a matter of course and consequently receive in the majority of cases little or no attention. As a matter of fact, although ball bearings, once mounted require little care, yet lubrication is essential, and recognising the careless way in which bearings are usually treated in practice many makers send them out packed with a hard grease that will last for some time. It is to be feared that the use of too dense a grease is not an advantage; in some cases it is evidently a decided disadvantage. A number of ball bearing wheels which had been in use at a high speed, were recently taken down, and it was seen that although the ball races had run quite dry and shewed signs of seizure, the hubs were full of hard white grease which not only had never melted sufficiently to lubricate the bearings, but which had been kept firmly in a position, away from the balls, by centrifugal force. Bearings of this type should be packed unless for use in extremely hot climates, with soft paraffin wax or vaseline and lubricated with a medium body oil similar to that which would be used in the average run of air-cooled internal combustion engines.

**Double-Head Millers.**

An interesting double-headed milling machine for rapidly machining brass work has recently been introduced, and it would seem to be particularly suitable for use in small shops where mass production of parts is being carried out. In this tool hardened steel spindles are fitted to the headstocks and the bearings are of long parallel type, made of special quality hard phospher bronze. These are readily adjustable for wear, and are fitted with lubricators of the syphon type. End thrust in all cases is absorbed by ball thrust washers; the spindles are hollow, and the front ends of these are bored to accommodate cutters with taper shanks.

Specially long bases are fitted to the headstocks in order to ensure rigidity and freedom from vibration, and in this way, provided the tools are kept reasonably sharp, smooth clean cutting is obtained. Operating screws are furnished with suitable indicators, and dead stops, efficient adjustment being provided in each case. A feature of the machine is the rapid dividing capstan, the subject of a patent, which may be indexed for work having four, six or eight faces by the single movement of a lever. This is automatically clamped in position immediately the indexing operation is accomplished.

# SHIPPING INTELLIGENCE.

## SUEZ CANAL TRAFFIC IN 1920.

Particulars of the traffic through the Suez Canal in 1920 are contained in a White Paper issued last week. There were 4,009 transits, an increase of 23 on the previous year's figures, while the net tonnage was much greater at 17,574,657 as against 16,013,802. The British share of the transits was not so large as in 1919, the figures being 2,359 as compared with 2,679, while the net tonnage fell from 11,355,067 to 10,838,842. Japan was again second with 385 vessels of a net tonnage of 1,601,468, while Holland was third with 330 vessels, and 1,425,808 tons. The total receipts for the year amounted to 151,867,825 francs. The number of passengers was 500,147, 108,820 being British, 96,133 French, and 43,276 Czechoslovaks. The mean duration of the passage of vessels was 16 hours 28 minutes. 64 passages were made by vessels drawing upwards of 8 metres (27 feet.) with a length exceeding 150 metres (500 ft.) and a beam of more than 18 metres (60 ft.). 441 vessels made the passage for the first time, of which 133 were under Government charter.

## CONDITIONS AT GALATZ.

The following extracts are taken from the report of Mr. Clifton, Acting Vice-Consul at Galatz, on shipping and trade at that port in 1920 :—

The importation of cotton and woollen goods continued throughout the year on a large scale, and competition has been sufficiently keen to bring about sales at prices from 30 to 40 per cent. below cost prices. There are now above 400 wholesale dealers in cotton and woollen goods as against 10 or 12 in pre-war days. Practically every shop in the town has been wholly or partly taken over by dealers in these commodities, and shops fitted out for pork butchery, barbers, druggists, restaurants, wine shops, printers, ironmongery, etc., now display, in large quantities, piece goods, and rentals sufficiently attractive to induce the former occupants to retire from their own trades have been paid. The importation of salted and dried fish has also been a feature of the year, and 2,400 tons of herrings in barrels were discharged from vessels sailings from United Kingdom ports.

Motor vehicles, in fairly large numbers, have also been imported and some considerable activity in motor road transport of goods has resulted. Much opposition to this new method of transport in town has been shown by the workers who have hitherto held the monopoly with oxen and horse-drawn vehicles. Large numbers of the peasantry have practically forsaken their work on the land and have reaped large profits by using their cattle and vehicles for haulage in the port. Very high rates have been and still are paid for transport of high class and expensive commodities by motor lorries from Galatz to the capital and other inland districts. As much as 6 lei per kilogramme is charged for such service.
